SUBJ 1. SOME EVIDENCE OF WAR WEARINESS IN NORTH VIETNAM

2. REPORTED GOOD HEALTH OF HO CHI MINH IN JUNE 1967

3. GENERALLY QUIET CULTURAL REVOLUTION ACTIVITIES AMONG LOCAL CHINESE

ACQ [redacted] FIELD NO. [redacted]

SOURCE [redacted]

E0 12958 3.4(b)(1)>25Yrs (C)

E0 12958 3.4(b)(1)>25Yrs (C)

(1. SUMMARY: ANTI-WAR FEELINGS, ALTHOUGH LOCALIZED, HAVE BECOME A PROBLEM FOR THE NORTH VIETNAM (NVN) GOVERNMENT.

CONFIDENTIAL [redacted]

CONFIDENTIAL [redacted]
(classification) (dissem controls)

THE TRADITIONAL CITY DWELLERS' ANTIPATHY TOWARD RUAL LIFE HAS ALSO BECOME A PROBLEM IN THE EVACUATION OF HANOI. HO CHI MINH REPORTEDLY WAS SEEN BY JAPANESE CAMERAMAN TO BE IN GOOD HEALTH AS OF JUNE 1967. THE LOCAL CHINESE COMMUNISTY IN HANOI CARRIES OUT "CULTURAL REVOLUTION" ACTIVITIES ON A RELATIVELY QUIET BASIS.)

EO 12958 3.4(b)(1)>25Yrs (C)

2. ON 25 JULY 1967, [redacted] STATED THAT NOT ALL NORTH VIETNAMESE SUPPORT CARRYING OUT THE PRESENT WAR UNTIL THE BITTER END. HE STATED THAT EVEN AMONG THE HIGH OFFICIALS IN THE GOVERNMENT, "A CERTAIN GROUP OF STAFF OFFICIALS" HAVE RAISED THE QUESTION IN OFFICIAL CIRCLES WHETHER "NORTH VIETNAM CAN WIN THE WAR AGAINST THE U.S." [redacted] COMMENT. THE OFFICIALS WERE NOT FURTHER IDENTIFIED.) AS A FURTHER EXAMPLE, HE SAID THAT IN AN UNIDENTIFIED VILLAGE NEAR THE COAST WHICH HAD UNDERGONE LAND REFORM, HE HAD ENCOUNTERED A CATHOLIC PRIEST WHO

EO 12958 3.4(b)(1)>25Yrs (C)

STATED FLATLY THAT HE WAS AGAINST THE WAR. ALTHOUGH THE PRIEST'S STATEMENT CAME AS AN OBVIOUS SURPRISE TO [redacted] AND

E0 12958 3.4(b)(1)>25Yrs
(C)

CONFIDENTIAL [redacted]
(classification) (dissem controls)

HIS OFFICIAL NVN INTERPRETER, THE PRIEST WENT ON TO SAY THAT FURTHER FIGHTING WOULD BRING NOTHING BUT MISERY AND DEATH TO THE PEOPLE. HE ADDED THAT HE DID NOT WANT THE VILLAGE TO BECOME A BLOODY GROUND IN THE EVENT A LANDING IS MADE BY THE U.S. TROOPS. [redacted] EXPLAINED THAT THE LAND REFORM ALLOCATIONS HAD TRIGGERED A RUMOR AMONG THE VILLAGERS THAT THEIR AREA WAS REGARDED BY THE GOVERNMENT AS A POSSIBLE ENEMY INVASION POINT. ACCORDING TO [redacted] THE ANTI-WAR FEELINGS OF THE PRIEST AND THE WAR WEARINESS OUTLOOK HELD BY OTHERS HAD BECOME A PROBLEM THAT THE NVN GOVERNMENT MUST RESOLVE.

E0 12958
3.4(b)(1)>25Yrs
(C)

3. [redacted] COMMENTED THAT ALTHOUGH EVACUATIONS FROM HANOI WERE PROGRESSING RELATIVELY SMOOTHLY, THE NVN GOVERNMENT WAS CONFRONTED WITH THE PROBLEM OF CONVINCING RESIDENTS TO LEAVE HANOI FOR THE SAKE OF THEIR OWN SAFETY. SUCH RESIDENTS CHOSE TO IGNORE THE EVACUATION ORDERS SIMPLY BECAUSE THEY FELT THAT THEY, AS CITY DWELLERS, WOULD NOT BE ABLE TO SUBSIST IN THE PROVINCES. HE SAID THAT THE NVN GOVERNMENT HAD MADE PATRIOTIC APPEALS TO HANOI RESIDENTS IN AN EFFORT TO PERSUADE

E0 12958
3.4(b)(1)>25Yrs
(C)

THEM TO FOLLOW EVACUATION ORDERS. HOWEVER, THE GOVERNMENT DID NOT INTEND TO TAKE PUNITIVE ACTION AGAINST RELUCTANT EVACUEES. [redacted] ADDED THAT THE NUMBER OF NORTH VIETNAMESE DEATHES RESULTING FROM U.S. BOMBINGS TOTALLED LESS THAN 10,000 DURING THE PAST ONE YEAR AND A HALF. [redacted] COMMENT: THERE IS NOW WAY OF DETERMINING SUBJECT'S BASIS FOR THIS STATEMENT.)

EO 12958 3.4(b)(1)>25Yrs (C)

4. [redacted] SAID THAT DURING THE LATTER PART OF JUNE 1967, [redacted] SAW PRESIDENT HO CHI MIN "SOMEWHERE IN THE OUTSKIRTS OF HANOI..." [redacted] HAD STATED THAT PRESIDENT HO APPEARED TO BE IN GOOD HEALTH AND THAT HO'S COMPLEXION WAS GOOD.

EO 12958 3.4(b)(1)>25Yrs (C)

5. [redacted] STATED THAT LOCAL CHINESE IN HANOI DID WEAR MAO BADGES AND CONDUCTED CLASSES ON THE TEACHINGS OF MAO. HOWEVER, LOCAL CHINESE WERE QUIET AND ORDERLY IN CARRYING OUT THEIR MAOIST ACTIVITIES. [redacted] SAID THAT THE FRONT ENTRANCE TO THE COMMUNIST CHINESE EMBASSY WAS ADORNED WITH A LARGE PICTURE OF MAO TSE-TUNG. IN THE RURAL AREAS, HE NOTED MANY NORTH VIETNAMESE FARMERS WEARING RED MAO BADGES BUT ADDED

TEXT OF CIA REPORT [redacted]

The bombing of the Doumer Bridge across the Red River by U.S. pilots on August 11, 1967, was very accurate and the bridge will never be able to carry either heavy rail or truck traffic without major reconstruction. While the dropping of one span about 300 meters from the Gia Lam District was important, the crucial damage was done to the structure itself by the impact of at least three high explosive bombs hitting on the remainder of the bridge leading to Hanoi City. The impact of the explosions loosened or broke large rivets that are vital to the structural design of the bridge and completely dislodged many of the braces where the spans are connected.

After the raid on August 21, heavy smoke and fire were noted northeast of the city of Hanoi in the direction of the Yen Vien Railyard for at least three hours. On the August 22 raid, one bomb either hit or hit near the East German Hospital and killed one Vietnamese doctor. Another bomb fell one block south of the French Delegation and the impact shattered glass in unspecified buildings of the French compound. One U.S. aircraft was destroyed by a missile and the plane was seen falling in the Gia Lam District.

In the late afternoon of August 22, it took members of the International Control Commission, who had priority, between three and four hours to get from Hanoi City to Gia Lam by crossing the Red River by ferry, because of extremely heavy traffic. Only two ferries are operating and they can accommodate six to eight vehicles, depending on the size of the vehicles. The ferries are towed by small boats.

On August 22, most of Hanoi City and all of Gia Lam District were blacked out. On the Hanoi side, there

APPROVED FOR RELEASE
DATE: MAR 2001

were only a few lights in the Hai Ba District and no lights in the area surrounding the train station. A few scattered lights were seen along the Red River bank close to the Doumer Bridge on the Hanoi side. Gia Lam Airport was lighted.

On August 22, neither the Pont des Rapides Bridge across the Canal nor the recently-constructed metal bridge about 100 meters south was operating. One span of the new metal bridge was knocked out and dropped into the river. Immediately north of the Pont des Rapides there is a pontoon bypass which can probably support light trucks.

[redacted] has been known in the past to embroider information for his own and his Government's purposes and the additional possibility that North Vietnamese officials are feeding him information for their own purposes, it is difficult to separate fact from speculation or misinformation in the report.

Begin text:

The group of officials in the North Vietnamese regime who have generally tended to take a more open-minded position toward the possibility of negotiations with the American Government to end the Vietnam War recognized in mid-August 1967 that chances for early peace talks were very slim. The North Vietnamese Ambassador to Indonesia, Pham Binh, who has been of this clique, sent word to Suharto's [redacted] for secret talks on the Vietnam problem, [redacted] that his (Binh's) optimism before departing for consultations at Hanoi in July 1967, had proven unjustified; before leaving Djakarta, Binh had told [redacted] he was hopeful that talks might occur in August or September 1967.

An Indonesian Embassy Official in Hanoi relayed to [redacted] the explanation that Pham Van Dong, chief figure in the so-called moderate clique, firmly believes that the war is going

SECRET

APPROVED FOR RELEASE
DATE: MAR 2001

so badly for the North Vietnamese that if it is not ended in a matter of months, North Vietnam would need massive Chinese intervention to prevent total collapse within eighteen months. Pham Van Dong and his sympathizers fear entry of Chinese combat troops almost as much as they do American troops; they have been concerned that only North Vietnam is suffering from further prosecution of the war; they believe North Vietnam's negotiating position will deteriorate further as America has stepped up its military pressure; outside help from Russia and China to North Vietnam is sorely limited and North Vietnamese civilian and military manpower is sorely pressed. Therefore, Dong's view was that the sooner negotiations could commence and relieve the military pressures on Hanoi the better for the North Vietnamese. This was a difference of viewpoint from Ho, however, not an open break. Dong has bowed to Ho Chi Minh's insistence that the war effort be continued.

Ho, who is as fully in control of the Hanoi regime as ever, agrees with Dong that the war is going badly and costing North Vietnam heavily at present. He sees the winter months, however, as a chance to improve the military position in the South somewhat, to increase supplies to Viet Cong elements in South Vietnam, and then to make a bid for peace talks from a greater position of strength shortly after the new year. He is confident that the North Vietnamese situation will improve over the next few months to permit this.

One factor influencing Ho is the change in the Soviet attitude. The Russians, who were earlier suspected by Ho Chi Minh of wobbling in their support of a militant Hanoi position, have now strongly urged Ho not to negotiate at least until early next year. They have promised Ho an additional two hundred million U.S. dollars worth of military and economic aid for Calendar Year 1968 if Ho fights on; if he does not, they threatened to cut off the aid. Their position is now almost as militant as that of Peking. The Soviets, however, have stated that they wish to have Ho continue fighting until early 1968 and then they will reassess the situation.

This conforms with Ho's own views, and the Pham Van Dong moderates also recognize that post-election political

instability could occur in South Vietnam and that increased Soviet aid would help the war effort greatly. They are skeptical whether either factor or both would offset increased American military strength and North Vietnamese declining resources. Ho's decision, however, stands, and both he and Pham Van Dong are relieved that there will be less necessity to rely exclusively on Communist China. Ho's Chinese top advisors, of whom five out of seventeen have been killed during recent war action and bombings, advocate indefinite continuation of the war. So does the pro-Chinese element in the North Vietnamese politburo, who would agree to negotiations only as a ruse to gain time for a renewed war effort.

(Source Comment: The Soviet reasons for wanting the war to continue until early 1968 are obscure unless they plan another military diversion in some other part of the world and want many American troops pinned down until then. The best way to increase the influence of the Pham Van Dong "peace-minded" clique and to convince them to strengthen their arguments with Ho in favor of negotiations is for the Americans to increase the pressure on Hanoi and prove that Ho is wrong in expecting military improvement before early next year.)

(CIA Comment: [redacted] has maintained frequent contact in Djakarta with Pham Binh and has been at least indirectly in touch with Pham Van Dong and other North Vietnamese officials over a period of several months. His description of Pham Van Dong as a relatively peace-minded North Vietnamese leader and of existence of a "moderate" clique may be overdrawn but probably not consciously on [redacted] part. He himself is fairly hawkish on Vietnam especially for an Indonesian, and it is more likely that Pham Binh and Pham Van Dong have consciously exaggerated their possible slight differences in view with Ho to impress the Indonesians. [redacted] was adamant, however, in insisting that the information on increased Soviet aid to Hanoi came from North Vietnamese officials themselves, whatever their motives for so advising him.

EO 12958 3.4(b)(1)>25Yrs
(C)

It is extremely doubtful that North Vietnamese officials would discuss with any foreigners the extent of disagreement

within the policy-making group at the top of the regime; it is equally improbable that they would reveal Soviet attitudes and conditions in granting aid or give precise information on the amount of aid. On the other hand, it is possible they have [redacted] determined to continue the war and that the Soviets have agreed to support them with additional aid. Other information on the status of Soviet/North Vietnamese aid negotiations indicate, however, that the aid agreements for the first six months of 1968 is still being negotiated and has not yet been signed. TEXT OF CIA REPORT [redacted]

EO 12958 3.4(b)(1)>25Yrs
(C)

B

Ambassador Herve Alphand, Secretary General of the French Foreign Ministry, said on August 28, 1967, that it was the conclusion of his government that the Vietnam war cannot be won and that the only solution is an American initiative for a ceasefire and a complete withdrawal over a period of two years. The withdrawal should be accompanied by guarantees for the integrity of both North and South Vietnam, and these guarantees, as well as the ceasefire, should be supervised by a consortium of nations organized for the purpose.

Alphand said his government was in touch with the Hanoi government and also with representatives of the Viet Cong in Algeria and Phnom Penh. The French government, therefore, believes that the proposition Alphand is describing would not be unacceptable to North Vietnam and the Viet Cong. The war cannot be won because Ho Chi Minh is prepared to take any punishment that can be meted out, including even the destruction of Hanoi, and because the North Vietnamese are willing to live in the hills for years rather than capitulate. At the same time, the Hanoi government would want a guarantee of the integrity of North Vietnam because it fears the Chinese. A supervised ceasefire and a withdrawal with guarantees of integrity might eventually result in a combined Vietnam, but probably not for a period of at least fifteen years.

Alphand expressed the opinion that an approach such as he described would bring about results. He considered that previous gestures by the American President had always been accompanied by conditions and that the only proposal that would work would be a simple proposal which would involve ceasefire, timed withdrawal, and supervised guarantees of integrity.

Begin Text

In a letter dated June 9, 1967, a Chinese resident of Haiphong writing to his relatives in Hong Kong made the following comments about effects of the air raids, the costs of evacuating his dependents from the city and other financial complaints:

a. "At the present time, Haiphong is daily being subjected to United States attack. This wild and savage bombardment by the American imperialists, particularly against Haiphong, has resulted in the large scale evacuation of the factories and population, and in turn has brought extreme poverty to the people.

b. "There are ten persons in my family, most of whom have no independent means of support, except my eldest son who has recently obtained a job at a plastics factory where he earns 50 dongs a month which just meets his own expenses. The second son drives an oxcart which is of some help. My third and fourth sons and fifth daughter are at school; my old mother and my wife live with a sixth daughter and seventh son, both of whom are of school age, but unfortunately, because of my financial situation, I cannot pay for their schooling.

c. "We have not been able to send all of our children to safety in the countryside. Three have gone with their school evacation group but their monthly board and lodging costs 100 dongs. Since I have been unemployed since March (1967), I grow deeper in debt. With no income and no reasonable work, I have volunteered to work in the forest, but while waiting for action on my application, I have been without a cent of income.

d. "Last month we received your package of medicines by post which helped expenses for a short time, but the money did not go very far towards paying the debts owed to my friends. I again beg you to send more medicine to help me in my present hardship. This time, send two packages, one to my wife and one to my friend. It is important that two different addresses of senders be used. This way I will be able to keep more of the B-12 (vitamins); otherwise, most if not all of it will be purchased by the government. Before sending the packages, first advise me of the name and address of each sender, so that due application to customs can be made." [redacted] Comment. Gift packages, particularly drug shipments, are highly valued for the price the drugs can be sold on the blackmarket. It is the standard practice of the North Vietnamese authorities, however, to appropriate as much as ninety percent or more of such scarce goods, reimbursement for which is made at official prices.)

Begin Text

EO 12958 3.4(b)(1)>25Yrs
(C)

Nam Ha, [redacted] June 30, 1967. Grandmother is very old and weak now. You would not recognize her because she is so thin. I am still all right. I still work at the company, but I have been evacuated to another place. My brother works at a textile factory and has been evacuated with his factory to Lang Son Province, far away on the China border. He is only an apprentice, so he gets only 27 dong a month. It is only enough for him and he cannot send anything back to support grandmother. I make only 37 dong a month when there is much work, but then there is little work I get only 34 dong. That is my net pay, but when I am ill the company has to pay for my medical care, and when I have children I will get a family allowance. If they are ever sick the government has to take care of them too. We work for the government so we belong to the government and we are under government administration. We have sold all that we have to buy medicine for grandmother because she gets ill very often. Now we have only our salary to depend on, which is very sad. Moreover, the war is spreading all over the country and no one can feel secure in his life. Who knows whether or not I will die in the next minute. The American bombs and bullets make no distinction between persons, they threaten everybody.

EO 12958 3.4(b)(1)>25Yrs
(C)

Hanoi, June 29, 1967. Our health situation is not very good, even though we are not really ill. My daughter is rather small and thin and she does not have a good appetite. My wife is also getting thinner and sometimes has to use medicine. Due to the difficult war situation, nourishing food is lacking and medicines are rare. Our only solution is to try and bear it.

~~CONFIDENTIAL~~

Ha Bac, June 15, 1967. At present our family is meeting many material difficulties. Because our salary is just sufficient for ourselves, we really cannot afford to help father and mother. I try very hard to save money to help our parents, but it is still very scarce. As to the war situation, it is very hard. Living conditions are very poor because we have to reserve everything for the front. Our food is now composed of 70 percent rice and 30 percent wheat flour, and you know the nutritional value of wheat flour is very low. Living is very difficult.

Huong Phuong, May 30, 1967. These days mother is not as strong as before. Because we have been evacuated medicine is rather rare, and on the other hand, becuase of the war, food is not sufficient. Since we are engaged in a war, want is the common situation of everybody.

Viet Bac [redacted] - Hanoi), May 20, 1967. An evacuated student. In general our activities and studies are getting more burdensome. Not only do we have to concentrate on our studies, but we also have to work to promote production. Specifically, we have to plant vegetables, raise pigs and poultry, etc. to support ourselves with food in this hard time. In the botany class we plant mushrooms for the whole faculty. According to science, one kilogram of mushrooms is more nourishing than one kilogram of fresh beef. This is why this is a very important task. In addition, we have to "make artificial meat." In a word, we try to make everything ourselves.

(classification) (dissem controls)

SUPPORT. LOSS OF POPULATION FROM VC CONTROL CONTINUES TO REDUCE THE MANPOWER AVAILABLE FOR TROOPS, LABOR SUPPORT FOR THE MILITARY, AND TILLERS OF THE FIELDS. DESPITE SUCH EROSION, HOWEVER, THE VC STRUCTURE REMAINS STRONG AND DANGEROUS, WITH FAIR TO GOOD MORALE IN THE UPPER LEVELS. THEY LAUNCHED VERY FEW SIZEABLE MILITARY ACTIONS IN JULY, HOWEVER, FOCUSING THEIR RESOURCES ON ATTACKS ON SMALL OUTPOSTS AND ON HARASSMENT OF REVOLUTIONARY DEVELOPMENT PROGRAMS, CHIEU HOI (OPEN ARMS) AND REFUGEE CENTERS, AND LINES OF COMMUNICATION. THERE APPEARED TO BE AN ELEMENT OF DESPERATION IN THEIR INCREASING RESORT TO INDISCRIMINATE TERRORISM. THE CHIEF NEW DEVELOPMENT IN JULY WAS THE GREATLY INCREASED ATTENTION DEVOTED TO THE APPROACHING NATIONAL ELECTIONS. THIS CONSISTED ALMOST ENTIRELY OF PLANNING, PROPAGANDIZING, AND SPREADING THREATS OF DEATH TO THOSE WHO SUPPORT THE ELECTIONS. SOME MINOR ORGANIZATIONAL CHANGES WERE NOTED DURING THE MONTH.

EO 12958 3.4(b)(1)>25Yrs (C)

END SUMMARY.

VC PROBLEMS:

1. FOOD SHORTAGES WERE VERY SERIOUS IN JULY IN ALL BUT IV CORPS, AND EVEN THERE THE VIET CONG (VC) WERE HARD PRESSED

EO 12958 3.4(b)(1)>25Yrs (C)

C-O-N-F-I-D-E-N-T-I-A-L [redacted]
(dissem controls)

IN SOME AREAS TO COLLECT ENOUGH FOOD. IN I AND II CORPS A CONSIDERABLE AMOUNT OF MILITARY MANPOWER HAS BEEN DIVERTED TO AGRICULTURAL PRODUCTION AND COLLECTION OF FOOD FROM THE PEASANTS; FOR EXAMPLE, ONE BATTALION OF THE 95TH NORTH VIETNAMESE ARMY (NVA) REGIMENT IN PHU YEN PROVINCE HAD 15 PERCENT OF ITS MEN DETAILED TO AGRICULTURAL PRODUCTION. THE FOOD SHORTAGE HAS CONTRIBUTED TO POOR MORALE AND TO DESERTIONS AND DEFECTIONS. THE FUNDAMENTAL PROBLEM IS AN ABSOLUTE SHORTAGE OF GRAIN CAUSED BY DECREASED PRODUCTION AND INCREASED DEMAND, BUT THIS HAS BEEN COMPOUNDED BY SERIOUS DISLOCATION OF THE VC SUPPLY SYSTEM. ALLIED SWEEPS HAVE BROKEN UP VC SUPPLY ORGANIZATIONS, AND ALLIED UNITS ARE OCCUPYING KEY LOCATIONS ON SOME OF THE ESTABLISHED COMMO-LIAISON ROUTES. IN NINH THUAN A NUMBER OF CADRES WERE REPLACED BECAUSE OF FAILURE TO SECURE SUPPLY ROUTES FROM THE MAIN LOGISTIC SUPPORT AREA TO SECRET OPERATIONAL BASES. MEDICAL SUPPLIES, ESPECIALLY ANTIBIOTICS, ARE SHORT IN ALL AREAS.

2. THE VC ARE SUFFERING FROM A SHORTAGE OF TAX INCOME ALL OVER THE COUNTRY. RAISING TAX LEVELS HAS SERVED TO MAKE COLLECTION ALL THE MORE DIFFICULT, AND LOCAL UNITS

EO 12958 3.4(b)(1)>25Yrs
(C)

ARE INCREASINGLY RESORTING TO TERRORISM TO ENFORCE PAYMENT. IN SEVERAL DIFFERENT PARTS OF THE COUNTRY INDIVIDUALS HAVE BEEN "EXECUTED" FOR NON-PAYMENT OF TAXES.

3. POPULATION CONTROL AND LOSS OF POPULAR SUPPORT ARE GROWING PROBLEMS. ALLIED SUCCESS HAS MADE PEOPLE IN MANY AREAS RELUCTANT TO COOPERATE WITH THE VC. TO ENFORCE COOPERATION, THE VC HAVE FREQUENTLY RESORTED TO TERROR AND INTIMIDATION, WHICH HAVE INCREASED THEIR UNPOPULARITY. THE KHANH HOA PROVINCE COMMITTEE FOUND ITSELF IN AN UNHAPPY DILEMMA: IT DECIDED IT DID NOT HAVE SUFFICIENT TROOPS TO COUNTER ALLIED OPERATIONS AND MAINTAIN CONTROL OVER THE POPULATION AND FOOD PRODUCTION, BUT IT COULD NOT SUPPORT ANY ADDITIONAL TROOPS BECAUSE OF THE UNAVAILABILITY OF FOOD. IN IV CORPS, VC HAVE COMPLAINED OF LACK OF POPULAR SUPPORT BOTH IN CONTESTED AREAS AND VC AREAS.

4. MORALE IN THE LOWER ECHELONS IS POOR NEARLY EVERYWHERE. HIGHER-LEVEL CADRES AND MAIN-FORCE TROOPS ARE GENERALLY IN BETTER SHAPE AND A FEW INSTANCES OF HIGH MORALE ARE REPORTED. FOOD AND MEDICAL SHORTAGES AND, ESPECIALLY, THE AWESOME POSER OF ALLIED MIL TARY FORCES CONTINUE TO DEPRESS

ED 12958 3.4(b)(1)>25Yrs
(C)

[redacted]

MORALE.

5. PERHAPS THE MOST IMMEDIATELY CRITICAL PROBLEM IS THE SHORTAGE OF MANPOWER, WHICH IS TO A LARGE EXTENT AN OUTGROWTH OF THE PROBLEMS ALREADY DISCUSSED. ALTHOUGH DECLINING POPULAR SUPPORT MEANS FEWER VOLUNTEERS, THE PHYSICAL EXODUS OF PEOPLE FROM VC-HELD TERRITORY MEANS AN ABSOLUTE DECREASE IN AVAILABLE MANPOWER FOR ALL PURPOSES--TROOPS, AGRICULTURAL, LABOR, AND MILITARY SUPPORT ACTIVITIES. IN ONE DRAMATIC EXAMPLE, IN (*PORTION GBLD-BEING SVCD) PHONG DISTRICT OF QUANG TRI PROVINCE, 900(*BEING SVCD) FAMILIES REMOVED THEMSELVES TO A RELATIVELY SAFER RURAL DEVELOPMENT AREA.

6. IT HAS RECENTLY BECOME APPARENT THAT WHILE THE PEOPLE ARE LEAVING THE VC, THE VC ARE BEING FORCED TO LEAVE THE PEOPLE. ESPECIALLY IN I AND II CORPS, SUSTAINED ALLIED PRESSURE HAS DRIVEN A LARGE PART OF THE VC FORCES FROM THE POPULOUS COASTAL PLAINS TO THE SAFER BUT SPARSELY INHABITED MOUNTAIN JUNGLES. THIS IN TURN COMPLICATES THEIR RECRUITMENT AND FOOD-SUPPLY PROBLEMS.

7. THE VC ARE TRYING TO MEET THEIR MANPOWER PROBLEMS BY CALLING ON WOMEN AND CHILDREN. YOUTHS DOWN TO 14 YEARS

[redacted]

ED 12958 3.4(b)(1)>25Yrs
(C)

E0 12958 3.4(b)(1)>25Yrs
(C)

[redacted]

OF AGE ARE BEING TAKEN INTO THE ARMED FORCES. EVEN NORTH VIETNAM (NVN) HAS RESORTED TO LOWERED AGE STANDARDS FOR THE REPLACEMENTS IT SENDS SOUTH. SEVERAL RECENTLY INFILTRATED 16-YEAR-OLDS HAVE BEEN CAPTURED. RECENTLY SEIZED DOCUMENTS REVEAL THAT IN ONE AREA THE VC HAVE ORDERED THAT 50 PERCENT OF THE GUERRILLAS MUST BE WOMEN. IN ANOTHER AREA THE MINIMUM WAS SET AT 33 PERCENT. SOME PROVINCES REPORT FURTHER CUTS IN ADMINISTRATIVE STAFFS TO RELEASE MORE MEN FOR MILITARY SERVICE.

8. THE MANPOWER-REPLACEMENT PROBLEM WAS REPORTED AS BEING SERIOUS EVERYWHERE IN THE THREE NORTHERN CORPS AREAS EXCEPT IN QUANG TRI PROVINCE. IN QUANG TRI THEY CAN GET INFILTRATORS FROM THE NORTH WITH RELATIVE EASE, BUT REPORTS SAY THAT EVEN THERE THE QUALITY OF THE REPLACEMENTS IS DECLINING. IN POPULOUS IV CORPS, FIVE PROVINCES HAVE REPORTED SERIOUS MANPOWER PROBLEMS. KIEN HOA REPORTS NO

E0 12958 3.4(b)(1)>25Yrs
(C)

[redacted]

C-O-N-F-I-D-E-N-T-I-A-L (dissem controls) [redacted]

SUPPLY FOR LOCAL REPLACEMENTS BUT SAYS THE PROVINCE CAN NO LONGER EXPORT MANPOWER AS IT HAS IN THE PAST. E0 12958 3.4(b)(1)>25Yrs (C)

b. HOWEVER, DESPITE THESE CONTINUING AND, IN SOME CASES, GROWING PROBLEMS, THE VC ORGANIZATION IS EFFECTIVE AND THE VC FORCES RETAIN A FORMIDABLE CAPABILITY TO INFLICT DEATH AND DESTRUCTION.

PO ACTIVITIES

10. JULY WAS A RELATIVELY ROUTINE MONTH FOR VC ACTIVITY. THE ANNIVERSARY OF THE GENEVA ACCORDS, 20 JULY, WAS HERALDED BY THE VC PROPAGANDIST AS A GREAT OCCASION TO BE MARKED BY MAJOR MILITARY AND TERRORIST ACTIVITY, BUT IN THE EVENT IT WAS NOT DIFFERENT FROM ANY OTHER DAY. IN BINH THUAN PROVINCE, FOR EXAMPLE, THE VC PROPAGANDIZED THAT THERE WOULD BE POSTERS AND VC FLAGS EVERYWHERE ON THE 20TH AND THAT THE DAY WOULD BE CELEBRATED WITH "GLORIOUS ACHIEVEMENTS" AGAINST GOVERNMENT OF VIETNAM (GVN) INSTATLATIONS. IN FACT, ONE BULLDOZER WAS DESTROYED AND ONE SMALL, UNSUCCESSFUL ATTACK LAUNCHED, BOTH ON THE 19TH. ON THE 20TH, NOTHING HAPPENED. IN GENERAL, PREVIOUSLY ESTABLISHED TRENDS CONTINUED THROUGH THE MONTH, THE ONLY MAJOR CHANGE BEING THE INCREASING ATTENTION GIVEN

EO 12958 3.4(b)(1)>25Yrs
(C)

TO ANTI-ELECTION PLANNING AND PROPAGANDA AS THE 3 SEPTEMBER ELECTION DATE DREW NEARER.

11. EVERY PROVINCE [redacted] DOC REPORTED A GREAT DEAL OF ANTI-ELECTION ACTIVITY, MOSTLY IN THE FORM OF PROPAGANDA DISPARAGING THE ELECTIONS AS A "FARCE," STRESSING THE FUTILITY OF VOTING, AND SUGGESTING--SOMETIMES BY EXPLICIT THREATS--THAT SUPPORTING THE ELECTION INVOLVED SERIOUS RISK OF BEING KILLED. BIEN HOA PROVINCE REPORTED THERE WERE SOME INSTANCES OF VC SEIZURE OF FAMILY RECORD BOOKS AND IDENTIFICATION CARDS TO PREVENT VOTING. IN VINH LONG PROVINCE IT WAS NOTED THAT NEARLY ALL VC PLANS AND DIRECTIVES WERE PREFACED BY THE PHASE "FROM NOW UNTIL THE ELECTIONS," INDICATING THE IMPORTANCE ASSIGNED TO THE ELECTIONS BY THE VC LEADERSHIP.

12. MILITARY ACTION BY THE VC/NVA FORCES WAS GENERALLY LIMITED TO SMALL ACTIONS. IN QUANG NAM PROVINCE, HOWEVER, THEY MANAGED TO SCORE TWO "SPECTACULARS" OF THE KIND MOST USEFUL IN BOOSTING THEIR OWN MORALE AND PRESENTING THE WORLD WITH A PICTURE OF ALLIED VULNERABILITY. ON 14 JULY THE VC, UNDER COVER OF A MORTAR ATTACK, SEIZED THE HOI AN JAIL AND RELEASED THE PRISONERS. ABOUT 870 POLITICAL AND ECONOMIC

EO 12958 3.4(b)(1)>25Yrs
(C)

CADRE PRISONERS MADE GOOD THEIR ESCAPE, PROVIDING THE VC A MUCH NEEDED SUPPLY OF TRAINED MANPOWER. ON THE SAME NIGHT, AN NVA ARTILLERY UNIT HIT DANANG AIR BASE WITH 48 122MM ROCKETS, KILLING EIGHT, WOUNDING 175, AND CAUSING DAMAGE TO AIRCRAFT AND FACILITIES ESTIMATED AS HIGH AS 85 MILLION DOLLARS. IN BINH LONG PROVINCE ON 11 JULY THE ENEMY LAUNCHED AN ILL-CONSIDERED REGIMENTAL-SIZED OFFENSIVE AGAINST A BATTALION OF THE ARMY OF THE REPUBLIC OF VIETNAM (ARVN) 5TH DIVISION AND TOOK HEAVY LOSSES. THROUGHOUT THE REST OF THE COUNTRY, THE VC/NVA GUERRILLAS AVOIDED LARGE-UNIT CONTACTS AND LIMITED THEIR INITIATIVES TO HIT-AND-RUN MORTAR AND ROCKET ATTACKS, ASSAULTS ON SMALL OUTPOSTS, AND SMALL ATTACKS ON LINES OF COMMUNICATION.

13. TERRORISM INCREASED IN MOST AREAS, POSSIBLY REFLECTING AN INABILITY TO CONDUCT LARGER OPERATIONS. THESE ATTACKS TENDED TO CONTINUE THE INDISCRIMINATE CHARACTER NOTED THE PREVIOUS MONTH: PEOPLE WERE KILLED SEEMINGLY AT RANDOM BY MINES, BOOBY TRAPS, AND MORTAR FIRE. THERE WERE A FEW GROUP "&EXECUTIONS" OF PEOPLE WHO WERE ACCUSED OF SOME SORT OF ANTI-VC CONNECTIONS. IN NAM HOA DISTRICT OF THUA THIEN

PROVINCE, 14 SELECTED PEOPLE, INCLUDING A 4-YEAR-OLD CHILD, WERE ASSASSINATED. IN ONE SUCH CASE IN GIA DINH PROVINCE, SIX PEOPLE WHO WERE KILLED FOR INVOLVEMENT WITH GVN INFORMER ACTIVITIES WERE LATER FOUND NOT TO HAVE BEEN INVOLVED.

14. REPORTS FROM SEVERAL WIDELY SCATTERED PLACES INDICATED THE VC ARE STRIVING TO INCREASE THEIR CAPABILITIES AND ACTIVITY IN THE CITIES, BUT THERE WERE FEW SIGNS OF ACHIEVEMENT IN THIS REGARD DURING JULY. FOR THE FIRST TIME IN NEARLY A YEAR, VC-EMPLANTED GRENADES WERE FOUND IN DANANG CITY, BUT BOTH WERE DISARMED BEFORE EXPLODING. KIEN HOA PROVINCE REPORTED THE ORGANIZATION OF A "RESIGNED-TO-DEATH" CLASS FOR GIVING INDOCTRINATION AND TRAINING FOR SUICIDE ATTACKS ON GVN TARGETS.

15. THROUGHOUT THE COUNTRY THE VC CONTINUED TO GIVE HIGH PRIORITY TO COUNTERING GVN PACIFICATION PROGRAMS. AS PREVIOUSLY, THEY LAUNCHED NUMEROUS PHYSICAL ATTACKS ON REVOLUTIONARY DEVELOPMENT (RD) TEAMS, OFTEN SELECTING THOSE TEAMS WHOSE PROGRAMS WERE MAKING THE GREATEST PROGRESS. SOME PROVINCES, EXPECIALLY IN IV CORPS, HAVE NOTED INCREASED SOPHISTICATION IN THE ANTI-RED PROPAGANDA. A NUMBER

C-O-N-F-I-D-E-N-T-I-A-L
(classification) (dissem controls) [redacted]

OF TECHNIQUES, INCLUDING SONG AND POETRY-WRITING CONTESTS, ARE USED IN AN EFFORT TO TURN THE HAMLET-DWELLERS AGAINST THE TEAMS AND TO DEMORALIZE OR SUBVERT THE TEAM MEMBERS.

16. AGENT REPORTS, DEFECTORS, AND DOCUMENTS TELL OF VC DISTRESS OVER THE GROWING EFFORT OF THE CHIEU HOI (OPEN ARMS) PROGRAM. IN ADDITION TO CONDUCTING EXTENSIVE PROPAGANDA, THE VC HAVE MADE MORTAR ATTACKS ON CHIEU HOI AND REFUGEE CAMPS, KILLING AND WOUNDING A NUMBER OF INHABITANTS, AND THEY HAVE ASSASSINATED A NUMBER OF INDIVIDUAL HOIHXHANH (RALLIERS).

ORGANIZATIONAL CHANGES.

17. THERE ARE REPORTS FROM ALL FOUR CORPS AREAS OF VC MILITARY UNITS BEING BROKEN UP INTO SMALLER GROUPS AND RECEIVING TRAINING IN SAPPER ACTIVITY AND SMALL-UNIT TACTICS. IN PG CORPS, VC UNITS HAVE BROKEN INTO SMALLER GROUPS IN ORDER TO EVADE FRIENDLY FORCES, AND OBSERVERS SAY THEY SEEM TO BE ASSUMING A SUPPORT ROLE FOR NVA FORCES. THIS WAS DONE

C-O-N-F-I-D-E-N-T-I-A-L
(classification) (dissem controls) [redacted]

EARLIER IN I CORPS, WHERE IT REPORTEDLY CAUSED VC RESENTMENT AGAINST THE HVA.

18. AN GIANG PROVINCE REPORTS A "DONG KHOI" (MOVE OUT ALL FORCES) CAMPAIGN DESIGNED TO UNITE ALL VC FORCES UNDER A MILITARY COMMAND SECTION AND MAKE ALL CADRES WORK HARDER FOR THE SUCCESS OF THE FALL-WINTER CAMPAIGN. THE DETAILS OF THIS REPORTED POLICY ARE OBSCURE, BUT IT APPEARS TO INVOLVE AN INCREASED RELIANCE ON MILITARY DISCIPLINE IN PLACE OF POLITICAL MOTIVATION. BINH THUAN PROVINCE REPORTS THAT 60 NVN POLITICAL CADRES, WHO CAME DOWN IN MAY, HAVE BEEN ASSIGNED TO HELP DIRECT ACTIVITIES OF DISTRICT AND VILLAGE COMMITTEES. MANY OF THE BINH THUAN VC ARE LIKELY TO LOOK UPON THEM AS CARPETBAGGERS. THIS PROVINCE HAS ALSO RE-ORGANIZED THREE OF ITS DISTRICTS IN AN EFFORT TO RECOVER FROM THE DISRUPTION CAUSED BY ALLIED MILITARY OPERATIONS.

19. ON 1 JANUARY 1967, THE CENTRAL OFFICE FOR SOUTH VIETNAM (COSVN) ISSUED A DIRECTIVE THAT CADRES FROM VARIOUS LEVELS WOULD BE SENT DOWN TO LOWER LEVELS TO STRENGTHEN THEM [redacted] = TDCS-314/05040-67 SUBSEQUENT REPORTING INDICATED COMPLIANCE WITH THE DIRECTIVE IN A NUMBER OF PROVINCES, IN-

SUMMARY. DURING THE PERIOD 3-8 AUGUST 1967, MEMBERS OF THE FIFTH RUSSELL TRIBUNAL INVESTIGATION TEAM WERE EXCORTED TO CITIES IN THE VICINITY OF HANOI TO WITNESS THE BOMB DAMAGE. ALL OF THEIR TRAVELING WAS DONE AT NIGHT BY AUTOMOBILE. THE ROADS OVER WHICH THEY TRAVELED WERE IN A BAD STATE OF REPAIR AND IN MANY PLACES COULD NOT BE USED BY A

EO 12958 3.4(b)(1)>25Yrs
(C)

APPROVED FOR RELEASE
DATE: FEB 2001

PRESERVATION COPY

VEHICLE LARGER THAN A SMALL TRUCK. A VIETNAMESE OFFICIAL SAID THAT ROADS IN THE AREA SURROUNDING NAM DINH CITY WERE SO BAD THAT IT WAS BECOMING INCREASINGLY DIFFICULT FOR SAM MISSILE TRANSPORTERS TO MOVE FROM PLACE TO PLACE. END OF SUMMARY.

1. IN EARLY AUGUST SEVERAL MEMBERS OF THE FIFTH RUSSELL TRIBUNAL INVESTIGATION TEAM WERE TAKEN ON GUIDED TOURS OF BOMBED CITIES IN THE HANOI VICINITY. THE FIRST TRIP TOOK PLACE ON 3 AUGUST WHEN THE TRIBUNAL MEMBERS WERE DRIVEN FROM HANOI TO THE TOWN OF SON TAY NORTH WEST OF HANOI ON ROUTE 11A. THEY WERE ACCOMPAINED ON THIS TRIP BY COLONEL HA VAN LAU WHO HAD BEEN THE SENIOR NORTH VIETNAMESE REPRESENTATIVE AT THE RECENT STOCKHOLM PEACE CONFERENCE. THE TRIP WAS MADE AT NIGHT. ABOUT 10 KILOMETERS FROM HANOI THE GROUP PASSED TEN SAM MISSILE TRANSPORTERS WITH MISSILES WHICH WERE APPARENTLY STOPPED FOR REPAIRS TO THE TRANSPORTERS. IN THE AREA FROM 11-20 KILOMETERS FROM HANOI ON ROUTE 11A THERE WERE NUMEROUS CONVENTIONAL AAA INSTALLATIONS NEAR THE ROAD. ABOUT 22 KILOMETERS FROM HANOI THE ROAD WAS BADLY CRATERED NEAR A DAM WHICH APPEARED TO BE INTACT. THE GROUP WAS TAKEN TO BAT LAI VILLIAGE, QUANG OAI DISTRICT, HA TAY PROVINCE WHICH THEY WERE TOLD HAD BEEN BOMBED WITH CLUSTER BOMB UNITS ON 26 JULY AND 1 AUGUST. NINE PERSONS WERE SAID TO HAVE BEEN KILLED AND 29 WOUNDED. THE VILLAGE WAS QUITE REMOTE AND HAD NO APPARENT

• SECRET (declassification) [redacted]

MILITARY SIGNIFICANCE.

2. ON THE NIGHT OF 5 AUGUST THE GROUP WAS DRIVEN FROM HANOI TO NAM DINH CITY. THEY WERE ACCOMPANIED ON THIS TRIP BY PHAM VAN BAC, WHO IS VICE PRESIDENT OF THE VIETNAMESE WAR CRIMES INVESTIGATION TEAM IN HANOI AND ALSO A JUDGE IN THE CITY OF HANOI. THE ROAD BETWEEN HANOI AND NAM DINH WAS IN A VERY BAD STATE OF REPAIR BECAUSE OF BOMB DAMAGE AND IN SOME PLACES IT WAS NECESSARY TO DRIVE BESIDE THE FORMER ROADBED. THE GROUP SAW MEDIUM SIZED TRUCKS WHICH HAD BECOME STUCK TRYING TO PASS BOMB DAMAGE ON SOME OF THE STEEP CURVES BESIDE THE FORMER ROADBED. THE FOLLOWING MORNING PHAM VAN BAC DISCUSSED ROAD CONDITIONS WITH THE TRIBUNAL GROUP AND SAID THAT THE ROADS IN THE NAM DINH AREA WERE IN VERY BAD SHAPE AND THAT IT WAS BECOMING INCREASINGLY DIFFICULT FOR THE SAM MISSILE TRANSPORTERS TO GET FROM PLACE TO PLACE.

EO 12958 3.4(b)(1)>25Yrs (C)

3. THE TRIBUNAL GROUP VISITED NAM DINH CITY ON 6 AUGUST. THEY WERE TOLD THAT 35-40 PER CENT OF THE TOWN HAD BEEN DESTROYED BY BOMBING AND THE GROUP AGREED WITH THIS ESTIMATE AFTER OBSERVING THE CITY. [redacted] DESCRIBED THE TOWN AS "EMPTY" AND SAID ALL LARGE HOUSES HAD EITHER BEEN DESTROYED OR DAMAGED. THE REMAINING INHABITANTS LOOKED TIRED AND DEPRESSED.) PHAM VAN BAC SAID THAT THE TOWN HAD A PEACETIME POPULATION OF 93,000 BUT DID NOT

• SECRET (declassification) [redacted]

EO 12958 3.4(b)(1)>25Yrs
(C)

SAY WHERE THE FORMER INHABITANTS HAD BEEN RELOCATED. BAC SAID THAT 106 RESIDENTS OF NAM DINH HAD BEEN KILLED BY BOMBS IN 1965 AND 1966 AND THAT 34 HAD BEEN KILLED IN 1967. [redacted] DESPITE VIETNAMESE CLAIMS TO THE CONTRARY, [redacted] THE TRIBUNAL MEMBERS PRIVATELY CONCLUDED THAT CIVILIAN CASUALTIES HAD NOT BEEN HEAVY IN NAM DINH.)

EO 12958 3.4(b)(1)>25Yrs
(C)

4. ON THE NIGHT OF 8 AUGUST THE GROUP, STILL ACCOMPANIED BY PHAM VAN BAC, WAS DRIVEN FROM PHU LY CITY TO NINH BINH CITY. THE ROAD BETWEEN THE TWO CITIES CROSSES TAAM SONG DAY RIVER TWICE AND AT BOTH CROSSINGS THE BRIDGES HAD BEEN BOMBED OUT AND PONTOON BRIDGES WERE IN USE. AT THE FIRST CROSSING ABOUT 15 KILOMETERS FROM NINH BINH THE PONTOON BRIDGE WAS TWO LANE AND TRAFFIC WENT THROUGH WITH LITTLE DELAY. HOWEVER, THE PONTOON BRIDGE AT THE CROSSING ABOUT 10 KILOMETERS FROM NINH BINH WAS ONE LANE AND REPRESENTED A CONSIDERABLE BOTTLENECK.

5. THROUGHOUT THE PERIOD 3-8 AUGUST WHEN THE TRIBUNAL MEMBERS WERE TRAVELING BY CAR AT NIGHT THEY FREQUENTLY PASSED LABORERS WORKING ON THE ROADS. THEY WERE TOLD BY PHAM VAN BAC AND COLONEL HA VAN LAU THAT SPECIAL "SHOCK BRIGADES" HAD BEEN CREATED TO HANDLE ROAD DAMAGE. THESE BRIGADES ARE MADE UP OF PERSONS WHO LIVE IN THE IMMEDIATE VICINITY OF KEY ROADS AND THEY ARE SUPPOSED TO BE AVAILABLE FOR ROAD REPAIR WORK IMMEDIATELY AFTER A BOMBING ATTACK.

EO 12958 3.4(b)(1)>25Yrs
(C)

• S E C R E T [redacted]
(classification)

MANY OF THE MEMBERS OF THE SHOCK BRIGADES ARE LABORERS DURING THE D WHO WORK EXTRA HOURS AT NIGHT ON ROAD REPAIR. AN EFFORT IS MADE TO KEEP STORES FOR ROAD REPAIR NEAR THE PLACES THEY MAY BE NEEDED. THE TRIBUNAL MEMBERS FREQUENTLY HEARD EXPLOSIONS AT NIGHT AND THEIR VIETNAMESE ESCORTS CALMED THEIR FEARS BY EXPLAINING THAT THE SHOCK BRIGADES WERE BLASTING ROCK OUT OF NEARBY SMALL HILLS FOR USE ON THE ROADS. PILES OF ROCK FOR ROAD REPAIRS WERE ALONG THE ROA AT REGULAR INTERVALS. ROAD DAMAGE SEEMED TO BE QUICKLY REPAIRED BUT THERE WERE NUMEROUS PLACES WHERE IT WAS OBVIOUS BECAUSE OF THE STEEPNESS OF THE SLOPE OR TIGHTNESS OF THE TURN THAT THE ROAD COULD NOT BE USED BY ANY VEHICLE LARGER THAN A SMALL TRUCK.

5. FIELD DISSEM: NONE.

7. HEADQUARTERS COMMENT: ADVANCE COPIES SENT ELECTRICALLY TO WHITE HOUSE, STATE, DIA, ARMY, NAVY, AIR, NIC, NSA, OCI.

SUMMARY. ON 5 AUGUST 1967 PHAM MY, THE NORTH VIETNAMESE VICE MINISTER OF HYDROLOGY, DESCRIBED THE DEVELOPMENT OF THE NORTH VIETNAMESE DIKE SYSTEM TO THE MEMBERS OF A VISITING FOREIGN DELEGATION. MY CHARGED THAT AMERICAN AIRCRAFT HAVE BEEN SYSTEMATICALLY

PRESERVATION COPY

SECRET (classification) [redacted]

BOMBING THE DIKES FOR ALMOST TWO YEARS. HE CLAIMED THE VIETNAMESE HAVE DEVELOPED A SYSTEM FOR RAPIDLY REPAIRING THE DIKES AND ARE BUILDING PARALLEL DIKES IN KEY AREAS IN PREPARATION FOR INCREASED AMERICAN ATTACKS ON EXISTING DIKES.

1. ON 5 AUGUST THE NORTH VIETNAMESE VICE MINISTER OF HYDROLOGY, PHAM MY, BRIEFED A VISITING FOREIGN DELEGATION ON THE NORTH VIETNAM DIKE SYSTEM. MY SUPPORTED HIS BRIEFING WITH CHARTS AND PHOTOGRAPHS AND WAS BOTH CONVINCING AND OBVIOUSLY VERY SERIOUS THROUGHOUT THE MEETING. HE BEGAN HIS TALK WITH A SHORT BRIEFING ON THE HISTORICAL DEVELOPMENT OF THE NORTH VIETNAMESE DIKE SYSTEM, NOTING THAT PRIOR TO THE MID-1950S IT WAS NOT UNUSUAL FOR RICE GROWING AREAS OF THE RED RIVER DELTA TO BE INUNDATED FOR PERIOD OF UP TO THREE YEARS. THE NORTH VIETNAMESE AGRARIAN REFORM PROGRAM BEGAN IN THE MID-1950S AND THE PRESENT DIKE SYSTEM DEVELOPED AT THE SAME TIME. THE DELTA AREA AND THE SURROUNDING PLAIN WHERE THE DIKE SYSTEM IS CONCENTRATED NOW CONTAINS NINE MILLION PEOPLE AND THE POPULATION DENSITY VARIES FROM 600 TO 1500 PER SQUARE KILOMETER. EIGHTY PERCENT OF THE RICE GROWING AREA IN NORTH VIETNAM IS NOW ARTIFICIALLY IRRIGATED AND THIS IS POSSIBLE BECAUSE OF THE DIKE SYSTEM. THE NORTH VIETNAMESE ARE WELL AWARE OF THE VULNERABILITY OF THE DIKES TO AIR ATTACK AND ARE MAKING AN EFFORT TO INSURE THAT THE SYSTEM WILL BE SECURE AGAINST SUCH ATTACK. THE AMERICANS HAVE BEEN BOMBING THE DIKES FOR THE PAST TWO YEARS AND THE CURRENT VIETNAMESE EXPERTISE FOR REPAIRING DAMAGED DIKES HAS DEVELOPED AS A RESULT OF THIS BOMBING. THE VIETNAMESE HAVE INSTITUTED A SYSTEM WHEREBY REPAIR MATERIALS AND LABOR BRIGADES ARE AVAILABLE IMMEDIATELY IN MANY KEY AREAS. THEY ARE THUS ABLE TO BEGIN REPAIRING THE DIKES ALMOST AS SOON AS THE AIRCRAFT LEAVE THE SCENE. THEY HAVE ALSO STARTED

5 4 3 2 1

SECRET (classification) [redacted]

CONSTRUCTION OF SMALLER DIKES PARALLEL TO KEY DIKES BUT ON HIGHER GROUND SO THAT ANY MAJOR BOMB DAMAGE TO KEY DIKES WILL AFFECT ONLY A SMALL AREA AS THE WATER RELEASED WILL AGAIN BE CONTAINED WHEN IT REACHES THE LEVEL OF THE PARALLEL DIKE.

2. MY CLAIMED THAT THERE WERE 55 AMERICAN AIR ATTACKS SPECIFICALLY AGAINST DIKES IN 1966 AND THAT THERE HAVE BEEN 36 SUCH ATTACKS SO FAR IN 1967. THESE ATTACKS HAVE BEEN DIRECTED PRIMARILY AGAINST THE REGIONS NEAR THE TRA LY RIVER IN THAI BINH PROVINCE AND THE NINH CO RIVER IN NAM HAN PROVINCE. BOMBS OF UP TO 3,000 POUNDS HAVE BEEN USED IN THESE ATTACKS. MY EXHIBITED TO THE GROUP BEFORE AND AFTER PHOTOGRAPHS WHICH HE SAID SHOWED CERTAIN DIKES DAMAGED BY BOMBS AND THE SAME DIKES AFTER THEY HAD BEEN REPAIRED.

3. [redacted] COMMENT. THE NORTH VIETNAMESE BRIEFING WAS PROBABLY A PART OF AN EFFORT TO CONVINCE VISITORS THAT THE UNITED STATES WAS CONDUCTING A PROGRAM TO DESTROY NORTH VIETNAM DIKES. NEVERTHELESS, THE INDIVIDUAL WHO ATTENDED THE BRIEFING WAS CONVINCED THE NORTH VIETNAMESE WERE GREATLY CONCERNED OVER THE POSSIBILITY OF A CONCERTED AMERICAN AIR ATTACK AGAINST THE DIKE SYSTEM, PARTICULARLY DURING THE COMING HIGH WATER SEASON.

4. NO FIELD DISSEM.

1. ON 11 AUGUST THE CAU LONG BIEN BRIDGE CONNECTING HANOI AND THE GIA LAM AREA ACROSS THE RED RIVER WAS BOMBED. THE BRIDGE CROSSES AN ISLAND IN THE RED RIVER AND ABOUT FORTY METERS OF THE BRIDGE SURFACE BETWEEN THE ISLAND AND GIA LAM WAS COMPLETELY DESTROYED WHILE ANOTHER THIRTY METERS OF THE SURFACE WAS SEVERELY TWISTED. THERE ARE 13 SETS OF BRIDGE PIERS BETWEEN THE ISLAND AND THE GIA LAM SIDE OF THE RIVER AND THE PIERS ARE ALTERNATIVELY SINGLE, THEN DOUBLE, THEN SINGLE, ETC. COUNTING FROM THE ISLAND SIDE TOWARDS GIA LAM THE TWO PIERS IN THE FOURTH LINE (C THE SECOND DOUBLE SET OF PIERS) WERE DESTROYED BY THE BOMBING. ONE OF THE TWO PIERS WAS COMPLETELY DESTROYED AND THE OTHER IS VISIBLE ABOVE THE SURFACE OF THE WATER BUT DOES NOT REACH THE BRIDGE. AS OF 22 AUGUST THERE WAS NO INDICATION THAT THE VIETNAMESE HAD MADE ANY EFFORT TO REPAIR THE BRIDGE ITSELF ALTHOUGH WORKMEN HAD REPLACED THE POWER AND ELECTRIC LINES CROSSING THE BRIDGE WHICH HAD BEEN DESTROYED WHEN THE BRIDGE WAS BOMBED.

2. SINCE 11 AUGUST TRAFFIC CROSSING THE RED RIVER AT THE BRIDGE HAS BEEN HANDLED BY TWO OLD FERRY BOATS, EACH TOWING A BARGE-LIKE BOAT. THESE FERRIES CARRY PRIVATE INDIVIDUALS AS WELL AS VEHICLES UP TO AND INCLUDING MEDIUM SIZED TRUCKS. BACKLOGS OF TRUCK TRAFFIC OF AS MANY AS 40 VEHICLES WERE OBSERVED ON BOTH SIDES OF THE RIVER DURING THE PERIOD 11 - 22 AUGUST, BUT THE BACKLOGS NEVER APPEARED TO HAVE REACHED A REALLY SEVERE STAGE AND USUALLY DISAPPEARED DURING THE DAY. THE FERRIES WERE HAVING SOME TROUBLE MANEUVERING BECAUSE OF THE DIFFICULTY OF TOWING BARGES AGAINST THE RIVER CURRENT; THEY FREQUENTLY WENT UPSTREAM AND LET THE CURRENT OF THE RIVER AID

SECRET [redacted]
(classification)

THEM IN CROSSING. TWO OTHER OLD FERRY BOATS WERE TIED UP ALONG THE RIVER BANK BUT DID NOT APPEAR TO BE IN USE. SMALL CRAFT TRAFFIC ACROSS THE RIVER DID NOT NOTICEABLY INCREASE AFTER THE BRIDGE WAS CUT.

3. SOURCE COMMENT: ULTIMATE SOURCE WAS FRANKLY SURPRISED THAT NO APPARENT EFFORT WAS MADE TO USE SMALL BOATS OR SAMPAN TYPE CRAFT TO TRANSPORT PEOPLE ACROSS THE RIVER. HE WAS ALSO SURPRISED THAT THERE DID NOT APPEAR TO BE ANY MAJOR BLOCKAGE OF TRUCK TRAFFIC. HE VISITED THE HANOI WATERFRONT ALMOST DAILY BETWEEN 11 AND 22 AUGUST AND DID NOT DETECT ANY SIGNS OF EFFORTS TO BUILD ALTERNATE MEANS OF CROSSING THE RIVER, SUCH AS PONTOON BRIDGES. SEVERAL VIETNAMESE NOTED THAT THE RIVER IS QUITE HIGH AT THIS TIME OF YEAR AND THAT IT WOULD BE DIFFICULT TO BUILD AND MAINTAIN A PONTOON BRIDGE.

INTELLIGENCE MEMORANDUM

Prospects for Agriculture in Communist Countries as of August 1967

Summary

Agricultural prospects as of August are relatively good in all the Communist countries except North Vietnam. Crop production for the Communist countries as a group will probably be above average, but less than last year, when record grain harvests were gathered in both the USSR and Eastern Europe (including Albania and Yugoslavia). Contracts to import grain are behind those of the last few years, although the demand for imports may rise if drought continues to affect the fall-harvested crops in China and Eastern Europe.

A record wheat crop has already been harvested in Eastern Europe. The Soviet wheat harvest is likely to be above average, but less than the bumper 1966 crop. The outlook for fall-harvested row crops such as corn, potatoes, sugar beets, and sunflowers is less favorable than a year ago in both the USSR and Eastern Europe. The production and procurement of livestock products, however, probably will exceed the levels of recent years.

Note: This memorandum was produced by CIA. It was prepared by the Office of Economic Research; the estimates and conclusions represent the best judgment of the Directorate of Intelligence as of 6 September 1967.

The early grain harvest in Communist China is estimated to have been better than in 1966, but it is too early to predict the outcome of the more important fall harvest. The Cultural Revolution thus far appears to have been confined primarily to urban areas, but agriculture may become increasingly involved in the coming months if unrest persists.

In North Vietnam the spring rice harvest -- normally about one-third of the annual rice crop -- is estimated to have been below average, primarily because of reduced acreage. The more important fall rice crop is also off to a poor start because of drought, but the final outcome will depend heavily on the effectiveness of irrigation in the Red River delta, where most of the rice is grown.

USSR

1. A good winter grain crop has been harvested in the USSR. Less is known about the spring wheat crop, the harvest of which is still under way in the important new lands areas of Western Siberia, the Urals, and northern Kazakhstan. One Eastern European source has indicated that Soviet officials expect a total grain crop of about 150 million metric tons* (compared with the 171 million tons claimed in 1966), and a Soviet source has estimated the wheat crop at about 82 million tons (compared with 100 million tons in 1966). The 1967 grain crop is tentatively estimated at 115 million to 120 million tons, including some 60 million to 65 million tons of wheat (the comparable estimates for 1966 are 140 million and 80 million tons, respectively).

2. The Soviet purchase in late July of only 2 million tons of wheat from Canada (leaving 4 million tons yet to be purchased under the three-year agreement ending in mid-1969) probably means that the USSR considers its wheat supply situation to be generally satisfactory. On the basis of the evidence presently

* Soviet statistics on grain production do not make allowances for trash, excess moisture, immature grain, and other factors, which normally amount to an estimated 15 to 20 percent of the total.

available, it is not believed that large additional purchases of wheat this year will be necessary. But, if the weather is inclement during the remainder of the harvest in the new lands -- a rather frequent occurrence -- the quality of the wheat could be reduced, and Soviet officials might feel compelled to import some additional grain, particularly if the alternative were to draw on reserves.

3. The production of row crops, such as corn, sugar beets, sunflowers, and potatoes, has probably been affected by the below-normal precipitation in much of European USSR during July. Although the cotton crop experienced some difficulties earlier this year, production of this irrigated crop is expected to approximate the record 1966 level. A record output of livestock products is expected this year, a result both of good feed supplies and of record numbers in most categories of livestock, but a shortage of processing and storage facilities is causing greater than normal losses of meat and milk.

Eastern Europe

4. Total production of grain in Eastern Europe is expected to be above average but not as high as in 1966 (66 million tons) because of a smaller corn harvest. The 1966/67 growing season for small grains was outstanding in most countries, and production records in wheat were set in all countries except East Germany and Poland. Although small grains planted in both fall and spring ripened almost simultaneously, harvesting losses were held to a minimum because the weather remained dry and additional harvesting machinery was available. One possible exception was East Germany, where intermittent rains, organizational problems, and the high moisture content of the grain may have caused excessive harvesting losses and reduced the milling quality of the grain.

5. The current outlook for fall-harvested crops, such as corn, sunflowers, sugar beets, and potatoes, is not as good as a year ago. Earlier forecasts for Czechoslovakia, Hungary, Rumania, Bulgaria, and

Yugoslavia have proved to be too optimistic because of below-normal rainfall. Drought conditions through early September could sharply reduce yields of these row crops, which got off to a late start in most countries and are now at a stage of growth that requires good soil moisture to result in high yields. The northern countries could still realize yields equal to last year, but this seems unlikely in the southern region. The production and procurement of livestock products during the first seven months of 1967 have increased over the same period in 1966 because of good feed supplies and favorable farm prices and will probably continue to exceed 1966 levels during the balance of the year.

6. Eastern Europe's demand for imported grain in FY 1968* is expected to be somewhat less than the 7 million tons purchased in FY 1967. Major importers will continue to be Czechoslovakia, East Germany, and Poland. Their demand for feed grain from the Free World will be stronger than for wheat. Bulgaria, Rumania, and Yugoslavia will again be able to export grain and could have 3 million tons available, including 1 million tons of wheat. Since 1 July 1967, Rumania and Bulgaria have agreed to export 205,000 tons of wheat to Egypt on credit.

Communist China

7. The winter wheat harvest in Communist China is estimated to have been slightly larger than in 1966. A reduction in sown area, caused by severe drought conditions at the time of fall planting, was more than offset by increased yields resulting from more favorable growing conditions. The early rice harvest was probably also better than in 1966 because of more favorable growing conditions in most of the major producing areas.

8. Drought conditions which began to appear in portions of North and South China in late July and early August may adversely affect fall-harvested crops, although it is still too early to predict the outcome of this important harvest. In North China, soil moisture as of 10 August was considerably below

* Fiscal year 1968 (1 July 1967 through 30 June 1968).

normal in portions of the provinces of Hopeh, Shantung, and Honan, which are major producers of miscellaneous grains such as millet, kaoliang, corn, and pulses. In South China, the coastal regions of Kwangtung Province -- particularly the important late-rice areas of the Canton delta and the Swatow plain -- appeared to be the most seriously affected by drought. In these regions, below-normal soil moisture conditions coincided with late-rice transplanting. The extent to which the late rice is damaged will depend upon the intensity and length of the drought and the effectiveness of irrigation facilities.

9. The Chinese have signed only one contract for the delivery of grain in FY 1968 -- with Australia for 1.5 million tons to be delivered by December 1967. Chinese grain imports in FY 1967 totaled about 5 million tons, 1 million tons less than in FY 1966. The Sino-Canadian grain negotiations planned for Canton in mid-August were canceled by the Chinese and have not yet been rescheduled. Under the three-year agreement covering the period 1 August 1966 - 31 July 1969, the Chinese have already purchased 2.5 million tons of Canadian wheat and can buy a maximum of 5 million tons more over the next two years.

North Vietnam

10. The spring rice harvest in North Vietnam, which normally accounts for about one-third of the annual rice crop, is estimated at about 1.4 million tons, or about 200,000 tons short of the average of recent years. Yields were about average, but acreage was reduced because of an early cold spell this spring, the disruptive effects of bombing attacks, a shortage of rice seedlings, insect and disease infestations, and the substitution of other crops in some of the spring rice fields.

11. In an attempt to increase total food production, the North Vietnamese substituted subsidiary crops and a quick-maturing late spring rice crop for some of the regular spring rice crop.* The resulting increase in the production of these crops was not sufficient to make up for the shortfall in the production of regular spring rice.

12. The important fall rice crop is off to a poor start. Drought conditions -- somewhat unusual at this time of the year -- have interrupted the normal progress of this crop in areas which depend on reservoirs and storage ponds for irrigation water. Much of the rice, however, is grown in the Red River delta, which is irrigated from river systems and probably not as seriously affected by the drought. Moreover, favorable weather from now to harvest could improve the prospects for this crop.

* The subsidiary crops are sweet potatoes, corn, manioc, and green beans. The fast growing late spring rice, normally grown primarily in the mountain areas, was planted in some of the delta provinces this spring. While this crop frequently has high yields, it is very susceptible to insect damage and, as it is harvested later than the regular spring rice crop, is more likely to interfere with the transplanting of the fall rice crop.

INTELLIGENCE MEMORANDUM

Vietnam Elections Situation Report No. 1

SUMMARY

The CIA Station in Saigon advises that the VC have apparently learned a lesson from last year's fiasco when they advertised that they would smash the Constitutent Assembly elections and actually did very little. This time they are promising less and doing more. The number of significant incidents of Communist violence is now at least three or four times normal and well above last year's pre-election level. Significant enemy-initiated activity has increased during the week throughout South Vietnam. While none of this recent activity has had the impact of the earlier shelling of Can Tho, the assualt on Quang Ngai, or the attack on Thang Binh District headquarters, recent terrorist actions do show the enemy's capability to hit the people. To date, however, we have seen no evidence that this terrorism is likely to cause a significant reduction in voter turn-out.

* * *

1. Saigon: The Combined Security Committee has a report that VC cadre operating in the Saigon area will shell the city on the night of 2-3 September. An artillery attack will start at 0500 hours on 3 September (1700 hours, 2 September Washington time) against sensitive installations in the Capital, especially polling booths. In support of the attack VC special mission cadres will set off explosions simultaneously at numerous polling places in order to prevent election participation.

2. In the past 72 hours, there have been twelve terrorist incidents in the Saigon area, resulting in 1 VC dead, 2 US dead, 18 VN wounded and 3 US wounded. Eight of these incidents, including four involving US personnel, took place during the night of 1-2 September. All US personnel killed and one of the US wounded were in Cholon area, which US personnel had been warned to avoid.

APPROVED FOR RELEASE
DATE: DEC 2000

E0 12958 3.4(b)(1)>25Yrs
(C)

3. General: In I Corps, all major population centers except Quang Tri were attacked during the past week. There was a sharp increase in attacks by fire along the coast of II Corps; propaganda, terrorism, and sabotage were evident in III Corps, and indiscriminate mining of roads and shelling of civilians was the rule in IV Corps. In the period 26 through 31 August, there were 324 incidents compared to the weekly average for 1967 of 478 but a better indicator of the intensity is the level of activity as measured by the increase in assaults, attacks by fire, kidnapping, and mining.

4. I Corps: In the past 24 hours I Corps reported the kidnapping of a hamlet chief, 12 subchiefs, and 52 civilians near Hoi An for the third group abduction in the area. Also in the Hoi An area, a resettlement camp was mortared resulting in one killed, one wounded, and the destruction of 50 houses.

5. In II Corps, a polling place was attacked and burned at Song Cau with three wounded. Near Tuy Hoa a base camp was attacked and an artillery position was mortared. The Dien Khanh District headquarters, Khanh Hoa Province was attacked by an unknown number of enemy with hand thrown charges killing two civilians and wounding 30. The Du Long District Hqs. and MACV Team No. 39, Ninh Thuan, received small arms and mortar fire killing one civilian and wounding 9.

6. In III Corps, terrorism and sabotage in the past day included detonation of a bike bomb in Ben Cat, Binh Duong Province, wounding 17 civilians and two ARVN. In Hau Nghia, Binh Long, and Bien Hoa Provinces, highways 1, 13, and 15 were interdicted by mining of bridges and culverts.

7. IV Corps reports a civilian bus detonating a mine in Dinh Tuong with casualties of 10 civilians killed and 15 wounded. Also in Dinh Tuong two bridges were destroyed along highway 4. In Vinh Long, Tra An District town was mortared with 15 civilians wounded.

VIETNAM STATION REPORT NO. 46/67 (26 AUGUST - 3 SEPTEMBER 1967)

A BARE AND BLESSED PLURALITY

THE FINAL FIGURES ARE NOT IN YET ON THE VOTING FOR PRESIDENT, AND NONE OF THE RESULTS HAVE BEEN ANNOUNCED IN THE SENATORIAL RACE. BUT EVEN IF WE DID HAVE ALL OF THE FIGURES, IT IS TOO EARLY TO MAKE A DEFINITIVE JUDGMENT ON THE MEANING OF THE 3 SEPTEMBER ELECTIONS IN SOUTH VIETNAM, BECAUSE AS MUCH IS UNKNOWN AS IS KNOWN. WHAT FOLLOWS, THEN, IS MORE A SIGH OF RELIEF THAT EVERYTHING TURNED OUT SO WELL THAN THE WISE PRONOUNCEMENT OF A DISPASSIONATE JUDGE.

THE OBSTACLES TO THE CONDUCT, PROPER OR IMPROPER, OF ANY ELECTION AT ALL IN THIS WEARY, DISCOMBOBULATED COUNTRY ARE SO ENORMOUS AS TO BE LITTLE UNDERSTOOD. IN A COUNTRY WHERE GROUND TRANSPORTATION BETWEEN MOST MAJOR CITIES AND

SECRET

APPROVED FOR RELEASE
DATE: FEB 2001

PRESERVATION COPY

TOWNS REMAINS UNDER CONSTANT THREAT OF HOSTILE INTERDICTION, IT WAS NECESSARY TO ESTABLISH THE ELECTORAL INFRASTRUCTURE IN 44 PROVINCES AND SIX AUTONOMOUS CITIES (DANANG, SAIGON, HUE, CAM RANH, DALAT, AND VUNG TAU). ALL TOLD, THIS MEANT THE SETTING UP AND STAFFING OF 8,808 POLLING PLACES.

EACH OF THE 11 PRESIDENTIAL CANDIDATES AND 48 SENATORIAL SLATES WAS THEORETICALLY ENTITLED TO AN OBSERVER AT EACH POLLING PLACE, AND THE VIETNAMESE GOVERNMENT WAS COMMITTED TO PAYING FOR THEM; FORTUNATELY, THE ACTUAL NUMBER OF OBSERVERS WAS K EPT WELL BELOW THE THEORETICAL MAXIMUM. EACH POLLING PLACE HAD TO BE PROVIDED WITH AN AMPLE STOCK OF BALLOTS FOR ALL OF THE CANDIDATES AND SLATES -- 460,200,000 BALLOTS IN ALL, IN ORDER THAT EACH VOTER COULD BE HANDED A HEFTY SHEAF OF 59 ON ENTERING. THIS MEANT MOVING ABOUT A THOUSAND TONS OF MATERIAL, OFTEN TO PLACES TOO SMALL TO FIND EXCEPT ON VERY LARGE-SCALE MAPS. AS A MEASURE OF THE PROBLEM, EACH OF THE EIGHT DISTRICTS OF BINH DINH PROVINCE (302,260 REGISTERED VOTERS) HAD TO BE PROVIDED WITH TWO 2 1/2 TON TRUCKS TO DISTRIBUTE THE BALLOTS AND COLLECT THEM AFTER VOTING.

~~SECRET~~

PRESERVATION COPY

THE PRE-ELECTION CAMPAIGN EFFORT WAS NO SMALL AFFAIR EITHER. EACH PRESIDENTIAL CANDIDATE AND SENATORIAL SLATE HAD THE RIGHT TO HAVE PRINTED AND DISTRIBUTED AT GOVERNMENT EXPENSE A NUMBER OF LEAFLETS AND POSTERS EXTOLLING THE CANDIDATES' VIRTUES AND PUBLICIZING THEIR SYMBOLS (USED AS IDENTIFICATION FOR THOSE MANY VOTERS WHO COULD NOT READ). ALL OF THIS AMOUNTED TO AN ADDITIONAL 144,720,000 PEICES OF PAPER, ENOUGH TO KEEP THE LANDSCAPE CLUTTERED AND THE SEWERS CLOGGED FOR SOME TIME. SURPRISINGLY, MOST OF THE POSTERS, LEAFLETS, AND BALLOTS GOT WHERE THEY WERE SUPPOSED TO, THANKS IN PART TO THE WONDROUS EFFICIENCY OF AMERICAN AIR SUPPORT.

THE VIET CONG AND NORTH VIETNAMESE ARMY DID EVERYTHING THEY COULD TO MAKE THE ELECTIONS FAIL. FORTUNATELY, ALL THEY COULD DO WAS NOT VERY MUCH AS OPPOSED TO THE MASSIVE EFFORT OF THE VIETNAMESE GOVERNMENT (WITH, OF COURSE, AMERICAN POWER IN THE BACKGROUND). BETWEEN 1800 HOURS, 2 SEPTEMBER, AND 0800 HOURS, 4 SEPTEMBER, THE VC KIDNAPPED 278 CIVILIANS, WOUNDED 160, AND KILLED 23 IN SOME 274 ATTACKS OF VARIOUS KINDS (THESE ARE MINISTRY OF SECURITY FIGURES).

[redacted] VINH LONG [redacted]

~~SECRET~~

EO 12958 3.4(b)(1)>25Yrs
(C)

PRESERVATION COPY

"ELECTION DAY BROKE CLEAR AND BRIGHT, AFTER A WET AND STORMY NIGHT. PART OF THE PRECIPITATION CONSISTED OF RIFLE AND MORTAR ROUNDS, GRENADES, AND MINES ..... WHEREAS, DURING LAST YEAR'S CONSTITUENT ASSEMBLY ELECTIONS, LARGE CROWDS HAD BUILT UP AT THE POLLS ONE HOUR BEFORE THEY OPENED, THIS YEAR FOUND PEOPLE STAYING AWAY IN A WAIT-AND-SEE POSTURE..... THOUGH OFFICIAL SOURCES STATED THAT ALL ROADS WERE OPEN AND THAT TRAFFIC WAS FLOWING AS USUAL, THE BUSES WERE NOT ON THE ROADS UNTIL THE MORNING HAD MATURED. BY 1000 HOURS; HOWEVER, MUCH OF THE WAIT-AND-SEE ATTITUDE HAD EVAPORATED AND THE PEOPLE WERE COMING TO THE POLLS IN MOUNTING NUMBERS....."

IN ANOTHER PROVINCE, LONG KHANH, A VILLAGE WHICH HAD FOUR INHABITANTS WOUNDED WHEN IT CAME UNDER MORTAR FIRE IN MID-MORNING, LATER REPORTED A 97 PERCENT TURNOUT AT THE POLLS.

IF THE VC FAILED TO MAKE MUCH OF AN IMPRESSION ON THE SOUTH VIETNAMESE POPULATION, THEY WERE MORE SUCCESSFUL IN THE CASE OF THE AMERICAN OBSERVERS SENT OVER BY PRESIDENT JOHNSON. GOVERNORS MURPHY OF CALIFORNIA AND GUY OF NORTH DAKOTA VISITED A POLLING PLACE IN TUY HOA CITY WHERE AN EXPLOSION SEVERAL HOURS EARLIER HAD KILLED THREE AND WOUNDED

PRESERVATION COPY

APPROXIMATELY 40; THEIR REACTION TO THE NEWS THAT SOME OF THE WOUNDED LATER RETURNED TO VOTE WAS DESCRIBED AS "FAVORABLE."

OF PARTICULAR SIGNIFICANCE WERE THE RESULTS IN IV CORPS, THE DELTA, WHERE ABOUT ONE-THIRD OF THE POPULATION OF THE COUNTRY LIVES (INCLUDING 1,694,944 REGISTERED VOTERS OUT OF A COUNTRYWIDE TOTAL OF 5,853,251). HERE, THE MAIN BURDEN OF SECURITY IS CARRIED BY THE VIETNAMESE THEMSELVES, SINCE AMERICAN GROUND TROOPS ARE LIMITED TO ONE INFANTRY BRIGADE.

[redacted] "GENERAL VOTER REACTION APPEARED TO BE THAT OF PARTICIPATING IN SOME FESTIVE OCCASION ..... WE ARE IMPRESSED BY THE MAGNITUDE OF THE GVN EFFORT TO ENSURE ORDERLY ELECTIONS IN THE DELTA, AND CONSIDER THE ELECTIONS A RESOUNDING VOTE OF CONFIDENCE BY THE PEOPLE FOR ..... THE CLOSEST THING TO ORDER AND STABILITY THAT THEY HAVE SEEN IN QUITE SOME TIME."

EO 12958
3.4(b)(1)>25Yrs
(C)

AS OF 1800 HOURS, 4 SEPTEMBER, THE 83 PERCENT OF THE VOTERS WHO TURNED OUT SEEM TO HAVE GIVEN THE MILITARY THIEU/KY TICKET A PLURALITY OF ABOUT 35 PERCENT. (UNOFFICIALLY, IT IS ESTIMATED THAT THIS MAY LATER DECLINE TO ABOUT 32 PERCENT.) THE PROBABLE SECOND-RUNNER, WHEN ALL OF THE RESULTS ARE IN,

PRESERVATION COPY

WILL BE A DARK HORSE, TRUONG DINH DZU, WHO HAD BEEN EXPECTED TO TRAIL FORTH OR FIFTH. TWO FAMILIAR OLD FACES, BOTH IN THEIR 50'S, TRAN VAN HUONG AND PHAN KHAC SUU, APPEAR TO BE COMING IN THIRD AND FOURTH. SOME QUICK ARITHMETIC INDICATES THAT, IF DZU, HUONG, AND SUU HAD BEEN ABLE TO UNITE, THEY MIGHT HAVE WON. AN EQUALLY SUPERFICIAL PROGNOSIS FOR THE FUTURE IS THAT, WHILE UNABLE TO UNITE IN RUNNING, THEY MAY FIND IT EASIER TO GET TOGETHER IN NEGATING EFFORTS OF THE NEW REGIME TOWARD CONSTRUCTIVE PROGRESS. WE SHALL BE WATCHING CAREFULLY FOR INDICATIONS OF A UNIFIED CIVILIAN OPPOSITION.

WHILE WE NATURALLY TAKE SATISFACTION OF THE ELECTIONS' OUTCOME, IT BY NO MEANS SIGNALS AN END TO VIETNAM'S DIFFICULTIES; RATHER, IT PRESAGES PROBLEMS OF A NEW SORT, IN SOME WAYS AS DIFFICULT OR MORE SO TO DEAL WITH AS THOSE WE HAVE FACED IN THE PAST. THE NEW LEGISLATURE HAS TEETH, AND NOTHING

PRESERVATION COPY

IN THE COMPORTMENT OVER THE PAST YEAR OF ITS FUTURE MEMBERS INDICATES THAT THEY WILL BE AFRAID TO BITE. OPERATING AS THEY WILL BE WITHOUT ANY FRAMEWORK OF ORGANIZED POLITICAL PARTIES, IT IS IMPOSSIBLE TO PREDICT WHAT SORT OF AN INFLUENCE THE LEGISLATORS WILL EXERT ON THE FUTURE OF THEIR COUNTRY. AT THIS POINT, THERE IS NO REASON FOR PESSIMISM, BUT RAMPANT OPTIMISM WOULD BE EQUALLY UNJUSTIFIED. WHAT IS CERTAIN IS THAT THE FUTURE OF VIETNAM DOES DEPEND ON A WISE AND FORCEFUL EXERCISE OF PRESIDENTIAL POWER BY THIEU (WHO HAS NOT PREVIOUSLY SHOWN HIMSELF TO BE FORCEFUL), AND ON THE NEW PRESIDENT'S ABILITY TO WORK IN CLOSE HARMONY WITH HIS VICE PRESIDENT (WHICH HE HAS NOT PREVIOUSLY DONE, EITHER). OF EQUAL IMPORTANCE WILL BE THE ABILITY OF THE TWO EXECUTIVE LEADERS TO ADAPT THEMSELVES TO WORKING WITH THIS NEW PHENOMENON, TO BOTH OF THEM TOTALLY UNFAMILIAR, A TUMULTOUSLY INDEPENDENT-MINDED LEGISLATURE.

DZU: ALL THINGS TO ALL MEN

OF ALL OF THE CIVILIAN CANDIDATES, IT WAS TRUONG DINH DZU WHO SEEMS TO HAVE ANNOYED THIEU AND KY THE MOST DURING THE RECENT CAMPAIGN. AT ONE POINT, KY EXCLAIMED THAT, IF THAT

PRESERVATION COPY

"ANIMAL" DZU WERE ELECTED, HE (KY) WOULD BUILD A CAGE FOR HIM. SINCE DZU NOW OFFICIALLY HOLDS 17.4 PERCENT OF THE NATIONAL VOTE, AND MAY END UP WITH ABOUT 22 PERCENT, THE CAGE MAY HAVE TO BE A BIG ONE.

IN THE 50 YEARS SINCE HE WAS BORN IN BINH DINH, DZU HAS MANAGED TO GET AROUND QUITE A BIT, AND HAS NEVER BEEN ACCUSED OF BEING BASHFUL. HE WAS EDUCATED IN FRANCE; VISITED THE UNITED STATES; BECAME A DISTRICT GOVERNOR OF ROTARY INTERNATIONAL; JOINED SOCIETIES FAVORING FRIENDSHIP WITH AMERICANS, JAPANESE, FRENCH, AND CHINESE; AND PARTICIPATED IN BOTH THE BUDDHIST AND CONFUCIANIST ASSOCIATIONS. IN THE PERIOD BEFORE THE ELECTION, HE CLAIMED ~~MACV~~ CIA SUPPORT, [redacted] HE ALSO TOLD [redacted] THAT HE WAS BACKED BY A LARGE AMERICAN FIRM, PACIFIC ARCHITECTS AND ENGINEERS. HIS SON REPORTED THAT DZU HAD BEEN SOLICITING HELP IN THE UNITED STATES, WHERE HE HAD HAD PROMISES FROM "SOME PROFESSORS," AND WAS ALSO GOING TO GET HELP FROM ESSO, WHICH HAD OFFERED HIM THE SERVICES OF A PUBLIC RELATIONS OFFICER. DZU HIMSELF STATED THAT HE HAD AN EXCELLENT CHANCE OF BEING ELECTED BECAUSE THE AMERICAN GOVERNMENT HAD GIVEN

E0 12958 3.4(b)(1)>25Yrs
(C)

PRESERVATION COPY

HIM 150,000,000 PIASTERS FOR HIS CAMPAIGN. AMONG HIS COMPATRIOTS, HE HAS CLAIMED SUPPORT FROM THICH TJZ QUANG AND THE EXTREMIST BUDHISTS, THE CATHOLICS, THE HOA HAO, THE CAO DAI, AND THE VIETNAMESE LABOR CONFEDERATION.

DZU'S RALLYING CRY IN THE CAMPAIGN HAS BEEN "PEACE" AND THE SYMBOL OF HIS TICKET IS THE "WHITE DOVE". THE FIVE SENATORIAL SLATES WITH WHICH HE IS ASSOCIATED BEAR THE NAMES "PEACE ON EARTH," "PEACE AND PROSPERITY," "PEACE AND CONTENTMENT I, II, AND III." HIS FULL-PAGE CAMPAIGN AD PUBLISHED THE DAY BEFORE THE ELECTION WAS CONINED ENTIRELY TO THE PEACE ISSUE, AND OUTLINED A PEACE PLAN WHICH INCLUDED THE UNCONDITIONAL CESSATION OF BOMBING IN NORTH VIETNAM, A TOTAL CEASE-FIRE SOUTH OF THE 17TH PARALLEL; TALKS WITH "OUR ALLIES," HANOI, AND THE NATIONAL LIBERATION FRONT; AND THE RECONVENING OF THE GENEVA CONFERENCE.

IN AND OF THEMSELVES, DZU'S PROPOSALS ARE NOT OBJECTIONABLE. UNFORTUNATELY, THERE IS SOME EVIDENCE THAT THE VC HAVE REGARDED DZU'S PLATFORM WITH SUCH FAVOR THAT THEY HAVE GIVEN HIM THEIR SUPPORT. FROM TAY NINH, FOR EXAMPLE, [redacted] REPORTS THAT "THERE HAD BEEN SUBSTANTIAL VC PROPAGANDA IN THE PROVINCE ORDERING THE PEOPLE TO

CENTRAL INTELLIGENCE AGENCY
WASHINGTON, D. C. 20505

OFFICE OF THE DIRECTOR

4 September 1967

MEMORANDUM FOR: The Honorable Walt W. Rostow
Special Assistant to the President,
The White House

SUBJECT: General Vanuxem's Comments to Ambassador Lodge

REFERENCES: A. Saigon Embassy Telegram 4867 (NoDis)
B. Saigon Embassy Telegram 4868 (NoDis)

1. General Vanuxem was one of Marshal de Lattre's most dashing and colorful young colonels and made a great military name for himself during the Franco-Viet Minh War, principally as the commander of Group Mobile 3 operating in the Red River delta. A fine military officer, he is not noted for political sophistication. He is bitterly anti de Gaulle and believed to have had ties with the OAS.

2. On the rice issue, China has and continues to supply North Vietnam with rice. In recent years China has been the major source of North Vietnam's rice imports. The full extent of such deliveries in the past and at present is not known--only sketchy material is available on seaborne and rail cargoes from China to North Vietnam. It is possible that transport disruptions and other activities associated with the cultural revolution have upset delivery timetables or reduced deliveries. Chinese exports elsewhere, however, have been affected very little.

3. This year we have noted a striking increase in North Vietnam's import of foodstuffs from Communist countries. During the first half of 1967 about 220,000 tons was delivered, compared to about 30,000 tons in the first half of 1966. If China has reduced its rice shipments, other Communist countries may be making up for such losses by growing deliveries of other grains and foods. Imports, however, are only a

APPROVED FOR RELEASE
DATE: DEC 2000

PRESERVATION COPY

small part of food supplies in North Vietnam. Food allocations in North Vietnam do not appear to have been cut in recent months. Reports indicate, however, the substitution of other grains for part of the rice ration. We have received no unusual reports of food deficiencies in North Vietnam.

4. Even if Vanuxem could raise a three division force of French Mercenaries, which we doubt, it would be hard to envisage a military unit whose introduction into the Vietnam conflict would have more unfortunate political consequences. Any US employment of French mercenaries would be a propaganda windfall of major proportions for Hanoi and would be an act our South Vietnamese allies would almost certainly consider politically unacceptable.

5. Any significant land invasion of North Vietnam would greatly increase the risk of direct Chinese intervention in the Vietnam conflict with major ground forces.

6. In short, we are very much in accord with Ambassador Bunker's comments as expressed in Reference B.

EO 12958 3.4(b)(1)>25Yrs
(C)

TEXT OF CIA REPORT [redacted]

A resident [redacted] who returned [redacted] in late August, 1967, from Canton where she had a reunion with her family, including a daughter who arrived in Canton from Haiphong in July, 1967, and a grandson who also fled from Haiphong to China in mid-August, stated that according to these members of her family there was no electricity nor water service in Haiphong. (Source comment: These refugees were not questioned about the specific dates the stoppages occurred nor the emergency measures put into effect.)

According to these two members of her family, the electric dynamo station at Lac Vien and Minh Khai Streets, Haiphong, had been completely destroyed in a recent air attack. (Source comment: The informant did not question her relatives about the specific date of the incident.) The refugees stated further that other recent air attacks against Haiphong had resulted in the destruction or heavy damage of the Haiphong Cement Works, the sardine factory at Cua Can, the battery factory near the railroad bridge, the wool factory at An Duong, and the dockyards at Ha Ly. The refugees reported also that the Haiphong customs godowns had suffered heavy damage as well as the Paul Bert Quarters of a cadre training facility in recent attacks.

The refugees stated (but did not say they had personally witnessed the incident) that during one recent air attack against Haiphong, in early August, the crew of an anti-aircraft position in the city had panicked before American aircraft were actually over the city and had fired their weapons at ground level instead of skyward, killing and wounding a large number of civilians gathered near a square on Saigon Street close to the Chinese Communal House.

According to the refugees, living conditions in North Vietnam were extremely hard. Families were being allowed to purchase only two rice bowls and one towel per family every six months. These essentials were only sold upon submission of the family's registration booklet. In the event of breakage to a rice bowl, the broken pieces had to be shown in evidence before authorization could be obtained to replace them. Each family was further allowed only one half a bar of soap every three months.

SECRET

The refugees stated that vegetables were rare and expensive. Although meat was available, the price had reached a level beyond the means of most, with some people complaining they had not tasted pork in a year; pork was being sold at 13 Dongs a catty. The price of rice at the official rate was set at .30 Dongs per catty; rice on the black market, however, commanded a price of three Dongs per catty. The official rice ration was approximately 15 kilos per person per month, but this was cut by 50 percent with flour from the Soviet Union. No cooking oil or sugar was seen on the market. It appeared that the North Vietnamese Government was acting leniently towards the black market, since the refugees had heard of no profiteer having ever been punished for this activity. Cheap cotton cloth from the Soviet Union had recently been brought in and was not rationed. Despite its poor quality, according to the refugees, the people were happy to have it and it sold well.

OVER TWO THOUSAND. INFORMATION AVAILABLE [redacted] INDICATES THAT ONE AMERICAN AIRCRAFT IS LOST FOR EVERY 7.2 MISSILE FIRINGS IN NORTH VIETNAM BUT THAT AMERICAN COUNTERMEASURES ARE CONSTANTLY INCREASING THE RATIO. NORTH KOREA IS TO SUPPLY INCREASED AID TO NORTH VIETNAM IN 1967. NORTH KOREA HAS ALSO SENT A TOTAL OF 130 FIGHTER PILOTS TO NORTH VIETNAM, OF WHOM 20 HAVE BEEN KILLED AND 16 WOUNDED. END SUMMARY.

1. [redacted]

EO 12958 3.4(b)(1)>25Yrs (C)
[redacted] IN JUNE 1967, [redacted] NORTH VIETNAMESE PRIME MINISTER, PHAM VAN DONG, DEFENSE MINISTER VO NGUYEN GIAP AND OTHER OFFICIALS. [redacted] TOLD [redacted] THAT A PARTICULAR WEAKNESS IN AMERICAN STRATEGY AND TACTICS IN VIETNAM WAS THE COMMITMENT OF ONLY 38 PERCENT OF THE FORCES TO COMBAT WITH THE REMAINDER IN A SUPPORT ROLE. THE VIETNAMESE BELIEVED THE VIETCONG HAD THE INITIATIVE BECAUSE IT COULD FORCE THE US INTO THE TYPES OF ENGAGEMENT PREFERRED BY THE VIETCONG. THE NORTH VIETNAMESE BELIEVED THE US WOULD NOT BE ABLE TO INCREASE ITS FORCES BEYOND 650,000 MEN.

EO 12958 3.4(b)(1)>25Yrs
(C)

•S E C R E T/ [redacted]
(classification)

2. THE NORTH VIETNAMESE OFFICIALS [redacted] THOUGHT THE US COULD ACHIEVE NOTHING BY MILITARY MEANS. THEY EXPECT THE WAR TO BE LONG AND THAT THE AMERICANS WILL IN THE END BE DEFEATED BY A BREAKDOWN IN MORALE, FATIGUE AND PSYCHOLOGICAL FACTORS.

3. THE NORTH VIETNAMESE ASKED FOR CONTINUED AND INCREASED AID FROM THE SOVIET BLOC, WHICH THEY FEEL THEY DESERVE BECAUSE VIETNAM IS FIGHTING IN THE INTERESTS OF ALL COMMUNIST COUNTRIES. A REQUEST WAS MADE MAINLY FOR MORE ANTI-AIRCRAFT ARTILLERY WEAPONS.

EO 12958
3.4(b)(1)>25Yrs
(C)

[redacted]

4. THE NORTH VIETNAMESE [redacted] EXPECT HAIPHONG TO BE BLOCKADED. THEREFORE, TWO NEW PORTS ARE BEING CONSTRUCTED TO SUPPLANT HAIPHONG AND WORKSHOPS ARE BEING BUILT IN UNDERGROUND CAVES IN CLIFFS NEAR THE SEACOAST. A NEW PORT HAS BEEN BUILT NEAR THE

EO 12958
3.4(b)(1)>25Yrs
(C)

CHINESE-NORTH VIETNAMESE BORDER WHERE MAJOR UNLOADINGS ARE ALREADY TAKING PLACE. FROM THIS PORT, THE OFFLOADED CARGOES ARE TRANSPORTED TO NORTH VIETNAM. [redacted] COMMENT: [redacted] NOT [redacted] CLEAR WHETHER THIS PORT WAS ON THE CHINESE OR THE VIETNAMESE SIDE OF THE BORDER. NOR [redacted] WHETHER THE LAND TRANSPORT OF CARGOES WAS BY RAIL OR ROAD.)

SECRET/[redacted]
(classification)

5. IN ADDITION, THE NORTH VIETNAMESE [redacted] THOUGHT VIETNAM WAS NOT LIKELY TO BE REUNITED UNDER PRESENT CONDITIONS. THEY SAID MORALE AMONG THEIR PEOPLE WAS HIGH AND THAT THEY WERE EAGER TO PURSUE THE WAR.

6. ACCORDING TO STATEMENTS [redacted] BY SOVIET OFFICIALS IN HANOI, THERE ARE ABOUT 200,000 CHINESE IN NORTH VIETNAM. THE CHINESE ARE UNARMED AND ARE PRINCIPALLY ENGAGED IN TRANSPORTATION AND ROAD REPAIRS. THE NORTH VIETNAMESE LEADERS [redacted] LOST CONFIDENCE IN AND BECAME FEARFUL OF COMMUNIST CHINA AFTER THE CULTURAL REVOLUTION BEGAN. NONETHELESS, THE CHINESE ARE SENDING LARGE FOOD SHIPMENTS TO NORTH VIETNAM.

EO 12958
3.4(b)(1)>25Yrs
(C)

7. NORTH VIETNAM REQUESTS AID THROUGH VARIOUS CHANNELS, INCLUDING APPROACHES TO INDIVIDUAL MINISTRIES IN FRIENDLY COUNTRIES. THUS, A [redacted] TRANSPORTATION MINISTRY DELEGATION WAS INVITED TO NORTH VIETNAM. [redacted] RAILS AND TRANSPORTATION EQUIPMENT ARE NOW BEING DELIVERED TO NORTH VIETNAM BY SURFACE TRANSPORTATION. DURING 1967 A NORTH VIETNAMESE DELEGATION HAS VISITED EVERY SOVIET BLOC COUNTRY TO DISCUSS AID FOR 1968. HANOI'S AID REQUESTS ARE GENERALLY ONE-THIRD HIGHER THAN THE AMOUNTS SUPPLIED IN 1967. ACCORDING TO SOVIET SOURCES, THE QUANTITY OF ARMS SUPPLIED

EO 12958
3.4(b)(1)>25Yrs
(C)

NORTH VIETNAM BY THE USSR IN 1967 IS GREATER THAN THE NORTH VIETNAMESE CAN POSSIBLY USE DURING THIS YEAR AND THEY SHOULD NOT TURN TO OTHER COUNTRIES FOR ADDITIONAL AID DURING THIS PERIOD. EQUIPMENT IS GIVEN VERY POOR MAINTENANCE AND REPAIR BY THE NORTH VIETNAMESE. THE SOVIETS HAVE SENT COMPLICATED DEVICES TO 450 INSTITUTIONS IN NORTH VIETNAM. [redacted] COMMENT: THIS WAS NOT FURTHER CLARIFIED.) THIS EQUIPMENT IS NOT BEING USED BECAUSE THERE IS NO WAY TO GET IT ASSEMBLED. THE NORTH VIETNAMESE ARE SEEKING EQUIPMENT OF MORE IMMEDIATE APPLICATION TO THE WAR, E.G., FIELD WORKSHOPS AND MACHINERY FOR REPAIR AND ASSEMBLY PURPOSES. MOST RECENTLY, ON 20 AUGUST, THE NORTH VIETNAMESE COMMUNICATIONS AND TRANSPORTATION MINISTRY ASKED THE POLISH GOVERNMENT TO PROVIDE FREE TRANSPORTATION BY SHIP FROM GDANSK TO HAIPHONG FOR ONE THOUSAND RAILROAD RAILS, WHICH HANOI HAD RECEIVED AS A GIFT FROM EAST GERMANY. THE NORTH VIETNAMESE SAID RAIL SHIPMENTS VIA CHINA WERE DIFFICULT NOW.

EO 12958 3.4(b)(1)>25Yrs (C)

EO 12958 3.4(b)(1)>25Yrs (C)

8. NORTH VIETNAM'S WISHES WITH RESPECT TO SUPPLIES ARE VERY HIGH. EAST GERMANY PROPOSED TO THE COUNCIL FOR MUTUAL ECONOMIC AID (CEMA) THAT AN ORGANIZATION BE ESTABLISHED TO COORDINATE BLOC AID IN ORDER TO TAKE CARE OF HANOI'S NEEDS. [redacted] THIS WAS NECESSARY SINCE THE VIETNAMESE WAR IS A GREAT BURDEN TO THE BLOC COUNTRIES, WHICH NOW MUST ALSO MEET NEW OBLIGATIONS TO THE ARAB STATES.

EO 12958 3.4(b)(1)>25Yrs (C)

SECRET [redacted]
(classification)

9. THE MOST IMPORTANT SUPPLIES, E.G., ARMAMENTS AND AMMUNITION, ARE BEING TRANSPORTED TO NORTH VIETNAM BY RAIL VIA CHINA. THE JOURNEY REQUIRES 20 TO 25 DAYS. [redacted] COMMENT: [redacted] PRESUMABLY [redacted] THE ENTIRE JOURNEY AND NOT THE TIME REQUIRED TO PASS THROUGH CHINA.) THE ONLY GOODS DELIVERED VIA HAIPHONG BY SEA ARE FUEL, CEMENT, FOOD, TRANSPORTATION EQUIPMENT AND OTHER BULK CARGOES. NO STRICTLY MILITARY GOODS ARE TRANSPORTED VIA HAIPHONG.

E0 12958 3.4(b)(1)>25Yrs (C)

10. A [redacted] DELEGATION TO NORTH VIETNAM VISITED UNDERGROUND HOSPITALS AND OBSERVED MANY WOUNDED SOVIETS WHO HAD BEEN ASSIGNED TO MISSILE AND AIR BASES. [redacted] COMMENT: [redacted] IT IS NOT KNOWN PRECISELY WHEN THESE OBSERVATIONS WERE MADE.) THERE ARE TWO SOVIET ADVISORY GROUPS IN HANOI FOR THE AIR FORCE AND FOR THE MISSILE UNITS. SOVIET SPECIALISTS ARE ASSIGNED TO THE AIR AND MISSILE BASES. THEIR NUMBER IS ESTIMATED AT OVER TWO THOUSAND.

E0 12958 3.4(b)(1)>25Yrs (C)

11. INFORMATION AVAILABLE [redacted] INDICATES THAT ONE AMERICAN AIRCRAFT IS SHOT DOWN OVER NORTH VIETNAM FOR EVERY 10-12,000 ANTI-AIRCRAFT FIRINGS. WITH RESPECT TO MISSILES, ONE AIRCRAFT IS SHOT DOWN FOR EVERY 7.2 FIRINGS. EFFECTIVE TACTICS AND ELECTRONIC COUNTERMEASURES BY THE AMERICANS ARE CONSTANTLY

1. LE DINH NAHN, THE NORTH VIETNAMESE DIPLOMAT IN PARIS WHO HANDLES LIAISON WITH THE FRENCH COMMUNIST PARTY ON PROPAGANDA MATTERS, MADE THE FOLLOWING COMMENTS IN EARLY SEPTEMBER 1967 ON PEACE NEGOTIATIONS [redacted]

A. THE PRINCIPAL OBJECTIVE IN PROPAGANDA ACTIVITY CONTINUES TO BE THE ADVOCATION OF COMPLETE AND UNCONDITIONAL CESSATION OF BOMBARDMENTS OF NORTH VIETNAM BY THE UNITED STATES. THIS OBJECTIVE MUST CONTINUE TO STAND BY ITSELF AND SHOULD NOT BE TIED TO ANY QUID PRO QUO ON THE PART OF THE NORTH VIETNAMESE GOVERNMENT.

B. IF THE BOMBARDMENT OF NORTH VIETNAM BY THE UNITED STATES CEASES, NORTH VIETNAM WOULD BEGIN NEGOTIATIONS WITH THE UNITED STATES. HOWEVER, THE NORTH

SECRET NO FOREIGN DISSEM
(classification) (dissem controls)

VIETNAMESE GOVERNMENT WOULD TAKE NO POSITION ON THE FORM THESE NEGOTIATIONS WOULD TAKE PRIOR TO THE UNCONDITIONAL CESSATION OF BOMBARDMENTS.

C. THE NORTH VIETNAMESE GOVERNMENT IS OPPOSED TO ANY NEGOTIATIONS BETWEEN THE UNITED STATES AND THE NATIONAL LIBERATION FRONT. THE UNITED STATES MUST NEGOTIATE DIRECTLY WITH NORTH VIETNAM.

EO 12958 3.4(b)(1)>25Yrs
(C)

D. THE NORTH VIETNAMESE GOVERNMENT IS OPPOSED TO ANY NEW GENEVA CONFERENCE ON VIETNAM. [redacted] COMMENT. [redacted] THIS NORTH VIETNAMESE POSITION, WHICH IS SHARED BY THE SOVIET UNION, REFLECTS THE NEED FOR EXCLUDING COMMUNIST CHINA FROM ANY ROLE IN NEGOTIATIONS ON THE VIETNAM WAR. COMMUNIST CHINA, [redacted] IS OPPOSED TO THE PRESENT NORTH VIETNAMESE POSITION ON NEGOTIATIONS.)

2. LE DINH NAHN COMMENTED THAT THE SOUTH VIETNAMESE ELECTION RESULTS CAUSED INCREASED DISUNITY IN SOUTH VIETNAM AND THAT HE EXPECTED THAT ALL SORTS OF PROPOSITIONS ON PEACE NEGOTIATION WOULD SOON BE FORTHCOMING AS A RESULT. NONE OF THESE PROPOSITIONS WOULD BE CONSIDERED, HOWEVER, UNLESS THERE WAS FIRST AN UNCONDITIONAL CESSATION OF BOMBARDMENTS OF NORTH VIETNAM.

3. LE DINH NAHN EXPRESSED GRATIFICATION THAT IN FRANCE AND THE UNITED STATES PUBLIC OPINION WAS INCREASINGLY FAVORABLE TO NORTH VIETNAM'S POSITIONS. IN HIS VIEW, THERE APPEARS TO BE ALMOST COMPLETE UNITY OF OPINION THAT THE UNITED STATES SHOULD CEASE ITS BOMBING OF THE NORTH. NAHN ATTACHED PARTICULAR IMPORTANCE TO THE FAVORABLE TREND HE BELIEVES IS DEVELOPING IN AMERICAN PUBLIC OPINION.

4. SOURCE COMMENT. [redacted] NAHN IS VERY OPTIMISTIC ABOUT NORTH

INTELLIGENCE MEMORANDUM

North Vietnamese Defense Minister Giap's Analysis of the War--I

1. The first part of a lengthy analysis of the war by North Vietnamese Defense Minister Vo Nguyen Giap has been received. This part of the article was serialized in the North Vietnamese press from 14 to 16 September and Hanoi radio began broadcasting the first installment on 17 September. Only eight of twelve parts of the first installment are available at the present time.

2. The first installment appears to be similar to the kind of article that Giap writes periodically. Such articles have become a regular feature of North Vietnamese propaganda during past years, one in July 1965, another in January 1966, and the last in January of this year. In general they are designed to provide Vietnamese Communist cadre, military personnel, and the populace the latest official view of the war. Although the articles are designed primarily for propaganda purposes, they provide useful insights into Hanoi's over-all thinking about US military strengths and weaknesses.

3. In the present article Giap attempts to take a bird's-eye view of US military objectives

Note: This memorandum was produced solely by CIA. It was prepared by the Office of Current Intelligence.

and strategy in South Vietnam since 1965 and tries to explain Communist counterstrategy in the most optimistic and confident terms. He begins, as usual, with an analysis of current US difficulties. According to Giap, US strategy in 1965 was designed to "annihilate the regular units of the Liberation Army" in two major operations, one north of Saigon and another in the "high plateau." Both of these operations were roundly defeated by the Communists, according to Giap; he boasts that not a single "small-size unit of the Liberation main force" suffered a significant defeat.

4. In discussing Communist counteroffensives, Giap emphasizes the growing significance of the political struggle in the South as a means of frustrating US ambitions. As an example, he cites the Buddhist-led demonstrations in the northern part of the country in the spring of 1966. Giap gives the impression that the Communists and their Liberation Front deserve all the credit for this three-month period of civil disorder, whereas available information indicates that the Communists muffed opportunities to exploit these disturbances effectively to promote Communist objectives.

5. Giap claims that the Communist military answer to the US was to open up a "new battlefield" in the fall of 1966. This operation, according to his analysis, forced the US to bring reinforcements into the northern provinces from other areas. The defense minister dismisses the bombings of the North as ineffective, noting that they had served only to harden the determination of the North Vietnamese people to assist the South. He also points to the cost to the US in money, pilots, and aircraft.

6. The general tone of the article is one of complete confidence in ultimate victory. Giap argues that the military situation has never been more favorable from the Communist point of view. He calls his forces "invincible" and asserts that foreign aid is "increasingly effective." He also claims that the North Vietnamese people are "resolved to heighten their determination to fight" and to "advance toward final victory."

7. Although there is nothing unusual in this first part of the first installment of Giap's new article, it should be noted that he frequently saves his main points, such as current and future Communist strategy and estimates of future US actions, for final sections.

8. Comments on the remainder of Giap's article will follow as it becomes available.

21 September 1967

INTELLIGENCE MEMORANDUM

North Vietnam Defense Minister Giap's Analysis of the War--II

North Vietnamese Defense Minister Vo Nguyen Giap, in the last portion of the first installment of his new analysis of the war, continues his analysis of the US positions in Vietnam. He insists that a quick victory in Vietnam is one of the essential components of US military strategy, saying that the US relies on "superior military force and firepower" to achieve victory in a "short time." The North Vietnamese military leader maintains that the US has set definite limits on its military objectives in South Vietnam, in an effort to keep the war from interfering with "political, economic, and social life in the US" and with US foreign policy in other parts of the world. Because of this, he predicts that the US will not enlarge the war outside its present boundaries. He also recommends that "world revolutionary people" and "imperialist allies" take advantage of this diversion of US interests to assert their own interests and independence.

The DRV Defense Minister also hopes to see a growth of political problems between the South Vietnamese Government and the US. Hopefully, he maintains that the "contradictions between the Vietnamese people and the US imperialists and their lackeys are the main contradictions which will determine the failure of the US imperialist's war of aggression". He relies on examples of increased desertion rates from South Vietnamese military forces, and the growing "Americanization"

Note: This memorandum was produced solely by CIA. It was prepared by the Office of Current Intelligence.

of the fighting effort to illustrate the difficulties the US faces in this area. Giap confidently predicts that this trend will increase rapidly in the future.

Comments on the remainder of Giap's article will follow as text becomes available.

TEXT OF A CIA REPORT

(2 723 0654-67)

SUBJECT: Current Conditions in North Vietnam

[redacted]

TEXT OF THE REPORT:

"A foreigner (politically neutral) who passed through Vientiane, Laos, said that North Vietnam is in chaos. The morale of the North Vietnam regular troops is deteriorating and members of the militia are surrendering to South Vietnam in increasing numbers. The nation at large is hoping for peace. Nearly all of the military and industrial facilities in Hanoi, Nam Dinh and Haiphong have been destroyed by bombings. There are rumors that the United States and North Vietnam are negotiating for peace through the United Nations Supervisory Commission (sic. presumably International Control Commission)."

INTELLIGENCE MEMORANDUM

North Vietnam Defense Minister Giap's Analysis of the War--III*

1. The concluding segment of North Vietnamese Defense Minister Giap's latest analysis of the war emphasizes his view on several points debated by the Hanoi leadership over the past two years. Perhaps most important is Giap's reaffirmation that although the Vietnamese Communists cannot hope to match the number of troops the US and its allies put into South Vietnam, they can nonetheless wage the war successfully. Giap argues that the Communists can overcome the numerical superiority of the allies by improving the quality of the Communist forces and by using superior tactics.

2. The defense minister says he expects the US soon to increase its troop strength in South Vietnam by 50,000, and eventually by as many as another 100,000 to 200,000. Even so, according to Giap, the Communists can maintain a "stalemate" situation. To do so, however, Giap indicates that the irregulars must play a greater role and that irregular strength must be raised. The relative importance of the guerrillas versus the regulars has long been a point of dispute within the Hanoi leadership. Giap has argued that the guerrillas, in conjunction with regular forces, could tie down and disperse US forces, thus prolonging the war until the US became tired. His opponents have argued that Communist main force units could successfully defeat the US and its allies in conventional warfare and that the role of the guerrillas should be subordinated to that of the regulars.

*This is an analysis of the concluding portion of Giap's article which was received out of sequence. The remainder will be reviewed during the next several days.

Note: This memorandum was produced solely by CIA. It was prepared by the office of Current Intelligence.

SECRET

3. Giap's statement sets forth his concept of the over-all strategy for the war. The tactics and types of Communist forces employed at any given moment in South Vietnam and in any given battle are dictated by the actual situation. Thus, in the area just south of the Demilitarized Zone, North Vietnamese regulars appear to be carrying the weight of the fighting. Giap appears to be arguing, however, that sufficient guerrillas of high quality could more effectively tie down US forces and thus limit the number of US troops available for search-and-destroy operations against North Vietnamese regulars. Giap dismisses the concept of a "barrier" across the northern portion of South Vietnam in a few sentences, stating that it would be ineffective.

4. Giap also addresses himself to the problem of the defense of North Vietnam, both against air strikes and against invasion, which he mentions as a possibility. He recites the usual exaggerated claims of the number of US aircraft shot down over North Vietnam but admits that some North Vietnamese air defense units have performed poorly. He calls for "disciplinary measures" against those whose "negligence" has caused avoidable damage and losses.

5. To improve the quality of the North Vietnamese forces Giap says the Communists must "develop the superiority of our existing weapons," invent "highly effective tactics," and improve the military organization. He comes down hard on the need for more and better military training. The North Vietnamese Army rapidly expanded in 1965 and 1966 to meet the challenge posed by the introduction of US combat troops into South Vietnam and, as a result, the quality of the army dropped. A number of North Vietnamese soldiers captured in South Vietnam have indicated they received insufficient training before being sent south. Also Hanoi's need to create a large air defense system almost overnight resulted in its putting many poorly trained personnel on the firing line. The defense minister clearly hopes to improve the quality of his troops during the coming year.

6. Giap concludes his analysis on a note of determination. He warns that the US can be expected to launch "fiercer and more bloody" attacks, but asserts that the Communists will be able to overcome their enemies no matter how difficult the task.

INTELLIGENCE MEMORANDUM

North Vietnam Defense Minister Giap's Analysis of the War--IV*

1. North Vietnamese Defense Minister Giap's latest analysis of the war gives no hint that Hanoi's leaders are growing discouraged or that they intend to make any concessions to bring the conflict to an early end. Instead, he implies that the Hanoi leadership is as determined as ever and remains confident of ultimate victory. Like his past analyses, Giap's latest review of the war provides a detailed explanation of the reasoning behind Hanoi's determination.

US Strategy

2. In essence, Giap argues that the US has been thwarted in its plan quickly to attack and destroy the Communist main forces. He contends that because of its world-wide military commitments, the US can put only a limited number of troops into South Vietnam and that it originally counted on a quick victory at a relatively small price. Giap asserts that the failure of the US to achieve a quick victory has forced it unwillingly into the position of fighting a prolonged conflict. In such a long-term struggle, the advantage remains with the Communist side, which is better able to persist. There are basic US weaknesses, according to Giap, which will eventually bring about US defeat in a protracted war.

*This is the final memorandum in the series on Giap's latest analysis of the war. It summarizes and analyzes the article as a whole.

Note: This memorandum was produced solely by CIA. It was prepared by the Office of Current Intelligence.

~~SECRET~~

3. One basic weakness of the US, he asserts, is the intrinsic inability of the South Vietnamese Army (ARVN) to perform adequately either as a combat or as a pacification force. This has forced the US to send additional troops to Vietnam and to spread its forces thin in an effort to take up the slack caused by the ARVN's failure. Giap confidently predicts that the performance of the ARVN will not significantly improve and, in fact, will further deteriorate, thus forcing the US to divert more of its forces from their primary task of seeking out and destroying the Communist main forces. The problem facing the US is so great, states General Giap, that putting another 50,000 US troops into South Vietnam will be like "throwing salt into the sea." Giap asserts that even another 100,000 to 200,000 US troops will not suffice to alter the "stalemate." Throughout his assessment, Giap uses the term stalemate to describe the relative strategic position at present between allied and Communist forces. In his view, a perpetuation of the stalemate is more advantageous to the Communists than to the allies.

Enemy Tactics

4. Even more important than US weaknesses, in Giap's assessment of the situation, is the role of Communist tactics in defeating the US. General Giap has long been a great believer in heavy reliance on guerrilla and unconventional warfare. Although he praises the regular Communist forces in South Vietnam, he emphasizes the unconventional aspects of their activity such as lightning raids on urban centers, sporadic mortar and rocket strikes against air bases and camps, and harassment of allied lines of communication.

5. Giap's thesis is that if the Communist forces can remain in the field, keeping the allies spread out and unable to concentrate their forces, they can inflict casualties and avoid head-on clashes with the more powerful US units. In time the allies will tire of the war, he argues, and the Communists will be able to gain an acceptable settlement.

6. Giap emphasizes a tactic which he himself used successfully in the French war--the concentration of main force units in a single strategic area rather than dispersing them less effectively throughout the country. Such an area, according to Giap's thesis, is carefully chosen--close to a safehaven from which troops can be quickly withdrawn or reinforced and for which resupply is relatively easy. In the present war, Giap finds the Tri-Thien area, just south of the Demilitarized Zone, such a strategic area. He argues that this concentration of main force troop strength has the value of tying down large numbers of US troops in areas of Communist choice. It forces the US to react by drawing down allied troop strength and fighting capacity in other areas. Giap claims that such a strategy enables the Communists effectively to counter superior enemy strength without attempting to match it man for man. It also relieves US pressure on other areas and enables Communist local guerrilla and regional forces (probably in conjunction with limited numbers of main force units) to operate more effectively in widespread areas of South Vietnam.

7. Such a concentration of Communist main force units appears directly to contradict the arguments of North Vietnamese politburo member General Nguyen Chi Thanh--who was directing the fighting in the South prior to his death in July of this year. In mid-1966, Thanh was calling for a build-up of main force units throughout the country as the only way to challenge the build-up of US forces in South Vietnam. This issue is apparently an important part of the military debate under way among the North Vietnamese military leadership over military tactics and strategy. This is the first time that Giap has identified himself so personally with the opposition to Nguyen Chi Thanh.

8. It would appear that Giap's strategy is now paramount. The bulk of infiltrating NVA units and replacement groups during 1967 have been committed to the I Corps area.

9. Giap departs further from Thanh's proposed course of action by taking the position that the war can be won through the use of main forces which do not "necessarily possess a strength equaling that of the enemy." The build-up of main forces, he adds, "must conform to the practical conditions of each region and battlefield," (i.e., where the US position is strong and difficult to overcome, Giap warns against over-committing Communist assets). In advocating this strategy, Giap seems to be constructing a rationale for the current Communist tactic of building up forces in the highlands and northern part of South Vietnam, while attempting only to maintain Communist strength at current levels in some other areas, notably coastal II Corps and the region northeast of Saigon. The strategy has been forced on the Communists to the extent that heavy losses and interdiction of supply lines inhibit a significant build-up of forces in certain areas.

10. Giap also applauds what he calls the "independent fighting method" of various elements of the Communist armed forces. Such independence of action, he claims, is a "unique" creation of the Communists in Vietnam. It includes mortar and rocket attacks on allied base areas and commando-like raids on enemy strongpoints conducted by "crack special units," small in number but high in quality. Such actions complement the "coordinated warfare which has long been the standard tactic advocated by Communist strategists.

11. Giap's emphasis on the use of the special unit tactic is probably another reflection of the growing difficulties the Communists have encountered in massing and using their forces in the face of allied pressure. Small-unit hit-and-run tactics offer the chance to inflict maximum damage on the allies at small cost to the Communist unit involved. They differ from simple guerrilla harassment in the quality and armament of the special units involved. Giap implies that "independent fighting methods" are especially useful in areas outside the normal operating area of regular Communist main force units.

Outlook

12. General Giap recognizes that the US may further escalate the war and inflict still greater damage both to North Vietnam and to Communist forces in South Vietnam. He also comments that the US may even invade North Vietnam or expand the ground war into Cambodia and Laos. He claims that the US may bomb North Vietnam's populated centers, further strike its lines of communications, blockade the coast, and bomb the dams and dikes. Despite all of these possible developments, Giap expresses confidence in the ability and determination of the "Vietnamese people" to continue to fight to victory.

13. Giap concedes, however, that greater efforts will be needed if the Communists are successfully to counter the expected step-up in US military activity. In the North, Giap calls for better military training, an expanded militia force, improved air defense work, and more strenuous efforts to keep open the lines of communication. In the South, he calls for more coordination between the various elements of the Communist armed forces.

MADE THE FOLLOWING COMMENTS ON THE VIETNAM WAR: THE DRV HAS NO FALSE ILLUSIONS CONCERNING THE EFFICACY OF INTERNAL US OPPOSITION TO THE VIETNAM WAR. THE DRV WILL COMMENCE NEGOTIATIONS WHEN THE US STOPS BOMBING NORTH VIETNAM. ALTHOUGH THE DRV FEARS THAT THE US WILL TRY TO BOMB THE DIKES, THE DRV BELIEVES THAT ANTI-AIRCRAFT DEFENSE WILL PREVENT THIS. THE DRV WILL DEFEAT THE US IN ANOTHER "DIEN BIEN PHU". END SUMMARY.

1. [redacted] EO 12958 3.4(b)(1) (C)

[redacted] THE FOLLOWING QUESTIONS TO VO VAN SUNG. SUNG'S REPLIES WERE AS SHOWN. QUESTION: WHILE I WAS IN THE UNITED STATES I LOOKED CAREFULLY INTO THE QUESTION OF INTERNAL US OPPOSITION TO THE WAR. I FIND THAT, PERHAPS, YOU ARE BANKING TOO MUCH ON THE EFFICACY OF THIS OPPOSITION. ANSWER: NO, I CAN ASSURE YOU WE HAVE NO ILLUSIONS ABOUT THIS. WE HAVE READ THE POLLS AND WE ARE HAPPY WITH WHAT WE SEE. HOWEVER, WE RECOGNIZE THAT, DESPITE THE EXTENT AND VOCIFEROUSNESS OF THE OPPOSITION, WE KNOW THAT IT REMAINS INEFFECTIVE AS LONG AS JOHNSON REMAINS UNCONVINCED.

~~S E C R E T NO FOREIGN DISSEM/NO DISSEM ABROAD/CONTROLLED DISSEM~~

(classification) (dissem controls)

2. QUESTION: HAS IT OCCURRED TO YOU THAT YOU ARE DRIVING JOHNSON INTO A CORNER; THAT, AS LONG AS YOU PERSIST IN YOUR REFUSAL TO USE DIPLOMATIC TOOLS TO END THE WAR, HE HAS NO ALTERNATIVE TO CONTINUING TO PURSUE THE WAR. ANSWER: ALL JOHNSON HAS TO DO IS TO STOP THE AGRESSION. WHEN THE BOMBING STOPS, WE WILL REACH OUR HAND OUT TO HIM. WE WILL THEN BEGIN TO TALK IN A QUIET AND RATIONAL WAY. JOHNSON OFFERED NOTHING NEW IN HIS LATEST SPEECH. THE BOMBING MUST STOP BEFORE WE TALK.

3. QUESTION: SALISBURY, IN HIS BOOK, CITES SOME QUESTIONS HE WAS ASKED IN HANOI WHICH INDICATE THAT YOU MAY SERIOUSLY UNDERESTIMATE THE VASTNESS OF UNITED STATES RESOURCES. ANSWER: OH NO. WE ARE NOT FOOLS, WE KNOW THE POWER OF THE UNITED STATES.

4. QUESTION: THEN YOU KNOW THAT YOU ARE FACED WITH ONLY TWO ALTERNATIVES: THE US CAN ESCALATE THE WAR TO YOUR DISADVANTAGE OR, IF THE US DOES NOT CHOOSE TO DO THIS FOR FEAR OF ADVERSE WORLD PUBLIC OPINION, THE BEST YOU CAN HOPE FOR IS AN INTERMINABLE CONTINUATION OF THE PRESENT SITUATION - A STALEMATE. IN OTHER WORDS. YOU SURELY CANNOT

HOPE FOR ANOTHER DIEN BIEN PHU. ANSWER: BUT YES. WE ARE PREPARING FOR A DIEN BIEN PHU AND IT WILL HAPPEN MUCH SOONER THAN YOU THINK. MORE THAN THAT I CANNOT TELL YOU.

5. QUESTION: WHAT ABOUT FURTHER US ESCALATION. IS THERE ANYTHING YOU REALISTICALLY FEAR? ANSWER: THE US COULD BOMB THE DIKES. QUESTION: I DON'T THINK THEY WOULD DO THAT FOR FEAR OF ADVERSE WORLD PUBLIC OPINION IN VIEW OF THE DIRE CONSEQUENCES OF SUCH ACTION. ANSWER: BUT THEY HAVE BOMBED SOME DIKES ALREADY. QUESTION: IF THEY HAD REALLY WANTED TO DESTROY THE DIKES, THEY COULD HAVE DONE SO. ANSWER: I DON'T THINK SO. OUR AIR DEFENSES aRE VERY EFFECTIVE.

EO 12958 3.4(b)(1)>25Yrs
(C)

[redacted] COMMENT: SUNG'S DISCUSSION ON POTENTIAL BOMBING OF DIKES WAS EVASIVE. HE DID NOT WISH TO DISCUSS THIS SUBJECT IN DETAIL. [redacted] HAD IMPRESSION THAT THE QUESTION OF BOMBING DIKES WAS OF SERIOUS CONCERN TO SUNG.)

John McCain's Statement

8

THE SURVIVORS. HOWEVER, HE COULD SPEND ONLY A FEW DAYS WITH HIS FAMILY, BECAUSE HE SOON RECEIVED AN ORDER TO REPORT URGENTLY TO THE ORISKANY WHERE HE WAS TO BE ASSIGNED. DURING HIS LEAVE, HE RELATED, HIS WIFE AND EVEN HIS FATHER IN HIS LETTERS ADVISED HIM TO BE EXTREMELY CAREFUL BECAUSE A GREAT NUMBER OF COFFINS OF AMERICAN MILITARYMEN KILLED IN VIETNAM HAD ALREADY ARRIVED IN THE UNITED STATES.

TO A QUESTION OF THE CORRESPONDENT, MCCAIN ANSWERED: "MY ASSIGNMENT TO THE ORISKANY, I TOLD MYSELF, WAS DUE TO SERIOUS LOSSES IN PILOTS, WHICH WERE SUSTAINED BY THIS AIRCRAFT CARRIER (DUE TO ITS RAIDS ON THE NORTH VIETNAM TERRITORY--VNA) (BRACKETS AS TRANSMITTED) AND WHICH NECESSITATED REPLACEMENTS. FROM 10 OCTZERO TO 12 OCTTWO PILOTS WERE TRANSFERRED LIKE ME FROM THE FORRESTAL TO THE ORISKANY. BEFORE I WAS SHOT DOWN WE HAD MADE SEVERAL SORTIE. ALTOGETHER I MADE ABOUT 23 TWOTHREE FLIGHTS OVER NORTH VIETNAM."

MCCAIN ADMITTED THAT HE PARTICIPATED FIVE OR SIX TIMES IN THE ATTACKS ON THE HAIPHONG SECTOR.

FEAR STILL CLEARLY SHOWED ON HIS FACE WHEN HE RECALLED HIS DISASTROUS SORTIE ON 26 TWOSIX OCTOBER AGAIN HANOI. "THE BRIEFING WAS HELD IN THE MORNING," HE SAID. "THAT'S RIGHT. I REMEMBER THAT IT WAS IN THE MORNING THAT THEY TOLD ME OF THE SITUATION AND THE PLAN OF THE RAID, WHICH SHOULD TAKE PLACE ABOUT NOON. A RECONNAISSANCE OFFICER EXPLAINED THIS PLAN TO ME. THEY SHOWED ME PHOTOGRAPHS OF MY TARGET AND MARKED OUT THE PATHS TO BE FOLLOWED BY THE ORISKANY AT THIS POINT. THEY POINTED OUT TO ME A NUMBER OF ANTIAIRCRAFT POSITIONS NEAR HANOI AND A NUMBER OF POSSIBLE ROCKET POSITIONS, THE POSITION OF OUR RESCUE SHIPS, THE RADIO FREQUENCY, THE COMPOSITION OF THE FLIGHT, AND SO FORTH. UPON ARRIVAL NEAR THE TARGET, OUR FORMTION, WITH SIX BOMBERS, WOULD MOUNT THE ATTACK ACCORDING TO THE FOLLOWING ORDER: I WOULD BE NUMBER THREE, AND THE CHIEF OF THE FORMATION, NUMBER ONE. EACH PILOT WOULD HAVE TO APPROACH THE TARGET FROM A DIFFERENT DIRECTION THE CHOICE OF WHICH WOULD BE LEFT TO HIM. WHILE MOVING TOWARD THE TARGET, WE STUMBLED OVER A VERY DENSE NETWORK OF FIRE, A VERY POWERFUL RIPOSTE. A FEW ROCKETS WERE SEEN. OUR CHIEF TURNED TO APPROACH THE TARGET AND I FOLLOWED HIM AT A DISTANCE. AT THE TIME WHEN I WAS PREPARING TO DROP MY BOMBS--I DID NOT KNOW WHETHER OR NOTT ICOULD DROP THEM, BECAUSE

THINGS WERE HAPPENING TOO FAST--I HEARD A TERRIBLE EXPLOSION WHICH SHOOK MY PLANE AND SENT IT TOWARD THE GROUN. IT WAS HIT SO VIOLENTLY THAT I WAS THROWN ON MY BACK AND WENT STRAIGHT TOWARD THE GROUND IN THIS POSTURE. I TRIED TO PULL THE DIRECTION-STICK TO REESTABLISH THE BALANCE OF MY PLANE BUT IT NO LONGER RESPONDED TO ME.

I CONTINUED TO DESCEND AT A DIZZY SPEED. THEN, I EJECTED MYSELF. I DO NOTT KNOW AT WHAT ALTITUDE, BUT IT MUST HAVE BEEN VERY LOW. NATURALLY I FELT BUFFETTING BECAUSE MY BAILING OUT WAS MADE AT THE TIME WHEN THE PLANE WAS FALLING TOO FAST. WHEN THE PARACHUTE OPENED, I LOOKED DOWN AND FOUND OUT THAT I WAS GOING TO FALL INTO A LAKE. I WAS REALLY LUCKY TO BE ABLE TO FALL INTO A LAKE. ALL AROUND ME BOMBS WERE EXPLODING WHILE ROCKETS AND ANTIAIRCRAFT SHELLS WERE STREAKING THROUGH THE SKY. I HIT THE LAKE AND WENT TO THE BOTTOM. WHILE TRYING TO RETURN TO THE SURFACE, I WAS SEIZED BY VIETNAMESE AND PUSHED TO THE BANK OF THE LAKE. THEY DISARMED ME AND BROUGHT ME TO PRISON." MORE 091339 [redacted] 11/1933Z

Capture of McCain, Rice

Hanoi VNA International Service in English 0537 GMT 27 Oct 67 B

[Text] Hanoi--Among the many U.S. pilots captured in Hanoi yesterday was John Sydney McCain, Lieutenant Commander of the U.S. Navy.

His plane, a phantom, was blasted down by a ground-to-air missile before it could strike. It crashed on the compound of a factory. The parachute fell into the Truc Bach lake inside the capital city. From an observation post on the shore of the lake, a shout rang out, get him, get him! The homeguard units and people's defense and security forces nearby echoed the shout, get him, get him right away! From a corner of the lake someone threw into the water two big bamboo tubes. Bui Duc Hai, a second lieutenant of the people's security service, threw himself into the water and pushed the bamboos forward while swimming. He was followed by many other young men.

From the other side of the lake many people who happened to be on the scene also swam toward the fallen air pirate. The latter, with his cumbersome outfit, sank immediately after reaching the water. Four of his captors hauled him up. Two of them locked both his arms while the other two put his head on a bamboo tube. From the pilot's inside pocket a man took out eight pistol bullets and a signal radio.

Finally, Johnson's navy man was pulled out of the water near a children's swimming pool in the Ba Dinh district. The water dripping at each staggering step he made was tinted with navy blue from the survival dye box he carried. McCain's right leg was still bleeding from a wound he received while in the plane. He was bandaged by a nurse from the Ba Dinh District before being taken to his place of detention.

Meanwhile, other U.S. jetplanes were making frenzied stunts over Hanoi to dodge the deadly groundfire.

John Sydney McCain today appears in NHAN DAN in two photos, one of which shows his capture on True Bach lake. The paper carries a photo of another captured U.S. pilot, Charles Donald Rice, lieutenant JG, U.S. Navy, service number 710266.

AFP Correspondent's Report

Paris AFP in English 2016 GMT 26 Oct 67 (FOR OFFICIAL USE ONLY)

[Text] Hanoi--Bernard-Joseph Cabanes Dispatch--U.S. aircraft today attacked Hanoi for the second day running, concentrating on the electric power plant. But several rockets landed in other parts of the city as well, destroying houses and inflicting what was believed to be higher casualties than yesterday's raid. Missiles brought down two of the attacking planes over the center of the city. An open parachute was seen floating amid the puffs of exploding antiaircraft shells. An air-to-ground missile struck a house in the Rue Street district, subjected to bombing last August. The house was 50 yards (meters) from the French diplomatic delegation where shrapnel fell into the garden today. No French were injured.

The American planes came in several waves in the 35-minute raid that began at 1145 local time. Work began quickly after the raid, the clearing away of rubble as blood-covered survivors emerged from ruins and nearby one-man holes used as bomb shelters here. Another alert came 20 minutes after the end of the first raid. It was the fourth alert since the beginning of the morning. Each was marked by the sound of bombs exploding and antiaircraft fire in an area 15 to 18 miles (25 to 30 kilometers) around the capital.

MEMORANDUM

SUBJECT: Preliminary Assessment of Black Shield Photography of 28, 29, and 30 October

Summary

Three double-pass Black Shield missions flown over North Vietnam on 28, 29, and 30 October provided cloud-free photographic coverage of about 55 percent of the country, including the Hanoi, Haiphong, Pinghsiang and Dong Dang areas. All of North Vietnam's six major airfields, more than half of the SA-2 sites, over 75 percent of the rail network north of the panhandle, and 42 priority bridges and rail yards for bomb damage assessment were photographed. No evidence of surface-to-surface missile deployment was noted.

Note: This memorandum was prepared by the Directorate of Intelligence.

1. Three double-pass Black Shield missions flown over North Vietnam on 28, 29, and 30 October provided cloud-free photographic coverage of about 55 percent of the country, including the Hanoi, Haiphong, Pinghsiang and Dong Dang areas. Both Mission 6732 (28 October) and Mission 6734 (30 October) flew two passes each over the area of North Vietnam north of the panhandle. One of mission 6732's passes was along the China border area. Mission 6733 (29 October) flew one pass primarily over the panhandle and the other pass along the China border area. No evidence of surface-to-surface missile deployment was noted.

2. Surface-to-Air Missile Sites: Over half of the nearly 260 SA-2 sites in North Vietnam were photographed by the three missions. Two new sites were detected. The 28 October mission alone covered 120 SA-2 sites. Fourteen of these sites were occupied, 70 unoccupied, and 16 could only be identified. The 29 October mission covered 61 SA-2 sites. One of these sites was occupied, 30 unoccupied (including one new site), and 30 could only be identified. The 30 October mission covered 92 SA-2 sites. Thirteen of these sites were occupied (including one new site), 74 unoccupied, and five could only be identified.

3. Airfields: Good coverage of all six of North Vietnam's major airfields was provided by the 28 October mission. With the exception of Haiphong/Cat Bi--which has a cratered runway--all the airfields appeared to be serviceable.

EO 12958
3.4(b)(1)>25Yrs
(T)

4. At Phuc Yen Airfield, the bomb craters on the runway had been filled in and the airfield seemed to be capable of supporting at least limited fighter [redacted] other visible bomb damage from the 24 and 25 October air strikes included: bomb craters on the two main parking aprons and the parallel taxiway; interdiction of the taxiway to the northern aircraft revetments by one bomb crater; two MIG-15/17s probably destroyed

and two other aircraft possibly destroyed; and seven damaged aircraft revetments.

5. At Hoa Lac Airfield, all bomb craters on the runway had been repaired, and the runway appeared to be serviceable. At Haiphong/Kien An Airfield, all bomb craters on the runway had been repaired, making it serviceable. Other bomb craters could be seen on the half-loop taxiway, in six parking revetments, and adjacent to the parallel taxiway.

6. Photography from the 29 October mission showed continuing construction at Yen Bai Airfield in the northwestern part of North Vietnam. Concrete appears to have been laid for part of the runway and parallel taxiway. Three parking aprons, 13 aircraft revetments, and a dispersal taxiway were identified. This is the first sign of progress at this airfield since 20 June. Photography taken at that time showed that preparations had been made to surface the runway. After four months, the Chinese engineers still have not completed the runway, although they have apparently made progress on some of the adjacent facilities.

7. Air Order-of-Battle: The 28 October photography of the six major airfields showed very few aircraft. At Phuc Yen Airfield, ten aircraft could be seen: two small swept-wing aircraft, four possible aircraft, two probably destroyed MIG-15/17s, and two possibly destroyed aircraft. [redacted]

EO 12958
3.4(b)(1)>25Yrs
(T)

8. At Hanoi/Gia Lam Airfield, one MIG-15/17 was observed. Two derelict MIG-15/17s and two dummy MIG-21s were noted at Hoa Lac Airfield.

9. Naval Order-of-Battle: The 28 October mission photographed the normal complement of naval vessels in the Haiphong area. Identifiable vessels included three SO-1 class submarine chasers, three or

four Swatow-class gunboats, six P-6 class motor torpedo boats, and two P-4 class motor torpedo boats.

10. Bridges: The 28 October mission provided good coverage of the most important bridges. The Paul Doumer Railroad and Highway Bridge over the Red River was shown to be unserviceable. One span had been dropped into the river and the two adjoining spans had been severely damaged.

11. The Canal des Rapides Railroad and Highway Bridge also was shown to be unserviceable. One span at the south end of the main bridge had been knocked out of position. The alternate rail bypass bridge was also unserviceable.

12. In the Haiphong area, the three main bridges--the railroad and highway bridge and two highway bridges--were observed to be still unserviceable. Ten highway bypass bridges there were serviceable.

13. Transshipment Points: Photography of 28 October showed normal levels of activity at the Pinghsiang and Dong Dang railroad transshipment points. About 390 pieces of rolling stock, including flatcars carrying 42 unidentifiable objects, were noted at Pinghsiang. Approximately 120 pieces of rolling stock and 14 locomotives were observed at the nearby Dong Dang transshipment point.

14. The 28 October photography also showed a probable rail-to-road transshipment point under construction near Ho-Kou, China, just across the border from Lao Cai, North Vietnam. The installation is served by two rail spurs off the Kunming-Hanoi rail line. Construction of such an installation may presage an increase in supply shipments via truck to northwestern North Vietnam. Chinese engineers have been developing the road network and logistical facilities in the border area for the past two years.

15. Railroad lines: The 28 October mission covered 100 percent of the Haiphong-Hanoi rail line,

75 percent of the Dong Dang-Hanoi line, 35 percent of the Kep-Thai Nguyen-Hanoi line, 20 percent of the Lao Cai-Hanoi line, and 10 percent of the Hanoi-Dong Hoi line.

16. Hanoi Thermal Power Plant: Photography of 28 October showed damage at and near the plant. A hole in the generator hall roof indicated a penetration and a possible internal detonation. Another hole in the generator hall roof--which had been repaired after the 21 August strike--has been reopened. A possible hit immediately north of the coal conveyer, entered the new boiler-house section. (This possible hit apparently did not detonate.) A crater was visible on the north boundary of the plant. About 35 civilian structures in the area surrounding the plant have been destroyed and 40 damaged. No smoke or steam from the plant was evident.

HANOI CORRESPONDENT'S DISPATCH IN ENGLISH TO PRENSA LATINA
HAVANA [redacted]

(TEXT) NHAN DAN ON 9 NOVEMBER CARRIES A STORY ABOUT THE U.S. PILOT MCCAIN WHO WAS CAPTURED ON 26 OCTOBER AFTER HIS PLANE HAD BEEN SHOT DOWN OVER HANOI.

HIS FLIGHT ON A RAID AGAINST HANOI WAS THE FIRST FOR HIM AND HIS 33D RAIDING FLIGHT OVER NORTH VIETNAM. MCCAIN WAS VERY AFRAID OF THE (?INTENSE) ANTIAIRCRAFT NETWORK IN HANOI, WHICH IS NOT ONLY (?INTENSE) BUT VERY ACCURATE. THAT IS WHY IT BECAME IMPORTANT. THREE OUT OF 25 AIRCRAFT OF HIS GROUP WERE DOWNED. THE UNITED STATES IS NOT ABLE TO BEAR IT IF OUT OF EVERY 25 AIRCRAFT THREE ARE DOWNED, HE SAID.

MCCAIN STATED: THERE IS NOT ANY DOUBT FOR ME; THINGS ARE TAKING PLACE IN A FAVORABLE WAY FOR NORTH VIETNAM. IN PARTICULAR, BEFORE WORLD OPINION AT PRESENT, THE UNITED STATES IS (?VIRTUALLY) STANDING ALONE.

5

INTERVIEW WITH MCCAIN

HANOI VNA INTERNATIONAL SERVICE IN FRENCH 1339 GMT 9 NOV 67 B

(INTERVIEW OF AMERICAN POW LT CDR JOHN SIDNEY MCCAIN PUBLISHED IN 9 NOVEMBER NHAN DAN)

(EXCERPT) HANOI 9 NOVEMBER--(PASSAGE OMITTED ON CIRCUMSTANCES BEHIND MCCAIN'S TRANSFER FROM CARRIER FORRESTAL TO ORISKANY AND HIS CAPTURE ON TRUC BACH LAKE ON 26 OCTOBER 1967)

TO A QUESTION OF THE CORRESPONDENT, MCCAIN ANSWERED: "MY ASSIGNMENT TO THE ORISKANY, I TOLD MYSELF, WAS DUE TO SERIOUS LOSSES IN PILOTS WHICH WERE SUSTAINED BY THIS AIRCRAFT CARRIER (DUE TO ITS RAIDS OVER NORTH VIETNAM TERRITORY--VNA) AND WHICH NECESSITATED REPLACEMENTS. FROM 10 TO 12 PILOTS WERE TRANSFERRED LIKE ME FROM THE FORRESTAL TO THE ORISKANY. BEFORE I WAS SHOT DOWN WE HAD MADE SEVERAL SORTIES. ALTOGETHER I MADE ABOUT 25 FLIGHTS OVER NORTH VIETNAM."

MCCAIN ADMITTED THAT HE PARTICIPATED FIVE OR SIX TIMES IN THE ATTACKS ON THE HAIPHONG SECTOR.

FEAR STILL CLEARLY SHOWED ON HIS FACE WHEN HE RECALLED HIS DISASTROUS SORTIE ON 26 OCTOBER AGAINST HANOI. "THE BRIEFING WAS HELD IN THE MORNING," HE SAID. "THAT'S RIGHT. I REMEMBER THAT IT WAS IN THE MORNING THAT THEY TOLD ME OF THE SITUATION AND THE PLAN OF THE RAID, WHICH SHOULD TAKE PLACE ABOUT NOON. A RECONNAISSANCE OFFICER EXPLAINED THIS PLAN TO ME. THEY SHOWED ME PHOTOGRAPHS OF MY TARGET AND MARKED OUT THE PATHS TO BE FOLLOWED BY THE ORISKANY AT THIS POINT. THEY POINTED OUT TO ME A NUMBER OF ANTIAIRCRAFT POSITIONS NEAR HANOI AND A NUMBER OF POSSIBLE ROCKET POSITIONS, THE POSITION OF OUR RESCUE SHIPS, THE RADIO FREQUENCY, THE COMPOSITION OF THE FLIGHT, AND SO FORTH. UPON ARRIVAL NEAR THE TARGET, OUR FORMATION, WITH SIX BOMBERS, WOULD MOUNT THE ATTACK ACCORDING TO THE FOLLOWING ORDER: I WOULD BE NUMBER THREE, AND THE CHIEF OF THE FORMATION, NUMBER ONE. EACH PILOT WOULD HAVE TO APPROACH THE TARGET FROM A DIFFERENT DIRECTION; THE CHOICE OF WHICH WOULD BE LEFT TO HIM.

"WHILE MOVING TOWARD THE TARGET, WE STUMBLED OVER A VERY DENSE NETWORK OF FIRE, A VERY POWERFUL RIPOSTE. A FEW ROCKETS WERE SEEN. OUR CHIEF TURNED TO APPROACH THE TARGET AND I FOLLOWED HIM AT A DISTANCE. AT THE TIME WHEN I WAS PREPARING TO DROP MY BOMBS--I DID NOT KNOW WHETHER OR NOT I COULD DROP THEM, BECAUSE THINGS WERE HAPPENING TOO FAST--I HEARD A TERRIBLE EXPLOSION WHICH SHOOK MY PLANE AND SENT IT TOWARD THE GROUND. IT WAS HIT SO VIOLENTLY THAT I WAS THROWN ON MY BACK AND WENT STRAIGHT TOWARD THE GROUND IN THIS POSTURE. I TRIED TO PULL THE DIRECTION-STICK

(TEXT) HANOI, 10 NOVEMBER--BY EDUARD-JOSEPH CABANES--U.S. NAVY LIEUTENANT COMMANDER JOHN SIDNEY MCCAIN, SON OF ADMIRAL JOHN MCCAINN COMMANDER OF U.S. NAVAL FORCES IN EUROPE, WAS QUOTED BY THE HANOI PRESS TODAY AS HAVING STATED THAT THE UNITED STATES APPEARS ISOLATED BECAUSE OF THE VIETNAM WAR. LIEUTENANT COMMANDER MCCAIN, WHO WAS CAPTURED AFTER HIS PLANE WAS SHOT DOWN OVER HANOI LAST 26 TWENTY SIX OCTOBER, WAS SAID TO HAVE BEEN INTERVIEWED BY NORTH VIETNAMESE JOURNALISTS ALONG WITH ANOTHER CAPTURED PILOT, AIR FORCE COLONEL JOHN PETER FLYNN, WHOSE PLANE WAS SHOT DOWN OVER THE CAPITAL ON 27 TWENTY SEVEN OCTOBER.

MCCAIN WAS QUOTED AS HAVING SAID "THE MORALE OF THE VIETNAMESE PEOPLE IS VERY HIGH, THE VIETNAMESE PEOPLE ARE VERY STRONG, PRESENT EVENTS ARE MOVING TO THE ADVANTAGE OF NORTH VIETNAM, AND THE UNITED STATES APPEARS TO BE ISOLATED.

MCCAIN, 31 THIRTY ONE, SAID THAT HE HAD CARRIED OUT 23 TWENTY THREE RAIDS OVER NORTH VIETNAM, INCLUDING 5 FIVE OR SIX OVER HAIPHONG. HE WAS SHOT DOWN ON HIS FIRST RAID OVER HANOI, LAUNCHED FROM THE AIRCRAFT CARRIER [redacted]. HE SAID THAT HE HAD PREVIOUSLY SEEN BASED ON THE CARRIER FORRESTAL AND HAD NARROWLY ESCAPED DEATH DURING THE BIG FIRE WHICH BROKE OUT ABOARD THE VESSEL TWO MONTHS A

ASO.

THE NEWSPAPERS SAID THAT BOTH MCCAIN AND COLONEL FLYNN SAID THAT THEY HAD BEEN IMPRESSED BY THE DENSITY AND ACCURACY OF THE ANTIAIRCRAFT FIRE OVER HANOI. FLYNN WAS QUOTED AS STAYING: "YOUR GROUND-TO-AIR MISSILES ARE REALLY DANGEROUS. AS FOR YOUR MIGS, WE COULD HARDLY TELL WHERE THEY WERE COMING FROM, AND AFTER FIRING THEY DISAPPEARED."

COLONEL FLYNN, 45 FORTY FIVE, A VETERAN OF THE KORAN WAR WITH 23 TWENTY THREE YEARS OF ACTIVIE SERVICE, SAID THAT HE CAME FROM THE U.S. AIRBASE AT KORAT, THAILAND. HE ALLEGEDLY SAID THAT EACH SQUADRON AT THE BASE LOST THREE PILOTS AND EVEN MORE PLANES EACH MONTH OF FLIGHTS OVER NORTH VIETNAM. GREATEST LOSSES WERE OF THE F105 ROF F-105 FIGHTER BOMBERS. AT PRESENT, THE UNITED STATES LACKS EXPERIENCED PILOTS.

THE PAPERS QUOTED FLYNN AS HAVING SAID THAT THE YOUNG PILOTS AT THE KORAT BASE, DESPITE AN OUTWARD SOK OF BRAVADO, WERE FRIGHTENED AT THE IDEA OF HAVING TO FLY OVER NORTH VIETNAM, AND PARTICULARLY HANOI. MANY YOUNG PILOTS WANT TO LEAVE THE AIR FORCE TO BECOME CIVILIAN PILOTS, HE WAS SAID TO HAVE STATED. AS FOR THE OLD PILOTS LIKE ME, WE WANT TO RETIRE AND RETURN TO OUR FAMILIES. 121539 [redacted] 12/16/72 NYT

McCain
J. P. Flynn

...to questions by one of its ... in North Vietnam. He is Lt Cdr John ..., captured on the Truc Bach Lake in ... from his plane in flames. It was free ... to take off for the last time. Before being ... among the personnel flying from ... to the latter sustained considerable ... July 1967. McCain could take leave in his ... he could spend only a few days with ... to report urgently to the Oriskany ..., he related, his wife and even his ... extremely careful because a great number of ... Vietnam had already arrived in the ...

... declared: "My assignment to the Oriskany, ... pilots, which were sustained by this ... North Vietnam territory) and which ... pilots were transferred like me from the ... shot down we had made several sorties. ... North Vietnam."

McCain added that he was attacked five or six times in the attacks on the Haiphong sector.

He still clearly ... when he recalled his disastrous sortie on 26 October against ... briefing was held in the morning," he said. "That's right. I remember that it was in the morning that they told me of the situation and the plan of ... which was to take place about noon. A reconnaissance officer explained this plan to ... showed us photographs of my target and marked out the paths to be followed ... that way at this point. They pointed out to me a number of ... and a number of possible rocket positions, the position of ... and the frequency, the composition of the flight, and so forth. We ... the target. Our formation, with six bombers, would ... the attack ... the following order: I would be No three, and the chief of the ... flight. Each pilot would have to approach the target from a different ... the choice of which would be left to him. "While moving toward the ... we encountered a very dense network of fire, a very powerful ripeste. A few ... The chief turned to approach the target and I followed him at a ... At the time when I was preparing to drop my bombs--I did not know ... or not I could drop them, because things were happening too fast--I heard a ... explosion which shook my plane and sent it toward the ground. It was hit so violently that I was thrown on my back and went straight toward the ground in this position. I tried to pull the direction-stick to reestablish the ... of my plane but it no longer responded to me.

[illegible]

"I continued to descend at a dizzy speed. Then, I ejected myself. I do not know at what altitude, but it must have been very low. Naturally I felt buffetting because my bailing out was made at the time when the plane was falling too fast. When the parachute opened, I looked down and found out that I was going to fall into a lake. I was really lucky to be able to fall into a lake. All around me bombs were exploding while rockets and antiaircraft shells were streaking through the sky. I hit the lake and went to the bottom. While trying to return to the surface, I was seized by Vietnamese and pushed to the bank of the lake. They disarmed me and brought me to prison."

"What do you think of Hanoi's fire barrage?" asked the NHAN DAN correspondent.

McCain cried out: "Very intense,,very accurate. When a fire barrage is so accurate, one has to reckon with it. You are excellent artillerymen. Naturally, I have never seen such a fire network, because it was the first time that I flew over Hanoi."

"Were all the pilots who had flown over Hanoi afraid of the firepower from the ground?"

"Yes, certainly!" McCain said. "How lucky are those who do not have to come often to the Hanoi sector. Very dangerous!

"Because they could very well be shot down, hit, something that no one wants! When I arrived near my target I saw two rockets streaking by my side, and it was terrible to see. They flew very fast, very strongly."

Suddenly the air pirate was silent as if he were still obsessed by the memory of his disastrous sortie. "For me," he concluded, "there is no longer any doubt. Things are taking place in a favorable opinion; the United States at present seems to be standing alone, so much is its isolation."

Peter Flynn Remarks

Hanoi Domestic Service in Vietnamese 1400 GMT 9 Nov 67 S

[Commentary by Comrade Trung Sinh "The Old Chap Caught In A Trap"]

[Text] People say this piratic pilot from Ohio is very fond of studying history, but it is not known whether he has studied the history of the United States as a whole or only that of the U.S. Air Force. If he confined himself to a study of the history of those who have used air forces as an aggressive instrument, he surely knew the case of [name indistinct], whose plane was recently brought down by one of our valiant young pilots while on a piratic mission over Hanoi. It is a fact, however, that he himself, a hard-core U.S. pilot, added a new ill-fated passage to the gloomy history of the U.S. Air Force. He is U.S. Air Force Col John Peter Flynn who was born on 17 October 1922 and belonged to the U.S. 355th Fighter Wing stationed at Korat in the U.S. satellite of Thailand.

While on a piratic mission over Hanoi on 27 October 1967, his F-105D aircraft was shot to pieces by the mighty air defense firepower of the army and people of the valiant capital, and he was captured, after parachuting, by young boys and girls in the valiant town of Gia Lam, right on top of one of the craters made by his criminal bombs.

E0 12958 3.4(b)(1)>25Yrs
(C)

S U M M A R Y

CIA has reviewed the information immediately available from all sources on the US peace movement and its international connections. The following principal findings emerge from this study:

A. Diversity is the most striking single characteristic of the peace movement at home and abroad. Indeed it is this very diversity which makes it impossible to attach specific political or ideological labels to any significant section of the movement. Diversity means that there is no single focus in the movement. Joint action on an international scale is possible only because coordination is handled by a small group of dedicated men, most of them radically oriented, who have volunteered themselves for active leadership in the key organizations. Thus a handful of activists coordinate the activities and propel the energies of large heterodox masses toward a few broad purposes.

B. The coordinators of the peace movement--personalities such as Dellinger, Hayden, Bevel, and Egleson--are tireless, peripatetic, full time

E0 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs (C)

crusaders. They have the requisite funds for travel; they simplify the interaction among the peace groups by assuming a multiplicity of offices and establishing interlocking personal contacts between groups. Many have close Communist associations but they do not appear to be under Communist direction. In any case their purposes in so far as the war in Vietnam is concerned, coincide with those of the Communists. Thus, the Communist Party of the USA benefits from anti-US activity by Peace groups but does not appear to be inspiring them or directing them.

C. Contact between Hanoi and the leaders of the US peace movement has developed to a point where it is now almost continuous.

EO 12958 3.4(b)(1)>25Yrs EO 12958 3.4(b)(6)>25Yrs (S)

[redacted] Nevertheless these exchanges of views have played an important part in channeling antiwar activity on both sides of the world.

D. Apart from contacts with the Hanoi officialdom, US peace activists by and large do

EO 12958 3.4(b)(1)>25Yrs (C)

EO 12958 3.4(b)(1)>25Yrs
(C)

not deal with foreign governments. Their relations are with foreign, private institutions such as the Bertrand Russell Peace Foundation and other international peace federations. Moscow exploits and may indeed influence the US delegates to these bodies, through its front organizations, but the indications--at least at this stage--of covert or overt connections between these US activists and foreign governments are limited.

EO 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

I. THE PEACE MOVEMENT:
CONFUSION, COORDINATION, AND COMMUNISM

1. The American peace "movement" is not one but many movements; and the groups involved are as varied as they are numerous. The most striking single characteristic of the peace front is its diversity.

Many Molds and Many Motives

2. Under the peace umbrella one finds pacifists and fighters, idealists and materialists, internationalists and isolationists, democrats and totalitarians, conservatives and revolutionaries, capitalists and socialists, patriots and subversives, lawyers and anarchists, Stalinists and Trotskyites, Muscovites and Pekingese, racists and universalists, zealots and nonbelievers, puritans and hippies, do-gooders and evildoers, nonviolent and very violent.

3. One thing brings them all together: their opposition to US actions in Vietnam. They do not join up for the same reasons, of course; there are as many motives as there are groups. And they function on different levels: some motives are politically inspired and professional while others are

EO 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

purely personal, some are focused on Vietnam exclusively while others are related to the war only incidentally.

4. One explanation for the diversity of motivation and outlook is the fact that the anti-war sentiment has taken root in separate sectors of the society having little else in common. In addition to the professional pacifists, activists come from the student world, from militant elements of the Negro and other minority communities, from the labor movement, and from the intellectual sphere. In some cases--the civil rights and labor movements specifically--the rank and file are largely disinterested in international problems. But their leaders may not be; some are as active as the intellectual and student leaders both at home and abroad. Each projects his own personal attitudes and prejudices, which frequently are not representative of the group he speaks for.

5. The advocates of "Black Power" are a group apart. Their specialized interest when it comes to Vietnam is not peace, but the war as a case study of the "liberation struggle." They make

EO 12958 3.4(b)(1)>25Yrs
(C)

an effort to relate the Vietnam problem to their non-white "Third World," focusing particularly on the position of the Negro serving in Vietnam and on resistance to the draft. While joining in certain aspects of the peace campaign, the "Black Power" elements remain aloof from the leftist mainstream.

The Coordinators

6. Out of such diversity comes much confusion and more than a little disagreement. Strains are evident both on the home front and in their international activities. The job of coordinating a program of joint action, first within the US and then internationally, is an enormous one. Given the strains and complications involved, the performance of the coordinators is impressive.

7. Several factors make the task easier than it might seem. These factors also have a direct bearing on the orientation and direction of the movement. Most important is the fact that the responsibility for coordination and tactical direction is delegated to a small staff of key leaders. These people are dedicated activists and seem to know where they are going. Another--and related--

EO 12958 3.4(b)(1)>25Yrs
(C)

factor is the interlocking structure of the peace groups. A number of the key activists are involved in more than one organization, and there is considerable interaction among the executives. The problem of lining up many diverse groups and coordinating action is thus simplified to some degree.

8. The main mechanism for coordinating both domestic and foreign protest activity related to Vietnam has been the "mobilization committee." Out of the Student Mobilization Committee of 1966 evolved the Spring Mobilization Committee (SMC), which in turn was succeeded by the present National Mobilization Committee (NMC). The officers appointed to the executive bodies of the NMC are numerous, reflecting the coalition's broad base, but the real responsibility seems to be concentrated in the hands of a few. The names of these key coordinators turn up regularly, wherever the action happens to be.

Ideology of the Left, Old and New

9. As the peace groups have coalesced over the past year and half, ideological lines have become so blurred as to render conventional political

EO 12958 3.4(b)(1)>25Yrs
(C)

classifications worthless. The various joint action groups are so conglomerate that it is difficult to stamp them with any one label without qualification. Control is the only valid indicator, and evidence of control by any one element is what is usually lacking. The peace movement, and even most of its constituent parts, is too big and too amorphous to be controlled by any one political faction.

10. In terms of the political spectrum and international connections, the activists generally range from somewhere left of center to the farthest limit of the Left. Many are Marxist-oriented, but the Marxists come in all colors. Take the Communists: the "orthodox" Moscow-oriented Communists, the Peking-influenced "Marxist-Leninists," and the self-oriented Trotskyites are all energetically active in the Vietnam protest activity. It would be surprising if they were not since the objectives of the movement are consistent with the national interests of the USSR and Communist China. The peace movement can be described in ideological terms only if one political element is dominant or exerts a controlling influence. A careful review

E0 12958 3.4(b)(1)>25Yrs
(C)

of the evidence available on both domestic and foreign activity does not substantiate either conclusion in the case of any of the groups.

11. This is not to say that the Communist role is not substantial. Both the individual peace groups and the coordinating organizations are well infiltrated with Communists of one stripe or another. Assets of the US Communist Party (CPUSA) are most commonly noted. In the case of certain groups, particularly in the student field, the Trotskyite revolutionaries (directed by the Socialist Workers Party) or the Maoists (Progressive Labor Party) predominate. These Marxist groups harbor deep hostilities toward each other; often in fact they seem more concerned about countering each other than about countering the non-Communists.

12. As a result of their infiltration of the leadership of key peace groups, the Communists manage to exert disproportionate influence over the groups' policies and actions. It remains doubtful, however, that this influence is controlling. Most of the Vietnam protest activity would be there with or without the Communist

E0 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

element. The CPUSA, in other words, is exploiting and benefiting from anti-government activity, but it does not appear to be inspiring it or directing it.

13. The non-Communist sector known as the "radical left" is heavily engaged in the campaign. Its organizations are non-exclusive and its branches autonomous, which makes them vulnerable to Communist infiltration. For example, the Students for a Democratic Society (SDS), perhaps the most active of the major organizations (see appendix A), opens its doors officially to Communists along with others of "progressive" inclination. Although plainly radical, the convictions espoused by the SDS and its intellectual arm, the Radical Education Project (REP), make it clear, however, that SDS leaders are not interested in "pre-packaged ideology" or excessive Communist guidance. These militants, who identify themselves as the New Left, generally look on Communists--especially those with foreign loyalties--as not only suspect but rather old-hat.

EO 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

II. NATURE OF THE INTERNATIONAL CONTACTS

1. Most of the contacts between US and foreign groups on Vietnam are private, that is with persons and organizations not directly connected with foreign governments. The contacts with Hanoi, which are traced in Section III, represent the only evidence we have of extensive dealings with government officials.

In the Public Domain

2. The key activists are on the move much of the time. There is ample opportunity therefore for consultation with counterparts abroad. Regular communication is maintained through wires, letters and publications as well. These informal contacts are further cultivated at the more formal international conferences which the peace organizations sponsor at regular intervals.

3. American students resident abroad also provide an important channel for coordinating US activity with foreign activity. In some capitals US students have formed their own protest organizations, which function as subsidiaries of the NMC.

EO 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

Examples are the "Stop It" and "Angry Arts" committees in London and the Paris American Committee to Stop War. Other centers of student activity are Berlin, Stockholm, Tokyo, and Mexico City.

4. Aside from these major centers of activity, a current check of all foreign countries where we have representatives has turned up little or no evidence of contact between US citizens and local Vietnam protest groups. In one or two instances, aside from those mentioned above, we have noted written appeals from the NMC in New York to sympathetic organizations abroad to mobilize protest demonstrations.

Governmental Contacts

5. Indications of overt or covert connections between US activists and foreign governments are limited, [redacted]

EO 12958
3.4(b)(1)>25Yrs
EO 12958
3.4(b)(6)>25Yrs
(S)

6. If such clandestine Communist connections do exist, they are likely to be indirect. They would be wired through the extensive circuits of

EO 12958 3.4(b)(1)>25Yrs
(C)

front organizations and national parties. It can be assumed, for example, that substantial Soviet influence and advice--at a minimum--are passed via the CPUSA to the American student movement through the Communist-controlled Du Bois Clubs of America and to other groups via the Tri-Continental Information Center (TCIC) (see Appendix A). We have seen no evidence that anything more is being passed, except possibly some airline tickets.

7. The secretary general of the CPUSA has been involved in several contacts between American peace groups and Hanoi, as related in Section III. Moscow's underwriting of the Stockholm peace conference last July is also noted there.

8. Peking and Havana have lent some assistance to the anti-US campaign, but on a much smaller scale than Hanoi or Moscow. Both capitals are often on the itineraries of traveling peacemakers and Liberation War-mongers. In addition, Robert Williams, the American defector who lives in Peking, is in intermittent contact with a number of US anti-war organizations and "Black Power" groups.

9. Clandestine contact overseas would be facilitated by the fact, noted in the previous

section, that the responsibility for international coordination rests in the hands of a few dedicated activists. These itinerant coordinators personally have close Communist and ultraradical associations; a few are reported to have called themselves Communists of a kind or to have endorsed Communism in some fashion.*

10. We have no evidence, however, that they act under any direction other than their own. It should be noted that this probably would not be evident if they did, since their voluntary activities serve Soviet and Chinese interests about as well as they could if they were controlled. A number of the US activists clearly are willing to allow themselves to be used by foreign governments, but it is difficult to judge how insidious their motives are.

11. What might prove control or direction would be evidence of relationships involving more than

---

* *David Dellinger, the leading US peace activist, stated in May 1963 that he was "a Communist, but not of the Soviet type," according to a reliable FBI source. Although never a member of a political party, Dellinger has been continuously associated with pacifist organizations since the 1930's and later with the Trotskyite Socialist Workers Party and various Communist front groups. He is also noted for his involvement in pro-Castro organizations.*

EO 12958 3.4(b)(1)>25Yrs
(C)

cooperation freely given, such as funding, secret directives, communications aids, blackmail, and the like. Our examination of the evidence available to us at this time has produced very little one way or another on this subject.

III. COORDINATING THE INTERNATIONAL CAMPAIGN: A RECORD OF FOREIGN CONTACTS

1. In this section an attempt is made to relate certain foreign contacts of US peace activists, [redacted] with the development over the past year of an internationally orchestrated campaign to rally opposition against US actions in Vietnam. A variety of individuals, organizations, and programs have been involved in these contacts, but only two threads can be traced throughout the pattern. One represents the efforts of individuals active in the Mobilization Committees to organize popular demonstrations, which culminated in the world-wide protest marches of 21 October; the other represents the development of the "war crimes tribunal" staged by the Bertrand Russell Peace Foundation (BRPF), which will hold its second and more spectacular session next month. Among names frequently mentioned, that of David Dellinger stands out, largely because of his special role as coordinator and international intermediary and because he is

(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

the only leader prominently involved in both of the activities mentioned above.

2. Close personal coordination between US activists and the North Vietnamese appears to have begun in 1965. The DRV at that time invited Herbert Aptheker, prominent CPUSA theoretician and Director of the American Institute for Marxist Studies, to visit Hanoi. Aptheker in turn suggested that he be accompanied by Staughton Lynd, former Yale Professor and a leader of the US Committee for Non-Violent Action (CNVA), and Thomas Hayden, a militant civil rights worker and a founder of the SDS. The trio visited Hanoi in December 1965. In the course of this trip they spent four days in Moscow and three days in Peking. In late January, after their trip was completed, CPUSA chief Gus Hall reportedly commented that the mission had boosted the party's prestige markedly, adding that this favorable atmosphere should be exploited to build up the CPUSA.

[redacted] Dellinger appears to act as a co-ordinator of US activity relating to the IWCT. During the session in Stockholm, Dellinger participated as a panel member of the "tribunal."

EO 12958
3.4(b)(1)>25Yrs
(C)

11. [redacted] Dellinger arrived in the North Vietamese capital on 26 May. With him was Nick Egleson, a leader of SDS. Talks with North Vietnamese officials during this two-week visit resulted in a proposal to hold a conference later in the summer between a number of US activists representing student, Negro, and assorted pacifist groups and representatives of the DRV and the NLFSV. The outcome of this proposal was the Bratislava Conference in September (see below).

12. Moscow had been concentrating for some time on a major international conclave of peace groups scheduled for Stockholm in July (not to be confused with the Stockholm session of the IWCT in May).

13. Although the meeting was held nominally under the auspices of a Swedish organization, it was inspired and dominated by the World Council of

EO 12958 3.4(b)(1)>25Yrs
(C)

Peace (WCP), the Soviet bloc's aging and discredited peace front. The Stockholm Conference represented a major propaganda play by Moscow, designed to embarrass the US but at the same time to move the Vietnam problem closer to the conference table. Despite its reputation as an instrument of the Soviet Government, the WCP had managed to corral a large number of legitimate pacifist groups by exploiting widespread sentiment against the Vietnam war. Like all but a few of the mixed American delegation,* the majority of delegates shared the WCP's moderate approach to the problem aimed at a compromise settlement. Moscow failed, however, to allow for the Vietnamese. Hanoi's determined delegation paralyzed the conference by refusing to budge from a take-it-or-leave-it position that no settlement was possible except on the basis of the Four and Five Points. Few delegates were willing to oppose the Vietnamese actively.

* *American views ranged from the radical Peking-oriented position of Rev. James Bevel, representing the Spring Mobilization Committee, to the moderate Quaker position of the American Friends Service Committee. The extreme "Black Power" groups apparently did not participate in the Stockholm Conference (in contrast to their strong presence at the later Bratislava meeting). One of the "star" delegates at Stockholm was SANE's Dr. Spock, but he was noted chiefly during the conference for going sailing.*

EO 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

The conference ended almost before it started with the deep divisions in the peace movement laid bare for all to see. Moscow could count nothing for its effort but a temporary refurbishing of the WCP's standing in the international peace community.

14. For the US peace coalition, the Stockholm conference was useful in providing an opportunity to strengthen its contacts with antiwar groups throughout the world. The way was thus prepared for closer coordination of protest activity on an international scale. The meeting also enabled the Americans to continue their dialogue with the North Vietnamese. APPENDIX A

US "Peace" Groups with

Significant International Communist Contacts

EO 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

1. NATIONAL MOBILIZATION COMMITTEE TO END THE WAR IN VIETNAM (NMC)

The NMC, principal sponsor of the October peace demonstration in Washington, was a direct outgrowth of the Spring Mobilization Committee to End the War in Vietnam (SMC). SMC was formed to coordinate the demonstration in April 1967 against the Vietnam War and the draft.

The NMC is not an action group. It is a coordinating outfit responsible for disseminating information and literature to other peace groups and to the public at large. It coordinates demonstrations, obtains necessary permits, negotiates with civil authorities for facilities, and provides legal assistance when needed. Except for the few paid professional executives, the NMC can be categorized simply as a collection of local peace groups.

Communist penetration of the organization is apparent at several levels, but the NMC is so diversified in its make-up and organizationally loose, that it is not an easy mark for classic Communist manipulation.

Many members of the NMC leadership, including Chairman David Dellinger and Vice Chairman Jerry Rubin, have known and associated with Communists and Communist-front groups over the years.

Both Dellinger and Rubin are also strong supporters of Castro and his movement.

EO 12958 3.4(b)(1)>25Yrs
(C)

E0 12958 3.4(b)(1)>25Yrs
(C)

2. STUDENTS FOR A DEMOCRATIC SOCIETY (SDS)

SDS, formed in 1962, is a radical "New Left" student organization with a militant line on domestic and foreign issues. It claims to have some 3,000 members in 150 chapters on college campuses throughout the US. SDS membership is open to all, including Communists.

SDS works closely on college campuses with the Communist-controlled W.E.B. Du Bois Clubs of America. Although the CPUSA places members in key positions in the SDS, it is unable to control the organization on its policies, largely because of a built-in resistance to Communist domination. SDS has been saluted by Gus Hall, CPUSA General Secretary, as a part of the "responsible left." In some ways SDS views are more radical than those of the Moscow-line Communists.

SDS considers itself a "broad" movement, designed to attract people with diverse views and interests concerning such issues as peace, civil rights, poverty, and educational reform. SDS has concerned itself especially with protesting the draft, denouncing the US presence in Vietnam, and "radically" transforming university life and the "decadent" American Way of Life in general.

E0 12958 3.4(b)(1)>25Yrs
(C)

E0 12958 3.4(b)(1)>25Yrs
(C)

3. RADICAL EDUCATION PROJECT (REP)

The REP is the intellectual arm of SDS. It was established by SDS in 1966 as an independent education, research and publication organization devoted to the cause of "democratic radicalism," which has been commonly dubbed the New Left in America. REP is incorporated as a non-profit, educational organization.

Although claiming to be non-partisan, REP does "identify" with the "forces of radical democracy in America and abroad." REP's vision of the future calls for scrapping capitalism and the American "establishment."

The REP plans to develop a network of people, both in the US and abroad, to serve the movement as rapid "sources of intelligence" on issues as they develop. Such persons, including scholars, journalists, and youth leaders, will be expected to provide first-hand reports and analysis on insurgent movement and similar international developments. In this way the REP hopes to challenge "official truth" and to develop opposition resources.

The REP is already involved with SNCC and other organizations in establishing a Latin American affairs institute. This institute is to coordinate research, monitor information and maintain contacts in this hemisphere. The REP reportedly has contacts also in Canada, Japan, most European countries, and keeps in touch with the Viet Cong and African nationalists.

E0 12958 3.4(b)(1)>25Yrs
(C)

E0 12958 3.4(b)(1)>25Yrs
(C)

4. TRI-CONTINENTAL INFORMATION CENTER (TCIC)

The TCIC was established in October 1966 as the result of a proposal by Gus Hall, Secretary General of the CPUSA. Hall urged that the Party form an "anti-imperialist" organizational center to maintain contact with world peace forces, including the Communist-front World Peace Council and other centers in Latin America and Asia.

The TCIC appears to be almost completely under the domination of the CPUSA, which named its director and provides its contacts. TCIC puts out a bulletin which Hall has ordered passed to Communist parties around the world. Recruitment of TCIC personnel is under the direct control of the CPUSA.

The TCIC helped to organize US participation in the Stockholm conference against the war in Vietnam last July. TCIC Director Mike Myerson attended the conference.

TCIC has been particularly active in the movement for Puerto Rican independence. The Center participated in an island-wide march to protest the war in Vietnam and the drafting of Puerto Ricans for service in Vietnam.

Dr. Benjamin Spock is a member of TCIC's advisory board.

E0 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

5. STUDENT NON-VIOLENT COORDINATING COMMITTEE (SNCC)

SNCC was one of the earliest groups to popularize the call for "Black Power." Through the energies of its demagogic leaders, Stokely Carmichael and H. Rap Brown, SNCC has become the leading exponent of militant Negro action.

SNCC has become involved via the back door in the campaign against the war in Vietnam. Its leadership now makes a point of trying to turn Negro-Americans against the US Government, particularly with respect to the draft and service in Vietnam.

Carmichael recently has traveled extensively throughout the "Third World," in addition to North Vietnam and Cuba, railing against US "imperialism" and domestic repression. SNCC will be well represented, as it was at the Bratislava Conference in September, at any activity which offers it a chance to expound on its concepts of guerrilla warfare and racial violence.

EO 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

6. WOMEN STRIKE FOR PEACE (WSP)

The WSP was founded in 1961 as a nationally organized, women's pacifist organization especially opposed to American actions in Vietnam. The WSP is open to women of all political views who are interested in world peace. It has no officers. Known Communists are associated with the group.

Several women prominently associated with the WSP have maintained contact with Hanoi since visiting there on the invitation of the Vietnam Women's Union. Among these are Dagmar Wilson and Mary Clarke, who have participated actively in recent demonstrations.

EO 12958 3.4(b)(1)>25Yrs
(C)

E0 12958 3.4(b)(1)>25Yrs
(C)

7. WAR RESISTERS' LEAGUE (WRL)

The WRL, headquartered in New York City, is the American affiliate of War Resisters International (WRI). The WRI dates back to the early 1920's and has a long record of helping pacifists and their national organizations around the world in working for peace and in aiding conscientious objectors financially and in other ways.

Although the WRL is a non-partisan pacifist organization of long standing, recently it has been active in promoting resistance to the draft and desertion from the US forces. It has emerged as one of the more active overt agencies assisting US servicemen who wish to desert their posts.

E0 12958 3.4(b)(1)>25Yrs
(C)

8. THE BERTRAND RUSSELL PEACE FOUNDATION (BRPF)

The BRPF cannot be classified as an American "peace" organization per se. However, a substantial number of US citizens are involved in this activity, and particularly in its offspring, the "International War Crimes Tribunal" (IWCT). The major operator in both organizations is Ralph B. Schoenman, the American who is Lord Russell's personal secretary.

The BRPF, which Schoenman serves as director, has been described by Lord Russell as an organization "to investigate the causes of the Cold War and to pursue such measures as may diminish and eliminate the risk of war." Despite these aims, the BRPF rarely takes an objective approach to international problems. Its principal activities, largely governed by Schoenman, involve agitation against alleged US "imperialism" and advocacy of "Che Guevara" type revolutionary movements. (The latter interest apparently prompted Schoenman's recent excursion to Bolivia, from where he was deported to the US.)

Schoenman can perhaps best be described as an extreme leftist with Trotskyite tendencies. His views are so "red" that even the British Communist Party regards him with little enthusiasm.

SUMMARY. [redacted] NORTH VIETNAMESE PREMIER [redacted]

S-E-C-R-E-T [redacted]

APPROVED FOR RELEASE
DATE: JAN 2001

TO FULFILL THEIR RESPONSIBILITIES.

3. AIR RAIDS HAVE DEMORALIZED THE PEOPLE IN CERTAIN AREAS, PARTICULARLY WHEN STEEL PELLET BOMBS WERE USED, SINCE THEY TEND TO "MAIM HORRIBLY" RATHER THAN KILL. HOWEVER, EVEN AN INCREASE IN BOMBING WOULD NOT SUCCEED IN SHAKING NORTH VIETNAMESE FANATICISM UNLESS THE TOP LEADERS WERE ELIMINATED. SUCH AN EVENT IS NOT LIKELY, SINCE THE LEADERS ARE NOT CONCENTRATED IN ONE SPOT.

4. DESPITE NUMBERS OF POLITICAL COMMISSARS SCATTERED THROUGHOUT THE COUNTRY, THE PEOPLE GENERALLY DO NOT APPEAR TO BE AS CONCERNED WITH IDEOLOGY AS WITH THE PROBLEM OF FIGHTING THE WAR. THE NORTH VIETNAMESE DO NOT APPEAR TO BE RABID COMMUNISTS IN TERMS OF THE CULTURAL REVOLUTION OR STALINIST CONCEPTS. SEVERAL NORTH VIETNAMESE CONDEMNED THE CHINESE INFLUENCE ON NORTH VIETNAM AND EXPRESSED FEAR THAT COMMUNIST CHINA WOULD ONE DAY OCCUPY THEIR COUNTRY. NORTH VIETNAMESE NATIONALISM IS CHARACTERIZED BY FANATICAL PRIDE, WHICH IS NOT EXCEEDED EVEN IN CUBA OR CHINA.

5. THE NORTH VIETNAMESE DO NOT APPEAR TO CONSIDER

E0 12958 3.4(b)(1)>25Yrs
(C)

CONSIDERED NORTH VIETNAM DEFEATED. PHAM ALSO COMMENTED THAT THE POSITION OF THE NATIONAL FRONT FOR THE LIBERATION OF SOUTH VIETNAM HAD IMPROVED.

2. [redacted] ALTHOUGH MOST NORTH VIETNAMESE, PARTICULARY IN RURAL AREAS, DEMONSTRATE A FANATIC DETERMINATION TO PURSUE THE WAR TO ITS ULTIMATE CONCLUSION, THERE ARE DISCONTENTED ELEMENTS IN THE CITIES, ESPECIALLY AMONG INTELLECTUALS WHO HAVE STUDIED ABROAD. THEY WANT THE GOVERNING REGIME TO FIND A SOLUTION TO THE WAR THROUGH NEGOTIATION SO THAT THEIR COUNTRY CAN BE RECONSTRUCTED AND THE PEOPLE CAN HAVE A BETTER LIFE. SEVERAL CHEMISTS, DOCTORS, AND ENGINEERS SAID THAT THE WAR WAS LEADING NOWHERE AND IF CONTINUED WOULD "BLEED NORTH VIETNAM WHITE." THEY THOUGHT THAT THE PRESIDIUM OF THE NORTH VIETNAMESE COMMUNIST PARTY, WHICH IS STAFFED WITH PARTY ELDERS, SHOULD BE REJUVENATED. SEVERAL SENIOR MILITARY OFFICERS SAID A QUICK AND COMPLETE MODERNIZATION OF THE COUNTRY WAS NECESSARY BUT THAT PROGRESS WOULD BE SLOW AS LONG AS THE WAR CONTINUED. HOWEVER, THEY INDICATED NO SIGN OF WEAKENING AND CONTINUED

E0 12958 3.4(b)(1)>25Yrs
(C)

PHAM VAN DONG STATED IN OCTOBER 1967 THAT NORTH VIETNAM WOULD NOT NEGOTIATE UNTIL MILITARY OPERATIONS AGAINST IT WERE ENDED AND WOULD NEVER NEGOTIATE WITH AN ENEMY WHICH CONSIDERED NORTH VIETNAM DEFEATED. [redacted] EO 12958 3.4(b)(1)>25Yrs (C)

[redacted] THE NORTH VIETNAMESE SEEM DETERMINED TO CONTINUE THE WAR, EVEN THOUGH THEY ARE NOT ARDENT COMMUNISTS. HOWEVER, INTELLECTUALS WHO HAVE STUDIED ABROAD WISH A NEGOTIATED SETTLEMENT IN ORDER TO RECONSTRUCT THEIR COUNTRY. SOME MILITARY OFFICERS WOULD LIKE THE WAR TO END FOR THE SAME REASON, BUT THEY CONTINUE TO FAITHFULLY FULFILL THEIR DUTIES. END SUMMARY. EO 12958 3.4(b)(1)>25Yrs (C)

1. [redacted] NORTH VIETNAMESE PREMIER PHAM VAN DONG STATED RECENTLY THAT IT WOULD BE IMPOSSIBLE FOR NORTH VIETNAM TO ACCEPT AMERICAN NEGOTIATION PROPOSALS UNLESS MILITARY OPERATIONS AGAINST NORTH VIETNAM WERE HALTED FIRST. THE PREMIER SAID NORTH VIETNAM WOULD NEVER SIT AT A CONFERENCE TABLE SO LONG AS THEIR TERRITORIAL INTEGRITY WAS NOT RESPECTED AND WOULD NEVER NEGOTIATE WITH AN ADVERSARY WHO

27 November 1967

MEMORANDUM FOR THE RECORD

SUBJECT: 17 November White House Data Meeting

1. At 1700 on Friday, 17 November, a meeting was convened in the White House Situation Room by Mr. Walt W. Rostow to review the Vietnam data problem and related actions currently in train, both in Saigon and Washington. The session was attended by Ambassador Robert Komer, Mr. William Jorden, Mr. Richard Moose, Mr. Philip Habib, Dr. Victor Heyman, Ambassador William Leonhart, Major General William DePuy, Mr. George Carver and Mr. George Allen.

2. The specific occasion for the meeting was consideration of a Washington reply to Saigon Embtel 10573, 7 November 1967. As Mr. Rostow explained, however, the more general objective was to get the US Mission in Saigon and the Washington community thinking together on the data problem and thus forestall a burgeoning exchange of lengthy cables attempting to argue ... differences of opinion better settled around a table. Mr. Carver pointed out that Ambassador Bunker had been advised at lunch on 17 November that such a meeting was going to be held and had expressed a great interest in attending. Since this was obviously impossible because of the conflict with a speaking engagement in New York, it was agreed that the results of the meeting would be shown to the Ambassador for his review prior to the dispatch of any further messages to Saigon.

3. Dr. Heyman went systematically through the argument of Saigon Embtel 10573 outlining the elements in the US Mission's position with which the Washington community had problems. These were, principally, the Mission's proposed treatment of recruitment, infiltration, and related net loss computations on VC strength.

APPROVED FOR RELEASE
DATE: AUG 1998

SECRET

4. After some brisk but helpful discussion, two fundamental points were unanimously agreed to:

a) A sharp distinction must be and will be made between data series and computations used as management tools by the US Government and data publicly surfaced for general consumption to enlighten the world at large with regard to the status of the Vietnamese struggle.

b) Henceforth, public explanations of the state of the war and progress being reported therein will not be pegged on statistics, though statistics will be used where relevant as illustrative examples to support general qualitative judgments.

5. In line with the policy agreed to in (b) above, the thesis (that all accept) that the Viet Cong are having recruitment problems will henceforth be publicly argued on the basis of captured documents describing such problems and will utilize available evidence of the increasing number of North Vietnamese assigned to what were historically Viet Cong units. Our estimates of recruitment rates (probably 7,000 per month for 1966 and probably down to the order of 3,500 per month for 1967) may be cited, but as ancillary illustrations and not as the keystone of the argument. Infiltration rates and loss calculations will be similarly handled in a low key with appropriate caveats, so that we may let the facts speak for themselves without appearing to claim that our statistics are better than they are or prove points they do not necessarily demonstrate beyond reasonable doubt.

6. The Washington participants in the 17 November meeting reviewed all aspects of the data problem and work being done on it with Ambassador Komer. Ambassador Komer was given a copy of the 26 October 1967 preliminary report of the Washington interagency Data Task Force and brought up to date on the current activities of that Task Force's various components. He, in turn, outlined work going on in Saigon and new projects being initiated there. Of these, the most important was the development, under Ambassador Komer's aegis, of a reporting procedure designed to evaluate the effectiveness of the Vietnamese Armed Forces, and to give reliable information on the strength, disposition and current duties of Regional and Popular Force units. Ambassador Komer agreed to furnish this information to Washington and also agreed to furnish the Washington community with copies of the provincial pacification plans for each of South Vietnam's provinces. We, in turn, agreed to provide Ambassador Komer with analytic back-up and support, particularly computer support, to assist him in analysis required in the field.

7. The Hamlet Evaluation System was discussed in considerable detail. While acknowledging its weaknesses, Ambassador Komer praised it highly as the best thing ever developed and an indispensible management tool. There was unanimous agreement that HES was designed primarily as a management tool, not as a way of measuring population control, and that it should not be allowed to be corrupted for public relations reasons. Ambassador Komer emphasized that he had given personal instructions to every district advisor to report honestly through the HES mechanism, making it plain that he was interested in problems, not progress. Ambassador Komer gave his personal assurance that pressure for "results" would not be allowed to corrupt the HES system.

8. A number of other technical data questions were raised, discussed and resolved at this meeting. In general it was a most useful session which gave every appearance of achieving its principal object, i.e., getting Washington and Saigon on the same wave length. Ambassador Komer is now reviewing the Data Task Force report in detail. Dr. Heyman is charged with drafting a message to Saigon outlining our substantive agreements and making detailed recommendations in light thereof. This will be reviewed by the Data Committee and by Ambassador Bunker prior to transmission.

VAR: AS SOON AS YOU DO SO WE WILL RESUILD YOUR BRIDGES. (PASSAGE OMITTED) MY FATHER IS A MULTIMILLIONAIRE. I WILL PAY YOU FOR THEM. (PASSAGE OMITTED)

ANOTHER PILOT IS INJURED. THE DOCTOR ASKS HIM HOW HE FEELS. HE REPLIES: WELL, BUT I MUST TELL YOU SOMETHING DOCTOR, YOU ARE ALL QUITE KIND, BUT YOUR MEDICINES ARE WORTHLESS. ONLY AMERICAN MEDICINES ARE GOOD. YOU ARE DOING WHATEVER YOU CAN, BUT COMPARED TO U.S. DOCTORS, YOU ARE ONLY BEGINNERS. THEREFORE THIS IU WHAT I SUGGEST: WE HAVE CLARKBASE IN THE PHILIPPINES WHERE THEY HAVE EVERYTHING THAT IS NEEDED. YOU LET ME GO THERE AND AS SOON AS I RECOVER I WILL RETURN HERE TO GIVE MYSELF UP. (PASSAGE OMITTED)

DOWNED U.S. PILOTS ENERGETICALLY REFUSE TO ADMIT THAT THEY MAY HAVE BEEN SHOT DOWN BY VIETNAMESE PILOTS--AN INFERIOR SPECIES IN THE MINDS OF THE AMERICAN PILOTS. NO, THEY WERE HIT BY SAM MISSILES OR BY ANTIAIRCRAFT BATTERIES--BUT NEVER BY MIG PILOTS. ONE PILOT, FOR EXAMPLE, IS GIVEN ALL THE PROOF THAT HE WAS HIT BY ONE OF HIS VIETNAMESE COUNTERPARTS. HE DEFENDS HIMSELF VEHEMENTLY, NEVERTHELESS, HERE ARE IRREFUTABLE PICTURES. THEY EVEN BRING TO HIS HOSPITAL BED THE PILOT WHO DOWNED HIS PLANE. THE AMERICAN STILL HESITATES, THEN SAYS: I WOULD HAVE NEVER BELIEVED IT, BUT EVIDENTLY IT IS AS YOU SAY. (PASSAGE OMITTED)

A MEETING WHICH WILL LEAVE ITS MARK ON MY LIFE:

MY MEETING WITH JOHN SIDNEY MCCAIN WAS CERTAINLY ONE OF THOSE MEETINGS WHICH WILL AFFECT ME MOST PROFOUNDLY FOR THE REST OF MY LIFE. I HAD ASKED THE NORTH VIETNAMESE AUTHORITIES TO ALLOW ME TO PERSONALLY INTERROGATE AN AMERICAN PRISONER. THEY AUTHORIZED ME TO DO SO. WHEN NIGHT FELL, THEY TOOK ME--WITHOUT ANY PRECAUTIONS OR MYSTERY--TO A HOSPITAL NEAR THE GIA LAM AIRPORT RESERVED FOR THE MILITARY. (PASSAGE OMITTED) THE OFFICER WHO RECEIVES ME BEGINS: I ASK YOU NOTT TO ASK ANY QUESTIONS OF POLITICAL NATURE. IF THIS MAN REPLIES IN A WAY UNFAVORABLE TO US, THEY WILL NOTT HESITATE TO SPEAK OF "BRAINWASHING" AND CONCLUDE THAT WE THREATENED HIM. (PASSAGE OMITTED)

MTHIS JOHN SIDNEY MCCAIN IS NOTT AN ORDINARY PRISONER.MHIS FATHER IS NONE OTHER THAN ADMIRAL EDMOND JOHN MCCAIN, COMMANDER IN CHIEF OF U.S. NAVAL FORCES IN EUROPE. (PASSAGE OMITTED)

IN A WEAK VOICE, HE RELATES HIS STORY TO ME: I WAS CARRYING OUT A BOMBING MISSION, MY 23D TWENTYTHIRD RAID, OVER HANOI. IT WAS THEN

THAT I WAS HIT. I WANTED TO EJECT BUT WHILE DOING SO I BROKE BOTH ARMS AND MY RIGHT THIGH. UNCONSCIOUS I FELL IN A LAKE. SOME VIETNAMESE JUMPED INTO THE WATER AND PULLED ME OUT. LATER I LEARNED THERE MUST HAVE BEEN ABOUT 12 TWELVE OF THEM. THEY IMMEDIATELY TOOK ME TO HOSPITAL, IN A CONDITION TWO INCHES AWAY FROM DEATH. A DOCTOR OPERATED ON MY THIGH. OTHERS AT THE SAME TIME DEALT WITH MY ARMS.

HOW ARE YOU TREATED HERE?

VERY WELL. EVERYBODY IS VERY NICE TO ME.

HOW IS THE FOOD?

HE SMILESSFEELY. OBVUOUSLY, THE LEAST REACTION HURTS HIM. THIS ISN'T PARIS, BUT IT IS ALRIGHT.

DO YOU HAVE SOMETHING TO READ?

THEY HAVE SUGGESTED THAT I READ, BUT MY HANDS ARE UNABLE TO HOLD EVEN A NEWSPAPER.

HIS CIGARETTE HAS GONE OUT. HE TALKS TO ME ABOUT HIS WIFE WHO LIVES IN JACKSONVILLE, FLORIDA, AND ABOUT HIS THREE CHILDREN. AND NOW HE ADDRESSES HIS FAMILY: I KNOW THAT THIS IS GOING TO TURN OUT WELL. I HOPE THAT I WILL SEE YOU SOON. I WIL B WELL. THIS IS AL RECEPEATS: THIS IS ALL. (PASSAGE OMITTED)

d. Central Intelligence Organization:

The commissioner of the Central Intelligence Organization (CIO) and other ranking CIO officers are planning to separate counter intelligence and communist penetration functions of the NPSS and to assign these functions to the Domestic Intelligence and Counter Espionage Service (DICS). The DICS has been previously identified as the Domestic Intelligence Service (DIS). A close working relationship between the DICS and the CIO is planned with the DICS relying upon the police at the village level to supply operational leads and logistical support.

Planning initiated with the DICS for establishment of units to concentrate upon identification and location of Viet Cong bands interrupting main highways, to provide targets for attack by regular military units.

e through i: No significant change:

2 through 6: No significant change.

7. Other Activities:

High levels of GVN discussed centralization of planning for the strategic hamlet program, possibly by interministerial committee. [redacted]

E0 12958 3.4(b)(1)>25Yrs
(S)

Eight civic-action ministry instructors completed six-week off-shore paramilitary and intelligence course. Returned Saigon and beginning instruction of civic action team members.

Class of 182 civic-action team members, including 22 young women, began six-week paramilitary training course near Da Nang (Tourane), which will stress defensive tactics related to organization of strategic hamlets.

UNITED STATES Servicemen's Affairs Committee

AFRICAN INTERVIEWS [illegible], MIDDLE EAST

Extract LIBERATION in French 29 Dec 67 p 3.

[Article in series written by Figaro [illegible] reporter Francois Cholain--on exclusive to L'[illegible]--titled 'Life in Hanoi' and describing the reporter's one-month visit to North Vietnam date of the visit not given. The series was announced 25 December and began 27 December. This installment is titled: 'The U.S. prisoners do not understand']

[Excerpts] I met some American fliers--pilots, often wounded, having ejected from their planes. They--like the Vietnamese they are massacring, but for different reasons--do not understand what has happened to them. Here are some examples of their bewilderment:

"We will rebuild your bridges." To this pilot, someone has brought pictures of destroyed bridges. Do you recognize these bridges? Yes, says the pilot, this should have been my work. Then he is shown the same pictures, taken a short while before [*** four pictures] These pictures show many bodies--several bodies--scattered around the bridge. Is this also your work? The American hesitates, then says: It is not my fault if people are foolish enough to pass over bridges while I am bombing. And soon he adds: However I do not understand you. You have only to stop the war. As soon as you do so we will rebuild your bridges. My father is a multimillionaire. I will pay you for them.

Another pilot is injured. The doctor asks him how he feels. He replies: Well. But I must tell you something doctor. You are all quite kind, but your medicines are worthless. Only American medicines are good. You are doing whatever you can, but compared to U.S. doctors, you are only beginners. Therefore this is what I suggest: We have Clark Base in the Philippines where they have everything that is needed. You let me go there, and as soon as I recover I will return here to give myself up.

Downed U.S. pilots energetically refuse to admit that they may have been shot down by Vietnamese pilots--an inferior species in the minds of the American pilots. No, they were hit by SAM missiles or by antiaircraft batteries--but never by MIG pilots. One pilot, for example, is given all the proof that he was hit by one of his Vietnamese counterparts. He defends himself vehemently. Nevertheless, there are irrefutable pictures. They even bring to his hospital bed the pilot who downed his plane. The American still hesitates, then says: I would have never believed it, but evidently it is as you say.

A meeting which will leave its mark on my life:

My meeting with John Sidney McCain III certainly one of those meetings which will affect me most profoundly for the rest of my life. I had asked the North Vietnamese authorities to allow me to personally interrogate an American prisoner. They authorized me to do so. When night fell, they took me--without any precautions or mystery--to a hospital near the Gia Lam Airport reserved for the military. The X officer who received me began: I beg you not to ask any questions of political nature. If this man replies in a way unfavorable to us, they will not hesitate to accuse of "brainwashing" and conclude that we threatened him. ...

This John Sidney McCain is not an ordinary prisoner. His father is none other than Admiral John McCain, commander in chief of U.S. Naval Forces in Europe.

SUBJECT: AIRCRAFT INVOLVED IN THE ATTACK ON PHOU PHA THI (SITE 85)

ACQ: LAOS, VIENTIANE (13 JANUARY 1968) FIELD NO: (b)(1) (b)(3) 3.4(b)(1)

SOURCE:

1. FOUR DARK GREEN AIRCRAFT FLYING IN A NORTHWESTERLY DIRECTION PASSED THE VICINITY OF MUONG SANG (UH 8350) AT 1300 HOURS ON 12 JANUARY. WHEN THE FOUR AIRCRAFT REACHED BAN HOUEI SOUI (UH 7852), TWO OF THE AIRCRAFT, BROKE FROM FORMATION AND ORBITED IN THE HOUEI SOUK AREA, WHILE THE SECOND TWO AIRCRAFT, WHICH WERE AN-2 COLTS, CONTINUED TO PHOU PHA THI (UH 6860) AND COMMENCED BOMBING RUNS WHILE FLYING ON AN APPROXIMATE HEADING OF 304 DEGREES. (COMMENT: CONTAINED A PRELIMINARY ACCOUNT OF THE ATTACK ON PHOU PHA THI.)

2. EACH OF THE TWO ATTACKING AIRCRAFT MADE ONE BOMBING AND STRAFFING RUN AT 1310 HOURS. TWO WOMEN CIVILIANS AND TWO GUERRILLA

(classification) (limited controls)

3.4(b)(3)

SOLDIERS WERE KILLED AND TWO WOUNDED BY BOMBS. ONE MAN WAS WOUNDED BY FLYING DEBRIS. THE BOMBS, WHICH ALL APPEARED TO HAVE BEEN 250 POUNDS, INFLICTED SLIGHT DAMAGE TO SOME BUILDINGS, MOST OF WHICH WERE BILLETS.

3. THE FIRST AIRCRAFT CRASHED AND BURNED IN THE VICINITY OF UH 606865 SHORTLY AFTER IT HAD COMPLETED ITS BOMBING RUN. A GROUND TEAM FROM PHOC PHA THI SEARCHED THE AREA AT 1600 HOURS ON 12 JANUARY AND REPORTED NOTHING WAS SALVAGEABLE. SEVERAL ROUNDS OF SMALL ARMS FIRE ALSO HIT THE SECOND AIRCRAFT, WHICH BORE TAIL NUMBER 665, AS IT MADE ITS BOMBING RUN. IT CRASHED IN THE VICINITY OF UH 570895.

A. A GROUND TEAM THAT REACHED THE CRASH SITE AT UK 5789 AT 1600 HOURS ON 12 JANUARY RECOVERED TWO OF THREE BODIES IN THE AIRCRAFT. THE TEAM COULD NOT REMOVE A THIRD BODY WHICH WAS WEDGED IN THE WRECKAGE. THE TEAM REPORTED ALL OCCUPANTS OF THE AIRCRAFT APPEARED TO BE VIETNAMESE. THE TEAM ALSO RECOVERED A SOVIET MANUFACTURED HF RADIO AND A SET OF 71 ACCESSORY CRYSTALS AND CHARTS AND NOTEBOOKS IN VIETNAMESE. ONE AERONAUTICAL CHART WAS

31 January 1968

Status of Merchant Shipping in North Korea
as of 1100 31 January 1968

1. The last known locations of North Korea's five merchant ships (all dry cargo ships) are given below.* Four of these ships probably are attached to the fishing fleet. The other operates in the coastal trade. None has been detected in international trade, but two of the ships may have made voyages to the China coast.

a. Wisung Ho (1,500 GRT) -- a dry cargo ship in the coastal trade. May have made voyages to Communist China. Tentatively identified in Wonsan [redacted] 3 November 1967.

b. P'yong Hwa (1,935 GRT) -- a dry cargo ship attached to the fishing fleet. Previously may have sailed to China. Identified in [redacted] Wonsan of 26 January 1968.

c. Paektu-San (7,218 GRT) -- a fish factory ship probably based in Kimchaek. Located in Kimchaek [redacted] 3 November 1967. On 27 January 1968 was identified by a North Korean submarine chaser at 9.6 nautical miles south of Yongdaegap, near Sinpo.

d. MAG I (1,987 GRT) and MAG II (1,909 GRT) -- refrigerator ships attached to the fishing fleet. One was tentatively identified in Kimchaek [redacted] 12 December 1967, and one was tentatively identified [redacted] Wonsan of 26 January 1968.

2. The last known locations of the three Polish-flag dry cargo ships operated by the Joint Korean-Polish Ship Brokers' Co. (Chopolship) are given below. These are ships previously owned and operated by Polish Ocean Lines, and presumably are still Polish owned. The Mickiewicz is under time charter to Chopolship and has a mixed Polish-North Korean crew. The others probably are under time charter to Chopolship also, but the composition of their crews is unknown.

a. Adolf Warski (6,718 GRT) -- departed Chongjin 30 December enroute Poland. Departed Penang 20 January.

b. Mickiewicz (4,344 GRT) -- Probably arrived Hungnam 11 January and departed Hungnam 26 January after loading cargo for Djakarta, Karachi, and Huangpu to be transshipped at Singapore. On 31 Jan 0111Z was at 26:27N, 121:35E (opposite Foochow, China). ETA Singapore 4 February 1968.

* A sixth North Korean merchant ship, the refrigerator ship Daesong San, launched on 5 October 1967, was located at Nampo on 26 January 1968. This ship of approximately 2,000 GRT is still apparently being fitted out.

1.5(c)(d)
3.4(b)(1)(6)

c. Narwik (7,065 GRT) -- Departed Santiago 21 Jan 1420Z. ETA Guantanamo 21 January. To load sugar for North Korea.

3. The following foreign merchant ships are in North Korean ports:

In Chongjin

Bucuresti (Rumanian--9224 GRT) arrived 22 January, ETD 31 January.

Eisbu Maru (Japanese--1,992 GRT) In port 25 January. To return to Chongjin 18 February to load cargo, including 12 tons graphite.

Pundua (British--7,295 GRT) ETA 24 January under North Vietnamese Time Charter. To load lighters and heavy lifts for Haiphong after having loaded fertilizer for North Vietnam in Hungnam.

Werner Seelenbinder (East German--8,003 GRT) ETA Chongjin 28 January. May load zinc and clinkers.

In Hungnam

Tikei (Soviet--9,501 GRT) Arrived 28 January from Nampo.

Yana (Soviet--3,231 GRT) Arrived 26 January to load cement.

In Nampo

Gornoaltaysk (Soviet--3,725 GRT) in port 26 January to load coal for Japan. ETD 28-29 January.

Kovrov (Soviet--9,250 GRT) in port 26 January.

Vyatkales (Soviet--3,261 GRT) Loading cement for Sakhalin.

4. The following foreign merchant ships are scheduled to arrive in North Korea:

Byzantion (Greek 7,276 GRT) ETA Hungnam 21 February, probably from Kosseir, UAR.

Genkai Maru (Japanese 2,346 GRT) ETA Nampo 10 February.

Hanoi (Polish 6,914 GRT) ETA Yokohoma 25 January. ETA North Korea 7 February.

Heiyo Maru (Japanese 2,973GRT) ETA 8 February. To load foundry pig iron.

Keihan Maru (Japanese ----GRT) ETA North Korea 1 February to discharge pitch coal.

Kotoku Maru (Japanese 2,278 GRT) ETA Hungnam 20 February.

VANG AND DIEN BANH DISTRICTS HAD CONTACT WITH THE VC. TEAM 4's LEADER AND HIS ASSISTANT WERE KIA; TEAM 11 SUFFERED ONE KIA; TEAM 5, ONE KIA; TEAM 7, ONE KIA; AND TEAM 28 HAD CONTACT AT 0300 ON 1 FEBRURRY BUT RESULTS ARE UNKNOWN. TEAM 7 WAS STILL ON CAM THANH ISLAND, ABOUT 50 METERS ACROSS FROM THE MARKET IN HOI AN, WHICH IS CONTROLLED BY THE VC.

5. ONE RALLIER TO THE FIFTY FIRST ARVN BATTALION, ALLEGEDLY A MEMBER OF THE SECOND NORTH VIETNAM (NVA) DIVISION, ONE OF THREE VC ELEMENTS XXXXXXXX THAT ATTACKED THE DANANG COMPLEX, SAID THAT THESE FORCES (UNSPECIFIED) SUFFERED HEAVY CASUALTIES. HE CLAIMED HE WAS THE SOLE SURVIVOR OF HIS PLATOON, ONE REASON HE RALLIED. ACCORDING TO HIS STATEMENT THE MISSION OF THE THREE UNITS WAS TO ATTACK HOI AN AND DANANG CITY DURING THE FIRST THREE DAYS OF TET.

END OF MESSAGE

NND 941536 --- 6 Y

AMB

REPORT CLASS
COUNTRY: SOUTH VIETNAM
SUBJECT: SITUATION REPORT ON QUANG TRI PROVINCE AS OF 0700 ON 1 FEBRUARY

ACQ: VIETNAM, DANANG (1 FEBRUARY 1968)
SOURCE: THIS IS A SITUATION REPORT ON 1 FEBRUARY PREPARED BY CAS,

(b)(3)

1. QUANG TRI PROVINCE HAS MUDDLED THROUGH TWO NIGHTS AND ONE DAY OF "THE OFFENSIVE." SOMEHOW WE HAVE ESCAPED SERIOUS FAILURE AND DEFEAT. THAT IS NOT TO SAY, HOWEVER, THAT WE ARE OUT OF THE WOODS YET. THE ENEMY, VIET CONG (VC), HAS PLENTY OF MUSCLE; BUT HE HAS GIVEN US TIME TO GET SET, TO PLUG THE GAPS IN OUR DEFENSIVE LINEUPS, AND TO CORRECT SOME OF OUR GRIEVOUS WAYS.

2. THE VC OFFENSIVE IN QUANG TRI PROVINCE DEVELOPED EXACTLY AS AMERICAN ADVISORS PREDICTED IN THREE PHASES: INTERDICT LINES OF COMMUNICATIONS (PARTLY SUCCESSFUL); NEUTRALIZE U.S. COMBAT BASES (TOTALLY UNSUCCESSFUL); AND THEN ATTACK VIETNAMESE CENTERS

58

NND 941536 ---67

OF AUTHORITY THROUGH THE PACIFIED AREAS (SO FAR UNSUCCESSFUL).

A. SIX NORTH VIETNAM ARMY (NVA) OFFICERS, MOSTLY LIEUTENANTS, WERE EITHER KILLED OR CAPTURED IN THE 30 DAYS PRECEDING THE LAUNCHING OF PHASE III WHILE ON RECONNAISSANCE MISSIONS IN THE PACIFIED AREAS. THEY HAD DETAILED MAPS OF PHASE III II AND I TARGETS.

B. FORWARD STOCKPILING OF WEAPONS, AMMUNITION AND RICE WAS DETECTED DURING THE PRECEDING 60 DAYS.

C. AGENT REPORTS, POW INTERROGATIONS, AND CHIEU HOI STATEMENTS CONSISTENTLY STATED THAT THE ENEMY PLANNED TO TAKE AND OCCUPY QUANG TRI CITY.

D. THE HUGE TROOP MOVEMENTS DETECTED BY ALL SOURCES WERE HIGHLY SIGNIFICANT, BOTH NORTH TO SOUTH AND WEST TO EAST. A SIMPLE PROJECTION OF THE ROUTE LED THEM CONVERGING ON QUANG TRI, DONG HA, TRIEU PHONG.

E. JUST BEFORE THE BIG ATTACK BEGAN ALLIES OBTAINED LARGE STACKS OF PROPAGANDA MATERIAL AND NATIONAL FRONT FOR THE LIBERATION OF SOUTH VIETNAM (NFLSV) FLAGS. THE STUFF WAS NOT UNUSUAL IN CONTENT, JUST IN QUANTITY. APPARENTLY THIS ATTACK IN THE MINDS OF THE LEADERS IN HANOI WAS TO BE MORE OF AN "ANCHLUSS THAN A BATTLE FOR WARSAW."

NND 941536 --- 68

3. THE ENEMY SEEMS TO HAVE BEEN EXPECTING MORE THAN HE ACCOMPLISHED. APPARENTLY HE FAILED (SO FAR) BECAUSE HE MIS-CALCULATED THE U.S. AIR SUPERIORITY AND ALL THAT THAT SUPER-IORITY MEANS WHEN EMPLOYED MASSIVLEY AND BECAUSE HE EXPECTED MORE SUPPORT FROM THE PEOPLE. INSTEAD OF PLAYING DOGGO OR JOINING HIS STEAMROLLER, THE PEOPLE VOTED WITH THEIR FEET. QUANG TRI CITY'S POPULATION HAS TRIPLED OR QUADRUPLED IN THE LAST 48 HOURS. ORDINARY PEOPLE HAVE BEEN SUPPLYING ACCURATE INFORMATION ON ENEMY LOCATIONS AND THERE HAS BEEN NO PANIC.

4. THE TIME OF ATTACK, 0400 31 JANUARY, LEADS A/CAS OBSERVER BELIEVE THE ENEMY WANTED TO STAGE A COUP. WHEN PEOPLE WOKE UP THEY WOULD FIND A NEW FLAG FLYING. VC CADRE WOULD BE EVERYWHERE HANDING OUT LEAFLETS, BROADCASTING TO THE PEOPLE. ALL THE VC HAD TO DO WAS TO SEIZE THE CITADEL. BUT THAT WAS A TALL ORDER. PROBABLY A FULL REGIMENT WAS EMPLOYED ON THE ATTACK WITH ADDITIONAL SPECIAL ACTION SQUADS TO BREACH THE WALLS OF THE CITADEL. ONE BATTALION COMING FROM THE NORTH WAS DELAYED IN TRI BUU HAMLET BY ARVN AIRBORNE. SAPPERS GOT THROUGH INTO THE CITY, 24 WERE KILLED BY APCS, PRU'S, NUNG GUARDS AND TWO BY LOUIS BALIGHASAY - A GRENADE THROWING CHIEU HOI ADVISOR.

SOME OF THEM WERE CARRYING BIG SATCHEL CHARGES AND LADDERS BUT THEY SEEMD AT A LOSS WHERE TO USE THEM. TWO BATTALIONS TANGLED WITH THE ARVN AND U.S. TROOPS AT LA VANG BUT THEY GOT NOWHERE AND SUFFERED MORE THAN 100 KIA. REMNANTS OF THESE TWO FORCES TOOK REFUGE IN THE SUBURBS OF THE CITY NORTH AND SOUTH. SOME ARE STILL THERE AND ONE REPORT HAS IT THAT A GENERAL YE (PHONETIC) IS WITH THEM AT APPROXIMATELY YD 345513. AN ENEMY STRONG POINT HAS HELD OUT IN THIS VICINITY FOR 36 HOURS. THE ENEMY ALSO DUG IN IN TRI BUU HAMLET TO THE NORTH OF THE CITY. AS A RESULT THE HAMLET SEEMS TO HAVE BEEN DESTROYED IN THE FIGHTING DURING THE NIGHT OF 31 JANUARY.

5. PROVINCE CHIEF LIEUTENANT COLONEL PHAM AM HAS BEEN IN A FUNK. NO DECISIONS WERE MADE BY HIM. FEW OF THE SECTOR OFFICERS HAVE BEEN ON THE BALL. BUT ALL THE BATTALION COMMANDERS HAVE BEEN GREAT. COL. SNAPPER RATTAN, 1 BDE CMDR, OF 1ST AIR CAV HAS BEEN A PRINCE. US MACV DID A GOOD JOB OF DEFENDING THEIR COMPOUND. THEY HAD TWO KIA AND FOUR WIA. (DON'T KNOW IF THEY SUFFERED CASUALTIES THIS SECOND NIGHT NOW ENDING.) NO U.S. CIVILIAN OR THIRD COUNTRY CASUALTIES.

6. FIELD DISSEM: STATE MACV III MAF CORDS.

NND 941536 --- 125

REPORT CLASS
COUNTRY: SOUTH VIETNAM
DOI: 31 JANUARY 1968
SUBJECT: BACKGROUND ON 31 JANUARY ATTACK AGAINST TAM KY CITY, QUANG TIN PROVINCE

ACQ: VIETNAM, DANANG (2 FEBRUARY 1968)
SOURCE:

1. THE TRANSLATIONS OF TWO DOCUMENTS RECOVERED FROM THE BODY OF A WOUNDED VIET CONG (VC) WHO PARTICIPATED IN THE 31 JANUARY ATTACK ON TAM KY CITY, QUANG TIN PROVINCE, DISCLOSED THAT THE ATTACK WAS TO BE UNDERTAKEN FROM THREE SIDES, WITH TWO-PRONGED CONCENTRATIONS ON PROVINCIAL HEADQUARTERS. THE VC 70TH MAIN FORCE (OR POSSIBLY THE 70TH BATTALION OF THE 21ST NORTH VIETNAMESE ARMY (NVA) REGIMENT), AND THE 72ND AND 74TH LOCAL FORCE BATTALIONS WERE AMONG THE UNITS THAT

NND 941536 ---/26

PARTICIPATED IN THE ATTACK. THE DOCUMENTS GAVE INSTRUCTIONS FOR THE VC TO DESTROY THE BUS STATION, TRY TO OCCUPY THE AIR FIELD (THE 74TH), AND TO TRY TO OCCUPY PROVINCE HEADQUARTERS. AMONG THE NOTATIONS WERE CAUTIONS AGAINST WEARIVNG BLACK CLOTHES AND SIGNAL PLANS AND TIMES CERTAIN ELEMENTS, SUCH AS SAPPER UNITS, WERE TO CARRY OUT THEIR TASKS. INCLUDED WAS A SKETCH OF THE LINES OF INFILTRATION FOR THE ATTACK. LETTERS TAKEN FROM THE VC, WHO LATER DIED, REFER TO THE HARDSHIPS SUFFERED FROM UNITED STATES BOMBING AND MOURN FRIENDS WHO HAD BEEN KILLED. ONE WRITER SAYS HE WOULD LIKE TO HAVE AN OPPORTUNITY TO TAKE REVENGE FOR THOSE KILLED UNJUSTLY BY UNITED STATES AGGRESSORS. (FIELD COMMENT: THE VC SUFFERED A HIGH KILLED IN ACTION RATIO DURING THIS ATTACK AND APPARENTLY HAVE NOT INFLICTED HEAVY DAMAGE IN SUBSEQUENT ATTACKS AGAINST TAM KY AND THE SIXTH ARMY OF THE REPUBLIC OF VIETNAM (ARVN) REGIMENT.)

2. IN ONE INCIDENT OF THE VC ATTACK ON 31 JANUARY PROVINCIAL RECONNAISSANCE UNIT (PRU) MEMBERS CAPTURED 19 VC INDIVIDUAL AND CREW-SERVED WEAPONS, INCLUDING ONE 57MM RECOILLESS RIFLE. THE PRU'S KILLED 23 VC (UNITED STATES ADVISOR BODY COUNT) AND CAPTURED ONE VC. TWO PRUS WERE SLIGHTLY WOUNDED AND DAMAGE TO THE

NND 941536 --- 127

AMB

PRU CAMP WAS MINIMAL. THE ATTACK BEGAN AT 0445 WHEN APPROXIMATELY TWO BATTALIONS OF VC SUPPORTED BY AN UNKNOWN NUMBER OF LOCAL VC COMPANIES ATTACKED THE QUANG TIN PROVINCE HEADQUARTERS COMPOUND UNDER COVER OF A MORTAR BARRAGE. ONE BATTALION OF VC ATTACKED FROM THE NORTHWEST, STRIKING AT THE PRU COMPOUND AND AN ARVN COMPANY ON COMPOUND'S EAST FLANK. THE ARVN COMPANY SOON WITHDREW TO THE PROVINCIAL INTERROGATION CENTER, LEAVING THE FLANK OPEN. THE PRU'S PUT THE AREA UNDER FIRE WITH THREE MACHINE GUNS AND FIVE M-79'S, PLUS THEIR INDIVIDUAL WEAPONS. AT ABOUT 0515 HOURS THE PRU'S BEGAN TO RECEIVE INTENSE MACHINE GUN FIRE FROM THE AREA ABANDONED BY ARVN. AT 0645 HOURS A THIRTY-MAN PRU TEAM MOVED TOWARD THE AREA FROM WHICH THE MACHINE GUN FIRE AND CAPTURED THE MACHINE GUN, WHICH LATER TURNED OUT TO HAVE BEEN LEFT BEHIND BY THE ARVN UNIT.

INTELLIGENCE MEMORANDUM

Pueblo Sitrep No. 28
(As of 7:00 AM EST)

1. Public commentary from North Korea during the past 24 hours contains no new observations on the Pueblo incident. The authoritative Nodong Sinmun shifted its editorial theme from the ship's seizure to support for the Communist offensive in South Vietnam, noting that "with no big talk or bluffing can the US imperialists stave off their final defeat."

[redacted]

APPROVED FOR RELEASE
22 SEPT 99

[redacted]

6. The Soviets continue to shadow US naval units in the Sea of Japan. At latest report, the intelligence collecting ship Gidrolog was accompanying the Enterprise task group at a range of 12 miles. The Kotlin-class destroyer DD424 was reported observing the USS Ranger at a distance of seven miles.

7. The Soviet merchant vessel Kapitan Vislobokov is apparently proceeding to its destination after colliding with the USS Rowan. The Rowan is en route to Sasebo for repair of minor damage resulting from the collision.

REPORT CLASS
COUNTRY: SOUTH VIETNAM
SUBJECT: SITUATION REPORT IN HUE, TAM KY, QUANG TIN PROVINCE, AND DANANG CITY AS OF 1700 HOURS ON 3 FEBRUARY

ACQ: VIETNAM, DANANG (3 FEBRUARY 1968)
SOURCE: THIS IS A SITUATION REPORT ON 3 FEBRUARY PREPARED BY CAS,

(b)(1) (b)(3)

SUMMARY: IT APPEARS THAT THE VIET CONG (VC) IN THE HUE CITADEL AREA ARE REACHING THE END OF THEIR ROPE AND MAY BE WITHDRAWING. ALLIED FORCES ARE IN GOOD SHAPE AS A DEFINITE BUILDUP OF VC FORCES AROUND TAM KY, QUANG TIN PROVINCE, HAS BEEN NOTED. THE DETENTION OF SUSPECT RESIDENTS IN DANANG CITY HAS PRESENTED A PROBLEM IN FINDING INTERROGATORS TO SCREEN THEM. VC SAPPERS HELD AT THE PROVINCIAL INTERROGATION CENTER HAVE BEEN LOOKING AT THEM TO TRY TO IDENTIFY THE VC AMONG THE DETAINEES. THE POLICE ALSO ARE PLANNING A SEARCH FOR WEAPONS AND EXPLOSIVES IN THE HOUSES OF DANANG. END SUMMARY.

67

NND 941536 --- 129

1. AS OF 1700 HOURS, THE ASSISTANT DEPUTY ADVISOR TO I CORPS HEADQUARTERS HAD RECEIVED INFORMATION THAT SUCH VC AS REMAIN IN THE CITADEL IN HUE CITY HAVE BEEN FORCED INTO THE SOUTHWEST CORNER BY ARMY OF THE REPUBLIC OF VIETNAM (ARVN) FORCES. THERE IS REASON TO BELIEVE THAT THE VIET CONG (VC) WILL BE CLEARED FROM THE AREA DURING THE NIGHT OF 3 FEBRUARY.

2. ON 3 FEBRUARY TWO POLICEMEN, LE NGOC XUAN AND NGUEYN PHU, WERE INTERVIEWED BY A CAS OFFICER AT THE SURGICAL HISPITAL IN DANANG, WHERE THEY HAD BEEN EVACUATED BY WAY OF PHU BAI AFTER BEING INJURED DURING THE VC ATTACK ON HUE. BOTH SAID THAT AT APPROXIMATELY 0330 HOURS ON 31 JANUARY THE VC BEGAN A HEAVY MORTAR ATTACK AGAINST THE CITY. ABOUT 0600 HOURS VC DRESSED IN ARVN UNIFORMS SUDDENLY APPREARED EVERYWHERE IN THE AREA OF THE HUE BROADCASTING STATION, WHERE THEY WERE ON GUARD. BOTH POLICEMEN THOUGH IT WAS A GROUND ATTACK AND COULD NOT DETERMINE IF THE VC WERE IN THE CITY AND ATTACKED FROM WITHIN. UP TO THE TIME THEY WERE FOUND BY U.S. MARINES 24 HOURS AFTER THE ATTACK, THE VC HAD NOT OCCUPIED THE HUE RADIO STATION. BOTH SAID THAT PEOPLE GENERALLY EXPECTED A VC ATTACK; BUT NOBODY EXPECTED A GROUND ATTACK ON THE CITY PROPER.

NND 941536 --- /30

3. ALLIED FORCES APPEAR TO BE IN GOOD SHAPE IN QUANG TIN PROVINCE. A DEFINITE BUILDUP IN THE SIZE OF VC FORCES HAS BEEN NOTED IN THE TAM KY AREA. THE GENERAL SITUATION FROM THE MILITARY STANDPOINT HAS BEEN QUIET THROUGHOUT THE DAY OF 3 FEBRUARY. THE POLICE REPORTED SPORADIC ATTEMPTS IN TAM KY CITY BY SEGMENTS OF THE POPULATIONTO FORM DEMONSTRATIONS. THE LEADERS HAVE BEEN APPREHENDED AND DEMONSTRATORS DISBURSED BY ARVN FORCES.

4. OF THE ARE ORIGINALL EARMARKED IN DANANG BY POLICE FOR A CHECK OF INHABITANTS, 750 OF 1,000 HOUSES HAVE BEEN CHECKED. MORE THAN 400 PERSONS HAVE BEEN DETAINED WHICH MAKES THE POLICE HARD-PRESSED TO FIND SUFFICIENT INTEROGATORS, ALWAYS A CHRONIC PROBLEM BUTPARTICULARLY ACUTE NOW. CONSEQUENTLY, PRISONERS ARE JUST BEING HELD WITH A MINIMUM OF SCREENING. SOME OF THE VC SAPPERS BEING HELD IN THE PROVINCIAL INTERROGATION CENTER HAVE BEEN LOOKING THE DETAINEES OVER TO TRY TO IDENTIFY THE VC AMONG THEM. APPARENTLY SOME PERSONS HAVE BEEN PICKED UP WITH NO FIRM REASON FOR CONSIDERING THEM VC. BOTH THE POLICE SPECIAL BRANCH AND UNIFORMED POLICE, THE 107TH POLICE FIELD FORCE (PFF) COMPANY AND A PLATOON OF THE 106TH PFF COMPANY HAVE PARTICIPATED IN THE OPERATION. CITY POLICE ARE ALSO EMBARKING ON A SECOND PHASE OF THE OPERATION.

NND 941536 --- /3/

WHICH WILL HAVE THE ASSISTANCE OF ARVN TROOPS, TO CONSIST OF A SEARCH OF EVERY HOUSE IN DANANG TO TRY TO LOCATE WEAPONS EXPLOSIVES.

5. A FEW DAYS AGO THE POLICE LEARNED FROM AN INFORMANT WHO HAS REPORTED RELIABLE INFORMATION ON DANANG CITY VC MEMBERS IN THE PAST THAT HA XY KGO, CHAIRMAN OF THE VC DANANG CITY COMMITTEE, WAS IN DANANG IN A HOUSE ON THE WESTERN EDGE OF THE CITY. BY THE TIME POLICE WENT TO THE HOUSE, NO SUSPECT WAS THERE, ALTHOUGH A YOUNG BOY SAID THAT A STRANGER HAD BEEN THERE EARLIER. THE POLICE STILL HAVE AUTHORITY TO MAKE ARRESTS BUT ALL POLICE OPERATIONS MUST BE CLEARED THROUGH THE VIETNAMESE MILITARY DURING THE PERIOD OF MARTIALLAW.

6. ACCORDING TO ~~POLICE~~ BUDDHISTS IN DANANG HAVE BEEN QUIET SINCE THE VC ATTACKS BEGAN. THERE HAVE BEEN NO EXHORTATIONS OR APPEALS FOR DEMONSTRATIONS. A REGIONAL POLICE OFFICIAL COMMENTED THAT THIS LAST SERIES OF HARSH ATTACKS BY THE VC MAY HAVE MADE SOME BUDDHISTS REALIZE THAT THE VC DO NOT HAVE THE INTERESTS OF THE PEOPLE AT HEART AS THEY MAY HAVE THOUGHT EARLIER.

REPORT CLASS [redacted]
COUNTRY: SOUTH VIETNAM
SUBJECT: SITUATION REPORT IN I CORPS AS OF 1000 HOURS ON 3 FEBRUARY

ACQ: VIETNAM, DANANG (3 FEBRUARY 1968)
SOURCE: THIS IS A SITUATION REPORT ON 3 FEBRUARY PREPARED BY CAS. [redacted]

SUMMARY. I CORPS WAS GENERALLY QUIET THE NIGHT OF 2/3 FEBRUARY. THE INFLUX OF REFUGEES IN QUANG TRI AND QUANG NAM WAS CREATING PROBLEMS OF HOUSING AND FEEDING. THE VIET CONG (VC) WERE SPREADING RUMORS IN QUANG TRI THAT THE AMERICANS WOULD "SELL THE PEOPLE OUT" AND IN DANANG ATTEMPTING TO AROUSE THE PEOPLE TO DEMONSTRATE AGAINST THE GOVERNMENT OF VIETNAM. POCKETS OF VC REMAIN IN AREAS AROUND HOI AN AND QUANG NGAI CITIES, BUT THESE ARE BEING CLEARED OUT. VC PRESSURE PROBABLY WILL CONTINUE FOR A FEW DAYS IN QUANG NAM, QUANG TIN, AND QUANG NGAI PROVINCES. MORALE IS REPORTED TO BE GOOD IN

63

NND 941536 ---/0

QUANG NGAI AND QUANG TIN. END SUMMARY.

1. ON THE NIGHT OF 2/3 FEBRUARY QUANG TRI CITY REMAINED QUIET. REFUGEES CONTINUED COMING INTO THE DISTRICTS AND QUANG TRI CITY, CAUSING PROBLEMS IN FEEDING AND HOUSING. THE VIET CONG (VC) ARE SPREADING THE PROPAGANDA AMONG THE PEOPLE THAT THE AMERICANS ARE GOING TO "SELL THEM OUT" AND ABANDON THE WAR. TO COUNTER THIS THE GOVERNMENT OF VIETNAM (GVN) AND AMERICANS IN THE PROVINCE ARE LAUNCHING AN INTENSIVE PSYWAR OPERATION.

2. SINCE THE ARMY OF THE REPULBIC OF VIETNAM (ARVN) REVOLUTIONARY DIRECT SUPPORT BATTALIONS ARE NOW ENGAGED IN MAINTAINING THE INTEGRITY OF QUANG TRI CITY, THE QUANG TRI REVOLUTIONARY DEVELOPMENT (RD) TEAMS HAVE BEEN RELOCATED TO PROVIDE THEM WITH THE BEST POSSIBLE SECURITY UNDER EXISTING CIRCUMSTANCES. THE TEAMS HAVE ENCOUNTERED FEW VC ATTACKS AND SUSTAINED FEW CASUALTIES, BUT THEIR FIELD SIRENGTHS ARE LOW DUE TO THE CONFUSION RESULTING FROM THE LUNAR NEW YEAR HOLIDAY (30 JANUARY) AND THE CURRENT VC OFFENSIVE. THE TEAMS HAVE BEEN RESUPPLIED WITH AMMUNITION WHERE REQUIRED. THE RD CADRE CONTROL HAS SHOWN DEFINITE INEPTITUDE IN

NND 941536 --- 110

REORGANIZING TEAMS. EXPLOITING THE PSYWAR OPPORTUNITIES, AND CONDUCTING REQUIRED ADMINISTRATION.

3. ACCORDING TO REGIONAL POLICE OFFICIALS, THE POLICE HAVE DETAINED MORE THAN 400 PEOPLE IN THEIR SEARCH OF THE DANANG CITY AREA TO ROUND UP PERSONS WHO DO NOT HAVE PROPER IDENTIFICATION. ACCORDING TO A RETIRED ARVN MAJOR, AN EMPLOYEE OF CAS, RUMORS ARE CIRCULATING IN DANANG THAT THE VC AGENTS ARE ATTEMPTING TO PERSUADE THE POPULATION TO MUSTER A DEMONSTRATION TO PROTEST AGAINST THE GVN. ALSO THE VC ARE SPREADING RUMORS THAT THERE WILL BE VC SAPPER ATTACKS AGAINST VIETNAMESE WORKING FOR AMERICAN INSTALLATIONS.

4. INFORMATION FROM HOI AN, QUANG NAM PROVINCE, STATES THAT THE VC ARE STILL HIDING IN THE CITY IN SOME STRENGTH. THE PROVINCE CHIEF IS ATTEMPTING TO CLEAR THESEPOCKETS OF VC. ON 2 FEBRUARY REPUBLIC OF KOREA (ROK) FORCES, IN A SWEEP TWO KILOMETERS NORTH OF HOI AN, ENCOUNTERED A VC UNIT AND KILLED 100 BY BODY COUNT. SEVERAL ALLIED OBSERVERS HAVE NOTED THAT EARLIER ARVN OUTSHONE ROK TROOPS IN REPULSING THE ATTACK ON HI AN CITY. DISTRICTS AND HOI AN, ARE RECEIVING MASSES OF REFUGEES. THIS CAUSES PROBLEMS IN FEEDING AND HOUSING, AND THEIR

NND 941536 --- 111

PRESENCE IS SLOWING DOWN POLICE SCREENING AND OTHER SECURITY FUNCTIONS IN THE CITY. ACCORDING TO CENSUS GRIEVANCE REPORTS, THE VC PLAN TO CONTINUE PRESSURE IN THE PROVINCE. ONE INDICATION OF A RETURN TO NORMAL SITUATION WAS THE APPEARANCE OF BREAD ON THE MARKET. THE PROVINCE CHIEF STILL HAS A 24-HOUR TRAVEL BAN ON ALL EXECPT SECURITY TROOPS.

5. IN QUANG NGAI PROVINCE ONLY THREE RD CADRES HAVE BEEN REPORTED KILLED IN ACTION, BUT THIS FIGURE MAY ICREASE WHEN ALL REPORTS ARE IN. MORALE OF THE LOCAL PEOPLE AND ESPECIALLY GVN FUNCTIONARIES IS HIGH. THIS IS DUE TO THE OBVIOUS HEAVY VC LOSSES AND THEIR INABILITY TO REMAIN IN THE CITY. SCATTERED VC POCKETS REMAIN IN THE VILLAGES AROUND QUANG NGAI CITY AND DISTRICTS REPORT SOME VC HARASSMENT STILL. PROVINCE SECURITY ELEMENTS ARE SWEEPING TO CLEAR THESE AREAS OF VC. A CAS OFFICER BELIEVES THAT VC PRESSURE WILL CONTINUE AT LEAST TWO MORE DAYS. THERE ARE NO FIRM REPORTS OF A MASSIVE VC ATTACK.

6. THE FEELING OF FEAR STIL HOLDS THE POPULACE OF TAM KY, QUANG TIN PROVINCE; HOWEVER, ON 3 FEBRUARY THE PEOPLE APPEARED TO BE MORE RELAXED. THE PEOPLE ARE APPRECIATIVE OF

NND 941536 --- // 2

THE PRESENCE OF ALLIED FORCES AND THE MANNER IN WHICH THEY REPULSED THE VC ATTACKS. IN FACT, THEY WOULD LIKE TO SEE ALLIED FORCES LAUNCH STILL MORE ATTACKS AGAINST THE VC. THE PEOPLE WERE ANGERED BY THE VC FOR BREAKING TH LUNAR NEW YEAR TRUCE.

7. FIELD DISSEM: STATE USMACV CORDS III MAF 7TH AF USARV COMNAVFORV USAID DIR JUSPAO (MR. ZORTHIAN ONLY) CINCPAC ARPAC PACAF.

(b)(1) (b)(3)

1. DANANG CITY REMAINS UNDER MARTIAL LAW AND STRICT CURFEW, WITH AMERICAN MILITARY ON FULL ALERT. THE VIET CONG (VC) MADE NO MAJOR EFFORT IN THE DANANG CITY AREA DURING THE NIGHT OF 2/3 FEBRUARY, ALTHOUGH AMERICAN MILITARY ADVISORS CONTINUED TO BE CONCERNED OVER REPORTS THAT A REGIMENT OF THE SECOND NORTH VIETNAMESE ARMY (NVA) WAS MOVING TOWARD DANANG (SEE FVG-245). THE VC INITIATED SMALL ARMS FIRE IN TWO AREAS ON THE EDGE OF DANANG AIR BASE AT ABOUT 0310 HOURS, FOLLOWED BY HEAVY AMERICAN ARTILLERY FIRE IN RETALIATION. ALL ACTION ENDED SOON AFTER 0400 HOURS.

64

NND 941536 ---1/9

AMB

2. THE DANANG CITY POLICE AND THE POLICE FIELD FORCE (PFF) ARE CONDUCTING SEARCHES IN THE CITY AND THE IMMEDIATE HAMLETS AND ARE DETAINING IN A LOCAL SCHOOL ALL VIETNAMESE WHO DO NOT HAVE PROPER IDENTIFICATION PAPERS. THE EXACT NUMBER DETAINED IS NOT KNOWN, BUT IT RUNS TO MORE THAN ONE HUNDRED.

3. ALL WAS QUIET IN QUANG NGAI CITY, BUT AT ABOUT 0230 HOURS SON TINH DISTRICT HEADQUARTERS AND SUBSECTOR RECEIVED VC MORTAR FIRE. THE TWO INSTALLATIONS ARE LOCATED ABOUT 1,000 TO 1,200 METERS APART. AT 0245 HOURS THE VC WERE IN THE HAMLET IN WHICH DISTRICT HEADQUARTERS IS LOCATED, AND A DIMINISHING FIRE FIGHT CONTINUED AS OF 0330.

4. IN THE LATE EVENING OF 2 FEBRUARY ALL WAS QUIET IN HOI AN, QUANG NAM PROVINCE, AND IN QUANG TRI CITY, AND IN THE ABSENCE OF COMMUNICATION FROM THESE TWO TOWNS, AS WELL AS FROM TAM KY, QUANG TIN PROVINCE, IT IS ASSUMED THE VC HAVE NOT INITIATED MAJOR ACTIVITY.

5. FIELD DISSEM: STATE USMACV III MAF CORDS.

ACQUARED: VIETNM, DANANG (3 FEBRUARY 1968) [redacted]

SOURCE : THIS IS A SITUATION REPORT ON 3 FEBRUARY PREPARED BY CAS, [redacted] (b)(1) (b)(3)

MILITARY

1. ON 3 FEBRUARY QUANG TRI PROVINCE WAS MOVING INTO THE FOURTH DAY OF THE BATTLE FOR THE QUANG TRI LOWLANDS. THE ENEMY, IT APPEARED, EMPLOYED 12 BATTALIONS IN HIS DRIVE TO TAKE OVER TRIEU PHONG, MAI LINH, AND HAI LANG DISTRICTS AND QUANG TRI CITY. OVERT MILITARY OPERATIONS BEGAN IN THE EARLY MORNING HOURS OF 31 JANUARY. HE LOST HIS INITIATIVE AFTER 24 HOURS AND WHETHER HE KNOWS IT OR NOT HE IS NOW ON THE DEFENSIVE.

2. THE ENEMY PROBABLY LOST APPROXIMATELY 1,500 KILLED IN ACTION (KIA) AND 1,000 WIA, OR ABOUT ONE-THIRD OF HIS FORCE. (MOSTLY NORTH VIETNAMESE ARMY (NVA) AND SOME VIET CONG (VC).) ALLIES HAVE TAKEN ABOUT 63 PRISONERS. IN A THREE-BATTALION ATTACK ON CAM LO DISTRICT HEADQUARTERS ON 1-2 FEBRUARY THE ENEMY LOST ANOTHER 150 KIA AND 23 PRISONERS OF WAR (POW), AND THESE FIGURES ARE NOT COMPLETE. THE ENEMY STILL HAS THE CAPABILITY TO REINFORCE AND HE STILL CAN NEUTRALIZE SOME ALLIED COMBAT BASES BY

[redacted]

NND 941536 ---7/

ROCKET AND SNEAK AIR ATTACKS (NOT YET EMPLOYED).

3. IF HE EXPECTS TO WIN THE BATTLE FOR QUANG TRI, HE MUST COMMIT THESE FORCES AND HE MUST ACHIEVE BETTER COORDINATION THAN HE HAS DEMONSTRATED SO FAR. PART OF HIS PROBLEM HAS BEEN ALLIED MASTERY OF THE SKIES DURING DAYLIGHT HOURS. THE ENEMY, AFTER SECURING TOEHOLDS ON THE NORTH AND SOUTH EDGES OF THE CITY OF QUANG TRI IN THE EARLY MORNING HOURS OF 31 JANUARY, WAS UNABLE TO REINFORCE THESE UNITS WITH HIS RESERVES UNTIL THE NEXT NIGHT. THIS MADE IT POSSIBLE FOR THE ALLIES TO BLOCK THE TWO ROUTES THE NVA/VC PLANNED TO USE. FORTUNATELY THE WEATHER WAS FAIR. IT MIGHT HAVE BEEN A DIFFERENT STORY HAD PILOTS BEEN GROUNDED.

4. ANOTHER FACTOR WHICH MAY HAVE INFLUENCED THE OUTCOME OF THIS BATTLE WAS THE ENEMY'S FOOLISHNESS IN SETTING UP HIS COMMAND POST SO CLOSE TO QUANG TRI CITY (VICINITY OF YD343515) AND ALLIED LUCK IN WIPING OUT THIS COMMAND POST. ENEMY KIA INCLUDED A COLONEL AND THREE JUNIOR OFFICERS AND PROBABLY GENERAL NAM LONG AND HIS CHIEF OF STAFF. CREDIT FOR THIS COUP BELONGS TO THE ARMY OF THE REPUBLIC OF VIETNAM (ARVN) NINTH AIRBORNE BATTALION AND ELEMENTS OF THE ARVN SEVENTH CAVALRY (APC'S). THEY CAPTURED THE ENEMY'S COMMUNICATION FACILITY INTACT (RADIO DESTROYED). ONE OF THE LAST MESSAGES IN THE RADIO MESSAGE FILE WAS A REPORT TO HIGHER HEADQUARTERS ANNOUNCING THE DEATH OF GENERAL NAM LONG ALONG WITH HIS CHIEF OF STAFF. USING THE ENEMY'S SIGNAL OPERATING INSTRUCTIONS, THE AIRBORNE BATTALION COMMANDER, A NORTH VIETNAMESE HIMSELF, PERSONALLY CALLED THE ENEMY HIGHER HEAD-

NND 941536 --- 72

QUARTERS AND ASKED IF IT WERE TRUE THAT THE GENERAL WAS DEAD. THE HIGHER HEADQUARTERS CAME RIGHT BACK WITH A CONFIRMATION. THIS STORY SOUNDS FARFETCHED AND THERE ARE STILL MANY DETAILS MISSING. MAJOR NHAN, THE SECTOR COMMANDER, EXPLAINED MOST OF THESE DETAILS. A U.S. ARMY AIRBORNE ADVISOR WITH THE NINTH AIRBORNE BATTALION LATER TOLD AN ALMOST IDENTICAL STORY. THE BODIES OF THE TWO OFFICERS HAD NOT YET BEEN FOUND, BUT THERE ARE REPORTS FROM THE VILLAGERS THAT THEY WERE DRAGGED AWAY TOWARD THACH HAU HAMLET ON THE NIGHT OF 31 JANUARY. POLICE ARE HOT ON THE TRAIL OF THESE BODIES AND THE VILLAGERS ALL SEEM TO BE POSITIVE THAT THEY SAW THIS HAPPEN.

POLITICAL

5. THERE IS MUCH SENTIMENT AMONG THE PEOPLE OF QUANG TRI CITY AGAINST THE NVA AND AGAINST ANY FORM OF COALITION WITH THE COMMUNISTS. ONE GROUP, MOSTLY CATHOLICS AND MEMBERS OF THE REVOLUTIONARY DAI VIET PARTY (RDVP), APPARENTLY WOULD PREFER AN INDEPENDENT ANTI-COMMUNIST CENTRAL VIETNAM REPUBLIC COMPOSED OF QUANG TRI, THUA THIEN AND QUANG NAM PROVINCES IF SAIGON OPTS FOR THE COALITION COURSE OF ACTION. OBVIOUSLY THESE PEOPLE ARE NOT REALISTS BUT THE SENTIMENT IS SIGNIFICANT. ON THE AFTERNOON OF 1 FEBRUARY THE PROVINCE CHIEF HELD A VICTORY PARADE IN TOWN AND THE RESPONSE OF THE PEOPLE WAS ECLECTIC. THEY THREW FLOWERS, FOOD AND CIGARETTES TO THE PASSING SOLDIERS AND THERE WERE SPONTANEOUS SMILES, TEARS AND CHEERING, WHICH IS SURPRISING FROM A PEOPLE

NND 941536 --- 23

INURED TO WAR.

6. SENATOR HOANG XUAN TUU, RDVP MEMBER, HAS BEEN IN TOWN THROUGH ALL OF THIS AND HAS BEEN CHEERFUL AND OPTIMISTIC, AT LEAST OUTWARDLY. HE HAS BEEN VERY MUCH IN EVIDENCE DURING THE DAYLIGHT HOURS, VISITING THE MINED HAMLET OF TRI BUU AND THE HTHOUSANDS OF DISPLACED PERSONS CAMPING IN THE SCHOOLS AROUND TOWN. HE HAS NOT BEEN ESCORTED WITH AN OBVIOUS BODYGUARD.

7. SO FAR THE BUDDHISTS HAVE NOT RESPONDED TO THE STORY WHICH IS CIRCULATING IN QUANG TRI THAT THE MILITANT AN QUANG BUDDHISTS IN SAIGON HAVE DEFECTED TO THE NATIONAL FRONT FOR THE LIBERATION OF SOUTH VIETNAM (NFLSV). THERE WAS A RUMOR THAT SOME RALLYING WAS IN PROGESS AT THE BUDDHIST HIGH SCHOOL BUT A CHECK REVEALED NO EVIDENCE OF THIS.

8. DURING THE LATE AFTERNOON OF 1 FEBRUARY THE COMBINED ACTION PLATOON (CAP) AND PROVINCIAL RECONNAISSANCE UNIT (PRU) REPORTED THAT THE ENEMY WAS HOLDING A VICTORY CELEBRATION IN THE EASTERN EDGE OF THUONG XA HAMLET (YD375497), MAI LINH DISTRICT, WHICH HAS BEEN UNDER CONTEST BY THE VC AND THE ALLIES FOR SOME WEEKS. ALLIED ARTILLERY PROMPTLY PLACED A 24 GUN TIME ON TARGET BARRAGE ON TOP OF THE CELEBRATION WITH UNKNOWN RESULTS.

9. THE PROVINCE CHIEF, LIEUTENANT COLONEL NGUYEN AM, WAS QUITE ASSERTIVE BY LATE AFTERNOON, 2 FEBRUARY. HE TOOK CHARGE OF THE DEFENSIVE ARRANGEMENTS AROUND THE TOWN AND "BOLDLY" GAVE UP THE POLICE FIELD FORCE PLATOON GUARDING HIS UNOCCUPIED RESIDENCE. THE PLATOON WAS NEEDED TO BOLSTER ONE COMPANY OF THE U.S. FIRST AIR CAVALRY WHICH WAS OBTAINED TO FILL THE GAP LEFT WHEN THE

NND 941536 --- 74

ARVN AIRBORNE BATTALION MOVED TO HUE. DURING THE FIRST TWO DAYS OF THE FIGHTING HOWEVER, CHIEF AM WAS A VEGETABLE. THE VIETNAMESE SECTOR STAFF IS A FAIRLY GOOD ONE, BUT IT TENDS TO FALL APART WHEN OPERATIONS DO NOT CONFORM TO CLASSIC PATTERNS. WITH THE FIVE, AND NOW SIX, AIR CAVALRY COMPANIES TO WORK WITH, CONVENTIONAL TACTICS HAVE TO BE SET ASIDE.

REVOLUTIONARY DEVELOPMENT AND REFUGEES

10. THE ENEMY NOW HOLDS ~~ABOUT~~ AT TWO-THIRDS OF THE REVOLUTIONARY DEVELOPMENT (RD) AREA MOSTLY IN TRIEU PHONG DISTRICT. THE ALLIES ARE GOING TO BE FORCED TO GO IN AND ROOT OUT THESE FORCES, WHICH MAY WRECK HAVOC ON THE HAMLETS IN THE PROCESS. IN ADDITION, THE ALLIES DO NOT HAVE THE TROOPS TO MAKE A THOROUGH CORDON AROUND THE AREA. A PSYOPS CAMPAIGN WILL BE TRIED LATER TODAY, BUT THIS IS AIMED MOSTLY AT CALMING THE NERVES OF THE PEOPLE. THEY SEEM TO BE CONFUSED BY ALL THAT HAS HAPPENED IN THE PAST 72 HOURS AND THE ENEMY IS PROPAGANDIZING TO WIN THEM.

11. WHEN THE ENEMY FINALLY CUTS OUT, IT IS HOPED HE DOES NOT TRY TO TAKE HOSTAGES WITH HIM. HE MAY KILL HAMLET AND VILLAGE CHIEFS WHOLESALE AND HE MAY EVACUATE EVERY YOUTH IN SIGHT. ANY OR ALL OF THESE COURSES OF ACTION WOULD HURT THE SOUTH VIETNAMESE CAUSE FOR A LONG TIME TO COME.

12. ALTHOUGH QUANG TRI CITY IS FULL OF REFUGEES, THERE WILL NO DOUBT BE MORE IF THE ALLIES HAVE TO FIGHT THEIR WAY THROUGH THE RD AREA. ALREADY THERE ARE ~~THERE~~ ABOUT 300 CIVILIAN CASUALTIES IN THE HOSPITAL FROM THE FIGHTING AROUND TOWN. MANY MORE CAN BE EXPECTED AS THE ALLIES PUSH THEIR WAY OUTWARD.

[redacted]

NND 941536 ---75

OUTLOOK

13. ALL IN ALL AMERICANS IN QUANG TRI CAME THROUGH BETTER THAN COULD BE EXPECTED AND AS THE SITUATION IMPROVES THE ADMINISTRATIVE AND OPERATIONAL MACHINERY IS BEING REORGANIZED TO PUSH AHEAD WITH PROVINCE PROGRAMS. THE ENEMY HAS LOST THIS ROUND. HE MAY TRY AGAIN BUT HE NEEDS A NEW PLAN AND LOTS OF RESUPPLY AND REINFORCEMENTS. ANOTHER MAJOR EFFORT PROBABLY WILL NOT OCCUR BEFORE ABOUT 7 FEBRUARY AND IF THE ALLIES MAKE THE MOST OF THE COUNTERSWEEPS, THIS EFFORT COULD BE DELAYED FOR MONTHS. IF THE ENEMY EMPLOYES AIR, HOWEVER, THE SITUATION COULD BE REVERSED. (COMMENT: THE VC PROPAGANIZED THAT IT HAD BEEN SUPPLIED WITH AIRCRAFT, WHICH WOULD BE USED ONLY IN AN EXTREME SITUATION, A FEW MONTHS AGO, ACCORDING TO INFORMANTS OF AN OFFICIAL VIETNAMESE SECURITY SERVICE.) KHE SANH IS A SEPARATE PROBLEM THE ENEMY SEEMS TO BE GATHERING HIS STRENGTH FOR A MAJOR PUSH AGAINST WELL-ENTRENCHED ALLIED FORCES THERE.

3 February 1968

INTELLIGENCE MEMORANDUM

Pueblo Sitrep No. 30
(As of 5:00 P.M. EST)

1. Pyongyang radio has broadcast an 18-minute statement by a Frederick Carl Schumacher, who is described as the "operations officer" of the USS Pueblo. No further details are available at this time.

2. South Korean President Pak Chong-hui and one of his chief aides separately raised with the US Ambassador in Seoul the possibility that the ROK go into small-arms production to help counter increased North Korean infiltration.

3. President Pak told the Ambassador that he would like to see the ROK produce "M-2 type" carbines. He said it was clear that the government could not depend only on the army and police but must also train 2.5 million veterans, perhaps along the lines of Israeli and Swiss militia. Pak said Korean private interests--acting on the government's behalf--will get the program under way by purchasing 10,000 M-2 "type" weapons and 2 million rounds of ammunition from US firms and will seek their help in establishing a factory.

4. Yi Hu-rak, Pak's secretary-general, pointed out that the ROK should produce its own modern small arms to match the "major psychological advantage" North Korea enjoys from its own small-weapons production. He said 500,000 "AR-18" weapons could be produced at a cost of $3.5 million, with each weapon costing about $48. [redacted]

[redacted]

5. The Panmunjom talks evoked varied public comments today from South Korean officials. The foreign minister said the ROK "is not opposed to the UN Command's decision to conduct talks at Panmunjom" but warned that "the talks must not be utilized by the North Korean puppets for propaganda." A presidential spokesman noted that ROK and US officials "have had close contacts in connection with the talks" and the ROK "is watching the talks with keen interest." The chairman of the National Assembly's Foreign Relations Committee, however, scored the US for conducting "secret talks" without South Korean participation, and charged that this was the first such occurrence in the Military Armistice Commission's 15-year history.

6. One more of the 31 North Korean guerrillas who tried to assassinate President Pak in Seoul on 21 January was shot dead today in a small town not far from the South Korean capital. ROK officials claim three of the guerrillas are still at large. Of the others, one was captured near the scene of the abortive attack and the rest are believed to have been killed.

7. Radio Pyongyang's domestic service and the South Korea beam today gave priority to reports relating to the Pueblo and the persecution of South Korean "revolutionaries," and placed less emphasis on the South Vietnam situation. Pyongyang highlighted the "confession" of Pueblo officer Lt. Stephen R. Harris (see Sitrep No. 29) but also covered pro-Communist "world" reaction to the case.

8. The (North) Korean Central News Agency today transmitted a photo allegedly showing the "spy" confession of Lt. Stephen Robert Harris, the Pueblo's "first officer." The word "confession" appears at the top of the first of ten fanned-out pages and Harris' signature on the last. Only the first page is readable in its entirety and follows word for word the "confession" broadcast yesterday by Radio Pyongyang.

1.5(c)(d)
3.4(b)(1)(6)

1.5(c)(d)
3.4(b)(1)(6)

[redacted]

11. Several brief firefights were reported in the US sector of the DMZ during the evening of 2-3 February. No casualties on either side were reported. One North Korean was reported killed by the ROK police a short distance south of the DMZ.

REPORT CLASS -

COUNTRY: SOUTH VIETNAM

SUBJECT: SITUATION REPORT IN I CORPS AS OF 2000 HOURS ON 4 FEBRUARY 1968

ACQUIRED: VIETNAM, DANANG (4 FEBRUARY 1968) [redacted]

SOURCE : THIS IS A SITUATION REPORT ON 4 FEBRUARY PREPARED BY CAS, [redacted]

FI [redacted]

SUMMARY: NO MAJOR ENEMY ACTION WAS INITIATED IN I CORPS ON 4 FEBRUARY AS OF 2000 HOURS. IN QUANG TRI AN UNCONFIRMED REPORT STATES THAT A NORTH VIETNAMESE ARMY REGIMENT (NEAR KHE SANH) HAS NOT JOINED IN THE ATTACK ON QUANG TRI, AND INCLUDES OFFICIALS AND NECESSARY ACCOUTREMENTS TO ESTABLISH GOVERNMENT MACHINERY. THE SITUATION CONTINUED TENSE IN HUE, AS FIGHTING CONTINUED AND THE U.S. MARINE CORPS FORCES WERE NEARING THE CORDS OFFICES, MAKING SLOW PROGRESS. THE DITADEL AIRPORT REPORTEDLY WAS IN VIETNAMESE HANDS, BUT NOT YET OPERATIVE. THE PEOPLE IN QUANG NGAI DID NOT APPEAR TO BE TAKING SIDES, ALTHOUGH THERE FEARED THE VIET CONG. END SUMMARY.

1. ACCORDING TO A REPORT [redacted]. THE 66TH REGIMENT OF THE 304TH NORTH VIETNAMESE ARMY (NVA) DIVISION HAS NOT YET JOINED THE ATTACK AGAINST QUANG TRI. ALLEGEDLY, THE REGIMENT TRAVELED WITH OFFICIALS AND THE ACCOUTREMENTS TO ESTABLISH GOVERNMENTAL MACHINERY. UNITS THAT APPROACHED FROM THE NORTH DURING THE ATTACK CARRIED CIVILIAN CLOTHES. (COMMENT:

NND 941536 ---9/

IT IS NOT KNOWN IF THIS REPORT WAS BASED ON RUMOR OR INFORMATION FROM AN ESTABLISHED AGENT. THE 2 FEBRUARY III MAF OB LISTING STATES THAT A RALLIER, A MASTER SERGEANT, FROM THE 66TH REGIMENT OF THE 304TH DIVISION SAID THAT THE 304TH LEFT THANH HOA PROVINCE, NVN, IN OCTOBER 1967 AND ARRIVED IN THE KHE SANH AREA IN JANUARY 1968.)

2. ENEMY FIRE CONTINUED IN QUANG TRI PROVINCE, BUT NO MAJOR EFFORT HAD BEEN INITIATED AS OF 2000. THE SECURITY SERVICE ESTIMATED THAT THERE WERE STILL ABOUT 50 VIET CONG (VC) SAPPERS CADRES IN QUANG TRI CITY.

3. ACCORDING TO A CHIEU HOI (OPEN ARMS) ADVISOR A VC/NVA (?) COMMANDER SHOT AND KILLED ONE OF HIS WOUNDED WHO WOULD HAVE TO BE EVACUATED BY STRETCHER, PRESUMABLY BECAUSE HE WAS TOO IMPORTANT TO LEAVE BEHIND AND THE ENEMY DID NOT WANT TO BE SLOWED DOWN. IN ANOTHER INSTANCE IT APPEARED THAT AN ENEMY COMMANDER WAS URGING RELUCTANT TROOPS FORWARD. THE ATTACKERS ATTEMPTED TO ROUND UP AND TAKE THE CHIEU HOIS (RETURNEES) IN QUANG TRI CITY WITH THEM, BUT WHEN THEY CAME UNDER FIRE THE CHIEU HOIS ESCAPTED.

4. PROVINCIAL RECONNAISSANCE UNITS (PRU) IN QUANG TRI CITY ACTED SERVED AS REACTION UNITS AND SPED FROM ONE SPOT TO ANOTHER CLEARING OUT ENEMY ACTIVITY.

5. IN A TELEPHONE CONVERSATION FROM THE USMACV COMPOUND IN THE CITADEL, HUE CITY, THUA THIEN PROVINCE, AT 1930 HOURS, A CAS OFFICIAL SAID THAT THE SITUATION REMAINED TENSE WITH

NND 941536 --- 92

SMALL ARMS FIRE CONTINUING AROUND THE USMACV COMPOUND. FIGHTING CONTINUED IN THE SOUTHERN HALF OF THE CITY. THE ROAD FROM PHU BAI TO HUE WAS STILL UNDER SNIPER FIRE. THE U.S. MARINE CORPS REACTION FORCE POSSIBLY WAS CLOSE TO THE U.S. CORDS OFFICES BUT WAS MAKING SLOW PROGRESS. CITADEL AIRPORT REPORTEDLY WAS IN ARMY OF THE REPUBLIC OF VIETNAM (ARVN) HANDS, BUT IT WAS NOT OPERATIVE.

6. DANANG CITY HAS REMAINED QUIET DURING 4 FEBRUARY. DANANG POLICE WERE DIGGING EMPLACEMENTS AND SEEKING MACHINE GUN POSITIONS IN THE CITY, WHICH THEY SAID WAS A ROUTINE ACTION TO IMPROVE SECURITY. THEY HAD RECEIVED NO REPORTS OF AN IMPENDING ATTACK.

7. HOI AN, QUANG NAM PROVINCE, ALSO WAS QUIET ON 4 FEBRUARY WITH THE PROGRESSION OF A FAIRLY NORMAL DAY. MORE AND MORE PEOPLE WERE ON THE STREETS, WELLDRESSED, AND MOVING ABOUT. SHOPS WERE MORE AND MORE OPEN. ONE ACT OF TERRORISM OCCURRED WHEN TWO VC DRESSED IN POPULAR FORCE (PF) UNIFORMS RIDING A HONDA SHOT A PF SOLDIER WALKING IN HOI AN. EXTENT OF INJURY IS NOT KNOWN. THERE WERE NO SIGNS OF PANIC OR RESENTMENT AGAINST THE AMERICANS OR THE GOVERNMENT OF VIETNAM (GVN). NOR WERE THERE SIGNS OF ATTEMPTS AT POLITICAL DEMONSTRATIONS ON THE PART OF BUDDHISTS OR THE VIETNAM NATIONALIST PARTY (VNQDD). THE MANY REFUGEES IN THE CITY WERE GATHERED AT SCHOOLS AND CHURCHES AND BEING CARED FOR BY SOCIAL AND WELFARE ORGANIZATIONS.

[redacted]

NND 941536 --- 93

THE CURFEW CONTINUED IN FORCE FOR FROM 1900 TO 0700 HOURS.

8. THE SITUATION CONTINUED QUIET IN TAM KY CITY, QUANG TIN PROVINCE, ON 4 FEBRUARY.

9. THE SITUATION ALSO REMAINED GENERALLY QUIET IN THE AREA OF QUANG NGAI CITY ON 4 FEBRUARY. ACCORDING TO INFORMATION RECEIVED BY THE ADVISOR TO THE REVOLUTIONARY DEVELOPMENT CADRE PROGRAM IN QUANG NGAI:

A. VC TACTICAL BATTALIONS THAT REMAINED AROUND QUANG NGAI CITY INCLUDED THE 48TH AND 81ST LOCAL FORCES, THE 406TH MAIN FORCE, AND AN UNIDENTIFIED LOCAL FORCE FROM DUC PHO DISTRICT.

B. VC LOSSES ON 4 FEBRUARY WERE ESTIMATED AT MORE THAN 1,000 INCLUDING LOSSES FROM ACTION IN SOUTHERN QUANG TIN.

C. THERE ARE RUMORS, OR SPECULATION, AMONG THE PEOPLE THAT THE AMERICANS WILL NOT HELP QUANG NGAI. (COMMENT: HOW THESE RUMORS CAN BE CREDITED BY THE PEOPLE CANNOT BE UNDERSTOOD SINCE AMERICANS CERTAINLY ASSISTED IN OUSTING THE VC AFTER THEIR INFILTRATION OF THE CITY.) THERE ARE INDICATIONS THAT THE PEOPLE ARE AFRAID OF THE VC, BUT THEY ARE NOT TAKING SIDES.

D. THE VC GENERALLY BYPASSED THE RD TEAMS. SOME TEAMS HAVE MOVED IN CLOSE TO DISTRICT COMPOUNDS TO SUPPORT LOCAL GVN FORCES.

E. THE PRUS HAVE BEEN SHOWING A GOOD ACCOUNT, KEEPING

NND 941536 ---94

CASUALTIES LOW (TWO WOUNDED IN ACTION) AND DISRUPTING THE ENEMY. ALL DISTRICT ARE HAPPY WITH THE PRU EFFORT.

F. HOW THE VC GOT IN AND OUT OF QUANG NGAI CITY IS STILL UNKNOWN.

10. FIELD DISSEM: STATE USMACV CORDS III MAF 7TH AF USARV COMNAVFORV USAID DIR/JUSPAO (MR. ZORTHIAN ONLY) CINCPAC ARPAC PACAF (ALSO SENT SAIGON)

REPORT CLASS [redacted]

COUNTRY: SOUTH VIETNAM, DANANG

DOI : 4 FEBRUARY 1968

SUBJECT: SITUATION IN I CORPS AS OF 1200 HOURS 4 FEBRUARY 1968

ACQUIRED: VIETNAM, DANANG (4 FEBRUARY 1968) [redacted]

SOURCE : THIS IS A SITUATION REPORT ON 4 FEBRUARY PREPARED BY CAS. [redacted]

1. DURING THE NIGHT OF 3-4 FEBRUARY THERE WERE NO FEW DEVELOPMENTS AND NO SIGNIFICANT VC ACTIVITY IN QUANG TRI, QUANG NGAI, AND QUANG TIN PROVINCES. IN QUANG NAM PROVINCE THE REPUBLIC OF KOREA (ROK) TROOPS LAID AN AMBUSH IN THE VICINITY OF HIEU NHON DISTRICT HEADQUARTERS; CONTACT WAS MADE WITH THE VC WITH UNKNOWN RESULTS. THE ARMY OF THE REPUBLIC OF VIETNAM (ARVN) ENGINEER COMPOUND IN HOI AN CITY RECEIVED THREE ROUNDS OF 60MM MORTAR. IN DIEN BANH DISTRICT, QUANG NAM PROVINCE, THE VC KNOCKED OUT A POWER PLANT.

2. ON 3 FEBRUARY, THE DANANG CITY POLICE ARRESTED A 14 YEAR OLD BOY WHO WAS TRYING TO CONCEAL A PACKAGE AS THE POLICE APPROACHED. THE PACKAGE CONTAINED TWO K-54 PISTOLS AND 30 KILOS OF EXPLOSIVES. HE IS NOW UNDERGOING INTERROGATION. THERE WERE TWO SIGHTINGS OF FROGMEN REPORTED IN THE THANH BINH BEACH AREA OF DANANG BUT THESE REPORTS HAVE NOT YET BEEN CONFIRMED. OTHERWISE, THERE WERE NO INCIDENTS OF SIGNIFICANCE IN DANANG.

[redacted]

62

NND 941536 --- 76

3. A RETIRED ARVN MAJOR, NOW AN EMPLOYEE OF CAS, DISCUSSED THE PRESENT FIGHTING WITH NUMEROUS PERSONS IN DANANG. THE GENERAL CONSESUS AMONG THE POPULACE IN DANANG CONCERNING THE PRESENT FIGHTING IN SOUTH VIETNAM SEEMS TO BE THAT THE U.S. AND THE GOVERNMENT OF VIETNAM (GVN) DID NOT HAVE ANY ADVANCE INFORMATION OF VC MOVEMENT INTO THE CITIES. THE VC WON A POLITICAL VICTORY BY DEMONSTRATING TO THE WORLD THAT THEY HAVE SUFFICIENT FORCES WITH WHICH IN ONE NIGHT TO ENTER VIRTUALLY EVERY IMPORTANT CITY IN SOUTH VIETNAM. IT IS RECOGNIZED, HOWEVER, THAT MILITARILY THE U.S. AND ARMY OF THE REPUBLIC OF VIETNAM (ARVN) TROOPS WERE VICTORIOUS AS EVIDENCED BY THE MANY VC KILLED AND WOUNDED AND THE MANY WEAPONS CAPTURED.

REPORT CLASS [redacted]

COUNTRY: SOUTH VIETNAM

SUBJECT: SITUATION REPORT IN I CORPS AS OF 1200 HOURS ON 5 FEBRUARY

ACQUIRED: VIETNAM, DANANG (5 FEBRUARY 1966) [redacted]

SOURCE : THIS IS A SITUATION REPORT ON 5 FEBRUARY PREPARED BY CAS [redacted]

1. IN QUANG TRI PROVINCE RATHER HEAVY FIGHTING ERUPTED AT 0900 AND CONTINUED UNTIL AFTER 100 IN TRIEU PHONG DISTRICT MARKET PLACE. NO FURTHER DETAILS WERE AVAILABLE. FOUR VIET CONG/NORTH VIETNAMESE ARMY (VC/NVA) BATTALIONS AND POSSIBLY EIGHT, ARE REPORTED MOVING TOWARD QUANG TRI FROM THE SOUTHWEST. NO CONTACT HAS BEEN MADE WITH THEM AS YET. IF THESE UNITS ACTUALLY ARE LOCATED WHERE REPORTED THEY PROBABLY WILL NOT ATTACK DURING THE DAY BUT POSSIBLY MAY DO SO TONIGHT. THE WEATHER IS OVERCASE, SO LITTLE AIR COVER WILL BE PROVIDED. PEOPLE ARE EDGY AND NERVOUS BUT GOING ABOUT THEIR BUSINESS.

2. IN QUANG TIN PROVINCE REPORTS FROM A VIETNAMESE OFFICIAL POLICE AGENCY STATE THAT THE VC PLANS MASS ATTACKS ON TAM KY AND SEVERAL DISTRICTS BEFORE 10 FEBRUARY. PEOPLE ARE GOING ABOUT THEIR BUSINESS AS USUAL WITH FEW SIGNS OF PANIC. BOTH ARMY OF THE REPUBLIC OF VIETNAM (ARVN) AND VIETNAMESE POLICE UNITS CONTINUE TO SWEEP TAM KY CITY AND SURROUNDING AREAS. THE PEOPLE WILL

[redacted]

60

NND 941536 --- 87

NOT DEMONSTRATE FOR FEAR OF BEING PICKED UP BY THE POLICE. ACCORDING TO REPORTS RECEIVED, THE PRIME TARGET OF THE NEXT VC ATTACK WILL BE TAM KY CITY AND THE SECONDARY TARGET WILL BE THE TWO NEARBY REFUGEE CAMPS.

3. REPORTS FROM QUANG NGAI PROVINCE INDICATE THE VC WILL MAKE ATTACKS ON THE CITY AND IN THE DISTRICTS SOME TIME BEFORE 10 FEBRUARY. THE CITY POPULATION CONTINUES TO GO ABOUT ITS BUSINESS IN A NORMAL FASHION, BUTTHERE ARE SIGNS OF UNCERTAINTY.

4. IN HOI AN CITY, QUANG NAM PROVINCE, A MEETING WAS HELD BY LOCAL INHABITANTS ON THE MORNING OF 4 FEBRUARY WITH NO FURTHER DETAILS CURRENTLY AVAILABLE. A NORMAL ATMOSPHERE PREVAILS WITHIN THE CITY AND THERE ARE NO REPORTS OF ANY FORTHCOMING VC ATTACKS.

5. FIELD DISSEM: STATE USMACV CORDS III MAF 7TH AF USARV COMNAVFORV USAID DIR/JUSPAO (MR. ZORTHIAN ONLY) CINCPAC ARPAC PACAF (ALSO SENT SAIGON)

INTELLIGENCE MEMORANDUM

Spot Report on the Situation in the Khe Sanh Area

1. Late reports indicate the North Vietnamese gained control of the Lang Vei Special Forces Camp on the afternoon of the 7th.

2. The Camp's defenders commenced evacuation from the area under cover of intensive friendly aerial and artillery bombardment. Six of the 24 Americans and over three-fourths of the 450 man Vietnamese garrison have not yet been accounted for. Earlier in the day, an estimated Communist company had controlled the camp above ground while friendly personnel were entrenched in underground bunkers.

3. Two relief columns were reportedly converging on the scene late in the afternoon for a combined raid on the camp. Neither had entered the camp-site at last report. One of the relief forces was composed of Special Forces personnel helo-lifted from Khe Sanh; the other was a local Laotian volunteer battalion.

4. The unit identity of the attacking Communist force is not yet clear. The attack was possibly conducted by elements from the 66th Regiment of the NVA 304th Division. A senior non-commissioned officer who defected one week ago, stated that when he left this unit, it was near Lang Vei awaiting orders to attack the camp. [redacted]

1.3(a)(4)

5. It is also possible that elements of the 101D Regiment of the NVA 325C Division were involved. [redacted]

[redacted]

COPY

Approved for Release
Date 9 SEP 1996

[redacted]

[redacted]

6. According to a report from the scene, the Khe Sanh garrison was faced with potentially serious complications on the night of 7 February when approximately 6,000 Laotian refugees moved from Lang Vei to within one-quarter mile of Khe Sanh.

7. The Khe Sanh base commander has been advised to deter the refugees from moving closer. Officials in Saigon will ask the Laotian charge to fly to Khe Sanh tomorrow to encourage the refugees to clear the area.

8. Aside from the obvious political delicacy of the situation, the mass of refugees poses tactical problems for the base defenders. Should the enemy attack, the refugees could shield his approach or cause confusion among friendly troops.

9. It is possible that very large numbers of refugees are in the area. Some of the dependents of the Laotian defenders at Ban Houei Sane were in the vicinity of Lang Vei, along with dependents of the Lang Vei camp itself.

10. There have been no other significant developments reported by field elements on the military situation in South Vietnam, or with regard to DRV aircraft.

SUBJECT VICE PRESIDENT KY'S INTENTION TO RELINQUISH HIS SPECIAL POWERS BECAUSE OF DISCOURAGEMENT WITH GOVERNMENT'S PERFORMANCE IN CURRENT CRISIS

1.5(c)
3.3(b)(1)

ACQ VIETNAM, SAIGON (15 FEBRUARY 1968) [redacted]

SOURCE [redacted]

1.5(c)
3.3(b)(1)

SUMMARY: VICE PRESIDENT KY [redacted] ON 14 FEBRUARY [redacted] WAS BITTER AND DISCOURAGED AT THE GOVERNMENT OF VIETNAM'S PERFORMANCE IN THE CURRENT CRISIS. HE THEREFORE HAD DECIDED TO RETURN TO PRESIDENT THIEU THE SPECIAL POWERS GIVEN HIM AS HEAD OF THE TASK FORCE. KY RESENTS CHARGES BY THIEU SUPPORTERS THAT HE IS ATTEMPTING TO USE HIS TASK FORCE POWERS FOR PERSONAL ADVANTAGE. HE IS ALSO FRUSTRATED BY PRIME MINISTER LOC'S POOR SHOWING AND BY THE TENDENCY OF CABINET MINISTERS TO INSIST ON BUREAUCRATIC PROPERITIES. END SUMMARY.

1. [redacted] 14 FEBRUARY 1968, VICE PRESIDENT NGUYEN CAO KY [redacted] WAS "BITTER AND DISCOURAGED" AT THE GOVERNMENT OF VIETNAM'S (GVN) PERFORMANCE IN THE CURRENT CRISIS. KY [redacted] HAD DEFINITELY DECIDED THAT [redacted] NEXT FEW DAYS HE WILL RETURN TO PRESIDENT NGUYEN

1.5(c)
3.3(b)(1)

VICE PRESIDENT NGUYEN CAO KY [redacted] WAS "BITTER AND DISCOURAGED" AT THE GOVERNMENT OF VIETNAM'S (GVN) PERFORMANCE IN THE CURRENT CRISIS. KY [redacted] HAD DEFINITELY DECIDED THAT WITHIN THE NEXT FEW DAYS HE WILL RETURN TO PRESIDENT NGUYEN VAN THIEU ALL THE "SPECIAL POWERS" CONFERRED ON HIM BY THIEU. [redacted] COMMENT: KY WAS REFERRING TO HIS CHAIRMANSHIP OF THE TASK FORCE ESTABLISHED BY THIEU TO COPE WITH THE AFTERMATH OF THE VIET CONG (VC) TET OFFENSIVE.) 1.5(c) 3.4(b)(1)

2. KY SAID THE GVN HAD BEEN TOTALLY AND UNNECESSARILY PARALYZED IMMEDIATELY AFTER THE VC ATTACKS. HE FELT THAT, GIVEN THE DESTRUCTION WROUGHT BY THE ATTACKS, IT WAS STILL MOVING WITH TOO LITTLE EFFECTIVENESS AND SENSE OF URGENCY. KY SAID THAT WHILE HE HAD ATTEMPTED AS CHAIRMAN OF THE TASK FORCE AND OTHERWISE WITHIN THE POWERS CONFERRED ON HIM BY THE CONSTITUTION TO MOVE RAPIDLY TO RETURN THE SITUATION TO NORMAL, ALMOST EVERY MOVE HE HAD MADE HAD COME UNDER FIRE FROM THIEU'S SUPPORTERS WHO CLAIMED THAT HE WAS ATTEMPTING TO SET HIMSELF UP AS A SECOND GOVERNMENT. [redacted] 1.5(c) 3.4(b)(1)

[redacted] HE EVEN HIS OWN "ANTI-FRAUD YOUTH CORPS", WHICH HE HAD HOPED COULD BE USED IN THE PRESENT EMERGENCY, WAS DOING LITTLE BUT COLLECTING ITS SALARIES.

3. [redacted] IT WAS NOW OBVIOUS TO EVERYONE THAT PRIME MINISTER NGUYEN VAN LOC IS A "DISMAL FAILURE." HE ADDED WITH CONSIDERABLE BITTERNESS THAT SINCE HE, KY, HAD BEEN THE CHIEF PROPONENT OF LOC FOR THE POSITION, HE FELT THAT LOC HAD LET HIM DOWN BADLY. KY ALSO COMPLAINED THAT MOST OF THE CABINET MINISTERS, DESPITE THE PROBLEMS FACING THE COUNTRY, SEEMED MORE CONCERNED WITH BUREAUCRATIC PROPRIETY THAN WITH PROVIDING MEANINGFUL ASSISTANCE TO THOSE DISPLACED BY THE FIGHTING.

4. [redacted] COMMENT: WHILE [redacted] KY NOW APPEARS TO RECOGNIZE THE ROLE [redacted] PRIVATE ORGANIZATIONS CAN PLAY IN THE PRESENT SITUATION, [redacted] IT DISTURBING THAT KY SHOULD FEEL COMPELLED TO COMPLAIN AT SUCH LENGTH TO SOMEONE OUTSIDE THE GOVERNMENT. [redacted] 1.5(c) 3.4(b)(1)

[redacted]

5. [redacted] COMMENT: [redacted] KY TOLD SOME CLOSE ASSOCIATES ON 13 FEBRUARY THAT HE INTENDED TO RECOMMEND TO THIEU, PROBABLY ON 18 FEBRUARY , THE TASK BE ABOLISHED. [redacted] SOURCES NOTED KY'S IRRITATION WITH CRITICISM BY THIEU SUPPORTERS AND WITH THE DIFFICULTY OF GETTING CABINET MINISTERS TO DO THINGS, [redacted] 1.5(c) 3.4(b)(1)

6. FIELD DISSEM: STATE (AMBASSADOR BUNKER, POLITICAL COUNSELOR, MR. ZORTHIAN) USMACV (GENERAL WESTMORELAND, GENERAL ABRAMS, AMBASSADOR KOMER, CHIEF OF STAFF, J-2) 7TH AIR FORCE (GENERAL MOMYER ONLY) CINCPAC PACFLT ARPAC PACAF

COUNTRY SOUTH VIETNAM
DOI 16 FEBRUARY 1968
SUBJECT [redacted] EXPECTATION OF A SECOND WAVE OF VIET CONG ATTACKS ON OR ABOUT 18 FEBRUARY

ACQ SOURCE VIETNAM, SAIGON (16 FEBRUARY 1968) [redacted]

1.5(c) 3.4(b)(1)

1. [redacted] THE VIET CONG (VC) TO LAUNCH A SECOND WAVE OF SIMULTANEOUS ATTACKS IN KHE SAN, HUE, QUANG TRI, DEMILITARIZED ZONE AND SAIGON AROUND 18 FEBRUARY. [redacted] BASED [redacted] ON INFORMATION OBTAINED FROM THE INTERROGATION OF PRISONERS, SOME OF WHOM WERE RECENTLY CAPTURED EN ROUTE FROM LONG AN PROVINCE TO SAIGON. [redacted] ALTHOUGH IT WAS DIFFICULT TO PIN DOWN THE EXACT DATE THE VC SECOND-PHASE ATTACKS WOULD OCCUR, THE VC DEFINITELY HAVE THE CAPABILITY TO LAUNCH FURTHER ATTACKS. [redacted] THE VC HAD NOT COMMITTED MAIN FORCE UNITS INSIDE SAIGON DURING THE TET OFFENSIVE. [redacted] IN THE SECOND ATTACK ON SAIGON THE VC MIGHT WELL USE FIFTH MAIN FORCE BATTALION. [redacted] THE AMERICANS SHOULD REMAIN ALERT, [redacted] THE VC ARE CAPABLE OF CONTINUING THE ATTACK ON SAIGON USING MAIN FORCE UNITS.

1.5(c) 3.4(b)(1)

2. [redacted] THE POLICE WOULD REQUIRE THREE MONTHS TO RESTORE THE SECURITY SITUATION IN SAIGON TO ITS PRE-TET LEVEL. [redacted] THREE ARVN BATTALIONS, IN ADDITION TO [redacted] POLICE UNITS, SHOULD BE STATIONED PERMANENTLY INSIDE SAIGON CITY TO SHARE RESPONSIBILITY WITH THE POLICE FOR THE CITY'S SECURITY. [redacted] HOPED THE UNITS OF THE U.S. 199TH LIGHT INFANTRY BRIGADE WOULD REMAIN IN SAIGON TO ASSIST [redacted] IN CLEANING OUT THE REMNANTS OF THE VC BUT [redacted] LEARNED EARLIER THAT DAY THAT THE U.S. UNITS WOULD BE PULLED OUT OF SAIGON ON 17 FEBRUARY. [redacted] THESE U.S. UNITS SHOULD REMAIN IN SAIGON AT LEAST UNTIL THE END OF FEBRUARY.

1. THE VIET CONG (VC) KIEN HOA PROVINCE COMMITTEE HAS RECEIVED DIRECTIVES FROM THE CENTRAL OFFICE FOR SOUTH VIETNAM TO SUPPLY MAXIMUM REINFORCEMENTS TO THE CAPITAL LIBERATION FORCE FOR THE SECOND PHASE OF THE GENERAL OFFENSIVE AGAINST SAIGON WHICH WILL RUN FROM 18 FEBRUARY UNTIL THE END OF THE MONTH. THE OBJECT OF PHASE TWO IS TO SUPPORT THE VC REMAINING IN CAPITAL SLUMS AND TO PERMIT THEM TO ESCAPE. THE VC IN KIEN HOA SAY THAT THIS TIME THEY WILL LEVEL SAIGON TO THE GROUND. THEY ARE TELLING KIEN HOA RESIDENTS WITH RELATIVES IN SAIGON TO ADVISE THEIR RELATIVES TO EVACUATE TO THE SUBURBS OR TO NEARBY PROVINCE CAPITALS TO ESCAPE DEATHT AND DESTRUCTION.

COUNTRY SOUTH VIETNAM
DOI 17 FEBRUARY 1968
SUBJECT SITUATION REPORT AS OF 1300 HOURS LOCAL TIME 17 FEBRUARY 1968

ACQ VIETNAM SAIGON (17 FEBRUARY 1968) [redacted] 1.5(c) 3.4(b)(1)

SOURCE [redacted] THIS IS A VIETNAM SITUATION REPORT PREPARED AT 1300 HOURS LOCAL TIME ON 17 FEBRUARY 1968.

1. NUMEROUS UNCONFIRMED REPORTS OF VARYING RELIABILITY SUGGEST THAT A RENEWED ATTACK ON SAIGON IS IMMINENT. SOME REPORTS POINT TO THE 18TH FEBRUARY AS THE DATE, OTHER REPORTS HAD INDICATED THE 11TH, 12TH, 13TH AND 15TH. FIRM INDICATIONS FROM ALL SOURCES, HOWEVER, DO NOT AT THIS TIME SUGGEST THE IMMINENCE OF AN ATTACK UPON SAIGON. (SOURCE: COMPETENT AMERICAN OBSERVERS)

2. A REFLECTION OF THE FOREGOING IS THE STATEMENT [redacted] THAT THE PRESENT CURFEW PREVAILING IN PRECINCTS ONE THROUGH FIVE MAY BE MODIFIED SOMETIME NEXT WEEK TO ALLOW MOVEMENT BY THE POPULACE UNTIL 2100 HOURS. (SOURCE: AMERICAN OBSERVER [redacted] 1.5(c) 3.4(b)(1)

3. WITHIN THE FRAMEWORK OF THE WINTER-SPRING CAMPAIGN FURTHER SIGNIFICANT VIET CONG /NORTH VIETNAMESE ARMY ACTIVITY CAN BE EXPECTED. MOREOVER, STRATEGIC AND TACTICAL CONSIDERATIONS WEIGH HEAVILY IN FAVOR OF A QUICK FOLLOW-UP TO THE TET OFFENSIVE. IN THIS REGARD, HOWEVER, THE ENEMY MUST REALIZE THAT THE LONGER HE WAITS, THE MORE DIFFICULT MILITARY TASK HE WILL HAVE. THE FIRST ATTACK, THE TET OFFENSIVE, WAS LAUNCHED UNDER THE COVER OF THE TET HOLIDAY, A KNOWN PERIOD OF SECURITY RELAXATION AND COUNTRYWIDE CONCERN ONLY WITH CELEBRATION. WHILE THE GENERAL OUTLINES OF THE TET OFFENSIVE WERE DESCRIBED TO ENEMY CADRES IN SOME CASES LONG BEFORE THE ATTACK WAS LAUNCHED, THE SPECIFIC DETAILS OF TIME AND PLACE WERE NOT PASSED OUT UNTIL THE FINAL MOMENT. WITHIN THE GENERAL PLAN, IT NOW APPEARS FROM PRISONER INTERROGATIONS THAT A SECOND ATTACK WAS ENVISIONED. WHETHER THE PLAN NOW REMAINS IN EFFECT, FOLLOWING THE MILITARY FAILURE OF THE FIRST STAGE, IS NOT KNOWN. (SOURCE: AMERICAN OBSERVER)

1. BY LATE ON THE EVENING OF 20 FEBRUARY 1968 AUTO-DEFENSE DE CHOC (ADC) COMMANDERS INVOLVED IN THE DEFENSE OF PHOU (MOUNTAIN) PHA THI (UH 6860), SITE 85, CONSIDERED THAT THE ENEMY HAD ADVANCED TO WITHIN HEAVY MORTAR RANGE OF PHOU PHA THI FROM THE SOUTH. THE SAME COMMANDERS BELIEVED THAT THE ENEMY COULD EASILY MOVE ARTILLERY TO PHOU DEN DIN (UH 7661) UNDER THE COVER OF THE FOG WHICH HAD PERSISTED DURING THE DAY AND WAS FORECAST FOR THE NEXT

(b)(1)c
(b)(3)
34 (b)(1)

C-O-N-F-I-D-E-N-T-I-A-L
(classification) (dissem control)

24 HOURS.

2. THE ENEMY OVERRAN MUONG YUT (UH 784563) ON THE MORNING OF 26 FEBRUARY, AND ITS DEFENDERS FELL BACK TO UH 692[illegible]1 AND THEN RETREATED CLOSER TO THE BASE OF PHOU PHA THI. BY 1600 HOURS 26 FEBRUARY 21 WOUNDED ADC TROOPS WERE AT THE BASE OF PHOU PHA THI. COMMENT: THE ENEMY TOOK MUONG YUT ON 14 FEBRUARY, BUT ADC FORCES WERE ABLE TO REOCCUPY IT ON THE SAME DAY.)

3. AT 1930 HOURS ON 26 FEBRUARY ADC FORCES RECOVERED A MAP OUTLINING AN ATTACK PLAN FOR PHOU PHA THI FROM THE BODY OF AN ENEMY SOLDIER KILLED IN AN AMBUSH ON 18 FEBRUARY. ACCORDING TO THE PLAN TWO REGIMENTS WERE TO BE USED. ONE BATTALION EACH WAS TO ATTACK HOUEI HOK (UH 6561), HOUEI MA (UH 6253), HOUEI MOUN (UH 5664), AND HOUEI KHA MOUN (UH 6868). ONE COMPANY WAS TO ATTACK EACH OF THE MAJOR TRAILS LEADING TO THE TOP OF PHOU PHA THI.

4. THE DEFENDERS OF PHOU PHA THI WERE PREPARING TO COORDINATE EXTENSIVE AIR STRIKES ON TARGETS CLOSE TO PHOU PHA THI. THE FOLLOWING ENEMY TARGETS

(b)(1) C

(b)(3)
3.4(b)(1)

C-O-N-F-I-D-E-N-T-I-A-L
(downgrading) (down control)

WERE TO BE HIT AS SOON AS POSSIBLE: ENEMY COMPANY AND 82MM MORTAR (UH 783563), ENEMY STORAGE AREA (UH 735596), BIVOUAC AREA (UH 743591), BIVOUAC AREA (UH 793592), NORTH VIETNAMESE ARMY PLATOON (UH 727598), AND A MORTAR TEAM (UH 732591). NO CIVILIANS WERE IN THE TARGET AREA BECAUSE THEY HAD STARTED TO MOVE OUT IN EARLY FEBRUARY WHEN ENEMY PRESSURES ON THE AREA INCREASED.

5. COMMENT: THE AUTHENTICITY OF THE CAPTURED MAP HAS YET TO BE ESTABLISHED, BUT T'E OPERATIONAL PLAN AS OUTLINED IN THIS MAP IS TACTICALLY SOUND. IF THE ENEMY IMPLEMENTS THIS PLAN QUICKLY AND IN A COORDINATED MANNER UNDER THE PROTECTION OF TWO OR THREE DAYS OF SUSTAINED FOG, HE WILL SEVERELY CHALLENGE THE ABILITY OF IRREGULAR FORCES TO HOLD SITE 85.

[ ]

IN THIS PREPARATORY EFFORT THE ENEMY HAS FOCUSED HIS ATTENTION ON PENETRATING FROM THE EAST THE 12-KILOMETER DEFENSIVE PERIMETER AROUND SITE 85 WHICH HAS BEEN ESTABLISHED AND MAINTAINED BY IRREGULAR FORCES UNDER THE COMMAND OF GENERAL VANG PAO, COMMANDER OF THE SECOND MILITARY REGION. IN PENETRATING THE DEFENSIVE PERIMETER AROUND PHOU PHA THI THE ENEMY HAS CONCENTRATED ON ESTABLISHING POSITIONS WHICH COULD SERVE AS A FIRE BASE FROM WHICH HE COULD BRING THE SUMMIT OF PHOU PHA THI WITHIN RANGE OF HIS ARTILLERY AND MORTARS. DURING THE PAST 30 DAYS THE MOST SIGNIFICANT DEVELOPMENTS AFFECTING THE SECURITY OF PHOU PHA THI ARE AS FOLLOWS:

A. THE ENEMY EXTENDED ROUTE 602 WESTWARD IN THE DIRECTION OF PHOU DEN DIN (UH 7668) TO ENABLE HIM TO MOVE SUPPLIES AND TROOPS FROM SAM NEUA TO THE OUTER PERIMETER OF THE IRREGULARS' DEFENSIVE PERIMETER AROUND PHOU PHA THI. ENEMY SOLDEIRS AND COOLIES SUCCEEDED IN EXTENDING ROUTE 602 BY ABOUT TEN KILOMETERS IN LESS THAN ONE MONTH. BY 21 FEBRUARY 400 COOLIES WERE WORKING ON THE ROAD AS FAR WEST AS OR 801591. ON 21 FEBRUARY AIRCRAFT STRUCK AND CUT THE

[ ]

3.4(b)(1) (b)(3)

NEW ROAD EXTENSION. THIS CUT WILL ONLY INHIBIT TRUCK TRAFFIC FOR A FEW DAYS IF THAT LONG. [CONTAINED INITIAL REPORTING ON THE ROAD CONSTRUCTION OF THIS ROUTE 602 EXTENSION AND [ ] FURNISHED ADDITIONAL INFORMATION ON ROAD-BUILDING IN THE AREA AROUND PHOU PHA THI. [/CONTAINED INFORMATION ON THE STATUS OF THE EXTENSION OF THE ROAD AS OF 21 FEBRUARY.

B. ON 20 FEBRUARY THE ENEMY OVERRAN MUONG YUT (UH 704563), ABOUT SEVEN KILOMETERS SOUTHEAST OF THE CREST OF PHOU PHA THI, AND THEN SPREAD APPROXIMATELY ONE BATTALION ALONG THE RIDGE LINE NORTHEAST BACK TO PHOU HOUAY HOO (UH 735585). ALTHOUGH THE DEFENDING AUTO-DEFENSE DE CHOC (ADC) TROOPS LOCATED IN THE MUONG YUT AREA REPEATEDLY ATTEMPTED TO STOP THIS ENEMY PUSH, THE ENEMY DROVE THEM BACK EACH TIME AND INFLICTED RELATIVELY HIGH CASUALTIES. SEE [ ] [ ] FOR DETAILS ON THE ENEMY BREAKTHROUGH OF THE 12-KILOMETER PERIMETER AROUND PHOU PHA THI. OTHER REPORTS ON ENEMY MOVES TO CONSOLIDATE HIS POSITION AROUND PHOU PHA THI WERE [;].

(b)(3)
3.4(b)(1)

[ ] AND [ ] ADC TROOPS ARE CONTINUING TO EXERT EFFORTS TO RETURN TO THE AREA, AND BY 24 FEBRUARY A SPECIAL GUERRILLA COMPANY HAD REACHED MUONG YUI AND WAS READY TO ATTEMPT TO REOCCUPY IT.

C. ON 21 FEBRUARY FOUR NORTH VIETNAMESE ARMY BATTALIONS ARRIVED AT PHOU DEN DIN, AND SOME UNITS FROM THIS FORCE TOOK UP POSITIONS AT UH 7764, ABOUT FOUR KILOMETERS NORTH OF PHOU DEN DIN. [ ] CONTAINED A REPORT ON THIS MOVE. SUBSEQUENT INFORMATION INDICATES THAT THESE NORTH VIETNAMESE BATTALIONS MAY HAVE ORIGINATED AT MUONG LIET (UH 1163). [ ] REFERRED TO ANOTHER NORTH VIETNAMESE ARMY BATTALION TO THE EAST IN POSITION BETWEEN UH 985647 AND UH 915642.

D. ON 17 FEBRUARY ADC TROOPS TOOK A MAP OUTLINING THE ENEMY'S PLAN FOR HIS ATTACK ON PHOU PHA THI FROM THE BODY OF A NORTH VIETNAMESE SOLDIER KILLED IN AN AMBUSH, ABOUT EIGHT KILOMETERS EAST OF PHOU PHA THI. ACCORDING TO [ ], WHICH WAS BASED ON AN INITIAL EVALUATION OF THESE CAPTURED DOCUMENTS (WHICH WERE WRITTEN

(b)(3)

IN VIETNAMESE), THE ENEMY PLANNED TO USE AT LEAST FOUR BATTALIONS IN HIS ATTACK ON SITE 85, WITH ONE BATTALION EACH ATTACKING HOUEI HOK (UH 6561), HOUEI MA (UH 6253), HOUEI MOUN (UH 5664) AND HOUEI KHA MOUN (UH 6868). ONE COMPANY WAS TO ATTACK EACH OF FOUR MAJOR TRAILS LEADING TO THE TOP OF PHOU PHA THI. IN ADDITION THE ENEMY CALLED A SERIES OF PROPAGANDA MEETINGS FOR OFFICIALS AT VILLAGE AND C NTON LEVEL TO ANNOUNCE HIS INTENTION OF ATTACKING PHOU PHA THI IN THE NEAR FUTURE. NEO LAO HAK SAT OFFICIALS IN HOUA PHAN PROVINCE TOLD THOSE ATTENDING THE MEE...3S THAT THEIR FORCES ASSISTED BY NORTH VIETNAMESE WOULD ATTACK IN FEBRUARY AND MARCH AND USE 12MM MORTARS AND FROM TEN TO TWENTY AIRCRAFT

[illegible] RESPECTIVELY) CONTAINED REFERENCES TO ENEMY PLANS FOR THE ATTACK ON PHOU PHA THI.

2. SINCE THE ADC DEFENDERS OF PHOU PHA THI WERE THROWN BACK WITH SUCH HEAVY CASUALTIES WHEN THEY TRIED TO ELIMINATE ENEMY UNITS THAT HAD PENETRATED THE PERIMETER FROM PHOU HOUEI HAO (UH 7355B5) TO MUONG YUT, ADC COMMANDERS RESORTED

IN 37698

[1]

(b)(3)

TO SENDING OUT SMALL PATROLS TO SELECT TARGETS FOR AIR STRIKES AND ARTILLERY FIRE. THIS EFFORT HAS IDENTIFIED HARD TARGETS WHICH HAVE BEEN STRUCK EFFECTIVELY BY AIR AND ARTILLERY FIRE. THIS HARASSMENT BY FIRE IS RETARDING ENEMY ACTIVITYES BUT IT IS NOT ELIMINATING THE ENEMY PRESENCE IN THE 12-KILOMTER DEFENSIVE PERIMETER AROUND PHOU PHA THI.

3. SPECIAL RECONNAISSANCE TEAMS MADE UP OF IRREGULARS FROM GENERAL VANG PAO'S FORCES HAVE ALSO BEEN ACTIVE IN THE AREA EAST OF SAM NEUA IN AN ATTEMPT TO IDENTIFY THE ENEMY'S LOGISTICAL BASE WHICH SUPPORTS THE EXPANSIONIST EFFORT IN AND AROUND PHOU PHA THI. THIS RECONNAISSANCE EFFORT HAS BEEN PRODUCTIVE AND TARGETS IDENTIFIED BY THESE TEAMS HAVE BEEN EXAMINED ON PHOTOGRAPHY, WITH THE RESULT BEING THAT 61 TARGETS EAST OF SAM NEUA CITY HAVE BEEN IDENTIFIED FOR DESTRUCTION BY AIR STRIKES.

[redacted]

4. IN THE PERIOD 23 TO 25 FEBRUARY GENERAL VANG PAO HAS

(b)(3) 50 USC 3024(i)

TAKEN THE FOLLOWING ACTIONS TO ENHANCE THE SECURITY OF PHOU PHA THI:

A. TWO 4.2-INCH MORTARS HAVE BEEN SENT TO PHOU PHA THI.

B. ONE ADDITIONAL 105MM HOWITZER HAS BEEN SENT TO PHOU PHA THI.

C. THE GARRISON AT THE TOP OF PHOU PHA THI HAS BEEN INCREASED BY 50 MEN.

5. AS A RESULT OF THE ENEMY'S PENETRATING THE 12-KILOMETER RADIUS AROUND PHOU PHA THI IN FORCE AND OCCUPYING KEY POSITIONS WITHIN THE LOWER RIGHT-HAND (SIC) QUADRANT OF THIS PERIMETER AS WELL AS POSITIONS JUST OUTSIDE THE PERIMETER AT PHOU DEN DIN. HE REPRESENTS AN IMMINENT THREAT TO THE SECURITY OF THE TACAN SITE AND OTHER INSTALLATIONS AT PHOU PHA THI. IT IS CLEAR THAT THE ENEMY WILL CONTINUE TO ATTEMPT TO CONSOLIDATE HIS GAINS IN THE PHOU PHA THI AREA DURING THE NEXT TWO WEEKS WHILE MAKING ARRANGEMENTS FOR HIS FINAL ASSAULT BY THREE OR FOUR BATTALIONS. IF, HOWEVER, ADC UNITS CONTINUE TO HARASS SUCCESSFULLY THE ENEMY ON THE GROUND AND IF AIRCRAFT CONTINUE TO STRIKE ENEMY CONCENTRATIONS IN AND AROUND PHOU PHA THI AND IN THE AREA EAST

CENTRAL INTELLIGENCE AGENCY

OFFICE OF NATIONAL ESTIMATES

26 February 1968

MEMORANDUM FOR THE DIRECTOR

SUBJECT: The Outlook in Vietnam

1. This Memorandum does not seek to explore all aspects of the situation in Vietnam, or its probable development over a long term. It is addressed only to the specific question put to us, i.e., whether developments in Vietnam are apt to involve a continuation of combat into the indefinite future at a level comparable or higher than current levels, or whether it is more probable that either the VC or the GVN will be unable to sustain such a level beyond a few months.

2. The current phase of combat will have a critical bearing on the further course of the war and may even prove to be decisive. We cannot be sure how long this phase will last, but it seems likely that by early summer the immediate results and the longer term implications will be fairly clear to Hanoi, Saigon, and Washington. At present, the key questions concern:

APPROVED FOR RELEASE
4 SEPT 1999

[redacted]

GROUP 1
Excluded from automatic downgrading and declassification

[redacted]

(3)

941296-115

(1) the capabilities of the Communist forces to sustain their current challenge, and whether they can continue the fighting thereafter, and (2) the capabilities of the South Vietnamese political and military establishment to cope with the tasks imposed by the present Communist offensive.

Communist Plans and Prospects

3. Hanoi's aims in the present offensive phase are: to register significant military successes against US and especially ARVN forces, and to inflict such heavy losses, physical destruction and disorganization on the GVN as to produce a total situation favorable to a negotiated settlement on Communist terms. The Communists are not likely to have a rigid timetable, but they probably hope to achieve decisive results during the course of the summer. The high importance which Hanoi now attaches to forcing the issue is evident from the risks and costs of the enterprise.

4. The toll on Communist forces has been considerable, even if reported casualties are greatly inflated by inclusion of low level recruits and impressed civilians. To some extent these losses have been offset by measures already taken. Heavy

941296-116

infiltration of both new units and replacements from the North is continuing. A strenuous, last minute recruitment effort was made prior to the Tet attacks. A significant part of the guerrilla and Main forces could still be committed. And, at present, the Communists enjoy fuller access to the rural areas, where they are recruiting heavily. They will probably be able to recoup their recent losses, though at some sacrifice in quality.

5. In any case, the Communists probably will maintain their offensive for the next several months and be prepared to accept the high losses this entails. They cannot accept such losses indefinitely, however, and they probably will not be capable soon again of launching repeated mass attacks of the magnitude and widespread scale of 30-31 January. But they are almost certainly capable of sustaining a high level of combat, including major battles with US forces, assaults on selected cities, and rocket and mortar attacks on urban areas and military installations.

6. It is possible that the Communists regard the present campaign as so critical to the outcome of the war that they will commit their full resources to a maximum effort in the near term. On balance, however, we think it likely that even if their present

94296 · 117

push falls short they will wish to be able to sustain a protracted struggle. Hence they will probably not exercise their capabilities in such a profligate manner as to deny themselves the possibility of continuing the struggle should the present phase fail to produce a decisive result.

GVN/ARVN Prospects

7. The will and capability of the GVN and its armed forces remain the keys to the eventual outcome.

8. In the main, the ARVN has acquitted itself fairly well since 30 January, though the record is uneven. Morale has held up on the whole, and we know of no unit defections. However, the ARVN is showing signs of fatigue and in many areas it has now lapsed into a static defensive posture. Security in the countryside has been sharply reduced. A long and costly effort would have to be undertaken to regain the pre-Tet position. It is highly unlikely that the ARVN will be inspired enough or strong enough to make such an effort -- certainly not in the near future.

9. The GVN also performed adequately in the immediate emergency, particularly in the Saigon area. There now appears

to be a greater recognition of the need to push forward with additional measures, but the Communist challenge has not yet proved a catalyst in stimulating an urgent sense of national unity and purpose.

10. The overall position of the government has been weakened. Its prestige has suffered from the shock of the Tet offensive; its control over the countryside has been greatly reduced. Popular attitudes are confused and contradictory; the Viet Cong received virtually no popular support, but neither was there a rallying to the government side. Passivity is likely to continue as the dominant attitude in most of the population, but further military defeats could cause a sudden swing away from the government. While the central authority in Saigon is unlikely to collapse, its ability to provide energetic leadership throughout the country and all levels is in serious doubt. It is possible that over the next few months certain provinces, especially in I and IV Corps, will be lost to Saigon's effective authority.

11. The psychological factor is now critical for South Vietnam's whole political-military apparatus. The widespread rumors that the US conspired with the Communists are symptomatic

94i296-119

of popular anxieties over the future course of the war and US attitudes toward a political settlement. As yet, however, there are no signs of a crisis of confidence within the government.

12. If major military reverses occur, the political and military apparatus could degenerate into general ineffectualness. If, on the other hand, US and ARVN regain the initiative and inflict some conspicuous setbacks on the Communists and the general offensive appears to be contained, then the GVN might manifest new energy and confidence and draw new support to itself. On balance, we judge that the chances are no better than even that the GVN/ARVN will emerge from the present phase without being still further weakened.

Alternative Outcomes of Present Phase

13. We believe that the Communists will sustain a high level of military activity for at least the next two or three months. It is difficult to forecast the situation which will then obtain, given the number of unknowable factors which will figure. Our best estimate is as follows:

941296 - 120

a. The least likely outcome of the present phase is that the Communist side will expend its resources to such an extent as to be incapable thereafter of preventing steady advances by the US/GVN.

b. Also unlikely, though considerably less so, is that the GVN/ARVN will be so critically weakened that it can play no further significant part in the military and political prosecution of the struggle.

c. More likely than either of the above is that the present push will be generally contained, but with severe losses to both the GVN and Communist forces, and that a period will set in during which neither will be capable of registering decisive gains.

MEMORANDUM

SUBJECT: Hanoi's Appraisal of its Strategic Position Prior to the Current Offensive

1. CIA has reviewed key Communist documents captured in Vietnam in order to bring into sharper focus Hanoi's own appraisal of its strategic position prior to the Tet offensive. One North Vietnamese document used for indoctrination of middle-level cadre seems to us to spell out Hanoi's arguments in particularly clear and explicit terms. This document, entitled "Clearly Understand the New Situation and Mission," was captured in late November but was not available in Washington until the end of January.

2. The North Vietnamese assessment has the ring of authority. Issued on 1 September for indoctrination purposes, it was drawn from an analysis prepared by a high-level party committee in Hanoi. The document reviews the development of the war from the summer of 1965, when US forces were introduced on a large scale, through each campaign season to the summer of 1967. Each stage of the struggle is represented in terms of Communist gains and allied reverses. Hanoi sees every step in the strengthening of US forces as a vindication of Communist strategy, and points to its success in keeping pace with the buildup.

3. Hanoi argues in this analysis that it has brought the conflict to a new stage, not because its "protracted war" strategy has failed but because it has succeeded. The introduction of the document describes in plain terms the opportunities now open to the Communists: "the immediate situation becomes increasingly more favorable for us and detrimental to the enemy." This will enable the revolutionary movement in the South to "secure

(2)

APPROVED FOR RELEASE
4 SEPT 1999

great victories in a rather short period of time." These victories will entail the destruction of a "large part of the US combat forces" and the "main body of the Puppet Army."

4. Hanoi's confident assessment of the strength of its position clearly is central to its strategic thinking. Just as it provided the rationale for the Communists' "winter-spring campaign," it probably will also govern the North Vietnamese response to the present tactical situation. If Hanoi believes it is operating from a position of strength, as this analysis suggests, it can be expected to press its military offensive--even at the cost of serious setbacks. Given their view of the strategic balance, it seems doubtful that the Communists would be inclined to settle for limited military gains intended merely to improve their bargaining position in negotiations.

5. A few excerpts from the North Vietnamese document show how the Communists arrive at their conclusion that the time has come for "a great step forward" on the way to "complete victory."

> "In the winter-spring of 1965 and 1966, after pouring more than 200,000 US and Allied troops into SVN to join more than a half million puppet troops, the US imperialists launched their plans of strategic counteroffensive in the dry season, hoping to destroy a large part of our main body, disperse our troops, destroy the revolutionary organizations in our military installations, suppress the struggle of our people, wipe out the party forces and guerrilla forces, occupy our land, and reduce our area. Concurrently, they reinforced their air force and escalated the war in the North, hoping to prevent us from reinforcing the South.... They could not destroy any element of our forces and they were badly worn down...."

> "In the rainy season of 1966, the enemy did not have enough strength to launch great attacks against us....they were actively preparing to reopen greater strategic counteroffensive phases with larger forces in the coming dry season."

"In the dry season of 1966-1967, with an increased US force of more than 400,000 troops or more than one million including the Allied forces and the puppet troops, using modern weapons, aircraft, artillery, and mechanized means which had been increased four or five fold, the US imperialists launched a much fiercer counteroffensive phase than they had launched previously. They applied the tactics of "pincers" to seek and destroy our main force and concurrently launch raids to pacify and herd the people, hoping that they would be able to regain the initiative on the battlefield and avoid great defeats. They deployed all their forces and launched dozens of operations at a time, ranging from regimental level to army corps level on all battlefields. The most important of these operations was OPERATION JUNCTION CITY, in which they committed 45,000 of their troops against the northern part of Tay Ninh. They had concurrently pushed forward their pacification plan and stepped up their psywar and Open Arms activities... In the North, they increased the rate of destruction to a high degree and on a broader range...."

"They failed to achieve their goal of destroying us and they suffered an unprecedentedly high number of casualties and material losses. They boasted that with their great strength and their numerous weapons, aircraft, tanks and bombs, they would surely wipe out all our main units and installations. But our main installations remain intact, our armed forces continue to develop, and our rear bases and installations continued to fill the requirements for fighting the enemy. More importantly, we have also opened many special fronts and battlefields, especially the Tri Thien //DMZ// battlefields, in which we have destroyed many of the enemy. We have attracted the enemy toward such battlefields and caused confusion to them

941296-112

as well as prevented them from implementing their plans of bringing US troops to the Mekong Delta..."

"Their pacification plan, a program highly boasted by the US imperialists and puppet regime and carried out at the expense of 90 percent of the puppet forces with the assistance of the US imperialists, has also proven to be a failure. They themselves recognize their pacification failure. They are suffering political failure and they are striving to consolidate and stabilize the puppet army and regime, but these deteriorate steadily. Puppet troops have been degenerated from organic mobile soldiers to pacification and defensive troops. They have proved to be inefficient, have demonstrated pronounced defeatism and are continuing to disintegrate..."

"In the North, they have stepped up their destructive activities through intense deployment of their air force and navy. They have launched fierce operations, hoping to be able to scare our people and prevent us from reinforcing our brothers in the South. However, we remain unshakable in our determination. On the contrary, we have fought bravely and destroyed more than 2,000 of their aircraft, and right now we are standing side by side with the people in the South and are doing our best to support their revolution and to liberate the South...."

"In spite of the cunning plots of the US imperialists and their cruel henchmen, and in spite of their mammoth strength, their great firepower, and all their superior war means, the strategic objectives which had been selected by them could not be achieved. The defeats they are suffering become more burdensome and occur more frequently...."

"On our side...even though we have met a certain number of great difficulties...

we have caused the first phase of the greatest limited war ever waged by the US imperialists to fail...."

"At present, the situation has developed in such a way that it is very favorable for us and a critical deadlock for the enemy. After the failure of two major strategic counteroffensive campaigns, the leaders in the United States have become pessimistic over their war escalation policy in South Vietnam. The increase of combat troops in SVN met with many difficulties...."

"This is a perfect opportunity for us to emphasize attacking the enemy in all fields and taking advantage of the victories to push the SVN Revolution a great step forward....In this historical period, if our entire party, army, and population will fully understand the situation and rush forward to fight without fear of hardship and sacrifice, then we will certainly be able to bring about a turning point in our confrontation with the enemy and also cause the US limited war policy to be a failure which can no longer be carried out. From that situation, we can proceed toward realizing our immediate objective and secure a complete victory."

MEMORANDUM

SUBJECT: International Connections of US Peace Groups -- III

1. We have continued to keep a close watch on the international connections of individuals and groups active in the US peace movement. During the two months since our last review of this activity,* there have been no major developments on the peace front nor has any new information come to light that would lead us to alter the conclusions reached in our original study.**

2. Contacts and communications on the international peace network appear to have dropped off sharply from the peak levels reached around the time of the world-wide protest demonstrations in October and the second session of the "International War Crimes Tribunal" in December. The only noteworthy events so far this year involving

Lyndon Baines Johnson Library

American activists on the international level were the release of three more prisoners of war and the large demonstrations against the Vietnam war held in West Berlin. [redacted] The following paragraphs discuss aspects of these recent developments.

3. Continuing coordination between US peace activists and the North Vietnamese, a development reviewed at length in our original study, was evident [redacted] The leading US activist, David Dellinger, was the principal contact for Hanoi in arranging the return of the three American prisoners earlier this month. Dellinger claimed publicly that the North Vietnamese had asked him to nominate two peace leaders to receive the prisoners in Hanoi and accompany them on their return to the US. [redacted]

COPY
Lyndon Baines Johnson Library

[redacted] escorted the prisoners as far as Vientiane, where the officers elected to transfer to US military aircraft.) The "Defense Committee" organized by Dellinger and Tom Hayden in November (see our report of 21 December 1967) to "encourage the release" of POWs and "defend" their rights presumably was instrumental in the negotiations with Hanoi, but no evidence of this has come to hand.

4. [redacted]

5. Hanoi also kept in touch with peace activists involved in other enterprises. For example, its women's front sent messages to women's peace organizations in Western Europe and the US (Women Strike for Peace) urging all-out support for former Representative Jeanette Rankin's peace march in Washington.

COPY
Lyndon Baines Johnson Library

6. [redacted]

7. The much ballyhooed "Vietnam Congress" held in West Berlin in mid-February was largely an all-German show. Despite speculation that a number of leading lights among US peace workers--including Dellinger and Stokely Carmichael--would attend, no major US leader turned up. American participation was limited to SNCC activist Dale Allen Smith and four little-noted members of Students for a Democratic Society.

8. Ralph Schoenman's activities seem to have taken a significant new turn. [redacted]

COPY
Lyndon Baines Johnson Library

[redacted]

The special target of Schoenman's efforts since his arrival here reportedly has been the Black Power movement, and the Student Non-Violent Coordinating Committee (SNCC) in particular. His objective apparently is to involve militant negro elements actively in the anti-Vietnam war agitation and to forge organizational links between the two movements. He hopes to achieve this by convincing the racist organizations that their struggle for "liberation" and the struggle against the war have the same adversary and are fundamentally the same struggle.

9. This is not an entirely new tack for Schoenman. His marked Trotskyite tendencies have predisposed him as much toward revolutionary struggle as toward peace. He has been an exponent of the "war of liberation" and a particular admirer of Che Guevara and the doctrines of Castro. Stokely Carmichael's vision of a "Third World" liberating itself from white oppression is one which

COPY
Lyndon Baines Johnson Library

is not only congenial to Schoenman's way of thinking but one which can be readily adapted to the Vietnam cause.

10. Schoenman claims to have carried his appeal to all the major Black Power strongholds in the US and to have been accepted by at least some militant groups. Much of this can be put down to Schoenman's tendency to exaggerate and to inflate his own importance. It would be surprising if more than a few Black Power advocates found either Schoenman himself or his ideas very appealing. Aside from a few internationally oriented leaders, the militant Negro movement has shown little interest in peace issues. Their concern over Vietnam generally is limited to such areas as the draft and racial discrimination in the services. Many Negro activists would, of course, be quite willing to use Schoenman, his funds, and his extensive contacts to serve their own ends.

11. Schoenman's missionary work among the Negro militants reportedly has produced several results. [redacted]

COPY
Lyndon Baines Johnson Library

[redacted]

12. In addition, Schoenman and John Wilson of SNCC have been involved in the establishment of a "commission" whose purpose will be to draw the various black communities into the war resistance movement. The composition and tactics of the commission, which will be staffed largely by SNCC personnel, are to be worked out at a "conference" to be held at some time in the future, possibly the national conference on "Blacks Against the Draft and In Resistance to the War" which Schoenman and SNCC leaders reportedly have been planning for April.

INTELLIGENCE MEMORANDUM

Communist Aid to North Vietnam

Introduction

1. Communist aid deliveries to North Vietnam have increased significantly each year since the US bombing program began. As shown in Table 1 average annual deliveries of both economic and military aid were at reasonably low levels prior to the bombing. In 1965, however, total aid deliveries jumped to $420 million and have increased rapidly each year since. We estimate that total aid deliveries in 1967 reached one billion dollars and that they will be even greater in 1968.

2. From 1954 to date North Vietnam has received over $3.2 billion in military and economic assistance from Communist countries. Over this long period, the assistance has been divided about evenly between military and economic goods. Since 1965, however, military aid has accounted for an increasing share of total assistance and in 1966 and 1967 it accounted for almost two-thirds of total deliveries.

3. The USSR and Communist China account for the bulk of the assistance provided to North Vietnam. The Soviet Union has

provided over $1.5 billion in military and economic assistance, or 60 percent of the total. Communist China has supplied just over $1 billion in economic and military assistance. The European Satellites have provided about $255 million in aid, almost exclusively in economic assistance programs. They are, however, assuming a greater role in providing military goods for delivery in 1968 under the terms of aid agreements negotiated in the summer and fall of 1967.

4. During the 11 years 1954-64 deliveries of combat materiel to North Vietnam amounted to only $140 million. Since the bombing began, the USSR and Communist China have greatly expanded their military aid to North Vietnam

The USSR has supplied almost 80 percent of the total value of military equipment delivered since 1965 and Communist China the bulk of the remainder. East European countries have supplied only negligible quantities of combat materiel.

5. Soviet military deliveries have concentrated on air defense equipment including surface-to-air missiles, antiaircraft guns, radar, and fighter aircraft including MIG-21's. Chinese military aid has concentrated on building up North Vietnamese ground forces and sustaining the military effort in South Vietnam. In addition, China apparently has supplied radar and in 1967 provided large numbers of MIG-17's -- most of them delivered to replace the heavy losses in the latter part of the year.

Table 1

Communist Aid to North Vietnam*

Military**

	1954-64	1965	1966	1967	Million US $ Total
Soviet Union	70	210	360	505	1,145
Communist China	70	60	95	150	375
East Europe	Negl.	Negl.	Negl.	Negl.	Negl.
Total	140	270	455	660	1,525

Economic

Soviet Union	365	85	150	200	800
Communist China	457	50	75	80	662
East Europe	129	15	50	60	254
Total	950	150	275	340	1,715
Total Economic and Military Aid	1,090	420	730	1,000	3,240

* Data show the value at Soviet Foreign trade prices of weapons, other military equipment and ammunition. They exclude aid for the construction of military installations and defense-related facilities.

** Totals may not add due to rounding.

6. The USSR and Communist China both have military personnel assisting the North Vietnamese, primarily in support and training roles. North Korea has a small contingent of pilots flying defense combat patrols for the North Vietnamese Air Force. China has a large military contingent estimated at up to 50,000 troops working on the construction, repair and defense of lines of communication and providing some military training. As estimated 2,000 Soviet military technicians presently are in North Vietnam advising and giving training on the SAM systems, aircraft, communications and logistics support. The value of this technical assistance has not been estimated but it could conceivably run to the tens of millions of dollars over the 3 year period since the bombing began.

7. Almost certainly all combat material delivered to North Vietnam has been grant aid. In the series of public announcements on military aid agreements signed with seven Communist countries in the fall of 1967, five specifically mentioned that military aid would be "non-refundable," "gratuitous" or "free". Besides its ideological claim to free military aid from its Communist allies, North Vietnam simply does not have the means for repaying present or past levels of aid.

Economic Aid

8. In addition to combat materiel Communist countries have provided an increasing amount of economic assistance much of it including war-related commodities, petroleum, trucks and construction

materials. The bulk of these goods are provided as grant aid although some are included under long term credit arrangements. Over $1.7 billion in economic aid has been provided to North Vietnam during 1954-1967. About 45 percent of this aid has been supplied during the past three years. Although economic aid has increased each year, from $150 million in 1965 to $340 million in 1967, it is much smaller than military aid.

9. The economic aid programs are also dominated by the USSR and Communist China. The USSR has supplied $800 million or 47 percent of the economic assistance provided during the past 11 years. Communist China accounted for over $660 million or 38 percent of the total. The European Satellites provided less than $255 million, or about 15 percent of the total. During the past two years, however the Soviet Union has also undertaken to provide an increasing share of the economic aid program and in 1967 it accounted for about 60 percent of the deliveries of economic goods.

10. The supply of almost every category of economic goods has increased during the past three years. Imports of about 256,000 tons of petroleum primarily from the USSR, were almost 10 percent greater in 1967 than in 1966 and 45 percent greater than in 1965. About 40 percent of the petroleum is consumed directly by the military and another large part is consumed in military support activities. Annual imports of about 4,700 vehicles in both 1966 and 1967 were a third higher than the number imported

in 1965. Imports of about 490,000 tons of miscellaneous and general cargo, that include construction machinery and materials, spare parts and other goods possibly satisfying military needs also were increased by a third in 1967 over 1966. Seaborne imports of bulk foodstuffs totalled over 450,000 tons in 1967, about 6 times the level of the previous year and almost 3 times the immediate pre-bombing level.

SUBJECT: ENEMY ATTACK ON PHOU PHA THI, SITE 85, DURING EARLY MORNING OF 11 MARCH AND ARRIVAL OF ENEMY TROOPS AT TACAN SITE

ACQ: LAOS, VIENTIANE (11 MARCH 1968) FIELD REPORT: [redacted]

SOURCE: [redacted]

1. BY 0735 HOURS ON 11 MARCH 1968 ENEMY SOLDIERS HAD REACHED THE TACAN SITE AT PHOU PHA THI (UH 66637), AND ABOUT 100 ENEMY SOLDIERS WITH TWO MACHINE GUNS WERE FIRING DOWN ON THE HELICOPTER PAD. THE DEFENDERS STILL CONTROLLED THE TRAIL SYSTEMS TO THE SUMMIT (UH 6646151); IT APPEARS, THEREFORE, THAT THE ENEMY SOLDIERS SCALED THE SHEER ROCK CLIFFS ON THE NORTHWESTERN SIDE OF PHOU PHA THI. THE OUTPOSTS AROUND PHOU PHA THI WERE STILL

IN THE HANDS OF THE DEFENDERS. ONE HELICOPTER HAD SUCCESSFULLY EVACUATED SOME SOLDIERS WHO HAD BEEN WOUNDED AT THE 105MM HOWITZER POSITION AT XD 668683. THE PERSONNEL IN THE COMMAND BUNKER WERE OUT OF CONTACT WITH TACAN PERSONNEL.

2. AT 0135 HOURS ON 11 MARCH INCOMING ENEMY MORTARS WERE LANDING ON THE TOP OF PHOU PHA THI, AND SMALL ARMS FIRE WAS HITTING THE COMMAND BUNKER. THE DEFENDERS ON THE CREST OF THE MOUNTAIN TOTALLED 243 MEN. THE COMMAND BUNKER WAS OUT OF CONTACT WITH THE TACAN SITE, WHICH APPEARED TO BE BURNING.

3. AT 0440 HOURS ON 11 MARCH THE DEFENDERS WERE STILL BEING SUBJECTED TO HEAVY INCOMING FIRE AND THE SITUATION WAS SERIOUS. AT 0445 HOURS HEAVY MORTAR FIRE WAS COMING FROM THE SOUTH. SMALL ARMS FIRE WAS STILL HITTING THE VICINITY OF THE COMMAND BUNKER.

4. AT 0505 HOURS POST NUMBER ONE WAS RECEIVING HEAVY WEAPONS FIRE. INTERMITTENT HEAVY ROCKET FIRE WAS HITTING THE CREST OF PHOU PHA THI FROM THE SOUTH; THIS ROCKET FIRE WAS EXTREMELY EFFECTIVE. THE DEFENDERS WERE HOLDING, BUT THE COMMAND BUNKER WAS STILL OUT OF CONTACT WITH THE TACAN

1.3(a)(4)

1. In March 1966, two U.S. Soldiers were captured by NVA Company 1, Division 325, in the YAMO area (location unknown) of DARLAC Province, near CAMBODIA during a VC ambush. The previous night Company 1 was informed that the following morning U.S. helicopters would land troops in the area. At 0900 hours the following morning, U.S. helicopters came into sight and saw a few VC in the area but did not observe the VC regiment which had dug trenches for an ambush. During the battle, 12 helicopters were shot down, and two prisoners were taken by Company 1.

2. The two U.S. POW's wore green fatigues, black boots with green nylon sewn into the ankle portion of the boots. One of the POW's was of medium build, blond hair and had a big nose. The other prisoner was wounded in the leg and carried on a stretcher. He was of large build, over 1.70 meters tall, brown hair and had an oval face.

1.5(c)
3.4(b)(1)

COUNTRY SOUTH VIETNAM
DOI 13 FEBRUARY 1968
SUBJECT VICE PRESIDENT KY'S INTENTION TO RECOMMEND TO PRESIDENT THIEU THAT TASK FORCE BE ABOLISHED

ACQ SOURCE VIETNAM, SAIGON (14 FEBRUARY 1968) [redacted]

1.E(c)
3.4(b)(1)

SUMMARY: VICE PRESIDENT KY HAS DECIDED TO RECOMMEND TO PRESIDENT THIEU NO LATER THAN 18 FEBRUARY THAT THE TASK FORCE BE ABOLISHED. KY WILL ARGUE THAT THE TASK FORCE HAS ACCOMPLISHED ITS OBJECTIVE OF ESTABLISHING BASIC POLICES AND PROCEDURES FOR RELIEF AND THAT THE MINISTRIES SHOULD NOW BE ALLOWED TO TAKE OVER. HE IS ACTUALLY MOTIVATED BY FEAR OF ACCUSATIONS THAT HE IS USING THE TASK FORCE TO GRAB POWER. KY WILL TELL THIEU THAT IF THE TASK FORCE IS TO BE RETAINED, ITS NAME AND CHARTER SHOULD BE CHANGED. KY'S AIDES ARE DISTURBED BY KY'S DECISION, FEELING THAT WITHOUT KY'S HAND, RELIEF WORKS WILL FALTER. BEFORE KY TALKS WITH THIEU, HE WILL PROBABLY TRY TO INITIATE SOMETHING SPECTACULAR WITH REGARD TO ARMING THE PEOPLE. END SUMMARY.

1. [redacted] ON 13 FEBRUARY [redacted] VICE PRESIDENT NGUYEN CAO KY ANNOUNCED HIS INTENTION OF RECOMMENDING TO PRESIDENT NGUYEN VAN THIEU NO LATER THAN 18 FEBRUARY THAT THE TASK FORCE BE DISSOLVED. KY'S RATIONALE, AS HE PLANS TO PRESENT IT TO THIEU, IS THE FOLLOWING:

1.5(c)
3.4(b)(1)

A. SINCE THE TASK FORCE WAS DESIGNED FOR EMERGENCY RELIEF PUPOSES, IT SHOULD BE KEPT IN EXISTENCE ONLY UNTIL THE BASIC POLICIES AND PROCEDURES FOR RELIEF HAVE BEEN SETTLED. THIS HAS NOW BEEN ACCOMPLISHED.

B. THE GOVERNMENT HAS A DULY CONSTITUTED STRUCTURE OF MINISTIRES WITH ASSIGNED PROPER RESPONSIBILITIES. THE GOVERNMENT SHOULD NOW BE PERMITTED TO RUN IN A MORE NORMAL FASHION.

2. ALTHOUGH KY SEEMS TO BELIEVE THE ABOVE RATIONALE TO SOME EXTENT, HE IS MOTIVATED MORE BY A FEAR OF BEING ACCUSED OF GRABBING POWER IN THIS CRISIS FOR REASONS OF PERSONAL AMBITION. CRITICISMS FROM HIS CRITICS IN AND OUT OF GOVERNMENT HAVE REACHED HIM TO THE EFFECT THAT THE VICE PRESIDENT HAS ESTABLISHED A SUPERMINISTRY AROUND HIS OWN PERSON AND IN THE FORM OF THE TASK FORCE. KY INSISTS THAT HE IS NOT INTERESTED IN ASSUMING POWER IN THIS INDIRECT WAY AND THAT, REALIZING THE NEED FOR HIS SERVICES IN THE EMERGENCY, HE WAS PLEASED TO HAVE OFFERED THEM AND NOW WISHES TO STEP DOWN.

Approved for Release
Date 19 NOV 1997

[redacted] HE WAS PLEASED TO [redacted]
TO STEP DOWN.

3. KY WILL PROBABLY ATTEMPT TO DISCUSS HIS TENURE WITH THE PRESIDENT PRIVATELY AND WILL MAKE CLEAR THAT HE WILL DEFER TO THE PRESIDENT'S WISHES. HE WILL REMIND THE PRESIDENT THAT WHILE HIS OWN IDEA OF THE TASK FORCE REVOLVED AROUND A CONCEPT OF "NATIONAL RECOVERY," THE PRESIDENT'S STAFF HAD ALTERED BOTH THE CONCEPT AND THE TITLE OF THE SPECIAL COMMITTEE TO "EMERGENCY RELIEF." IN THIS IS, IN FACT, THE PRESIDENT'S VIEW OF THE COMMITTEE'S FUNCTION, THEN ITS MISSION HAS BEEN ACCOMPLISHED. IF THIEU WISHES KY TO CONTINUE TO PROVIDE LEADERSHIP AND ENERGY TO THE COMMITTEE, IT WILL BE NECESSARY TO CHANGE ITS FRAME OF REFERENCE IN THE DIRECTION OF THE ON-GOING AND LENGTHIER PROCESS OF RECOVERY IN THE LARGER SENSE OF THE WORD. [redacted] KY SEEMS TO BE ATTRACTED TO THE IDEA OF CONTINUING IN A POWERFUL EXECUTIVE ROLE BUT IS HOLDING HIMSELF VERY MUCH IN CHECK AGAINST ANY TEMPTATION TO "GRAB" THAT ROLE. HE FEELS STRONGLY THAT IT MUST BE GIVEN HIM BY THE PRESIDENT WITHIN THE FRAMEWORK OF THE CONSTITUTION.) 1.5(c) 3.4(b)(1)

4. SOME OF KY'S AIDES HAVE EXPRESSED SYMPATHY AND UNDERSTANDING WITH KY'S REASONING AND, THEREFORE, HIS INTENTION. AT THE SAME TIME, THEY PREDICT THAT THE EMERGENCY RELIEF WORK, HARDLY COMPLETED, WILL SUFFER IF KY WITHDRAWS AND THE COMMITTEE IS DISSOLVED. SUCH A DISSOLUTION WOULD, OF COURSE, ALSO REMOVE THANG FROM DIRECT INVOLVEMENT IN THE RELIEF ACTIVITIES, UNLESS HE WERE ASSIGNED SOME NEW ROLE BY CHIEF OF THE JOINT GENERAL STAFF GENERAL CAO VAN VIEN. THE BUSINESS OF RELIEF WOULD BE UNDOUBTEDLY DISCUSSED IN A DAILY MEETING OF THE CABINET UNDER THE CHAIRMANSHIP OF PRIME MINISTER LOC. THESE MEETINGS WOULD, LIKE MOST CABINET MEETINGS, INDULGE IN ENDLESS TALK AND FEW DECISIONS WITHOUT THE FIRM HANDS OF KY AND THANG BEING APPLIED. THUS, THE GOVERNMENT WOULD SOON BE FLOODED WITH UNSOLVED PROBLEMS AND UNFINISHED BUSINESS AND COULD PROBABL Y TAKE TWO WEEK'S TIME. THE EARLY RUMBLINGS IN THE ASSEMBLY AGAINST PRIME MINISTER LOC'S APPARENT HELPLESSNESS IN THE IMMEDIATE AFTERMATH OF THE VIET CONG ATTACK WOULD RESUME AND BECOME AGGRAVATED.

5. ONE IMMEDIATE CONSEQUENCE OF KY'S INTENTION TO WITHDRAW FROM THE TASK FORCE ON 18 FEBRUARY IS AN APPARENT FEELING OF URGENCY ON HIS PART TO INITIATE SOMETHING SPECTACULAR AND CONCRETE WITH REGARDS TO "ARMING THE PEOPLE." PARTLY UNDER THE INFLUENCE OF GENERAL THANG, KY MAY BE MOVED TO BESTOW ARMS ON THE ALREADY WELL-ORGANIZED CATHOLIC PARISHES IN SOME OF THE MORE DIFFICULT AREAS OF SAIGON AND ON THE PERIPHERY OF THE CITY. IN THIS CONNECTION, HE RECEIVED 14 PRIESTS ON 13 FEBRUARY. [redacted] IT IS NOT KNOW JUST WHAT SPECIFIC COMMITMENTS, IF ANY, WERE MADE TO THE CATHOLIC REPRESENTATIVES.) WHILE KY HAS INDICATED HIS APPRECIATION OF SOME OF THE PROBLEMS INVOLVED IN HASTY ACTION IN THIS FIELD, HE NEVERTHELESS IN INTENT ON EXPLOITING THE UPSURGE OF ANTI-VIET CONG FEELING AND BELIEVES THE CATHOLICS TO BE MOST READILY ABLE TO ABSORB AND USE ARMS AGAINST THE VC. [redacted] KY'S DESIRE TO BE PERSONALLY INVOLVED IN INITIATING SUCH A PROGRAM AMONG THE CATHOLICS DOES HAVE POLITICAL OVERTONES.) 1.5(c) 3.4(b)(1)

6. (FIELD COMMENT: ANOTHER VERSION OF THE 13 FEBRUARY MEETING AND ANALYSIS OF KY'S PLANS WAS PUBLISHED AS [redacted] 1.5(c) 3.4(b)(1)

SUMMARY: LIEUTENANT GENERAL KHANG, III CORPS COMMANDER, SAID THAT ON 14 MARCH 1968 PRESIDENT NGUYEN VAN THIEU EXPRESSED CONCERN ABOUT RUMORS OF A MILITARY COUP. KHANG REASSURED THIEU THAT IN SPITE OF THE RUMORS, HE IS NOT INVOLVED IN PLANNING A COUP. THIEU BELIEVES THAT THE NATIONAL SALVATION FRONT (NSF) WAS ORGANIZED BY THE AMERICANS TO GENERATE SUPPORT FOR A COALITION GOVERNMENT WHICH WILL INCLUDE THE NATIONAL FRONT FOR THE LIBERATION OF SOUTH VIETNAM. THIEU IS CONCERNED WITH THE SITUATION IN IV CORPS. KHANG EXPRESSED CONFIDENCE IN THE NEWLY APPOINTED IV CORPS COMMANDER, MAJOR GENERAL NGUYEN DUC THANG, BUT SAID THAT HE IS NOT CERTAIN THAT THANG HAS SUFFICIENT TROOPS. THIEU ASKED IF THERE WERE ANY EVIDENCE THAT THE US HAD ASSISTED THE VC DURING THE TET ATTACKS. [redacted] WHEN KHANG ASSURED HIM THERE WAS NOT, THIEU POINTED OUT [redacted] THAT THE U.S. MISSION IS NOT MONOLOTHIC IN ITS VIEWS. KHANG DIES NOT EXPECT AN ATTACK ON SAIGON IN THE NEAR FUTURE. HE TOLD THIEU HE QUESTIONS THE WISDOM OF MAKING THE CONTEMPLATED CHANGES IN THE ADMINISTRATIVE STRUCTURE IN THE PROVINCES AT THIS TIME. END SUMMARY.

1.5(c)
3.4(b)(1)

S-E-[redacted]R-E-T [redacted]

(classification) (dissem controls)

1.5(c)
3.4(b)(1)

1. DURING A LENGTHY PRIVATE CONVERSATION ON 14 MARCH 1968, PRESIDENT NGUYEN VAN THIEU EXPRESSED CONCERN TO LIEUTENANT GENERAL LE NGUYEN KHANG, III CORPS COMMANDER, THAT SOME MEMBERS OF THE MILITARY MIGHT TRY TO OVERTHROW THIEU'S GOVERNMENT. KHANG TOLD THIEU HE KNOWS THERE ARE MANY RUMORS THAT HE AND BRIGADIER GENERAL NGUYEN NGOC LOAN, DIRECTOR GENERAL OF THE NATIONAL POLICE, ARE PLANNING A COUP, BUT THE RUMORS ARE NOT TRUE. KHANG DOES NOT KNOW HOW THESE RUMORS GOT STARTED BUT HE SUSPECTS SOME VC COMPLICITY. IN AN EFFORT TO PREVENT SUCH RUMORS, KHANG SAID HE HAS BEEN AVOIDING POLITICIANS BECAUSE MANY OF THEM ARE PRONE TO TWIST SOME REMARK HE MIGHT MAKE ABOUT HIS DISSATISFACTION WITH THE GOVERNMENT INTO ALLEGATIONS OF COUP PLOTTING. RECENTLY KHANG TWICE REFUSED TO MEET WITH SENATOR DON. KHANG SAID THE PRESIDENT SHOULD NOT INTERPRET HIS OR LOAN'S REMARKS ABOUT THE NEED FOR STRONGER AND MORE DYNAMIC GOVERNMENT AS MEANING THEY ARE PLANNING A COUP. PRESIDENT JOHNSON IS ALSO SUBJECT TO STRONG CRITICISM BY THOSE IN THE UNITED STATES WHO DISAGREE WITH HIS POLICIES. KHANG SAID THAT HE CALLS THE PRESENT PHASE

1.5(c)
3.4(b)(1)

1.5(c)
3.4(b)(1)

S-E-C-R-E-T [redacted]

(classification) (dissem controls)

OF ENEMY STRATEGY "THE WAR OF TENSION". ONE IMPORTANT FACET OF THIS STRATEGY IS TO SOW DOUBT AND DISSENSION AMONG THE VIETNAMESE AND AMERICAN LEADERS AND PEOPLE. KHANG TOLD THIEU TO IGNORE THESE RUMORS AND DEVOTE HIS ENERGIES TO COMING TO GRIPS WITH THE MANY REAL PROBLEMS OF THE NATION. IF THIEU HAS ANY SUSPICION ABOUT KHANG'S COMPLICITY IN PLOTTING A COUP, HE NEED ONLY SAY SO AND

KHANG WILL PUT HIS SIGNED RESIGNATION ON THIEU'S DESK. THIEU EXPRESSED CONFIDENCE IN KHANG. KHANG SAID THAT SUBSEQUENTLY HE SENT HIS WIFE TO VISIT MRS. THIEU AS ANOTHER MEASURE OF REASSURANCE.

2. NEVERTHELESS, THIEU THOUGHT HE HAD GENUINE CAUSE FOR CONCERN. HE KNOWS MANY AMERICANS ARE NOT SATISFIED WITH HIS PERFORMANCE, THAT PRESIDENT JOHNSON'S DOMESTIC PROBLEMS ARE MOUNTING, AND THAT MANY VIETNAMESE ARE CALLING FOR A CHANGE IN GOVERNMENT.

3. KHANG SAID IT IS HIS IMPRESSION THAT THE U.S. GOVERNMENT IS VERY MUCH OPPOSED TO A COUP. THIEU SAID HE GOT THAT IMPRESSION FROM AMBASSADOR BUNKER BUT UNFORTUNATELY THERE ARE "FOURTEEN PEOPLE WHO SPEAK FOR THE

1.5(c)
3.4(b)(1)

S-E-C-R-E-T [redacted]

(classification) (dissem controls)

1.5(c)
3.4(b)(1)

U.S. GOVERNMENT IN VIETNAM." KHANG SAID HE TOLD THIEU THAT HE SEES MANY PARALLELS BETWEEN 1968 AND 1954 IN VIETNAM. DURING 1954 THE FRENCH WERE WINNING MILITARILY BUT THE DEFEATIST PSYCHOLOGY OF THE FRENCH PEOPLE MADE IT IMPOSSIBLE FOR THE FRENCH TO DEFEAT THE COMMUNISTS. TODAY KHANG FELS THE U.S. FORCES ARE WINNING MILITARILY BUT THE VOICES OF DEFEATISM GET LOUDER EACH DAY. HE THOUGHT IT IMPORTANT THAT THIEU NOT BE VICTIMIZED BY RUMORS, MANY OF WHICH ARE SPREAD BY THE COMMUNISTS AND DESIGNED TO SOW SUSPICION AND DIVISIVENESS. KHANG SAID HE TOOK A PARTICULARLY STRONG POSITION ON THIS SUBJECT NOT ONLY BECAUSE HE FERVENTLY BELIEVES WHAT HE SAID, BUT BECAUSE IT WAS OBVIOUS THAT THIEU WAS PREOCCUPIED BY MANY DOUBTS.

4. THIEU FEELS THE AMERICANS USED NGUYEN XUAN OANH AND DANG DUC KHOI TO ORGANIZE THE NSF WITH THE ULTIMATE OBJECTIVE OF GENERATING POPULAR SUPPORT FOR A COALITION GOVERNMENT WHICH WILL INCLUDE THE NATIONAL FRONT FOR THE LIBERATION OF SOUTH VIETNAM (NFLSV). FOR THIS REASON, THE AMERICANS SELECTED SENATOR TRAN VAN DON, MAI HUU XUAN, AND OTHER FORMER GENERALS OF PRO-FRENCH, NEUTRALIST

1.5(c)
3.4(b)(1)

POSTURE TO LEAD THE NSF. THIEU SAID HE IS FOLLOWING THE TACTIC OF PAYING LIP SERVICE TO DON'S REQUESTS FOR SUPPORT FOR THE NSF WHILE TRYING TO COUNTERBALANCE IT WITH POLIICAL EFFORTS OF HIS OWN GENERATED BY NGUYEN VAN HUONG, SECRETARY GENERAL OF THE PRESIDENCY, AND TRAN VAN AN. [redacted]

[redacted]

1.5(c)
3.4(b)(1)

[redacted] THIEU SAID FORTUNATELY THERE IS EVIDENCE THAT THE NSF DOES NOT HAVE THE UNQUALIFIED SUPPORT OF VICE PRESIDENT NGUYEN CAO KY'S FOLLOWERS AND CITED LOAN AS AN EXAMPLE. [redacted] COMMENT: [redacted]

1.5(c)
3.4(b)(1)

[redacted] KHOI HAS COMPLAINED THAT LOAN HAS BEEN ATTACKING THE NSF THROUGH THE NEWSPAPER CONG CHUNG.) THIEU ASKED FOR KHANG'S VIEW OF THE NSF. KHANG SAID HE COULD NOT GUESS THE NSF'S TRUE MOTIVES BUT HE SHARED THIEU'S SUSPICIONS OF MAI HUU XUAN.

5. IN DISCUSSING THE IV CORPS AREA, THIEU SAID HE IS CONCERNED THAT THE VIET KONG (VC) WILL BE ABLE TO CONSOLIDATE THEIR PRESENT CONTROL OF THE COUNTRYSIDE. THIEU SAID THAT

HE HAS BEEN SOMEWHAT SKEPTICAL OF PACIFICATION RESULTS CLAIMED IN THE DELTA BECAUSE HE FEELS THAT SOME OF THE EFFORT HAS BEEN SUPERFICIAL. HE SAID IT IS UNQUESTIONABLY TRUE THAT THE SITUATION IN THE COUNTRYSIDE IN IV CORPS HAS WORSENED MARKEDLY SINCE THE ENEMY'S TET OFFENSIVE. THIEU EXPRESSED CONCERN OVER THE NUMBER OF OUTPOSTS WHICH HAVE BEEN OVERRUN, AND SAID THE VC ARE EVEN ACTIVE POLITICALLY IN SOME AREAS AND APPARENTLY ARE RECEIVING SOME POPULAR SUPPORT. HE ASKED IF KHANG HAD ANY COMMENTS OR SUGGESTIONS ON THE IV CORPS SITUATION.

5. KHANG SAID THAT MAJOR GENERAL NGUYEN DUC THANG, NEWLY APPOINTED IV CORS COMMANDER, HAS A VERY DIFFICULT ASSIGNMENT, AND HE (KHANG) IS NOT CERTAIN THAT THANG HAS SUFFICIENT TROOPS TO DO THE JOB. KHANG FEELS ONE STEP THAT COULD BE TAKEN TO LESSEN THAN'S SECURITY PROBLEM WOULD BE A WELL-PLANNED CONSOLIDATION OF HAMLETS. SUCH A CONSOLIDATION WOULD INCREASE THE EFFECTIVENESS OF STATIC DEFENSE AND POSSIBLY RELEASE FORCES FOR THE ALL-IMPORTANT STRIKES ON ENEMY BASES. EQUALLY IMPORTANT, IT WOULD FACILITATE THE CREATION OF INTERNAL CONTROL MECHANISMS

S-E-C-R-E-T [redacted] 1.5(c) 3.4(b)(1)

(classification) (dissem controls)

IN HE HAMLETS. AT PRESENT, KHANG ARGUED, THERE ARE NOT ENOUGH SECURITY FORCES TO PROTECT THE SCATTERED HAMLETS OR ENOUGH MANPOWER TO SET UP INTERNAL CONTROL MECHANISMS TO CONTROL THE MOVEMENT OF VC AMONG THE MANY HAMLETS. WHILE THANG FACES A SERIOUS CHALLENGE AND LIKE ALL THE CORPS COMMANDERS, COULD USE MORE TROOPS, KHANG FEELS THAT THANG WILL BE ABLE TO GAIN THE UPPER HAND MILITARILY. HOWEVER, IT IS INPORTANT THAT STRONG AND HONEST GOVERNMENT BE BROUGHT TO THE DELTA, AND THAT THE GOVERNMENT'S MESSAGE GETS THROUH TO THE PEASANTS. THE GOVERNMENT'S INFORMATION PROGRAM IS VERY IMPORTANT. THIEU REPLIED THAT HE HAD ASKED GENERAL W.C. WESTMOREAND TO SUPPORT AN INCREASE OF 130,000 TROOPS FOR THE VIETNAMESE ARMY (ARVN) AND THIS ADDITION, IF SUPPORTED BY THE AMERICANS, SHOULD GIVE THE CORPS COMMANDERS THE ADDED TROOPS THEY NEED.

7. THIEU ASKED IF THERE WERE ANY EVIDENCE IN III CORPS THAT THE AMERICANS HAD ASSISTED THE VC DURING THE TET ATTACKS. KHANG SAID ON THE CONTRARY THE REACTION OF U.S. ARMORED ELEMENTS IN THE EARLY HOURS WAS ALL THAT PREVENTED THE ENEMY FROM OVERRUNNING TAN SON NHUT AIR

1.5(c) 3.4(b)(1)

BASE. KHANG SAID BOTH BEFORE AND AFTER THE ATTACK HIS COOPERATION FROM LIEUTENANT GENERAL WEYAND, CHIEF, II FIELD FORCE, LEFT NO DOUBT IN HIS MIND OF THE AMERICAN COMMITMENT. KHANG ADDED THAT PRME MINISTER NGUYEN VAN LOC WAS PRESENT AT KHANG'S HOUSE DURING THE FIRST DAY OF THE ATTACKS AND WAS AWARE OF WEYAND'S COMPLETE COOPERATION. THIEU SAID IT IS POSSIBLE THAT THE U.S. MILITARY IS FULLY OPPOSED TO THE VC BUT THAT CERTAIN OTHER LEMENTS OF THE U.S. MISSION MAY NOT BE. HE REITERATED HIS OPINION THAT THE U.S. MISSION IS NOT MONOLITHIC IN ITS VIEWS. KHANG SAID THAT WHILE THIEU DID NOT SAY HE BELIEVES THE RUMORS CONCERMNING U.S. COMPLICITY, IT IS POSSIBLE THAT HE FEELS IT IS WITHIN THE REALM OF THE POSSIBLE. THIEU SEEMS VERY CONCERNED THAT THE U.S. GOVERNMENT MIGHT REACH AN UNDERSTANDING WITH THE NFLSV WITHOUT CONSULTING HIM AND THAT THERE MAY BE CERTAIN SECRET CHANNELS TO THE VC OF WHICH THIEU IS UNAWARE. THUS, DESPITE THIEU'S OBVIOUS RESPECT FOR AND DEPENDENCE ON THE AMERICANS, HE RETAINS A LATENT SUSPICION OF AMERICAN MOTIVES.

8. THIEU ASKED IF KHANG EXPECTS THE ENEMY TO ATTEMPT

1.5(c)
3.4(b)(1)

TO ATTACK SAIGON IN THE IMMEDIATE FUTURE. KHANG REPLIED THAT HE DID NOT. THIEU SAID KHANG WAS ONE OF THE VERY FEW VIETNAMESE MILITARY MEN WHO HAD, FROM THE EARLIEST DAYS OF THE FIRST ATTACK, GONE ON RECORD AGAINST A SECOND WAVE GROUND ASSAULT. KHANG SAID HE BASED HIS OPINION ON DOCUMENTARY EVIDENCE THAT THE ENEMY HAD BEEN HURT BADLY DURING THE FIRST ASSAULT AND NEEDS TIME TO REGROUP. KHANG SAID HE EXPECTS GENERAL VO NGUYEN GIAP TO TRY SOMETHING SPECTACULAR JUST BEFORE THE DEMOCRATIC NATIONAL CONVENTION AND JUST BEFORE THE U.S. PRESIDENTIAL ELECTIONS. KHANG OPINED THAT GIAP IS A MASTER AT WAGING POLITICAL WARFARE AND HIS PRESENT TIMETABLE IS ATTUNED TO POLITICAL DEVELOPMENTS IN THE U.S.

9. KHANG ADVISED THIEU TO MEET MORE FREQUENTLY WITH HIS VIETNAMESE MILITARY COMMANDERS. HE SAID MOST OF THE SENIOR GENERALS FEEL THAT THIEU HAS BEEN IGNORING THEM SINCE HE BECAME PRESIDENT. KHANG SAID THAT HE HAD BEEN CRITICAL OF THE PRESIDENT AND THE GOVERNMENT BUT HAD SAID NOTHING TO ANYONE THAT HE WOULD NOT SAY TO THIEU, AND BELIEVES THAT THE SAME IS TRUE OF MOST OTHER SENIOR GENERALS.

1.5(c)
3.4(b)(1)

S-E-C-R-E-T [redacted] 1.5(c) 3.4(b)(1)

(classification) (dissem controls)

THIEU SAID HE FINDS HIS EXCHANGE OF IDEAS WITH KHANG HELPFUL AND HE HOPES THEY WILL CONTINUE TO BE FRANK AND OPEN FRIENDS. THIEU ASKED IF KHANG HAD ANY OTHER SUGGESTIONS. KHANG TOLD THIEU HE QUESTIONS THE WISDOM OF MAKING SWEEPING CHANGES IN THE CORPS AREAS AT THIS TIME SUCH AS THE CONTEMPLATED CHANGES CONCERNING GOVERNMENTAL DELEGATES AND PROVINCE CHIEFS. HOWEVER, IF THIEU FEELS HE MUST MAKE THESE CHANGES NOW HE CAN DEPEND ON KHANG'S SUPPORT. THIEU SAID HE REALIZES THERE ARE TWO SIDES THE CONTEMPLATED CHANGES AND PROMISED TO GIVE THE PROBLEM MORE CONSIDERATION.

10. FIELD DISSEM: STATE (AMBASSADOR BUNKER, POLITICAL COUNSELOR) USMACV (GENERAL WESTMORELAND, GENRAL ABRAMS, AMBASSADOR KOMER, CHIEF OF STAFF, J-2) 7TH AIR FORCE (GENERAL MOMYER) CINCPAC PACFLT ARPAC PACAF

SUBJECT SITUATION APPRAISAL: ASSESSMENT OF GENERAL THANG'S PERFORMANCE AS IV CORPS COMMANDER AND OF THE SITUATION IN THE DELTA AS OF 15 MARCH 1968

ACQ VIETNAM,SAIGON (16 MARCH 1968)

FIELD NO. [redacted]

1.5(c)
3.4(b)(1)

SOURCE [redacted] THIS IS A FIELD APPRAISAL OF THE CURRENT SITUATION. IT IS NOT AN OFFICIAL JUDGMENT BY THIS AGENCY OR ANY COMPONENT. IT REPRESENTS [redacted] INTERPRETATIONS [redacted] BASED ON INFORMATION AVAILABLE [redacted] AT THE TIME OF ITS PREPARATION.

1.5(c)
3.4(b)(1)

SUMMARY. THE SITUATION IN THE DELTA PROVINCES (IV CORPS TACTICAL ZONE) OF SOUTH VIETNAM IS NOT AS CRITICAL IN MID-MARCH AS IT WAS IN MID-FEBRUARY, BUT IT IS AS CRUCIAL AND WILL CONTINUE SO FOR THE NEXT TWO MONTHS. MAJOR GENERAL NGUYEN DUC THANG HAS BEGUN TO REVITALIZE IV CORPS SINCE HIS ASSUMPTION OF COMMAND ON 29 FEBRUARY. GENERAL THANG DESCRIBES HIS PLANS AND PROGRAM WITH THE ONE WORD, "OFFENSIVE," AND FROM THE DAY OF HIS ARRIVAL HAS BEEN ENCOURAGING SUBORDINATE MILITARY LEADERS TO GO ON THE ATTACK. GENERAL THANG'S PROGRAM

5 4 3 2 1

CALLS FOR THE MOBILIZATION OF ALL RESOURCES TO DESTROY VIET CONG (VC) MAIN FORCE UNITS, PROTECT LINES OF COMMUNICATION, RESTORE THE REGIONAL FORCES AND POPULAR FORCES, PRESS FORWARD WITH THE REVOLUTIONARY DEVELOPMENT PROGRAM AND PUSH THE RECOVERY EFFORT. REGARDING CIVILIAN MOBILIZATION, GENERAL THANG SAYS THAT CIVILIANS MUST UNDERTAKE CIVIL DEFENSE MEASURES INCLUDING THE BUILDING OF SHELTERS AND MUST ORGANIZE TO CARE FOR REFUGEES. DURING FEBRUARY THE GOVERNMENT OF VIETNAM WAS LOSING THE WAR PSYCHOLOGICALLY IN THE DELTA, BUT IT NOW APPEARS THAT GENERAL THANG HAS SUCCEEDED IN REVERSING THE POST-TET TREND OF THE WAR IN THE DELTA. VC MORALE IS CURRENTLY VERY VULNERABLE TO A SUDDEN REVERSAL OF THE WAR AND COULD QUICKLY CRACK IF THE VC COULD BE PERSUADED DURING THE NEXT TWO MONTHS THAT THEY WILL NOT ACHIEVE VICTORY IN EITHER THE SHORT OR LONG RUN. TO INFLICT A PSYCHOLOGICAL DEFEAT ON THE VC THERE MUST BE AGGRESSIVE AND EFFECTIVE OFFENSIVE OPERATIONS AGAINST THE VC MAIN FORCE UNITS, ATTACKS AGAINST VC SUPPLY LINES AND PENETRATION OF THEIR BASE AREAS. END SUMMARY.

1. MAJOR GENERAL NGUYEN DUC THANG HAS BEGUN TO REVITALIZE IV CORPS SINCE HIS ASSUMPTION OF COMMAND ON 29 FEBRUARY. HIS IMMEDIATE PERSONAL IMPACT AND INITIAL ACTIONS WERE IMPRESSIVE, BUT THERE WAS REASON TO BE SKEPTICAL ABOUT THE EFFECTIVENESS OF ONE

INDIVIDUAL, REGARDLESS OF HIS ABILITY AND POSITION, IN REVITA- 1.5(c) 3.4(b)(1)
LIZING THE GOVERNMENT OF VIETNAM (GVN) ARMED FORCES AND PROVINCE GOVERNMENTS IN THE DELTA THAT HAD FOR SO LONG BEEN USED TO CORRUPT AND INEFFECTIVE LEADERSHIP. BY THE END OF GENERAL THANG'S FIRST WEEK IN COMMAND, HOWEVER, IT BECAME APPARENT THAT THE SMALL STAFF HE HAD BROUGHT WITH HIM FROM SAIGON IS ALSO EFFECTIVE, AWARE OF THE SITUATION IN THE DELTA, DECISIVE IN REFLECTING HIS VIEWS AS TO WHAT NEEDS TO BE DONE, AND DETERMINED TO DO IT. WITH LEADERSHIP AT THE TOP IN SOME DEPTH, THE ENTIRE IV CORPS STAFF SWUNG INTO LINE AND BEGAN WORKING AS IT NEVER HAD BEFORE.

2. ON 9 MARCH, GENERAL THANG ASSEMBLED ALL THE PROVINCE CHIEFS AND BRIEFED THEM ON HIS PLANS AND PROGRAM, WHICH HE SAID CAN BE DESCRIBED BY ONE WORD, "OFFENSIVE." FROM THE DAY OF HIS ARRIVAL, GENERAL THANG HAD BEEN URGING SUBORDINATE MILITARY LEADERS TO GO ON THE OFFENSIVE, AND THE NUMBER OF BATTALIONS AND COMPANIES ASSIGNED TO OFFENSIVE ROLES GRADUALLY INCREASED EACH DAY. BY 14 MARCH THE NUMBER OF MILITARY OPERATIONS SCHEDULED FOR THE DAY THROUGHOUT IV CORPS HAD REACHED THE UNPRECEDENTED TOTAL OF 60: 2 DIVISIONAL, 8 REGIMENTAL, 9 SECTOR AND 41 SUBSECTOR OPERATIONS. DURING THE SAME PERIOD THERE WERE ONLY 17 VIET CONG (VC)-INITIATED OPERATIONS AND ALL WERE OF THE ECONOMY-OF-FORCE

1.5(c)
3.4(b)(1)

TYPE, THAT IS, 9 MORTAR ATTACKS AND 5 HARASSMENTS. ALSO ON 14 MARCH, 3392 VEHICLES TRAVELLED ON NATIONAL ROADS CONNECTING CITIES IN THE DELTA, AN INCREASE OF ROUGHLY 50 PERCENT WITHIN A FEW DAYS. IT NOW APPEARS THAT GENERAL THANG HAS SUCCEEDED IN REVERSING THE POST-TET TREND OF THE WAR IN THE DELTA WITHIN HIS FIRST TWO WEEKS IN COMMAND.

3. DURING FEBRUARY THE GVN WAS LOSING THE WAR PSYCHOLOGICALLY IN THE DELTA. THE VC CAMPAIGN OF TERROR AND INTIMIDATION WAS EXTREMELY EFFECTIVE IN UNNERVING GVN LEADERSHIP AT THE CORPS AND PROVINCE LEVELS AND THIS WAS RAPIDLY COMMUNICATED TO THE CIVILIAN POPULATION AND THE LOWER RANKS OF GVN ARMED FORCES WHO WITNESSED THE HASTY AND HEAVY DEFENSES PROVIDED TO HIGHER RANKING OFFICIALS AND GVN AND ARMY OF THE REPUBLIC OF VIETNAM (ARVN) INSTALLATIONS AND THE RELATIVE ABSENCE OF DEFENSES TO PROTECT THE CIVILIAN POPULATION. AT A COST DURING THE LAST FEW WEEKS OF FEBRUARY OF ONLY A FEW THOUSAND MORTAR ROUNDS AND SOME GROUND PROBING ATTACKS AGAINST SELECTED CITIES AND TOWNS, PLUS THE GENERATION OF A PROFUSION OF RUMORS OF THREATENED VC MASSIVE ATTACKS AGAINST THE TOWNS AND CITIES, THE VC MANAGED TO GAIN A VIRTUAL STRANGLEHOLD ON THE ECONOMY AND AROUND THE CITIES OF THE DELTA. BY MID-FEBRUARY A PALL OF GLOOM AND FEAR HUNG OVER THE DELTA. THERE WAS MUCH TALK

SECRET [redacted]
(classification) (dissem controls)

AMONG SOUND AND SEASONED OBSERVERS ABOUT THE POSSIBILITY OF SIZEABLE DEFECTIONS FROM THE GVN ARMED FORCES IF THE VC SHOULD ATTACK IN STRENGTH. KNOWLEDGEABLE MILITARY OBSERVERS KNEW THAT THE VC COULD TAKE OVER FEW IF ANY OF THE CITIES AND TOWNS OF THE DELTA EVEN WITH A SERIES OF MASSIVE ASSAULTS IF THE GVN HAD THE WILL TO FIGHT, BUT IT WAS OBVIOUS DURING FEBRUARY THAT THE WILL TO FIGHT WAS EBBING. GENERAL MANH PROVIDED INEFFECTIVE LEADERSHIP AND EVEN CONTRIBUTED TO THE PESSISMISM BY HIS DEFENSE-ORIENTED ACTIONS. THIS WAS THE SITUATION IN THE DELTA WHEN GENERAL THANG TOOK OVER COMMAND AT 1600 HOURS ON 29 FEBURARY. 1.5(c) 3.4(b)(1)

4. THE IMPACT OF GENERAL THANG'S TAKEOVER OF COMMAND WAS FELT ALMOST INSTANTLY IN CAN THO. WITHIN ONE HOUR, BY 1700 HOURS ON 29 FEBRUARY, THE BARBED WIRE AND BUNKER POSITIONS THAT HAD BLOCKED HALF THE MAIN STREET IN FRONT OF GENERAL MANH'S WELL-DEFENDED RESIDENCE HAD BEEN REMOVED AND VIETNAMESE CIVILIANS WERE AGAIN PERMITTED TO USE THE STREET FOR THE FIRST TIME SINCE TET. THIS HAD AN IMMEDIATE IMPACT ON THE CIVILIAN POPULATION. WITHIN TWO HOURS AFTER HE ASSUMED COMMAND, GENERAL THANG HAD ALSO ORDERED TWO RANGER BATTALIONS THAT HAD BEEN DEFENDING THE INNER PERIMETERS OF THE CITY AND

5 4 3 2 1

1.5(c) 3.4(b)(1)

SECRET [redacted]
(classification) (dissem controls)

SECRET [redacted]
(classification) (dissem controls)

1.5(c)
3.4(b)(1)

THE ARMORED PERSONNEL CARRIERS THAT HAD BEEN DEFENDING IV CORPS HEADQUARTERS AND THE CORPS COMMANDERS AND PROVINCE CHIEFS HOUSES TO MOVE IMMEDIATELY TO OFFENSIVE POSITIONS OUTSIDE THE CITY. THIS TOO HAD AN IMPACT ON THE CIVILIAN POPULATION AND PROBABLY EVEN MORE SO ON ARVN.

5. THE IMPACT OF GENERAL THANG'S LEADERSHIP IS, OF COURSE, BEING FELT MORE SLOWLY IN OTHER PARTS OF THE DELTA THAN IN CAN THO, BUT HE IS FLYING DAILY TO VARIOUS PROVINCES AND BATTLE ZONES, AS ARE MEMBERS OF HIS STAFF. THE INCREASE IN OFFENSIVE OPERATIONS TESTIFIES TO THE EFFECTIVENESS OF THESE VISITS.

6. GENERAL THANG'S OFFENSIVE PROGRAM CALLS FOR THE MOBILIZATION OF ALL RESOURCES, INCLUDING CIVILIAN, TO FURTHER SIX PRIORITY OBJECTIVES AND TASKS, WHICH ARE AS FOLLOWS: (PSYCHOLOGICAL OPERATIONS WILL BE USED TO THE MAXIMUM IN ALL SIX EFFORTS.)

A. DESTROY VC MAIN FORCE UNITS,

B. PROTECT LINES OF COMMUNICATION,

C. RESTORE REGIONAL FORCES AND POPULAR FORCES,

D. PRESS FORWARD WITH THE REVOLUTIONARY DEVELOPMENT PROGRAM,

5 4 3 2 1

1.5(c)
3.4(b)(1)

SECRET [redacted]
(classification) (dissem controls)

1.5(c)
3.4(b)(1)

E. PROVIDE SECURITY FOR CITIES AND TOWNS, AND

F. PUSH THE RECOVERY EFFORT.

7. REGARDING CIVILIAN MOBILIZATION, GENERAL THANG INFORMED SENIOR AMERICAN ADVISORS THAT THE CIVILIANS MUST BE TOLD THAT IT IS A FACT OF WAR THAT THE VC HAVE LONG-RANGE MORTARS AND ROCKETS, GVN MILITARY FORCES MUST BE DEPLOYED OFFENSIVELY, AND THE GVN CANNOT GUARANTEE THE PROTECTION OF ALL CITIES AND TOWNS AGAINST MORTAR ATTACKS. THE CIVILIANS MUST UNDERTAKE CIVIL DEFENSE MEASURES, INCLUDING THE BUILDING OF SHELTERS AGAINST MORTAR ATTACKS. HE SAID CIVILIANS MUST ALSO ORGANIZE TO CARE FOR REFUGEES AND ABSORB THEM FROM REFUGEE CENTERS INTO THEIR HOMES UNTIL DEVASTATED AREAS CAN BE CLEARED AND RECONSTRUCTION COMPLETED.

8. THE SITUATION IN THE DELTA IS NOT AS CRITICAL IN MID-MARCH AS IT WAS IN MID-FEBRUARY, BUT IT IS AS CRUCIAL AND WILL CONTINUE SO FOR THE NEXT TWO MONTHS. HAD THE SITUATION THAT PREVAILED THROUGHOUT FEBRUARY CONTINUED INTO MAY, THE VC MIGHT NOT HAVE WON ANY HEARTS, BUT THEY COULD WELL HAVE TURNED THE MINDS OF THE OVERWHELMING MAJORITY OF THE DELTA POPULATION TO FAVOR AN END OF THE WAR AT any COST, INCLUDING A CAPITULATION OF THE GVN TO THE VC DEMANDS FOR A COALITION GOVERNMENT.

SECRET [redacted]
(classification) (dissem controls)

1.5(c)
3.4(b)(1)

SECRET [redacted] 1.5(c) 3.4(b)(1)
(classification) (dissem controls)

NEITHER SIDE HAS ANY PROSPECT IN THE SHORT RUN OF WINNING THE HEARTS OF THE GREAT MAJORITY OF THE PEOPLE IN THE DELTA, BECAUSE THEY ARE SICK AND TIRED OF THIS WAR, BUT OUR SIDE MUST GIVE FULL ATTENTION TO WINNING THE MINDS OF THE PEOPLE BY CONVINCING THEM THAT THE VC CAN NOT POSSIBLY WIN AND THAT THE WAR WILL END MOST QUICKLY IF THE PEOPLE LINE UP ON THE SIDE OF THE GVN.

9. THERE IS A TIME IN EVERY MILITARY ENGAGEMENT WHEN A TURNING POINT IN THE TIDE OF WAR IS REACHED. THE VC UNDOUBTEDLY FELT THAT THIS TURNING POINT HAD BEEN REACHED IN THE DELTA IN FEBRUARY AND IN THEIR FAVOR. THE VC HAVE BEEN KEPT GOING BY A BELIEF IN THE INEVITABILITY OF VICTORY FOR THEIR SIDE. MOST RECENTLY THEY HAVE BEEN LED TO EXPECT VICTORY WITHIN A MATTER OF MONTHS. VC MORALE IS NOW, THEREFORE, VERY VULNERABLE TO A SUDDEN REVERSAL IN THE TIDES OF WAR. VC MORALE COULD QUICKLY CRACK IF THE VC COULD BE PERSUADED DURING THE NEXT TWO MONTHS THAT THEY WILL NOT ACHIEVE VICTORY IN THE SHORT RUN OR THE LONG RUN, AND THAT A VC VICTORY IS NOT ONLY NOT INEVITABLE, BUT IMPOSSIBLE. WORDS AND LEAFLETS WILL NOT CONVINCE THE VC OF THIS; ONLY EFFECTIVE OFFENSIVE MILITARY OPERATIONS WILL DO SO. OFFENSIVE MILITARY OPERATIONS HAVE

5 4 3 2 1

SECRET [redacted] 1.5(c) 3.4(b)(1)
(classification) (dissem controls)

SECRET [redacted] 1.5(c) 3.4(b)(1)
(classification) (dissem controls)

BEEN INCREASING IN IV CORPS SINCE GENERAL THANG TOOK OVER, BUT HAVE NOT YET REACHED THE POINT OF BEING VERY EFFECTIVE. WITH SOME EXCEPTIONS, THE VC HAVE BEEN AVOIDING CONTACT. NO VC MAIN FORCE UNIT HAS YET BEEN ENGAGED AND DECISIVELY DEFEATED. THE EXPECTED SECOND CONFRONTATION IN THE CITIES HAS NOT OCCURRED AND BOTH SIDES ARE NOW MANEUVERING IN THE COUNTRY, BUT WITH VERY LITTLE ENGAGEMENT. IF THIS SITUATION CONTINUES THROUGH MAY AND INTO THE RAINY SEASON, ANOTHER STALEMATE WILL HAVE BEEN REACHED AND VC MORALE WILL HAVE BEEN IMPAIRED, BUT NOT CRACKED.

10. THIS WAR IN THE DELTA THAT COULD HAVE BEEN LOST BY MAY COULD ALSO POSSIBLY BE WON BY MAY. IF PSYCHOLOGY IS THE KEY TO THIS WAR, MILITARY POWER IS THE INDISPENSIBLE AND MOST POTENT PSYCHOLOGICAL WEAPON. THE VC PSYCHOLOGICAL VICTORY ATTAINED IN THE DELTA IN THE POST-TET WEEKS STEMMED IN PART FROM A VC FEELING OF INCREASING POWER RESULTING FROM THE ISSUANCE OF NEW AND EXCELLENT WEAPONS BEGINNING IN OCTOBER 1967. THE VC MUST BE PERSUADED THAT THESE WEAPONS WILL NOT ONLY NOT BE ADEQUATE TO ENABLE THEM TO WIN, BUT THAT OUR SIDE CAN CONTINUALLY UP THE ANTE REGARDLESS OF WHETHER THEY GET MORE NEW WEAPONS OR EVEN NORTH VIETNAMESE ARMY (NVA) ASSISTANCE IN THE DELTA. A PSYCHOLOGICAL DE-

(classification) (dissem. controls)

1.5(c)
3.4(b)(1)

FEAT OF THE VC CAN BE ATTAINED ONLY IF WE CAN CREATE IN THE VC CAMP A HEAVY ATMOSPHERE OF DEFEATISM. THIS COULD HAPPEN IF THE VC SHOULD LAUNCH MASSIVE ATTACKS AGAINST THE CITIES AND TOWNS AND THESE ATTACKS SHOULD FAIL WITH HEAVY VC CASUALTIES RUNNING INTO THE TENS OF THOUSANDS. THIS WOULD DEPEND ON VC INITIATIVE TO UNDERTAKE THE ATTACKS AND THE WILL TO WIN OF THE GVN FORCES DEFENDING THE TOWNS, AND WE CANNOT COUNT ON EITHER OF THESE AT THE MOMENT. TO INFLICT A PSYCHOLOGICAL DEFEAT ON THE VC WITHIN THE NEXT TWO MONTHS, WHEN VC MORALE WILL BE MOST VULNERABLE TO CRACKING, OUR SIDE MUST: A. EMBARK ON AGGRESSIVE AND EFFECTIVE OFFENSIVE OPERATIONS AGAINST THE VC MAIN FORCE UNITS; B. CUT THEIR SUPPLY LINES AND C. PENETRATE THEIR BASE AREAS TO DESTROY THEIR SUPPLY DUMPS AND CACHES. IF ALL THREE OF THESE STEPS COULD BE TAKEN AT ONCE, THE SUDDEN INSECURITY IT WOULD ENGENDER AMONG THE VC JUST AS THEY THOUGHT THAT VICTORY WAS WITHIN THEIR GRASP COULD CRACK VC MORALE.

11. GENERAL THANG HAS STAVED OFF DEFEAT BY PROVIDING VERY GOOD LEADERSHIP WHERE VERY BAD LEADERSHIP EXISTED BEFORE, BUT HE CANNOT PERFORM A MIRACLE. HE CANNOT INFLICT MAJOR DEFEATS ON THE VC WITH FORCES CURRENTLY AT HIS DISPOSAL.

ACQ: VIETNAM, SAIGON (22 MARCH 1968) FIELD NO. [redacted]

SOURCE: THIS IS A VIETNAM SITUATION REPORT PREPARED AT 1900 HOURS LOCAL TIME ON 22 MARCH

1. THERE ARE INDICATIONS THAT THE VIET CONG (VC) MAY BE PREPARING FOR ACTIVITY IN THE SAIGON AREA IN THE NEAR FUTURE. [redacted] PRISONER REPORTS, DISCOVERY OF VC ARMS CACHES AND THE ENEMY TROOP DISPOSITION TEND TO INDICATE IMPENDING VC ACTION IN OR NEAR THE CAPITAL.

1.5(c)
3.4(b)(1)

2. [redacted] THIS PREDICTION IS BASED ON ANALYSIS OF INTELLIGENCE GAINED FROM ALLIED CONTACTS WITH ENEMY TROOPS NEAR SAIGON, VC RESUPPLY ACTIVITY AND THE LOSS OF FACE THEY INCURRED IN THE FIRST ATTACK ON SAIGON.

3. ON 19 MARCH A LARGE CACHE OF ENEMY AMMUNITION WAS DISCOVERED IN GIA DINH PROVINCE AND INCLUDED 31 ROUNDS OF 122 MM ROCKET, 1 200 ROUNDS OF MORTAR, 30 ROUNDS OF 75MM RECOILESS RIFLE AND 138 ROUNDS OF B-40 AMMUNITION. THE DISCOVERY OF THIS CACHE, AND OTHER SMALLER CACHES IN THE PAST FEW DAYS, INDICATES THE ENEMY IS TRYING TO INCREASE HIS STOCKPILE OF MUNITIONS IN THE IMMEDIATE CAPITAL AREA AND THAT HE IS HAVING SOME SUCCESS IN MOVING THE MATERIEL CLOSE TO SAIGON.

4. PRISONER REPORTS ALSO BEAR OUT THE FACT THAT ENEMY FORCES ARE MAKING A GREAT EFFORT TO MOVE SUPPLIES AND MEN INTO POSITION FOR A POSSIBLE SECOND ATTACK ON SAIGON. A PRISONER, STATING THAT HE WAS AN IMPRESSED AMMUNITION BEARER, REPORTED THAT LARGE AMOUNTS OF AMMUNITION WERE BEING MOVED EASTWARD THROUGH HAU NGHIA PROVINCE; A RALLIER FROM THE 506TH LOCAL FORCE BATTALION STATES THAT HIS UNIT WAS INFILTRATING INTO THE CITY IN SMALL GROUPS ON 16 MARCH; AND ANOTHER REPORT MENTIONS THAT PEOPLE IN HOC MON DISTRICT WERE FORCED TO MOVE AMMUNITION INTO GIA DINH PROVINCE TO TWO CACHES.

5. ANOTHER INDICATION IS THAT THE DISPOSITION OF ENEMY TROOPS IS NOW APPROXIMATELY WHAT IT WAS JUST PRIOR TO THE TET OFFENSIVE. MANY OF THE ENEMY UNITS HAVE WITHDRAWN FROM THE CLOSE PROXIMITY OF SAIGON THAT THEY MAINTAINED A WEEK OR TWO AGO. THIS TACTIC IS USED BY THE VC TO DRAW ALLIED FORCES OUT FROM AROUND SAIGON AND SPREAD THEM OUT RELATIVELY THINLY, THUS MAKING IT EASIER TO FILTER SMALL UNITS THROUGH ALLIED LINES AND INTO THE CITY.

6. THE CAPITAL MILITARY DISTRICT (CMD) PASSED THE COMBINED SECURITY COMMITTEE AT 1740 HOURS ON 22 MARCH A REPORT EVALUATED "B1" BY THE CMD ALLEGING THAT THE VC ARE MOVING LARGE QUANTITIES OF ARMS TO THE VICINITY OF XT 795050 AND XT 830065, NORTH OF TAN SON NHUT AIR FIELD, AND ARE INFILTRATING TROOPS TO THE SOUTH OF SAIGON IN AN EFFORT TO ATTACK THE SAIGON-GIA DINH AREA BETWEEN 21 AND 23 MARCH.

INTELLIGENCE MEMORANDUM

Soviet Seaborne Shipments to North Vietnam: Plans for 1968

Summary

The USSR has announced plans to increase seaborne shipments to North Vietnam by 20 percent in 1968. The implied growth in North Vietnamese imports from the USSR above the 1967 level is about 125,000 tons -- less than the increases of 137,000 in 1966 or 141,000 in 1967. About 30 additional ship arrivals would be needed to carry the increase in tonnage planned for 1968.

In the first quarter of 1968, imports from the USSR ran 30 percent higher than the monthly average in 1967. All of this increase consisted of shipments of petroleum and foodstuffs; these commodities probably account for most of the planned growth for the year.

Note: This memorandum was produced July by CIA. It was prepared by the Office of Economic Research.

Planned Increase for 1968

1. The Soviet Ministry of the Maritime Fleet has announced that deliveries by Soviet ships to Haiphong* will increase by 20 percent in 1968. A 20-percent growth would raise North Vietnamese seaborne imports from the USSR from 627,000 metric tons in 1967 to more than 750,000 tons in 1968.** An increase of this size would be smaller in both relative and absolute terms than those in 1966 and 1967. The year of greatest growth was 1966, when North Vietnam's imports from the USSR rose 39 percent, as shown in the following tabulation:

	Thousand Metric Tons		
Year	Yearly Total	Increase over Previous Year a/	Percentage Increase over Previous Year a/
1964	277	N.A.	N.A.
1965	349	72	26
1966	486	137	39
1967	627	141	29
1968	753	125	20

a. Based on unrounded data.

Record in 1968 and Prospects

2. The monthly average of North Vietnamese seaborne imports from the USSR in the first quarter of 1968 was 30 percent larger than the monthly average in 1967. Petroleum and foodstuffs accounted for all of the increase in the first quarter, as shown in the following tabulation of average monthly imports from the USSR:

* *About 99 percent of North Vietnam's imports by sea in 1967 were delivered to the port of Haiphong.*
** *Imports from the USSR made up 96 percent of the total volume delivered by Soviet ships in 1967. The remaining cargoes came from North Korea, Cambodia, Eastern Europe, Japan, and Communist China.*

Metric Tons

Commodity	Monthly Averages a/ 1965	1966	1967	First Quarter 1968
Fertilizer	6,500	9,300	8,200	8,200
Petroleum	12,900	16,500	15,700	24,900
Bulk foodstuffs	60	600	13,800	21,400
Miscellaneous b/	9,600	14,150	14,600	13,400
Total	*29,100*	*40,500*	*52,300*	*67,900*

a. Because of rounding, components may not add to the totals shown.
b. This category includes metal products, machinery, equipment, and unidentified cargo.

The pace at which petroleum will be imported in the remainder of the year will depend for the most part on the level of economic and logistic activity; actual imports of foodstuffs will depend on the results of the rice harvests. Imports of these commodities probably account for most of the planned increase in total seaborne imports from the USSR in 1968.

Ship Arrivals and Congestion

3. A 20-percent increase in Soviet exports to North Vietnam in 1968 would require approximately 30 additional ship arrivals and would raise the monthly average of Soviet ship arrivals from 15.1 per month in 1967 to 17.6 per month in 1968. Monthly averages of Soviet ship arrivals since the beginning of 1965 are as follows:

	Monthly Averages 1965	1966	1967	First Quarter 1968
Ship arrivals	6.6	10.2	15.1	18.0

4. Thirty additional Soviet ship arrivals during 1968 should not worsen ship congestion in Haiphong appreciably. Many will be tankers, which are easier to schedule, and which do not compete with dry cargo ships for berths and cargo-handling equipment.

ACQ VIETNAM, SAIGON (4 APRIL 1968) [redacted]

SOURCE [redacted]

E0 12958 3.4(b)(1)>25Yrs (C)

SUMMARY: PRESIDENT THIEU AND VICE PRESIDENT KY HAVE BEEN MEETING PRIVATELY AND ALSO WITH CABINET MEMBERS TO DISCUSS THE QUESTION OF NEGOTIATIONS. SPECIFIC SUBJECTS CONSIDERED HAVE BEEN FULL MOBILIZATION; THE NEED TO STREAMLINE THE GOVERNMENT (GVN), INCLUDING THE CREATION OF A WAR CABINET; AND THE NEED TO DEMONSTRATE NATIONAL UNITY AND DISCIPLINE. THIEU AND KY SEEM TO AGREE THAT THE NATIONAL ASSEMBLY

APPROVED FOR RELEASE
DATE: OCT 2000

E0 12958 3.4(b)(1)>25Yrs
(C)

MUST BE TOLD IN NO UNCERTAIN TERMS THAT IT CANNOT CONTINUE ITS PRESENT ROLE OF "NATIONAL IRRITANT". THE GVN IS UNPREPARED FOR NEGOTIATIONS; THE FOREIGN MINISTRY HAS NOT PREPARED POSITION PAPERS ON THE QUESTION, THE GVN HAS NOT DECIDED WHAT IT WOULD AND WOULD NOT ACCEPT, THERE IS A GREAT LACK OF UNDERSTANDING OF WHAT THE NATIONAL LIBERATION FRONT (NFLSV) AND NORTH VIETNAM MIGHT OR MIGHT NOT ACCEPT. HOWEVER, ALL GVN OFFICIALS AGREE THAT A COALITION GOVERNMENT WITH THE NFLSV WOULD BE UNACCEPTABLE. THIEU HAS MAINTAINED HIS COMPOSURE, BUT HE IS RELYING TOO MUCH ON THINGS THAT MIGHT NOT HAPPEN. KY IS TAKING A MORE REALISTIC APPROACH AND IS INSISTING THAT THE GVN SHOULD PREPARE FOR THE POSSIBILITY THAT THE U.S. MAY BE DETERMINED TO EXTRICATE ITSELF FROM VIETNAM REGARDLESS OF THE PRICE. AS A RESULT OF THE CRISIS, THIEU AND KY ARE WORKING MORE CLOSELY TOGETHER THAN EVER BEFORE, AND KY HAS BEEN TELLING HIS FOLLOWERS THAT THEY NEED THIEU AND MUST GIVE THIEU ALL POSSIBLE SUPPORT AND EXCELLENT COUNSEL. ONE DANGER FACING THE GVN IS THAT THE VIET CONG MAY SUCCEED IN CONVINCING THE PEOPLE THAT THEY HAVE WON THE WAR, THUS CREATING A BANDWAGON MENTALITY. IN SUCH EVENT, THE GVN WOULD BE UNABLE TO FUNCTION. ONE POSITIVE ASPECT IS THAT THERE IS NO EFFORT BY ANYONE TO HARRASS THE GOVERNMENT. EVEN POLICE CHIEF LOAN HAS

APPROVED FOR RELEASE

SECRET NO FOREIGN DISSEM / NO DISSEM ABROAD

(classification) (dissem controls)

E0 12958 3.4(b)(1)>25Yrs
(C)

OFFERED THIEU AN ABSOLUTE GUARANTEE THAT HE WILL NOT CREATE TROUBLE FOR THIEU IN THIS TIME OF CRISIS. END SUMMARY.

1. PRESIDENT NGUYEN VAN THIEU AND VICE PRESIDENT NGUYEN CAO KY HAVE HAD SEVERAL PRIVATE MEETINGS AS WELL AS GENERAL MEETINGS ALSO ATTENDED BY CABINET MEMBERS TO DISCUSS THE QUESTION OF NEGOTIATIONS. THE ONLY POSITIVE DECISION TO EMERGE THUS FAR IS THAT THE GOVERNMENT OF VIETNAM (GVN) SHOULD IMMEDIATELY TAKE STEPS TO SHOW THE PEOPLE OF SOUTH VIETNAM (SVN) AND THE WORLD THAT IT IS DETERMINED TO CONTINUE TO RESIST COMMUNIST AGGRESSION. THE STEP MOST OFTEN DISCUSSED HAS BEEN FULL MOBILIZATION SINCE THIS WOULD INDICATE THAT THE GVN WAS PREPARING TO CARRY ON ALONE IF NEED BE.

2. THERE HAS ALSO BEEN CONSIDERABLE DISCUSSION OF THE NEED TO STREAMLINE THE GOVERNMENT SO THAT IT CAN FUNCTION MORE EFFECTIVELY. THE MOST COMMONLY DISCUSSED STEP IN THIS DIRECTION IS THE CREATION OF A WAR CABINET. ONE PROPOSAL IS TO BRING FIVE POWERFUL NEW FIGURES INTO THE GOVERNMENT TO HEAD FIVE NEW SUPER-MINISTRIES--WAR, SECURITY, ECONOMY, POLITICAL WARFARE, AND ONE OTHER--UNDER WHICH THE PRESENT MINISTRIES WOULD BE GROUPED, AT LEAST IN TERMS OF POLICY DIRECTION. ANOTHER PROPOSAL IS TO KEEP THE PRESENT MINISTRIES BUT BRING IN MORE

APPROVED FOR RELEASE
DATE: OCT 2000

SECRET NO FOREIGN DISSEM / NO DISSEM ABROAD

EO 12958 3.4(b)(1)>25Yrs (C)

(classification) (dissem controls)

DYNAMIC FIGURES TO HEAD SOME OF THEM. THEN, A HALF DOZEN OR SO OF THESE KEY MINISTERS WOULD BE SELECTED TO RUN THE GOVERNMENT ALONG WITH THIEU, KY AND PRIME MINISTER NGUYEN VAN LOC.

3. DURING THESE MEETINGS THERE HAS ALSO BEEN MUCH TALK OF THE NEED TO DEMONSTRATE UNITY AND NATIONAL DISCIPLINE. THIEU AND KY SEEM TO AGREE IN PRINCIPLE THAT THE NATIONAL ASSEMBLY MUST BE TOLD IN NO UNCERTAIN TERMS THAT IT CANNOT CONTINUE IN ITS PRESENT ROLE OF "NATIONAL IRRITANT". THIS MESSAGE WOULD BE PASSED DISCREETLY BUT THERE WOULD BE AN "IRON FIST IN THE VELVET GLOVE". [redacted] COMMENT: MOST VIETNAMESE OFFICIALS AGREE THAT THE ASSEMBLY WAS SET UP ONLY BECAUSE THE AMERICANS INSISTED ON IT, THAT IT SERVES A VERY LIMITED PURPOSE IN TIME OF WAR AND THAT SVN IS NOT PREPARED FOR THE LUXURY OF PARLIAMENTARY GOVERNMENT IN A CRISIS. AS LONG AS THE U.S. WAS PREPARED TO CARRY THE BURDEN, THE VIETNAMESE COULD AFFORD IT. NOW, HOWEVER, THE ASSEMBLY MUST BE WILLING TO SUBORDINATE ITSELF TO THE NATIONAL INTERESTS, I.E., IT SHOULD BECOME A RUBBER STAMP.)

EO 12958 3.4(b)(1) (C)

4. IN GENERAL, THE GVN IS COMPLETELY DISORGANIZED AND UNPREPARED FOR NEGOTIATIONS. THE FOREIGN MINISTRY HAS NOT PREPARED ANY PAPERS ON [redacted] NEGOTIATIONS THAT SET FORTH POSSIBLE OPTIONS AND ALTERNATIVES. ALTHOUGH THE QUESTION HAS BEEN DISCUSSED BY THIEU AND KY, THE FACT

APPROVED FOR RELEASE
DATE: OCT 2000

SECRET NO FOREIGN DISSEM / NO DISSEM ABROAD

E0 12958 3.4(b)(1)>25Yr
(C)

REMAINS THAT THE GVN HAS NOT DETERMINED ITS POSITION, THAT IS, WHAT IT WOULD BE WILLING TO ACCEPT IN ANY NEGOTIATIONS. THE ONLY FIRM POSITION IS THAT NONE OF THE PRESENT GVN OFFICIALS WILL AGREE TO A GENUINE COALITION GOVERNMENT WITH THE NATIONAL LIBERATION FRONT (NFLSV). MOREOVER, THE GVN KNOWS VERY LITTLE ABOUT ITS ENEMY--LITTLE ABOUT THE NFLSV AND VIRTUALLY NOTHING ABOUT NORTH VIETNAM (DRV). IT DOES NOT HAVE A CLEAR IDEA OF WHAT THE NFLSV WANTS AND WHAT IT MIGHT SETTLE FOR; WHAT THE DRV MIGHT OR MIGHT NOT AGREE TO. IN ADDITION, THERE IS LITTLE OR NO AGREEMENT AMONG SENIOR GVN OFFICIALS NOW AS TO WHAT PEACE NEGOTIATIONS SIGNIFY.

5. THIEU HAS NOT LOST HIS COMPOSURE AS A RESULT OF THE RECENT DEVELOPMENTS, WHICH IS A DECIDED ASSET SINCE LOC SEEMS TO BE COMPLETELY AT SEA. HOWEVER, THIEU IS LABORING UNDER SEVERAL HANDICAPS. FOR EXAMPLE, HE IS STILL SAYING IN THE PRESENCE OF MINISTERS THAT HE THINKS JOHNSON'S RENUNCIATION OF RENOMINATION IS A POLITICAL MANEUVER AND THAT JOHNSON WILL EVENTUALLY RUN FOR REELECTION. THIEU ALSO THINKS THAT JOHNSON IS A VERY SHREWD MAN WHO WILL GET THE BETTER OF THE COMMUNISTS, AND HE IS TAKING SOLACE IN THE STATEMENT THAT THE U.S. HAS NEVER LOST A WAR AND IS NOT ABOUT TO LOSE THIS ONE. ([redacted] COMMENT: SUCH THINKING IS BAD NOT BECAUSE IT SHOWS

(C)

EO 12958 3.4(b)(1)>25Yrs (C)

A LACK OF APPRECIATION OF AMERICAN POLITICAL REALITY BUT BECAUSE IT INDICATES THAT THIEU IS COUNTING HEAVILY ON SOMETHING THAT MAY NOT EVENTUATE. THIEU IS ALSO HAMPERED BY THE FACT THAT HIS STAFF IS NOT UP TO THE NEGOTIATION QUESTION.)

6. KY'S APPROACH TO THE PROBLEM HAS BEEN QUITE REALISTIC. HE HAS TOLD THIEU HE THINKS JOHNSON'S DECISION NOT TO SEEK RENOMINATION IS IRREVOCABLE, THAT JOHNSON IS LOOKING TOWARD HIS PLACE IN HISTORY WHICH HE CAN ASSURE BETTER THROUGH LEAVING THE PRESIDENCY THAN THROUGH SERVING ANOTHER FOUR YEARS, ASSUMING HE COULD WIN REELECTION. KY BELIEVES THAT THE GVN MUST FACE UP TO THE POSSIBILITY THAT THE U.S. IS DETERMINED TO EXTRICATE ITSELF FROM VIETNAM REGARDLESS OF THE COST. KY SAID HE WAS NOT SAYING THAT JOHNSON WOULD GET OUT AT ANY PRICE BUT ONLY THAT THE GVN MUST PREPARE ITSELF FOR SUCH A POSSIBILITY. HE INDICATED HIS BELIEF THAT JOHNSON MIGHT WELL BE REGARDED AS A NATIONAL HERO IF HE GETS THE U.S. OUT OF VIETNAM, NO MATTER HOW HE DOES IT. IN THAT CONNECTION, HE REPEATED SOME COMMENTS BY GVN AMBASSADOR TO WASHINGTON BUI DIEM ABOUT THE STRONG PRESSURES IN THE U.S. AGAINST A CONTINUATION OF THE WAR.

APPROVED FOR RELEASE DATE: OCT 2000

7. KY SAID IT WAS IMPORTANT THAT THE GVN DEMONSTRATE TO THE SVN PEOPLE THAT IT WAS ON TOP OF THE SITUATION AND WORKING CLOSELY

EO 12958 3.4(b)(1)>25Yrs (C)

WITH THE AMERICANS. IF THE PEOPLE GOT THE IMPRESSION THAT THE U.S. WAS GOING IT ALONE, HE CONTINUED, MOST EVERYONE WOULD THINK THAT ANOTHER 1954 GENEVA AGREEMENT WAS IMMINENT. KY SUGGESTED THAT A GVN REPRESENTATIVE GO TO GENEVA IF THAT WAS WHERE THE NEGOTIATIONS TOOK PLACE. HE EXPRESSED CONCERN, HOWEVER, THAT THE U.S. MIGHT AGREE TO HOLD THE NEGOTIATIONS AT SOME PLACE WHERE THE VIETNAMESE COULD NOT BE REPRESENTED. THIS WOULD BE BAD SINCE IT WOULD SUGGEST THAT THE VIETNAMESE WERE BEING EXCLUDED FROM DECISIONS OVER THE FUTURE OF THEIR OWN COUNTRY. THIEU SUGGESTED TO KY THAT HE MIGHT SEND BUI DIEM TO GENEVA. ([redacted] COMMENT: THIEU PROBABLY WOULD LIKE TO RID HIMSELF OF DIEM'S PRESENCE.)

EO 12958 3.4(b)(1)>25Yrs (C)

8. ONE GOOD THING TO COME OUT OF THE PRESENT DEVELOPMENTS IS THAT ALTHOUGH THIEU AND KY MAY NOT BE UNITED, THEY ARE WORKING MORE CLOSELY TOGETHER THAN EVER BEFORE. KY HAS BEEN EMPHASIZING TO HIS FOLLOWERS THAT "THEY" MUST GIVE HIM AS MUCH PRESTIGE AND EXCELLENT COUNSEL AS THEY CAN. WITHOUT THIEU, ACCORDING TO KY, A WEAK GVN HAND WILL BE EVEN WEAKER. THIEU SEEMS TO BE COMING AROUND SOMEWHAT AND LOWERING HIS GUARD, BUT NOT AS MUCH AS HE SHOULD.

APPROVED FOR RELEASE DATE: OCT 2000

9. EVERYONE AT THE PALACE ON 4 APRIL SEEMED TO AGREE THAT WHAT THE GVN DID AND SAID DURING THE NEXT TEN DAYS WOULD

EO 12958 3.4(b)(1)>25Yrs (C)

BE VERY IMPORTANT. THE VIET CONG (VC) CAN BE EXPECTED TO TAKE FULL ADVANTAGE OF THE SITUATION TO SOW DOUBT AND DISCORD AMONG THE PEOPLE. A MATTER OF CONCERN IS THE FACT THAT IT IS FAIRLY EASY TO GET A BAND-WAGON MOVEMENT ROLLING AMONG THE VIETNAMESE, AND THE VC WILL BE TRYING TO DO JUST THAT, I.E., TO MAKE THE POINT THAT THE WAR IS OVER, THAT THE U.S./GVN HAS LOST AND THAT THE VC WILL SOON BE TAKING OVER. IF SUCH A FEELING SHOULD BECOME WIDESPREAD, IT WILL BECOME VIRTUALLY IMPOSSIBLE FOR THE GVN TO FUNCTION. THE CHIEU HOI (OPENS ARMS) PROGRAM WILL END, THE REVOLUTIONARY DEVELOPMENT PROGRAM WILL GO OUT OF EXISTENCE, THE NASCENT SELF-DEFENSE MOVEMENT WILL BE A THING OF THE PAST, ETC.

10. TO SUM UP, THIEU AND KY HAVE NOT PANICKED AND SEEM TO BE VIEWING THE SITUATION AS CALMLY AS CAN BE EXPECTED. EVEN DIRECTOR GENERAL OF NATIONAL POLICE BRIGADIER GENERAL NGUYEN NGOC LOAN HAS SAID CALMLY THAT HE IS WILLING TO DO WHATEVER THIEU AND KY DECIDE HE SHOULD DO AND THAT HE IS WILLING TO GIVE THIEU AN IRONCLAD GUARANTEE THAT HE WILL NOT CAUSE THIEU ANY PROBLEMS DURING THESE CRITICAL TIMES. TO DO SO WOULD BE HIGHLY UNPATRIOTIC, AND LOAN SEES HIMSELF FIRST AND FOREMOST A PATRIOT. HOWEVER, DESPITE A LACK OF PANIC AT THE TOP, THERE IS WIDESPREAD CONCERN AND NEAR PANIC

SUBJECT PRESIDENT THIEU'S VIEWS ON PROBABLE NORTH VIETNAMESE DEMANDS DURING FORTHCOMING PEACE TALKS

3.4(b)(1) c

ACQ VIETNAM, SAIGON (6 APRIL 1968) FIELD NO. [redacted]

SOURCE [redacted]

3.4(b)(1) c

SUMMARY: PRESIDENT THIEU [redacted]

3.4(b)(6) c

EXPECTS HANOI TO MAKE TWO DEMANDS DURING THE FORTHCOMING PEACE TALKS THAT WILL BE UNACCEPTABLE TO HIM: (1) THAT THE GOVERNMENT OF VIETNAM (GVN) NEGOTIATE DIRECTLY WITH THE NATIONAL LIBERATION FRONT (NFLSV) AND (2) THAT THE GVN FORM A GENUINE COALITION WITH THE NFLSV. THIEU CONSIDERS IT ESSENTIAL THAT S-E-C-R [redacted]

Approved for Release
Date AUG 1999

THE OPENING OF PEACE TALKS SHALL NOT LEAD TO A DIMINUTION OF U.S. AID AND THAT THE GVN EXERT EVERY EFFORT TO KEEP THE U.S. GOVERNMENT FROM SEPARATING THE QUESTION OF A BOMBING HALT FROM THAT OF A TREATY TO END THE WAR IN SOUTH VIETNAM. THIEU SAID HE WAS SERIOUSLY CONSIDERING DECLARING A GENERAL MOBILIZATION. [redacted] BRIEFED THIEU ON A NEW INTERMINISTERIAL COUNCIL CHARGED WITH STUDYING WAYS OF MAINTAINING GVN AUTHORITY IN THE EVENT OF ANOTHER EMERGENCY SIMILAR TO THE VIET CONG TET OFFENSIVE. END SUMMARY.

1. [redacted] PRESIDENT NGUYEN VAN THIEU [redacted] 3.4(b)(1) c [redacted] EXPECTS THE NORTH VIETNAMESE GOVERNMENT (DRV) TO MAKE TWO DEMANDS OF THE AMERICANS DURING FORTHCOMING PEACE NEGOTIATIONS WHICH THIEU WILL BE UNABLE TO ACCEPT. FIRST, THIEU EXPECTS HANOI TO REJECT DIRECT NEGOTIATIONS WITH THE SOUTH VIETNAMESE GOVERNMENT (GVN) AND TO INSIST THAT THE GVN NEGOTIATE WITH THE NATIONAL FRONT FOR THE LIBERATION OF SOUTH VIETNAM (NFLSV). THIEU SAID THAT WHILE THE GVN IS WILLING TO MEET ANYWHERE WITH DRV REPRESENTATIVES, IT WILL NOT NEGOTIATE

S-E-C-R-E-T [redacted]

WITH THE NFLSV. ALSO, THIEU THINKS HANOI WILL INSIST ON A GENUINE COALITION GOVERNMENT FOR SOUTH VIETNAM (SVN), INCLUDING THE NFLSV. THIEU SAID THAT NO SENIOR MEMBER OF THE PRESENT MILITARY OR GOVERNMENT ESTABLISHMENT IS WILLING TO ACCEPT A COALITION GOVERNMENT.

2. THIEU MENTIONED A NUMBER OF OTHER PRIORITIES TO WHICH HE WAS ADDRESSING HIS ATTENTION. HE SAID IT WAS MOST IMPORTANT THAT THE OPENING OF PEACE TALKS SHOULD NOT LEAD TO ANY DIMINUTION OF AMERICAN MILITARY OR ECONOMIC ASSISTANCE, SINCE THIS AID WAS FUNDAMENTAL TO THE SURVIVAL OF THE PRESENT VIETNAMESE GOVERNMENT. HE SAID THAT THE GVN SHOULD ALSO EXERT EVERY EFFORT TO KEEP THE UNITED STATES GOVERNMENT (USG) FROM SEPARATING THE QUESTION OF A BOMBING HALT IN NORTH VIETNAM FROM THAT OF A JUST PEACE TREATY ENDING THE WAR IN SVN. EVEN WITHOUT A BOMBING HALT, TALKS COULD LAST A LONG TIME. WITH A BOMBING HALT, THEY WOULD PROBABLY LAST EVEN LONGER. DURING THIS PERIOD THE DRV NOT ONLY WILL STRENGTHEN ITS MILITARY FORCES BUT IT WILL INFILTRATE MANY POLITICAL CADRES INTO THE SOUTH. IF NEGOTIATIONS ABORT, THE GVN WILL BE FACED WITH A MUCH MORE DIFFICULT SITUATION SINCE THE COMMUNIST POLITICAL CADRES WILL

BE WORKING HARD TO WEAKEN POPULAR RESISTANCE. THUS, A BOMBING HALT SHOULD BE CLOSELY RELATED TO A SETTLEMENT IN THE SOUTH.

3. THIEU SAID HE HAS BEEN GIVING SERIOUS CONSIDERATION TO DECLARING A GENERAL MOBILIZATION AS AN INDICATION OF GVN DETERMINATION. THE PRESIDENT ALSO SAID HE WAS SINCERE WHEN HE DECLARED THAT IT PROBABLY WOULD BE POSSIBLE FOR THE ALLIES TO REMOVE SOME OF THEIR TROOPS BY THE END OF 1968. HE THOUGHT AT LEAST "SEVERAL BATTALIONS" SHOULD BE PHASED OUT BY THAT TIME AS A TOKEN INDICATION OF GVN DETERMINATION TO PLAY A LARGER ROLE IN ITS OWN DEFENSE.

4. [redacted] THE NEW INTERMINISTERIAL COUNCIL [redacted] CONSISTS OF THE MINISTERS OF INTERIOR, CHIEU HOI (OPEN ARMS) VETERANS, AND A REPRESENTATIVE OF THE OFFICE OF THE PRESIDENCY, AMONG OTHERS. THE COMMITTEE IS CHARGED WITH STUDYING WAYS OF MAINTAINING GOVERNMENT AUTHORITY IN THE EVENT OF ANOTHER EMERGENCY SIMILAR TO THE ENEMY'S TET TRUCE ATTACKS. IT IS ALSO STUDYING WAYS TO COORDINATE THE GOVERNMENT'S POLITICAL-WARFARE PROGRAM NOW SCATTERED AMONG SEVERAL MINISTRIES AND THE ARMED FORCES. [redacted] THE COMMITTEE HAD ALREADY AGREED

ON THREE POINTS:

A. THE GVN MUST AKE ADVANTAGE OF ITS PRESENT INCREASED MORAL POSITION IN THE FORUM OF WORLD PUBLIC OPINION. SINCE THE GVN CANNOT BE SEPARATED FROM THE USG IN THE BOMBING HALT AND IN THE INITIATIVES FOR PEACE NEGOTIATIONS, IT BENEFITS FROM THE IMPROVED MORAL POSITION OF THE USG RESULTING FROM THESE MEASURES.

B. THE GVN MUST DEVISE WAYS TO KEEP UP THE "FIGHTING SPIRIT" OF THE PEOPLE DURING PEACE TALKS. IF THE VIETNAMESE PEOPLE CONCENTRATE ONLY ON THE HOPE OF PEACE AND FORGET THE REASONS WHY THE GVN IS FIGHTING THE WAR AND IF NEGOTIATIONS DO NOT LEAD TO PEACE, IT WILL BE DIFFICULT TO RECAPTURE THE SPIRIT OF THE PEOPLE.

C. ALL STEPS POSSIBLE MUST BE TAKEN TO CONVINCE THE PEOPLE OF THE NORTH THAT THEY MUST COMPEL THEIR GOVERNMENT TO ARRIVE AT A SETTLEMENT OF THE CONFLICT. THIS WILL INVOLVE PRIMARILY THE DROPPING OF LEAFLETS OVER NORTH VIETNAM AND OTHER MEANS TO AFFECT PUBLIC OPINION THERE. [redacted]

5. FIELD DISSEM: STATE USMACV 7TH AIR FORCE DIR/JUSPAO (MR. NICKEL ONLY) CINCPAC PACFLT ARPAC PACAF.

MEMORANDUM FOR THE DIRECTOR

SUBJECT: Speculation on Hanoi's Motives

1. Consistent with its past reactions, Hanoi might have been expected to reject President Johnson's initiative or any other move short of an "unconditional" cessation of bombing. Or it could have stalled for a time, while testing various international currents, and perhaps sounding out its Allies in Moscow and Peking. Instead, Hanoi moved quickly and invented a new stage called "contacts" with the US.

2. Assuming that such contacts are actually intended, several different interpretations are possible for a move of this significance. These rest on alternative appraisals of the total situation which Hanoi may be making. The basic factors which would enter into such appraisals would be the course and prospects of military

Approved for Release
Date AUG 1990

GROUP 1
Excluded from automatic downgrading and declassification

action, the viability of the GVN/ARVN under continued pressure, and the effects of election year political currents on the US will to continue the struggle.

3. In theory, Hanoi's appraisal of the situation could range from high confidence through uncertainty to near desperation. In the following paragraphs we consider each of these cases in turn.

CASE I. Hanoi's Appraisal is Highly Optimistic

4. This hypothesis rests on a judgment by Hanoi that the military-political results obtained since Tet and those in prospect in the near future are turning the balance of the struggle in its favor. Hanoi has always said that at such a stage it would be correct to begin talking while still fighting. The fight-talk tactic has been portrayed as a forward move to exploit major military and political successes and leading to the final resolution of the conflict on Communist terms. What could not be known by Hanoi was when the most propitious moment would arise to employ this tactical line; there is considerable evidence suggesting that it believed 1968 would be the "decisive" year, and that it expected the Tet offensive to contribute greatly to this result.

5. The North Vietnamese could read the President's statement as confirming that a decisive stage had, indeed, arrived. They could interpret his decision not to stand for re-election as an admission of failure for his policy in Vietnam, just as they claimed that General Westmoreland's departure indicated a "comprehensive defeat" for his military strategy. They could believe the failure to send large reinforcements to South Vietnam vindicated their predictions that US international commitments plus domestic pressures would eventually limit the US buildup. And they could view the bombing restriction as a concession forced by increasing domestic pressures for peace in Vietnam.

6. The experience of the North Vietnamese leaders in 1953-54 would strongly incline them to such interpretations of American political developments. Even if the Tet offensive fell well short of its hopes, Hanoi would still regard its position as quite strong and Saigon's position as significantly weakened. They would expect negotiations to accelerate the decline of the GVN and exacerbate US-GVN tensions. And they would believe that continued and perhaps intensified military pressures would strengthen Hanoi's bargaining position vis-a-vis the United States. Thus, the confluence of events in South Vietnam and the United States could be regarded as having created optimum conditions for beginning the

"fight-talk" phase. Hanoi was able, with little time lost in deliberation, to move in the direction already anticipated by its basic strategy.

CASE II -- Hanoi's Appraisal is Uncertain

7. An alternative explanation would be that Hanoi is not entirely confident of its overall position and foresees a long and increasingly costly struggle. While able to endure this, it would prefer not to do so and the President's initiative offered an opportunity -- though not an ideal one -- to give greater emphasis to the political aspects of the struggle. Even if Hanoi believed the US position was weakened and Saigon shaky, it would also recognize the risk of escalation if the President's move had been totally rejected. Hanoi might calculate that by removing himself as a candidate the President was in a better position to adopt new military measures against North Vietnam if necessary. Added to these risks, Hanoi might have seen a certain loss in failing to respond when international reaction to the US move was generally favorable.

8. Under this hypothesis, Hanoi would still have some expectation of being able to combine the talks with fighting in such a way as to force a favorable settlement. They would recognize that

both sides would be under certain pressures not to allow a complete breakdown in the discussions. They would also recognize that some further concessions would probably have to be made to gain a complete cessation of the bombing; and though their forces would still be capable of further military successes, these would not likely be decisive in bringing about the collapse of the GVN/ARVN.

9. Nevertheless, Hanoi would still see advantages to opening discussions with the US. The bombing restrictions would be prolonged, at least for a while. Saigon would be more and more apprehensive about a secret deal at its expense. In this atmosphere even local military success might have a strong psychological impact on the Allied side. The pressures for continuing the talks would probably be greater on the US then Hanoi. And if, in the end, the talks failed, Hanoi would at least be no worse off.

CASE III - Hanoi's Appraisal is Pessimistic

10. A third alternative is that the North Vietnamese view the overall balance of forces as distinctly unfavorable and are more or less compelled to settle on whatever terms can be negotiated. The results of the Tet offensive might have forced a reappraisal of their military capabilities, leading to the

conclusion that the strains of the war were too great and the prospects of success too doubtful. Though physically capable of further fighting, it is conceivable that they have concluded that another round of attacks would almost surely fail, would be devastating to morale and raw capabilities and might force them to end the war on highly unfavorable terms or fade away, or call on the Chinese to help. On the other hand, a failure to deliver the promised "second wave" would be encouraging to the GVN and the US. The President's statement provided a way out. As long as Communist forces remained intact, negotiations might still hold some prospect of salvaging the Front as a legitimate political instrument and causing an eventual American withdrawal.

CASE IV -- Other Contingencies

11. A final explanation is that there has been some dramatic change in Hanoi. For example, the North Vietnamese populace could be far more restive than we can determine. This of course might prompt concessions to end the bombing, if not the war. Or it could be that there has been a change in the top leadership itself. There has always been the chance of a struggle to succeed Ho Chi Minh. Hanoi's quick move to establish contact with the US could thus be a move in an internal contest or even the first act

of a new and more flexible political leadership. While such a change in command would not in itself have to lead to a change in basic policy, it could explain a shift in tactics.

Conclusion

12. Among the alternative explanations suggested above, our current evidence suggests that the truth lies somewhere between Case I and Case II. This would mean that Hanoi considers that it can register further military successes at costs it can afford to bear even if it would prefer not to, that it believes the will to persist is beginning to crumble on the US/GVN side, and that hard bargaining combined with continued military pressure can bring a favorable outcome eventually.

13. If our interpretation is generally correct, then it is probable that Hanoi had for some time been preparing to make a diplomatic initiative -- that the President's statement merely offered an unexpectedly hopeful opportunity to get on with a policy already substantially determined. This is not to say that Hanoi's position in meetings will be conciliatory; on the contrary its representative will probably take a hard line,

demanding an unconditional halt to all bombing and reconnaissance over North Vietnam. We do believe, however, that Hanoi probably wants to talk, and that it will not seek pretexts to back away from establishing contact with the US.

INTELLIGENCE WARNING OF THE TET OFFENSIVE IN SOUTH VIETNAM

(Interim Report)

A. Procedures

1. A working group has been formed under the chairmanship of R. J. Smith, on which CIA, DIA, INR, NSA, and the Joint Staff are represented. This group has compiled dossiers on the raw intelligence informa- and intelligence summaries and judgments received in various US headquarters before Tet, with emphasis on the period 15-30 January 1968, and on the finished intelligence disseminated to senior officers of the government as a result.

2. Representatives of the group from CIA, DIA, and the Joint Staff visited Vietnam from 16 to 23 March. They were joined there by observers from CINCPAC, MACV, and the CIA station in Saigon. In addition to collecting a large quantity of pertinent documents, the delegation received briefings and conducted interviews, both in Saigon and the field, with many senior officials, US and Vietnamese. On the US side, members of the delegation talked to Ambassador Bunker, General Westmoreland, General Abrams, Ambassador Komer, Lt. General Cushman, Lt. General Rosson, Maj. General Peers, Maj. General Eckhardt, and the commanding generals of 1st Marine Division and 4th Infantry Division. They also interviewed the G-2s of I and II Field Forces and the G-2 of III Marine Amphibious Force, and the G-2 advisers and the CIA Regional officers in all four Corps Tactical Zones (CTZs). They were briefed extensively by MACV J-2 and by the CIA station in Saigon, and contacted the Director of Intelligence, Seventh Air Force, NSA Representative Vietnam, and the Army Headquarters Area Command in Saigon. On the Vietnamese side, they interviewed the commanding generals of I and II Corps, J-2 of the Joint General Staff and his deputy, and the deputy director of National Police. In the course of these discussions members of the group visited Phu Bai, Da Nang, Pleiku, Camp Enari, Nha Trang, Bien Hoa, Long Binh, and Can Tho.

3.4(b)(1)

1.5(c)
3.4(b)(1)

B. General Findings

3. As the DCI informed the President's Foreign Intelligence Advisory Board in February, there was evidence, both in Saigon and in Washington, that the enemy was engaging in his much-advertised "winter-spring campaign" and was preparing for a series of coordinated attacks, probably on a larger scale than ever before. There was evidence in January that some attacks in the highlands might be conducted during the Tet holiday. In the latter part of the month it was evident that other attacks were imminent, and some of the targets had been identified. Both in Saigon and in Washington this intelligence was communicated to senior military and political officers. As a result, a series of actions were taken in Vietnam which reduced the impact of the enemy offensive.

4. The warning thus provided represents no small achievement for the US intelligence apparatus in Vietnam. It has no high-level clandestine penetrations of the Communist hierarchy and high-level Communist communications are for the most part unreadable. It must therefore rely on classic indications techniques. This is difficult under any circumstances. The intelligence organization itself, military and civil, US and Vietnamese, is complex and the volume of material it handles is large. Thus, the recognition of significant reports from human sources through the blare of background noise presents a major problem. Moreover, the very nature of the war leads to the "crying wolf" syndrome. We have little doubt that at some level of the intelligence apparatus low-level reports could be found forecasting many of the attacks made at Tet; we have equally little doubt that similar reports could be found alluding to attacks on many other cities and on many other dates.

5. The enemy took great pains to conceal his intentions. Knowledge of his plans was fully compartmented and the actual attack order was disseminated to attacking units only in the final 24 to 72 hours. Although US and Vietnamese authorities received some reports of individual attack plans, probably no Communist officer below the

1.5(c)
3.4(b)(1)

1.5(c)
3.4(b)(1)

level of COSVN, front, or military region was aware of the full scope of the offensive. General Westmoreland believes the Communists sacrificed coordination for security, and this is evident in the premature attacks by units of Military Region 5 (MR 5) on the night of 29-30 January, attacks which served to alert the US command to the much more extensive attacks on the following night.

6. Despite enemy security measures, communications intelligence was able to provide clear warning that attacks, probably on a larger scale than ever before, were in the offing. Considerable numbers of medium- and low-grade enciphered enemy messages were read. These messages appeared in many areas of South Vietnam. They included references to impending attacks, more widespread and numerous than seen before. Moreover, they indicated a sense of urgency, along with an emphasis on thorough planning and secrecy not previously seen in such communications. These messages, taken with such nontextual indicators as increased message volumes and radio direction finding, served both to validate information from other sources in the hands of local authorities and to provide warning to senior officials. The indicators, however, were not sufficient to predict the exact timing of the attack.

C. Impact of the Enemy Offensive

7. Although warning had thus been provided, the intensity, coordination, and timing of the enemy attack were not fully anticipated. Ambassador Bunker and General Westmoreland attest to this. The most important factor was timing. Few US or GVN officials believed the enemy would attack during Tet, nor did the Vietnamese public. There was good reason for this: Tet symbolizes the solidarity of the Vietnamese people. It is the most important holiday in Vietnam, an occasion observed by all members of every family whether they are Buddhist, Christian, or Communist. The Communists evidently believed they could exploit this solidarity to produce an antigovernment, antiforeign, antiwar uprising. This did not take place. The enemy therefore paid a price in the antagonisms he generated among the urban population,

1.5(c)
3.4(b)(1)

but he gained enormously in two ways: The GVN's army and police were generally far below their usual state of readiness, and the precedent of Tet made it possible for large numbers of VC to enter the cities without causing alarm. General Westmoreland expected heavy attacks either just before or just after Tet, and as Tet approached and major attacks had not materialized, the Vietnamese Joint General Staff had authorized 50 percent leaves. Evidence to upset this general belief did not come to hand until 24 hours or so before the attacks were launched, the most important being the premature initiatives in MR-5. The latter brought the intelligence already available into sharp focus and provided the missing element of timing. In the short time available, US and ARVN units could be alerted and were, but ARVN performance was reduced in many areas by Tet leaves.

8. A second major unexpected element was the number of simultaneous attacks mounted. US intelligence had given the enemy a capability of attacking virtually all of the points which he did in fact attack and of mounting coordinated attacks in a number of areas. He was not, however, granted a specific capability for coordinated attacks in all areas at once. More important, the nature of the targets was not anticipated. Washington and Saigon expected attacks on some cities, but they did not expect the offensive to have the cities, the civilian command and control centers, radio stations and police headquarters as primary objectives. Finally, the quantity of new, modern weapons in the hands of Main and Local Force Viet Cong who engaged in the attacks was higher than expected. The AK-47 rifle and RPG-7 antitank grenade were particularly effective against ARVN units and the Regional and Popular Forces.

9. Underlying these specific problems was a more basic one: most commanders and intelligence officers, at all levels, did not visualize the enemy as capable of accomplishing his stated goals as they appeared in propaganda and in captured documents. Prevailing estimates of attrition, infiltration, and local recruitment, reports of low morale,

1.5(c)
3.4(b)(1)

1.5(c)
3.4(b)(1)

and a long series of defeats had degraded our image of the enemy. The general picture presented was an enemy unable to conduct an offensive of such scope and intensity. Commanders and intelligence officers saw his generalized calls for a "general uprising" as merely exhortatory, and not as a blueprint for what was to follow. Moreover, in the past many "great offensives" had blossomed in Communist propaganda but had not materialized on the ground.

D. Response to Warnings

10. Nevertheless, Washington and Saigon were, as stated earlier, fully aware that the enemy planned a major offensive, probably coordinated attacks in northern I CTZ, at Dak To in the highlands of II CTZ, and toward Saigon from virtually all sides in III CTZ. As early as 10 January, General Westmoreland had canceled certain planned operations in northern III CTZ in order to reposition US forces nearer to Saigon. In subsequent days he issued a series of warnings to his commanders, and to the US Mission, that the enemy was preparing to attack. Although he had not originally expected attacks during Tet, he recognized the significance of the premature attacks in MR 5 and on 30 January notified all his commanders to expect attacks that night. As a result all US units were fully alerted, although in most cases they did not have time or information to take offensive measures against the enemy prior to the actual attack. All Seventh Air Force bases were put on a maximum state of alert, and the 7th AF Director of Intelligence testifies that this step "saved Tan Son Nhut." Perhaps the best evidence that COMUSMACV's measures were effective and that the enemy's strategic intelligence was faulty is that, with the exception of Hue, the enemy failed to hold any of his major military objectives for a significant period of time.

11. The urgency felt in Saigon was not, however, fully felt in Washington in the immediate pre-attack period. As a result, finished intelligence disseminated in Washington did not contain the atmosphere of crisis present in Saigon. We do not believe this represents a failure on anyone's part. The information available

1.5(c)
3.4(b)(1)

1.5(c)
3.4(b)(1)

was transmitted and duly analyzed, but atmosphere is not readily passed over a teletype circuit. Although senior officials in Washington received warnings in the period 25-30 January, they did not receive the full sense of immediacy and intensity which was present in Saigon. On the other hand, with Saigon alerted, virtually nothing further could be done in Washington that late in the game which could affect the outcome.

12. Within this general picture, there were significant differences among the four corps areas. III MAF expected assaults on Khe Sanh and Quang Tri. It had received from a local CIA operation the enemy attack plan for Da Nang, but not the date. General Cushman stated that he expected to be attacked during Tet, and enemy activities in northern I CTZ had prompted higher authority to cancel the Tet truce in I CTZ. As a result both US and Vietnamese forces were better prepared here than elsewhere. Most Vietnamese units were at nearly full strength. The extent and coordination of the enemy's attacks, considerably exceeded expectations, as did his tenaciously held lodgement in Hue. In general, however, his assaults were easily thrown back.

13. In II CTZ, allied forces in the coastal lowlands were for the most part attacked on the night of 29-30 January by MR 5 units. They did not have the advantage of forewarning which these attacks provided units farther south, nor were they in the "alert" posture of Allied forces in I Corps. The Allied forces were on a higher than normal state of alert, which was, however, directed against the inevitable cease-fire violations rather than attacks on the cities. In the highlands, singularly unlike any other area, intelligence was available from communications intelligence, prisoners, and documents reflecting specific plans for attacks during Tet. For instance, Communist plans for attacking Dak To, Pleiku, and Kontum were known well in advance, and the US 4th Division was able to correlate them with enemy deployments. This provided one of the few opportunities for US forces to take active measures against the enemy; Pleiku was the most successful US operation of the offensive. Elsewhere in the highlands intelligence was not as good, but there was enough information to lead two of the three ARVN division commanders in II CTZ to cancel all leaves on their

1.5(c)
3.4(b)(1)

1.5(c)
3.4(b)(1)

own initiative. We do not believe, however, that these orders were totally effective in recovering personnel who had already departed.

14. It has been noted above that US redeployments in III Corps began before mid-January. These movements were triggered by the concentration of three enemy divisions along the Cambodian border north and northwest of Saigon and by indications that these units were beginning to deploy southward toward the city. In addition, US and ARVN intelligence officers had earlier deduced from a reorganization of the enemy command structure in MR 4, which surrounds the Saigon area, that its purpose was to improve command and control for the coordination of an attack on that city. III Corps and II Field Force were put on a general alert on 30 January (General Westmoreland's actions resulting from the attacks in MR 5 the previous night), and during the course of the day began to receive more specific information that Saigon was to be attacked that night. In most ARVN units in III Corps the troops appear to have been in their normal Tet condition.

15. In IV CTZ, the nature and extent of the enemy's attacks were almost totally unexpected. Allied forces were aware that Viet Cong capabilities had improved. An NSA report of 25 January, which warned of the possibility of impending attacks in other areas, noted that units in the "Nam Bo area," which includes the Delta, might also be involved. The supply of modern weapons had increased and the VC had shown an ability to conduct a series of coordinated attacks throughout the Delta. To some degree however, this could be interpreted as reactions to a more aggressive allied posture in the area. In the Delta cities the presence of the VC during Tet was so traditional as to be accepted as routine. General Eckhardt, Senior Adviser, stated that the only warning he received was General Westmoreland's alerting message of 30 January. General Eckhardt was able to alert the US support and logistic units in the Delta, but was unable in the time available to restore the readiness of ARVN units. The ARVN Corps commander and his three division commanders were present at their headquarters when the offensive struck, but their units were far below strength.

1.5(c)
3.4(b)(1)

1.5(c)
3.4(b)(1)

E. Responses to Specific Questions

16. The preceding paragraphs have been responsive to General Taylor's questions a, b, f, and g. Our preliminary findings on questions c, d, and e are as follows:

c. (Provision of information by civilians

Prior to the offensive there were very few cases of civilians volunteering information on the impending attacks. This is not necessarily, however, a measure of the degree of civilian cooperation with the regime. The enemy's security measures, his rapid deployments through territory much of which was under his control, and the basic difficulty of rapid communication from countryside to city would have prevented friendly villages from passing warnings in many cases. As noted above the presence of infiltrators in the cities was unremarkable during Tet. During the Tet fighting, and since, there has been a marked increase in information volunteered from the populace.

d. (Exchange of information)

Given the size and complexity of the US and Vietnamese intelligence systems, we found cooperation and exchange in this case to be remarkably good. No case was reported to us of the deliberate withholding of significant warning information by one agency from another. With the mass of intelligence information acquired in Vietnam every day, there was inevitably some human error. Not all low-level reports got to everyone they should have. There is no evidence, however, that these minor shortcomings affected the general intelligence picture.

e. (Identification of units)

Most of the units engaged in the offensive have been identified. In general, there was a close correlation between US order-of-battle holdings in a given area prior to the attacks and the units identified in the attacks, although not all units deployed in any given area were actually committed in most cases, and some new provisional units were identified in the attacks. As noted above, the enemy's facade of

1.5(c)
3.4(b)(1)

a "general uprising" required him to attack with his Viet Cong units wherever possible. Especially in III and IV CTZs he held back many Main Force and most NVN units for follow-up. Because of the failure of the initial attacks, in all but a few instances a follow-up never came.

the seige of the Indian embassy in Peking on the 17th further strained relations. Sporadic demonstrations against the Indian embassy occurred, but by 1 October following the border clash, they were limited in scope.

The prospect seems to be for sporadic small-scale patrol clashes at various points on the border, for government-to-government political abuse, and for sustained Chinese support for Naga guerrillas and the new extremists of the Indian Communist movement. They will insist on complete support from any Indian Communist who is willing to be pro-Peking. By their action in firefights during September 1967 on the Sikkim-Tibet border, the Chinese have discarded the earlier policy contained in the pledge they had made to "first of all inform all the Colombo conference countries" before taking military action against Indian forces. (People's Daily article of 13 October 1963)

B. Old Enemies

1. Thailand

Chou En-lai had invited Thailand's representatives at the Bandung conference in April 1955 to visit Peking, and in this way he initiated the effort to move Bangkok to loosen its ties with SEATO and Washington. (Chou's invitation is referred to in his foreign policy report of 30 July 1955) At the same conference, Chen Yi worked with him and tried to mollify Foreign Minister Prince Wan (Chen interview of 28 July 1958) As a result, some Thais visited Peking and some trade developed, until it was restricted by Thai-imposed import controls in early 1959. Chou and Chen attained very little in all their efforts, the main difficulty for them having been the fact that Bangkok, with no experience of Western colonial domination to make its leaders anti-Western in attitude, preferred a strong assertive alignment with the U.S. and an assertive opposition to Communism in Southeast Asia. They openly rejected a policy of accommodation with Peking and Hanoi.

NND 941536 --- 3605

Failure to move the Thais away from their close relationship with the U.S. and toward a neutral foreign policy position and the increased presence of the U.S. in Thailand impelled the Chinese leaders to drop their restraint and to begin to denounce Bangkok for its attitude of supporting anti-Communist efforts in the area. In mid-1962, Chen Yi referred to the authorities in Bangkok as "reactionary," and stated that the country was a "bridgehead for invading Laos" (speech of 12 July 1962). Regarding the war in Vietnam, they viewed Thai support of the South Vietnamese and American effort as sufficiently important to require warnings to Bangkok to cease this support or accept the consequences, namely, a subversive movement of insurgents in the Thai countryside. At some time between the central committee work conference of June 1964 and the U.S. airstrikes against North Vietnam in August 1964, the Chinese leaders apparently decided to create trouble for Bangkok by organizing all anti-government Thais, including prominent non-Communists, into a united front of political and military opponents. This action probably reflected a decision to discard the 1954-1964 policy of non-support, or low-key support, for Bangkok's internal enemies. According to Thai security services reports, in late summer of 1964, Communist-led insurgent activities (assasinations of police informants and propaganda attacks on the government) had increased considerably. As organizational activities moved forward among Thai insurgents, the Chinese leaders began to enlist the active support of prominent political figures, the most prominent having been sheltered in Canton. On 19 September 1964, the son of Pridi Banonmyong, the former Prime Minister, reported that "recently" the Chinese had permitted (or encouraged) leaders of the "patriotic movement" in Thailand to visit Pridi in his Canton sanctuary. These leaders apparently tried to induce Pridi to directly associate his name with their group in an effort to gain some support among non-Communist Thai political figures. Pridi apparently did not agree; further, he did not agree to any association with Thai Communists on the mainland or in Thailand.

Nevertheless, the Chinese continued on their course; on 13 December 1964, NCNA rebroadcast a manifesto issued

NND 941536 --- 3607

by the Independence Movement of Thailand (said to have been founded on 1 November and originally reported in the clandestine radio broadcast of the Voice of the People of Thailand on 8 December), declaring as policy the expulsion of U.S. personnel from Thailand and the "overthrow" of the Thanom government. The manifesto stated that the Independence group was willing "to cooperate" with "any" individuals or organization who were "patriotic" --i.e., anti-government--and in this usage it was similar to the greetings sent to the PRC on 1 October by the Communist Party of Thailand (CPT). U.S. officials in Hong Kong noted this similarity and also commented that Thai was among the first three foreign languages to be studied in Peking's new (established on 5 September 1964) Foreign Language Institute. By January 1965, the Thai Patriotic Front was launched as the second anti-government organization which was "willing to cooperate with all compatriots... who love peace and democracy." (Voice of the People of Thailand broadcast of 23 January 1965 reporting the formation of the Front on 1 January) Both organizations were given wide and unprecedented coverage by Peking and Hanoi media, suggesting the primary role of these Communist capitols in organizing and supporting the subversives.

Activation of the Thai insurgent and subversive movement was one of the ways the Chinese had decided to react to increased U.S. involvement in Vietnam. Chen Yi had stated to the French ambassador in January 1965 that guerrilla warfare might "spread" to Thailand in 1965, and Chen apparently was making a statement of intent. Prime Minister Thanom declared on 19 January that the Chinese had already sent agents into Thailand and were financing them partly through funds made available in Thai currency in Hong Kong banks. By March 1965, Communist insurgent activity in northeastern Thailand was reported to be well organized and in the same month, Communist-led Independent Movement personnel were circulating propaganda tracts in Bangkok. The "liaison representative" of the Independence Movement, a Thai, reported that he had arrived in Peking on 24 March, had been provided broadcasting facilities, and then denounced the Thai government for permitting the country to be used as a base for attacks on North Vietnam ("neighboring countries"). Peking broadcasts in the Thai

NND 941536 ---3608

language intensified by May 1965 and the People's Daily on 30 July 1965 attacked Bangkok authorities for "playing the role of an accomplice of the U.S."

Direct Chinese participation has centered on training of Thai cadres and financing political and military operations. Thai cadres captured in December 1965 told Thai authorities that they had received two months training in Peking sponsored by the Thai front organization but conducted by Chinese instructors. A course in subversion and guerrilla warfare was conducted in Peking for a single Thai student in May 1965, and the reported route for trainees to travel to and from the mainland was either through Laos or by way of Hong Kong-Macao. A Sino-Thai, who had received training in Peking for one month in the spring of 1965 at a "tutorial" course conducted by three PLA officers, reported that building a "people's army in Thailand" was one of the main subjects; another was the strategy and tactics of Mao's guerrilla warfare doctrine. Another student reported in a letter from Peking (10 April 1965) that he was being instructed on the matter of accelerating the process of "world revolution," and he affirmed in this context that "An army capable of carrying out the revolutionary struggle has been formed in Thailand." By mid-1965, Communist-led insurgents and "patriotic" figures in Thailand were working actively along the lines of Mao's prescription for a revolutionary seizure of power, namely the building of an army in isolated territorial base areas and the organization of Communists and non-Communists in a broad united front in order to wage a protracted military and political war against the central government.*

*Thai Front leaders in Peking indicated to a Thai trainee in the fall of 1965 that the insurgency plan for Thailand was to (1) establish bases in the main mountain ranges which separate the country into three sections, (2) establish guerrilla training centers, one near Laos close to the route connecting Muong Sing with Yunnan Province, (3) send for PLA instructors while using Thai trainees from Peking for political indoctrination work, (4) gain control of as many remote villages as possible before the
(footnote continued on page 139)

NND 941536 --- 3609

Mao himself participated in the effort to exploit Peking-based opponents of the Bangkok government when, on the morning of 6 October 1965, he received and had "a cordial, friendly conversation" in Peking with Pridi (with the help of Liao Cheng-chih and Wu Hsiu-chuan). Pridi's son is reliably reported to have viewed this as a move by the Chinese leaders to publicly associate his father with the two Peking-sponsored Thai front movements; he said that his father refused to lend his name to either front group. He also stated that the leader of the Independence Movement was "definitely a member of the Communist Party of Thailand." He also said that his father was strongly opposed to the Chinese strategy, namely, that the best way to support the North Vietnamese was to extend the armed struggle to "Laos and Thailand."* While he referred to

(footnote continued from page 138)
government can establish strategic hamlets, and (5) ultimately expand into the urban areas, using troops recruited "from the people."

The leader of the Thailand Patriotic Front indirectly confirmed that part of this plan was being implemented: "Our compatriots' armed uprisings, which were staged in the northeastern and southern regions of Thailand and which will be followed by our compatriots in other regions, are aimed solely at waging the struggle for self-defense and at repelling U.S. imperialists and the reactionary traitors." (Peking Radio Broadcast in Thai to Thailand of 7 December 1965) (emphasis supplied)

*Sihanouk claimed that Chou En-lai and Pham Van Dong were preparing a plan "to warn" the Thai Prime Minister against involvement with U.S. operations in Vietnam, but were unable to do so only because the Thai leader did not stay in Djakarta (at the April 1965 anniversary of the Bandung conference) long enough for the plan to be implemented. (Sihanouk speech of 30 May 1965) Peking and Hanoi support for the insurgents suggests some degree of cooperation between the two Communist regimes. Reliable reports indicate that not only the Chinese and Vietnamese but also the Pathet Lao have infiltrated instructors into northeast Thailand from Laos to assist and train Thai insurgents, the latter appearing in September and October 1965 in the northeast.

NND 941536 --- 3610

three PRC organizations as responsible for subversion in Thailand--viz., the Prime Minister's Office, the CCP, and the Thai section of the Foreign Ministry--it seems that Mao has engaged his own prestige in support of the effort to use Pridi's name to attract non-Communist recruits to the front movements, which are led by CPT members.*

By the fall of 1965, the Chinese leaders were actively engaged in reviving the armed struggle policy which Mao had permitted Chou En-lai to discard.** Thai Communists, who submerged in 1952 and who had made their way to Canton and Peking, were reported in September 1965 to be back in Thailand actively organizing youth front groups. According to several sources, some Thai cadres resent the Peking-oriented leadership (which includes ethnic Chinese) for national reasons and because they do not agree with the Maoist emphasis on armed struggle. In any case, Mao's personal intervention in early October 1965 seems to have resulted in a considerable step up in Peking's public

*High-level CPT members captured in the summer of 1967 have provided more precise information on the Chinese Communist departments which have been responsible since 1950 for maintaining contacts with Thai subversives. According to their accounts, the CCP's International Liaison Department had handled relations with the CPT; within this liaison department, the Afro-Asian and Latin American Committee has handled relations with Communist front organizations such as the Thai Patriotic Front. The Staff Office for Foreign Affairs of China's State Council--an office responsive to Chou En-lai and Chen Yi--has dealt with non-Communist groups (used for Communist recruiting and propaganda purposes) such as that of Pridi Panomyong.

**The CPT's Second Congress in 1952 is said by the Chinese to have proclaimed armed struggle as "the only path" for seizing power in Thailand. However, by late 1951, Mao was under pressure from Stalin's aides to drop the concept of his road as the model for Asian Communist revolutionaries, and he complied, moving toward a more diplomatic policy centered on improving Peking's international image.

NND 941536 --- 36/1

warnings to Thailand that closer Thai-U.S. military cooperation would lead to an intensification of the "patriotic struggle" in Thailand. (People's Daily article of 7 October 1965, published one day after Mao met with Pridi) A CPT cell was informed on 10 October that the party had "now" decided to shift from defensive to offensive tactics, and by late 1965, instructors from the mainland and North Vietnam were training Thai hill tribesmen at two centers in northern Laos under Thai Communist party direction.

Liao Cheng-chih, who appeared with Mao during the Pridi interview, continued to shepherd Thai front leaders in Peking, meeting with them on 1 November 1965 on the first anniversary of the founding of the Independence Movement and probably implementing a new policy of higher level Chinese leaders to make the fronts a more compact fighting unit by uniting them.* On 1 November 1965, the Independence Movement announced that it had joined the United Patriotic Front. The first Communist insurgent attack against a government installation, indicating a switch to more aggressive tactics, was conducted by a 12-man raiding group on 21 December 1965. Liao tied the subversive Thai political effort (he remained silent on insurgent activities) to peace "in Indochina" and the world and appealed for "bigger contributions" from various political groups "in 1966." (Liao speech of 2 January 1966) However, a People's Daily article of 28 January 1966 did refer to the insurgents: the Thais have taken up arms and are determined to overthrow "the reactionary

*In October 1966, the former Lao charge in Peking, who had met with Thai front leaders on the mainland, stated that the Chinese leaders had tried to induce Pridi to become the leader of the combined organization, but he is said to have refused.

NND 941536 --- 3612

rule of the traitorous Thanom Kittikachorn government by means of people's war." This article also was unprecedented in official party and government publications because it had dropped the equivocal euphemism, "Thai authorities," and had disparaged the Thanom government specifically and in highly derogatory terms. Peking increased its public support. On 24 March 1966, Peking Radio rebroadcast a Voice of the People of Thailand report that the Thailand Patriotic Youth Organization was established on 15 February 1966; on 13 April, Liao referred publicly to the Thai "people's war" and the readiness of the Chinese people to help "at any moment;" and on 27 April, a People's Daily article praised the battles fought by "the patriotic people's armed forces of Thailand."*

The Chinese leaders were careful to indicate that increased Thai involvement in the Vietnam war would be handled by others, by a riposte to be delivered by Thai insurgents and by the Vietnamese Communists and the Pathet Lao. For example, following the 6 January 1967 announcement in Bangkok that 100 Thai troops would be sent to Vietnam, Peking (following Hanoi by an interval of five days) warned that "the peoples of Vietnam and other Indochinese states will certainly deal you resolute counterblows and the Thai people, too, will certainly rebel against you extensively and in enhanced unity." (PRC Foreign Ministry statement of 19 January 1967) Peking's reaction to the announcement that B-52s would use Thai bases was attacked in a "Brief Commentary" in People's Daily on 25 March 1967 which warned that this action "will inevitably add fuel to the flames of the armed struggle of the

*The Chinese had been helping at earlier "moments" in subtler ways without using the PLA directly, that is, by training Thai insurgents over the years. For example, interrogation reports indicate that all six of the high-ranking members of the CPT, captured in the summer of 1967, had been trained in Communist China and that the party is dominated by its Chinese members.

NND 941536 --- 3613

Thai people." The Chinese leaders' reluctance to commit the PLA to any action, while hinting that the North Vietnamese and the Pathet Lao might retaliate, was a reflection of caution and a source of embarrassment. But in subsequent comment, they still avoided saying what Peking would do in response to the enlargement of U.S. military bases in Thailand, committing the Vietnamese to "hit still harder." (People's Daily editorial of 2 April 1967)

The prospect appears to be for greater Chinese encouragement of the Thai insurgents and Thai front groups. This almost certainly will include military training and covert financing.

2. Malaysia

Malay's leaders in the 1950s had refused to recognize Peking while Communist insurgent activity continued in the countryside. Prime Minister Rahman had stated this position on 23 August 1957, eight days prior to Malayan independence, and this was repeated by his successor on 11 May 1959. Before they had granted the Malayans independence, the British refused to accept any Peking representatives in the country, as the CCP's guidance of the Communist Party of Malaya made Chinese Communist officials a direct security threat. However, the Malayans viewed the early establishment of trade relations as a secure form of contact with Peking, and by 1964, the Chinese had exported $95 million to Malaya and had imported $210,000 in commodities. As noted earlier in the section of this paper discussing Indonesia, the Chinese Communist leaders were cautious after the establishment of Malaysia as an extended country on 16 September 1963, at first avoiding any direct commitment to support Sukarno's "confrontation" policy in the hope that a relatively non-antagonistic attitude would sustain their trade relations with Kuala Lumpur and Malaysia's friends, the British.

However, the Chinese leaders significantly increased their support of Sukarno in the fall of 1964 when the Indonesian leader became more assertively anti-U.S. and after the U.S. airstrikes of August 1964 on North Vietnam. On 15 April 1965, the CCP sent a message greeting the Communist Party of Malaya (CPM) on its 35th anniversary (released

Subject: Situation in the Provinces of IV Corps as of 1300 Hours on 10 Apr. 1968

"2. [redacted] members of the VC 306th Regional main force battalion in Vinh Long province, reportedly told the people in Phouc Hau village, Chau Thanh district, that the regional main force battalions received orders not to launch any major operations until they received orders from the Central Office of South Vietnam (COSVN). This was supposedly done because of the prospects for peace negotiations.

3.4(b)(1) c

"3. The Viet Cong in Bac Lieu province have been explaining President Johnson's speech halting the bombing in North Vietnam and withdrawing from the Presidential race in the following manner according to information received from the provincial reconnaissance unit. The Viet Cong are saying that the Tet offensive demoralized the American people and lowered their confidence in the President and his government. The President, knowing this situation and realizing that he would be defeated if he sought reelection, therefore withdrew from the race. The bombing halt was announced, according to the Viet Cong, because it has proven a failure and the American people were against its continuation. The Viet Cong also state that the bombing halt will be advantageous to them because North Vietnam will be able to increase its efforts to send arms and ammunition to the South and thus make it easy to win a quick victory over the allied forces."

VIETNAM

INTRODUCTION

Hanoi propaganda repeatedly claims that Washington is "creating difficulties" in selecting a site for DRV-U.S. contacts and is thus delaying talks between the two sides. The statement by a DRV Foreign Ministry spokesman on 13 April defends the suggested sites of Phnom Penh and Warsaw and says cryptically, without naming them, that "a number of sites" suggested by the United States "are not convenient for the DRV." The foreign ministry spokesman and other propagandists complain that the present U.S. attitude on the venue for contacts is not consistent with past declarations by the President and other officials of readiness to go anywhere, any time, to talk with the DRV.

The Liberation Radio, which had broadcast the 3 April DRV Government statement, has not acknowledged the exchanges between Hanoi and Washington regarding plans for contacts between the two sides.

Peking has still not mentioned the DRV Government statement or Hanoi's initiative on contacts; however, a PEOPLE'S DAILY Commentator article on the 15th cites President Johnson's rejection of Phnom Penh as a site for "contacts between the two parties" as further proof of U.S. hypocrisy regarding peace talks.

Moscow scores the United States for rejecting Phnom Penh and Warsaw as sites for contacts with the DRV and accuses it of procrastination on talks while continuing to bomb large portions of the DRV. Unlike Hanoi, Soviet media mention some other specific possible sites, but do not acknowledge that the United States has proposed five different venues.

Hanoi juxtaposes charges of U.S. procrastination on contacts with complaints that the air strikes against the DRV from the 17th to the 20th parallel have been intensified and that air "intrusions" are taking place throughout the country. But Hanoi stops short of suggesting that this would affect DRV "readiness" to establish contacts with the United States. Alleged air-defense victories continue to be reported routinely, and VNA on the 16th claims the downing of a plane over Haiphong, which, it notes, is "far north of the 20th parallel." The item puts the total of downed planes at 2,838, an increase of nine in the past week.

Hanoi on 10 April announces the visit, from 4 to 10 April, of an East German party-government delegation headed by SED Secretary and Politburo member Kurt Hager. According to Hanoi, the delegation was received by Le Duan and Truong Chinh, and it met with a DRV delegation

APPROVED FOR RELEASE
3 MAR 1993

which included Pham Van Dong, Nguyen Duy Trinh, Le Thanh Nghi, and Xuan Thuy.

On the 16th, VNA announces that the National Assembly Standing Committee has appointed Xuan Thuy as "minister of the DRV Government," and Tran Quang Huy as chairman of the cultural and educational board of the premier's office. Thuy, who was foreign minister from 1963 to 1965, is a Party Central Committee member and head of the foreign relations department of the CC. Huy is an alternate Party Central Committee member and deputy chief of the CC's central department of propaganda and training.

Hanoi reports on current military action in South Vietnam continue to highlight engagements in Quang Tri and in the Third Corps. A 9 April Liberation Radio commentary hailing the establishment of "revolutionary" or "people's" administrations claims that the people's administration will "rule over South Vietnam" and lead the resistance struggle to victory.

Moscow continues to stress Soviet aid to Vietnam, and a 13 April PRAVDA editorial praises the CPSU plenum's assertion of determination to continue aid to Vietnam and the WFTU General Council's special Moscow meeting on solidarity with Vietnam. Comment, including reports of protest meetings and a statement by the Soviet maritime union, continues to score the Chinese for obstructing Soviet aid by their detention of a Soviet tanker carrying fuel to Vietnam.

DRV-U.S. Contacts

HANOI Hanoi's first dicussion of the issue of a site for preliminary DRV-U.S. contacts following its 8 April release of Foreign Minister Trinh's interview with CBS' Collingwood comes in a 12 April NHAN DAN commentary, summarized by VNA and broadcast by Hanoi radio in the domestic service. NHAN DAN says that the United States is finding "unjustified pretexts" for refusing to agree to Phnom Penh as the site for the preliminary DRV-U.S. contacts. The commentary recalls that in his interview Trinh had expressed readiness for contact "in Phnom Penh or another place to be mutually agreed upon," but this reference to "mutual agreement" is not repeated in subsequent propaganda.

The first available reference in Hanoi propaganda to its alternate suggestion of Warsaw as a site comes in a NHAN DAN Commentator article carried by VNA early on the morning of the 13th. It says that after refusing to meet in Phnom Penh, the United States has rejected the idea of Warsaw and that on the 11th Presidential Press Secretary Christian said that the United States wanted contacts to be made in a neutral country.

Some eight hours after VNA's release of the NHAN DAN article, Hanoi radio broadcast the DRV Foreign Ministry spokesman's statement which gives Hanoi's version of the chronology of developments since the DRV Government statement on the 3d. The spokesman says that following the United States' 10 April rejection of Phnom Penh--"on the pretext that it had technical difficulties since it has no diplomatic mission there"--Hanoi on 11 April suggested Warsaw. And he adds that on the 12th, U.S. authorities, without answering regarding Warsaw, "demanded" that the site be in a neutral country where both sides have diplomatic missions and adequate communications. The spokesman acknowledges that on the 10th the United States had suggested other venues but he does not name them: He says only that "they suggested a number of sites that are not convenient for the DRV side."

The foreign ministry spokesman says that the U.S. rejection of Hanoi's proposals for the site of the contacts runs counter to past statements by the President and other U.S. officials expressing willingness to go anywhere to talk. And surrounding propaganda seeks to document this by citing specific remarks, including the President's statement in his 31 March speech that the United States is ready to send its representative to "any forum, at any time, to discuss the means of bringing this war to an end." The President's 29 September 1967 speech in San Antonio is cited frequently along with several other statements by him and by Secretary Rusk.

In revealing that Hanoi on the 11th had suggested Warsaw as a site, the foreign ministry spokesman avoids saying how or where this "suggestion" was made and does not refer to any private communications. A NHAN DAN article on the 16th, summarized by VNA and broadcast in Hanoi radio's domestic service, implies that private exchanges are not going on. NHAN DAN says that while the United States rejects the sites for contacts proposed by the DRV, "the spokesman for the U.S. President claimed that contacts between the DRV and the United States on the question of the site are continuing. This is yet another trick of the United States to delay contacts and appease public protest." DRV media in the past have displayed sensitivity to reports on private communications with the United States and have on occasion flatly denied such reports. But those denials were not made against a background like the current one of a specific public Hanoi initiative for preliminary contacts leading to possible formal talks.

President Johnson's complaint, in his remarks upon arrival in Hawaii, that the DRV had not responded to the U.S. suggestions of sites is promptly labeled "a distortion of the truth." A Hanoi radio commentary, broadcast in the domestic service on the 16th, counters with the argument that the foreign ministry spokesman on the 13th

"officially rejected the sites suggested by the United States as not convenient to the DRV side." But consistent with Hanoi's avoidance of mentioning any venues other than Phnom Penh or Warsaw, the commentary ignores the President's statement that he had proposed Geneva, Rangoon, New Delhi, Vientiane, Djakarta, or "any other suitable place." The broadcast interprets the President's statement that Hanoi has not made "a serious reply" in the two weeks since the U.S. limitation of air strikes against the North as a "demand for reciprocity." It routinely says that the United States has no right to demand reciprocity and repeats that what is needed is a complete and unconditional cessation of "acts of war" against the DRV and an end to the "aggression" against Vietnam.

A NHAN DAN commentary, reported by VNA on the 17th, rehashes other comment in saying that U.S. delaying of preliminary contacts is at variance with its professed willingness to go anywhere. In mentioning the President's trip to Honolulu, NHAN DAN quotes him as saying that "the U.S. limited bombing has been in force for two weeks without progress toward peace contacts." The paper says nothing about his complaint over the absence of a Hanoi response; however, it quotes State Department spokesman McCloskey as saying on the 15th that the United States hopes for an official message of response from Hanoi on other sites, and that it is trying to find a mutually acceptable site.

This latest NHAN DAN commentary echoes other propaganda in saying that world public opinion is demanding that the United States quickly agree to Warsaw. The commentary dismisses U.S. objections to Warsaw since it is not a neutral country, but does not defend it as a site. Other comment, however, repeatedly notes the size of the U.S. diplomatic mission there and says there would be no difficulty with communications. On at least two occasions, Hanoi brings up the fact that the United States has been using Warsaw as the site for contacts with the CPR. VNA on the 14th in rounding up press opinion as published in NHAN DAN quotes AFP to this effect. And the 16 April NHAN DAN commentary, as broadcast in the domestic service, quotes the Japanese MAINICHI as saying that it is difficult to understand why the United States refused Warsaw, where it has held talks with the CPR for years.

MOSCOW Before DRV media had mentioned Warsaw as a site for contacts, on 12 April a TASS dispatch from its Hanoi correspondents said that "it is believed in Hanoi official circles" that Washington's rejection of Warsaw as a site for preliminary contacts was unjustified for four reasons: The United States had expressed its willingness to meet any place, at any time; it said it was willing to establish contact with the DRV as soon as possible; Warsaw has a U.S. embassy, a staff of correspondents and communications; and Warsaw has been the site for over 10 years of Sino-U.S. contacts. Earlier, on the 11th,

TASS' Hanoi correspondents had cited "reliable sources" as saying that the DRV had suggested Warsaw as a site for contacts after the United States rejected Phnom Penh.

Moscow commentators, like Hanoi, charge the United States with procrastinating and trying to delay talks while continuing to bomb southern portions of the DRV and preparing for further escalation in the South. Yuriy Zhukov, in a PRAVDA article carried by the domestic service on 15 April, says that U.S. propaganda depicted President Johnson's 31 March announcement of a bombing limitation and readiness to discuss ways of ending the war as a great concession. And he adds that "many international observers" think that the United States expected the DRV to ignore the announcement and that U.S. "aggression" then could be intensified. Zhukov notes that while Washington delays the solution of the question regarding the venue for contacts it is intensifying its military operations in South Vietnam. He says that the United States is hoping to secure through force "an advantageous basis" for the solution of the Vietnam question, and is testing whether it can "extract some kind of concession from the Vietnamese."

Moscow on the 11th, in a domestic service review of the weekly NEW TIMES, notes that military writer Lt. Col. A. Leontyev recalls that the Soviet Government on 5 April officially endorsed the DRV's 3 April statement, observing that it shows a practical way toward ending the war. And Leontyev adds that "it is obvious that the time has come for a political settlement in Vietnam." (In discussing the war in the South, Leontyev says the allies' casualties are growing. But at the same time he says that "of course, in any war both sides suffer losses. The South Vietnam liberation forces, which are fighting a cruel and powerful enemy, suffer many losses." Such an acknowledgment is rare, but not unprecedented in Soviet propaganda; Leontyev, for example, broached the issue in commentaries last January and in November 1967)

TASS' 16 April report of the President's Honolulu trip cites him as saying on arrival that the United States is ready to meet any challenge in the field of battle, and interprets this as a U.S. intention to continue escalation. Comment, including a widely broadcast commentary by Shakov on the 16th, asserts that the President will discuss further escalation at Honolulu, and, as Shakhov says, the meeting thus confirms the impression that "Washington has never really wanted to negotiate on Vietnam."

Moscow's only available mention of the President's comments on Hanoi's negative attitude regarding contacts comes in a brief broadcast to the United Kingdom on the 17th which cites him as "alleging" that "Hanoi was to blame for the delay in choosing the site for preliminary

contacts." The broadcast accuses the State Department of making another move to "torpedo" contacts, now adding the condition that the site must allow for "participation in the talks of America's allies." The report further says that after rejecting Phnom Penh and Warsaw as sites, "Washington now intends to entrust a neutral partner with further negotiations."

Some Moscow comment--including a Moscow radio broadcast in Mandarin on 10 April and one in Rumanian on the 12th, as well as a Mandarin broadcast over Radio Peace and Progress on the 10th--attacks the Chinese for ignoring the DRV's 3 April statement declaring readiness for DRV-U.S. contacts. Referring to NCNA's 5 April commentary deprecating the bombing limitation, Moscow asserts that by failing to mention the DRV's statement the Mao clique shows that it is actually "opposed to this important political proposal of the DRV Government." The commentators also score NCNA for accusing the USSR of colluding with the United States against Vietnam, and recall that the USSR has given the Vietnamese "the largest share of aid." The commentators recall that Peking had also opposed DRV Foreign Minister Trinh's statement late last year on willingness to talk if the United States unconditionally halted the bombing. Moscow has periodically charged Peking with opposing talks and striving to "prolong" the war.

EAST EUROPE On 12 April Warsaw's PAP releases an "authorized" statement announcing the readiness of the Polish Government to "create all necessary and appropriate conditions" to facilitate a U.S.-DRV meeting in Warsaw. This is Warsaw's first official comment on the developments of the past two weeks; it had not officially endorsed the 3 April DRV Government statement although East Berlin, Bucharest, Sofia, and Prague had done so. In later routine comment Warsaw reports that the United States rejected Warsaw as a site for contacts.

On 15 April East Berlin's ADN reports that Deputy Foreign Minister Kiesewetter received the DRV acting charge d'affaires who handed him the 13 April DRV Foreign Ministry spokesman's statement at which time Kiesewetter condemned U.S. "delaying maneuvers." On the same day Sofia's BTA releases a commentary by its editor scoring the United States for rejecting Hanoi's suggested meeting places. Other East European media denounce the U.S. moves in routine comment.

PEKING The CPR failure to acknowledge the 3 April DRV Government statement appears the more blatant in view of the 15 April PEOPLE'S DAILY Commentator article which discusses the issue of DRV-U.S. contacts. Commentator notes that the President has "rejected" Phnom Penh as the site of contacts, without indicating who proposed the site. He says that this incident alone

is "enough to reveal that the 'peace talks' of the U.S. imperialist chieftain are a big fraud." The article does not mention Warsaw, although it appears four days after reports that Hanoi had suggested the Polish capital as an alternate site.

Criticism of the President's announcement of a limitation of the air strikes against the DRV follows the line of the 5 April NCNA commentary--Peking's first and only other comment on the President's 31 March speech. Commentator says that in only two weeks the President's "murderous intentions are revealed," and the article cites the callup of reservists and the intensified bombing of the DRV. The USSR is typically charged with colluding with the imperialists and the article concludes with Peking's standard line that the United States must be thoroughly defeated on the Vietnam battlefield.

Air Strikes Against the DRV

The DRV Foreign Ministry spokesman's statement on the 13th and other propaganda on potential DRV-U.S. contacts complain of the intensity of air strikes since the President's 31 March announcement of limitation of the bombing. The spokesman says that aircraft and warships have intensified their bombing and strafing of DRV territory between the 17th and 20th parallels and that Secretary of Defense Clifford "brazenly declared that U.S. reconnaissance will continue north of the 20th parallel." The 16 April NHAN DAN article on the venue for contacts says that attacks from Thanh Hoa to Vinh Linh have been stepped up. And it claims that on the 13th and 14th many reconnaissance missions were flown near Hanoi. VNA reports of air activity list areas north of the 21st parallel where "air intrusions" allegedly have taken place, but these items do not mention reconnaissance. And VNA in claiming that a plane was downed over Haiphong on the 16th does not identify the type.

A NHAN DAN editorial on the 17th hails the "brilliant" air-defense victories on the 15th. It says that five planes were downed over Nghe An, Quang Binh, and Ha Tinh provinces, making it one of the biggest victories in a single day this year. The editorial claims "massive U.S. attacks from Thanh Hoa Province to the Vinh Linh area," but asserts that all attacks have been foiled. It gives credit to the antiaircraft forces, the missile force, the regional army, and the militia force. Like other comment it links the alleged U.S. delaying tactics on establishing contacts with the DRV with its intensification of air strikes in the North and escalation in the South.

Propaganda generally does not claim that there have been air strikes above the 20th parallel. But VNA on the 15th says that the People's

Air Force "blasted down" one of the U.S. aircraft "raiding a populated area 60 kilometers southwest of Ninh Binh Province capital between the 20th and 21st parallel." Ignoring the Defense Department denial, the 13 April NHAN DAN Commentator article repeats the earlier charge that on 4 April "U.S. aircraft attacked Lai Chau Province," and VNA inserts an editor's note explaining that "this is nearly 500 kilometers west-northwest of Hanoi." (A 5 April DRV Foreign Ministry spokesman's statement included Lai Chau in a list of alleged targets without saying anything about its location. But a 5 April NHAN DAN Commentator article noted the target in Lai Chau Province "close to the Vietnam-China border.")

Military Developments in the South

Hanoi media still concentrate attention on battles connected with the two major allied operations in the First and Third Corps: Operation Pegasus around Khe Sanh, which ended on 15 April, and Operation Complete Victory--which began on 8 April--and its predecessor Operation Quyet Thang (determined to win). According to a VNA summary on the 15th, a QUAN DOI NHAN DAN commentary that day claims that these operations were launched to conceal allied defeats, give a pretense of initiative, and cope with the insurgents' "mounting military and political offensive." The commentary says that the allies, having been pushed into the towns, are now unable to defend them and are "trying to ease the pressure by making desperate sorties into the countryside." The commentary says that the insurgents with various forms of attacks are "taking full advantage of the propitious moment with the enemy at last trickling out from their strongholds and dispersing in the field."

A 16 April QUAN DOI NHAN DAN commentary on General Abrams' appointment as commander in Vietnam calls Abrams a last choice of the Administration who can "only worsen the situation." It says that the replacement of Westmoreland by Abrams "marks the bankruptcy of the search-and-destroy and pacification strategy" and, quoting REUTERS as saying that the United States was shifting to the clear-and-hold tactics advocated by Abrams, it claims this is a "step back strategically speaking." The article also disparages the policy of shifting more of the fighting to the ARVN troops. Like earlier Hanoi radio comment on the 12th and Liberation Radio comment on the 13th, QUAN DOI NHAN DAN asserts that Abrams will fail and it adds that he will be a scapegoat in the "final stage" of the war.

KHE SANH — The 15 April QUAN DOI NHAN DAN commentary claims that the PLAF struck allied forces on highway 9, causing them to "bog down" in their "attempt to lift the siege of Khe Sanh" and that "staggering blows" have been dealt "both to those under siege and to the reinforcements." It states that the latter "had five battalions and eight companies completely wiped out or heavily decimated before

the linkup could be made." A commentary in the army paper on the following day claims that, "far from relieving Khe Sanh," the air cavalry and ARVN paratroopers in Operation Pegasus "have thrown this base into greater confusion and danger" and have "thus fallen into the PLAF siege." It says that although the allies reached Khe Sanh, they "did not succeed in rescuing it because they could not revive the exhausted and weakened U.S. Marines there."

The PLAF command sent a congratulatory message to units on the Khe Sanh front, broadcast by Liberation Radio on the 13th, which claims that in the first three months of this year the insurgents in northern Quang Tri killed, wounded, or captured nearly 15,000 allied troops, mostly Americans, and downed or destroyed 250 planes.

VNA on the 11th claims that, in the week ending 9 April, the PLAF inflicted 2,193 allied casualties, mostly GIs, shot down or damaged 19 planes, and seized a large quantity of military equipment. VNA on the 14th claims that the PLAF on the 12th and 13th repeatedly "battered" U.S. cavalry and South Vietnamese paratroopers respectively in Khe Sanh and Lang Vei, causing many losses. VNA on the 15th alleges that from 13 to 15 April the PLAF on the Khe Sanh front "kicked the enemy" out of Lang Vei and continued besieging "Ta Con"--the Khe Sanh base--"tightening their noose around this position and encircling and attacking the enemy encampments in the Khe Sanh area." The item says that during this period over 300 U.S. and ARVN troops were wiped out, two helicopters destroyed, and many weapons seized, and claims that this brings the total of allied troops killed or wounded in this area to more than 3,000 from 3 to 15 April.

On the 13th, according to this same VNA report, the PLAF shelled Ta Con, the U.S. encampment at Lang Vei, and hills in the Khe Sanh-Lang Vei area. An attack on Hill 656, five kilometers southeast of Lang Vei, is alleged to have taken a toll of 70 U.S. air cavalrymen. Shellings on the 14th of Ta Con, Hills 571 and 845, and the eastern part of Pa Ka allegedly caused over 90 casualties and caused the allies to pull out of Lang Vei and many surrounding spots. VNA on the 16th claims that a 14 April surprise attack by the PLAF on Hill 656 completely wiped out a U.S. company of over 140 men.

The only action mentioned on the 15th is the shelling of the Ta Con position. VNA on the 16th, reporting action taking place that day, claims that PLAF gunners pounded a U.S. company which tried to push toward Hill 622, wiping out 50 GIs, and that the PLAF intercepted the rest of the U.S. force, causing 70 casualties, and attacked another U.S. company aiming for the same hill, causing 40 casualties. At Hill 519, northeast of Lang Vei, the VNA report claims that the PLAF fired on two U.S. companies moving toward the hill and "knocked down"

over 50 GIs. VNA says that on the 16th the PLAF inflicted a total of 210 casualties on U.S. troops in the Khe Sanh area.

SAIGON AND THE THIRD CORPS

QUAN DOI NHAN DAN in its 15 April commentary characterizes the two operations around the Saigon area, Operation Quyet Thang and its successor Complete Victory, as "merely loose combinations or small, separate police raids and a totaling of troops of all kinds who happen to be present in the theatre." It says that the allied forces are "operating without definite direction of attack and practically without coordination" and claims that the guerrillas frustrated Quyet Thang at the outset and that Operation Complete Victory will be defeated more ignominiously.

A Liberation Radio commentary on the 16th claims that in Operation Quyet Thang about 4,000 troops, mostly Americans, were annihilated and more than 200 tanks and armored cars and about 30 aircraft destroyed. In disparaging Operation Complete Victory, the commentary claims that the units taking part in the operation are those that were "seriously defeated" during the general offensive and in Quyet Thang. It asks how the allies, who were unable to control the five provinces around Saigon in Quyet Thang, can hope to drive the Viet Cong from the 11 provinces "as they have loudly boasted." The commentary concludes by asserting that the armed forces and people are determined to turn Complete Victory into "complete defeat."

Actions connected with these operations which have been reported by VNA are all located in Tay Ninh Province. VNA on the 15th reports that against Operation Complete Victory on 12 April, the PLAF mounted a surprise attack on the encampment of a U.S. battalion 16 kilometers north of Dau Tieng district town, wiping out over 400 GIs. The VNA item also reports a PLAF assault on a position of the U.S. 25th Division 77 kilometers northwest of Saigon on the 14th.

CRIMES

NHAN DAN in a commentary on 17 April carried by VNA that day lists several alleged "crimes" of the allies and claims that "annihilation is the fate that awaits the killers." The commentary asserts that these actions point to the fact that "the U.S. aggressors have been driven to the wall" and they are "taking vengeance on old people, women, and children." Saying that these acts "cannot pass with impunity," the paper concludes by recalling attacks by the PLAF on the allies in areas where the "crimes" reportedly occurred. There are several VNA items describing specific "crimes" allegedly committed by the allies, including one on the 16th which claims that U.S. and Korean troops killed 1,235 people in four districts of Quang Nam and Quang Ngai provinces since February.

KHMER NEW YEAR

The An Giang committee of the NFLSV issued a communique, summarized by VNA on 13 April, which ordered the PLAF in the area to cease military attacks during the Khmer new year, from 13 to 16 April. It says that the Khmer ARVN troops and personnel of the Saigon government will be allowed to return home provided they "do not go by groups and do not carry weapons or means of espionage." PLAF troops are urged to help the Khmers but also to heighten their vigilance and punish any allied attempts to disturb the festival. On 23 March the western Nam Bo NFLSV committee issued a communique allowing new year's visits by Khmer troops and government personnel but did not order a cease fire. VNA publicized this communique 27 March and Liberation Radio broadcast it on 10 April.

WESTERN, CENTRAL NAM BO COMMUNIQUES

The third special communiques of the PLAF commands of western and central Nam Bo were broadcast by Liberation Radio on 29 and 30 March but are only now available. The communiques update the "victories" since the beginning of the Tet offensive on 31 January and cover the period up to 15 March; the second special communique from each of these areas was broadcast on 7 March. (The third special communique of the southern Trung Bo PLAF command, dated 20 March, was also broadcast by Liberation Radio on 30 March, but poor reception precluded processing. The last communique for southern Trung Bo was broadcast on 11 March.)

The western Nam Bo communique--dated 20 March--claims the "annihilation or capture" of more than 18,000 allied troops, including 2,440 Americans, and the "disintegration" of more than 30,000 ARVN troops, policemen, and GVN personnel. The communique says that 375 planes were destroyed, 247 military vehicles smashed, and 77 tankers and fuel transports sunk or burned. The casualties, according to the commentary, put out of action over 40 percent of the ARVN force in the area.

The central Nam Bo command communique, dated 15 March, claims that insurgents killed, wounded, or captured more than 18,500 allied troops, including 3,100 GIs. It says that 430 military vehicles and 100 planes were destroyed and 60 ships sunk. Like the western Nam Bo communique, it claims the liberation of large areas. Hailing attacks on communication lines, it asserts that insurgents destroyed 20 allied roads.

POLITICAL DEVELOPMENTS

REVOLUTIONARY ADMINISTRATIONS

Expanded claims for the leadership role of the "revolutionary" or "people's" administration in South Vietnam are made in a 9 April Liberation Radio commentary. It asserts that the administration is being built "into a strong and stable administration which will lead the general

offensive and uprising quickly to complete victory" and that "the people's administration will become the single organization which will rule over South Vietnam and will lead the anti-U.S. national salvation resistance of the South Vietnamese people to final victory." At the same time, the commentary speaks of the NFLSV as being the leader of the South Vietnamese people.

The commentary repeats the claim of the fourth PLAF special communique last month that 1.6 million people in more than 600 villages and hamlets have been liberated and says that "the people's administration has been and is being established throughout the liberated areas, the rural areas, in many towns and areas close to large cities, and in important areas along the strategic communications lines of the enemy." A Liberation Radio broadcast in Mandarin on 12 April echoes the 9 April commentary and further claims the establishment of "peasants' revolutionary committees." It says "revolutionary political power" has been set up "in many streets of Saigon, Hue, and many other provincial cities."

THUA THIEN-HUE COMMITTEE

On 16 April Liberation Radio broadcasts the third communique of the Thua Thien-Hue Revolutionary Committee which, it reports, was adopted at a 1 April meeting, presided over by Le Van Hao, to review the situation during the past month and to set forth a number of new tasks. (The second communique of the committee was broadcast by Liberation Radio on 6 March.) The communique claims that, due to the massive allied troop buildup, the area holds an important position in the southern battlefield. Routinely claiming success in the spring offensive, the communique sets forth tasks for the people to take advantage of the "favorable situation." Stating that the "revolutionary administration at all echelons has been further strengthened and has become increasingly effective," it calls on these administrations to carry out tasks including opposition to conscription, preparation for establishing a "rural convention" as a basis for all relations in the village and to assure building a new village life, and several economic tasks such as studying the land problem, assuring a good harvest, and establishing a budget.

SECURITY

Liberation Radio on 15 April broadcasts a commentary on "vigilance" and the "safeguarding of secrets" attributed to "Tan Cong"—a pseudonym which can be translated as "attack." Tan Cong says that since the spring offensive the allies have tried to reestablish their control machinery in "recently liberated" areas by using "remaining troops for relief operations"

in an attempt to drive out the insurgent armed forces and by "every cunning trick and every form of espionage to collect information for their bombing and shelling and their rangers." He insists that allied efforts have failed because of "our network to safeguard secrets and guard against evil acts" throughout the liberated areas. The commentary stresses the role of the people in security efforts and cites alleged instances of the people's cooperation in discovering and capturing allied "agents."

MEMORANDUM

SUBJECT: Hanoi's Paris Initiative and the Possibility of a New Communist Military Offensive

1. The timing of Hanoi's move to break the deadlock on selection of a site for talks with the US may well be related to Vietnamese Communist preparations--apparently nearing completion--to launch major offensive military actions. The North Vietnamese may hope to push political developments in the war along to the point where they can be most directly orchestrated with Communist military plans in South Vietnam. There have been numerous indications that the Communists are gearing up for another major offensive, most likely in the months of May or June. Hanoi may have feared that if the deadlock over the site of talks persisted much longer, the political impact of any new military push would have been largely lost. In view of its decision some months ago to move to a "fight-talk" stage of the war, Hanoi would probably wish to prevent such a development if possible.

2. At the time of their 3 April offer of "contacts" with the US, the North Vietnamese may have anticipated fairly rapid progress toward a full bombing halt and the initiation of formal talks on a settlement of the war. Communist military activities in April may have been specifically tailored to the prospective diplomatic dialogue. The drop in major enemy military initiatives in early April may have been intended in part to improve the atmosphere for preliminary contacts with the US designed to obtain a

Note: This memorandum was produced solely by CIA.

EO 12958 1.5(c)<10

[redacted]

~~NO FOREIGN DISSEM~~

~~SECRET SAVIN~~

full bombing cessation. Meanwhile, the Communists used the lull to prepare for large-scale offensive operations by early May, when Hanoi may have expected substantive discussions to be under way. Indeed the Communists may have expected the US response to a negotiating offer to be rapid and thus keep their military and diplomatic timetables synchronized. This could account for their quite precipitous addition of Warsaw to Phnom Penh, once the US had rejected the latter.

3. Heavy North Vietnamese infiltration and logistics operations in support of Communist forces in South Vietnam accelerated in April. Major Communist military units in several parts of the south continued the disengagements they had started in late March. Some units withdrew from their usual areas of tactical operations in order to resupply and to be reinforced. The heavy flow of infiltrators from North Vietnam doubtless is being used to beef up existing units and to help form new ones. The entire effort probably was carried on with a view toward applying heavy military pressures during a period of negotiations.

4. The question of exact timing in kicking off any new offensive is still highly conjectural, even if the Communists are attempting to tie it in with political developments. A number of reports [redacted] have said that major attacks would be launched between late April and early May. Other reports, however, have said such attacks would occur between early May and 19 May; still others have mentioned later dates. There are indications in some areas--especially Saigon and I Corps--that attacks may well be imminent, although their timing and scope may be upset by allied operations.

EO 12958 3.4(b)(1)>25

APPROVED FOR RELEASE
DATE: DEC 2000

5. In sum, the evidence suggests that attacks could come at any time but we are unable to state with confidence whether they will occur before 10 May. Hanoi could be planning to launch major military actions in South Vietnam just before or shortly after the opening of the Paris talks. We think it equally possible, however, that major Communist military initiatives in the South may be held back for a while in the hope that preliminary contacts will soon

bring about a full bombing halt. Once this is accomplished, offensive actions could be geared to obtain a maximum impact in ensuing discussions on substantive war issues.

6. The latest report we have of the timing of Communist military operations in the Saigon area indicates that attacks on the city and nearby installations may be launched in the next few days.

S-[redacted]E-T [redacted]

APPROVED FOR RELEASE
OCT 1999

1.5(c)
3.4(b)(1)

S-E-[redacted]E-T [redacted]

ING THE SAME DAY WITH PRESIDENT THIEU, THIEU REFUSED TO DISCUSS WITH KY AND THE GENERALS HIS CABINET REORGANIZATION PLANS, BUT SAID HE WOULD REVEAL THEM BY 18 MAY. (KY CLAIMED LATER THAT THIEU HAD ALSO REFUSED TO DISCUSS HIS SPECIFIC PLANS WITH HIM IN PRIVATE.) THIEU ALSO TURNED ASIDE THE GENERALS' PLEAS FOR A MORE AUTHORITARIAN STYLE OF GOVERNING AND FOR A CANCELLATION OF THIEU'S REFORMS IN PROVINCIAL ADMINISTRATION [redacted] THE MILITARY WILL RELUCTANTLY ACCEPT THIEU'S DECISIONS AND WILL NOT OPPOSE TRAN VAN HUONG'S APPOINTMENT AS PRIME MINISTER BUT WOULD RESIGN ALONG WITH KY IF KEY MILITARY OR POLICE OFFICIALS WERE REMOVED. END SUMMARY.

1. [redacted] VICE PRESIDENT NGUYEN CAO KY AND THE SENIOR GENERALS MET WITH PRESIDENT NGUYEN VAN THIEU ON 15 MAY TO DISCUSS THEIR DISSATISFACTION WITH THE PERFORMANCE AND POLICIES OF THE THIEU GOVERNMENT. [redacted] EARLIER THAT DAY THE GENERALS HAD MET WITH KY AT THE JOINT GENERAL

1.5(c)
3.4(b)(1)

1.5(E)
3.4(b)(1)

S-E[redacted]-E-T

[redacted]

STAFF COMPOUND. IN ADDITION TO KY AND KHANG OTHERS ATTENDING WERE I CORPS COMMANDER LIEUTENANT GENERAL HOANG XUAN LAM, II CORPS COMMANDER MAJOR GENERAL LU MONG LAN, IV CORPS COMMANDER MAJOR GENERAL NGUYEN DUC THANG, CHIEF OF THE JOINT GENERAL STAFF GENERAL CAO VAN VIEN, MINISTER OF DEFENSE LIEUTENANT GENERAL NGUYEN VAN VY, MINISTER OF INTERIOR LUEUTENANT GENERAL LINH QUANG VIEN, AND MINISTER OF REVOLUTIONARY DEVELOPMENT LIEUTENANT GENERAL NGUYEN BAO TRI.

2. IN THE MAIN THE GENERALS' THESIS AS PRESENTED TO THIEU WAS THAT DURING THESE CRITICAL DAYS, WITH REPRESENTATIVES OF THE UNITED STATES AND NORTH VIETNAM MEETING IN PARIS, AND WITH THE ENEMY APPLYING MAXIMUM PRESSURE IN THE HOPE OF ATTAINING DECISIVE MILITARY AND POLITICAL VICTORIES AND OF INFLUENCING PEACE TALKS, THE GOVERNMENT MUST BE STRONG, DECISIVE AND TIGHTLY ORGANIZED. THE CHIEF EXECUTIVE MUST BE GRANTED FULL POWERS

1.5(E)
3.4(b)(1)

S-[redacted]R-E-T
(Classification) [redacted]

1.5(c)
3.4(b)(1)

BY THE NATIONAL ASSEMBLY UNTIL THE CRISIS SUBSIDES. THE GOVERNMENT AND MILITARY MUST FUNCTION AS ONE. NOW IS NOT THE TIME TO EXPERIMENT WITH CONCEPTS OF CIVILIAN ADMINISTRATION WHICH MAY BE SUITABLE IN TIME OF PEACE BUT ARE INADEQUATE IN A WARTIME SITUATION.

3. THE CORPS COMMANDERS SPECIFICALLY ASKED THIEU TO CANCEL HIS PROJECTED OVERHAUL OF THE PROVINCIAL ADMINISTRATIVE SYSTEM UNTIL AFTER THE WAR. THEY COMPLAINED THAT THE CHANGES WHICH ALREADY HAVE BEEN IMPLEMENTED HAVE SO FRAGMENTED THE RESPONSIBILITY FOR DECISION MAKING AND WEAKENED COORDINATION BETWEEN MILITARY AND CIVILIAN AUTHORITIES IN THE PROVINCES, THAT IT IS DIFFICULT FOR THE CORPS COMMANDERS TO DO THEIR JOBS.

4. IN RESPONSE THIEU SAID THAT HE TOO WAS DISTURBED BY THE DELIBERATE PACE OF THE NATIONAL ASSEMBLY, BUT THAT HE SAW NO ALTERNATIVE TO WORKING WITH IT. SEVERAL OF THE GENERALS SUGGESTED HE SECRETLY THREATENED TO PROLONG THE ASSEMBLY IF IT WAS NOT MORE RESPONSIVE. THIEU

S-[redacted]R-E-T [redacted]

1.5(c)
3.4(b)(1)

S-E-[redacted]-E-T [redacted] 1.5(c) 3.4(b)(1)

SUGGESTED THIS TACK WAS UNREALISTIC, AT WHICH POINT SEVERAL OF THE GENERALS SAID THAT THIEU COULD GET WHAT HE WANTED FROM THE ASSEMBLY IF THE MILITARY WAS BEHIND HIM AND IF HE USED THE FULL POWER OF THE OFFICE OF THE PRESIDENCY.

5. THIEU THEN EXPOUNDED ON HIS CONCEPT OF HOW THE GOVERNMENT SHOULD FUNCTION. THIS EXPOSITION MADE IT CLEAR THAT HE DID NOT INTEND TO REVERSE ANY OF HIS ADMINISTRATIVE REFORMS OR CHANGE HIS PLANS TO "CIVILIANIZE" THE GOVERNMENT.

6. DURING THE MEETING KY ASKED THIEU IF HE WOULD LIKE TO DISCUSS THE PLANNED RE-ORGANIZATION OF THE GOVERNMENT, SPECIFICALLY HIS PLANS TO CHANGE THE PRIME MINISTER AND THE CABINET. HOWEVER, THIEU REFUSED TO COMMENT. WHEN PRESSED, THE PRESIDENT SAID HE WOULD MAKE HIS INTENTIONS CLEAR ON THIS SUBJECT BY 18 MAY. [redacted] ASKED [redacted] LATER IF THIEU HAD GIVEN KY THIS INFORMATION IN PRIVATE. KY SAID NO. KY SAID HE HAD HAD

1.5(c) 3.4(b)(1)

A PRIVATE MEETING WITH THIEU ON 13 MAY TO DISCUSS CHANGES IN THE GOVERNMENT. HOWEVER, DURING THE MEETING THIEU TALKED IN GENERALITIES AND REFUSED TO SAY WHETHER OR NOT HE PLANNED TO REPLACE PRIME MINISTER LOC WITH TRAN VAN HUONG.

7. [redacted] THE GENERALS HAD NOT MET WITH THIEU TO DISSUADE HIM FROM REMOVING LOC. ALTHOUGH KY HAS RESERVATIONS ABOUT HUONG AS A "THIRD CENTER OF EXECUTIVE POWER" MOST OF THE GENERALS ARE NOT OPPOSED TO HUONG OR ANY STRONGLY ANTI-COMMUNIST PREMIER AS LONG AS HE AGREES NOT TO MEDDLE IN THE INTERNAL AFFAIRS OF THE ARMED FORCES. IF THIEU OR A NEW PREMIER ATTEMPTS TO REMOVE BRIGADIER GENERAL NGUYEN NGOC LOAN, DIRECTOR GENERAL OF NATIONAL POLICE, OR GENERAL CAO VAN VIEN, KY AND ALL THE SENIOR GENERALS WILL RESIGN.

8. [redacted] KY AND THE GENERALS AGREED THAT THE BEST WAY THE GVN COULD INFLUENCE THE PARIS TALKS WAS TO ACHIEVE SOLID

1.5(c) 3.4(b)(1)

1.5(c)
3.4(b)(1)

S-E[redacted]R-E-T [redacted]
(classification) (handling controls)

MILITARY AND POLITICAL PROGRESS IN VIETNAM. TO DO SO THEY FEEL SOUTH VIETNAM MUST HAVE A STRONG AND UNIFIED GOVERNMENT LED BY THE MILITARY AND THIS WAS THE MESSAGE THEY WERE TRYING TO CONVEY TO THIEU.

[redacted] A RECENTLY CAPTURED ENEMY DOCUMENT SAID THE THE NORTH VIETNAMESE WOULD WIN IN PARIS IF THEY WERE PATIENT BECAUSE OF THE SERIOUS CONTRADICTIONS IN THE SAIGON GOVERNMENT. THERE WERE CONFLICTS BETWEEN THIEU AND KY, BETWEEN THE EXECUTIVE AND THE LEGISLATURE, BETWEEN THE MILITARY AND THE CIVILIANS, AND BETWEEN THE AMERICANS AND THE VIETNAMESE. EVENTUALLY THE SAIGON GOVERNMENT WOULD COME APART FROM THE PRESSURE OF THESE CONTRADICTIONS. COMMUNIST STRATEGY WAS TO EXACERBATE THESE CONFLICTS. IF THE SAIGON GOVERNMENT COLLAPSED POLITICALLY, THE DISCUSSIONS IN PARIS WOULD BE ACADEMIC.

9. [redacted] THE GENERALS WERE VERY DISCOURAGED OVER THIEU'S UNWILLINGNESS TO MODIFY HIS COURSE. HOW-

S-E[redacted]R-E-T [redacted]

1.5(c)
3.4(b)(1)

1.5(c)

(Classification) [redacted] (Control(s))

EVER, KHANG MAINTAINED THAT THE GENERALS DID NOT PLAN TO TAKE ANY PRECIPITATE ACTION AGAINST THIEU OR THE GOVERNMENT, UNLESS THE PRESIDENT OFFERED SOME STRONG PROVOCATION. [redacted]

[redacted] THE PRESIDENT HAD DECIDED TO STRENGTHEN HIS PERSONAL POWER POSITION NOW WHILE HE STILL HAS THE AMERICAN GOVERNMENT AND AMERICAN MILITARY POWER BEHIND HIM. MOST OF THIEU'S ADMINISTRATIVE REFORMS, [redacted] ARE DESIGNED MORE TO STRENGTHEN THIEU'S PERSONAL POWER POSITON THAN TO STRENGTHEN THE GOVERNMENT. [redacted] THIEU FAVORS "CIVILIANIZING" THE GOVERNMENT SINCE THIS IS THE BEST WAY HE CAN NEUTRALIZE THE POWER OF THE MILITARY. [redacted] THIEU PLANS TO USE THE CHANGES IN THE PROVINCES TO ASSIST HIM IN BUILDING A PERSONAL POLITICAL PARTY IN THE MANNER OF EX-PRESIDENT NGO DINH DIEM.

10. [redacted] KY TOOK ADVANTAGE OF THE MEETING AT THE JGS COMPOUND TO EXPLAIN TE NEW SELF DEFENSE FORCE. MOST OF THE GENRALS

(classification) [redacted] (system controls)

WERE VERY SKEPTICAL OF ITS VALUE AND SAID THE MILITARY WANTED NO PART OF IT. HOWEVER, THE CORPS COMMANDERS AGREED TO PROVIDE ARMS AND TRAINING IF REQUIRED.

11. [redacted] NO IDEA WHO WOULD BE PRIME MINISTER NEXT WEEK. [redacted] RUMOR THAT HUONG WAS RELUCTANT TO TAKE THE JOB SINCE HE HAD HEARD OF KY'S OPPOSITON. ALL THREE GENERALS PRESENTLY IN THE CABINET, VY, TRI, AND VIEN, STATED AT THE MEETING AT THE JGS THAT THEY WOULD NOT REMAIN IN A SUBSEQUENT CABINET EVEN IF ASKED. [redacted] FAIRLY CERTAIN THAT THIEU WOULD ASK GENERAL TRAN THIEN KHIEM AND LIEUTENANT GENERAL DO CAO TRI TO JOIN A NEW CABINET.

SUBJECT: PROPAGANDA DISPLAY OF FOUR AMERICAN PILOTS IN HOUA PHAN PROVINCE

ACQ:

SOURCE:

1. DURING THE PATHET LAO NEO NEW YEAR CELEBRATION OF 1966, WHICH FELL BETWEEN 28 DECEMBER 1966 AND 3 JANUARY 1967, FOUR AMERICAN PILOTS WERE DISPLAYED FOR PROPAGANDA PURPOSES IN BAN HANG LONG (VH 1262). DURING THE HALF HOUR THAT THE PILOTS WERE ON DISPLAY, A PATHET LAO PROPAGANDIST EXPLAINED TO THE VILLAGERS

THAT THE PILOTS WOULD NOT BE KILLED, BUT WOULD BE HELD FOR PRISONER EXCHANGE AFTER THE START OF PEACE NEGOTIATIONS. THE PILOTS APPEARED TO BE IN GOOD HEALTH AND VILLAGERS SAID THEY HAD RECEIVED GOOD TREATMENT; THEY WERE GETTING MILK AND OTHER FOODS TO WHICH THEY WERE ACCUSTOMED. THE PROPAGANDIST TOLD THE VILLAGERS THE PILOTS' NAMES, BUT SAI VANG HEU COULD NOT REMEMBER THEM.

DATE: MAY 2001

23 May 1968

EO 12958 3.4(b)(1)>25Yrs
(C)

5. The evidence in support of the theory that more than 100,000 have already deployed from the North in 1968 is to be found in [redacted] captured documents, and prisoner interrogations. First is the movement of the 304th and 320th divisions into South Vietnam by January of this year. These units, totaling 16-20,000 troops, were not included in the estimate of 100,000 [redacted]

EO 12958 3.4(b)(1)>25Yrs
(C)

6. [redacted] the 177 infiltration groups [redacted] probably do not include all the groups which have moved during the past four and a half months. Although they find it impossible at present to figure out how many are being missed while en route, they acknowledge that total deployments may be well in excess of current estimates.

EO 12958 3.4(b)(1)>25Yrs
(C)

7. This impression is supported by the prisoners who have supplied infiltration group numbers [redacted]

EO 12958
3.4(b)(1)>25Yrs
(C)

8. MACV notes that since 1 February 1968 it has learned of the existence of 218 infiltration groups-- [redacted]

EO 12958 3.4(b)(1)>25Yrs
(C)

9. There is no solid indication that North Vietnam is depleting its strategic reserve of trained combat personnel in order to keep up the present high level of infiltration. Most of the major North Vietnamese units still assigned to the defense of the homeland show no signs of moving from the North at this time. Rather it appears that the current wave of infiltrating personnel is comprised largely of draftees, reserves, and an unknown number of labor personnel.

EO 12958 3.4(b)(1)>25Yrs
(C)

EO 12958 3.4(b)(1)>25Yrs
(C)

10. Evidence is growing that North Vietnam is drawing heavily on "second echelon" manpower in order to carry on infiltration to the south. Captives taken in recent engagements in South Vietnam contain an increasing proportion of young, ill-trained, poorly motivated, and physically unfit troops. It seems likely that persons previously exempt from service for reasons of health now are being taken.

11. It is possible that Hanoi has decided that all such individuals can make a contribution during a year when so much is at stake. Some of them could be used in support of the expanded logistic system required by the deployment of an unprecedented number of troops. Those who are assigned to combat units may be regarded as cannon fodder in keeping up the kind of military pressure the enemy hopes to maintain during the next few months.

EO 12958 3.4(b)(1)>25Yrs

Intelligence Memorandum

Foreign Shipping to North Vietnam
After Three Years of Rolling Thunder

~~Secret~~

ER IM 68-76
June 1968

Copy № 18

Foreword

This memorandum describes the changes in foreign shipping to North Vietnam since the initiation of the Rolling Thunder program in early 1965. Changes in the volume and composition of North Vietnamese imports and exports by sea and in the role of Free World ships in carrying this trade are emphasized. The year 1964 is used as the basis of comparison. Because of rounding, components may not add to the totals shown. All tonnages are given in metric tons.

INTELLIGENCE MEMORANDUM

Foreign Shipping to North Vietnam After Three Years of Rolling Thunder

Summary

Since the beginning of the Rolling Thunder program in early 1965, North Vietnam's seaborne imports have more than doubled, exports have dwindled, and Free World ships have been largely replaced in the trade by Communist ships.

As the war in Vietnam intensified, North Vietnam's dependence on its Communist allies for material assistance increased significantly. Imports by sea rose from 690,000 metric tons in 1964 to 1,420,000 tons in 1967. During the first four months of 1968, imports were 14 percent higher than during the same period in 1967. The largest increase occurred in 1967 when domestic grain production had to be supplemented by heavy imports of rice from China and wheat flour from the USSR. Imports of petroleum and general and miscellaneous cargoes (including steel, machinery, vehicles, soft coal, and chemicals) reached record levels during early 1968. Deliveries from Communist countries currently account for 98 percent of total import tonnage, compared with 74 percent in 1964. No imports of arms or ammunition by sea have been detected.

Exports, which made up 69 percent of the tonnage of North Vietnam's seaborne trade in 1964, began dropping in 1965, fell off more in 1966 and

Note: This memorandum was produced solely by CIA. It was prepared by the Office of Economic Research and information on ship arrivals was coordinated with the Naval Intelligence Command.

1967, and currently account for only 27 percent of total trade. The decline in exports is attributable almost entirely to the effects of the bombing program.

The combined effects of US diplomatic maneuvers, the lack of export cargoes, and the risks to ships and crews from the Rolling Thunder program caused many Free World ships to withdraw from the trade. Calls by Free World ships at North Vietnamese ports declined from 69 percent of total calls in 1964 to 20 percent in 1966 and 1967. However, Free World ship calls began to increase in 1968 and now account for about 27 percent of total calls.

The number of Free World countries participating in the trade also has been sharply reduced. In 1964, ships of 15 Free World countries sailed to North Vietnam. In 1966 and 1967, ships of only five Free World countries remained in the trade. Most of the calls by Free World ships during the last two years have been made by British-flag ships based in Hong Kong and owned by firms controlled by Communist China. These ships are engaged for the most part in carrying cargoes from China to North Vietnam.

As the role of Free World ships in the North Vietnam trade has diminished, the role of Communist ships has increased. Through 1966, Chinese vessels dominated the Communist shipping, but in 1967, Soviet ships made 181 calls, compared with 97 by Chinese ships. Soviet ships continue to predominate in 1968.

Since the end of US airstrikes north of the 20th Parallel, the pace of shipping to North Vietnam has quickened. The number of foreign ships calling at North Vietnamese ports in May was the highest since March 1965, and imports were at a record high level. A Japanese ship arrived in May, the first since March 1965. Turnaround time of ships in the port of Haiphong, which had averaged 28 days in March, dropped to 19 days in April, and to 14 days in May. Extensive dredging of the approaches to the port has been resumed after a lapse of two years. Extension and repair of the wharves has been continued.

The increase in shipping activity probably will continue. Imports are expected to continue at a high level; as coal processing and handling facilities are restored, exports of coal should increase significantly.

Changes in North Vietnam's Seaborne Trade

1. The volume of North Vietnam's seaborne trade has changed only slightly since 1964. It increased slightly in 1965, decreased in both 1966 and 1967, and is on the upswing in 1968. The composition of this trade, however, has changed drastically. Imports have more than doubled during the period, while exports have dropped to less than 40 percent of the 1964 level, as shown in the following tabulation:

	1964		1965		1966		1967		Jan-Apr 1968	
	Million Tons	Percent	Million Tons	Percent	Million Tons	Percent	Million Tons	Percent	Million Tons	Percent
Total seaborne trade	*2.3*	*100*	*3.5*	*100*	*2.2*	*100*	*2.0*	*100*	*0.8*	*100*
Exports	1.6	69	1.7	67	1.2	53	0.6	29	0.2	27
Imports	0.7	31	0.8	33	1.0	47	1.4	71	0.6	73

Contraction of Exports

2. North Vietnam's exports by sea actually increased in 1965 as various foreign aid projects began to show results. Exports would have been larger, however, if airstrikes in July had not interdicted the Hanoi - Lao Cai rail line and rendered further exports of apatite impractical. In 1966, exports decreased substantially, as shown in the tabulation below, because of the virtual absence of apatite exports and a reduction in coal exports, both of which were due to the effect of US airstrikes:

	Thousand Tons				
	1964	1965	1966	1967	Jan-Apr 1968
Total exports	*1,560*	*1,710*	*1,170*	*570*	*226*
Coal	950	1,150	940	430	206
Apatite	340	320	10	Negl.	Negl.
Cement	140	80	100	30	Negl.
Pig iron	40	50	40	20	Negl.
Miscellaneous and general cargo	90	120	80	80	20

3. The slightly larger decline in exports in 1967 was due mostly to the sharp drop in coal exports, which resulted from heavy US airstrikes on powerplants and facilities for the transportation processing, and dockside loading of coal. Cement exports also declined as the result of airstrikes in April 1967 that made North Vietnam's only major cement plant inoperable. Exports of pig iron ceased

after airstrikes in 1967 on the Thai Nguyen metallurgical plant.

Expansion of Imports

4. During the three years of Rolling Thunder, seaborne imports to North Vietnam have more than doubled, increasing 23 percent in 1965, 21 percent in 1966, and 38 percent in 1967. Imports during the first four months of 1968 were 14 percent above the very high level of January-April 1967. As shown in the tabulation below, imports from Communist countries increased from 74 percent of total imports in 1964 to 98 percent of total imports in early 1968:

	1964		1965		1966		1967		Jan-Apr 1968	
	Thousand Tons	Percent	Thousand Tons	Percent	Thousand Tons	Percent	Thousand Tons	Percent	Thousand Tons	Percent
Total imports	*690*	*100*	*850*	*100*	*1,030*	*100*	*1,420*	*100*	*610*	*100*
From Communist countries	510	74	700	82	910	88	1,370	96	600	98
From Free World countries	170	25	150	18	120	12	50	4	10	2

5. The sharp increase in imports has resulted largely from increases in foodstuffs, petroleum, and miscellaneous and general cargoes. Imports in each of these categories during the first four months of 1968 were approximately equal to or higher than those for the entire year 1964, as shown in the following tabulation:

	1964		1965		1966		1967		Jan-Apr 1968	
	Thousand Tons	Percent	Thousand Tons	Percent	Thousand Tons	Percent	Thousand Tons	Percent	Thousand Tons	Percent
Total imports	*690*	*100*	*850*	*100*	*1,030*	*100*	*1,420*	*100*	*610*	*100*
Petroleum	140	20	170	20	200	19	250	17	147	24
Fertilizer	140	20	160	19	230	22	150	11	59	10
Foodstuffs	160	23	120	14	80	8	460	32	186	30
Timber	30	4	20	2	10	1	10	1	8	1
Miscellaneous and general	210	30	380	45	510	50	550	39	210	34

6. Within the general and miscellaneous category, imports of steel, industrial and construction equipment, vehicles, bituminous coal, and chemicals have been the most important. The dramatic increase in imports of food in 1967 after two successive years of decreases apparently was in response to poor harvests at the end of 1966 and during 1967 and diversions of labor from agriculture. These imports were mostly wheat flour from the Soviet Far East and rice from China.

Imports of fertilizer have stayed at a relatively constant level since 1963, except for an unexplained surge in 1966. No seaborne imports of arms or ammunition have been detected.

7. The large increases in imports of petroleum have occurred despite the thorough bombing of petroleum storage facilities in mid-1966.

Reversed Roles for Communist and Free World Ships

8. The relative participation of Communist and Free World ships in the North Vietnamese trade has been reversed since the beginning of Rolling Thunder. In 1964, Free World ships made 69 percent of the calls by foreign ships at North Vietnamese ports. During 1965 and 1966, calls by Free World ships fell off sharply because of the effect of US bombing on the availability of export cargoes, crew morale, skyrocketing insurance and wage costs, and US diplomatic efforts to discourage participation in trade with North Vietnam. At the same time calls by Communist ships rose in order to handle increased imports from the USSR and Communist China. Communist ships steadily increased their dominance in the trade until early 1968, as shown in the following tabulation:

	1964		1965		1966		1967		Jan-Apr 1968	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Total arrivals	*580*	*100*	*530*	*100*	*379*	*100*	*386*	*100*	*158*	*100*
Free World ships	402	69	256	48	74	20	78	20	43	27
Communist ships	178	31	274	52	305	80	308	80	115	73

The Withdrawal of Free World Vessels from the Trade

9. Since 1964, one Free World country after another has withdrawn its ships from trade with North Vietnam. Ships flying the flags of 15 Free World countries, led by those of the United Kingdom, made 402 arrivals at North Vietnamese ports in 1964. In 1967, there were only 78 such calls, and only five Free World flags were represented. The leading Free World participants in the trade during this period are shown in the following tabulation (and in greater detail in the table):

	Number of Arrivals				
	1964	1965	1966	1967	Jan-Apr 1968
United Kingdom	177	136	50	67	36
Norway	43	29	0	0	0
Japan	74	37	0	0	0
Greece	35	28	7	0	0
Lebanon	20	9	0	1	1
Cyprus	0	3	12	5	2
Other	53	14	5	5	4
Total	*402*	*256*	*74*	*78*	*43*

10. Ships of five of the countries involved in the North Vietnam trade in 1964 -- West Germany, Sweden, Denmark, Finland, and Indonesia -- have not participated in the trade since then. Ships of six other countries -- Japan, the Netherlands, Norway, Panama, France,* and Liberia -- withdrew during 1965 and did not call in either 1966 or 1967. British-flag ships continued to make the most calls, but their number dropped because of the withdrawal during 1965 of all British-flag ships under the effective control of the British government. The British-flag ships remaining in the trade are based in Hong Kong and are owned by Chinese Communist-controlled firms. These ships are engaged almost exclusively in trade between China and North Vietnam. Japanese ships were withdrawn from the trade after March 1965 because of the reluctance of the Japanese seamen's union to expose its members to possible US bombing. Norwegian ships withdrew after November 1965 because of US diplomatic pressure. Cypriot and Maltese ships entered the trade for the first time in 1965 and continued to participate on a small scale in 1966 and 1967.

11. By 1966 the only Free World countries whose flags were still appearing in the North Vietnam trade were the United Kingdom, Greece, Italy, Cyprus, and Malta. Greek ships withdrew

* *A French ship made a noncommercial call at Haiphong in 1966 to pick up bodies of French soldiers killed in the Indochina War.*

North Vietnam: Foreign-Flag Ship Arrivals, by Flag
1964-67 and January-April 1968

a. This vessel arrived at North Vietnam illegally flying the Cypriot flag.

from the trade after June 1966. A Lebanese ship called in December 1967 for the first time since June 1965. A Singapore-flag ship called for the first time in March 1968, and a Japanese ship reappeared in the trade in May 1968.

12. The role of Free World ships in North Vietnamese trade also has been changed. In 1964 and 1965 they carried four times as many exports as imports. In 1967 they carried almost four times as many imports as exports. Actually the volume of imports carried by Free World ships has remained relatively stable, even though the number of Free World arrivals in 1967 was less than one-fifth that in 1964. The volume of exports carried by Free World ships in 1967, on the other hand, was less than one-tenth of the 1964 level.

Changes in Pattern of Communist Shipping

13. Soviet shipping accounted for almost two-thirds of Communist arrivals during the first four months of 1968. This is a sharp change from 1964 when Soviet ships made up only about one-fourth of Communist arrivals. The share of Chinese ships, which accounted for 40 percent of Communist arrivals in 1964, dropped to about 30 percent in 1967 and early 1968. Calls by Eastern European ships dropped steadily and in 1967 were only one-half of the 1964 level. Czechoslovak ships withdrew from the trade after June 1965. Eastern European ships accounted for only 6 percent of Communist arrivals during January-April 1968. The changes in Communist shipping to North Vietnam during this period are shown in the following tabulation:

	1964		1965		1966		1967		Jan-Apr 1968	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Total Communist arrivals	*170*	*100*	*274*	*100*	*305*	*100*	*308*	*100*	*115*	*100*
USSR	48	27	79	29	122	40	181	59	72	63
Communist China	72	40	144	53	138	45	97	31	34	30
Eastern Europe	50	33	50	18	44	14	29	9	7	6
Cuba			1	Negl.	1	Negl.	1	Negl.	2	2

14. In addition to the change in volume of Soviet shipping to North Vietnam since 1964, there has been a great change in its character. In 1964, 64 percent of the Soviet dry cargo arrivals came from the Black Sea ports and only 31 percent came

from the Soviet Far East. During January-April 1968, only 26 percent of Soviet dry cargo arrivals came from the Black Sea and 66 percent sailed from the Soviet Far East. This change occurred partly as a result of the closure of the Suez Canal and partly because of the very large increase in Soviet deliveries of bulk foodstuffs in 1967 and early 1968. The USSR has generally delivered foodstuffs to North Vietnam from ports in the Far East and fertilizer and general cargo from Black Sea ports.

15. The predominance of Soviet arrivals from the Far East diminishes considerably if measured in terms of gross tonnage. The ships sailing from the Black Sea are much larger than those from the Soviet Far East and despite their relatively small numbers continued to provide more than one-half of the aggregate gross tonnage of Soviet dry cargo ships calling at North Vietnamese ports in 1966 and 1967.

16. The tanker situation is different. Until the end of October 1966, almost all of the waterborne shipments of petroleum to North Vietnam originated in the Black Sea. Since then, most of the petroleum has been delivered from the Soviet Far East, directly or by way of Communist China. Direct deliveries normally are made regularly on small Soviet tankers and sporadically on larger tankers. Deliveries from China are made in Free World tankers. Occasional shipments have been made from the Black Sea even since the closure of the Suez Canal, but these are dwarfed by the shipments from the Soviet Far East.

RECRUITMENT/IMPRESSMENT, AND INTELLIGENCE GATHERING ACTIVITIES WERE OF SUFFICIENT SCALE IN VARIOUS OF THE PROVINCES TO HAVE BEEN SPECIFICALLY NOTED. THERE WAS LITTLE EVIDENCE OF INTEREST SHOWN IN THE ALLIANCE OF NATIONAL, DEMOCRATIC AND PEACE FORCES. THE REACTION OF II CORPS GVN OFFICIALS TO THE PARIS PEACE TALKS APPEARS TO HAVE BEEN EITHER APATHETIC, BASED ON THE BELIEF THAT THEY WILL COME TO NOTHING, OR FEAR, BASED ON THE FEELING THE AMERICANS WILL MAKE MAJOR CONCESSIONS IN ORDER TO GET OUT OF VIETNAM. END OF SUMMARY.

1. CAPTURED DOCUMENTS, [redacted] AND VC PROPAGANDA INDICATED THROUGHOUT II CORPS DURING THE REPORTING PERIOD THAT THERE IS AN IMPENDING ATTACK ON THE AREA'S URBAN CENTERS. DURING THE REPORTING PERIOD, HOWEVER, THE CHARACTERISTIC ENEMY BEHAVIOR WITH RESPECT TO MILITARY ACTIVITY WAS THE AVOIDANCE OF MAJOR ENGAGEMENTS.

E0 12958 3.4(b)(1)>25Yr (C)

A. BINH DINH: THERE WERE THE USUAL REPORTS OF ENEMY STRENGTH AND MOVEMENT THROUGH THE COUNTRYSIDE OF BINH DINH BUT NO MAJOR CONTACT. THIS, TOGETHER WITH THE LESSENING OF ACTIVITY IN OTHER FIELDS OF VC ENDEAVOR IN BINH DINH, SEEMED TO LEND CREDIBILITY TO AN ARMY OF VIETNAM (ARVN) MILITARY

NO FOREIGN DISSEM CONFIDENTIAL APPROVED FOR RELEASE DATE: OCT 2000

REPORT THAT THE ENEMY HAD RECEIVED ORDERS TO RETREAT TO SAFE BASES IN ORDER TO AVOID CONTACT WITH FRIENDLY UNITS. ACCORDING TO A POLICE INFORMANT REPORT, SUICIDE SQUADS HAVE BEEN FORMED IN EACH VILLAGE WHICH ARE TO COORDINATE WITH VC/ NORTH VIETNAM ARMY (NVA) UNITS TO ATTACK THE DISTRICT TOWNS IN THE NEAR FUTURE. THIS REPORT SUPPORTS THE CONTENTION THAT THE VC ARE PLANNING TO ATTACK SOMETIME DURING THE SUMMER. A POPULAR BELIEF WAS THAT VC/NVA FORCES HAVE WITH-DRAWN TEMPORARILY IN ORDER TO REGROUP AND REORGANIZE THEIR FORCES FOR JUST SUCH AN ATTACK.

B. TUYEN DUC. RUMORS WERE THAT THE VC HAVE RECEIVED SUBSTANTIAL REINFORCEMENTS FROM NINH THUAN AND A LARGE BATTLE IS EXPECTED. THE VC ACCORDING TO THE RUMOR, INTEND TO INFILTRATE DALAT, OCCUPY THE HIGH GROUND AND TALL BUILDINGS AND ENGAGE IN STREET FIGHTING AS IN SAIGON. THERE WAS SOME EVIDENCE, HOWEVER, OF SOMEWHAT HEAVY INFILTRATION IN THE HAMLETS IN THE SOUTHERN AND NORTHEASTERN PART OF THE CITY.

C. BINH THUAN. MAIN VC PRESSURE CONTINUED TO BE AGAINST OUTLYING VILLAGES AND HAMLETS WHICH WERE SHORT OF SECURITY,

APPROVED FOR RELEASE
DATE: OCT 2000

E0 12958 3.4(b)(1)>25Yrs
(C)

WITH OCCASIONAL SMALL GROUND AND MORTAR ATTACKS AGAINST THE MAJOR POPULATION AREAS. THE ATTACKS ON RURAL CENTERS SEEMED DESIGNED TO DRAW AS MANY TROOPS AS POSSIBLE OUT OF THE PHAN THIET AREA. THE RECENT ACTIVITY IN THE SONG MAO AREA DID JUST THAT, WITH THE RECENT MOVE OF THE ARVN 44TH REGIMENT TO THAT LOCATION. VC PROPAGANDA EXPOUNDING THEIR LATEST ATTACKS ON SAIGON AND OTHER MAJOR CENTERS IN AN EFFORT TO RAISE THEIR PRESTIGE AND BRING HOME TO THE POPULATION THAT THE VC HAVE THE STRENGTH TO ATTACK PHAN THIET AND THE DISTRICT CAPITALS HAS PROMPTED THE PEOPLE IN PHAN THIET TO PURCHASE SANDBAGS IN ORDER TO BUILD BUNKERS IN HOMES. A LIVELY BUSINESS HAS SPRUNG UP IN THE MARKETING OF FILLED SANDBAGS WITH THE GOING PRICE PER BAG ABOUT VN$20.00 (U.S. $.17 ACCORDING TO THE OFFICIAL EXCHANGE RATE OF VN$118 TO U.S. $1.00).

D. KHANH HOA : VC PROPAGANDA CONTINUED TO ATTEMPT TO IMPLANT THE IDEA OF THE INEVITABILITY OF A VC VICTORY, AND PRISONER INTERROGATIONS, CAPTURED DOCUMENTS, AND AGENT REPORTS WERE UNANIMOUS IN PRADICTING ANOTHER BIG VC OFFENSIVE, PROBABLY ON THE CITIES. A CAPTURED DOCUMENT OUTLINED IN

EO 12958 3.4(b)(1)>25Yrs
(C)

DETAIL A PLAN FOR ATTACKING NHA TRANG WITH A BIGGER (THAN DURING TET) ATTACKING FORCE. SEVERAL PRISONERS HAVE SPOKEN OF PREPARATIONS FOR A NEW ATTACK, BUT THERE WERE NO INDICATIONS OF WHEN.

E. NINH THUAN. THE ENEMY'S ANNOUNCED INTENTION AS REPORTED BY INFORMANTS AT THE BEGINNING OF THE LAST REPORTING PERIOD WAS TO LIBERATE MILITARILY THE REVOLUTIONARY DEVELOPMENT HAMLET OF TU TAN, FIVE KILOMETERS SOUTH OF PHAN RANG, AND THIS THEY ATTEMPTED TO DO DURING THE REPORTING PERIOD. THE HAMLET WAS PARTIALLY DESTROYED AND THE RD PROGRAM RECEIVED A SEVERE SETBACK. THE INTENTION TO ATTACK PHAN RANG STILL STOOD.

APPROVED FOR RELEASE
DATE: OCT 2000

E0 12958 3.4(b)(1)>25Yrs
(C)

F. KONTUM. [redacted] INDICATE THAT THE ENEMY'S INTENTIONS WERE TO CONDUCT SAPPER ATTACKS AGAINST GVN AND ALLIED MILITARY INSTALLATIONS IN KONTUM CITY WHICH WOULD BE FOLLOWED BY A REGIMENTAL-SIZE GROUND ATTACK AGAINST THE CITY. DURING THE REPORTING PERIOD THE ENEMY CONTINUED TO AVOID MAJOR CONTACT BUT CONTINUED TO EXERT PRESSURE ON THE COUNTRYSIDE WITH ATTACKS ON OUTPOSTS, FIRE BASES, AND GVN-DEFENDED HAMLETS.

E0 12958 3.4(b)(1)>25Yrs
(C)

G. PLEIKU. A RECENT CAPTURED DOCUMENT FROM THE CURRENT AFFAIRS COMMITTEE OF VC GIA LAI PROVINCE COMMITTEE STATED THAT THE SECOND AND THIRD PHASES OF THE GENERAL OFFENSIVE WILL ENCOMPASS VIOLENT MILITARY OPERATIONS COMBINED WITH UPRISINGS OF THE POPULACE. THE MAIN OBJECTIVES WOULD BE CITIES AND THEIR OUTSKIRTS.

H. PHU YEN. [redacted] TENDED TO INDICATE A GENERAL OFFENSIVE WAS IN THE OFFING.

(C)

HAVE CAUSED A RISE IN THE PRICE OF RICE AND OTHER EVERY-DAY COMMODITIES, AND IN QUANG DUC, WHERE VC ROAD INTERDICTION CONTINUED TO BE SO WIDESPREAD THAT THE BULK OF THE PROVINCE'S SUPPLIES HAD TO BE AIR-LIFTED. ROAD INTERDICTION APPEARED TO BE A MAJOR PROBLEM IN THE CORPS' OTHER INLAND PROVINCES, SPECIFICALLY IN THE CASE OF HIGHWAY 14 IN KONTUM AND PLEIKU, HIGHWAY 19 IN PLEIKU, AND HIGHWAY 11 IN TUYEN DUC. THE MAJOR ROADS IN THE COASTAL PROVINCES, BY COMPARISON, WERE GENERALLY CLEAR. REVERSING THIS PATTERN, HOWEVER, WAS A NOTED INCREASE IN THE MINING OF ROADS IN COASTAL PHU YEN, WHILE HIGHWAY 20 THROUGH TUYEN DUC AND LAM DONG WAS REPORTED AS RELATIVELY SECURE.

3. VC INFRASTRUCTURE ACTIVITY GENERALLY CONTINUED UNABATED DURING THE REPORTING PERIOD. RICE-COLLECTION ACTIVITIES ON THE PART OF THE COMMUNISTS WERE SIGNIFICANT ENOUGH TO HAVE BEEN SPECIFICALLY NOTED IN EIGHT OF THE CORPS' TWELVE PROVINCES (ALL EXCEPT LAM DONG, PHU BON, TUEYN DUC, AND QUANG DUC). NEXT IN REPORTING FREQUENCY WERE VC RECRUITMENT AND IMPRESSMENT ACTIVITIES, SAID TO HAVE BEEN IMPORTANT IN BINH THUAN, BINH DINH, DARLAC, KONTUM, AND PLEIKU.

APPROVED FOR RELEASE
DATE: OCT 2000

SERVICE IN BINH DINH PROVINCE, REVEALED THE FOLLOWING OBJECTIVES OF THE ALLIANCE: "THE PRESENT VC POLICY IS TO CLEAR THE SOUTH VIETNAM BATTLEFIELD, ELIMINATE MILITARY REGION (MR) 5, OBTAIN SOVEREIGNTY FOR THE PEOPLE SO THAT THE DEMOCRATIC PEACE ALLIANCE FRONT CAN TAKE CONTROL OF MR 5 AND PARTICIPATE IN THE FUTURE COALITION GOVERNMENT." THE ONLY TANGIBLE EVIDENCE THAT SUCH AN ALLIANCE EXISTS IN PHU YEN WAS A PROPAGANDA LEAFLET FOUND ON THE BODY OF A DEAD VC IN TUY AN DISTRICT ADDRESSED TO "U.S. SOUTH KOREAN OFFICERS AND MEN" AND SIGNED BY "THE NATIONAL ALLIANCE FOR DEMOCRACY AND PEACE."

5. DURING THE PAST WEEK, [redacted] REPORTS AND A CAPTURED DOCUMENT REVEALED THAT THE ENEMY WAS ATTEMPTING

FOR THE LIBERATION OF SOUTH VIETNAM'S "WESTERN HIGHLANDS AUTONOMOUS MOVEMENT" IN WHICH VC CADRES MUST HOLD ALL KEY POSTS. THIS STRUCTURE WAS TO BE SET UP WITHIN THREE DAYS AFTER THE VC SEIZED POWER FOLLOWING A GENERAL OFFENSIVE AND UPRISING.

6. OFFICIAL REACTION IN II CORPS TO THE PARIS PEACE TALKS RANGED FROM APATHY TO FEAR--THERE WAS LITTLE ENTHUSIASM EXPRESSED ON THE SUBJECT. OFFICIALS IN DARLAC AND BINH DINH WERE NOTED AS BEING UNINTERESTED IN THE SUBJECT BECAUSE OF THE LACK OF ANYTHING CONCRETE COMING OUT OF THE TALKS SO FAR. INFLUENTIAL CITIZENS OF PLEIKU EXPRESSED THE FEAR THAT THE U.S. MIGHT AGREE TO CEDE THE GVN'S NORTHERN PROVINCES TO THE NORTH VIETNAMESE IN ORDER TO GET A SETTLEMENT, WHEREAS OFFICIALS IN KONTUM WERE AFRAID THAT THE AMERICANS WOULD AGREE TO A COALITION GOVERNMENT FOR THIS SAME REASON. JUNIOR OFFICERS IN QUANG DUC APPARENTLY RELATED THEIR FEELING THAT AMERICAN MILITARY ADVISORS DID NOT WANT TO REMAIN IN VIETNAM TO A FEAR THAT THE TALKS PRESAGED A U.S. PULL-OUT UNDER SOMEWHAT LESS THAN DESIRABLE CIRCUMSTANCES.

INTELLIGENCE REPORT

The Effect of the Vietnam War on the Economies of the Communist Countries

Summary

By mid-1968, direct outlays by Communist countries in support of the war in Vietnam, plus the cost of repairing damaged facilities in North Vietnam, probably exceeded the equivalent of US $3 billion. Indirect costs -- consisting primarily of a portion of rising Soviet military spending, but also costs associated with the denial of sophisticated Western technology -- could have doubled these direct costs.

From early 1965, when the United States began bombing the North, until mid-1968, the USSR, Communist China, and the East European Communist countries have furnished more than $1-1/2 billion in military aid to North Vietnam. Before the bombing, this aid was trifling. From 1965 to mid-1968, the Communist countries sent $1 billion in economic aid to North Vietnam (for data for 1965-67, see Table 1). Additional direct outlays by the Communist countries -- for shipping costs, the stationing of military and civilian personnel in North Vietnam, and the maintenance of North Vietnamese students -- totaled about $150 million. In North Vietnam itself, damage to economic facilities from the bombing is estimated to be $300 million.

Note: This report was produced solely by CIA. It was prepared by the Office of Economic Research and was coordinated with the Office of Strategic Research.

Two major indirect costs of the Vietnam war are mainly applicable to the USSR, although the trade control restraints have also had an effect on the economies of the Communist countries of Eastern Europe: (1) Heightened East-West tensions over Vietnam have strengthened the hand of the Soviet marshals and made it possible for them to obtain a larger allocation of resources than would otherwise have been the case. In the USSR, military spending in 1965-67 was 3-1/2 billion rubles greater than if it had been maintained at the 1964 level. It is not possible to specify what share of this increased Soviet military spending was due to Vietnam, but if the fraction were appreciable, then indirect military costs alone could be at least as large as the direct outlays made to North Vietnam by the Soviet Union. (2) The Soviet and East European support for the Vietnamese insurgency has slowed down the reduction of trade barriers with the Industrial West and particularly with the United States. This, in turn, has effectively denied access to some of the Western world's machinery embodying advanced technology as well as access to the technology itself -- for example, in the computer, communications, and electronics field. There has probably been a widening in the technological gap between the advanced Communist countries and the Industrial West.

Communist military and economic assistance to North Vietnam apparently has not limited the scale of Communist aid programs in the Free World. Deliveries of aid to the less developed countries of the Free World continued on the same general level as in 1965-66, despite sharply stepped up deliveries to North Vietnam. The massive Soviet resupply of the Arab states after the latter's disastrous war with Israel in June 1967 illustrates the USSR's ability and willingness to sustain substantial unplanned costs in its aid programs if the political gains are judged to be adequate.

b. Data show the value at Soviet foreign trade prices of weapons, other military equipment, and ammunition. They exclude aid for the construction of military installations and defense-related facilities.

BLANK PAGE

I. Introduction

1. The measurement of the effect of the Vietnam war on the economies of the Communist countries presents several difficulties. In the first place, information is not complete. A great deal of effort has gone into analyzing available information, however, and the data presented in this report may be regarded as reasonable approximations to the real quantities.

2. A second difficulty concerns the adoption of a common unit for valuing widely varying items which originate in wholly different economic circumstances. Current US dollars is the standard used in this report. The chartering of a Greek freighter for the Vietnam run may present no problem in valuation, but the dollar valuation of an obsolescent Soviet jet fighter whose original ruble cost is even in doubt or the cost of shipping goods across a China disrupted by political turmoil present formidable problems.

3. Such problems are also related to the question of "opportunity cost" -- that is, the problem of identifying the best alternative use of resources shipped to North Vietnam. In some cases, a Communist country may be forgoing an important economic gain to support North Vietnam; in other instances, the support may represent only a minor burden or even a net advantage. For example, in dispatching antiaircraft artillery units to North Vietnam, the Chinese Communists would gain some advantage because the alternative use of these troops -- training within China -- polishes their skills much less effectively than does service in a combat area. On the other hand, a Communist country that charters Western ships forgoes the use of this hard currency for purchase of modern machinery in the Free World.

4. The direct economic costs underwritten by the Communist countries include the sending of men, equipment, and materials to Vietnam, for which no return is expected. For North Vietnam itself, the destruction of capital plant by bombing and the lowering of output are direct costs. The

detailed discussion in this report focuses on these direct costs, which are more concrete and relatively easy to measure. The indirect costs to the Communist countries are harder to pin down. They may be the result of the soured international political atmosphere -- for example, access by the Communist countries to US technology has probably been delayed. Or they may be the result of the preoccupation of Communist leaders with the problems of supporting the war rather than with the problems of modernizing their domestic economies.

II. Effect on the Soviet Economy

5. The direct economic costs of Soviet aid to North Vietnam include the cost of (a) the military and civilian goods sent to North Vietnam; (b) the Soviet military and civilian advisors stationed in North Vietnam; and (c) the Vietnamese students attending colleges and universities in the USSR. The indirect burden on the Soviet economy includes (a) the barriers to trade with the United States that might be removed if not for the Vietnam war; and (b) the increase in influence of the military leadership in the USSR in the competition for scarce resources, ascribable to the uncertainties and political atmosphere surrounding the Vietnam war.

A. Direct Costs

Military Aid

6. The value of military equipment and supplies sent by the USSR to North Vietnam during 1965-67 was approximately $1.1 billion. Almost one-half of this total represented ammunition (small arms, mortar, and antiaircraft), about one-fourth involved surface-to-air missile (SAM) systems, and the remainder included artillery, aircraft, radar, armor, motor vehicles, and infantry weapons (see Table 2).

Table 2

USSR: Distribution of Military Aid
to North Vietnam
Total for 1965-67

Type of Equipment	Value (Million US $) a/	Percentage Distribution
Ammunition	509	47.1
SAM systems	291	26.9
Artillery	143	13.2
Aircraft	86	8.0
Radar	28	2.6
Armor	10	0.9
Motor vehicles	9	0.8
Small arms and infantry weapons	5	0.5
Total	*1,081*	*100.0*

a. In Soviet foreign trade prices expressed in US dollars.

7. Some of the military equipment sent to North Vietnam is obsolete by Soviet standards and is drawn from stockpiles that need no replenishment. The fire control radar sent to North Vietnam, for example, is patterned after US systems used by the USSR during World War II and is no longer used in the USSR. The IL-28 light jet bomber, the MIG-15/17 jet fighter, and the U-MIG-15 jet trainer are in storage in the USSR; they are not in current production and those that are sent to North Vietnam are not replaced. The antiaircraft artillery and much of the armor are similarly obsolete and no longer used by the USSR. It is not known whether ammunition is drawn from stockpiles or current production.

8. Much of the equipment sent to North Vietnam is not obsolete, however. The MIG-21 jet fighter, the MI-6 helicopter, the 122-mm howitzer D-30, and the Side Net radar are examples of Soviet equipment

sent directly from current production to North Vietnam. All trucks and other motor vehicles, as well as replacement missiles for the SAM systems, apparently are drawn from current production. Nevertheless, the quantities of such equipment sent to North Vietnam have been too small as a fraction of Soviet output to have any significant effect on the rate of production in the USSR. In the case of the MIG-21 jet fighter, for example, the USSR produced an estimated 2,000 units in 1965-67; the number of such fighters sent to North Vietnam over the three-year period is estimated at 67, or about 3 percent of total production.

9. The dollar value of the military aid cited above is not a good measure of the economic burden to the USSR because it is based on foreign trade prices expressed in US dollars. On the basis of internal Soviet prices, the total value of military aid to North Vietnam during 1965-67 amounts to about one-half billion rubles. That part of military aid that represents a claim on current production amounts to approximately 2 percent of Soviet production of military hardware in 1965-67.

10. During 1965-67 the USSR stationed about 2,000 military personnel in North Vietnam, primarily for training and support purposes. The number was probably larger during the first half of 1965, when Soviet technicians exercised operational control of the SAM system, and in mid-1966, when they temporarily resumed control of the system. In general, the Soviet military personnel stationed in North Vietnam provide assistance and training in the use of SAM and radar equipment, aircraft, and communications equipment. The salaries of these personnel, as well as the cost of their maintenance, are paid by the USSR. Because of the small number of military personnel involved, salaries and maintenance probably amount to less than 4 million rubles annually. Furthermore, the benefit from their training in a combat area may well offset any net cost of their assignment to Vietnam.

Economic Aid

11. In addition to the distinctly military aid discussed above, the USSR also provides North Vietnam with economic aid, mostly in the form of grants for which repayment is not required. In

the three-year period 1965-67, the USSR delivered a total of $515 million of non-military goods to North Vietnam. Only a small portion of this total -- about $80 million -- was offset by North Vietnamese exports to the USSR, so that $435 million of net economic aid was involved. Of this total, in turn, about $300 million represented grants-in-aid, and the remainder was delivered on a credit basis, subject to repayment in goods or hard currency. There is no evidence that North Vietnam made any payments on this trade deficit during the period under study.

12. The economic aid consists of such products as petroleum, trucks and other motor vehicles, and construction equipment as well as such consumer goods as cotton and silk textiles and bulk foodstuffs. Although designated as "non-military," these goods often play a direct role in sustaining military operations.

13. Whereas much of the military aid is drawn from stockpiles that need no replenishment, the economic aid in general is drawn from current production and represents resources forgone in the civilian economy. In domestic prices, the economic aid probably amounted to at least one-quarter of a billion rubles. Some of the aid, moreover, consisted of products that could have been sold elsewhere for badly needed hard currency. The diesel fuel and wheat flour shipped during 1965-67, for example, could have been sold in the West for almost $25 million.

14. As in the case of military goods taken out of direct production, the civilian goods sent to Vietnam represent only a tiny fraction of Soviet output of these items. The Soviet planners almost certainly have not had to readjust their output goals for any major civilian item as the result of the Vietnam war.

Other Aid

15. In addition to the goods described and valued above, the USSR underwrites three "service" types of economic aid for North Vietnam -- that is, the costs of (a) Soviet economic technicians stationed in North Vietnam, (b) North Vietnamese

students attending Soviet colleges and universities, and (c) the shipment of goods from the USSR to North Vietnam.

16. The number of Soviet technicians in North Vietnam has been minuscule, averaging only about 130 per year during 1965-67, and the total cost of their services probably was about one-half million rubles. Part of this cost, moreover, may have been assumed by North Vietnam. The number of North Vietnamese students in the USSR increased from about 2,000 in 1965 to 5,000 in 1967. The total cost to the USSR, including plane fare from Hanoi as well as tuition, room, and board, is estimated at about $25 million in the three-year period 1965-67. In addition to these costs of training and housing foreign students, there is an additional "cost" involved for the USSR because these students preempt vacancies in colleges and universities that would otherwise be filled by Soviet students.

Shipping Costs

17. As for the shipping costs of military and economic aid, the available price information permits the valuation of shipments by sea in terms of dollars and shipments by land in terms of rubles. Shipping costs by sea for the period 1965-67 are estimated at about $13 million, and shipping costs by land about 21 million rubles. If the official exchange rate is used for currency conversion, total shipping costs thus amounted to $36 million, or 33 million rubles.

18. Although the USSR used its own ships for practically all seaborne shipments to North Vietnam, the diversion of these ships made it necessary to charter Western shipping in some of its other trade. The ships involved, moreover, could otherwise have been used on a charter basis to Free World countries. Thus the costs of the North Vietnamese run are best represented by the loss in hard currency of $13 million.

19. Shipments over land to North Vietnam involved the use of the Trans-Siberian rail route and subsequent transshipment across China. The shipments represented a negligible fraction of

the overall capacity of the Trans-Siberian route, and thus constituted no particular burden to the Soviet domestic transportation system. Practically all of the overland shipping costs represent the costs of transshipment across China. The cost in resources to China of running the additional trains over its lines is quite small; thus the net cost of transshipment to the Communist countries as a whole also is quite small.

B. Indirect Costs

20. In addition to the direct costs of the Vietnam war, the performance of the Soviet economy is affected indirectly by the war because of (a) continuing restrictions on trade with the United States and (b) the increased preemption of scarce resources by the military establishment. These indirect costs cannot be assessed in terms of rubles and dollars, but they almost certainly are more important to the USSR than the small direct costs described above. For some years the USSR has been striving to buy Western machinery embodying advanced technology as well as the technology itself as part of its effort to modernize the Soviet economy. The United States has supplied very few of these imports -- partly because of trade barriers such as export controls and the USSR's inability to gain most-favored-nation treatment in its trade with the United States. More important, the USSR has had to rely on medium-term and long-term credits to finance its machinery imports, and these credits have not been available in the United States to the extent that they have been in other Western countries.

21. The Soviet position in the Vietnam war has restricted progress on reducing trade barriers with the United States. Therefore, the USSR has in effect been denied an important alternative source of machinery and technology. If US-Soviet trade were conducted on the same basis as West European trade with the USSR, the USSR would be able to increase its total imports of machinery and, in some instances, would have access to machinery better suited to its needs.

22. The United States has opened a well-publicized "technological gap" with Western Europe; the gap between overall US and Soviet technology is even wider. Computers and their auxiliary equipment are a leading example of US technological superiority. Access to this technology would appreciably benefit the Soviet economy even if only a few hundred million dollars were involved each year. Such imports would be feasible only if existing US restrictions were considerably relaxed. Other fields in which the USSR would benefit substantially from access to Western technology are communications and electronics.

23. The most significant cost of the Vietnamese war to the Soviet economy, however, may have been its role in bolstering military claims in the competition for economic resources. Soviet military expenditures, after ten years of relative stability, increased by about 11 percent between 1965 and 1967, despite urgent needs for more investment in industry and agriculture and growing difficulty in satisfying the demands of Soviet consumers.

24. Although much of the rise in defense spending had its origin in decisions made much earlier to upgrade the strategic attack and strategic defense systems, the outbreak of conflicts in the Middle East and Vietnam has drawn the attention of the Soviet military to the need to devote more resources to general-purpose forces capable of handling limited war situations. Moreover, the uncertainties and political atmosphere surrounding the Vietnam war undoubtedly strengthened the hand of the military leadership and its supporters in the Soviet leadership in the decisions made on resource allocation in 1966 and 1967.

25. The total cost of economic and military aid to North Vietnam in 1965-67 was less than a billion rubles; Soviet military spending in this same period was 3-1/2 billion rubles greater than if spending had been maintained at the 1964 level. It is not possible to specify what share of this increased Soviet military spending was due to Vietnam, but if the fraction were appreciable, then indirect military costs could be at least as large as the direct outlays made to North Vietnam by the Soviet Union. Furthermore, whereas the direct Soviet support of

the Vietnamese war involves a wide range of resources in fairly adequate supply, the rise in Soviet military spending takes high-quality machinery and materials badly needed for the modernization of the general economy.

III. Effect on the Economies of Eastern Europe

A. Direct Costs

26. The direct economic costs of the Vietnam war to the East European Communist countries* in 1965-67 totaled about $180 million. The costs include some economic aid, primarily in the form of trade credits and shipping costs, and the costs of training Vietnamese students. The total economic burden was shared fairly evenly among the six East European countries, with no single country contributing more than $35 million. Eastern Europe has provided only token military aid to North Vietnam.

Economic Aid

27. During 1965-67, North Vietnam imported goods from the East European Communist countries valued at about $195 million. These imports were offset in part by exports amounting to $55 million, leaving a trade deficit of about $140 million. Grants-in-aid amounted to about $15 million, so that net economic aid was about $155 million. The trade deficit probably will be converted ultimately to grants-in-aid. There is no evidence of North Vietnamese repayments on credits during 1965-67, and trade credits in the past have been converted into grants-in-aid.

28. Machinery and other heavy equipment, including transportation equipment, seems to dominate East European exports to North Vietnam. Other exports include cotton textiles, bulk foods, and medical supplies. As in the case of Soviet support to North Vietnam, the goods involved in economic aid often play a role in sustaining military operations.

29. Some of the consumer goods could have been marketed in the West for hard currency. The machinery would have found a less ready market in the West. The economic aid to North Vietnam, in any case, was too small to have any significant impact on rates of growth in any of the East European countries.

---

* *Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Rumania.*

Other Aid

30. The number of North Vietnamese studying in East European Communist countries was about 6,000 in 1967, 2,000 in 1966, and probably less than 2,000 in 1965. The opportunity cost of this training is the training which could have been given to the same number of native students. The financial cost, using a figure of $2,500 per head per year (a rough figure used for like students in the USSR), was about $25 million in 1965-67. The cost sometimes is handled through channels other than the state budget. In Czechoslovakia and East Germany, for example, contributions on behalf of the North Vietnamese students are solicited from workers in factories and offices.

31. The shipping costs of exports from the East European Communist countries to North Vietnam amounted to about $5-1/2 million in 1965-67. Although most of the shipping is done by Polish ships, each of the countries presumably pays its share of the shipping costs. These shipping costs, as in the case of the USSR, represent a loss in hard currency earnings to the extent that the ships involved could have been chartered for hard currency. Unless the other East European countries paid Poland in hard currency for delivering their aid to North Vietnam, Poland sustained most of this loss in potential hard currency earnings.

B. Indirect Costs

32. The indirect effects of the Vietnam war on the East European economies bear most heavily on the trade relations between the United States and the East European countries. East European trade with NATO countries other than the United States increased by 14 percent a year in 1965-67, and NATO countries provided the six East European countries with about $1.9 billion of new medium-term and long-term credits. During the same period, US trade with Eastern Europe has remained stable at about $250 million.

33. Eastern Europe has an urgent need for Western technology and capital goods, and its expanding trade with Western Europe reflects this need. The East Europeans would like to buy and sell more in the United States but the development of

Eastern Europe's trade with the United States has been held back by difficulties (a) in finding markets in the United States for East European goods and (b) in obtaining medium-term and long-term credits in the United States on the same terms available in Western Europe. Even if US-East European trade could not be increased significantly, the East Europeans would benefit by involving another powerful trading nation in the competition regarding prices of capital goods and the credit terms attached to purchases from the West. Because of the Vietnam war, the political atmosphere in the United States had not been favorable for the legislation or administrative measures required to relax export controls, grant most-favored-nation treatment, or increase the availability of medium and long-term credit to Eastern Europe. Indeed, new legislation prohibits the Export-Import Bank from supporting sales to countries giving aid to North Vietnam and thus hamstrings new initiatives the United States might make, for example, with regard to its economic relations with Czechoslovakia.

IV. Effect on the Economy of Communist China

34. Communist China's total aid to North Vietnam in the period 1965-67 is estimated at $505 million, including $300 million of military aid (military end items only) and $205 million of economic aid (both war-support items and consumer goods). Aid for 1968 may increase somewhat above the 1967 level. Since the start of the American bombing of North Vietnam, China's aid has increased sharply, as shown by the following tabulation:

	Million US $			
	Total 1954-64	1965	1966	1967
Military aid	70	60	95	145
Economic aid	455	50	75	80
Total	*525*	*110*	*170*	*225*

35. In 1965-67, China has given North Vietnam more aid in monetary terms than any country except the USSR. In tonnage terms, China's contribution

has far exceeded that of any other country. This support has been of great aid to North Vietnam, particularly in support of its subversive efforts in the South. Yet it has cost the Chinese economy very little.

36. China's greatest contributions have been in items that the Chinese can provide with the least strain on the economy -- rail and sea transport, small arms and ammunition, construction materials, light machinery and equipment, foodstuffs, textiles, and other consumer goods. In addition, China has maintained 30,000 to 50,000 engineering, antiaircraft, and radar troops for use in the reconstruction and guarding of transportation lines north of Hanoi.

37. China's aid to North Vietnam could become a perceptible economic burden if Mao's great political rectification campaign -- the Cultural Revolution -- continues. The growth of the Chinese economy has already been ended by the physical violence and administrative dislocations of the Cultural Revolution, and any extension of these problems would intensify the already serious economic problems. Nevertheless, because of the small cost of Chinese aid to North Vietnam, a cut in aid on economic grounds is unlikely in the near future.

A. Military Equipment

38. The increasing supply of small arms and ammunition to North Vietnam would be the only military aid having any real effect on China's economy, and that effect would be small (see Table 3). These items represent only a small proportion of the tonnage but more than half the value of material sent by China during 1965-67. China, however, can easily spare these materials from available stocks or replace them by increasing present production. For most of these items, the rate of supply to North Vietnam is probably no more than 25 percent of China's domestic manufacturing capacity. Only under sharply increased disturbances from the Cultural Revolution would any needed increase in production pose a serious problem.

39. Most of the other military items supplied by China have been in token amounts. In 1965, China supplied some 25 T-34 medium tanks and in 1967 some

Communist China: Volume and Value of Military Aid Deliveries to North Vietnam a/
1965-67

Communist China: Volume and Value of Military Aid Deliveries to North Vietnam a/
1965-67
(Continued)

	1965		1966		1967	
	Units	Million US $	Units	Million US $	Units	Million US $
Small arms and other infantry weapons		10		35		22
Ammunition (metric tons)	8,000	33	10,000	41	23,000	94
Total value		*60*		*95*		*145*

a. The data refer exclusively to combat materiel; they exclude aid designed for war-support purposes. Values reflect foreign trade prices charged by the USSR for equipment delivered to the less developed countries of the Free World.
Because of rounding, components may not add to the total values shown.
b. Estimates for vehicles assigned to the armed forces. Vehicles used for military-support purposes are not included.

50 MIG-15 and MIG-17 jet fighters and a number of artillery pieces. These items were either obsolescent or excess equipment of small value to China in monetary or strategic terms.

40. China has supplied Hanoi with most of its modern naval combatant vessels -- all patrol or PT boats -- but the number in this period (10) has not affected China's supply or production. In 1968, China could replace or increase the units in North Vietnam from its own operational units with no appreciable loss to its own order of battle.

B. Military Manpower

41. The cost to China of maintaining the 30,000 to 50,000 troops it has in North Vietnam is merely a matter of shipping costs for the necessary food and other supplies for these troops. China would have to maintain these troops if they were still stationed in China; thus the real cost to China is a shipping cost of approximately $200,000 for the estimated 12,000 metric tons of supplies shipped each year. Even this amount may exceed the true net cost, because these troops might otherwise be stationed at distant posts in China that also entailed long-distance shipment of supplies.

42. An important offset to this cost for China is the combat training acquired by these troops during tours in North Vietnam. China has rotated the troops periodically to spread the benefit of this training. The value of this experience has been particularly high for the antiaircraft and radar troops. The engineering troops probably would be of value to China for construction projects at home, but their loss is negligible in an economy where the labor supply is abundant.

C. Industrial Equipment and Materials

43. China has shipped substantial quantities of construction materials such as steel, cement, and railroad construction equipment as well as trucks, spare parts, drugs and medicines, and other machinery and equipment. Coking coal has also been supplied for the Thai Nguyen steel works, which was constructed by China for North Vietnam. Coal shipments ended after the bombing of Thai Nguyen in May 1967, and the total shipped in 1967 is estimated at 65,000 tons, a drop of 100,000 tons from each of the preceding two years.

44. All of these materials have accounted for more than half the total tonnage of China's economic aid for 1965-67 (1.8 million tons) but probably less than one-half of the total value of the aid for this period ($205 million). North Vietnam's needs presumably will change with the changed pattern of American bombing and the reduced need for railroad reconstruction. The composition of aid is expected to shift away from the bulk items in the industrial category toward the restoration of plant and equipment.

D. Consumer Goods

45. Among consumer goods, China's most important export has been foodstuffs. In 1967, more than 200,000 tons of grain and other bulk foodstuffs were identified in shipments to North Vietnam from China by sea. Undoubtedly other food shipments were among the estimated 300,000 tons of unidentified cargo shipped by China via rail and sea. Thus the total food shipments from China in 1967 probably were more than one-third of the economic aid in tonnage and about one-half of the value. Despite the small volume of identified shipments of food in 1965 and 1966, the ratio was presumably in the same proportion for these years, although smaller in absolute numbers.

46. China had a good harvest in 1967, and the shipments to North Vietnam represented only a small fraction of 1 percent of total domestic food supply. Shipments are expected to increase again in 1968 even though China's domestic output of food probably will drop.

47. China also sends North Vietnam sizable quantities of textiles, both cloth and finished clothing. The annual value in 1965-67 probably ranged from $5 million to $15 million. More than 20 million meters of cloth were shipped in 1967. Shipments in 1968 would normally be expected to increase; they would still remain less than 1 percent of domestic production. Because of the Cultural Revolution, which has led to a decline in textile production and to slashes in cloth rations, any additional supplies for North Vietnam would be at the expense of an already short-changed populace. Nonetheless, the amounts involved are small and the inconveniencing of additional consumers within China is not likely to be a decisive factor in Chinese policy.

48. The food and textile shipments to North Vietnam, however, may have been made, not at the expense of domestic consumption, but at the expense of exports to the Free World. This alternative is discussed briefly under "Foreign Exchange Implications," below. Other consumer goods supplied by China to North Vietnam are minor in volume and value.

E. Shipping Costs

49. The cost to China of transporting goods to North Vietnam is small in terms of both money and alternative opportunities. Costs of transshipment of the materials sent by rail from the USSR and the East European Communist countries are borne by those countries. The Chinese rail system has more than enough unused capacity to handle the additional burden. The Cultural Revolution, however, has placed China's rail system under a strain and has caused delays, bottlenecks, and shortages of raw materials, such as coal. Special efforts have been necessary to expedite goods bound for North Vietnam, both shipments and transshipments. These efforts are not to be regarded as an economic cost of the Vietnam war but rather as one attempt to straighten up the economic dislocations caused by the Cultural Revolution.

50. Total shipping costs for both economic and military aid are minor for rail transport -- approximately $12 million for 1965-67 -- particularly since the cost is internal and does not involve hard currency. Cost for seaborne shipments for the entire period are estimated at $15 million, but again most of the costs do not involve hard currency. The small hard currency costs involved are discussed below.

51. These costs are estimated from tonnages shown in Table 4. Miscellaneous and other cargoes have been estimated according to the principal commodities known to be supplied by China. Rates have been assigned according to the latest rates available. Shipping points have been estimated according to the type of commodity. Method of shipment, where unknown, has been arbitrarily assigned to fit the total tonnage estimated for the commodity. The resulting shipping costs are

reasonably good estimates for costs which in any case are not subject to normal economic valuation in the marketplace.

Table 4

North Vietnam: Imports from China
1965-67

	1965	1966	1967
	Volume (Thousand Metric Tons)		
Total (rounded)	*520*	*665*	*710*
By sea	247.8	305.9	501

Total	*130*	*190*	*235*
Military aid c/	60	95	145
Economic aid	50	75	80
Other economic d/	20	20	10

a. Presumably transshipment of Soviet POL.
b. Estimated volume carried by Chinese and North Vietnamese ships, most of which probably came from China.
c. Value of military hardware and ammunition, excluding the value of military troops or engineers, and their support.
d. Value of North Vietnamese imports paid for with exports.

F. Foreign Exchange Implications

52. The most important foreign exchange implication for China is the presumed loss of potential hard currency earnings -- estimated at $35 million to $45 million -- as a result of increased shipments of food and cloth to North Vietnam. The amounts of cloth being sent to North Vietnam, however, are far less than the amounts formerly shipped to the USSR and Indonesia before those markets were lost. China has had trouble finding alternative markets, and these shipments represent less of a hard currency loss than it seems at first glance. In the same way, the largest item of food sent to North Vietnam is rice -- at least 150,000 tons in 1967 worth approximately $25 million -- and the increase represented here is much less than the decrease in sales to Japan. China probably could improve its hard currency position by sales of these materials to the Free World, but not by as much as the total possible value. In effect, this judgment means that the food and cloth shipments to North Vietnam are partly at the expense of the domestic consumer -- where they are a drop in the bucket -- and partly at the expense of foreign exchange earnings -- where they could be used to expand imports of machinery and materials from the Free World.

53. Another potential hard currency cost to China is the cost of chartering Free World vessels to ship materials to North Vietnam. Almost all of the Free World shipping going to North Vietnam in recent years has been chartered by China, but usually from firms in Hong Kong that are believed to be controlled by China. In essence, China has been chartering ships from itself; thus the real hard currency costs would be in opportunity costs. Here, again, China's lack of an adequate merchant fleet to handle its own foreign trade means that the alternative use of these ships would have been in China's own trade with the Free World. The real hard currency cost, then, is the increased shipping costs to China in its Free World trade because these ships were not available. These costs have probably been about $10 million for the period 1965-67 based on an estimated 100,000 tons a year carried by these ships and using an average freight rate for the types of cargoes carried.

V. COCOM Effect and Effect on General Economic Relations with the West

54. The war in Vietnam is one, but only one, of the factors that are reviving the issue of a "China differential" in economic defense arrangements. China's support of North Vietnam probably has not made an appreciable difference in China's ability to import modern equipment and technology from non-Communist industrialized nations. China's general attitude toward trade with the West and toward admission of Western technicians has been more important in determining changes in its economic relations with the West than has the Vietnam war.

55. In any case, China is already receiving from Japan and Western Europe substantial quantities of machinery and equipment directly or indirectly related to its military effort. Through various means China already is getting technology related to advanced weapons from the West, and China's support or lack of support of North Vietnam does not seem to affect this situation. Whereas the USSR could profit from fuller access to US technology, Communist China is not able to absorb all the opportunities now available for technical support from the Free World.

VI. Effect on the Economy of North Korea

56. North Korean shipments of material aid to North Vietnam apparently have been only in token quantities. Accordingly, the cost is small but, in the absence of detailed information, is not quantifiable with any precision.

A. Military Aid

57. North Korea has shipped an unknown number of light weapons -- mostly 7.62-mm semiautomatic and automatic AK rifles, but also some light machineguns. North Korean ground forces in North Vietnam number only several hundred men, and they are employed mainly in the capacity of advisors. About 35 North Korean pilots have served in North Vietnam since 1965 on a rotational basis, flying combat missions in MIG jet fighters. The 175 North Korean pilots, however, have probably gained more in combat experience than they have contributed to the war effort.

B. Economic Aid

58. Economic aid agreements were signed with North Vietnam in July 1965, January and September 1966, and August 1967. No details on amounts of aid and commodities were publicized. Materials shipped under these agreements probably include small amounts of fish, steel products, farm equipment, railroad equipment, diesel engines, cement, fertilizer (ammonium sulfate), textiles, industrial products, and medical supplies. Barges and lighters have also been shipped in recent years, including 20 to 25 in 1967 and 3 to 5 in the first quarter of 1968.

VII. Effect on Communist Aid Programs in the Free World

A. Military Aid Programs

USSR

59. There is no indication that Soviet military and economic assistance to North Vietnam has limited the scale of Soviet military aid deliveries to less developed countries of the Free World or to Cuba. Notwithstanding the increased amount of aid channeled to North Vietnam since the start of the US bombing in early 1965, the USSR has consistently been able to carry out its programmed military aid obligations to the less developed countries and even expand the list of countries participating in the program. Barring a drastic increase in the dimensions of the Soviet aid program in North Vietnam, the USSR will be able to continue fulfilling its other military aid commitments for the foreseeable future.

60. The less developed countries receiving Soviet arms aid have been provided with practically all of the major items of Soviet military equipment supplied to the North Vietnamese, including MIG-21 jet fighters, SA-2 surface-to-air missiles, anti-aircraft artillery, and infantry weapons. In addition, the USSR has supplied the less developed countries with TU-16 jet medium bombers, SU-7 fighter-bombers, *Komar*-class and *Osa*-class missile patrol boats, and coastal defense cruise missiles, items not yet identified in the North Vietnamese inventory.

61. The 25 percent decline in Soviet military aid deliveries in 1965, compared with the annual average of 1960-64 (see Table 5), is largely explained by the curtailment of the program in Indonesia after the abortive Communist coup of September 1965. In 1965, Indonesia received only $50 million worth of military equipment -- about a 70 percent decline from the $170 million average of annual deliveries in 1960-64.

Table 5

Communist Countries: Military Aid Deliveries to Less Developed Countries 1960-67

Million US $

Donor	1960-64 (Average)	1965	1966	1967
USSR	448	336	450	373
East Europe	5	9	43	27
Communist China	2	3	46	
Total	*455*	*348*	*539*	*400*

62. In 1967 the value of Soviet military deliveries to less developed countries rose to $450 million, or the average annual level of deliveries in 1960-64. This increase was principally the result of large-scale deliveries to India of $165 million worth of equipment.

63. The massive Soviet resupply of the Arab states after the June 1967 war with Israel underscores the USSR's ability and willingness to sustain substantial unplanned costs in its arms aid program. Since mid-1967 the USSR has supplied the UAR, Syria, Algeria, and Iraq with an estimated $350 million worth of military equipment -- most of which has been earmarked for restoring Arab military inventories to pre-war levels.

64. In addition to its substantial deliveries of military aid to the Free World in 1965-67, the USSR provided increased amounts of military aid to Cuba. Soviet military aid deliveries to Cuba grew

from September 1966 to December 1967 to the highest level since the period prior to the missile crisis of late 1962. During this recent period the USSR shipped some 58,000 tons of military cargo -- largely replacements for worn-out or obsolete equipment. Among the items delivered were at least 27 MIG-21 fighters, six *Komar*-class guided missile patrol boats, seven SO-1-class subchasers, and a number of 200-mm multiple rocket launchers.

Eastern Europe

65. Eastern European (mostly Czechoslovak) military deliveries to the less developed countries have not been perceptibly affected by demands of the Vietnam war. The Eastern European countries delivered an estimated $79 million in military equipment to those countries during 1965-67, about three times the total amount delivered in the previous five year period.

Communist China

66. Lack of information precludes any definitive judgment on the effect of the Vietnam war on the small Chinese Communist military aid program in the less developed countries. The absence of any identified Chinese military aid deliveries in 1967, following substantial deliveries to Pakistan in 1966, may have been the result of the disruptive effects of the Cultural Revolution on China's foreign relations. Given the small size and scope of China's military aid program in the less developed countries, it is difficult to see how China's support of the Vietnam war would rule this program out on economic grounds. In any case, Chinese Communist military deliveries to several less developed countries have resumed in 1968.

B. Economic Aid Programs

General

67. Communist assistance to North Vietnam has had no discernible effect on the scope or character of Communist economic aid programs in the less developed countries of the Free World or on the willingness of Communist countries to implement aid previously committed to these nations. Communist countries have continued to extend additional aid to less developed countries where

opportunities exist, in spite of their commitments to the war effort in Vietnam. Both programs in the aggregate are a tiny fraction of Communist resources and, moreover, they represent demand that is "spread out" over a broad area of the donor economies.

Extensions

68. In 1965 and 1966, Communist commitments of economic assistance to the less developed countries rose to record levels at the same time that support of the war effort of North Vietnam was expanding (see Table 6). Although new economic aid commitments to less developed countries dropped in 1967 to a 12-year low, the decline is not attributable to a change in Communist aid policy or to the diversion of supplies to North Vietnam. Instead, it reflects the reduced opportunities in 1967 for extending additional aid to these countries, following three years of record-high extensions. Recent Soviet aid overtures to less developed countries demonstrate the high priority that the USSR continues to assign to economic aid where it may contribute to the containment or reduction of Western influence or provide long-run economic benefits to the USSR. In 1968, Communist extensions of economic aid to less developed countries are expected to rise again and, at a minimum, will exceed annual average extensions in 1960-64.

Table 6

Communist Countries: Extensions of Economic Aid to Less Developed Countries of the Free World
1960-67

Million US $

	Total	USSR	Eastern Europe	Communist China
1960-64 Total	3,882	2,184	1,046	652
1965	1,404	650	635	119
1966	1,607	1,267	220	120
1967	214	90	75	49

Deliveries

69. In addition to supporting the long-run development efforts of less developed countries, the Communist countries also have continued to deliver equipment and to provide technical services for current aid programs. It is deliveries, rather than extensions, that would indicate any immediate impact of the Vietnam war. In 1966 and 1967 the East European countries and Communist China increased deliveries of economic aid to the less developed countries under previous commitments. Although Soviet deliveries declined in 1966 and 1967 (see Table 7), this decline was not caused by the diversion of resources to North Vietnam as the two programs do not compete for the same resources. The bulk of Soviet economic assistance to North Vietnam consists of commodities and small, light industrial and agricultural enterprises, and North Vietnam's share of Soviet exports of complete plants has changed very little from the prehostilities period (see Table 8). On the other hand, commodity assistance has accounted for less than 5 percent of total Soviet aid to the developing countries while approximately 70 percent of the total value of Soviet aid to the less developed countries has been allocated for industrial use, mostly for heavy industry.

70. The decline in Soviet deliveries of economic aid to less developed countries since 1965 is attributable chiefly to domestic problems in the recipient countries which have limited their ability to provide adequate local resources to complement Soviet aid. For example, the inability of India's depressed economy to absorb scheduled Soviet aid shipments for the construction of heavy industrial plants resulted in a 50 percent drop in deliveries in 1967 compared with 1966. Recent declines in Soviet aid deliveries also are related to the construction cycle for large projects, where major equipment deliveries are concentrated in a short period.

Table 7

Communist Countries: Deliveries of Economic Aid to Less Developed Countries of the Free World and to North Vietnam 1960-67

Million US $

	1960-64	1965	1966	1967
North Vietnam	435	150	275	370
USSR	216	85	150	200
Eastern Europe	62	15	50	90
Communist China	157	50	75	80
Less Developed Countries	1,723	521	506	493
USSR	1,262	350	328	288
Eastern Europe	343	90	93	110
Communist China	118	81	85	95

Table 8

USSR: Exports of Complete Enterprises to Major Areas 1961-66

Percent

	Total	Less Developed Countries	North Vietnam	Other Communist Countries	All Other Countries
1961	100.0	39.0	3.3	57.6	0.1
1962	100.0	44.3	5.3	49.6	0.8
1963	100.0	39.8	4.4	44.7	11.1
1964	100.0	49.2	3.1	47.6	0.1
1965	100.0	46.3	5.3	47.2	1.2
1966	100.0	38.1	5.2	54.0	2.7

Economic Technicians

71. The number of Communist technicians in the less developed countries declined in 1967 as several major projects, such as the Aswan Dam, neared completion and as political differences erupted with host countries -- for example, the Chinese Communist dispute with Burma. There is no evidence that technicians were withdrawn from less developed countries because their services were required either at home or in North Vietnam.

VIII. Effect on the Economy of North Vietnam

72. The effect of the war on the economy of North Vietnam itself is the compounded result of engaging in the war in the South and undergoing massive bombing attacks at home. The war in the South has drained off many of North Vietnam's physically fit young males and has required the movement through North Vietnam of weapons, ammunition, food, medical supplies, and the like that come primarily from other Communist countries. The bombing in the North has caused the diversion of large numbers of workers to the repair of bomb damage, to civil defense tasks, and to transport work and has also increased the requirement for imports of construction materials, transport equipment, consumer goods, and the weapons and ammunition for air defense. The economy of North Vietnam, therefore, has been mobilized to act both as a source of manpower for the battlefields in the South and as a funnel through which arms and supplies can reach these battlefields. The remainder of this section addresses the damage inflicted by the bombing attacks on the North.

73. Damage inflicted by the bombing of North Vietnam has caused substantial loss of output and has reduced potential economic growth. At the same time, increased aid from other Communist countries has permitted the North Vietnamese to prosecute the war effort without serious deterioration of their standard of living despite major disruptions to economic activities. Cumulative measurable damage through April 1968 is estimated at more than $440 million; the rate of damage reached a peak in 1967, as shown in the tabulation below. In addition to the measurable losses, there are other losses to the economy and the military establishment which cannot be measured but would be valued in the tens of millions of dollars.

	Million US $				
Facilities and Equipment	1965	1966	1967	Jan-Apr 1968	Total
Economic	36.2	93.3	158.1	17.6	305.2
Military	32.7	20.3	78.1	5.5	136.6
Total	*68.9*	*113.6*	*236.2*	*23.1*	*441.8*

A. Economic Damage

Industrial Facilities

74. A large part of North Vietnam's small industrial sector is out of operation because of direct bomb damage or a shortage of electric power. Cumulative measurable damage to industrial facilities is estimated at $60 million, as shown in the following tabulation:

	1965-Apr 1968 (Million US $)
Electric powerplants	33.1
Manufacturing plants	18.2
Petroleum supplies and facilities	7.8
Shipyards	0.9
Total	*60.0*

75. The bombing of large plants has forced the North Vietnamese to adopt a policy of decentralization and to emphasize development of local industry. A number of small manufacturing plants have been built, and some larger plants in areas subjected to bombing have been dispersed. Industry has not contributed substantially to North Vietnam's military capabilities, however, and the damage apparently has had little direct influence on the war effort.

76. Most of the damage to industry was inflicted during the first half of 1967. A decrease in the level of strikes during the latter part of 1967 and the first part of 1968 allowed the North Vietnamese to restore some capacity to operation. For example, at the end of April 1968, about 45 percent of the

national electric generating capacity was operational, compared with about 20 percent from June through October 1967. Repairs and an increase in the electric power output have also permitted operations to resume at several manufacturing plants, including parts of the Viet Tri Chemical Complex and much of the coal-processing facilities at Cam Pha and Hon Gai. An extensive system of dispersed POL sites has offset the destruction of fixed petroleum storage facilities in 1966. Damage to shipyards has not significantly hindered the production of boats or the fabrication of barges.

Transport Facilities and Equipment

77. Heavy damage to the transport system has increased the cost of moving goods and has forced the use of less efficient alternative facilities and methods. The flow of imports and domestic supplies, however, has not been seriously restricted, because of (1) extensive and rapid repair work, (2) the construction of new rail lines, roads, and bypasses, and (3) the infusion of substantial amounts of foreign aid. Both transport capacity and equipment inventories have been maintained or increased. Cumulative damage to transport facilities and equipment is as follows:

	1965-Apr 1968 (Million US $)
Transport equipment	81.8
Bridges	38.2
Railroad yards and shops	6.6
Ports	1.8
Other (including road and rail cuts)	2.4
Total	*130.8*

Indirect Losses

78. In addition to the direct physical damage, the economy has suffered considerable indirect loss. Although agriculture and fishing have not been targeted for attacks, their output has been curtailed because of the air and naval bombardment. Agricultural production has suffered from (a) disruption of work routines resulting indirectly from the bombing, (b) disruptions to the supply and

distribution of fertilizer, and (c) a weakening of economic administration in rural areas. The fish catch has decreased because of the threat of air and naval attacks against watercraft and the seeding of MK-36 influence bombs* in waterways. The cumulative loss in rice production, including an unknown share of losses as a result of adverse weather, and in the fish catch is estimated as follows:

	1965-Apr 1968 (Million US $)
Rice production	60.5
Fish catch	12.8
Total	*73.3*

79. Both of the rice crops in 1967 are believed to have been below average, but the shortfalls probably did not cause more than localized food shortages. Some of the decrease in rice output has been offset by increased production of subsidiary crops. Increased imports of bulk food in 1967 and 1968 have been greater than the estimated decrease in rice production.

80. Exports of bulk products that make up about 20 percent of the value of North Vietnam's exports also have been disrupted by bomb damage and by increased costs of domestic transport. Cement output was cut off in mid-1967 by bombing of the Haiphong Cement Plant. Coal output was curtailed drastically by damage to electric power and processing facilities in mid-1967. Output of pig iron at Thai Nguyen was halted in April 1967, and exports by sea of apatite were cut off in mid-1965 when interdiction of the Lao Cai rail line raised transport costs. The cumulative measurable loss in North Vietnam's seaborne exports attributable to the bombing is shown in the following tabulation:

* *The MK-36 is a modified bomb that is mechanically armed 25 minutes after delivery and is detonated by any magnetic disturbance generated by ferrous material or objects.*

	1965-Apr 1968 (Million US $)
Apatite	17.6
Coal	17.4
Cement	4.1
Pig iron	2.0
Total	*41.1*

81. Although substantial in terms of volume, measurable export losses each year have been less than 20 percent of the value of annual exports prior to the bombing, and have been minor compared with contributions of economic aid from other Communist countries.

B. Military Damage

Fixed Facilities

82. The cumulative value of damage to fixed military facilities is estimated at about $75 million, as shown in the following tabulation:

	1965-Apr 1968 (Million US $)
Barracks	31.2
Ammunition, supply, and motor vehicle depots	16.3
Air defense system (airfields and antiaircraft artillery, a/ SAM, a/ and radar sites)	15.0
Other (including naval bases, dispersed storage areas, truck parks, and communications sites)	12.2
Total	*74.7*

a. *Including equipment.*

83. Heavy damage to the military establishment throughout the air campaign has forced the North Vietnamese to disperse military facilities for men and supplies but has had little effect on North Vietnam's economy. Attacks against JCS-targeted barracks, the most important barracks complexes existing before the air campaign, destroyed about 20 percent of the national barracks capacity and forced the abandonment of an additional 7 percent. The North Vietnamese have not attempted to repair this damage, and the men have been dispersed to temporary shelters or civilian housing. Dispersal of ammunition, supply, and vehicle depots has increased logistic requirements, causing temporary local shortages but not seriously restricting the general movement of military or economic goods. Destruction of supplies has been offset by increased imports.

84. The cost of damage to air-defense-related facilities such as airfields and antiaircraft artillery, SAM, and radar sites has had little effect on the North Vietnamese economy. Most of the building material is obtained locally, and equipment is imported from Communist countries, probably as grants. The air defense system has been gradually expanded since 1965 despite the heavy damage inflicted. Communist China has contributed to this expansion by furnishing antiaircraft units and engineering construction battalions. The antiaircraft and SAM systems presently operate from a large number of temporary as well as fixed sites. Mobility is stressed and equipment is being made less vulnerable to attack.

Military Equipment

85. The air campaign has destroyed a substantial amount of military equipment which was provided by the USSR and Communist China. Most of the value of damage, estimated at nearly $62 million, resulted from destruction of MIG's and helicopters as shown in the tabulation below. (Estimates of antiaircraft and SAM equipment destroyed and damaged have been included with the value of fixed facilities.)

	1965-Apr 1968 (Million US $)
Aircraft	47.6
Radar	9.5
Naval craft	4.8
Total	*61.9*

86. The North Vietnamese have lost about 119 jet fighters since the beginning of the air campaign, of which 84 were lost in 1967. Replacements of MIG-21's from the USSR and MIG-17's from China have been more than sufficient to replace these losses. North Vietnam's small navy has been maintained through replacements from China, and modern equipment for the early-warning and ground-control-intercept systems has been provided in abundant quantities from both China and the USSR.

C. General Impact on the Economy

87. The war and the bombing have eroded the North Vietnamese economy, making the country increasingly dependent on foreign aid. However, because the country is at a comparatively primitive stage of development and because the bombing has been carried out under important restrictions, damage to the economy has been small. The basic needs of the people are largely satisfied locally. Imports from Communist countries have enabled North Vietnam to make up for losses in industrial production and to take care of new needs created by the war.

88. The overall level of economic activity probably did not change much in 1965 and 1966, but went down in 1967. Agricultural production dropped in 1966 and again in 1967, partly because of poor weather. Most of the important industrial plants and powerplants were not made targets of the bombing until 1967. Loss of industrial output, therefore, has been incurred largely since mid-1967. Some consumer goods have been in short supply, and the price of some of them has risen beyond the reach of the average consumer. The official rice ration has been maintained, but imported foodstuffs are being substituted to an increasing degree in the urban ration.

89. Significant losses to North Vietnam's economy that are not entirely offset by outside aid are (a) the almost complete hiatus in development since 1965, (b) the actual losses in manpower, and (c) the loss of man-hours of workers diverted to defense, to repair of bomb damage, and to the movement of goods. The disruption of normal work routines, the separation of families, and the physical anguish from the repeated bombings have taken an unmeasurable toll in productivity. Bombings have required the diversion of up to 200,000 workers to full-time repair of lines of communication and to transport tasks. Another 300,000 to 400,000 have been taken frequently from their normal work to perform parttime tasks related to the bombing. Several hundred thousand young and old have been evacuated from urban areas.

90. The bombing has resulted in casualties over the past three years totaling about 76,000, of whom one-third may have been killed. Approximately 100,000 troops have been tied up in air and coastal defense. For the past three years, increased military manpower requirements have taken most of the estimated 120,000 physically fit males reaching draft age annually.

D. Postwar Rebuilding Costs

91. The direct costs of restoring North Vietnam's damaged economy will be borne primarily by Communist aid donors. About $130 million in foreign economic assistance will be required to reactivate industrial capacity and to repair damage in the non-industrial sectors. In addition, aid in the form of consumer goods and raw materials will be required for several years until output of industry and agriculture can more nearly meet domestic needs. Foreign technical assistance will be needed in almost every sector of the economy. The present general level of economic assistance probably will be maintained during the immediate reconstruction years. The following tabulation shows a possible distribution of direct reconstruction costs among economic sectors:

	Million US $
Manufacturing	20
Fuels and power	30
Transportation	50
Military	30
Total	*130*

92. The North Vietnamese almost certainly will make a concerted effort to restore the economy rapidly to the state that existed before the bombing. This could be accomplished in two to three years. High priority will be given to restoring the transportation network, particularly bridges, and parts of the electric power industry. Repair of severely damaged equipment in the electric power industry may be deferred in favor of completing work on the Thac Ba Hydroelectric Powerplant which was being built with Soviet aid. Under an accelerated construction schedule and with an investment of $15 million -- about one-half the cost of restoring all damaged power facilities -- this powerplant could be put into service within 18 months, thus making available more generating capacity than has been damaged by the bombing.

93. Essential industries to be rebuilt will include chemicals, construction materials, and textiles. Among these a large effort will be needed to restore the Haiphong Cement Plant and the Nam Dinh Textile Plant. Concurrently with restoration, relocation of some dispersed industries will take place and production lines will be reoriented from wartime requirements. Earnings of foreign exchange could rapidly regain prewar levels. Even now, coal exports are approaching normal levels, and exports of handicrafts have been generally sustained during the past three years. Seaborne shipments of apatite could be resumed as soon as through rail service from Lao Cai to Haiphong is resumed. Exports of pig iron cannot be resumed until the Thai Nguyen Iron and Steel Complex is repaired, probably with Chinese Communist assistance.

94. The amount of commodity credits required in the postwar period will depend largely on conditions in agriculture. Substantial imports of food and of fertilizer probably will continue in

the immediate postwar years. Although agriculture has not been a target of the bombing program, it has been disrupted by a combination of unfavorable weather and indirect effects of the bombing.

95. North Vietnam probably will not initiate construction of new basic industries in the immediate postwar period since much of the country's industrial capacity had barely been assimilated into the economy when the bombing began. Several large plants -- for example, the Phu Tho Phosphate Fertilizer Plant, the Thai Nguyen Iron and Steel Complex, and the Bac Giang Chemical Fertilizer Plant -- either had just begun partial operation or were not yet in operation. North Vietnam had already negotiated for a number of small specialized plants which probably will be constructed in the immediate postwar years to increase regional self-sufficiency. Nonetheless, the postwar effort will consist primarily of restoration of existing facilities.

E. Sources of Postwar Aid

96. On the basis of past economic assistance, it is estimated that the direct reconstruction costs will be distributed as follows:

	Million US $
USSR	45
Communist China	65
Eastern Europe	20
Total	*130*

The USSR probably will provide a greater portion of the commodity aid. Communist China will play a key role in reconstruction because many of the major industrial installations in North Vietnam were Chinese aid projects. China also provided electric power equipment for several of the large powerplants including those at Thai Nguyen, Bac Giang, and Viet Tri. In addition, the heavy assistance by Communist China in construction, particularly of roads and rail lines, probably will be continued in the immediate postwar years. Among the European Communist countries, the principal postwar donor for reconstruction probably will be Poland, with Rumania and Hungary following in that order.

IX. General Appraisal of These Costs

97. The short-term costs of supporting the Vietnam war -- as described in the preceding sections -- are small, especially in comparison with the vast political and military issues involved. Since the start of the US bombing, military aid by the Communist countries has amounted to more than $1.5 billion and economic aid to about $1 billion. A portion of these sums does not represent a net loss, either because the best alternative use of the resources is unimportant or because the aid brings with it some offsetting advantages, such as the training of antiaircraft units under combat conditions.

98. The type of support furnished by each of the Communist countries usually has represented areas of economic strength. For example, China can readily furnish manpower and basic construction materials and the USSR can make use of its large stockpiles of obsolescing weapons. A further factor in easing the burden on the Communist economies is that shipments are "spread out" over a variety of fairly standard items. Thus the aid apparently created no severe bottlenecks for any major commodity or transportation line, nor has it required any major changes in overall economic plans.

99. The indirect costs are pertinent especially to the USSR, although they also have had an effect on the economies of Eastern Europe. The strained political atmosphere has postponed the lowering of barriers in US-USSR trade and has thus delayed Soviet access to the world's foremost source of advanced technology. Furthermore, if the rise of 3-1/2 billion rubles in the Soviet military budget since 1964 can be partly attributed to the Vietnam war, this would constitute another reduction in high-quality resources available to modernize Soviet industry over the long run.

X. Costs in the First Half of 1968

100. Information on Communist military aid to North Vietnam in the first half of 1968 suggests that it is continuing at about the same rate as in 1967. Information on economic aid suggests a rate for the first half of 1968 about 20 percent higher

than in 1967. Thus, in Table 1, if the first half of 1968 were added to the period 1965-67, the total figure for military aid would be increased from $1.38 billion to $1.7 billion and the total figure for economic aid would be raised from $795 million to $1.0 billion.

CENTRAL INTELLIGENCE AGENCY

THIS IS AN INFORMATION REPORT, NOT FINALLY EVALUATED INTELLIGENCE

1.3(a)(4)

REPORT NO. [redacted]

DATE DISTR. 15 AUGUST 1968

COUNTRY SOUTH VIETNAM

DOI JULY 1968, EXCEPT AS STATED

SUBJECT VIET CONG POLICY AND TREATMENT OF PRISONERS OF WAR

B

Held for LtCR.

ACQ VIETNAM, SAIGON (24 JULY 1968) [redacted] 1.3(a)(4)

SOURCE THIS IS A COLLATION OF AVAILABLE INFORMATION ON THE SUBJECT, WHICH WAS PREPARED IN THE FIELD BY A CAS RESEARCH UNIT. IT IS NOT FULLY EVALUATED INTELLIGENCE.

SUMMARY-- THE VIET CONG /VC/ OFFICIALLY MAINTAIN A LENIENT AND HUMANITARIAN POLICY TOWARD PRISONERS OF WAR /POWS/, BUT THIS POLICY IS NOT ALWAYS IMPLEMENTED. THE VC HAVE ISSUED NUMEROUS DIRECTIVES AND ORDERED ITS MILITARY PROSELYTING SECTIONS TO HOLD SPECIAL CLASSES ON THE POLITICAL VALUE OF POWS AND HOW TO TREAT THEM. ALMOST ALL IMPORTANT POWS ARE TRANSFERRED TO THE PROVINCE OR REGION LEVEL. THOSE PRISONERS WHO ARE KEPT AT THE VILLAGE AND DISTRICT LEVEL ARE OFTEN RELEASED WITHIN TWO MONTHS WHEREAS THOSE AT THE HIGHER LEVEL ARE HELD MUCH LONGER. THE RELEASE OF THE FREE WORLD MILITARY FORCES PRISONERS POSES A SPECIAL PROBLEM SINCE IT MUST BE DONE AT THE REGIONAL OR CENTRAL LEVEL AND THEN IN CONNECTION WITH AN INTERNATIONAL PROPAGANDA COUP. BRUTALITY TO AND EXECUTION OF PRISONERS HAVE BEEN REPORTED BUT FOR POLITICAL EXPEDIENCY THE VC CONTINUE TO ADVOCATE A LENIENT AND HUMANITARIAN POLICY. END SUMMARY.

Approved for Release Date September 1993

INFORMATION REPORT INFORMATION REPOR

[redacted] [redacted] 1.3(a)(4)

50.2-02.3d

1.3(a)(4)

1. DOCUMENTS CAPTURED OVER A PERIOD OF SEVERAL YEARS SHOW THE OFFICIAL VIET CONG /VC/ POLICY TOWARD PRISONERS OF WAR /POWS/ AS ONE OF LENIENCY AND HUMANITARIANISM FOR POLITICAL EXPEDIENCY. HOWEVER, IT IS ALSO CLEAR THAT THERE IS A GAP OF SOME MAGNITUDE BETWEEN THE POLICY AND ITS APPLICATION. AS AN EXAMPLE OF THE POLICY, AFTER THE TET ATTACKS AND THE INCREASE IN THE NUMBER OF POWS THE VC IN MY THO PROVINCE REISSUED A BASIC DIRECTIVE ON POW POLICY WHICH EMPHASIZED THAT A LENIENT AND HUMANE POLICY CAN SPLIT THE ENEMY'S RANKS AND THAT POWS, PARTICULARLY AMERICANS, CAN BE POLITICALLY EXPLOITED.

2. THERE ARE NUMEROUS VC DIRECTIVES ADMONISHING SUBORDINATE UNITS FOR NOT ADHERING TO THE POW POLICY AND ORDERING THE MILITARY PROSELYTING SECTIONS TO SET UP SPECIAL CLASSES TO CORRECT THIS SITUATION. SEVERAL DOCUMENTS ATTEST THAT IN MANY AREAS THE POLICY IS IGNORED MOST OF THE TIME. THE PARTY CONSTANTLY URGES THE CADRES TO EMPHASIZE IN THEIR CLASSES THAT KILLING, BEATING AND TORTURING POWS OR MUTILATING THE DEAD IS HARMFUL TO THE REVOLUTION. THE CADRES ARE TOLD TO MAKE THE POINT THAT IMPORTANT POWS CAN BE USED AS HOSTAGES ASSURING THE SAFETY OF CAPTURED VC AND THEIR RELEASE CAN WIN PROPAGANDA VICTORIES OF INTERNATIONAL IMPACT.

3. COMBAT UNITS ARE REMINDED CONSTANTLY TO INCREASE THE NUMBER OF POWS, ESPECIALLY AMERICANS. THEY ARE INSTRUCTED TO ISSUE ROPES TO EACH SOLDIER FOR BINDING POWS, TO TEACH THE TROOPS ENGLISH PHRASES SUCH AS "HANDS UP" AND TO TEACH SUCH TECHNIQUES AS REMOVING THE SHOES OF U.S. POWS TO HINDER THEIR ESCAPE ATTEMPTS. FURTHER, THE SOLDIERS ARE TOLD NOT TO TAKE THE PERSONAL PROPERTY OF POWS BUT TO COLLECT IT AND MAKE OUT A RECEIPT AND PASS IT ALONG WITH THE POW. THE PARTY [illegible] GREAT DIFFICULTY IN GETTING INDIVIDUAL SOLDIERS TO CARRY OUT THIS POLICY.

4. ONCE CAPTURED, THE POW IS HANDED OVER TO THE VILLAGE,

1.3(a)(4)

1.3(e)(4)

DISTRICT OR PROVINCE AUTHORITIES. IF IT HAS NOT ALREADY BEEN DONE, THE POW WILL BE PLACED IN A CATEGORY OF WHICH THERE APPEARS TO BE TWO TYPES: THE FIRST IS BASED ON THE TYPE OF UNIT AND RANK. THE LESS ELITE HIS UNIT, THE MORE LIKELY THE POW WILL BE KEPT AT A LOWER VC ECHELON, GIVEN SHORTER INDOCTRINATION AND MORE LIKELY TO BE CONSIDERED AS A POTENTIAL RECRUIT FOR THE VC. GENERALLY, THE LOWER THE RANK THE LESS TIME THE POW WILL BE HELD. THE SAME HOLDS TRUE FOR ALL FREE WORLD MILITARY FORCES /FWMF/, INTELLIGENCE AND PSYCHOLOGICAL OPERATIONS PERSONNEL AND OTHER SPECIALIST GROUPS. IN ADDITION, ENLISTED MEN, NONCOMMISSIONED OFFICERS AND OFFICERS USUALLY ARE SEPARATED IMMEDIATELY TO BREAK THE INFLUENCE OF THE HIGHER RANKING TROOPS OVER THEIR JUNIORS. THE SECOND CATEGORY IS BASED ON THE INDIVIDUAL'S ACTIONS. THOSE WHO SURRENDER IN THE EARLY STAGES OF THE BATTLE AND EXHIBIT LITTLE PERSONAL LOYALTY TO THE GOVERNMENT OF VIETNAM /GVN/ GET SPECIAL TREATMENT. SUCH POWS DO NOT HAVE TO BE BOUND BUT THEY HAVE TO ATTEND INDOCTRINATION SESSIONS. THE LEGITIMATE POW, IN THEORY, IS TO RECEIVE LENIENT, HUMANE BUT FIRM TREATMENT, AND IF HE PROVES TO BE OBSTINATE, CERTAIN PUNNISHMENTS ARE SUGGESTED, SUCH AS STANDING IN THE SUN OR BEING PUT IN ISOLATION. IN SOME DOCUMENTS DEATH IS MENTIONED AS A LAST RESORT BUT ONLY AFTER UNTYING THE POW.

5. ALMOST ALL IMPORTANT POWS ARE TRANSFERRED TO THE PROVINCE OR REGION LEVEL. WHILE ENROUTE THE POW IS USUALLY BOUND, BAREFOOT AND BLINDFOLDED AND TAKEN ON A ROUTE WHICH THE PRISONER CANNOT REMEMBER. IN CAMP THE PRISONERS ARE USUALLY UNFETTERED. THE PRISON CAMP IS USUALLY SMALL CONSISTING OF FIVE OR FEWER THATCHED HUTS OR SEMIBURIED BUNKERS CONTAINING FROM 15 TO 70 INMATES. CAVES AND TUNNELS ARE ALSO USED. SOME CAMPS HAVE BEEN REPORTED TO CONTAIN 400 OR MORE PRISONERS. ONTHE OTHER HAND, SOME CAMPS REMAIN EMPTY FOR LONG PERIODS

1.3(e)(4)

NND 027650-110

1.3(a)(4)

OF TIME. IT IS COMMON FOR PRISONERS TO BE TRANSFERRED TO SEVERAL CAMPS. USUALLY, SOME WORK IS PERFORMED, CERTAIN HOLIDAYS ARE ALLOWED AND SOME MEDICAL FACILITIES EXIST.

6. NEW PRISONERS ARE USUALLY GIVEN A BOOKLET ABOUT POW REGULATIONS OR IT IS READ TO THEM. ACCORDING TO THE DIRECTIVES, THIS IS CONSIDERED ESPECIALLY IMPORTANT IN THE CASE OF AMERICANS WHO HAVE BEEN LED BY THEIR COMMANDERS TO EXPECT INHUMANE TREATMENT. ALL MILITARY EQUIPMENT AND DOCUMENTS ARE CONFISCATED. PRISONERS WHO DIE ARE OFTEN BURIED SECRETLY AND THEIR POSSESSIONS SENT TO THE REAR. THIS PROCEDURE APPEARS TO BE FOLLOWED BECAUSE THE VC THINK IT WOULD BE POLITICALLY EXPEDIENT TO KEEP THESE DEAD MEN "ALIVE" FOR FUTURE RETALIATORY "EXECUTIONS."

7. THE VC BOMBARD THE POWS WITH A STEADY STREAM OF INDOCTRINATION. THE TYPICAL INDOCTRINATION IS TO HAVE THE POW MEMORIZE A LESSON AND THEN REPEAT IT IN WRITTEN TESTS. IN ADDITION, THE VC USE SELF-CRITICISM SESSIONS AND HAVE THE POW WRITE A PERSONAL HISTORY STATEMENT. THE VC HAVE SET UP A SLIDING SCALE OF WHAT THEY HOPE TO ACHIEVE WITH THEIR INDOCTRINATION. AT THE OPTIMUM, THEY HOPE TO ENLIST THE POW INTO THE VC ARMED FORCES. NEXT BEST, THEY WOULD LIKE HIM TO WORK IN SOME WAY FOR THE VC. NEXT, THEY WOULD LIKE HIM TO RETURN HOME AND ASSUME AN ANTI-GVN ATTITUDE. LAST, THEY HOPE HE WILL AT LEAST STAY NEUTRAL. IF THE POW FAILS TO PASS HIS TESTS, THE CAMP AUTHORITIES USUALLY RECOMMEND FURTHER TRAINING BUT NOT ANY PUNISHMENT SINCE THE GOAL IS REHABILITATION. AT THE VILLAGE AND DISTRICT LEVEL THE PERIOD OF INDOCTRINATION RANGES FROM ONE WEEK TO TWO MONTHS, AND THE PRISONER IS ALL BUT ASSURED OF BEING RELEASED. THE INDOCTRINATION PERIOD IS LONGER FOR HIGHER LEVEL PRISONERS, AND SOME PRISONERS MAY NEVER BE ABLE TO CONVINCE THE VC THAT THEY HAVE REFORMED ENOUGH TO BE RELEASED. THE FWMF PRISONERS POSE A PROBLEM SINCE THEY USUALLY CAN ONLY BE RELEASED AT THE REGIONAL OR CENTRAL LEVEL AND THEN ONLY

1.3(a)(4)

5 4 3 2 1

1.3(a)(4)

IN CONNECTION WITH SOME INTERNATIONAL PROPAGANDA COUP. THE MORE OBSTINATE FWMF POWS ARE QUIETLY EXECUTED.

8. A FEW POWS INCLUDING AN OCCASIONAL AMERICAN, ARE TRANSFERRED TO SECURITY SECTIONS WHOSE DETENTION CAMPS ARE GENERALLY OCCUPIED BY VC DESERTERS, GVN OFFICIALS AND SPIES. THE TREATMENT TENDS TO BE HARSHER, THE EXECUTIONS MORE FREQUENT, AND THE PHYSICAL RESTRAINTS MORE BRUTAL, SUCH AS THE USE OF BLINDERS AND LEG IRONS. STILL, THE ULTIMATE GOAL IN THESE CAMPS ALSO IS SUPPOSED TO BE REHABILITATION AND EVENTUAL RELEASE.

9. REGARDING THE RELEASE OF POWS THE MY THO PROVINCE DICECTIVE ON POW POLICY STATED THAT POWS MUST BE BOUND CLOSELY TO THE REVOLUTION SO THAT THEY WILL BE LOOKED UPON WITH SUSPICION BY THE OTHER SIDE. THE DOCUMENT CONTINUES THAT BEFORE EACH RELEASE, THE POW MUST BE PROVOKED TO WRITE SOME KIND OF PLEDGE IN FAVOR OF THE NATIONAL FRONT FOR THE LIBERATION OF SOUTH VIETNAM AND MAKE COMMENTS ABOUT VC POLICIES AND THE TREATMENT AND ATTITUDES OF THE LIBERATION TROOPS. EACH RELEASE SCENE IS TO BE PHOTOGRAPHED.

10. ALTHOUGH THERE ARE NO COMPLETE STATISTICS ON THE NUMBER OF POWS RELEASED, SOME INFORMATION IS AVAILABLE. IN VC MILITARY REGION 5, THERE WERE 5,753 GVN POWS REPORTED TO BE DETAINED IN 1965. OF THE TOTAL 4,601 WERE RELEASED, 16 WERE TRANSFERRED TO SECURITY SECTIONS, 18 DIED OF SICKNESS AND 181 VOLUNTEERED TO SERVE WITH VC UNITS. A RETURNEE WHO CLASSIFIED POWS ARRIVING AT AN LINH VILLAGE, PHU YEN PROVINCE, STATED THAT 30 POWS ARRIVED IN JULY 1964, 35 IN NOVEMBER AND 110 IN DECEMBER 1965 AND NONE IN 1966. OF THESE 175 POWS, 150 WERE SENT TO PROVINCE AND 25 WERE KEPT FOR A TWO MONTH INDOCTRINATION AND RELEASED TO VC UNITS.

11. A DOCUMENT COVERING THE FIRST HALF OF 1967 FOR THE SECURITY SECTION OF BINH TAN SUBREGION REVEALED THAT OF 41 PRISONERS, ONLY SEVEN WERE RELEASED, ONE DIED, ONE WAS

1.3(a)(4)

5432 1

5432 2

1.3(a)(4)

TRANSFERRED AND 32 WERE EXECUTED. THE SECURITY SECTION OF THE WESTERN NAMBO REGION REPORTED THAT IN THE SECOND QUARTER OF 1967 THERE WERE 1,450 PRISONERS. OF THESE, 23 ESCAPED, FOUR WERE SHOT ATTEMPTING TO ESCAPE, SIX WERE SENTENCED TO DEATH, AND 46 WERE EXECUTED WITHOUT SENTENCING. A VC WHO ESCAPED IN MARCH 1968 AFTER BEING SENTENCED TO THREE YEARS RETRAINING FOR ATTEMPTING TO CHIEU HOI MAINTAINED THAT THERE WERE EIGHT SECURITY COMPOUNDS IN PHUNG HIEP DISTRICT, PHONG DINH PROVINCE. HE SAID THAT THE COMPOUND CAPACITIES RANGED FRO 70 TO 120 AT THE "COURTHOUSE" WHERE UNTRIED PRISONERS WERE HELD. AT ONE OF THESE, THE 85 PRISONERS WERE KEPT TOGETHER AND MOVED FROM COMPOUND TO COMPOUND ABOUT EVERY TEN DAYS. ABOUT 40 WERE ARMY OF THE REPUBLIC OF VIETNAM TROOPS AND ONE WAS AN AMERICAN. THE PRISONERS WERE KEPT CHAINED NEARLY 24 HOURS A DAY, BEATINGS WERE COMMON AND MEDICAL FACILITIES WERE NONEXISTENT.

12. THERE ARE SEVERAL INSTANCES, ESPECIALLY AROUND TET, WHERE GROUPS OF PRISONERS SUCH AS PROVINCIAL RECONNAISSANCE UNIT MEMBERS, INFORMANTS AND OTHER "BAD ELEMENTS" WERE MARKED FOR IMMEDIATE EXECUTION. IN ISOLATED CASES EVEN FWMF PRISONERS WERE PUT ON THESE LISTS, ALTHOUGH THIS MAY NOT HAVE BEEN DONE WITH HIGH LEVEL PARTY APPROVAL. VC POLICY CONCERNING DISPOSITION OF POWS WHEN IMMINENT DANGER ARISES IS NOT CLEAR. THERE ARE SOME DOCUMENTS SAYING TO KILL AND OTHERS SAYING NOT TO KILL UNDER SUCH CIRCUMSTANCES. THE CONTINUED RELEASE OF POWS, INCLUDING FWMF, AND THE CONTINUED APPEARANCE OF POW DIRECTIVES URGING A LESS THAN BRUTAL POW POLICY INDICATES THAT THE FUNDAMENTAL POLICY OF LENIENCY AND HUMANITY FOR POLITICAL EXPEDIENCY CONTINUES TO BE THE PREFERRED COURSE BY THE VC LEADERS.

SAIGON BASE
MONTHLY REPORT
OCTOBER 1968

I GENERAL

A. October was one of the quietest months experienced in Saigon and the outstations in a long time except for the last day. On the night of 31 October, Tan Son Nhut received three rounds of 107 mm rocket fire with negligible damage. The same night, downtown Saigon received eight rounds of 107 mm and 122 mm of rocket fire causing two local personnel killed and six wounded.

B. October was the second worst month we experienced in gunfire incidents. 36 aircraft reported gunfire in February 1968 vs 24 aircraft in October.

C. Total block time for the month was 9,300 hrs which represents an increase of 164 hours over last month.

D. The new Company Cafeteria is doing a "land office" business serving primarily an American and TCN menu. A Vietnamese menu is served in the old messhall at approximately VN$60 per serving to hold the price to the established meal allowance. Because of the volume of business, it is apparent we must develop another facility for our indigenous personnel which conforms to the same facility standards as the new Cafeteria. The old messhall will be razed to make room for the new Training and Operations (Administrative) Building.

E. Cost reduction is a big subject here in Vietnam. I am gratified by the enthusiasm shown by all departments and outstations. I am confident we will make a significant contribution to this important program.

F. We were visited by Tropical Storm Hester on 19 and 20 October 1968. While some of our personnel experienced flooding and long power outages at their homes, the Air America area was virtually unaffected.

II Facilities Development

A. Form Fs have been obtained for the Transmitter Building and the Revetment Walls. We expect work to commence on both projects in the near future.

B. Work on the Utility Tunnel to the new GMD Complex is in progress.

C. Appropriation requests have been approved to relocate the BM office to the new BMD Building and to provide an Emergency Water Supply for the new GMD Complex. The relocation of the BM Office will alleviate the over-crowding which exists in the Flying and Operations Departments. Form Fs are being obtained for the Emergency Water Supply.

D. An appropriation request is being developed to rehabilitate the old carpenter shop to house all functions of the Personnel Office. This will further relieve the pressure in our existing Administrative Building and will permit the Accounting Department to spread out into a more efficient working environment. This will be an in-house project which we hope to start in the near future.

DE Declassified
NOV 2 [illegible]

III FLYING

A. The month of October is thankfully over, with hopes, but little expectation that November will see an improvement in the bind on flying time limitations. It seems that no matter how much effort goes into programming and planning the flight schedule and leave program, we continually fall behind the proverbal eight-ball. For one thing, our pilots just refuse to understand that it is vital to the operation that they only get sick when they are programmed for sick leave, not just at their convenience. In all seriousness, the schedule has been so tight at the end of the month and will be amplified as the end of the year approaches, that in several instances only because the customer did not request the standby aircraft, were we able to stay as close to the specified restrictions as we did.

Let's do something?

B. Morale is about minimum satisfactory. The same problems mentioned in past reports still remain a factor, and it would serve little purpose to reiterate them individually. Suffice to say, they have not cleared up nor improved appreciably.

C. It seems that the coordination and cooperation with maintenance has taken a definite upswing and if the trend continues, and there is no reason it should not, the whole station cannot help but benefit. Mutual assistance, discussions and constructive criticism have replaced most of the "just criticise" that both sides have been guilty of in the past on accasion. Hopefully this new trend will grow and expand.

D. The sudden announcement of the MPC conversion caused many of the pilots that were away from Saigon considerable concern. As it turned out, very adequate and liberal provisions were made by the "powers that be" for these people to convert their "old" for the "new". For those in Taipei and elsewhere still holding the old issue, it may come back to value, just like the Confederate Dollar.

E. Flying time for the month was up by 195 hours as compared to September. Totals by aircraft type are as indicated.

Increase		Decrease	
PC 6 = 1971	+ 346	C 46 = 857	- 74
204B = 1553	+ 181	C 47 = 1265	- 49
VTB = 600	+ 63	DHC4 = 200	- 96
		Beech = 1860	- 71
		H395 = 1111	- 55

F. The above figures, as compared to the contractual agreement, reflect a much more interesting outlook.

PC6 = 109	C46	+ 117
204B +233	C47	+ 5
VTB - 100	DHC4	- 75 (-25)
	Beech	+ 265
	Helio	+ 81

G. Only in the DHC4 did we fly less than contractual minimum the flight time standards are grossly affected by this overage. The challenge is here and we will meet it.

IV OPERATIONS

A. Curfew hours for Tan-Son-Nhut were extended the latter part of October to allow in-country flights to arrive as late as 2130L and international flights at 2100L. With these extended curfew hours Department Heads are studying means of eventually returning to a full three shift operation. We became more cost conscious last month and suggestions were submitted to the Base Manager as to how we would do our share for overall cost reduction. If the political situation remains stable we can forecast profitable months to follow.

B. Statistics:

V COMMUNICATIONS

A. It can be demonstrated that all communications personnel have received extensive cross-training within their individual limitations and capabilities in the various facets of Base communications activities.

B. This cross-training has a direct bearing upon Management's proposed cost saving and possible reduction-in-force throughout the various departments of the company as far as Saigon Base communications is concerned. Although we do not deem it practical to reduce our present number of communications personnel due to the ever-increasing workload placed upon this department

GROUP 1
EXCLUDED FROM AUTOMATIC DOWNGRADING AND DECLASSIFICATION

THE SINO-SOVIET DISPUTE ON AID TO NORTH VIETNAM (1965-1968)

MEMORANDUM TO RECIPIENTS

On 20 December 1965, SRS published an Intelligence Study that traced the bitter private negotiations among the Soviets, the Chinese, and the North Vietnamese throughout 1965 over the question of Soviet military assistance to North Vietnam, particularly the struggle over Soviet aid to the DRV air defense system.[1]

The present staff study reviews and brings up to date the story of the protracted and acrimonious haggling among the three principals. It reveals that the major issues and motivations of each have remained essentially unchanged, and that suspicion, dispute, and Chinese obstructionism increased rather than abated as the war moved on. The Paris negotiations between North Vietnam and the U.S. have injected a further sour and disruptive note into Sino-Soviet and Sino-Vietnamese relations. However, neither delays in shipments nor denials of weapons appear to have impaired DRV military capabilities to such an extent as to affect the course of the war.

Although this study in draft benefited from the comments of other offices, it is entirely a product of the Special Research Staff.

A larger and more detailed version of this study, including citations of the sources used, will be published separately for the benefit of those who wish to pursue the subject in greater depth. [redacted] F(b)(3) (U)

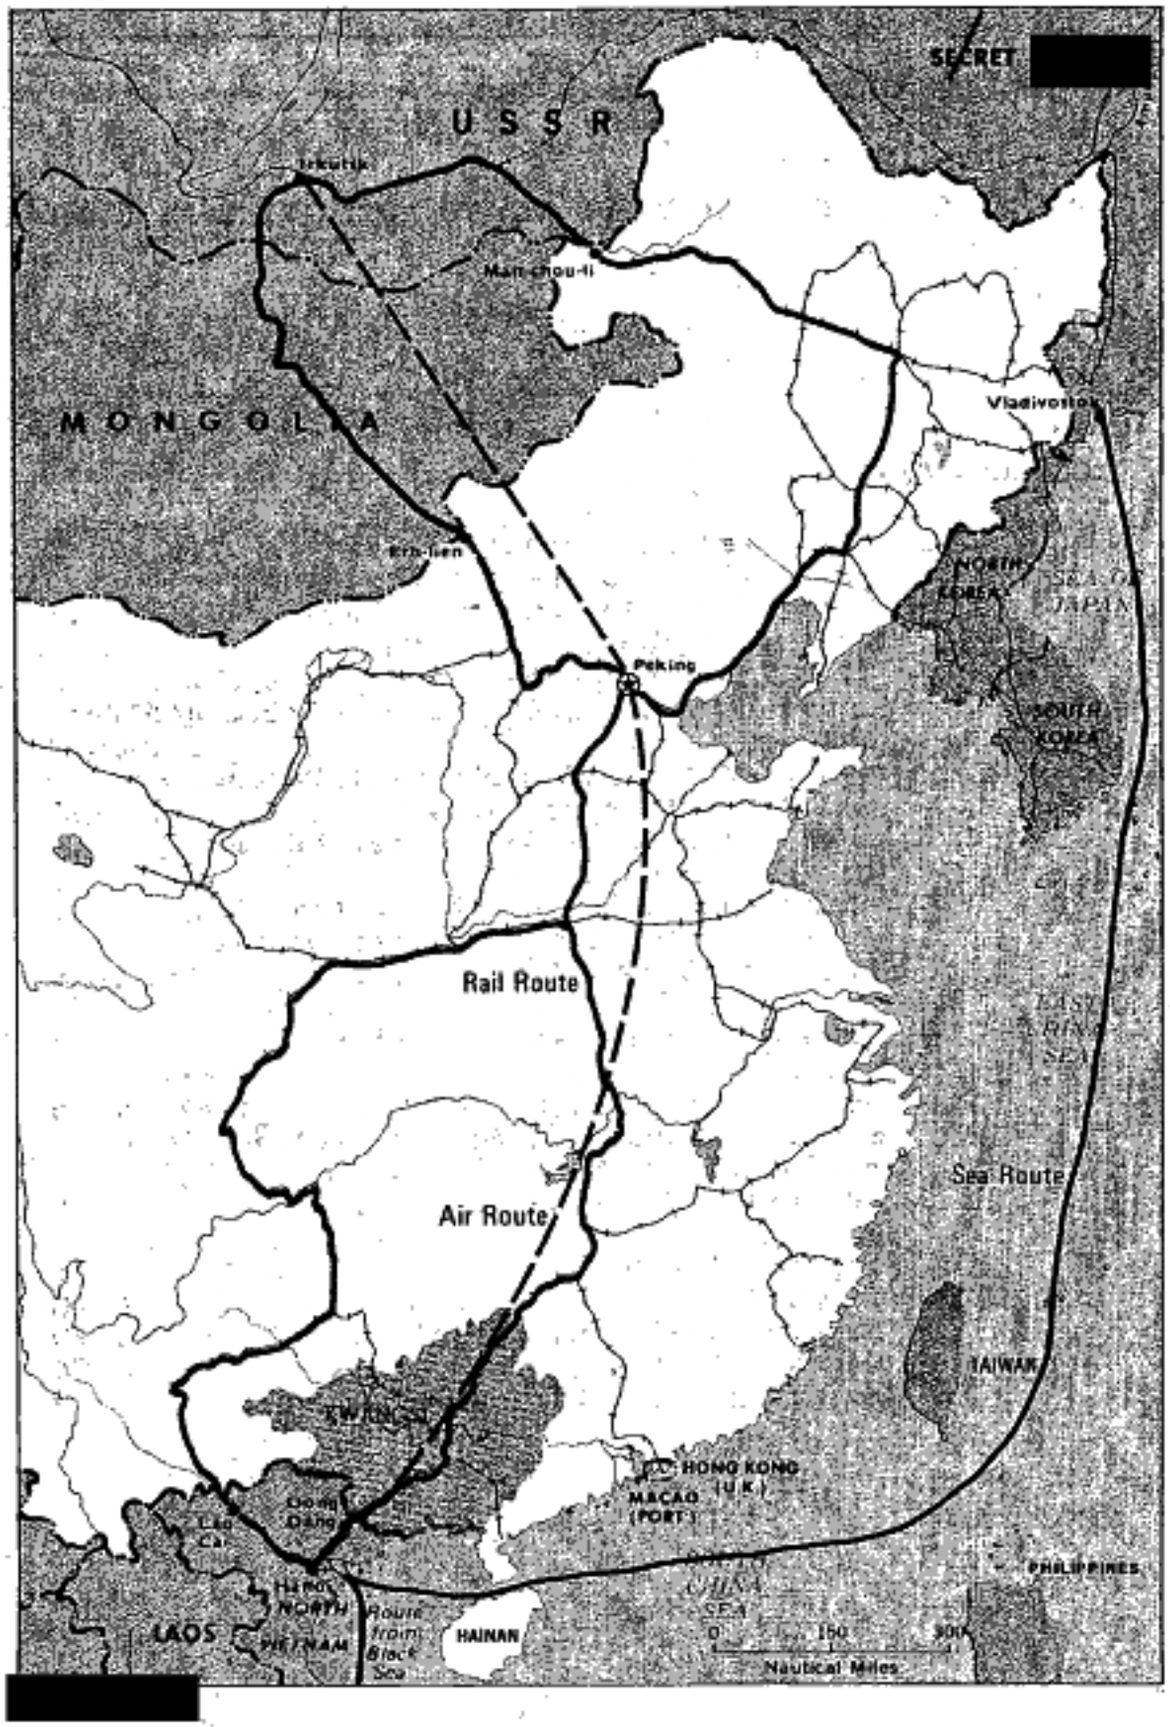
Soviet Aid Routes to North Vietnam



F(b)(3)
(U)

F(b)(3)
(U)

CONCLUSIONS

For three and a half years the Soviet Union and Communist China have been haggling over the military aid each is providing North Vietnam and over the mechanics of moving Soviet aid to North Vietnam. The dispute is a facet of the broader Sino-Soviet conflict and is interwoven with issues arising from U.S.-North Vietnamese negotiations. Parts of the continuing argument have surfaced, periodically, in polemical exchanges between Moscow and Peking. [redacted] F(b)[1] F(b)[3] (S)

[redacted] the evidence does support three general conclusions. Firstly, both Moscow and Peking, throughout the dispute, have had other considerations in mind in addition to North Vietnam's war needs. A paramount Soviet purpose has been to use aid to Vietnam as a means of strengthening Moscow's influence over Hanoi and elsewhere at the expense of Peking. The Chinese have been motivated by similar desires to expand their influence, but they also have a greater and more direct stake then the Soviets in a Communist victory in Vietnam. F(b)[1] F(b)[3] (C)

Secondly, Sino-Soviet political enmity and military rivalry have worked to limit to some extent what aid the North Vietnamese have received and how they have received it. Because of China's insistance on a right to inspect Soviet shipments in transit to North Vietnam, the Soviets appear to have held back or delayed shipment of some sophisticated military equipment. For their part, the Chinese have refused certain Soviet requests for facilities to transmit aid to Vietnam, being unwilling to give either political or propaganda advantage to the USSR.

Thirdly, both Moscow and Peking have been constrained in their aid to North Vietnam by a desire to avoid a direct conflict with the U.S. Although Moscow and Peking

F(b)(3)
(U)

frequently differ in their assessments of the level of tolerable risk, their constraint has had a restrictive influence on what military aid the North Vietnamese received and the channels through which it has been received.

The evidence also supports a number of tentative observations concerning the effect of the dispute on the North Vietnamese war effort. It is clear that difficulties between Moscow and Peking applied primarily to the receipt of sophisticated hardware for the defense of North Vietnam and to only a limited degree to the delivery of weapons and support items needed by the DRV to pursue the campaign in the south. Consequently, it does not appear that the dispute has had any significant effect on Hanoi's ability to maintain the war south of the 18th parallel.

However, the question of possible adverse effects on North Vietnam's aerial and coastal defense capabilities is much more complex. [redacted]

F(b)(1)
F(b)(3)
(T)

Thus, the occasional periods when the rate of SA-2 firings seemed relatively low might have been associated with delays in Soviet missile shipments through China, but this is difficult to demonstrate. Similarly, it is not definitely known what plans the North Vietnamese leaders had for the Soviet Komar missile boats that were denied to them, that is, whether the DRV did indeed intend to use them to attack U.S. carriers.

Nevertheless, the evidence does point to an impressive array of incidents in which shipments of air and coastal defense equipment apparently were obstructed or denied. The evidence indicates:

F(b)(3)
(U)

F(b)(3)
(U)

(1) that North Vietnam throughout the month of March 1965 was deprived of all Soviet military aid because of Sino-Soviet squabbling over the terms of rail transshipment;

(2) that operation of a Soviet-supplied SA-2 missile system was delayed from March until July 1965 at least in part because of Chinese pressures on North Vietnam;

(3) [redacted]

F(b)(1)
F(b)(3)
(T)

(4) that there were again serious deliberate Chinese delays in Soviet military rail shipments to the DRV in January and February 1967;

(5) that there were other delays to Soviet shipments through China caused by Mao's reluctance to crack down on Red Guard disorders in the summer of 1967 and again in May-July 1968;

(6) that [redacted] SAM missiles were held up by the Chinese at the Sino-Soviet border for a month in September 1967, and again in June 1968, apparently because of these disorders;

F(b)(1)
F(b)(3)
(T)

(7) [redacted]

F(b)(1)
F(b)(3)
(T)

(8) that the USSR has declined DRV requests for KOMAR missile boats and coastal defense missiles, largely because of Soviet fears that use of such weapons might lead to a direct clash with the United States. In the case of the KOMARs, the Soviets apparently refused also because they were unwilling to deliver the vessels directly to North Vietnamese ports and the Chinese were

F(b)(3)
(U)

unwilling to accept them in Chinese ports for transferral to North Vietnam by Chinese and North Vietnamese crews.

The conclusion indicated by this panorama of incidents is that at least for short periods the North Vietnamese air and coastal defense capability probably was impaired in some degree. Probably the political impact was greater than the military effect. There is no doubt that the DRV leadership was often greatly disturbed by, and still resents, Chinese obstruction of Soviet aid and Soviet caution in rendering aid. On several occasions North Vietnam has had reason to be seriously worried that difficulties and delays in aid shipments might be prolonged. But thus far the bottlenecks for items of prime importance such as missiles have been temporary, and those problems which became more or less permanent (such as the Soviet withholding of the KOMARs, or the Chinese curtailing of the Soviet air transport flights) have not seemed to be of critical importance.

This situation could change if the Chinese were to impose barriers to Soviet military rail shipments to the DRV, as they have done before, and maintain the barriers over a long period of time, as they have threatened but not yet done. Major North Vietnamese concessions in the Paris negotiations could provide the occasion for such a Chinese decision.

F(b)(3)
(U)

I. THE ISSUE OF RAIL TRANSIT OF CHINA

A. The Initial Impasse and the Sino-Soviet Rail Agreement of 1965

The main disagreement on aid to Vietnam has revolved about the shipping of Soviet military goods by rail through China. The argument has been through several phases. The initial impasse came soon after Kosygin's return from his February 1965 visit to Hanoi and Peking. At that time the first Soviet arms to be shipped by rail to North Vietnam in accordance with Kosygin's promises to Hanoi were held up while Moscow and Peking haggled over the terms of shipment. The main point at issue was China's insistence on a right of rigorous inspection of all arms shipped across Chinese territory. The Soviets finally, and reluctantly, yielded but the inspection issue and the agreement have been continuing subjects of controversy between Moscow and Peking.

Although the agreement was not published, [redacted] a number of Chinese statements have revealed its basic provisions. It was dated and apparently became effective on 30 March, and it was for the two-year period, 1965 to 1967. The agreement was renewed in March 1967. The agreement, and the negotiations leading to it, were bilateral; in keeping with China's rejection of any "unity of action" with the Soviet Union, Mao's regime has refused to engage in any tripartite Sino-Soviet-Vietnamese agreements or negotiations. F(b)(1) F(b)(3) (S)

The agreement covers military supplies only. This is a point of importance in subsequent polemics because the Chinese agreed to transport free of charge only military goods, as defined by themselves. Everything else not covered by the original or by supplementary Sino-Soviet rail transport agreements was categorized as "economic supplies." Shipment of economic supplies was to be a matter of ad hoc arrangements between Chinese and

Soviet railroad authorities, and was to be paid for, as usual, in rubles. It seems likely that both sides have obfuscated in their later polemics on this matter, the Soviets charging that the Chinese were demanding payment for military supplies, the Chinese denying it. It appears that the Chinese define "military goods" narrowly to exclude many military-support articles and such items as medicines; the Soviets, on the other hand, define the term broadly.

According to the agreement, the Chinese were apparently obliged to transport only categories of weapons listed in the document. The agreement specified that a certain number of freight cars would be made available by China in each month, quarter, and year to carry a certain maximum tonnage of Soviet military goods in each time period, but only provided that the goods fell into the categories listed in the agreement. The Chinese did not agree in advance, in other words, to transport any weapons the Soviets might choose to send. Since the Soviets were also required by the agreement to file with the Chinese an "outline transport plan" for each specific shipment at least 30 days before the shipment was to arrive in China, the Chinese were given some lead time to deal with the matter in accordance with their political interests. If, for example, as a result of further Soviet-Vietnamese talks the Soviets were to agree to supply additional types of weapons not clearly specified in the 30 March agreement, the Chinese had a legal excuse to refuse to accept the shipments until a supplemental agreement was negotiated. Furthermore, they would not sign such a supplement until they had themselves confirmed that North Vietnam wanted the weapons. This provided the Chinese continuing opportunities to lobby privately with the North Vietnamese.

Soviet annoyance and concern with the provisions of the rail agreement have continued for a number of reasons. Delays occasioned by inspection--said to involve "inspecting every crate and dismantling every weapon," and to take days for each train--have been used in repeated Chinese efforts to pressure the DRV into restricting its reliance on Soviet military aid. [redacted] F(b)(1) F(b)(3) (S)

F(b)(3)
(U)

[redacted] Also, the Soviets appear to have been influenced in their decisions as to which weapons to furnish the DRV by the knowledge that every shipment would be examined and might, therefore, assist indirectly Chinese weapons programs. And finally, the Soviets apparently do believe that the Chinese have occasionally removed parts of Soviet weapons during inspections, although most Soviet public statements on this subject are probably exaggerated. [redacted]

F(b)(1)
F(b)(3)
(S)

[redacted]

F(b)(1)
F(b)(3)
(S)

B. April-July 1965: The Issue of Soviet SAM Personnel

During the four months following the March rail agreement, shipments including many types of weapons transited China to the DRV apparently without serious difficulty. However, construction of SAM sites in North Vietnam seemed strangely protracted. The delay apparently was caused by a dispute over who was to man the SAM sites and over the transit of Soviet SAM and other military personnel through China.

[redacted]

F(b)(1)
F(b)(3)
(T)

The Chinese strongly objected, but they repeatedly claimed in April and May that it was North Vietnamese reluctance to accept Soviet personnel that had caused the offer to be rejected. On the other hand, the Soviets claimed that the Chinese were placing a limit on the transit of Soviet personnel; [redacted]

F(b)(1)
F(b)(3)
(T)

F(b)(3)
(U)

F(b)(3)
(U)

[redacted]

F(b)(1)
F(b)(3)
(T)

A [redacted] delegation in Hanoi, however, was told by a Pravda correspondent [redacted] that the North Vietnamese had refused to permit the Soviets to man the rockets being installed in order to avoid "alienating" the Chinese. He thus suggested that it was indeed the DRV that was preventing the Soviets from sending personnel to operate the SAMs, but only as the result of pressure from the Chinese. Some two weeks before this, Pham Van Dong is reported to have told Kim Il-sung in Djakarta that the Chinese had persistently demanded that North Vietnam cut off Soviet aid and had sometimes become threatening in trying to enforce the demand.

F(b)(1)
F(b)(3)
(S)

All in all, the evidence suggests that throughout the spring of 1965 the DRV vacillated between yielding to Chinese pressure and thus deferring completion and activization of SAM sites until the fall, when North Vietnamese cadres could complete their training in the USSR to operate them, or flouting Chinese wishes and accepting enough Soviet personnel to put the SAMs into operation more promptly. Finally, under the influence of the mounting U.S. bombing, the DRV seems to have opted for the latter course, and prevailed upon Peking to permit a limited quota of Soviet SAM personnel to pass. [redacted]

F(b)(1)
F(b)(3)

C. August-December 1965: Another Blocked Shipment

[redacted]

F(b)(1)
F(b)(3)
(T)

F(b)(3)
(U)

F(b)(3)
(U)

[redacted] F(b)(1)
F(b)(3)
(T)

[redacted] After extensive haggling the shipment was released for transit near the end of the year. Soon thereafter, leaked Soviet charges of Chinese obstruction led to repeated Chinese Foreign Ministry protests to the USSR and to a public Chinese denial.

D. January-July 1966: DRV Rail Damage and Ho's Visit to China

During the first half of 1966 the DRV had to cope both with transport problems resulting from U.S. bombing of DRV rail lines and with continued and increasingly public Sino-Soviet friction over transit arrangements. In early 1966 shipment of some Soviet economic goods was shifted from rail to sea because of temporary DRV rail disruption and in February the Chinese told the East European representatives in Peking that no more non-military rail shipments could be accepted.

[redacted] F(b)(1)
F(b)(3)
(T)

[redacted] F(b)(1)
F(b)(3)
(T)

[redacted] At the time, the DRV apparently was deeply concerned over the pssobility that the United States might blockade the port of Haiphong and that Soviet and

F(b)(3)
(U)

East European aid might be appreciably reduced in consequence. It seems likely that Ho was now anxious to determine whether, in such an event, the Chinese would permit increased transportation of Soviet aid across China.

E. August-December 1966: A New DRV Role in Rail Transit

A new turning point was reached in the late summer and fall of 1966. In brief, the evidence indicates that it was at that time--and not in the spring of 1967, as the Soviets later claimed--that North Vietnam first assumed a role in the "safeguarding" of Soviet military supplies entering China en route to the DRV.

[redacted] F(b)(1) F(b)(3) (T)

[redacted] It is not certain whether the North Vietnamese under this system actually accompanied the trains through China or whether they merely confirmed the arrival of Soviet weapons in good condition in China from the USSR. In any case, there appears to have been no serious difficulty for the rest of 1966.

F(b)(3)
(U)

F. January-March 1967: The Crisis

Late in January 1967, the Chinese initiated their most serious threat to Sino-Soviet diplomatic relations --and to the Soviet overland supply route to Hanoi. Following a series of deliberately planned and provoked diplomatic incidents in Moscow and other capitals around the world, the Chinese organized a siege of the Soviet embassy in Peking. The siege lasted from 26 January to 11 February and appeared designed to force the Soviets to break state relations. That would have made it impossible for the Soviets to conduct negotiations with the Chinese necessary to continue rail shipments to Vietnam.

In January and February, DRV officials in various parts of the world made an unusual series of statements indicating that the Chinese had reimposed delays on Soviet military shipments through China, despite the new role the North Vietnamese had assumed in rail transport.

There are some grounds to support the conjecture that these Chinese actions in January and February were intended to inhibit the DRV from proceeding further toward negotiations with the United States by raising a direct threat of a permanent cut-off of Soviet aid to the war effort.

[redacted]

F(b)(1)
F(b)(3)
(S)

[redacted] Chinese Central Committee official Wu Hsiu-chuan also told a foreign Communist in mid-December that the Chinese would oppose negotiations as "deviationist." In early January the DRV Foreign Minister issued a public statement which removed some of the previous ambiguity in the DRV position and indicated more strongly than before that a permanent bombing halt alone could suffice to bring talks. The Chinese actions against the Soviet embassy and apparently against Soviet shipments followed within the next three weeks.

F(b)(3)
(U)

F(b)(3)
(U)

Moreover, the Chinese pressures were relaxed in the second week of February at precisely the moment when the North Vietnamese received a new offer on negotiations from President Johnson and informed the Chinese that they would reject it. Ten days of North Vietnamese-Chinese negotiations in Peking immediately thereafter appeared to unblock the Soviet shipments and reaffirm DRV responsibility for the shipments at the Sino-Soviet border. The February Sino-Vietnamese talks in Peking also probably facilitated the secret Sino-Soviet negotiations in March that resulted in the renewal of the 30 March 1965 Sino-Soviet rail transit agreement.

[redacted]

F(b)(1)
F(b)(3)
(T)

the Chinese in the new agreement "consented to let only 9,000 to 10,000 tons of freight a month or 100,000 tons a year across Chinese territory" and claimed that "the actual requirements of the DRV in military freight, with due account of the additional deliveries earmarked for this year, add up to more than 30,000 tons a month." (These figures are all apparently in addition to economic rail shipments.) The Soviets charged that "the most essential forms of Soviet military aid reach Vietnam in the volume which the Chinese leaders consider permissible and useful to themselves." It is possible, however, that the Chinese insistence on more limited military tonnage reflected not malevolent intent but rather the objective difficulties encountered by or anticipated for the North Vietnamese and Chinese railroad systems.

With the conclusion of the new agreement, the Soviets --and to a lesser extent the DRV--began to disseminate many reports, often deliberately misleading, about the DRV role in assuming responsibility for Chinese transshipment of Soviet supplies. (Some such reports claimed that a "tripartite" Sino-Soviet-Vietnamese agreement had been signed, although others contradicted this.) The aim

F(b)(3)
(U)

FlbX(3)
(U)

in floating these reports was apparently to convey to the United States the message that transshipment difficulties were a thing of the past. However, a new source of difficulties soon appeared.

G. April 1967 to Date: Effects of the Cultural Revolution

Since April 1967, the major problem for Soviet rail shipments to Vietnam has been disruptions on Chinese railroads resulting from Red Guard activity, particularly in the summer of 1967 and again in May-July 1968.

There is considerable evidence that Red Guard factions seeking weapons to use against their factional opponents seized weapons bound for Vietnam in July and August 1967. In a speech of 20 September reported in the Red Guard press, Chou En-lai revealed that "trains with military aid for Vietnam" had been "ambushed," and military stores destined for Vietnam looted. Chou's references to the passive attitude enjoined on the PLA generally by Peking in that frenetic period explained how special trains guarded by PLA troops could be successfully "ambushed." It was not until the fall that the PLA's instructions were changed to permit the army, among other things, to defend its weapons. These incidents may explain delays in certain September rocket shipments about which the Soviets later complained.* Peking may have wished to wait until order had been sufficiently restored so that embarrassing incidents would not occur with such sensitive weapons.

FlbX(1)
FlbX(3)
(T)

[redacted] SAM missiles were held up by the Chinese for a month in September 1967. The Chinese apparently claimed at the time that the delay was necessitated by rail bottlenecks in Vietnam, but the troubles caused by Red Guards in China seem a more likely explanation.

FlbX(3)
(U)

Similar difficulties recurred in the spring of 1968, when the Chinese cultural revolution again entered a leftist phase. Once again, it was Chou En-lai's task to cope with the damage. In a speech on 12 May Chou lamented traffic tieups at three major rail junctions on the main railroad line from the USSR to Vietnam, and said that at the town of Liuchow, in Kwangsi adjoining Vietnam, "traffic is at a standstill" and "material cannot be transported...to Vietnam." [redacted] F(b)(1) F(b)(3) (T) Passenger service between Peking and Hanoi was suspended in June and low-priority freight either halted or shifted to sea transportation.

[redacted] F(b)(1) F(b)(3) (T) Since it does not seem reasonable that the USSR would keep funneling shipments into China if none were reappearing in the DRV, the inference would seem to be that some shipments were actually arriving in North Vietnam, however much delayed.

Nevertheless, weapons shipments, the highest-priority traffic of all, seem to have been in a particularly precarious position because weapons were the special target of Red Guard factions harrassing the rail lines. A 13 June directive of the Chinese leadership revealed that a shipment of Chinese "support-Vietnam supplies" had been looted in Kwangsi. On 19 June Chou En-lai intervened once more (for the second time in two months) and demanded that these supplies be returned in toto and railway traffic restored. In this atmosphere it seems likely that Soviet military equipment bound for Vietnam was also affected, as the Soviets have in fact claimed. [redacted] F(b)(1) F(b)(3) (S)

[redacted] F(b)(1) F(b)(3) (S)

By early July the North Vietnamese had begun to complain to foreigners, perhaps as a means of putting pressure on the Chinese. For example, [redacted] F(b)(1) F(b)(3) (S) was told by the North Vietnamese that the flow of Soviet military supplies had been "disrupted" in China. The North Vietnamese may also have complained directly to the Chinese in early July. A 3 July directive, personally endorsed by Mao, reiterated in threatening tones the demand for the full restoration of rail traffic and the return of all supplies looted, and a convoy of three high-priority trains was rushed south through Kwangsi under military escort on 5 July. On 10 July a message from a PLA unit cited stern demands by both the Chief and Deputy Chief of the PLA General Staff that traffic on the "whole line" be resumed "within two days." In mid-July a North Vietnamese delegation in Peking is reported to have pressed the Chinese for guarantees with regard to rail transportation. [redacted] other evidence F(b)(1) F(b)(3) (T) shows a gradual improvement in the rail situation in the remainder of July and August.

The chaotic rail transit picture was further complicated during May and June by the coincidence of another leftward shift in Chinese domestic policy and the beginning of North Vietnamese talks with the United States in Paris. To show the DRV his feelings about the talks, Mao authorized simultaneous unpublicized demonstrations in early June outside the DRV consulates in Nanning, Kunming, and Canton protesting the negotiatings.

The weight of the evidence, however, does not substantiate the view that the rail delays in south China were deliberately created by the Chinese regime in retaliation for the opening of the Paris talks. The factional struggles in Kwangsi that were the immediate cause of most of the rail troubles in 1968 were part of a larger pattern of factional strife which arose simultaneously in many parts of China in the spring. The Chinese regime evidently made efforts through Chou En-lai, in May and June, to try to curb the disorders on the rail line without

F(b)(3)
(U)

sacrificing the current overall leftist line. When that did not suffice, the PLA in early July was ordered to crack down hard on railroad troublemakers despite the fact that the PLA at the time in some other places was still being forbidden to crack down on Red Guard factional struggle. The North Vietnamese war effort was temporarily a victim, but not a target, of one of Mao's domestic aberrations.

However, the possibility of a resumption of the politically-motivated Chinese obstruction of previous years remains an important weapon held in reserve by Peking. [redacted]

F(b)(1)
F(b)(3)
(S)

The rail traffic provides China a means of applying pressure against North Vietnam, as it did in early 1967, on the subject of negotiations. After all that has transpired, it seems possible that Peking might indeed cut the flow of rail supplies to the DRV if a major decision unwelcome to Mao should be reached in the Paris talks.

F(b)(3)
(U)

II. The Issue of Air Transit of China

The Sino-Soviet struggle over rail transit to Vietnam has been mirrored in the last three years in a secondary running battle over Soviet efforts to use military air transports across China. Despite Soviet protests, the Chinese remained adamant, and, consequently the Soviet airlift has been small-scale, intermittent, and marginal in importance.

The Soviets at one time--in February 1965--sought an "air corridor" across China for mass flights of transports to the DRV like the airlifts the Soviets have staged in other parts of the world. The Chinese on 28 February 1965 flatly refused, in part because the Chinese feared that such large-scale flights would be unduly provocative to the United States, and in part because they feared the Soviets would use these flights for espionage purposes. In addition, the Chinese may have felt a Soviet right of mass overflight would undercut their asserted "sovereign" right to inspect all Soviet military cargoes passing through China to Vietnam.

[redacted]

F(b)(1)
F(b)(3)
(T)

F(b)(3)
(U)

F(h)(3)
(U)

III. The Issue of Shipment by Sea

A. Private Chinese and Soviet Statements

The questions of shipping military hardware to North Vietnam by sea, and of Soviet reluctance to do so, seem to have arisen in private Sino-Soviet negotiations from the time of the first controversies over rail and air transit in the spring of 1965. As recriminations over rail transit delays grew, Chinese private comments about sea shipment grew more sharp. [redacted]

[redacted]

F(h)(1)
F(h)(3)
(T)

When Soviet-sponsored charges about Chinese rail obstruction began to multiply in the Western press late in 1965, the Chinese surfaced charges of a cowardly Soviet refusal to use the sea route.

[redacted]

F(h)(1)
F(h)(3)
(T)

The USSR has repeatedly suggested that it believes the Chinese wish to provoke a conflict between the Soviet Union and the United States in the Gulf of Tonkin. A widely-distributed CPSU letter to other parties in

F(h)(3)
(U)

February 1966 claimed that the Chinese sought such a conflict "in order to be able to, as they themselves say, 'observe the battle of the tigers while seated on the hill.'" In April 1966, the Soviet leaders circulated a document at the 23rd CPSU Congress which accused the Chinese of trying to force the Soviet Union to ship its military aid by sea and risk a clash with the Seventh Fleet, and thereby to force a Soviet-U.S. showdown.

What the Soviets apparently have wanted is a way to carry weapons by sea to the Far East, yet have someone else assume the burden of actual delivery to the DRV. Such a solution would be available if the Chinese were willing to accept Soviet shipments at Chinese ports--such as Canton--for transshipment to the DRV either by rail or by Chinese ship. At various times the Chinese have accepted Soviet economic cargoes, such as POL, for transshipment. The Soviets apparently have tried and failed to get the Chinese to handle some military shipments in the same manner. [redacted] F(b)(1) F(b)(3) (T)

[redacted] F(b)(1) F(b)(3) (T)

[redacted] The Chinese, once more, were said to have refused and to have insisted that the Soviets send their shipments direct to Haiphong, This

[redacted] F(b)(1) F(b)(3) (S)

issue was surfaced on only one occasion in the Soviet press. On 30 March 1967, an Izvestiya article charged that the Chinese had refused the USSR "free access to one of South China's harbors, from which these (Soviet) weapons would be transported to Hanoi."*

To sum up: there is a body of substantial evidence [redacted] F(b)(1) F(b)(3) (S) that Soviet ships probably have not carried arms to North Vietnam. The conclusion is strongest regarding sophisticated, large, or bulky weapons, and less strong regarding small, simple weapons. Soviet ships may have made unobserved clandestine deliveries of rifles or ammunition to Haiphong as the Chinese may have done. But the political reason for Soviet restraint--the wish to avoid a direct clash with the United States in the Gulf of Tonkin--seems to be of such importance to the USSR as to make it unlikely that the Soviet Union would make exceptions to a general ban on arms shipments to convey lower-priority weapons which could as well be sent by rail.

B. The Soviet Attitude Toward a Potential Blockade

The USSR has obviously had great anxiety over the sea supply route to North Vietnam--the main channel for Soviet economic and military-support shipments to the DRV. The Soviets over the past three years have been concerned over U.S. bombing of DRV ports and over the possibility that the United States might take steps to close DRV ports by mining or blockade. Through repeated vigorous protests the Soviet Union has sought to convey the impression that the USSR regards access to DRV ports as important to Soviet

*It is possible, however, that Chinese ships have carried Chinese small arms to Vietnam, possibly from Canton or from Hainan ports. [redacted] such shipments of light weapons carried with other cargo would be quite difficult to discover. F(b)(1) F(b)(3) (T) In this connection, it should be noted that Foreign Minister Chen Yi, in a published interview of 30 December 1965, was quoted by NCNA as declaring: "Why can't Soviet military material for Vietnam be shipped by sea as is that of other countries?" (Emphasis supplied.)

interests. One report suggests that the Soviet leadership has decided its interests would justify serious risk of confrontation with the U.S.

F(b)(1)
F(b)(3)
[redacted] in the spring of 1967 Czechoslovak Defense (S)
Minister Lomsky reported to the collegium of the Ministry that the Soviets had issued an order to the Soviet navy to provide escorts for Soviet merchant vessels in the event that Haiphong was blockaded or a Soviet vessel bombed in Haiphong harbor. This order also allegedly called for efforts to break any blockade, including steps to sweep minefields. Lomsky, who had just returned from Moscow, said that the Soviets had told him that they would resist any U.S. moves to prevent Soviet ships from going to Haiphong. The Soviet order was supposedly issued at a time when U.S. statements pointed to a possible blockade of Haiphong.

It should be noted, however, that this report speaks of the automatic provision of escorts for Soviet merchant ships if they were bombed in Haiphong harbor. After the 2 June 1967 strafing incident at the DRV port of Campha, a Soviet Foreign Ministry note threatened "to take appropriate measures to insure the safety of Soviet ships" if the incident were reported. On 5 January 1968, after two more incidents had actually occurred, a Soviet protest note said that "the corresponding Soviet departments will be compelled to take measures for insuring the safety of Soviet vessels bound for DRV ports." However, no Soviet naval escorts were in fact provided. It seems evident that this is a matter which the Soviet politburo keeps under close scrutiny and continuing review. To some extent the [redacted] report has been in error. F(b)(1) F(b)(3) (S)

It is possible that the Soviet navy, in the spring of 1967, was instructed to prepare contingency plans for a possible Soviet attempt to break a hypothetical U.S. blockade of Haiphong--leaving implementation open as a matter for politburo decision--and that it was this which Lomsky related to the Czech collegium and [redacted] reported in slightly garbled form. While it is conceivable F(b)(1) F(b)(3) (S)

(although we think on balance less than probable) that the Soviet leadership might come to the decision Sejna reports, it has probably not as yet decided what it would do in the event of a U.S. blockade.

IV. The Weapons Withheld

The Soviet Union has indicated that some of the weapons requested by the DRV have been denied. The CPSU document on Soviet military aid to Vietnam circulated among visiting foreign Communists in Moscow in November 1967, stated that "the USSR has speedily satisfied practically all the requests of the DRV for delivery of military equipment." A few paragraphs later, the document states, without elaboration, that "through the fault of the Chinese side, it has not been possible to deliver some types of weapons to the DRV."

A. The KOMARs

The DRV has not received the KOMAR or OSA-class guided-missile-firing patrol boat, which it wanted and, apparently, at one time thought it was going to receive. The failure to receive such boats must be particularly annoying to the DRV because, over the past decade, the USSR has distributed KOMARs and OSAs to about a dozen countries around the world, including some whom the DRV must regard as far less deserving than itself.

[redacted] F(b)(1) F(b)(3) (T)

F(b)(3)
(U)

F(b)(1)
F(b)(3)
(T)

The evidence suggests that after an original offer had been made in late 1964 to furnish KOMARs to the DRV, the USSR changed its mind after regular U.S. bombing began in 1965, the Soviets being unwilling to run a serious risk of conflict with the U.S. in the Gulf of Tonkin.

Unlike other weapons the USSR has supplied to North Vietnam, it was not practical to ship the KOMARs by rail or air across China; they would have to travel from Soviet ports to Haiphong as deck cargo under U.S. surveillance. The Soviets instead evidently offered, at some time between February and November 1965, to transfer the KOMARs to DRV control in Chinese ports, whence they could make their way to North Vietnam, as have the Chinese patrol boats transferred to the DRV by the Chinese. The Chinese apparently refused, primarily for political reasons.

It is also conceivable that the USSR was also reluctant to have the KOMARs in DRV hands at all because of concern at the possibility that the DRV would use them to attack major U.S. ships, with uncalculable possibilities of U.S. counteraction. If the Soviet Union was aware that the Chinese had laid down a blanket rule forbidding Soviet weapons transshipment via Chinese ports, an offer to send

F(b)(3)
(U)

the KOMARs in this way might have been used to force the Chinese to share the responsibility for the DRV's failure to receive KOMARs.

B. The Coastal Defense Missiles

A separate but related issue is the question of Soviet willingness to supply North Vietnam with short-range land-based coastal defense guided missiles, such as the 35-40 n.m. Samlet or the 22 n.m. SS-N-2 (Styx)--the weapon carried on the KOMARs and OSAs. Supplying such weapons to the DRV would have been somewhat less dangerous for the Soviet Union than supplying KOMARs or OSAs. The Samlets or Styxs could be transported without great difficulty by rail, thus avoiding the painful question of who would carry them into Haiphong by sea past the waiting U.S. fleet. (The USSR, however, would then have to be willing to allow these missiles to be examined minutely in transit by the Chinese--a separate question.) Also, short-range coastal defense missiles are much more clearly defensive in nature than the KOMARs, and while useful against hostile ships operating close to the North Vietnamese coast are not as a rule usable against U.S. aircraft carriers which would generally be well out of range. Thus the use to which the North Vietnamese could put these weapons, unlike the KOMARs, would be limited and predictable for the Soviets, and the probable U.S. response would also be more readily calculated in advance.

However, longer-range weapons, such as the 300 n.m. cruise missile Shaddock, would present a real threat to American carriers and other major ships. Their possession by the DRV would conjure up for the USSR many of the same worrisome problems that would be created by the DRV's possession of KOMARs. In addition, the Soviets would presumably be even more reluctant to expose this longer-range missile to Chinese scrutiny en route to the DRV than they would the Styx or Samlet. On either count, it may be concluded that if the Soviets declined to furnish the DRV with the Samlet or Styx, they are quite unlikely to furnish the Shaddock or longer-range guided or ballistic missiles.

F(b)(3)
(U)

[redacted]

F(b)(1)
F(b)(3)
(S)

It is probable that the Soviets have been so concerned over U.S. reactions that they have been unwilling to give the DRV even the short-range defensive missiles. It is conceivable that they may also have been reluctant to allow the Chinese to inspect such missiles during transit to Vietnam.* This seems less likely; the USSR is reported to have furnished models of these weapons to the Chinese before the Sino-Soviet break.

[redacted]

F(b)(1)
F(b)(3)
(S)

F(b)(3)
(U)

[redacted]

F(b)(1)
F(b)(3)
(S)

D. Caveats for the Future

The Chinese are known to have built between eight and fourteen OSA and KOMAR guided missile boats. They have produced both the Samlet and the Styx missile, and there is evidence that they have deployed coastal defense missiles on land installations. To date they have furnished neither coastal missiles nor KOMARs to North Vietnam. The possibility that they will do so will grow as the small Chinese inventory of these items increases. Chinese diplomats [redacted] may have been alluding to the KOMAR and the coastal missiles when they told a [redacted] journalist on [redacted] 1968 that China was in a position to offer the DRV "quite a lot of sophisticated equipment, especially rockets which China is now making and which North Vietnam has not been able to get from Russia." Any possibility that the Chinese might give the coastal missiles or KOMARs to North Vietnam would dwindle if the North Vietnamese were to make a major concession in the peace talks. It is unlikely that the Chinese yet are in a position to give the DRV surface-to-surface guided missiles with a range much longer than that of the Styx, and it seems unlikely that China would do so even if such weapons were available to give.

F(b)(1)
F(b)(3)
(S)

F(b)(3)
(U)

On the Soviet side, the marginal decision not to furnish North Vietnam with the Styx or Samlet might be reversed in time, but it is not likely that the Soviet's negative attitude on sending longer-range surface-to-surface guided missiles to North Vietnam will change.

A more pressing Soviet problem, and temptation, might arise if the Vietnam negotiations should lend to a ceasefire and the subsequent withdrawal of most U.S. naval units from the Gulf of Tonkin. Some Soviet leaders might then argue for transporting of some Soviet military hardware to Vietnam by sea in order to establish, under conditions of minimum risk, a precedent which the U.S. might thereafter accept, as it now accepts Soviet sea transportation of weapons to Cuba.

INTELLIGENCE MEMORANDUM

Thailand: The Present Political Phase

Summary

Thailand is entering a new phase of its political life. After ten years of rule by martial law, the military leadership is moving to legitimize its rule. A new constitution has been promulgated as the first step in this process, but the document virtually ensures that there will be no major changes, at least in the near future, in the way Thailand is governed.

The constitution does provide for the first nationwide elections in over a decade. Although the elections are now less than five months away, the government so far has done little to organize itself for them. Opposition forces are also divided and weak, but they may prove strong enough to deny the government a clear-cut majority in the lower house. Whatever the outcome, the present leaders will continue to rule Thailand after the elections and, at least for the short term, there is not likely to be any important change in Thai domestic and foreign policies.

Note: This memorandum was produced solely by CIA.

[redacted]

[redacted]

[redacted]

1. There is a timelessness about modern Thai politics that is as comforting as it may be misleading. On the surface, nothing important seems to change. For 36 years Thailand has been ruled by a tight coterie of military officers. In order to run the country, the military has maintained a profitable alliance with civilian politicians and bureaucrats, with whom it joined in 1932 to bring down the absolute monarchy. The civilians have exercised considerable influence, but the relationship has always been fundamentally one-sided. With the exception of a few short periods, the military establishment has called the tune.

2. Autocratic without being despotic, conservative without being reactionary, the ruling establishment has brought a reasonable share of economic progress and social change to Thailand. With a minimum of serious disruption, it has guided the country through factional strife and foreign occupation, changes in personalities, and the inevitable upsets of an evolving social system. The establishment's ability to cope with Thailand's problems has been due less to the wisdom or resourcefulness of its leadership than to the fortunate tractability of those problems. Whatever their shortcomings, however, the leaders seem to fit in with the country.

3. The promulgation on 20 June of a new and long-delayed constitution appears, then, to have inaugurated a new phase rather than a new era in Thai political life. The constitution was, after all, the product of five years of gentle agitation by civilian elements in the establishment, and the realization on the part of more enlightened military officers that after ten years of "martial law" the regime needed to legitimize its rule. It was not meant, nor has it been interpreted, as a sharp departure from past practice. On the contrary, Thailand has had seven constitutions since 1932, each establishing the rules of the game only until new players appeared, new sides were chosen, and new rules were needed. Although nine years in the writing, there is little in the present document that distinguishes it greatly from its predecessors.

[redacted]

NND 941536 ---/2?

[redacted]

4. A crazy quilt of parliamentary and presidential systems, the Thanom constitution is designed to perpetuate the rule of the military-civilian establishment. It virtually ensures that the present leaders will be in power for the forseeable future. The document provides for a strong executive appointed by the King on the advice of the upper house of the legislature, or Senate. To complete the tight circle, the Senate is appointed by the executive (with the King's blessing). The Senate was chosen shortly after promulgation, and it should come as no great surprise that although the body's president is a civilian, 90 out of 120 Senate seats are filled by military officers. Almost all of the new senators held seats in the old constituent assembly, whose loyalty to the government was amply demonstrated during the nine years it spent drafting a new constitution. Any doubt about the purpose or political complexion of the Senate, moreover, is dispelled by the presence of several prominent generals, including Saiyud, who is in charge of the counterinsurgency effort; Kriangsak, from the supreme command headquarters; and, perhaps most revealing of all, General Samran, commander of the First Army, whose troops control Bangkok.

5. The only real departure from the quasi-constitutional arrangement under which Marshal Sarit and Prime Minister Thanom have ruled since 1958 is the lower house, whose members will be chosen in nationwide elections early next year. It will mirror, however imperfectly, long submerged political differences in the country, and will serve as an outlet for the expression of regional grievances. It will also provide a forum for those civilian politicians who have been on the outside looking in for the past ten years. Caught between a powerful executive and a stacked and dominant Senate, and without authority to vote no confidence in the government, the lower house's powers under the constitution are carefully circumscribed.

6. The new constitution, in short, does not give away the keys to the kingdom. Nor is there any reason to believe, at least at this juncture, that the constitution will set in motion unforeseen forces

[redacted]

NND 941536 ---/2

[redacted]

that will upset the applecart. On the contrary, the politicians, the parties, and the issues that have emerged thus far only add to the impression that nothing has changed in Thailand. Almost all of the leading players, both on the government side and in the ranks of the opposition, were active ten or more years ago. The leader of the major opposition Democratic Party, for example, was a prominent political figure 25 years ago, and although other opposition leaders are somewhat more contemporary, at this writing at least there is hardly a "young turk" in the bunch. It is as if Sarit's coup in 1958 put the country on a shelf, and now ten years later the old pieces are being brought down, dusted off and put back together. The Thai electorate will have to look elsewhere if it wants fresh faces and new ideas next year.

7. There is no guarantee, however, that this picture of political continuity will stand up. The fact remains that Thailand is entering a period of political change. The ten-year interregnum is about to end, and a different, albeit far from new, set of arrangements will follow in its wake. Against its better instincts, the military oligarchy is taking its case to the Thai people. Although there is every reason to believe the military leaders can negotiate the transitional period with their hold on power intact, the subtle pressures that brought them this far may take them a good deal farther than they are presently prepared to go. A great deal will depend on how they run the elections, and, finally, on how well they do.

Bangkok Municipal Elections

8. If the outcome of the September Bangkok municipal elections is any sign, the government may be in for a harder time than it anticipated in next year's elections. The Democratic Party, the only nationwide opposition party currently active, took 22 of 24 seats in the municipal assembly. Three recognized government slates managed to elect only two progovernment candidates. The first meaningful election in Thailand in ten years, the municipal election was touted as an important political barometer.

[redacted]

NND 941536 ---/2

[redacted]

9. The Democrats have always been strong in Bangkok, but their sweep came as a surprise to supporters and opponents alike. There are a number of reasons for the Democrats' extraordinary showing. For one thing, Bangkok has long been a party stronghold, and the Democrats apparently mounted a low-key but effective campaign there. The other causes, however, cut closer to the bone and have wider implications for next year's elections. In addition to rallying their normal supporters, the Democrats were the beneficiaries of an antiadministration vote that stemmed from local issues. It would be a mistake to dismiss the importance of the Democratic sweep because it was based, in part, on local issues, however. Rising pork prices and increased bus fares may not have much impact in the countryside, but every area of Thailand has local grievances and the regime is in trouble if voters cast ballots on the basis of fixing responsibility for local ills. The low turnout in Bangkok is a fairly good sign that a major voter revolt is not in the cards, but the voting does suggest that there may be more antigovernment sentiment in the country than has been recognized heretofore.

10. The Democratic victory can also be traced to the indecisiveness, disunity, and apparent complacency of the government. Administration strength was dissipated by the fielding of three slates, and organizers failed to get out the vote among those elements who might be expected to back the regime. If some elements thought that some last-minute chicanery might carry the day, they had not counted on student poll watchers who saw to it that the election was one of the country's cleanest.

11. Whatever the reasons for the Democratic sweep, it may have an important bearing on next year's legislative elections. For the Democrats, the victory provides a much-needed psychological boost. Out of the limelight for ten years and weakened by the death of their leading public figure, the Democrats are suddenly in the position of running, at least nominally, the nation's largest and most important city. Its greatest impact, however, may be on the government side. The election is a

[redacted]

NND 941536 ---/25

major disappointment to those elements who had hoped that a Democratic Party defeat in Bangkok would clear the way for an easy victory in the legislative elections. The Bangkok skirmish may prove to be a rude but much-needed awakening for complacent Thai leaders. The election results are a disquieting sign that the ruling oligarchy will have to put aside its squabbling and marshal its considerable resources if it hopes to gain a clear-cut victory in next year's elections.

The Government Prepares for Elections

12. With the opening round in the constitutional process already over, with nationwide elections less than five months away, and with three years of planning and organizing under its belt, the government still does not have a political party. There are a number of reasons for this state of affairs, including the fact that the individuals with the best organizational ability in the government are precisely the ones who have been against elections from the start. The major problem the government faces in forming a unified political party, however, is simply that the government itself is not unified. The prospect of elections has aroused rather than soothed long-standing factional differences within the ruling oligarchy. On the one hand, there is the fundamental split between civilian "liberal" elements, exemplified by Foreign Minister Thanat and Minister of National Development Pote Sarasin, and the old-guard military establishment. And on the other, there are the more important divisions within the military group itself. The breakdown is roughly between Prime Minister Thanom and Deputy Prime Minister Praphat, the two men whose working relationship has kept the country stable since Marshal Sarit's death in 1963.

13. These factional differences will have to be sorted out and some acceptable understanding reached before the government's political activity can move into high gear. Much of the responsibility for the slow progress belongs to Prime Minister Thanom. For all of his virtues, Thanom has shown little inclination or ability to harness the ambitions of the other factional leaders behind a unified effort. Indecisive and colorless, the prime minister has done little during the five years he has at least nominally ruled

NND 941536 --- /2 9

[redacted]

Thailand to build either a political organization responsive to him or the regime, or a following in the country that can be translated into political power in an election year. As a consequence, Thanom has no power base outside the establishment, and the regime has to build an organization virtually from scratch.

14. The military leaders hope to create a political party broad enough to include all of the factions that have helped rule the country for the past ten years while, at the same time, bringing under its umbrella political elements with some following in the country whose ties to Bangkok and the levers of power have been negligible. The faction associated with Prime Minister Thanom has been trying since late last year to line up former members of the National Assembly for the party. Independents, or former members of moribund parties, they are the professional politicians with local connections whose support could prove indispensable in the legislative elections. The effort has been halfhearted and has not gone particularly well. One problem is that many of these politicians, although flattered by their new-found importance and eager to collaborate with the establishment, are confused by conflicting instructions and leadership from Bangkok. Their difficulty has been in determining who speaks for the government.

15. After an initial period of studied detachment, Deputy Prime Minister Praphat has moved forcefully into the vacuum left by Thanom and his associates. Praphat is in an enviable position to organize grass-roots support for the regime. When he wears his minister of interior hat, Praphat commands an extensive and far-reaching provincial bureaucracy that stretches from provincial capitals to isolated villages. Whatever its weaknesses, it is the best apparatus in the country. Praphat's vehicle is the Free People's League of Thailand, a quasi-official, anti-Communist group set up last year by him and his crony, Director of the Department of Local Affairs Chamnan. The league will soon have a spin-off Free Peoples Party (FPP), and Praphat has already signed up an impressive array of supporters. Ironically, they include several well-known leftists such as

[redacted]

NND 941536 ---/2c

[redacted]

Sang Patanothai, and Buddhist leader Phra Pi Montham. Neither Praphat nor the leftists apparently intend to let ideology stand in the way of good politics.

16. Praphat has assured other government leaders that his Free Peoples Party will merge with the government party once the latter gets off the ground. A shrewd political infighter, there is good reason to believe, as many of his opponents suspect, that Praphat intends to use the FPP to further his own ambitions.

17. The problem of determining who speaks for the government is complicated further by the uncertain role being played by Minister of Economy Pote Sarasin. As the most prominent and ambitious civilian in the cabinet, Pote was expected to be a key figure in preparing the way for the return to parliamentary rule. After getting the green light from Prime Minister Thanom to organize on behalf of the leadership, as early as 1965 Pote began to sound out old politicians and financial interests. He made some headway but the important people were still waiting for Praphat and the other generals to make their move. By the fall of 1967, when it was clear that the constitution would soon be out, Praphat swung into action and Pote soon found the ground cut from under him. In June 1968, Thanom picked General Dawee as secretary general of the still-unnamed government party--a post that Pote once thought he was in the running for--and the economic minister's organizational efforts came to a virtual standstill. At least for the moment, the regime appears to have lost the services of the leading figure of its civilian wing.

The Opposition

18. The ruling group is going into the elections divided and lacking a leader who can, on his own, command much support in the country. All is far from lost, however. The regime's deficiencies must be weighed against the fact that it still has far more resources at its disposal than do its opponents and that for a variety of reasons they are hardly in a comfortable position to take advantage of their opportunities.

[redacted]

NND 941536 ---/3c

[redacted]

19. The Democratic Party is the only opposition group that comes out of the ten-year hiatus with a dedicated leadership, a small but loyal following, and a strong sense of identity. The party is the oldest in Thailand. Established in 1946 by a group of former followers of leftist leader Pridi Phanomyong, the Democrats are conservative monarchists, with strong ties to the royal family. The party has been an important factor in every Thai election, and although its strength is concentrated in Bangkok, it has some backing in both the northeast and the north.

20. The Democrats' prospects in next year's legislative elections may be importantly affected by their performance in running Bangkok. With little experience in municipal affairs, there is a real danger, as one of the newly elected Democratic assemblymen recently admitted, that the party will not make the grade. Nevertheless, the Democrats have an excellent opportunity to prove their mettle, and they may be able to uncover evidence of the corrupt practices of their predecessors which can be put to good use in the legislative elections. Even if things go well, there is little chance that the Democrats have enough followers or financial assets to pull off a major upset next year. Even the party's most optimistic supporters do not believe it can muster much more than one third of the seats in the lower house. It is possible, however, that the Democrats and other opposition parties of the center and left can together win enough seats to deny the government party a clear majority.

The Left

21. Of all the political groups that are now surfacing in Thailand, none faces the upcoming elections more dispirited, fragmented, or with slighter hopes than the Thai left. Harassed by the government and associated in the public mind with foreign interests, there is good reason to question whether once-influential leftist figures and parties can pull themselves together in time to be a factor in the elections. A number of the more prominent leftists, including remarkably enough some who have spent long

[redacted]

NND 941536 ---/3

[redacted]

years in government prisons for alleged Communist activities, will join government forces in the near future. Other leftists, like Thep Chotinuchit, leader of the socialist United Front, are keeping the faith. Thep has been working with old-time politicians and socialists, particularly in the northeast, in an effort to get the Economist Party ready for the elections. By all accounts, he has had a hard time getting financial support, and organizational efforts on behalf of the party are making little progress. Other splinter parties with left-of-center political colorations may yet appear--one called the Democratic Front has already surfaced--but they probably will not have much following.

22. It is possible, however, that the left may do better in next year's elections than its current strength would suggest. Although more than a decade has elapsed since the last election, the left has consistently turned in a creditable performance in Thai elections in the past. In the February 1957 election, for example, leftist candidates took 21 seats out of 160 in the lower house, and did almost as well in another election later in the year. There is no indication that the leftists were much better organized then than they are now. Most of the leftist politicians come from the northeast, where regional identity is strongest in Thailand, and have managed through the years to identify themselves with the region's aspirations. Some of these politicians paid a high personal price during the 1950s for airing the northeast's grievances in Bangkok. It is entirely possible that they will reap their reward at the polls next year.

23. The position of former prime minister Pridi Phanomyong, last of the promoters of the 1932 coup, is one additional factor on the left that could conceivably have some bearing on next year's election. Despite the fact he has spent the past 20 years exiled in Communist China, Pridi is still a name that has to be reckoned with in Thailand. As the country's best-known leftist, and the founder of its leading university, Pridi has become something of a legendary figure among intellectual circles in the capital.

[redacted]

NND 941536 ---/30

[redacted]

The amount of pro-Pridi sentiment in the country as a whole is difficult to determine, but judging by the regime's refusal to permit him to return to Thailand, it may still be a political factor. The revival of political activity in the country may give fresh inspiration to Pridi's periodic thoughts of leaving China. If he gets out, even if only to Western Europe, the weight of his voice and activities on behalf of opposition elements may exert some influence on the way the voting goes.

Amorphous Center

24. It is still too early to determine how many political parties will field candidates in the upcoming election. The government's political party law prohibits independent candidates, however, and as a consequence there may be a proliferation of small parties with little ideological standing and few direct ties to the past between now and the elections. In addition, there may be a number of second-echelon politicians with past connections to pro-Phibun and pro-Sarit parties who, not finding a home in the government's party, strike out on their own in the hope they can make a better deal after the elections. The electoral fortunes of these elements will depend on the local appeal of their candidates. Despite an electoral law that minimizes the influences of local-based politicians, splinter parties will probably manage to elect a few lower house representatives.

25. One politician from this field who may cut a somewhat wider swath in the election is Liang Chaiyakarn. An indefatigable politician with a taste for power that has long since outdistanced any strong ideological conviction he may once have had, Liang has been associated, at one time or other, with virtually every major faction in Thai politics since the war. He has been busy over the past year rallying old cronies and establishing ties with other questionable elements, but it is still not certain that his Peoples Party will get off the ground, much less win extensive support in the elections. Although his name may not be a household word in Thailand, after 20 years at the same game Liang should be well

[redacted]

NND 941536 ---/30

[redacted]

enough known in the northeast to ensure that his Peoples Party, if it participates in the election, will send at least a token contingent to the National Assembly. What it will do once it gets there is even less clear, although cooperation with the government party seems to be a good bet, especially if the government's price is right.

The Issues

26. The way the Thai voter casts his ballot next year is likely to be determined more by the personalities of the candidates and the impact of local or regional interests than by anything else. If past elections are any guide, the influence of substantive issues will be all but lost as the voting moves from Bangkok into the villages. Thai political parties, even those of an egalitarian stripe interested in doing so, have never managed to generate issues or a sense of dissatisfaction with the status quo that could precipitate a voter rebellion in the countryside. There is no indication, at this stage of the game at least, that they will be more successful this time.

27. This estimate, however, is not as firmly based as it may appear. First, a number of important if not revolutionary changes in the countryside have taken place in the ten years since Thailand's last election. New roads have opened up isolated areas, new markets have been created, new crops have been introduced, and new patterns of living and perhaps wants have been created in the villages. Even though the impact of these changes on the substance of rural life should not be overstated, there is little doubt that some of the insularity of the average Thai villager has been worn away in the past ten years. Since Thailand's last election, for example, transistor radios, and with them contact with the outside world, have appeared in virtually every village in the country. No one can predict with any confidence what changes in political attitudes they may have brought.

28. It is reasonable to assume, however, that although personalities and local interests will

[redacted]

NND 941536 ---130

[redacted]

still be the most important factor in the voting, next year's election is likely to be more issue-oriented than any in the past. And the opposition, whether or not it is able to exploit them, has several reasonably good issues. By all odds, the most damaging to the government will be corruption. No one issue seems to evoke a more universal and deeply felt response among the Thai people than that of corrupt practices of Thai officials. Young or old, villager or urbanite, educated or illiterate, everybody is against corruption, and everybody thinks the government--from the wayward constable to the venal cabinet officer--is riddled with it. Even the Communists, who cannot seem to sell the Thai on anything else, strike a responsive chord when they rail against the corrupt practices of the "Bangkok clique."

29. [redacted]

30. A thin and often indistinguishable line separates criticism of the corrupt practice of government leaders from a more fundamental questioning of the way in which Thailand is ruled. Some potentially influential elements in the capital are beginning to ask whether the close relationship between government leaders and business interests is a good thing for the country. Foreign Minister Thanat, for example, was recently attacked in the Bangkok press for accepting a high-ranking (although probably honorific) position with an American commodity trading company, not because of any corrupt dealings the foreign minister may have had in mind, but because it was felt that such a position conflicted

[redacted]

NND 941536 ---/3 c

[redacted]

with his government responsibilities. Such a notion still seems foreign to the Thai style of governing, but it could become more important. There is suspicion in at least some circles that the nexus of governmental and entrepreneurial power has led to a situation in which government leaders are motivated less by their concern for the country than for their pocketbooks. Such sentiments have not been given clear voice yet, nor do they appear to have widespread currency in the country. They are potentially serious, however, for under the guise of anticorruption, they constitute nothing less than an attack against the establishment itself and the power system that has ruled Thailand since 1932.

31. There are also a number of domestic issues relating to the allocation of economic resources and the establishment of developmental priorities that may provide grist for the opposition's mill. Although Thailand has made considerable economic progress under the military regime, and its growth rate compares favorably with that of other nations, the fact remains that its per capita income is still extremely low. There are some people in Thailand, although they are few in number and exercise only marginal influence, who are asking whether the country's economic gains are being made in the right areas and are reaching the right people. Criticism has been voiced, for example, over a decline in the number of secondary school students, despite a burgeoning population, and what some regard as the regime's neglect of Thailand's school system. It seems likely that some of the opposition politicians will try to make profit in next year's election by suggesting that there is more to economic progress than a building boom in Bangkok.

32. In doing so, the opposition will almost certainly argue the economic issues along the long-standing battle lines separating Bangkok and the central plain from the other major regions. As a general rule, the farther one gets from Bangkok, the easier it becomes to translate differences in economic policies into regional quarrels. Although it is not possible to be confident about such things,

[redacted]

NND 941536 --- /30

[redacted]

regional differences and attitudes appear to have yielded only grudgingly, if at all, to the considerable changes that have taken place in the countryside since the last election.

33. In the south, for example, observers have noted that local politicians, businessmen, and teachers--precisely the kind of people who normally would back the establishment--are growing increasingly bitter over what they regard as Bangkok's indifference and neglect. A decline in the price of rubber--a mainstay of the south's economy--has not helped matters, nor has the example of Bangkok's relatively new-found interest in the northeast sat particularly well. Even in the northeast, where Bangkok has mounted its strongest developmental effort over the past five years, there is little reason for believing that the area's strong sense of regional identity will not be a large factor in the lower house elections.

Foreign Policy and the US

34. Despite the fact that Thailand is on the periphery of the Vietnam war, that its bases have been used for bombing attacks against North Vietnam, and that both Hanoi and Peking have backed an insurgent movement in the countryside to underline warnings about the consequences of maintaining close relations with the US, Bangkok's foreign policy will probably not come under close scrutiny during the election campaign. This stems from the fact that the major opposition groups are in general agreement with the direction of the regime's foreign policy, and more importantly, because they probably calculate that there is not much political mileage in the foreign policy issue. This does not mean, however, that the ruling group's relations with the US will fail to generate debate or interest in the upcoming elections.

35. Close to 50,000 US military personnel have been moved to bases in Thailand in the relatively short period of three years. The ease with which the deployment has been made is testimony to

[redacted]

NND 941536 ---/30

[redacted]

the forthrightness of the government, the affability of the Thai people, and the prudence of US officials. It should come as no surprise, however, that it has also led to a growing uneasiness over what the Thai regard as the unfortunate by-products of the American presence. The sense of cultural shock, especially strong for a people who take pride in their independence and who simply have not come into contact with large numbers of Westerners before, has been felt throughout the society, including the ruling group itself. The publication of a bitter anti-US diatribe in one of Bangkok's most respected newspapers, the tongue-lashing US officials recently received from young Thai newspapermen, and exaggerated stories of the depradations of US soldiers, all point to a nascent anti-American sentiment in the country. Although difficult to gauge, such sentiment does not appear to be sufficiently strong or widespread to have a major impact in the elections, but it is likely that even conservative opposition groups, like the Democrats, will argue that the ruling establishment has gone too far in accommodating the US and has not been sufficiently solicitous of Thai interests.

36. For its part, the government has demonstrated some sensitivity to the possibility that it may be in trouble with the voters on various substantive issues. The leadership has taken a number of steps over the past six months that are clearly designed to improve its standing in the country and to deflate, even before they get pumped up, the arguments of the antiregime forces. An effort has been made to meet a mild but growing inflationary situation in the capital by breaking a pork monopoly [redacted] and keeping the price of rice down. An unpopular increase in bus fares was rescinded, and an effort is apparently under way to take some of the sting out of anti-American sentiment by suggesting that at least some government leaders feel the same way. [redacted]

[redacted]

NND 941536

[redacted]

[redacted] How effective these eleventh-hour moves will prove to be is hard to tell, but if, as seems likely, personalities and local affairs still rule the political game, they may be enough to ensure that there are no major surprises after the votes are counted.

Prospects

37. There is good reason to question whether the government will come out of next year's elections with a clear-cut majority in the lower house. Certainly the record of legislative elections in past years, and the slow progress the government has made organizing for the upcoming one, suggest that the military group may have to settle for something less. The failure to win a majority of the 219 lower house seats will make the government's job somewhat more difficult, but with all of the considerable assets of both friendly and unfriendly persuasion at their disposal, the military leaders should have little trouble patching together a working parliamentary majority from among fragmented and, in all likelihood, opportunistic opposition elements.

38. Even if such an arrangement is not forthcoming or there is some major surprise in the election results, it is not likely that the lower house will prove overly obstreperous. Whatever their other traits, the opposition politicians currently on the scene are neither idealistic enough to push for fundamental changes in the way the country is ruled, nor foolish enough to think that they could possible succeed.

39. Although they may not enjoy quite as much freedom of choice as they once did, the present leaders will continue to rule Thailand after the elections and, at least for the short term, in pretty much the same way. The new constitution and the elections, then, are not likely to bring any important changes in Thai domestic or foreign policies in the near future. The larger question, which cannot

[redacted]

NND 941536 ---/3/0

[redacted]

yet be answered, is whether the new constitutional arrangement proves to be a first step toward fundamental change in the power system that has been in force since 1932, or only more of the same. Only time will tell.

25 October 1968

MEMORANDUM FOR: The Honorable Walt W. Rostow
Special Assistant to the President

The Honorable Dean Rusk
Secretary of State

SUBJECT: Results of Nguyen Phong Thiep's 21 October 1968 Visit to Saigon

1. [redacted] 1.3(a)(4)

2. [redacted] Nguyen Phong Thiep, member of the South Vietnamese observer delegation to the Paris talks, [redacted] returned to Paris on 22 October 1968 from a one day visit to Saigon, South Vietnamese Foreign Minister Nguyen Chanh Thanh instructed Phong to tell South Vietnamese Consul General and observer delegation chief Phan Dang Lam that, until the commencement of second stage talks, substantive discussions between the Americans and the South Vietnamese would take place solely in Saigon and Lam thus bore no responsibilities in this area. This was in response to Lam's complaint that he was not being kept fully informed about talks in Saigon. [redacted] Thanh promised to keep Lam better informed, and this has been borne out by an increase in reporting from Saigon to Paris. [redacted] 1.3(a)(4) 1.3(a)(

3. On the composition of the South Vietnamese delegation, Thanh told Thiep that Pham Van Thinh, South Vietnamese Ambassador in Bern, and Le Van Li, Vietnamese delegate to the United Nations Organizations in Geneva, were being added to the South Vietnamese

APPROVED FOR RELEASE
JAN 1995

[redacted] 1.3(a)(

[redacted]

[redacted]

1.3(a)(4)

delegation and would be arriving soon in Paris. Vu Vuong Bac, prominent Saigon lawyer, probably will not join the delegation because of the press of personal business in Saigon. Nguyen Ngoc Linh, Director of Vietnam Presse, has insisted that he be given the personal rank of Ambassador as a precondition for his joining the delegation as spokesman. [redacted] Linh 1.3(a)(4) bases this demand on his belief that Mr. William Jorden, U. S. Mission spokesman, has the same rank. Thanh told Thiep that he doubted that he could agree to this condition. For the job of military delegate, Thanh said that former IV Corps Commander and Revolutionary Development Chief General Nguyen Duc Thang was being actively considered but that no decision has been made.

4. During his visit to Saigon, Thiep had a private talk with 1.3(a)(4) President Nguyen Van Thieu. [redacted] Thieu said that there was no fundamental disagreement between himself and the Americans on the question of ultimately permitting the National Liberation Front to participate in the political life of South Vietnam by standing for public office in free elections. The main difference was rather the point of permitting the Liberation Front to take part in the negotiations without first having established their right to do so in this way. President Thieu said that he was afraid that chaos would result in Saigon if the Liberation Front joined the negotiations as a separate entity. He said that he expected trouble from the military, the Catholics and the militant Buddhists. Among the military, he believed the main trouble would come from company grade officers and lower ranks since the general officers were fairly well under control and the field grade officers could understand why it might be necessary to make concessions to the Liberation Front. He said that he was less confident of the ability of the Catholic hierarchy to control the Catholics, particularly if the militant Buddhists began causing trouble.

26 October 1968

MEMORANDUM FOR: The Honorable Walt W. Rostow
Special Assistant to the President

The Honorable Dean Rusk
Secretary of State

SUBJECT: President Thieu's Views Regarding the Issues Involved in Agreeing to a Bombing Halt

EO 12958 3.4(b)(1)>25Yrs
(C)

1. [redacted]

EO 12958
3.4(b)(1)>25Yrs
(C)

2. [redacted] President Nguyen Van Thieu conducted business very much as usual although his main concern during the period centered around the current talks relating to a bombing halt. He discussed the situation with almost everyone who visited his office including senior Cabinet officials, aides and secretaries, and religious and political personnages. Thieu's comments to his visitors indicate two main concerns about the discussions underway. The first concern involves the status of the NLF at the negotiating table following a halt in the bombing. The second point entails Thieu's strong conviction that DRV concessions in return for a bombing halt must be spelled out and guaranteed. On both points the President is adamant and his position remains consistent throughout the reporting period.

3. The President insists he will be intransigeant against separate NLF participation in negotiations. Thieu stated that he will never negotiate with the NLF as an equal. He has no objection to their inclusion in the North Vietnamese Delegation but he will not agree to their sitting at the conference table as a separate entity. NVN and SVN have recognized governments, Thieu noted, but this is not true of the NLF, which is only a tool of Hanoi. Thieu asked, "In whose Army do the Generals of the other side hold rank?"

4. Inherent in his concern about the status of participating delegations is Thieu's obvious desire to avoid appearing to be a "U. S. lackey". At one point the President stated that Hanoi wants to meet with the U. S., the GVN and the NLF. Thieu exclaimed that this would make the GVN appear to be a U. S. front. Unless the NLF is denied equal status with the GVN, he disagrees with the American argument that Hanoi's willingness to include the GVN in the Paris talks represents a victory. Negotiating with the NLF also raises the question of honor and he has stated: there is no honor in talking to thieves, let alone the servants of thieves.

5. Thieu stated that South Vietnam could be represented at Paris either separately or jointly with the U. S. However, the question of makeup and seating of all delegations should be clearly defined ahead of time so that no confusion exists about these points.

E0 12958
3.4(b)(1)>25Yrs
(C)

6. As regards a bombing halt and POW exchanges, Thieu told his Foreign Minister on [redacted] that on these issues, which are the only ones which concern the U. S., he feels the U. S. can play the leading role. Thieu noted, however, his fear that the U. S. might disassociate the bombing issue from the issue of GVN participation. The President reiterated his belief that what constitutes reciprocity should be agreed to and clearly spelled out prior to a bombing halt.

7. Thieu also sees a definite connection between the moves now underway and President Johnson's wish to see Vice President Humphrey elected. Thieu referred many times to the U. S. elections and suggested to his visitors that the current talks are designed to aid Humphrey's candidacy. Thieu has said that Johnson and Humphrey will be replaced and then Nixon could change the U. S. position.

27 October 1968

MEMORANDUM FOR: The Honorable Walt W. Rostow
Special Assistant to the President

SUBJECT : Response from Ambassador Bunker and the CIA Saigon Station to Your Query of 26 October 1968.

The following are the views of Ambassador Bunker and the CIA Saigon Station in response to Mr. Rostow's query concerning the effectiveness of having the Vatican reassure the Catholics in South Vietnam.

1. The Catholics here are essentially divided into three groups: (A) moderates responsive to Archbishop Binh; (B) leftists who, in the event, would probably give less trouble than the others; and (C) the radically nationalist northern Catholics who are not particularly responsive to guidance from the Archbishop nor, as far as we can tell, in close contact with the Apostolic Delegate here.

2. Certainly advice from the Vatican would be helpful with (A); it would be irrevelant with (B); and it might just possibly have a good effect, though only a limited one, with the critical group (C). Accordingly, my judgement is that there is probably no harm, and possibly some good, in trying to get the Vatican to spread the word among Catholic leaders here. The only possible risk is that some northern Catholics might resent what they could consider as "interference" by the Vatican in a non-religious matter.

3. The word could be, of course, not only that they should not fear the entrance of the NLF into the negotiations and that the U.S. is not abandoning them, but also that the U.S. has no intention of recognizing the NLF so that its participation in negotiations would not be as a "separate entity", as is feared here, even though the NLF would hold itself out to be a separate entity.

MEMORANDUM FOR: The Honorable Walt W. Rostow
Special Assistant to the President

The Honorable Dean Rusk
Secretary of State

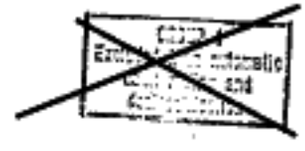
SUBJECT: Presidential Views Concerning the Bombing Halt and the Paris Talks

EO 12958 3.4(b)(1)>25Yrs
(C)

1. [redacted]

2. Between 23 and 25 October 1968, President Nguyen Van Thieu continued to hold discussions with a number of government officials concerning a bombing halt and the Paris talks. Among others, Thieu spoke with Vice President Nguyen Cao Ky, the Prime Minister, Thieu's Special Assistant Nguyen Phu Duc, the Interior and Foreign Ministers, possibly Ambassador Bui Diem, and the Chairmen of the Upper and Lower Houses.

3. While speaking with the Legislative Chairmen, the President said he had told the Americans that he had instructed several people to contact Hanoi to determine if Hanoi felt the time was propitious to engage in talks. If the DRV does not feel the time right, the Americans had been informed that the Paris talks as well as the fighting in Vietnam would continue as is. However, if Hanoi judges the occasion right, Hanoi must then talk directly to Saigon to resolve the issues. It is imperative though, that Hanoi be serious about wanting to engage in talks. Thieu added parenthetically that if Hanoi would not agree to talks with the GVN Ambassador, Thieu would be willing to dispatch a GVN Cabinet Minister to handle the discussions. If the DRV is serious, the two sides could sit down and discuss the future of Vietnam, the question of peace, or any and all issues that either side cared to bring up.



~~SECRET/CONSULTIVE~~

4. The President continued, then if Hanoi "tells me to recognize the NLF, I would be willing to make that sacrifice. However, if Hanoi demands a coalition government, I would say that is unacceptable. If Hanoi asks to return to nationalist activities, I would say OK."

5. Thieu said that he was willing to see the talks drag on for months or even a year, as long as NVN was serious about the talks. They should not be used for bickering or propaganda purposes, Thieu explained, and once the talks commence, the North Vietnamese "will realize that I am serious". Thieu reiterated that it did not matter if the NLF was included in the NVN delegation. However, he would never let NVN tell the GVN to talk with the NLF.

6. Thieu was obviously concerned that NVN was guaranteeing nothing in return for a bombing halt. He stated he had told the Americans that reciprocity was the most important issue. In Thieu's opinion, the best reciprocal act would be for Hanoi to begin talks with the GVN, rather than a military de-escalation or troop withdrawal from the DMZ.

7. He was also concerned that the U.S. Government wished to do something "dramatic" in order to help Humphrey on 5 November. The inclusion of the NLF at Paris would aid Humphrey, said Thieu, but the benefits are short-range. Thieu told Vice President Ky on 25 October that he was afraid the U.S. would force the GVN to deal with the NLF. He observed, however, that the U.S. was caught between the DRV and the GVN positions on the status of the NLF at a conference.

8. Ky said he felt Thieu should propose that a three-way conference be convened including the GVN, U.S. and DRV. Thieu responded that the Americans had told him that Hanoi may refer to a three-way conference between the DRV, the U.S. and the NLF. Thieu felt, however, that if the DRV would not accept the inclusion of the NLF within the DRV delegation, then Hanoi was not yet ready to engage in serious talks.

9. The President also mentioned that he was having difficulty with the Americans in that they were urging him not to speak to the press or make public statements to avoid leaks on the US/GVN talks. Thieu noted that he was trying to convey the impression that he was a man of peace who would die, not for the world, but for the people of SVN.

SPECIAL

NATIONAL INTELLIGENCE ESTIMATE

NUMBER 58-1-68

Communist Capabilities and Intentions in Laos Over the Next Year

Submitted by

Richard Helms

DIRECTOR OF CENTRAL INTELLIGENCE

Concurred in by the

UNITED STATES INTELLIGENCE BOARD

As indicated overleaf

31 October 1968

APPROVED FOR RELEASE
DATE: JAN 2001

Authenticated:

James S. Lay, Jr.

EXECUTIVE SECRETARY, USIB

The following intelligence organizations participated in the preparation of this estimate:

The Central Intelligence Agency and the intelligence organizations of the Departments of State and Defense, and the NSA.

Concurring:

Vice Adm. Rufus Taylor, the Deputy Director, Central Intelligence

Mr. Thomas L. Hughes, the Director of Intelligence and Research, Department of State

Lt. Gen. Joseph F. Carroll, the Director, Defense Intelligence Agency

Lt. Gen. Marshall S. Carter, the Director, National Security Agency

Abstaining:

Dr. Charles H. Reichardt, for the Assistant General Manager, Atomic Energy Commission and Mr. William O. Cregar, for the Assistant Director, Federal Bureau of Investigation, the subject being outside of their jurisdiction.

WARNING

This material contains information affecting the National Defense of the United States within the meaning of the espionage laws, Title 18, USC, Secs. 793 and 794, the transmission or revelation of which in any manner to an unauthorized person is prohibited.

GROUP 1
Excluded from automatic downgrading and declassification

COMMUNIST CAPABILITIES AND INTENTIONS IN LAOS OVER THE NEXT YEAR

CONCLUSIONS

A. Over the past year the Communists have greatly strengthened their combat forces in Laos. The combined Pathet Lao (PL)/North Vietnamese Army (NVA) forces now number about 56,000 combat troops; they could overwhelm the regular and guerrilla forces of the Royal Laotian Government (RLG) in the coming dry season. And we do not think that the RLG could expand the size or capability of its forces sufficiently in 6 or 12 months from domestic sources alone to contain the Communists.

B. We do not believe that the Communists intend to conduct a major drive to the Mekong, lest such a move provoke US entry into the Laotian corridor and perhaps upset any negotiations underway on South Vietnam. However, in the next few months, we expect the Communists to exert further military pressure on government forces, especially on guerrilla outposts, in order to strengthen their ultimate bargaining position. They now demand that US bombing of Laos be halted as a prerequisite to discussions of an internal settlement that must be based on "the realities of the current situation."

C. Even if NVA resources were released from South Vietnam, we doubt that this would in itself alter Hanoi's intentions in Laos, since the forces already there can launch an offensive without further reinforcement. Though developments in Vietnam could change Hanoi's calculations concerning Laos, in general we believe that the Communists hope to achieve their objectives without running great risks of military counteraction.

DISCUSSION

1. Hanoi has ambitions to control all of Laos, but has been unwilling to take actions there which would jeopardize higher priority goals in South Vietnam. In particular, Hanoi has limited the scope of its military actions in Laos, in part, at least, out of concern for provoking a large-scale US ground action against the vital supply routes to South Vietnam which run through Laotian territory.

2. Since the 1962 Geneva settlement, the war in Laos has been characterized by Royal Lao Government (RLG) offensives during the rainy season (May to October) when the mobility of Pathet Lao (PL) and North Vietnamese Army (NVA) forces is restricted, and by Communist counteroffensives during the dry season (November to April) to retake lost areas, often just in time to seize the rice harvest. Thus an uneasy equilibrium has been established, with military factors operating on the RLG and political factors on the Communists to restrain actions that might provoke a major reaction by the other side.

3. In the political field, both sides have continued to pay lip service to the 1962 Geneva Accords, which neutralized Laos, and until recently to the Zurich and Plaine des Jarres Agreements, which established a tripartite government—rightists, neutralists, and the PL. This arrangement has persisted despite the fact that the PL vacated their cabinet seats in April 1963. These are still kept open for them by Souvanna, the neutralist Prime Minister. Until this July it seemed as though the PL objective, despite their denunciations of Souvanna, was the restoration of the tripartite arrangements.

I. RECENT DEVELOPMENTS

4. Several recent events, however, suggest that the Communists are developing a new position. For the first time, they have made a bombing halt a specific prerequisite to discussions of an internal political settlement. Moreover, while still reaffirming the 1962 international agreements, they have demanded that the internal settlement must take into account "the realities of the current situation."

5. In private, PL and Soviet spokesmen have explained that such "realities" mean a recognition of PL control over large areas of Laos (they claim two-thirds of the territory and one-half the population). In addition, they contend that the US and its "puppets" have destroyed the tripartite structure, that Souvanna no longer represents a neutralist faction, and that the present government is, in effect, illegal. Apparently, the PL are laying the ground work to claim a larger role in a new government, and may demand that the neutralists aligned with them in the so-called "National United Bloc" occupy the positions now held by Souvanna's neutralist faction.

6. While thus signaling their intention to reorder the old tripartite arrangement, the Communists have reaffirmed their regard for the monarchy as a "permanent feature" of Lao national life. Indeed, the whole point of the rather odd visit of the North Vietnamese Ambassador in July after a four year absence seemed to be to make a dramatic distinction between the King and the present Lao government, and this line has been supported by the new Soviet Ambassador and the Neo Lao Hak Xat (NLHX) spokesman in Vientiane. The Communists have always paid deference to the King's position and may hope that the King's desire to preserve the kingdom and establish a united national community can be played upon to their advantage.

7. The Communists are taking other steps to improve their political position. During the past rainy season, they have made more of an effort than ever before to consolidate control over their territory. After unsuccessful attempts to terrorize mountain people who have been assisting RLG guerrillas in the north, the Communists are seeking to win them over by cajolery. This is apparently part of a wider effort to improve their hold over the mountainous and sparsely populated reaches of Phong Saly, Luang Prabang, and Houa Phan (Sam Neua) Provinces, where they have been stepping up their propaganda and political indoctrination programs. Newly constructed roads give the Communists access to hitherto isolated areas. In the south, PL troops have been busy trying to consolidate their hold over the rice-rich Sedone Valley, where the government carried on a development program from 1965 until July 1967. There are recent reports that the PL civil administration is being reinforced by Lao political cadre who have just completed political training in North Vietnam. One report indicates that in Savannakhet Province North Vietnamese political cadre have been attached to the Communist administration for the first time.

8. By the fall of 1967, the RLG had made considerable inroads on territory that the Communists held in 1962.[1] The Communists finally responded by turning an RLG offensive in the Nam Bac area into a debacle for the government in mid-January 1968. During the remainder of the dry season, the Communists administered a series of defeats to the RLG which added up to the worst government setback since the precarious days of 1961 and 1962. The psychological impact was considerable. There was a good deal of apprehension in Vientiane that the Communists would break out from the previous pattern of military action and push on to the Mekong.

9. But this did not happen, and perhaps the most notable feature of the rainy season now drawing to a close was the lack of significant new moves by either side. The Communists did not press their advantage, but devoted themselves to a more intensive political consolidation of their territory than heretofore. RLG forces, who for their part, usually regain considerable terrain in the rainy season, had only some limited successes in the northeast and in the

[1] See centerspread maps.

area around Muong Phalane. RLG progress has been nil in the Sedone Valley in the south, in Borikhane Province, and in other potentially significant regions.

10. These developments in the military and political fields seem to form part of a pattern related in large part to Communist strategy in South Vietnam. In anticipating that 1968 would be a "decisive" phase in Vietnam, Hanoi moved to increase its logistic capabilities in Laos, strengthen its forces there, recover lost ground, and set back and demoralize RLG forces. And in their recent statements they have set the stage for demanding a new settlement on more favorable terms should the situation in South Vietnam move into serious negotiations. In short, the Communists have developed a stronger military position while at the same time they are preparing, if the situation in Vietnam warrants, to move into a more active political phase in Laos.

II. CAPABILITIES

11. Our estimate of current PL/NVA strength in Laos is about 98,000 (51,000 PL and 47,000 NVA), compared to about 72,000 a year ago. The most important increments have been in combat troops, where PL strength has grown from 28,000 to 31,000 and NVA strength from 16,000 to 25,000. To oppose these Communist forces the RLG has a total of some 100,000 men. These include approximately 29,000 combat troops of the regular army (FAR), about 5,000 combat troops of the neutralist forces, and some 39,000 guerrillas, about 22,000 [2] of whom are Meo tribesmen commanded by General Vang Pao in the northeast.[3]

12. PL and FAR troops are probably about evenly matched in terms of the general effectiveness of individual troops or battalions, and man for man the Meo guerrillas are probably better fighters than either. The NVA forces, however, are definitely better than the FAR, and the psychological impact on the latter when attacked by the NVA is often sufficient to precipitate their defeat. This qualitative inferiority is somewhat compensated for, however, by air support provided by Royal Lao Air Force T-28s, additional T-28s operating out of Udorn in Thailand with Thai pilots, and USAF aircraft operating out of Thailand. In good weather, the Lao fly about 100 tactical sorties per week, the Thai pilots about 70, and the USAF some 100-200. Such success as the RLG has enjoyed since 1962 is due largely to the combination of this air support with effective use of friendly guerrilla forces.

13. For several years, Souvanna and other RLG leaders, including the military, have felt that if it were not for the presence of NVA troops, RLG forces could probably quickly dispose of the PL threat. In our view, this is probably too optimistic. Although in terms of present strengths on both sides, Royal

[2] This figure is for background use only and is not to be used or republished in any other publication by holders of this estimate.

[3] See Annex for a detailed breakdown of order of battle for both Communist and RLG forces.

Lao combat forces would then outnumber those of the Pathet Lao by more than two to one, we do not believe that this numerical advantage would be decisive, in view of the many weaknesses and divisions that will continue to limit FAR effectiveness whatever enemy it confronts. We do believe that the PL need a considerable amount of NVA support to mount a major attack, and that without it, the RLG could almost certainly contain them. We also believe that in northern Laos the Meo guerrillas could put considerable pressure on the PL. But RLG forces could probably not reduce PL forces and territory very rapidly—if at all—without substantial outside logistical and air support.

14. We continue to estimate, however—as we did in March 1968[4]—that the combined PL/NVA forces now in Laos have the military capability to reduce the RLG area of control to a few enclaves in fairly short order. They could do so without diverting resources from South Vietnam or drawing significant reinforcements from the North. And we do not think that RLG forces could expand their size or capability sufficiently in 6 or 12 months from domestic sources alone to contain the Communists.

III. COMMUNIST INTENTIONS

15. There are several options open to the Communists over the next six months or so. There are various indications of preparations to resume military activity as the dry season commences, and it is possible that the Communists have decided to exercise their military superiority and quickly overrun most of Laos. They might think this would be an effective means of putting the US under new pressures to reach a general settlement in Indochina. We believe this is unlikely. The Communists would necessarily feel considerable uncertainty over US countermoves in the Laotian corridor, especially at a time of changeover in American administrations. And, as long as the outcome in Vietnam is in doubt and under some sort of negotiation, we believe that Hanoi would not run needless military risks in Laos before the chances of a new political settlement there had been tested.

16. We do expect, however, that Communist forces will keep up substantial military pressure on RLG forces in the coming dry season. In the northeast, where General Vang Pao's Meo guerrillas have long been a thorn in their side, particularly in Houa Phan and Xieng Khouang Provinces, they will probably make a considerable effort to reduce a number of guerrilla sites and consolidate their claims. They will probably also try to clear the guerrilla outposts along the border of northeastern Khammouane Province with North Vietnam, as well as in the northwest Provinces of Houa Khong and Luang Prabang. In the south, they will maintain the threat to the Mekong from Thakhek to Champassak Province. They will attempt to disrupt US-sponsored aid and development programs. And, of course, they will protect their vital infiltration and supply routes to South Vietnam in the Laotian corridor.

[4] See SNIE 58-68, "Communist Intentions in Laos," dated 21 March 1968, SECRET.

17. We anticipate more direct political pressures on Vientiane and the King, which these military moves will serve to reinforce. At some point, depending again on developments in South Vietnam, the Communists might offer to open negotiations, providing the bombing in Laos ended. In any case, Hanoi would believe its military pressures would improve the chances for eventual negotiations on better terms.

18. Obviously, a major change in the situation in Vietnam could affect Hanoi's calculations. But we do not believe that the release of NVA assets from South Vietnam would, in and of itself, be a decisive factor in changing Hanoi's policy in Laos. In the event of a Vietnam settlement favorable to them, the North Vietnamese would anticipate that political pressures would cause Laos to fall into their hands fairly soon. They would therefore see no need for ambitious moves in Laos that might risk upsetting any agreements reached on South Vietnam, particularly respecting US military withdrawals. Should the settlement be unfavorable to the Communists, we believe that military caution in Laos would appear even more desirable to them.

19. Eventually, if the Communists cannot achieve what they want in Laos through a combination of pressures, they may resort to a vigorous military campaign. But for now, they appear to be moving slowly, calculating that the outcome in Vietnam will be such that a new settlement in Laos can be reached which would provide them an improved power position, from which they could ultimately take control.

MILITARY CAPABILITIES

1. Order of battle information on the Communist forces in Laos is derived from a number of sources. The most important are informants contacted by clandestine friendly guerrillas and by road-watch teams. Other useful information is obtained from prisoners and ralliers, from civilian refugees—particularly low-level administrative functionaries—and from special sources. The estimates of enemy strength are best in those provinces where friendly guerrillas and other assets are most active: Houa Khong, Luang Prabang, Xieng Khouang, Khammouane, Savannakhet, Saravane, Attopeu, and Sedone. It is least reliable along most of the South Vietnamese border, in northern Phong Saly, southern Sayaboury, and northeast Houa Phan (Sam Neua) Provinces. In the other provinces, where we rely largely on the Laotian Army reporting, the quality varies—it is reasonably good for Vientiane and Borikhane, but poor for Champassak, Sithandone, and Wapikhamthong. Estimating the number of North Vietnamese Army (NVA) and Pathet Lao (PL) troops is also complicated by the mixture of NVA and PL personnel within many individual battalions.

2. On the whole, we think the estimates are reasonably accurate and support our conclusion that Communist strength in Laos is greater than at any time in the past. Strengths fluctuate somewhat between the dry and rainy seasons, however, as the NVA tend to put combat troops in for the dry season campaign—particularly elements of the 316th NVA Division—and then withdraw them during the rainy season. NVA combat troops outnumber the PL troops in the southern provinces of Saravane, Attopeu, and Sedone, where, as might be expected, the defense of their supply and infiltration corridor to South Vietnam is most critical. There are about an equal number of NVA and PL troops in Houa Phan (Sam Neua) Province. In the remaining provinces, the PL outnumber the NVA substantially, and there are no known NVA battalions at all in four provinces: Sayaboury, Vientiane, Champassak, and Wapikhamthong. The dissident neutralist troops are all in Xieng Khouang and Phong Saly Provinces.

SECRET

Differences between this map and the corresponding one showing Communist controlled areas in SNIE 58-68 COMMUNIST INTENTIONS IN LAOS (21 March 1968) reflect some changes in the situation since that time. In large part, however, they represent a more detailed and accurate presentation of the military situation than previous maps have attempted. For this map we have used the following definitions:

Communist Controlled Areas: The Communists have military and/or administrative presence and the RLG has little or no presence. Although RLG patrols or teams may occasionally move through or conduct clandestine operations in the area, armed clashes are infrequent. (Similar criteria are applied for RLG controlled areas shown in white.)

Contested Areas: Those in which neither side has sufficient military and/or administrative presence to exclude the other. This includes areas where both sides are present in strength and clash frequently, where patrols of either side may be ambushed and civilians taxed by both sides, as well as other areas where both sides show few forces and do not make much effort to exclude the other.

Intelligence Memorandum

Sources of Military Equipment to Viet Cong and North Vietnamese Military Forces

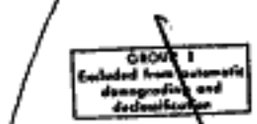
~~Secret~~

ER IM 68-141
November 1968

Copy No 159

WARNING

This document contains information affecting the national defense of the United States, within the meaning of Title 18, sections 793 and 794, of the US Code, as amended. Its transmission or revelation of its contents to or receipt by an unauthorized person is prohibited by law.



Foreword

This memorandum is primarily a listing of Communist weapons and combat equipment known to be in use by North Vietnamese units in North Vietnam and by North Vietnamese and Viet Cong military units in South Vietnam. Some military-related equipment such as motor vehicles and medical supplies has not been included. The country of origin of each item is reported insofar as intelligence will allow a determination to be made. Since the USSR supplies most of the military equipment used by Eastern European countries, some combat materiel attributed to the USSR may be of Soviet manufacture but may actually have been supplied by Eastern Europe. No attempt is made in this memorandum to quantify the weapons and equipment being supplied to the Communist forces. For the most part, data on weapons used in South Vietnam come from analysis of captured weapons; data on weapons used in North Vietnam that have not yet appeared in the South are derived from photography, limited actual observations, and other sources. Data are current through September 1968.

CENTRAL INTELLIGENCE AGENCY
Directorate of Intelligence
4 November 1968

INTELLIGENCE MEMORANDUM

Sources of Military Equipment to Viet Cong and North Vietnamese Military Forces

Summary

Most of the military equipment and ammunition now being used for the defense of North Vietnam and for the Communist war effort in South Vietnam has been supplied by other Communist countries in recent years. Until mid-1965 the Communist forces fighting in South Vietnam were equipped for the most part with old Free World weapons from the French-Indochina War and captured US materiel. Only limited amounts of Soviet and Chinese weapons were in use at that time. Military production in North Vietnam is limited to small amounts of infantry weapons, mortars, and grenades, some of which have been observed in South Vietnam. North Vietnam serves primarily as the funnel for the infiltration into South Vietnam of military supplies from other countries.

Communist China and the USSR have been the major donors of military equipment to North Vietnam and to Communist forces in the South, but some infantry weapons, mortars, rockets, and light artillery have come from North Korea and the Eastern European countries. Most of the more complex materiel for the defense of North Vietnam has come from the USSR, including heavier field and antiaircraft artillery, the SA-2 missile system, more advanced radar and aircraft, and

Note: This memorandum was produced solely by CIA. It was prepared by the Office of Economic Research and has been coordinated with the Office of Strategic Research, the Office of Current Intelligence, and the Director's Special Assistant for Vietnamese Affairs.

various types of armored vehicles.* China has supplied most of the infantry weapons, mortars, and rockets used in South Vietnam. Antiaircraft artillery up to 57-mm, ammunition for howitzers and field guns up to 130-mm, and PT-76 amphibious light tanks have also been captured in the South. Most of this equipment has been supplied by the USSR, although a few smaller antiaircraft and field guns from Communist China and Poland have been observed. Infantry weapons from North Korea, East Germany, Bulgaria, Czechoslovakia, and Rumania have also been observed in South Vietnam.

The weapons now being used by Communist forces in North and South Vietnam include equipment still used extensively by Soviet, Eastern European, and Chinese armed forces. Most of the weapons observed in the South since 1965 were manufactured since the Korean War,

Some observed equipment has reached South Vietnam six months after leaving the factory.

---

* *For a listing of Communist military equipment in North and South Vietnam, by country of origin, see the Appendix.*

Introduction

1. Since mid-1965, Communist military forces in North and South Vietnam have been equipped increasingly with a modern family of weapons supplied by other Communist countries. Before 1965, weapons of Free World origin accounted for almost 60 percent of those captured in South Vietnam. Most of these were older French models, holdovers from the French-Indochina War, as well as captured US equipment. North Vietnam's inventory of military equipment before 1965 consisted largely of older infantry equipment left by the French and some ground equipment, propeller aircraft, and naval craft supplied by Communist countries during the years 1954-64.

2. With the initiation of the Rolling Thunder program in 1965 and Hanoi's increasing direct involvement in the war in the South, both North Vietnamese and Viet Cong regular forces have been equipped with modern weapons, including types that are standard equipment within the Communist donor countries. North Vietnam's defenses have been greatly expanded and strengthened by the introduction of MIG-15/17 and supersonic MIG-21 jet fighters and the SA-2 missile system as well as by the addition of light and medium antiaircraft artillery and radar. The USSR has been the major contributor to the buildup of North Vietnam's air defense. Communist China has upgraded North Vietnam's naval capability and has provided most of the infantry weapons used by North Vietnamese and Viet Cong forces. The European Communist countries are not known to have supplied appreciable quantities of weapons to North Vietnam or to the Communist forces in the South. However, the fact that the armed forces of these countries are equipped with large amounts of materiel manufactured in the USSR makes it probable that some of the captured equipment nominally of Soviet origin actually may have been provided by the European Communist countries.

Ground Equipment

Infantry Weapons

3. North Vietnam has had to rely on outside assistance for the vast amount of infantry weapons

and ammunition required for its forces in North Vietnam and for the reequipping of the Viet Cong and North Vietnamese forces fighting in South Vietnam. Only a few light infantry weapons, grenades, and ammunition are manufactured in North Vietnam. Communist China has been the major source of infantry weapons, and smaller amounts are supplied by the USSR, the Eastern European Communist countries,* and North Korea (see Table 1). Most of the combat materiel furnished Communist forces in South Vietnam is infiltrated from North Vietnam through Laos, although small amounts probably are infiltrated through Cambodia.

4. Communist regular forces in North and South Vietnam are now equipped primarily with modern infantry weapons. Almost all of the weapons observed in South Vietnam since 1965 that originated in Communist countries have been of post-Korean War vintage.**

some being captured as soon as six to nine months after leaving the factory. A few Soviet sniper rifles and carbines and the Chinese 57-mm recoilless rifle were manufactured prior to 1950. Although the USSR and the Eastern European Communist countries have supplied weapons manufactured primarily in the late 1950's, most of these are still used extensively in their own armies. Soviet infantry weapons of recent manufacture (1960 or later) include the 82-mm recoilless gun, the 40-mm antitank grenade launcher, and the 122-mm rocket launcher. Eastern European infantry weapons include the 7.62-mm assault rifle, the 40-mm antitank grenade launcher, and the 82-mm recoilless gun.

Mortars and Rockets

5. The USSR and China continue to be the main suppliers of mortars and rockets for the Communist

---

* *Eastern European Communist countries supplying weapons have included East Germany, Poland, Czechoslovakia, Rumania, and Bulgaria. Although no weapons of Hungarian manufacture have been observed, reports indicate that Hungary has supplied small amounts of infantry combat materiel.*

** *Observed enemy weapons are those that have been photographed. This is a small but representative sample.*

forces in North and South Vietnam. The Chinese have provided 60-mm, 82-mm, and 120-mm mortars and several types of rockets. The USSR has sent 82-mm mortars and 140-mm rockets as well as ammunition for 60-mm and 120-mm mortars. Some 120-mm mortar ammunition produced in North Korea was captured in South Vietnam in late 1967. In addition to a large number of single-tube rocket launchers, Communist offensive capability in South Vietnam has been strengthened recently by the addition of a Chinese 107-mm multiple rocket launcher, first observed in mid-September 1968. These weapons give enemy forces an increased capability for inflicting damage to Allied supply bases and airfields and represent an awesome threat if used for indiscriminate firings on urban areas.

Field and Antiaircraft Artillery

6. The USSR has supplied most of the larger field and antiaircraft artillery pieces. Light artillery weapons of Chinese origin have also been observed, and reports indicate that Czechoslovakia, Poland, and Hungary have contributed some antiaircraft artillery (see Table 2). Both the Soviets and Chinese have given field artillery still regarded as standard in Communist armies, including the 122-mm and 152-mm howitzer. The 85-mm field gun and ammunition for the 122-mm corps gun have been observed in South Vietnam. In addition, ammunition for the Soviet 130-mm field gun, the largest caliber field gun normally used by Soviet and Eastern European armed forces, has recently been captured.

7. Antiaircraft artillery in North Vietnam includes 85-mm and 100-mm guns supplied by the USSR and possibly by China as well as Soviet and Chinese 37-mm and 57-mm, Soviet 23-mm, and Czech 30-mm weapons. The 57-mm antiaircraft weapon is the standard light automatic antiaircraft weapon used by Warsaw Pact forces,* while the 23-mm is the newest addition to the Soviet arsenal of antiaircraft weapons.

30-mm antiaircraft weapons of Czechoslovak origin in North Vietnam. The

* *The Warsaw Pact countries include the USSR, East Germany, Hungary, Poland, Czechoslovakia, Rumania, and Bulgaria.*

23-mm and 30-mm weapons are more mobile and have a higher rate of fire than the 37-mm weapon, and the addition of large numbers would significantly upgrade North Vietnam's defense capability against low-altitude fighter aircraft.

8. Enemy efforts to create in South Vietnam an effective air defense system, initiated by the Viet Cong in late 1962, were confirmed in July 1967 with the discovery of Polish and Chinese 37-mm antiaircraft artillery ammunition. Since mid-1967, all antiaircraft weapons that are in North Vietnam except the 85-mm and 100-mm guns and the Czech 30-mm weapon have been observed in South Vietnam.

Surface-to-Air Missile Systems

9. The USSR introduced equipment for an estimated 15 surface-to-air missile (SAM) firing battalions into North Vietnam in 1965, all of which were positioned in the Hanoi-Haiphong area. Since then, the SAM air defense system has been augmented by an additional 20 to 25 battalions, most of which remain in the Hanoi-Haiphong area, although coverage has been extended over most of North Vietnam. No SAM's have yet been moved into South Vietnam. Although operating conditions and US countermeasures have limited the effectiveness of the SAM system against US aircraft over North Vietnam, it still represents Moscow's most complex and costly contribution to North Vietnam's air defense system.

10. Up to 12 modified Fan Song B SA-2 radars have been noted in the Hanoi-Haiphong area, differing in configuration from any known Soviet variant of the Fan Song. Equipment observed with some of these modified Fan Song's indicates that the radars may be of Soviet origin, although the Chinese have the capability to produce them.

Armor

11. The USSR is the major supplier of armor to North Vietnam, but China reportedly has sent in medium tanks and possibly a few of the assault guns and armored personnel carriers given to China by the USSR during the 1950's. Czechoslovakia reportedly has provided a number of armored personnel carriers, but these have not yet been confirmed by observation. The North Vietnamese Army is estimated to have two armored regiments with an

inventory consisting primarily of Soviet and Chinese T34/85 and T54 or T55 medium tanks, a few of which have been reported in South Vietnam. These models are still widely used by Soviet, Eastern European, and Chinese armies, as are most of the other items of armored equipment carried in the current North Vietnamese inventory. A Communist attack in February 1968 against the US Special Forces camp at Lang Vei was the first instance of armor being used by the enemy in South Vietnam. The PT-76 amphibious tank used in this attack is the standard reconnaissance tank of Soviet and Eastern European forces.

Radar

12. The Vietnamese Communists' radar inventory is a mixture of Soviet and Chinese types with some US and British radars that were originally given to the USSR and the Republic of China during World War II. Almost all the radars currently used in North and South Vietnam were designed by the USSR in the 1950's and subsequently copied by the Chinese. Only fire-control radars are in use in South Vietnam. The fire-control radars known to be associated with North Vietnamese and Viet Cong antiaircraft units were first produced in the late 1940's and early 1950's, but are still standard equipment with most Soviet, Eastern European, and Chinese antiaircraft artillery units. Most of the early-warning ground-control-intercept (EW/GCI) radars supplied by the USSR and China were designed in the 1950's, although the USSR has given North Vietnam a few models from the early 1960's. The only Chinese radar of late design in North Vietnam is the Cross Legs EW/GCI, first produced in 1965.

Communications Equipment

13. Communications equipment being supplied to the North Vietnamese and Viet Cong is primarily of Soviet and Chinese origin. North Vietnam has produced copies of a Chinese transceiver and field telephone, as well as receivers of native design. There is evidence of small amounts of communications equipment coming from Eastern Europe. Most of the equipment observed in South Vietnam consists of models still used extensively in Soviet, Eastern European, and Chinese armed forces.

Communications equipment recently captured in South Vietnam includes parts associated with the Soviet-designed R-110 mobile high-frequency station, the USSR's largest and most complicated. The R-110 could be used to communicate directly with Moscow and has an output power far in excess of that required to reach Hanoi. Its presence, if proved, would be the first time the R-110 has been noted outside the Warsaw Pact countries.

Aircraft

14. Prior to initiation of the US bombing campaign in early 1965, North Vietnam's aircraft inventory consisted of 36 MIG-15/17 jet fighters sent in from Communist China immediately after the Gulf of Tonkin incident in August 1964 and several transport and trainer aircraft from the Soviet Union. After the bombing began, the USSR supplemented China's original shipment of MIG-15/17 jets and supplied more than 80 MIG-21 supersonic jet fighters, many of which probably are the more advanced 21D and 21F all-weather types. Peking continued deliveries of MIG-15/17 fighters and may have supplied a few MIG-19's, although their presence in North Vietnam has never been confirmed. At the end of September, North Vietnam had an inventory of 153 MIG's, including 38 MIG-21's. Of this total, 28 MIG-21's and 19 MIG-15/17's were deployed at airfields in North Vietnam.

15. The Soviet Union has also provided North Vietnam with eight IL-28 light jet bombers and a small number of helicopters, including MI-6 Hook's, the largest helicopter in the world. In addition to supplying MIG-15/17's, the Chinese have permitted the use of several air facilities in southern China for training North Vietnamese pilots, for repair and maintenance of aircraft, and as a sanctuary for North Vietnamese aircraft. The Eastern European countries have not provided aircraft to North Vietnam, but Czechoslovakia has engaged in training a number of advanced North Vietnamese pilots. No Communist jet aircraft have been detected over South Vietnam, although the capability to stage such flights exists.

Naval

16. The Chinese have provided most of North Vietnam's current inventory of about 40 small

naval craft and an unknown number of armed landing craft. The USSR has sent only two SO-1-class subchasers, 12 P-4 motor torpedo boats, a few armed landing craft, and two *Poluchat-I*-class motor gunboats. Before 1965, North Vietnam had 12 motor torpedo (PT) boats and 24 patrol craft of both Soviet and Chinese origin. The eight to ten patrol craft destroyed by US aircraft in 1964 were quickly replaced by China. Since 1965, Chinese shipyards have continued to supply Hanoi with new naval craft and to repair older models. A recent notable addition to North Vietnam's naval inventory is the high-speed *Huchwan*-class hydrofoil-stabilized motor torpedo boat, first produced in about 1966.

a. Hungary is supplying unidentified types of antiaircraft artillery to North Vietnam.
b. Poland has provided 37-mm antiaircraft ammunition but there is no evidence to confirm its supplying the weapon.
c. A normal Soviet firing battalion includes the Fan Song missile-control radar, six launchers, vans, transporters, and an initial complement of nine SA-2 "Guideline" missiles per launcher. In North Vietnam, firing battalions have varied from two to six launchers with an estimated ten missiles per launcher.

The *CENTRAL INTELLIGENCE BULLETIN* is produced by the Director of Central Intelligence to meet his responsibilities for providing current intelligence bearing on issues of national security to the President, the National Security Council, and other senior government officials. It is produced in consultation with the Departments of State and Defense. When, because of the time factor, adequate consultation with the department of primary concern is not feasible, items or portions thereof are produced by CIA and enclosed with brackets.

Interpretations of intelligence information in this publication represent immediate and preliminary views which are subject to modification in the light of further information and more complete analysis.

Certain intelligence items in this publication may be designated specifically for no further dissemination. Other intelligence items may be disseminated further, but only on a need-to-know basis.

The CENTRAL INTELLIGENCE BULLETIN is published in both a Top Secret Codeword and a Secret edition. Recipients of the more tightly held Codeword version should not discuss it or its Codeword contents with recipients of the Secret edition.

WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws, US Code Title 18, Sections 793, 794, and 798.

[South Vietnam: The Saigon government is casting about for a face-saving formula for participation in the Paris talks.

One proposal, [redacted] F(b)(1) F(b)(3) (S) involves a variation of the "our side - your side" position which would allow the South Vietnamese to be acknowledged publicly as the chief spokesman for the allied side at the talks. President Thieu reportedly feels that this proposal would ensure equity with Hanoi and hopefully give Saigon a superior position over the National Liberation Front. At the same time it would render the government's decision to go to Paris palatable to the Vietnamese public and political elite.

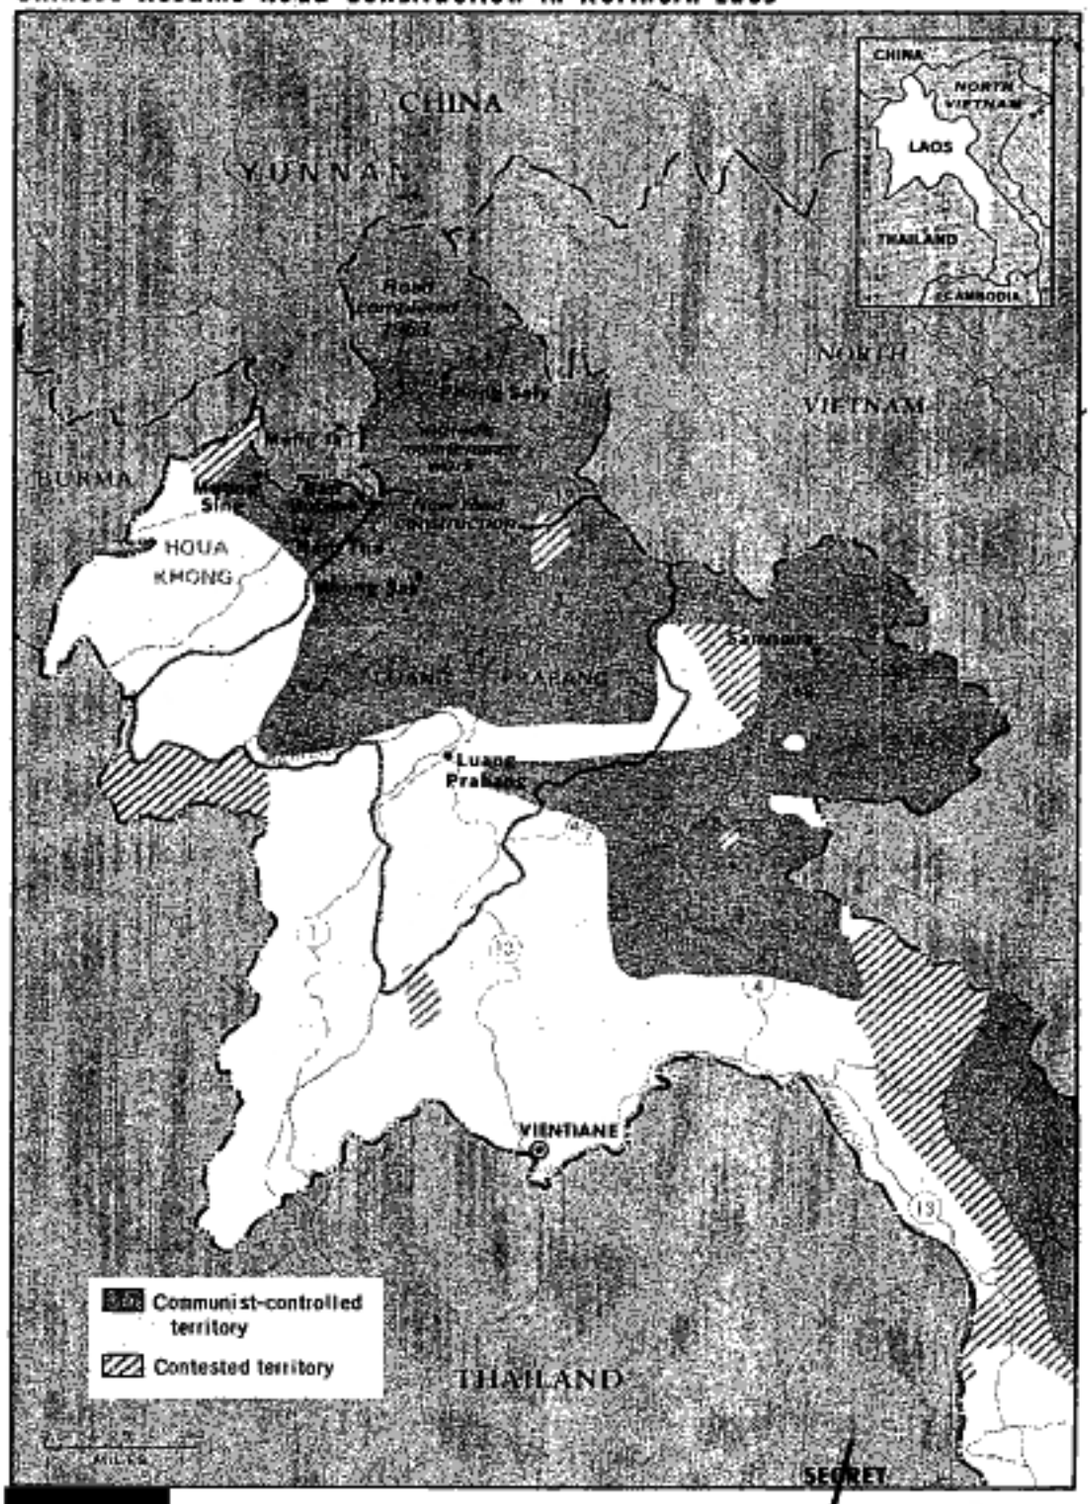
Thieu wants the proposal passed to Ambassador Bunker as soon as possible, so that discussions can begin. According to the source, Thieu does not believe that the Americans will accept the proposal, but he is hopeful that it might serve to open up a new dialogue with Washington and eventually lead to some sort of acceptable compromise.

* * * *

Communist military activity on 6-7 November was confined to light mortar attacks against a few towns and villages and a US Marine base. Three district towns in the Saigon - III Corps area and civilian hamlets on the outskirts of Quang Ngai and Hoi An were hit with light mortar fire. Casualties were light. A US Marine base south of the DMZ was hit by 34 rounds of 140-mm. rocket fire in four separate incidents with no casualties or damage.

Although major enemy units continue their stand down, [redacted] F(b)(1) F(b)(3) (S) main force units of regimental size are expecting attack orders in the near future. Two regiments in the area of the Demilitarized Zone--the 27th and the 164th Artillery--and another two in the highlands--the 95B and the 66th--discussed attack plans in messages of 5 November. (SECRET [redacted] F(b)(3) (U) [redacted] (Map)]

Chinese Resume Road Construction in Northern Laos



F(b)(3) (U)

[redacted]

SECRET

Communist China - Laos: The Chinese have apparently resumed construction of a road from southern Yunnan Province into northern Laos.

F(b)(1) F(b)(3) (S)

[redacted] since early September several thousand Chinese have been working on a road leading southward from the border village of Ban Botene. The laborers apparently are accompanied by Chinese security troops.

F(b)(1) F(b)(3) (S)

[redacted] that the road will continue south to Nam Tha, with one spur heading southeast toward Muong Sai.

Roads linking Nam Tha and Muong Sai with China would facilitate the flow of supplies to Pathet Lao troops in remote areas of northern Houa Khong and Luang Prabang provinces that are not connected by road to North Vietnam. The new road construction may be the Communists' reaction to the increased activity of government guerrillas in the area during the past year.

The Chinese have been engaged in intermittent road building in the area under the terms of an agreement reached with Prime Minister Souvanna Phouma in 1962. The current activity is the most significant since 1963, when similar numbers of Chinese laborers were used to complete the Meng-la - Phong Saly road. At that time, the Chinese publicly announced plans to build a road system linking southern Yunnan with larger Laotian villages across the border. Little had been done to carry out this plan, however, except for sporadic work on the Meng-la - Ban Botene section of road by small labor gangs. (SECRET) (Map)

F(b)(3) (U)

F(b)(3) (U)

Korea: The North Korean guerrillas who landed on the South Korean east coast on 3 November appear trapped. More than 15,000 South Korean security forces, including offshore naval units, have blocked possible escape routes. South Korean authorities estimate that two 30-man infiltration teams are in the area, and thus far seven guerrillas have been killed. The roundup is expected to take considerable time because of rugged terrain and bad weather.

The North Korean infiltration attempt appears to be the largest since the Korean war. Another unique aspect was the forced indoctrination of villagers, the first instance of "armed propaganda" since the war. (SECRET [redacted]

F(b)(3) (U)

F(b)(3) (U)

Yemen: A major break in Yemeni royalist ranks may represent a first step toward an end to the fighting.

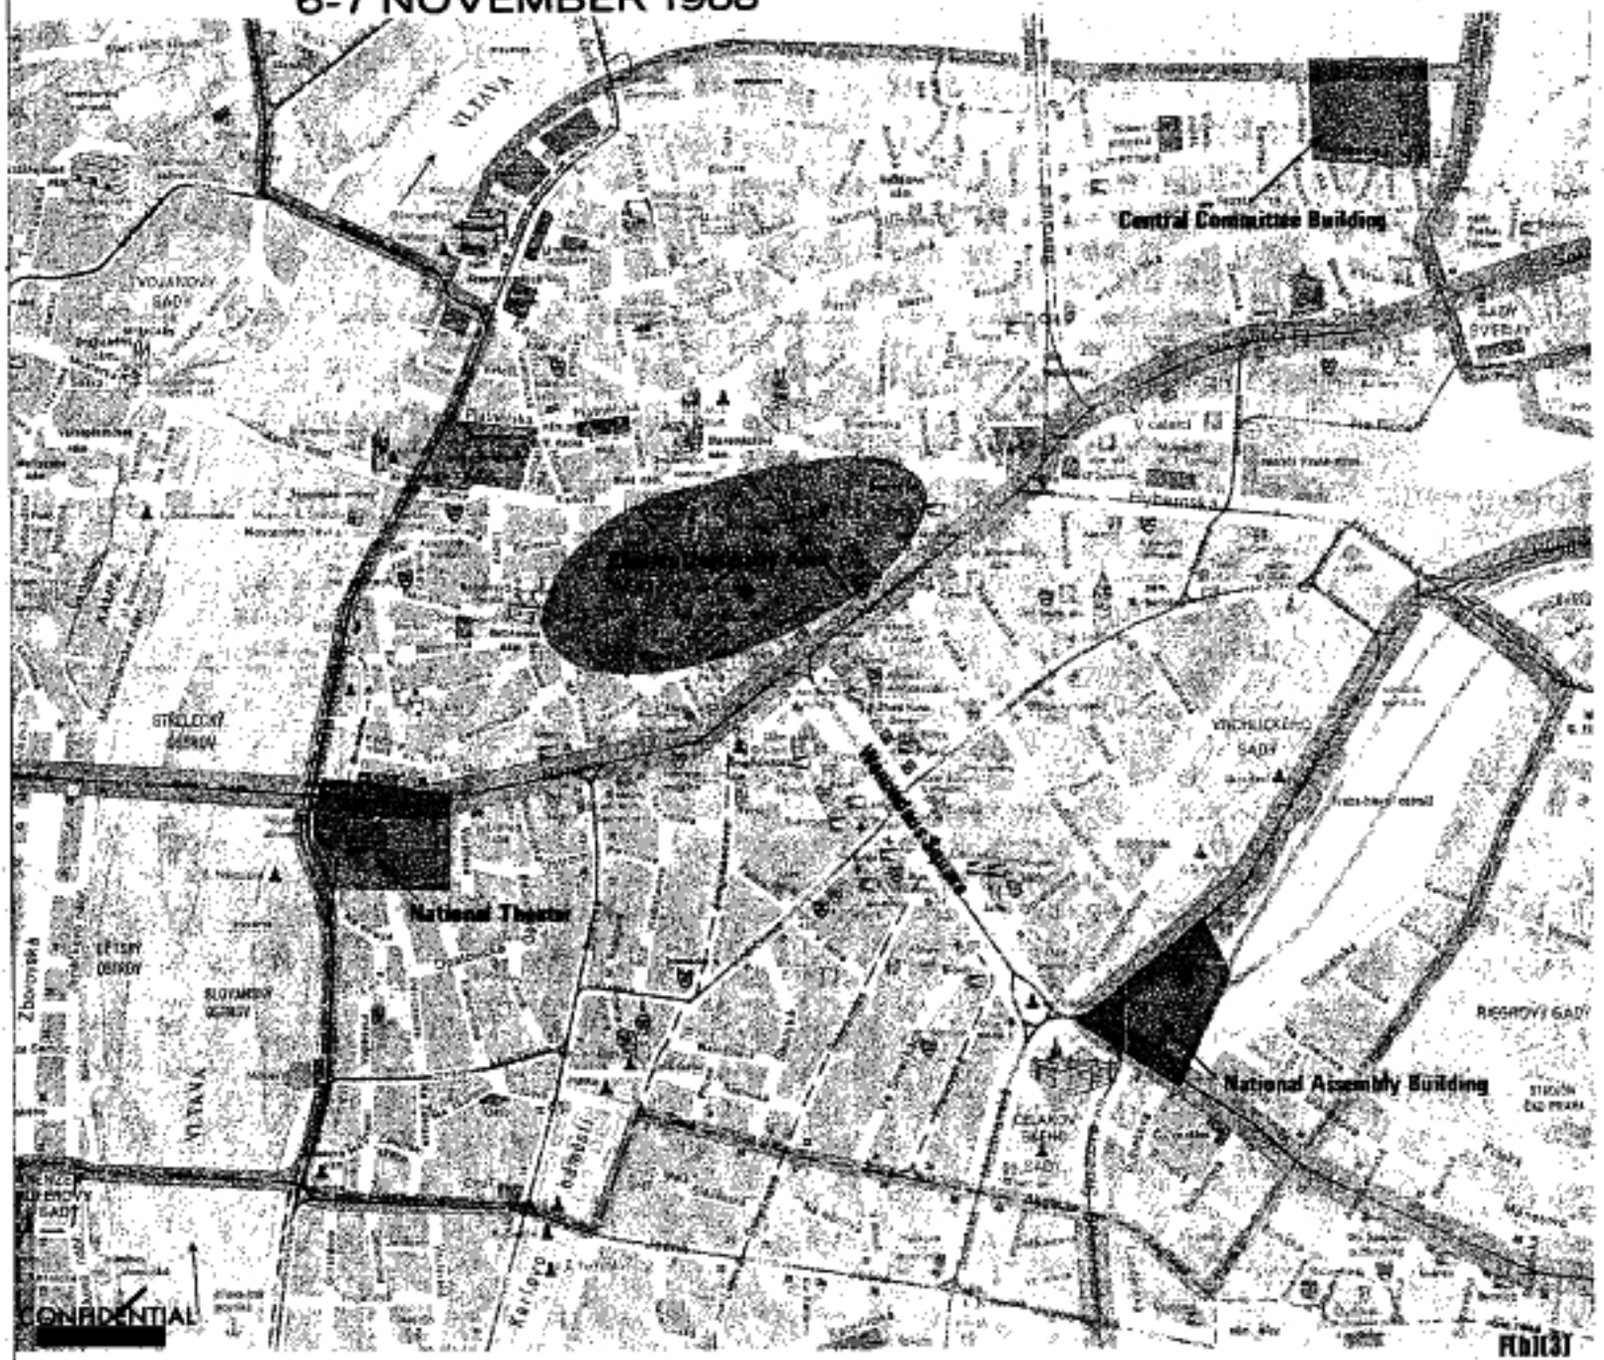
On 3 November a prominent royalist tribal leader, Qasim Munassir, agreed to end the fighting around Sana and to merge his tribal forces with those of the republic, [redacted] F(h)(1) F(h)(3) (S) Munassir was rewarded by being appointed military commander of the eastern zone. In addition a council of elders is to be established before 21 November to discuss changing the name of the Yemeni Arab Republic to something more palatable to the strongly Muslim tribal leaders, such as eliminating the word republic.

Coming at a time when the republic was facing a new royalist offensive as well as internal disorders in the capital, this change-over by the most tenacious of the royalist leaders must be regarded as more than simple defection. The conditions he extracted from the republicans appear to support this view.

There is no clear evidence, however, that his action is connected with the tenuous peace negotiations which have been dragging on between the two sides and with the Saudi Arabian Government. It is more likely that, as the tribal leaders have become increasingly independent of both royalist and republican governments, they have tended to carry on their own negotiations. A continued trend among royalists in switching allegiance to the republicans could substantially reduce the area of fighting and might result in a general tribal peace. (SECRET [redacted] F(h)(3) (U)

F(b)(3)
(U)

AREAS OF ANTI-SOVIET DEMONSTRATIONS IN DOWNTOWN PRAGUE 6-7 NOVEMBER 1968



CONFIDENTIAL [redacted]

F(b)(3)
(U)

F(b)(3)
(U)

[Czechoslovakia: There were more anti-Soviet demonstrations in Prague yesterday.

Czechoslovak soldiers and police used force to attempt to break up crowds shouting anti-Russian slogans. The demonstrators included several thousand young people, students, workers, and office employees. The presence of white- and blue-collar workers is a sign of the unusual depth of the anti-Soviet feeling in Prague.

Some of the marchers were apparently demonstrating against their own leaders--including Dubcek--for participating in ceremonies on 6 and 7 November commemorating the anniversary of the Bolshevik revolution.

Early on 7 November there were manifestations of anti-Russian sentiment centering on the Esplanade Hotel, and the police exercised restraint in breaking them up. During the late afternoon and evening the situation deteriorated, especially near the party central committee building, and the police began using their clubs.

The Soviets seem to have been expecting the disturbances. On 5 November [redacted] Soviet combat elements 15 kilometers from the city and near the best high-speed roads leading to downtown Prague. [redacted] some small Soviet units in the outskirts of the city where none had previously been stationed.

F(b)(1) F(b)(3) (S)

F(b)(1) F(b)(3) (S)

Moscow will undoubtedly consider the demonstrations a serious affront. The Soviets will see additional evidence that the Dubcek leadership is either unable or unwilling to live up to its promise to control anti-Soviet manifestations. The Soviets, however, probably intend to intervene with their troops only if the situation gets out of control of the Czechoslovak security forces.

There may be more demonstrations or even street clashes on 10 November, when pro-Soviet party conservatives plan to hold a public rally. (SECRET) (Map)]

NOTES

West Germany - Berlin: Radical student groups plan nationwide demonstrations tomorrow to commemorate an abortive Communist revolution in 1918 and to protest the Vietnam war. Some groups are planning deliberate violence in order to provoke the police and thereby recover the broader student support the activists had last year. West Berlin police, despite many casualties, acted with restraint in putting down radical-initiated violence on 4 November; the authorities hope thus to undercut the radicals. (CONFIDENTIAL)

USSR: The Soviets probably will attempt an unmanned circumlunar flight within the next several days. Space support and recovery ships in the Pacific and Indian Oceans are heading for circumlunar support stations and should arrive by the 9th. [redacted] F(b)(1) F(b)(3) (T)

USSR: On 7 November the Soviets conducted an underground nuclear test at the Novaya Zemlya test area. The yield of the device tested was in the intermediate range--200 kilotons to one megaton. [redacted] F(b)(1) F(b)(3) (S)

(continued)

USSR-Iraq: Ten SU-7 fighter-bombers arrived in Basra on 27 October, the first Soviet delivery of SU-7s to Iraq in a year. In addition, the USSR delivered by air three AN-12 cargo transports and two AN-24 passenger transports last month. Four more SU-7s out of a total of 32 remain to be shipped under an agreement signed in May 1966. Another arms pact was concluded in July 1967, and an Iraqi military delegation went to Moscow last September, probably to seek additional military equipment. (TOP SECRET [redacted] F(b)(3) (U)

[redacted] F(b)(1) F(b)(3) (S)

Venezuela: A dissident Communist terrorist group reportedly plans some unspecified action against "an American colonel" in the near future. Other terrorist groups are also reportedly planning to try to disrupt the national elections on 1 December. US business facilities as well as US nationals would be easy targets for hit-and-run terrorist attack, and it is doubtful that government forces unless forewarned would be able to prevent such action. 8 November 1968

The following is a report by a reliable and trustworthy American of his breakfast meeting with the Government of Vietnam (GVN) Ambassador Bui Diem on 8 November 1968, at the residence.

1. On the way to this meeting, the news had come over the radio that President Thieu had proposed that, under the "our side, your side", formula, South Vietnam be designated head of the Allies delegation while North Vietnam be head of the Communist one. Bui Diem had the full text of Thieu's statement. He commented that the GVN position represented only a small change in the original U.S. proposal - rather than a totally new and different formula - but that it satisfied a number of Vietnamese concerns: it gave the GVN a more prominent status than the NLF, it would put negotiations on a Vietnamese-to-Vietnamese basis rather than a U.S.-to-Vietnamese basis, and it would clearly represent a new stage of negotiations rather than a continuation of the previous phase. Asked if he thought there was much chance of Hanoi's acceptance, he replied "no," but he added that it put the GVN on the offensive rather than in the position of appearing to scuttle negotiations.

2. Asked if he thought that, under one formula or another, the negotiations would be able to resume soon, Bui Diem said that he thought it would take some time. He said that he thought the fact that the U.S. now had a President-elect would slow down the planning process on the U.S. side, since President Johnson would wish to inform and seek the opinions of the President-elect's team, and it would also take some time to repair the damage to GVN-U.S. relations. Regarding the latter point, Bui Diem said that, while there was minor substantive difference in the U.S. and GVN positions - such as the U.S. willingness to leave GVN and NLF status at the peace talks ambiguous while the GVN wanted more precision - much of the difficulty

in GVN-U.S. relations had derived from misunderstanding and misinterpretation. He said that there were delicate nuances in the concept of negotiations and that the two governments "used the same language but gave it different meanings". Bui Diem said he had discussed this problem with Mr. Bundy and that they had agreed that, at some time in the near future, they should go over all that has transpired between the governments in recent days and seek to find in it some guidelines for future policy.

3. Asked if the GVN felt there was any U.S. attempt at deception, referring specifically to the apparent conflict between what Ambassador Bunker reportedly told President Thieu about proposals made to Hanoi and what Ambassador Phan Dang Lam had been told by Ambassador Harriman, Bui Diem replied he could not say that that was the case, but there apparently was some feeling in the GVN that President Johnson acted with undue haste and that he may have been influenced in part by domestic politics.

4. Bui Diem said that though he would handle things differently if he was in Ambassador Lam's position, he could not criticize Lam's actions because Lam's cables only pointed up substantive differences which did exist. Although the GVN and the U.S. did agree on the bombing halt, they did not agree on the arrangements proposed for negotiations, but these disagreements could probably have been resolved amicably if the announcement of the bombing halt had not been made so precipitously.

5. Asked how he would have handled things differently if he had been in Lam's place, Bui Diem said that relations between the U.S. and GVN delegations in Paris should be warmer than they now are. He said that when relations are stiff, it is impossible to chat at length informally and assure that each side understands all the nuances of the other side's position. He said that, for example, he knew Jorden and Vance well and could joke with them; if they had disagreements, each side would know fully the reason for the disagreement and they could still joke with each other. Bui Diem said that while he could risk a joke with Ambassador Harriman, Lam could not.

6. When asked if he knew of any planning in the GVN for sending a delegation to Paris, Bui Diem replied that if the newly-proposed GVN formula was accepted, Vice President Ky could lead a delegation without having to face a woman (Mrs. Binh). He thought General Nguyen Duc Thang should accompany Ky. However, Bui Diem cautioned that a delegation should not be composed of too many Northerners. For example, if Dang Duc Khoi went, it would probably be better that he not be a member of the delegation but a behind-the-scenes public relations man. Bui Diem said he would recommend that Senator Tran Van Lam (a Southerner) be included in the delegation, and Nguyen Luu Vien might also be considered.

7. Bui Diem said he expected to return to Saigon soon. He could not state precisely when, but would wait a short time to see if his return was requested, and if that did not happen he would propose it himself. He felt it would be normal for him to report back to Saigon in person on the results and implications of the U.S. elections.

8. He repeated the statement made at our last meeting that he had no desire to be included in a GVN delegation to negotiations, but he added that he would like to visit Paris from time to time during negotiations to assist behind the scenes in any way he could.

9. In a final comment on the elections, Bui Diem said he was pleased that Senators Morse, Gruening and Clark had not been re-elected, and he said that Senator Fulbright's re-election was offset by the election of Barry Goldwater.

1. THIS IS THE THIRD OF THREE MESSAGES IN RESPONSE REFERENCE AND DEALS WITH SUPPORT OF NVN OPERATIONS.

2. REFERENCE DICTATES THAT MACV AND CAS CONSIDER AND RECOMMEND TO THE AMBASSADOR WHETHER NORTH VIETNAM OPERATIONS SHOULD BE TRANSFERRED BY CAS TO MACV IN WHOLE OR IN PART. THIS MATTER HAS BEEN UNDER STUDY BY THESE TWO ORGANIZATIONS WHO HAVE MADE THE FOLLOWING RECOMMENDATIONS IN WHICH AMBASSADOR LODGE CONCURS:

A. IF THE PROGRAM IS TO CONTINUE AT SUBSTANTIALLY ITS PRESENT LEVEL AND UNDER CURRENT POLICY ORIENTATION, THE PROGRAM SHOULD REMAIN UNDER CAS SUPPORT AND GUIDANCE. IT WILL REQUIRE CONTINUED AND EXPANDED MACV SUPPORT, ESPECIALLY THE MARITIME PROGRAM.

B. IF THE PROGRAM IS TO BE EXPANDED IN SCOPE AND IN POLICY ORIENTATION TO THE OPERATIONAL LEVEL VISUALIZED IN THE CINCPAC 33 AND 34 PLAN SERIES AND IF THE UNITED STATES GOVERNMENT IS PREPARED TO ACCEPT A REDUCTION OF PLAUSIBLE DENIAL TO A LEVEL OF DISCREET OVERT OPERATIONS, AND TRANSFER CAN BE RECONCILED TO MACV PHASE-OUT, IT IS DEEMED FEASIBLE AND IN THE NATIONAL INTEREST TO TRANSFER THE PROGRAM FROM CAS TO MACV. UNDER THESE CIRCUMSTANCES, CAS PERSONNEL WOULD PHASE OUT THE PROGRAM OVER A SIX-MONTH PERIOD FROM THE DATE OF APPROVAL. CAS WOULD CONTINUE SUPPORT OF MACV IN CERTAIN SPECIALIZED AREAS.

C. UNDER BOTH CONCEPTS CAS SHOULD RETAIN DIRECTION AND COORDINATION OF THEHPSYOPS AND DECEPTION PROGRAM JOINTLY CONDUCTED WITH THE VIETNAMESE AGAINST NVN.

3. WE ARE PREPARED TO OUTLINE IMPLEMENTSING PROCEDURES AND AMPLIFYING DETAILS APPLICABLE TO COURSE B ABOVE DURING THE 20 NOVEMBER HONC CONFERENCE.

SUMMARY: PRESIDENT THIEU [redacted] E0 12958 3.4(b)(1)>25Yrs (C) [redacted] HE HAD BEEN SURPRISED BY THE PRESSURE EXERTED ON HIM BY THE U.S. DURING THE PRE-BOMBING HALT DISCUSSIONS. HE TERMED THE U.S. ACTION A "BETRAYAL" AND SAID VICE PRESIDENT KY FULLY SUPPORTED HIS POLICY ON THE PEACE TALKS ISSUE, INCLUDING HIS TWO-DELEGATION PROPOSAL. HE INDICATED HE MIGHT RESHUFFLE HIS CABINET IN AN EFFORT TO PLEASE THE NEW U.S. ADMINISTRATION. [redacted] THIEU REITERATED HIS DETERMINATION NEVER TO TALK WITH NATIONAL LIBERATION FRONT (NFLSV) REPRESENTATIVES OUTSIDE OF SAIGON. THE ONLY FORMULA FOR THE PARIS TALKS HE WILL ACCEPT IS ONE WHICH REQUIRES THE NFLSV REPRESENTATIVES TO BE A PART OF THE HANOI DELEGATION. THIEU THINKS PRESIDENT-ELECT NIXON WILL LET PRESIDENT JOHNSON TRY TO SOLVE THE TALKS IMPASSE SINCE A SOLUTION BY JOHNSON WOULD MAKE NIXON'S JOB AFTER INAUGURATION EASIER. E0 12958 3.4(b)(1)>25Yrs (C)

END SUMMARY.

1. [redacted] COMMENT: OTHER INFORMATION [redacted] INDICATES THAT BY 15 NOVEMBER PRESIDENT THIEU HAD RECOGNIZED THE NEED FOR AN ACCOMMODATION WITH THE U.S. AND FOR THE REVERSAL OF THE HARD LINE ON THE PARIS PEACE TALKS THAT HE TOOK IN HIS 2 NOVEMBER

SPEECH TO THE NATIONAL ASSEMBLY. THIS REPORT IS, THEREFORE, ALREADY OUTDATED AS AN INDICATION OF THE PRESIDENT'S POLICY ON THE PARIS TALKS. IT DOES SERVE TO SHOW, HOWEVER, THE STRENGTH OF THIEU'S RESENTMENT OVER AMERICAN POLICY AND SEVERAL OF THE MISCONCEPTIONS ON WHICH HIS OWN STAND WAS BASED. IT ALSO SHOWS THAT, AS LATE AS 11 NOVEMBER, THIEU WAS STILL ENJOYING PLAYING THE POPULAR ROLE OF DEFENDER OF VIETNAMESE NATIONAL INTERESTS.)

E0 12958 3.4(b)(1)>25Yrs (C)

2. [redacted] PRESIDENT NGUYEN VAN THIEU SPOKE CRITICALLY OF THE UNPRECEDENTED PRESSURE TO WHICH THE U.S. GOVERNMENT HAD SUBJECTED HIM DURING THE PRE-BOMBING HALT DISCUSSIONS. ACCORDING TO THIEU, THE AMERICANS HAD CITED THE SIZE OF THE U.S. COMMITMENT IN BLOOD AND MONEY AS JUSTIFICATION FOR INSISTING THAT U.S. INTERESTS PREVAIL AND HAD CITED THE PRESENCE IN SOUTH VIETNAM (SVN) OF A HALF MILLION U.S. TROOPS. THIEU SAID HE HAD HAD TO REMIND THE AMERICANS THAT THE GOVERNMENT OF VIETNAM (GVN) CONTRIBUTION TO THE WAR WAS IN FACT, LARGER THAN THE U.S. COMMITMENT.

3. THEIU CHARACTERIZED THE U.S. GOVERNMENT ACTION AS A

"BETRAYAL" COMPARABLE TO THE U.S. ABANDONMENT OF CHIANG KAI-SHEK AS A RESULT OF THE YALTA, TEHERAN AND CASABLANCA CONFERENCES. HE COMPLAINED THAT THE AMERICANS HAD SENT THE AUSTRALIAN AND KOREAN AMBASSADORS TO BADGER HIM INTO ACCEPTING THE U.S. POINT OF VIEW. THIEU OBSERVED THAT VICE PRESIDENT NGUYEN CAO KY, WHO WAS NOT PRESENT, WAS FULLY IN ACCORD WITH HIS POLICY ON THE PARIS TALKS QUESTION, INCLUDING HIS RECENTLY ENUNCIATED "OUR SIDE-YOUR SIDE" FORMULA.

4. THIEU [redacted] DURING THE U.S. ELECTION CAMPAIGN [redacted] HAD SENT TWO SECRET EMISSARIES TO THE U.S. TO CONTACT RICHARD NIXON. HE INDICATED HE MIGHT RESHUFFLE THE CABINET IN AN EFFORT TO PLEASE THE NEW U.S. ADMINISTRATION, MENTIONING SPECIFICALLY THE POSTS OF PRIME MINISTER AND FOREIGN MINISTER.

EO 12958 3.4(b)(1)>25Yrs (C)

5. THERE WAS SOME CONFIDENTIAL TALK AMONG THE PRESIDENT'S GUESTS ABOUT ORGANIZING CATHOLICS "TO SUPPORT THE PRESIDENT THROUGH DEMONSTRATIONS WHEN THE TIME COMES." THIEU HIMSELF REFERRED ONCE TO HIS "KNOWLEDGE" OF AMERICAN-PLANNED DEMONSTRATIONS FOR PEACE BY THE AN QUANG BUDDHIST FACTION.

6. [redacted]

EO 12958 3.4(b)(1)>25Yrs (C)

~~SECRET~~ ~~NO FOREIGN DISSEM/NO DISSEM ABROAD~~

(classification) (dissem controls)

[redacted] E0 12958 3.4(b)(1)>25Yrs (C)

7. [redacted] ASKED [redacted] TO EXPLAIN HIS "TWO-DELEGATION" FORMULA, THIEU SAID HIS IDEA WAS THAT ALL POLITICAL DISCUSSION IN PARIS SHOULD TAKE PLACE BETWEEN THE GVN AND HANOI REPRESENTATIVES, ALTHOUGH THE GVN WOULD DEFER TO THE U.S. ON SUCH MATTERS AS DISPOSITION OF MILITARY BASES AND TROOPS. E0 12958 3.4(b)(1)>25Yrs (C)

8. IN RESPONSE TO ANOTHER QUESTION [redacted] THIEU SAID HE WAS FIRM IN HIS DETERMINATION TO TALK ONLY WITH HANOI. HE WILL NEVER TALK DIRECTLY WITH THE NATIONAL LIBERATION FRONT (NFLSV) OUTSIDE OF SVN, THIEU SAID, ALTHOUGH HE CONTINUES TO HOLD OPEN THE POSSIBILITY OF DIRECT TALKS WITH NFLSV SPOKESMEN IN SAIGON. THE OFFER OF SAFE PASSAGE TO AND FROM SUCH TALKS STILL STANDS. THIEU SAID HE HAS A PARTICULAR OBLIGATION TO OLDER PEOPLE TO KEEP UP THEIR CONFIDENCE HE WILL NEVER RECOGNIZE THE NFLSV. TALKING WITH NFLSV REPRESENTATIVES E0 12958 3.4(b)(1)>25Yrs (C)

E0 12958 3.4(b)(1)>25Yrs
(C)

IN 36354

[redacted]

~~SECRET~~ ~~NO FOREIGN DISSEM/NO DISSEM ABROAD~~
(classification) (dissem controls)

OUTSIDE OF SAIGON WOULD AMOUNT TO SUCH RECOGNITION. HE EMPHASIZED HE WOULD WELCOME AS WITNESSES TO GVN/HANOI TALKS ALL COUNTRIES BELONGING TO THE UNITED NATIONS BUT WOULD REMAIN FIRM ON HIS STAND THAT THE ONLY FORMULA ACCEPTABLE TO HIM IS ONE WHICH REQUIRED THE NFLSV REPRESENTATIVES TO BE PART OF THE HANOI DELEGATION IN PARIS.

9. THIEU SAID THAT THERE HAD BEEN NO REACTION FROM WASHINGTON TO HIS TWO-DELEGATION PROPOSAL SINCE THE RECENT MEETING BETWEEN PRESIDENT JOHNSON AND PRESIDENT-ELECT NIXON. HE EXPECTS NIXON TO LET JOHNSON TRY TO SOLVE THE TALKS CRISIS AND TO GO AS FAR AS POSSIBLE TOWARD REACHING A SETTLEMENT. THIS WOULD MAKE NIXON'S OWN JOB EASIER AFTER INAUGURATION AND WOULD LEAVE FOR THE NIXON ADMINISTRATION THE OBVIOUS MEASURES TO BE TAKEN TO DISENGAGE THE U.S. FROM SVN, THUS ALLOWING NIXON TO BE THE "HERO" WHO DE-AMERICANIZED THE WAR.

FOREWORD

The north Thailand-northwest Laos border area is a locus of subversive insurgency that increasingly plagues the Thai Government. Rugged, remote, and densely forested, the area is well suited to covert cross-border movement and is very inhospitable to the Government's counterinsurgency operations.

This report is intended for use as a brief orientation aid by persons concerned with events or programs in Thailand. A similar report is available on Laos (CIA/BI GR 67-14, *Geographic Brief on Laos*, February 1967).

CENTRAL INTELLIGENCE AGENCY
Directorate of Intelligence
December 1968

INTELLIGENCE REPORT

Geographic Brief on North Thailand-Northwest Laos Border Area

1. The Thai provinces of Chiang Rai, Nan, and Uttaradit and the Laotian province of Sayaboury occupy some 22,000 square miles, a region slightly larger than Vermont and New Hampshire combined. The northernmost tip is less than 80 miles from Communist China (see Map 59652). The region is rugged, densely forested, and underdeveloped. Slopes are populated by seminomadic hill peoples who have traditionally been unresponsive to governmental controls and who pay scant heed to the international boundary slicing through their homelands. These factors combined make the region susceptible to and well suited to subversive insurgency, and they hamper government counterinsurgency operations.

2. Although Sayaboury Province (formerly part of Thailand) has remained relatively free from Pathet Lao (PL) influence, PL forces have been active in the northwestern part of the province, west of Hongsa. They have also played a role in the support of Communist insurgency in the northern Thai provinces where hill peoples (principally Meos) have been the targets of Communist propaganda and recruitment for several years. Serious clashes between insurgents and Thai security forces have occurred in Chiang Rai and Nan since late 1967.

TERRAIN AND VEGETATION

3. Highly dissected, steeply sloped ridges and valleys trending in a north-northeast – south-southwest direction characterize the terrain of the region (see Figure 1). Because secondary ridges branch off at all angles from the main terrain features, movement for more than a few miles is difficult in all directions except along major valleys. Much of the higher terrain is so difficult that it is unadministered by the central government on either side of the border. Ridgelines are generally 3,000 to 6,000 feet above sea level, with the highest point—6,896 feet—along the Sayaboury-Uttaradit border. Flat to gently rolling valleys and intermontane basins lie 1,000 to 3,000 feet below the ridgelines (see Figure 2). The most rugged territory in the region flanks the northern segment of the north-south trending range that forms the Sayaboury-Nan border; prevailing crest elevations here are well over 6,000 feet. Terrain in other parts of Nan Province and in most of Chiang Rai and Uttaradit is less rugged, and broad, relatively gentle slopes are more common.

Note: This report was produced by CIA. It was prepared by the Office of Basic and Geographic Intelligence and coordinated with the Office of Current Intelligence.

NND 941536 --- 3740

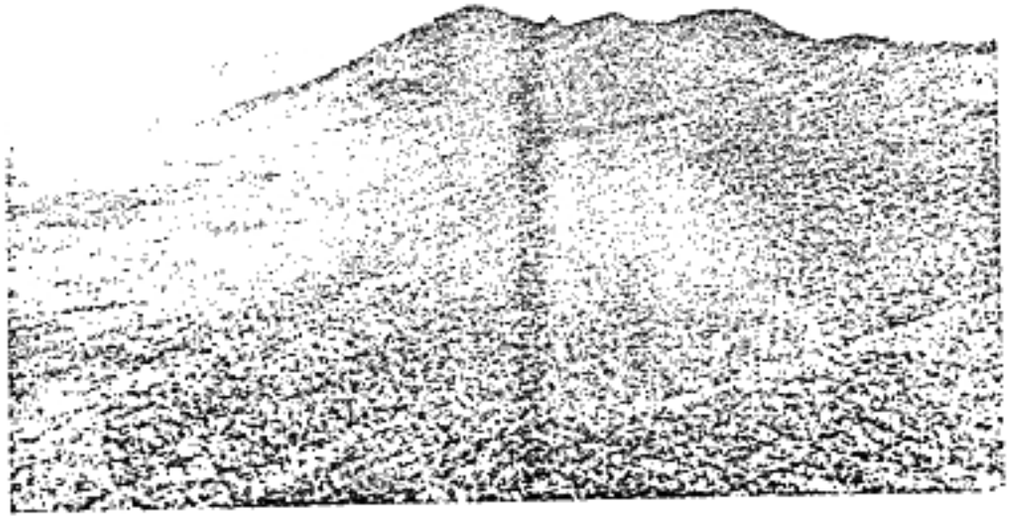

FIGURE 1. Densely forested, steeply sloped ridge in northern Thailand. Such terrain, well suited to guerrilla operations, is typical of most of the region.

4. All of the streams in Sayaboury Province as well as in the northern two-thirds of Chiang Rai drain into the Mekong River, which forms the northern and eastern borders of Sayaboury. Streams in the southern one-third of Chiang Rai and all of those in Nan and Uttaradit drain into the Mae Nam Nan, which flows southward into the central lowland of Thailand.

5. Although streams meander slowly through the broader and more level valleys and basins, for most of their courses they flow swiftly through deeply entrenched valleys. Gradients are steep, beds are strewn with boulders, and courses are punctuated by numerous falls and rapids. In places the streams (including the Mekong) flow in canyons well over 1,000 feet below the flanking terrain. During the low-water season (November through April) smaller streams and upper courses of larger ones are dry or their flows are reduced to a trickle. During the high-water season (May through October), however, flows become torrential and flash floods are common. Discharge may be up to 30 times as great as during low water, and water levels may rise as much as 60 feet in constricted channels.

6. Broadleaf forests containing both evergreen and deciduous species blanket all of the region except valley floors and lower slopes that are under cultivation and ridges that support mainly coniferous growths. Evergreens predominate in wetter areas such as along streams or on windward, rain-swept slopes; deciduous trees prevail on drier tracts. Slash-and-burn farming has denuded extensive slope areas of their original forest cover and, after the cleared land has

NND 941536 --- 374

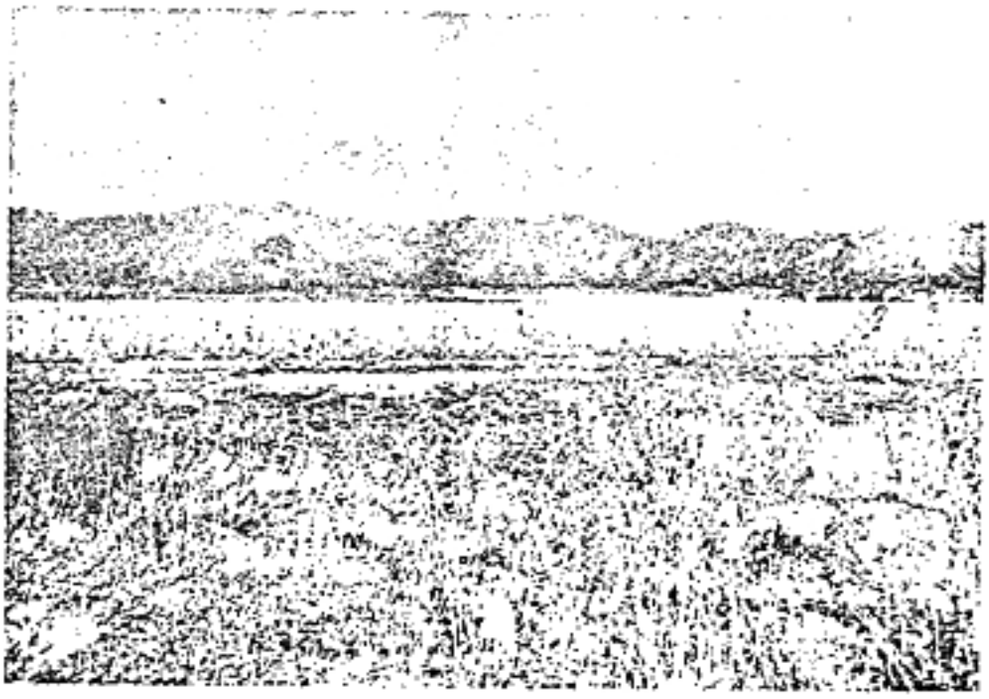

FIGURE 2. Broad valley floor in Chiang Rai Province. Valleys usually are blanketed by fields of wetland rice, especially in the Thai provinces, and are surrounded by terrain rising to 3,000 feet above them. After the harvest, in October or November, the fields are dry and would not significantly deter movement.

been abandoned, lower but more tangled secondary growths have developed. Tall, open stands of virgin forests are restricted to remote tracts of rugged terrain where slash-and-burn activities have not been practiced. Trees in the deciduous forests are leafless for varying periods from December to late March or early April, and their capacity to conceal insurgent operations from air observation is diminished accordingly. Nearly pure stands of teak are common in the deciduous forests. Grasslands with grasses up to 12 feet high are scattered throughout the region. Tracts with short grasses could be used for drop zones in counterinsurgency operations.

7. The rugged mountains and densely foliated forests of the region greatly favor guerrilla operations. In the Thai provinces, insurgent groups are composed mostly of Meos but include other hill peoples. Their Thai adversaries are lowlanders who not only lack the insurgents' knowledge of the mountains but also lack speed and endurance when traveling in such terrain. The insurgents therefore are able to attack Thai military installations in the valleys, as well as patrols in the mountains, and then withdraw into their mountain redoubts with little fear of apprehension. The dense forest canopy, although somewhat diminished by leaf fall in the deciduous stands from December to April, effectively conceals

NND 941536 --- 37

insurgent movements (including infiltration of agents into northern Thailand from Laos) from air observation. On the other hand, the region is poorly suited to conventional military operations. Airpower and artillery are difficult to apply effectively in the mountainous, densely forested terrain. All forms of surface movement by ground forces, too, are severely limited.

CLIMATE

8. Like the rest of Southeast Asia, the border area has a monsoonal climate characterized by two major seasons—the wet southwest monsoon from mid-May to mid-September and the dry northeast monsoon from mid-October to mid-March. These major seasons are separated by two transitional periods—one from mid-March to mid-May, the other from mid-September to mid-October.

9. The southwest monsoon is a season of heavy and frequent precipitation. Approximately two-thirds of the yearly rainfall occurs during this period. Streams become swollen, the ground becomes saturated and muddy, surface transportation becomes difficult or impossible, and the dense cloud cover curtails air transport. Humidities are persistently high and, except at higher elevations, mean daily maximum temperatures climb into the high 80's or low 90's (Fahrenheit degrees). Although such weather hampers the logistic support of Government counter-insurgency operations, it has relatively little effect on guerrilla activities. The cloud cover, for example, actually helps to conceal insurgent movements from air observation.

10. The northeast monsoon is a season of very little precipitation. Temperatures (which may dip into the low 40's at higher elevations) and relative humidities are at their lowest and skies are clearest during this season.

11. The mid-March to mid-May transitional season is characterized by increases in the frequency and amount of precipitation and in relative humidity. Maximum annual temperatures—in the upper 90's—occur at this time, generally near the end of April. The mid-September to mid-October transitional season is characterized by decreasing precipitation, temperature, and relative humidity. The table on page 5 shows mean monthly and annual precipitation for selected stations in the region.

NND 941536 — 3 7 Y 4

THAILAND-LAOS BOUNDARY

12. The Thailand-Laos boundary, for nearly all of its extent through the region, is alined along remote mountain crests. Although entirely undemarcated, no part of it is in dispute. North of the region the 59-mile segment between the Thai province of Chiang Rai and the Laotian province of Houa Khong is formed by the thalweg (middle of the chief navigable channel) of the Mekong River. Between Chiang Rai and Sayaboury—some 48 miles—the boundary follows a mountain range that forms the water divide between two minor river systems that drain northward to the Mekong. Between Sayaboury and the Thai provinces of Nan and Uttaradit—approximately 238 miles—the boundary is formed by the water divide between streams flowing northward and eastward to the Mekong and streams flowing westward and southward to the Mae Nam Nan.* South of the region the boundary between Sayaboury and the Thai province of Loei—about 86 miles—follows the thalweg of the Nam Huang to its confluence with the Mekong.

13. Laos originally gained control of what is now Sayaboury Province during the period 1902-04 when a series of treaties between Siam (now Thailand) and France (colonial administrator of Laos until 1949) ceded territory on the west bank of the Mekong to France. In 1941, Thailand—with the backing of Japan—took advantage of the 1940 collapse of France and the resultant weakening of its colonial empire by reclaiming the west bank territory. She retained it until 1946 when a France-Thailand accord annulled the 1941 treaty that had accompanied the Thai seizure and reestablished the pre-1941 boundary. This boundary exists today. Some Laotian leaders undoubtedly suspect Thailand of harboring ambitions to reannex all of the Laotian territory west of the Mekong River (including the southern provinces of Champassac and Sithandone, as well as Sayaboury) that Thailand had annexed during World War II. Control of the west bank territory would give Thailand continuous frontage on the Mekong from its northern border to Cambodia and would greatly facilitate the operations of Thai timber rafters and boatmen.

14. The present boundary traverses rugged terrain inhabited by hill peoples (principally Meos) who pay little attention to it. They commonly have family ties on both sides of the border. Some villages are situated on one side of the border and have fields on the other. Villagers in Kene Thao, in southern Sayaboury, reportedly cross the Nam Huang to a well on the Thai side to obtain drinking water. The hill people in some sections of the Sayaboury border areas trade in Thai towns that are closer to them than Sayaboury, Paklay, or other towns on the Laos side of the border. These people may travel as far into Thailand as Pua, 20 miles from the border, or Nan, 30 miles, to shop. A recent American visitor to the Thai town of Chiang Khong, across the Mekong River from Houei Sai in Houa Khong Province, reported considerable traffic of people and goods across the river, with no documents being shown to immigration or customs

* The southern 8 miles or so of this segment actually are alined along the Nam Huang Nga to its confluence with the Nam Huang.

NND 941536 --- 3745

officials on either side. Thai Government officials reportedly are becoming concerned by the laxity of such local officials and the generally porous nature of the border, particularly in view of the current Communist-supported insurgency festering in the region and the ease with which agents can infiltrate from Laos into the northern provinces.

15. Illegal border crossings are difficult to curtail. The Sayaboury segment of the border is alined along rugged, heavily forested terrain that is impossible to patrol effectively; hence illegal crossings are likely to continue. River segments of the border, too, are difficult to control; both Laotian and Thai Government officials have traditionally closed their eyes to the hundreds of small boats that cross the Mekong daily. Because of the apparent increase in infiltration of Communist agents into its northern and northeastern peripheries, Thailand has drawn up plans to improve security along the border. These plans call for an increase in river patrols, the addition of selected hill tribesmen to existing security forces in the border regions, and the establishment of a buffer zone 5 kilometers (about 3 miles) wide along the Thai side of the Mekong (but not, apparently, along the land boundary with Sayaboury Province). All people of questionable allegiance living within the buffer zone are to be resettled outside the zone.

POPULATION

Distribution and Composition

16. Some 1,500,000 people inhabit the region. The total population and population density of each province are as follows:*

Province	Population Number	Population Density (Per Square Mile)
Chiang Rai	811,771	112
Nan	240,471	53
Uttaradit	259,919	88
Sayaboury	167,350	24

Densities vary considerably within each province; generally, they are higher in the wider valleys and basins that are populated by Thais or Laos and are lower in the more rugged mountainous tracts peopled by tribes such as the Meos or Yaos (see Figure 3). Contrary to popular conception, lowlanders constitute a substantial majority throughout the region. In Nan Province, for example, the Governor estimated that of a total population of about 300,000 in 1967, only 15,600, or about 5 percent, were hill people; approximately 3,000 of these hill people were Meos, the major insurgency force in northern Thailand.** Meos

* Figures for the Thai provinces are from the 1960 census; Sayaboury figures are 1967 census claims.

** There are an estimated 50,000 Meos in all of Thailand.

NND 941536 --- 374

FIGURE 3. Meo family of Nan Province. Note the albino girl. Dark clothing with brightly colored trim typifies the attire of most hill peoples.

therefore account for only about 1 percent of the population of Nan Province. Most of them are clustered in Pua and Thung Chang districts in the northern part of the province, near the Laos border. Hill people presumably constitute about the same percentage of the population in Chiang Rai Province but are fewer in Uttaradit where mountainous tracts, too, are less numerous. In Sayaboury, an estimated 67 percent of the population are ethnic Laos, with Meos comprising most of the rest.*

17. Like the rest of northern Thailand and all of Laos, the region is ethnographically complex. Most people belong to the Tai ethnic group, which comprises chiefly Thais (in Thailand) and Laos (in Laos). The remaining population consists largely of non-Tai hill peoples such as the Meos and Yaos whose ancestors have filtered southward from the southern provinces of China in the past 100 years.** Revolts by these groups against their Chinese rulers and subsequent repressions accelerated the search for unoccupied land to the south. These migrations have about reached their peak, as little unoccupied hill land is left

* There are somewhat more than 130,000 Meos in all of Laos.

** For authoritative accounts of the hill peoples of northern Thailand, see *The Hill Tribes of Thailand* by Gordon Young, Siam Society, Bangkok, 1962.

NND 941536 --- 3747

farther south. In Laos, Meos have made no significant penetration south of 18°N, but in Thailand some have migrated south into Phetchabun, Loei, Phitsanulok, and Tak Provinces.

18. In addition to the Tai and hill peoples, several thousand Haw Chinese live in the region—most of them in Chiang Rai Province, along the borders with Burma and Laos. They moved into the Burma-Laos-Thailand border region from Yunnan Province in China after the defeat of the Nationalist Government in 1949. Most are sedentary farmers; many, however, are engaged in trade—much of it illegal, in opium or small arms. Those in the border area have, in effect, served as a buffer against Communist infiltrations from Laos. With the increase in Communist-supported insurgency in the region, the Thai Government has considered using the former Kuomintang (KMT) Army members of the Haw communities in a more active counterinsurgency role. Most Chinese merchants and traders are found in the Thai towns and villages; few of them live in Sayaboury.

Settlement

19. Urban areas are few and small. Generally they function as administrative, military, and/or transportation centers and provide markets for consumer goods not available in the villages (see Figure 4). Phayao and Chiang Rai in Chiang Rai Province have populations of 18,000 and 12,000, respectively; Nan has a population of 14,000; Uttaradit has 9,000 inhabitants.* On the Laos side of the

* Figures from 1960 census, rounded to nearest thousand.

NND 941536 --- 3795

border, Sayaboury and Paklay have estimated populations of only 3,000 and 2,500, respectively.

20. In the lowlands, villages vary from tiny hamlets of a few families to settlements of several hundred people. Village patterns vary—houses may be clustered in the ricefields (see Figure 5) or strung along a dirt road or stream. Hill villages are small and formless, seldom with more than 200 inhabitants (see Figures 6 and 7). They are abandoned for new sites every 10 to 15 years as soils become depleted and crop yields diminish. The Yaos live at elevations of 2,000 to 3,000 feet; the Meos inhabit the slopes above them, up to 5,000 feet or so.

21. For several years the Laotian Government, with the support of USAID, has operated a refugee relief program for the thousands of hill people displaced by the military and political instability throughout much of the Laotian countryside. Under this program, refugees have been resettled and provided with food, seeds, clothing, and educational and medical services. Some 250,000 refugees—a high percentage of them Meos—received some form of assistance in 1966. Sayaboury Province, because it has been relatively free from PL influence, has resettled many of the refugees.

22. During the past year, resettlement of refugees from hill villages that have been infiltrated by Communist insurgents has become a problem on the Thai side of the border as well. Increasingly, the Thai Government has been evacuating

FIGURE 5. Thai village in valley, Chiang Rai Province. Throughout the region, villages are far more numerous in the valleys than in the hills.

NND 941536 — 3749

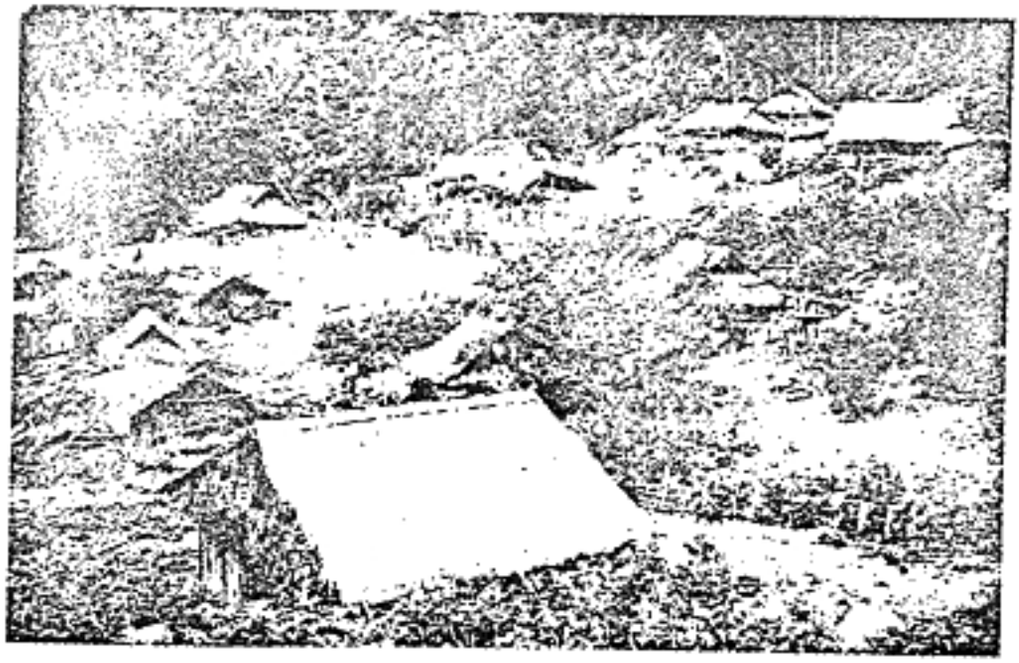

FIGURE 6. Typical Meo village in hills of northern Thailand. The corral is used for horses. Croplands are slashed from forest, commonly some distance from the village.

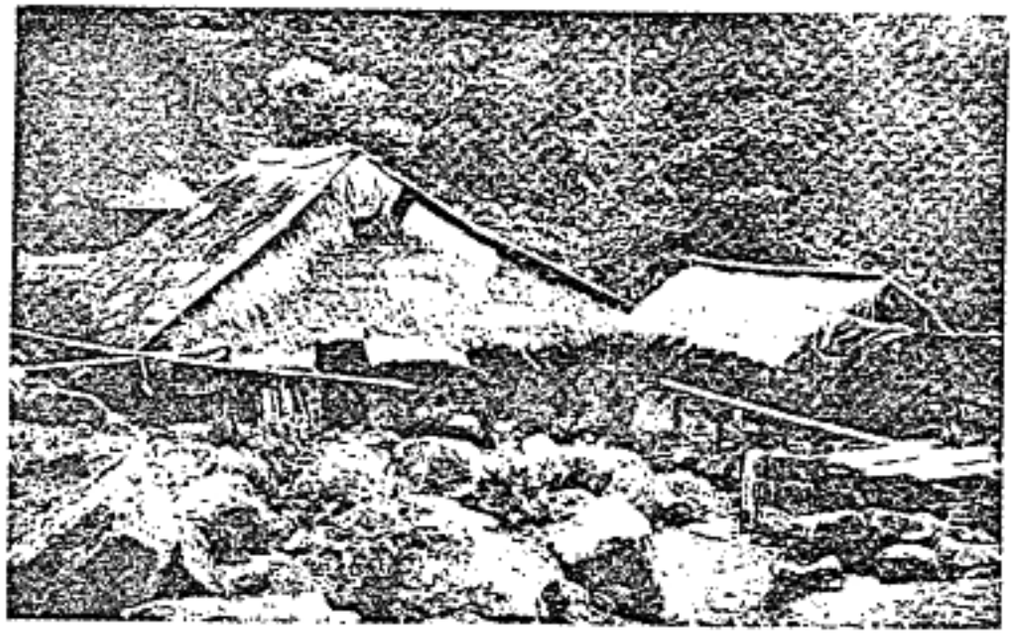

FIGURE 7. Crudely built, windowless Meo house. Flimsy bamboo aqueducts like the one in front of this house carry water down the mountainsides to the villages.

NND 941536 --- 3750

villagers from the border hills of Chiang Rai and Nan Provinces, where insurgency has developed, and has been moving them into resettlement camps. As of April 1968, nearly 2,000 refugees (mostly Meos) jammed the largest of these camps, in a valley near Pua in northern Nan Province. In its early stages resettlement encountered difficulties. Few of the refugees have been satisfied with conditions in the camps, and in June several hundred were reported to be planning to flee into Laos where they hoped they could live free from government interference. Other Meos reportedly fled into Laos after Thai Government reprisals against their villages for pro-Communist activity. Continued Thai Government mismanagement of the hill peoples presumably could produce a flow of such refugees into Sayaboury.

23. Most of the problems with the Thai resettlement program are related to hasty planning and implementation. Poor timing (allowing insufficient time to clear land for planting before the rainy season), inadequately constructed resettlement camps, and overcrowding have been characteristic. Other problems, however, are deep seated and likely to persist. Among these are unfamiliarity of the hill people with lowland agricultural practices, hostility toward their lowland neighbors, and conflicts with these neighbors over land use.

Insurgency

24. The Thai Government, recognizing that the security of the northern frontier region requires the loyalty of the hill people living there, in the past decade or so has undertaken a program to gain that loyalty. The chief vehicle for the implementation of this program has been the Border Patrol Police (BPP), a paramilitary force of some 7,000 men that has carried out civic action projects in the north with US advice and assistance. These projects have included the building of roads and landing strips, the construction and operation of elementary schools and medical facilities, and the provision of limited agricultural assistance. In addition to carrying out such projects, the BPP is responsible for border reconnaissance and security.

25. Insurgency in the northern Thai provinces involves intense ethnic tensions that heretofore have overshadowed BPP attempts to improve Thai-uplander relations. Since early 1967, Communist subversive activity among the hill peoples has eroded much of the civic action work achieved by the BPP and has significantly heightened tension and fear in the area. The hill people are highly independent; usually they are loyal only to the individual village or tribe and prefer to live free from Thai Government controls. They mistrust the Thais and look upon the BPP and Thai Army patrols as intruders. Frequent theft and destruction of property by these patrols have not helped the Government cause. Threats and penalties (including bombing and burning) applied to villages suspected of harboring insurgents have further aggravated Thai-hill people relations. The uplanders feel that laws forbidding the growth of opium and the felling of timber for slash-and-burn cultivation, both of which have been traditional among the hill people, reflect the Thai disdain for their way of life.

NND 941536 --- 3757

26. Communist insurgent leaders have exploited grievances among the Meos by promising to establish a "Meo Kingdom" in which the Meos will be allowed to grow opium and practice slash-and-burn agriculture free from Government interference. In line with these promises the Communists have urged the Meos to take up arms against the Thai "intruders." Several hundred Meos reportedly have been recruited during the past several years and have been taken either to PL-controlled areas of Laos or to North Vietnam for training in subversion. In northwestern Sayaboury the PL have had some success in recruiting Meos to fight against the Royal Laotian Government, largely because Government forces have been unable to provide adequate protection for the Meos against PL hostilities.

27. Ethnic groups other than the Meo are not deeply involved in insurgent activities on either side of the border, although their villages may be used as involuntary shelters or way stations for passing insurgents. Unlike the hill tribes in Laos, whose leaders fit into the governing hierarchy, the Meos in Thailand have little effective voice in the Central Government. In Sayaboury, Meos occupy all of the national administrative posts in their own villages and share with the Laos the higher provincial posts. Moreover, strong Meo leaders in Laos, such as Vang Pao, have effectively organized the Meos into fighting forces, and Meo village defense units have become important adjuncts to the Government military forces. There are no such leaders in the Thai provinces. Little cross-border unity exists among Meo villages; the traditional leaders in Laos have no known authority over Meos living in Thailand.

ECONOMY

28. Nearly the entire population of the region is engaged in agriculture. Sedentary cultivation of wetland rice predominates in the lowlands, semimigratory slash-and-burn cultivation of rice or corn in the hills. Although the region is normally self-sufficient in food, rice has been imported into Sayaboury Province in recent years to feed the thousands of Meo refugees who have been resettled there from other parts of northern Laos. Rice has also been provided for the refugees who have more recently been forced out of the Thai hills by insurgent activity.

29. The only noteworthy occupations other than subsistence farming are opium cultivation and lumbering. Such cash crops as cotton, kapok, and tobacco are grown, but they are not significant money earners.

30. Opium is the primary cash crop for hill farmers on both sides of the border (see Figures 8 and 9). Only a small portion is consumed locally. The value of opium illegally exported from Laos is estimated at some 2 million US dollars, or about twice the value of all legal exports. Opium annually earns the average hill farmer up to 200 US dollars with which to buy rice to supplement his own crop (the average Meo family produces only about half its annual rice needs)

NND 941536 --- 3752

FIGURE 8. Opium poppyfield in northern Thailand. The poppies are usually planted in August and harvested in February or March.

as well as to buy necessary consumer goods. The farmer typically sells his opium to a Chinese trader in the nearest valley town who, in turn, smuggles it on to Bangkok or to Vientiane. Government officials commonly "muscle in" on the operation somewhere along the line.

31. The region has some of the best stands of teak left in Southeast Asia (see Figure 10). Teak grows in mixed deciduous forests up to about 2,500 feet elevation. In the Thai provinces the stands have been greatly depleted by overcutting and conservation measures have had to be implemented, but in Sayaboury logging has been less intensive and overcutting has not been a serious problem. The most extensive stands in Sayaboury are in the south, near Paklay. Elephants are widely used in the extraction of teak logs. In the Thai provinces they haul the logs to a road for truck transportation (see Figure 11) or to a stream where they are floated singly to a point below which the current is slow enough for the logs to be lashed together and rafted downriver to Bangkok. Two or 3 years may elapse between the cutting of the log and its arrival at the Bangkok markets. In Sayaboury the teak is shipped via elephant or truck southward from Paklay to Kene Thao, thence across the Nam Huang into Thailand and via truck to the railhead at Khon Kaen.

32. Much of Sayaboury has closer economic ties with Thailand than with the rest of Laos. The northwestern and southern parts use the Thai baht as frequently as—or perhaps more than—the Lao kip as monetary exchange. Consumer goods for much of the province move up the Mekong from Vientiane or from the Thai river town of Chiang Khan; in the northwestern section, however, they may move downriver from Houei Sai. Some goods are flown in from Vientiane.

NND 941536 --- 3753

FIGURE 9. Meo girl collecting raw opium. Each pod has been incised with a special three-bladed tool, leaving a series of cuts from which oozes the plant fluid. Government attempts to prohibit the cultivation of poppies by hill tribes have generally been ineffective.

TRANSPORTATION

33. The only railroad in the region is a short section of the Bangkok-Chiang Mai line, which passes through Uttaradit in the southwestern corner of the study area. The road net is sparse. Mountainous tracts may be without roads, and valleys may be traversed only by narrow roads untrafficable in rainy weather. Major waterways such as the Mekong and the Mae Nam Nan are important for moving people and goods between lowland settlements, but most mountain

NND 941536 — 375

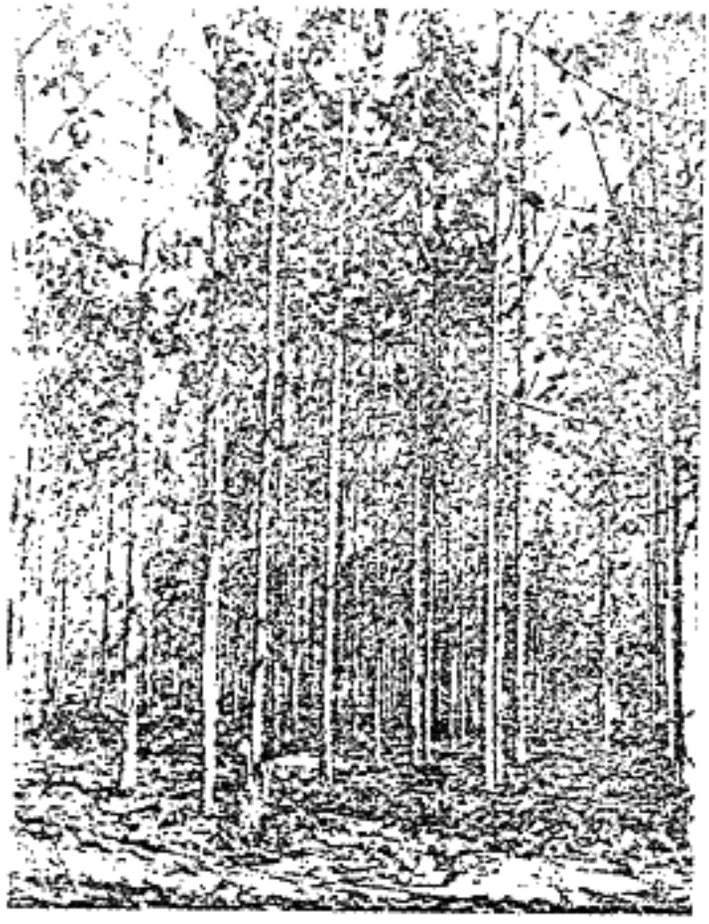

FIGURE 10. Young teak plantation in northern Thailand. Because of overcutting, timber operations have had to be controlled in recent years.

streams are unnavigable by any type of craft. A number of crude landing strips capable of handling short takeoff and landing (STOL) aircraft have been constructed throughout the region. In Sayaboury, many resettled Meo villages depend on such strips—along with cleared areas for drop zones—for much of their food supply.

Roads

(See Figures 12 through 16)

34. The densely forested, mountainous terrain in most of the region precludes the development of an adequate road network. Roads—most of which are narrow, unsurfaced, and motorable only under favorable climatic conditions—serve the lowland towns and villages but rarely extend into the mountains, where footpaths and horse trails prevail.

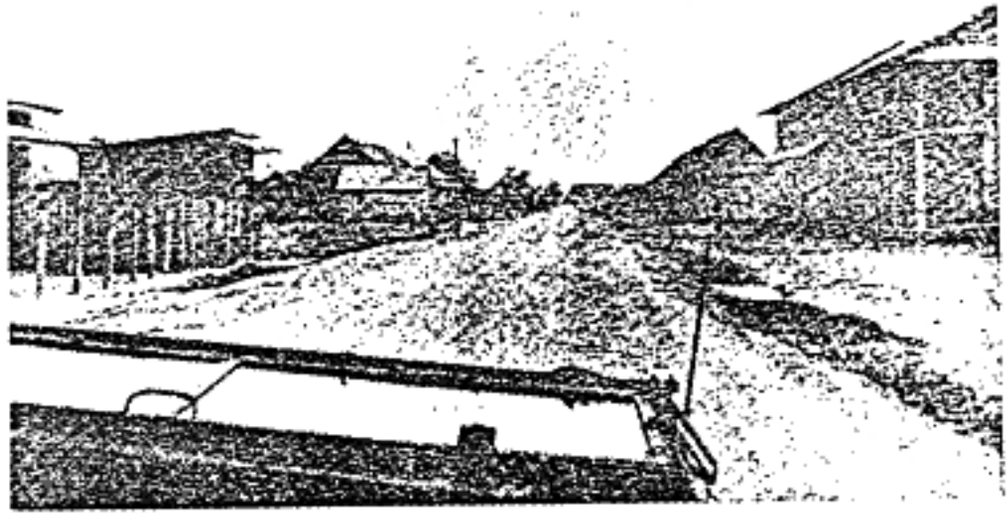

FIGURE 12. Road through town of Sayaboury. This road extends southward for 110 miles to Kene Thao. Because of lack of maintenance much of it may be unusable, even by jeeps, at all times of the year. 1960

NND 941536 --3756

FIGURE 13. Dry-season view of road between Nan and Pua in Nan Province. During much of the wet season, sections of this road become extremely muddy and are impassable to wheeled vehicles. Tobacco grows on either side of the road. January 1963

35. In Sayaboury the road system is particularly underdeveloped. The few existing roads are not integrated with one another or with roads in other parts of the country, and vast tracts are roadless. There is no direct road connection with Vientiane. The Sayaboury road system was more extensive during the French colonial administration, but much of it has since been "swallowed up" by encroaching vegetation. Most of the currently motorable roads have been constructed or improved through a program of the US Bureau of Public Roads operating under the administration of USAID. Of the former French road that extended for 110 miles between Sayaboury and Kene Thao, only the 19-mile segment between Sayaboury and Muong Phieng and the 37-mile segment between Paklay and Kene Thao are currently maintained. Even these are unsurfaced and unusable during much of the rainy season. Other sections may be jeepable during dry weather. The 17-mile road that connects Sayaboury with the Mekong River port of Tha Deua is usable for most of the year. A ferry crosses the river at Tha Deua and connects with a road to Luang Prabang. Another road, completed in 1968, extends for 14 miles between Hongsa in the north and the Mekong port of Ban Tha Soeng.

36. In the Thailand portion of the border region, roads are somewhat better integrated than in Sayaboury; major valleys are served by adequate all-weather roads. Chief among these is the road from Bangkok, which extends through Chiang Rai Province to the border town of Mae Sai, thence northward into the Shan States of Burma. Another all-weather road extends southwestward from Nan into the neighboring province of Phrae and thence southward to connect with the east-west road between Tak and Lom Sak. A fair-weather road con-

NND 941536 --- 3757

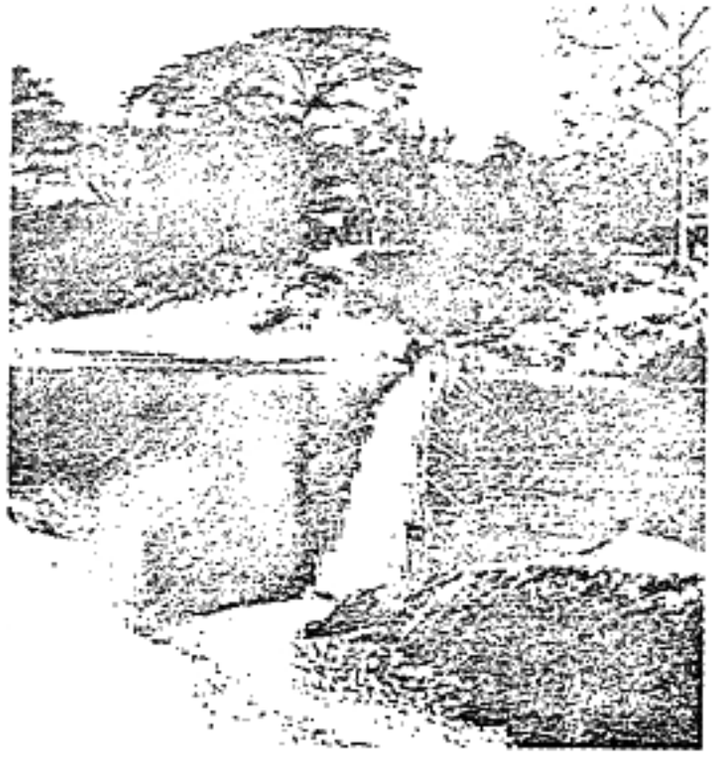

FIGURE 14. Ford and footbridge across Mae Nam Nan on Nan-Pua road during dry season. Deep water and strong currents probably would preclude the use of this ford during most of the wet season. January 1963

tinues northward from Nan along the Mae Nam Nan to a point north of Pua. An 85-mile laterite road goes from Chiang Rai, via Thoeng, to the Mekong River town of Chiang Khong. Some sections may be unusable for brief periods during the rainy season. A number of other unsurfaced roads—many of them built in recent years as part of a US-Thai security program—extend through the valleys of the region.

37. The movement and logistic support of a conventional military force would be severely hampered throughout the region by the sparse, primitive system of narrow, unsurfaced roads with limited capacity to sustain heavy military traffic. Bottlenecks include narrow and low-capacity bridges, sharp curves, steep grades, fords, and ferry crossings with primitive facilities. Vehicles crossing the Mekong between Chiang Khong and Houei Sai, for example, are ferried on a raft supported by two pirogues. All but the few surfaced roads are impassable during much of the rainy season, when they become extremely muddy, bridges wash out, fords flood, ferry landing slips submerge, and roads in mountainous terrain become blocked by landslides, rockfalls, or fallen trees. Off-road dispersal and cross-country movement of vehicles are precluded the year around

NND 941536 --- 3 of 5

FIGURE 15. Laterite road, built with US aid, between Chiang Rai and Mekong River town of Chiang Khong. March 1967

FIGURE 16. Makeshift vehicular ferry constructed from two native pirogues. Ferries like this are typical on the upper Mekong and its major tributaries.

NND 941536 --- 3759

in most areas by steep slopes and dense forest. Cross-country movement by foot troops would be arduous to those not accustomed to travel in mountainous terrain. Difficulty in cross-country movement for both vehicular and foot traffic is compounded during wet weather.

Waterways

38. Rivers are important arteries for the movement of people and goods in the larger valleys. High-powered, maneuverable, shallow-draft launches and long, narrow pirogues ply the Mekong and the Mae Nam Nan as well as the lower parts of their principal tributaries. The Mekong has heavy traffic despite its numerous rapids, gorges, abrupt turns, and other navigational hazards (see Figure 17). It is the principal supply route to the towns of Sayaboury Province. Because of the swift currents and dangerous rapids, steamers cannot operate on the Mekong above Vientiane. Launches, however, can move upriver as far as Luang Prabang during high water (July through November). They are unable to navigate through the more difficult sections during much of the low-water period (December through June),* so through traffic virtually ceases at this time. Local traffic continues, as launches with engines at full speed are pulled through the rapids by men using ropes and cables. Rapids are more numerous between Luang Prabang and the Burma border, and craft are limited to narrow pirogues powered by outboard motors.

39. During high water, motorized cargo-passenger vessels and large river barges towed by tugs can navigate up the Mae Nam Nan as far as Uttaradit, occasionally as far as Tha Pla. Above Tha Pla, vessels are limited to shallow-draft pirogues powered by outboard motors.

Airways

40. Because of the inadequacy of surface transportation systems, air transportation is of major importance in the logistic support of counterinsurgency operations. Facilities within the region, however, are limited. Only one airfield—Chiang Rai—has a hard-surface runway and can handle year-round traffic. Runway length of the Chiang Rai field is 4,980 feet, greatest in the region. Airfields with earth or laterite runways, which may be closed for periods during the rainy season, are located at Uttaradit, Sayaboury, Paklay, and Kene Thao. In addition, a number of unimproved earthen or grass landing strips—many in remote mountainous tracts—can accommodate STOL craft such as the Pilatus Porter or Heliocourier (see Figure 18).

41. Chiang Rai, Uttaradit, and Sayaboury are served by scheduled commercial flights. Weather permitting, Royal Air Laos (RAL) runs three DC-3 flights weekly between Vientiane and Luang Prabang via Sayaboury. Thai Airways has daily flights between Chiang Rai and Bangkok and three flights a week connecting Uttaradit with Chiang Rai and Bangkok. Thai Airways flies DC-3s and Hawker Siddeley 748s.

* High- and low-water periods of the Mekong start 1 to 2 months after those in its tributaries.

Foreword

This memorandum analyzes the pattern of foreign shipping to Cambodian ports to help in determining whether arms or military-related goods are reaching the Viet Cong through Cambodia. It updates CIA/ER IM 68-109, *Shipping to Cambodia in the Second Quarter of 1968*, August 1968, SECRET/NO FOREIGN DISSEM, and is the fifth report written on a quarterly basis.

The time lag between the end of each quarter and the date of publications in this series is the result of delays in the receipt of the *Bulletin of the Mixed Chamber of Commerce and Agriculture of Cambodia*, an important source of data on ship arrivals and cargo deliveries.

The data in this memorandum are preliminary and may be modified as additional information becomes available. For the purposes of this memorandum, Yugoslavia is considered to be a country of the Free World. Cargo weights are expressed in metric tons. The term *imports*, as used in this memorandum, refers only to imports by sea. Because of rounding, components may not add to the totals shown.

INTELLIGENCE MEMORANDUM

Shipping to Cambodia in the Third Quarter of 1968

Summary

There were at least two deliveries of military cargo to Cambodia in the third quarter of 1968. A Soviet ship arrived at Sihanoukville on 31 July with 900 tons of military aid materiel from the Soviet Union, and in September a French ship unloaded tanks and 34 tons of military equipment from Western Europe. A possible military shipment, reportedly 2,000 tons, arrived aboard a Chinese ship in August.

Total shipping activity dropped from the very high level of the second quarter. Ship calls declined from 192 in the second quarter to 139 in the third quarter, and imports dropped from a record 227,800 tons to 134,600 tons, apparently for seasonal reasons. In the third quarter, for the first time in 1968, imports at Phnom Penh exceeded those at Sihanoukville -- by 24,200 tons. Free World ships made 48 fewer calls and discharged less cargo than in the previous quarter. Communist ships, which visit only Sihanoukville, also made fewer calls but unloaded more cargo than in the second quarter. More than 90 percent, or 126,900 tons, of imports came from Free World countries; the remaining 7,700 tons, more than one-half of it unidentified, came from Communist China and the Soviet Union.

Note: This memorandum was produced solely by CIA. It was prepared by the Office of Economic Research and information on ship arrivals was coordinated with the Naval Intelligence Command.

Ship Arrivals and Imports by Sea

1. Ship calls at Cambodian ports dropped sharply from 192 in the second quarter of 1968 to 139 in the third quarter. Most of the decline was in Free World ships, which made 48 fewer calls. Fifty-seven percent of total calls were at Phnom Penh and 43 percent were at Sihanoukville. Imports through Cambodian ports decreased from the record high of 227,800 tons in the second quarter to 134,600 tons in the third. This drop appears to be largely seasonal as imports have fallen to about 130,000 tons in the third quarter for three consecutive years. Imports of cement, petroleum, and coal all declined.

Shipping to Sihanoukville

Ship Traffic

2. Ship calls at Sihanoukville decreased from 101 in the second quarter to 60 in the third quarter. Free World ships -- mostly French, Panamanian, Greek, Japanese, and Liberian -- made 54 of the 60 calls (see Tables 1 and 2). Eight of these calls were by ships under charter to Communist China. There were six calls by Communist ships: three Chinese, two Soviet, and one Polish. Two Communist ships -- one Soviet and one Chinese -- arrived in ballast to load lumber and rice for North Vietnam and China. The other Chinese ships discharged foodstuffs, unidentified cargo, and a possible consignment of ammunition. The second Soviet ship delivered military cargo, and the Polish cargo liner unloaded cement.

Imports

3. Seaborne imports to Sihanoukville fell from 128,500 tons in the second quarter to 55,200 tons in the third quarter, the lowest level of imports since the third quarter of 1967. The absence of asphalt, coal, and petroleum imports accounted for most of the decrease. The petroleum deliveries in the first two quarters were mostly diversions occasioned by closure of the Mekong River. Crude oil imports to Sihanoukville are anticipated in the fourth quarter after the new refinery near the port is opened.

4. The composition of imports to Sihanoukville during the first three quarters of 1968 and the

third quarter of 1967 is shown in the following tabulation:

	Thousand Metric Tons			
	1968			1967
	1st Qtr	2nd Qtr	3rd Qtr	3rd Qtr
Military	0.3	Negl.	0.9	--
Cement	48.1	32.1	15.9	20.2
Chemicals and explosives	1.1	3.5	0.7	1.4
Foodstuffs	5.4	7.5	6.2	2.6
Metal products	10.4	2.4	10.2	0.5
Jute	4.3	--	--	--
Coal	13.2	14.0	--	--
Asphalt and pyrites	--	3.4	--	--
Other general cargoes	3.7	8.0	9.1	4.4
Unidentified	31.5	39.9	12.2 a/	11.0
Petroleum	38.3	17.6	--	--
Total	*156.4*	*128.5*	*55.2*	*40.1*

a. Includes possible military cargo delivered by the Fo-Shan *and an unknown tonnage of tanks delivered by the* Nausica.

5. Only 7,700 tons of cargo -- 14 percent of total imports to Sihanoukville -- arrived directly from Communist ports during the third quarter, compared with 28,000 tons in the first quarter and 32,400 tons in the second. The largest portion, 6,800 tons, came from Communist China, and the remaining 900 tons came from the USSR. Imports from China included medicines, foodstuffs, chemicals, and metal products; imports from the USSR consisted almost entirely of military cargo. Sixty tons of additional cargo of Soviet origin -- mostly chemicals, metals, and general cargoes -- were delivered to Sihanoukville after transshipment at Singapore.

6. Imports from Free World countries dropped from 96,100 tons in the second quarter to 47,500 tons in the third quarter, less than one-half the average for the first two quarters in 1968. Approximately 80 percent (37,000 tons) of these cargoes were

loaded in Asian countries, and the remainder (10,500 tons) came from Western European countries (see Table 3). Deliveries from the Free World included foodstuffs, chemicals, and cement from Singapore, India, Western Europe, and Thailand; and metals and other general cargo from Japan, India, South Vietnam, Western Europe, and Singapore.

Military and Military-Related Cargoes

7. At least two military shipments -- one from the USSR and the other from Western Europe -- arrived in Sihanoukville during the third quarter. The Soviet ship *Svoboda* arrived on 31 July and unloaded 900 tons of military equipment, the initial installment under the new agreement signed with the USSR in February 1968.* The cargo, variously reported to include MIG aircraft, armored personnel carriers, artillery, and ammunition, was transported to the Pochentang military airbase at Phnom Penh and to the Longvek supply depot. In September, the French ship *Nausica* delivered civilian goods, an unknown quantity of tanks, and 34 tons of tank tracks from Western Europe. The Chinese ship *Fo Shan* reportedly delivered 2,000 tons of military cargo from China in August. Although it is possible that some ammunition or small arms were discharged, the evidence is tenuous and the actual amount is unlikely to have approached 2,000 tons. Small quantities of military-related goods -- medicines and dry cell batteries -- were delivered to Sihanoukville in the third quarter.

Unidentified Cargoes

8. Seventy percent of the 12,200 tons of unidentified cargoes discharged at Sihanoukville came from Communist China (4,460 tons) and other Asian countries (4,080 tons). The remainder was loaded at Western European ports (3,370 tons) and Yugoslavia (250 tons). Some of the commodities -- mostly metals and automotive parts -- have been identified, but their quantities are not known.

---

* *The second delivery under this new aid agreement arrived on the Soviet ship* Partizanskaya Slava *on 11 October. The shipment consisted of 217 cases (12 tons) of unidentified military equipment.*

Shipping to Phnom Penh

Ship Traffic

9. Ship calls at Phnom Penh declined from 91 in the second quarter to 79 in the third quarter. Forty-nine calls were made by tankers and 30 calls by dry cargo ships. Ships of six Free World countries called during the quarter, but Panamanian and Japanese ships predominated, accounting for almost two-thirds of the arrivals (see Table 2).

Imports

10. Imports to Phnom Penh dropped in the third quarter to 79,400 tons but were well above first quarter levels (see Table 1). As shown in the following tabulation, imports of petroleum accounted for most of the decline in total imports:

Thousand Metric Tons

	1968			1967
	1st Qtr	2nd Qtr	3rd Qtr	3rd Qtr
Petroleum	26.5	73.4	56.4	59.4
Metal products	4.3	3.9	1.1	5.3
Foodstuffs	--	Negl.	2.3	0.4
Asphalt and pyrites	2.6	--	0.6	--
Chemicals and explosives	Negl.	1.0	0.4	1.3
Cement	6.3	0.3	5.5	4.8
Other general cargo	0.9	3.0	1.6	2.2
Unidentified	5.7	17.7	11.3	17.1
Asbestos	--	--	0.1	--
Total	*46.4*	*99.3*	*79.4*	*90.4*

11. Deliveries of petroleum, which made up 71 percent of total imports to Phnom Penh, fell from the abnormally high level of 73,400 tons in the second quarter to 56,400 tons in the third quarter. Japanese, French, Cambodian, and Panamanian tankers delivered most of the petroleum from Shell storage facilities near Saigon and from the Esso storage facility on the Indonesian island of Bintan. Dry cargo ships delivered more than 2,000 tons of petroleum in drums.

12. Imports of dry cargoes through Phnom Penh (23,000 tons) were slightly below those in the second quarter of 1968 (25,900 tons). All of them were carried by Panamanian, Singapore, Japanese, and Somali ships. More than two-thirds (16,200 tons) of these cargoes came from Singapore and Japan; the remainder (6,800 tons) came from Hong Kong.

13. Fourteen percent (11,300 tons) of the cargo discharged at Phnom Penh was unidentified. All of it came from Southeast Asia.

SUBJECT: Possible ChiCom Adventure

Following points may be related:

a. Soviet area coordination/communication center in Phnom Penh is loaded with middle level agents who express worry that China is going to expand initiatives in SEA.

b. Increased Burmese and Thai nervousness about ethnic Chinese dissident groups and their encouragement by Peking, and the increased vitriol in anti-Burmese, anti-Thai propaganda.

c. Chinese road building in N Laos.

d. Increasing NVN-PL military activity in North and Central Laos may be coordinated with c. above.

e. Increased NVN attacks in SW Laos may be aimed at opening trans-Mekong Laos to PL-NVN troops supplied thru Cambodia-Mekong routes. This action would put NVN and Chinese on the North, Northeast and Southeast flanks of Thailand.

f. Sihanouk is getting worried about the Chinese and NVN "camels in his tent," looking for an accommodation with the US.

g. Withdrawal of Chinese laborers from NVN makes them available for use elsewhere.

h. The instability of the ChiCom governmental structure is becoming more evident, with the Red Army now providing the principal bond of order and administration in China, heightening its influence.

APPROVED FOR RELEASE
MAY 27 1997

SECRET

i. ChiCom reinforcement of the Northeast Frontier Provinces of India, and Indian reinforcements there in the last two months.

Except in Tibet, which has been quiet for some months now, the ChiComs are stirring. A cross-border military adventure now from interior lines, would find India, Burma, Thailand and Laos unable effectively to respond. It would divert internal ChiCom pressures to external "threats," would let the Red Army have a good "exercise" and, unless done against S. Korea, the GRC or Soviet Mongolia, would be unlikely to draw more than protests and alerts in response. The US is in no mood for broader involvement in Asia, and only to defend US forces in Thailand against overt attacks would broader involvement in SEA gain sure public support in the US.

Accordingly, the current NE Monsoon season looks like a good time for a ChiCom cross-border excursion into SEA, particularly in NE Burma and NW Laos. Although their progress in SEA insurgency is going along well enough, and there is no apparent reason for such an excursion, the probability is, in my view, nonetheless considerable.

NR

[redacted]

Insurgent Activity Gains in North-Central Thailand

The recent upsurge of Communist activity in the north-central area is a fresh reminder of the difficulties the Thai Government faces in bringing insurgency under control.

Security has deteriorated rapidly in the Phitsanulok-Phetchabun-Loei border region, where only three months ago there was no overt insurrection. Guerrillas successfully attacked a government hill-tribe training center in late November and since then have almost continuously harassed police and military units. For almost two weeks, the guerrillas have been beating back efforts to evacuate provincial police platoons surrounded in two tribal villages. At least one helicopter has been shot down as it tried to resupply the beleaguered men.

[redacted]

NND 941536 ---

[redacted]

It is not clear how many insurgents are involved in the north-central offensive, or whether they have been augmented with elements from Laos. The tenacity, skill, and planning that the insurgents have demonstrated, however, make this their best effort since the Thai insurgency began four years ago and suggest that veterans are leading the insurrection.

The guerrillas are disrupting the government's embryonic village security programs, and the already tenuous hold of the government on the allegiance of the tribal people has been further weakened. Government reaction thus far has been limited to sporadic air strikes and piecemeal reinforcements. A new joint command headquarters has been set up in the area, however, in an effort to improve coordination among the various security elements operating there.

The reverses the government has suffered in the north-central region over the past month have had a strong psychological effect that may be prolonged. Rumors among the Thai population in the area about other impending guerrilla attacks reveal a sense of insecurity and foreboding that the Communists have failed to generate elsewhere in Thailand. Strong racial feeling has also been whipped up by the fact that the insurgents are largely Meo tribesmen.

The difficulties the Communists have been encountering in the northeast, where insurgent activity is still at a low level, may be one reason that Communist efforts in the north and north-central areas have increased. Although the Communists probably believe that the future of the insurgency will not be decided among the tribal people, they may calculate that dramatic progress in the tribal areas will provide a needed sense of momentum for their over-all effort. NND 941536 ---32

SAIGON BASE
MONTHLY REPORT
JANUARY 1969

I. GENERAL

1. The new year started off rather badly with an increased accident rate and decreased flying time. The overall activity is effected by the flight time level which has decreased to 8,923 hours. The month of February is expected to be considerably lower.

2. The decrease in USAID flying is believed due to the uncertain future resulting from the fact new policy lines have not been laid down, and many bureaucrats wonder if their jobs will survive an expected reorganization.

3. Both customers have indicated the flying will be further reduced to the minimum order quantity which will establish a flying level around 600 hours per month.

4. With the approaching of "TET" there are increase tensions resulting from continued exposure to the fact the VC can, and do move equipment around Vietnam. The increase in terrorist activities in town and other factors connected with living in Saigon does have an effect on the intangible factor called "Morale".

II. FACILITIES DEVELOPMENT

1. Facilities Development continues at a slow pace due to the customer budget. The surfacing of the West Ramp is progressing on schedule. All other projects are minor, and are being cleaned up as rapidly as possible.

2. The Operations and Administration building have been turned down by the VN-41 customer pending negotiation of the follow-on contract.

III. FLYING

January proved to be a most tragic month - safety wise. We suffered four major accidents with one aircraft completely destroyed, twelve fatalities and three injured. This is not impressive, we are taking a good hard look at our policies and procedures to preclude recurrence.

2. Flight time is most variable and unpredictable throughout. With the input of four more Volpars the dropping from contract of more airplanes we now have 23 spare aircraft on station. It would seem that with so many aircraft off contract there should be a marked reduction in time. The lowest group for the month were the C-46's. Forecasting of program flying time, and planning for manpower requirements is getting to be a ticklish proposition.

The local situation is very quiet. The biggest threat to life and property is the vehicular traffic. Here we have been fortunate, no traffic accidents reported.

3. The Flying Department has operated a full month in new quarters. Though it seems as if there was no great increase in space, it is much quieter and much less pedestrian traffic in the offices. Overall it is an improvement.

4. The Beechcraft Program turned out good the month of January Projected time for the month was 1677 hours. Actual time for the month was 1688.07.

At the present time we have 9 aircraft on contract. 7 on VN-41, 1 on 4395 and 1 on 0005. During the month, spare aircraft was used on many occasions. During the month of January Beech pilots spent 245 days at outstations and average of 11.1 days per pilot.

5. The morale for the most part is very good. Customer relationship between the pilots has been complementary in all instances.

Beechcraft flight time will drop to contract hours or below in Feb. due to a short month and unforeseen activities during TET.

6. The C-46 fell 128 hours short of the projected flight time for January. Average time for captains was 72 hours, three captains were under 70 hours for the month. With only four aircrafts on contract the program should stay about the same for the next month. One interim check was given and a confirming check by MFSD was accomplished later in the month. If the time for the program doesn't pick up there will be little, if any, overtime for the pilots assigned.

7. The C-47 program finished up 255 hours less than forecast. All captains except two involved in accidents were on overtime. Average flight time was 90 hours. Next month should be a bit less as the VN-41 customer has dropped two aircrafts from contract. There were two accidents during the month 6147 struck a bundle of PSP at V260 and sheared the right main gear. 949 crashed north of Danang in bad weather killing all aboard.

8. Actual PC6C fleet time of 1714 hours for January was down 300 hours from forecast time. This appeared to be primarily due to a lack of requirements by the customer rather than aircraft availability.

There were (29) pilots assigned during the month with the average pilot time being 74 hours. One pilot resigned during January and February manning level will thusly be (28) pilots. This in conjunction with an anticipated pick up in customer usage should raise the average pilot time to 90-85 hours.

9. The customer (4395) again raised the issue of airdrops in the I and II Corps area. Our capability was made known to him and only the requirement for and scheduling of, remains.

Pilots have all received copies of, and briefings on, actual aircraft ACL's and the techniques of reduced fuel loads in order to increase payloads. This should be advantageous to all concerned.

10. Pilot confidence is somewhat at a low ebb due to the occurence of two engine failures in one month. Morale remains high but would be even better could the actual cause of these engine failures be determined. It is difficult to "sell" the program and induce confidence in the customer and passengers when all concerned are aware of the two mishaps.

Several occurences, including the recent visit of Flight Standards Examiners, seems to confirm a high level of training on the aircraft and procedures, and it is felt that during this year we will be able to continue to improve.

The year 1968 was a good year for the 204B program in Saigon. The total time was 16,565 hours, or an average of 60 hours a month over maximum contract time. The average flying time per aircraft was 180 hours a month. This in itself is a real tribute to the maintenance department. Average time per pilot was 892 hours for the year, which of course, made them happy. So now that 1968 is behind us we can start working to make 1969 an improvement.

11. January has not gotten the year off to a good start. Time for the program in January is about 1300. The loss of time is due mainly to the cutback by both customers. It appears they have a crash program on to reduce the cost of operation.

12. The AMF/MFSD/RW spent a week in Saigon this month. He was kept quite busy with 13 proficiency checks and 2 initial captain proficiency checks. Three route checks and one SIC check were given during the month. Ground school was held on the 10th and 11th with seven pilots attending. This brings the program up-to-date.

One first officer was transferred to Saigon from Udorn this month. He has been SIC qualified and is flying on the line. Two first officers were upgraded to captain and are now receiving their 25 hours of supervised line training. The two remaining F/Os are progressing normally and should start training for their captain's check ride in the very near future.

January's pilots meeting was held on the 15th with 15 pilots attending. The rest of the pilots were briefed throughout the month.

The morale of the pilots is very good. For the most part all the pilots have been kept busy. Busy people are happy people.

IV. OPERATIONS

1. January flight time was 428 hours less than the forecasted figure. More emphasis will be placed on customer minimums when compiling future flight time forecasts in expectation of forecasting a more accurate report. We predict revenue hours will be in the vicinity of 8,000 a month from March thru June. Volpar flight time will increase while Beech time will decrease proportionally.

To relieve our OM shortage FIC is sharing the night duty for one half of each month. This system will release CM [redacted] to work office hours 8 days/month.

. The completion of the new FIC office has been delayed so it will robably be the middle of March before FOD can expand to what is resently FIC.

hree FOD personnel will be trained as Ramp Coordinators in February. his should reduce the number of delays as the OM can switch the ircraft or change the schedule if he knows, in advance, of a problem.

: (a) Flight time report (See Attach. A)

: (b) Accidents & Incidents (See Attach. B)

: (c) Flight Time Information (See Attach. C)

: (d) Flight Frequency (See Attach. D)

3. Communications. COMENG visited Danang and Nha Trang during the month in connection with the Motorola remote systems installation at both stations.

The 620 Tac Con Sq. [redacted] have no objection to our co-locating our equipment within their facilities and have indicated this in a formal letter to Hqs Seventh Air Force. The Seventh Air Force in turn has assigned us rack no. 21 for our equipment and pole no. 7 for our antennas. In a letter to CINCPACAF (DEPPN) they recommended approval of their action and requested CINCPACAF to effect appropriate co-location agreements with Air America. However, they stated in part that although "CED 1722.2 outlines the provisions for an agreement when other government agencies are involved but... no guidelines for civilian agencies..."

4. In light of the above we prepared a letter for BM-SGN addressed to Hqs Seventh Air Force and CINCPACAF, among others, citing a letter from the Judge Advocate's office, Clark AFB to SZ-CIA which rendered the opinion" ...Air America constitutes an agency of the Government for the purpose of ...contract". Further, we pointed out that Air America operates in Viet Nam as a contractor exclusively and solely to agencies to the U.S. Government. It is hoped this will enable them to reach a favorable decision more rapidly.

5. The installation at Nha Trang was completed during the latter part of December. However, it has experienced some difficulties of a minor nature. But minor troubles in Nha Trang tend to become major ones due to the problems involved trying to reach Hon Tre Island. If a chopper is not available the Motorola technicians must take a ferry across to the island and thence a jeep to the top of the mountain - and all this is very time consuming. SZ-NHA has promised to aid as much as possible. Personnel of Det. 11, 619 Tac Con Sq. at Hon Tre and their parent organization at Tan Son Nhut have been most cooperative

6. Letters were written to MACV J6 and Posts and Telecommunications via both customers seeking allocation of HF frequencies to Air America as sole user. To date no response has been received but we are hopeful of a favorable decision from both agencies.

7. We have contacted Motorola concerning a lease/maintenance contract for equipment to be used on a ramp control net. We have dicided that Motorola Model PT-300 Series walkie-talkies will fill our requirement. Specifically, the unit is P 33DEN-1100, 5 watt, FM, solid state, 132-174 MHz, with integral charger. We will utilize 147 MHz which has been allocated to us for this purpose. The EK 212s presently in use will be assigned to Nha Trang and Da Nang. The unit sells for $884 but leases for $30.32 per month. The integral charger costs $176 and leases for $6.40. Thus twelve such units could be installed, leased and maintained for approximately $5,000 per annum. Authority to lease would be based on the same legal opinion handed down by Judge Advocate's office, Clark AFB. In face, the above cited opinion was rendered in a similar contract agreement between Motorola and SZ-CLK. An AR will be submitted shortly for Management's approval.

8. The TR-35 unit installed in Can Tho for communications with RMD, Saigon Base has been only marginal. We are utilizing 5529 KHz but a great deal of fading is experienced. SCM has cable ordered crystals for 9818 KHz and we will try this higher frequency in hopes that it will solve the problem.

A/SZ-DNG has received four TR-20's from VN-41 customer for an intra-city net. Crystals will be ordered shortly.

9. SCM has been given loop resistance readings and other technical data relating to our commercial and military mainlines by Posts and Telecommunications and 1879 Signal Company. This information will be forwarded to Purchasing Agent, TYO via MCRD. This data is required by CKI for the fabrication of our PABX.

10. Statistics :

	Dec	Jan
Incoming	1,560,923	8,870
Outgoing	141,116	12,273

V. TRAFFIC/USAID

1. Statistics:

	Cargo (including AF Caribout A/C)	
	Dec	Jan
Outbound (lbs) SGN	1,560,923	1,307,416
Inbound (lbs) SGN	141,116	91,821

VI. TRAFFIC/AAM

1. Several SOP's have been written regarding the general management procedures of a Base Traffic Section. More are in the offing and upon completion it is the intent to incorporate them into a Base Traffic Management Handbook.

2. In an effort to comply with the 9 hour maximum overtime per week restriction and to reduce even further the CTO program, the Traffic Section will operate from 0630 thru 2100 daily with no around the clock coverage. The building security will now become the responsibility of the security Section during hours 2100-0630 effective 01 February 1969.

3. Some difficulty is being encountered in the control of the time cards. Although it is felt that a considerable cutdown in the number of false entries has been made it is known that some fraud is still going on but efforts are being made to rectify the situation. The BM has agreed to place the time cards and a time clock with the Traffic complex as soon as the new clocks arrive (anticipated April receipt). This should then allow sectional control of the personnel and alleviate this present problem

4. Statistics:

	Dec.	Jan
Passenger departures SGN (All Contracts)	5277	5534
" arrivals " (All contracts)	6181	6439
Outbound cargo	104,632	70,566
Inbound cargo	133,068	151,537

VII. GROUND TRANSPORTATION

During January, 10 microbuses were in commission daily.

Statistics: Aggregate Microbuses Mileage

X-4033	3215 Km
X-4034	3367 Km
X4035	2141 Km
X-0417	3232 Km
X-0418	531 Km
X-0419	3048 Km
X-0420	2861 Km
X-1140	2516 Km
X-1141	3021 Km
X-1142	2883 Km
	24835 Km = Approx. 1521 miles

Total microbuses down-time: 201 hrs.

Total microbuses pas carried: 5821 pax

Isuzu bus mileage:

X-01057	2330 Km
X-01058	2675 Km
X-04329	2834 Km
	7839 Km = Approx. 4899 miles

Supply vehicles mileage:

EB-8176	1987 Km
EB-1780	1246 "
EC-7953	166 "
	3399 Km = Approx. 2124 miles

Supply vehicles down-time: 89½ hrs.

3 wheeler mileage: X-04328 33 Km = Approx. 20 miles

3 wheeler lambretta down-time: 21 hrs.

Grand total pax carried: 19975 pax.

VIII. HOSTEL OCCUPANCY

1. During this month, 163 beds (including SRSD's bed for 11 days) were available. Total of beds occupied: 103
Occupancy rate : 63.5%
Non-availability slips issued: 6

IX. PERSONNEL

1. Incoming Personnel: a. US : 8
b. TCN : 7
c. VN : 19

2. a.) Resignation - 1. US : 3
2. TCN : 3
3. VN : 12
(None for mil. service

b.) Separation - 1. US : 3 (2 surplus, 1 fixed term contract)
2. TCN : 1
3. VN : 4

c.) Transfer - TCN : 2

d.) Deceased - 1. US : 2
2. VN : 2

2. The big departure from routine activities was the time spent with DTT and various USAID and Vietnamese government officials discussing the possibilities of establishing an aircraft line maintenance course for Vietnamese citizens at Tainan. All concerned expressed a great deal of enthusiasm over the prospects of such training, and advised that they would assist, to the extent possible, in obtaining passports and visas for the trainees selected (the largest stumbling block to this proposed program).

3. Total number of personnel, by nationality, at Saigon, Nha Trang and Danang (See attachment E).

X. MEDICAL

1. Number of sick call: There were totally 1975 sick calls in the month of Jan.

2. Accident - There were totally 140 accidents, six of them were more serious and one of them was fatal - causing the death of an employee [redacted]. Carpenter [redacted] was transporting 3 pieces of 1/4" x 4' x 8" plywood from the RCAD Supply to the new personnel building under construction on a 4 wheel forney type cart. [redacted] asked [redacted] to sit on the phywood who was returning from the payroll window of Accounting Office. This is the normal way of transporting lumber and plywood. While enroute the two men passed about 126 feet behind Porter A/C N153L which was running up its engine. [redacted] was flipped down to the ground from top of the plywood by the force of air. He was immediately taken to the Base Clinic, and was unconscious. He was then sent to Seventh

Day Adventist Hospital right away. He passed away in the morning of January 22, 1969. Cause of death given by the hospital was "Basilar skull hemorrhage with subarachnoid bleeding"

3. Hospitalized sick call - None
Hospitalized accident - 3
Unhospitalized accident - 137
Outcall - 4
Physical examination: 1 Flt. crew phy. 30
2 Pre-employment phy. 9
2 Accident flt. phys 2
Total: 41
Sanitation: Cafeteria - Satisfactory
Toilet - Fair
Vaccination: 50
Total man days lost by reasons of sickness: 287½ days
Total man days lost by reasons of accident: 85 days

XI. TECHNICAL SERVICES

1. The year has started very badly with a very high accident rate. One PC-6C ditched in the ocean, one C-47 crasshed into a mountain, another C-47 hit a bundle of PSP on landing and had the right MLG collapse on touchdown, another PC-6C had engine power loss and crashed. There were a few ground accidents which added to an already costly month.

2. We were honored by visitors from MMB; Director of Shops, Technical Assistant to VPTS, Manager Powerplant Dept and Director Technical Training. Three out of the four men had never previously visited Vietnam, so considerable benefit should be realize at both ends. Some very good suggestions were received from these men and improved support to us was promised. It is always an eye opener to see the daily problems that personnel in the field must resolve, when parts are not available, or parts are received in an unserviceable condition from MMB, observing conflicting manuals/procedure sheet information, and lack of test equipment/facilities. Out beg, borrow or swap activities that result from the N.I.S. status with aircraft parts always amazes people who are accustomed to the MMB Supply and overhaul shops capabilities. A ceiling fan swapped for a 204B stainless steel firewall, three bottles of booze to use the heat/treat furnace at USAF Shops, ten gallons of paint for a new 204B overspeed governor, a bottle of scotch to get a tail rotor hub magnafluxed, four pieces of plywood to repair a T53 fuel control, a case of sirloin steaks for a 205 tail boom etc.. This approach is frowned upon by some but is forced upon us because of a lack of spare parts. In most cases the stock level is adequate but cannot bemaintained by MMB Supply. This is particularly true with 204B parts.

3. Considerable efforts and progress was put into improving our ground handling practices and reducing incidents. All concerned RMD personnel are going through a complete recertification for engine run up, towing and taxiing. This includes written examinations in all phases of new and old qualifications. Every skilled and unskilled man in the RMD Ramp Crew will attend a ground (ramp) safety course. All personnel are being

reviewed for Company driver license needs and qualification.

4. The West Ramp resurfacing project is moving along at a steady pace and we are still hoping the contractor can beat his deadline for completion of 1 April 1969. Being unable to park some ten (10) of the larger aircraft on the West Ramp plus the fact that we have about ten (10) large aircraft on station but not assigned to a contract and four (4) more Volpar Aircraft have been assigned to Saigon does not help us to reduce ground handling accidents/incidents. Verbal and written requests have been made move some of the spare aircraft out of Vietnam. "Ramp Saturation" is a very appropriate term to describe the situation we have at Saigon.

5. RMD/FW dispatched 1,256 flights during the month of January 1969. This is up some from last month. The maintenance delay factor went down again this month. If the tfend keeps going like it is, our delays will soon be down to an acceptable level.

From the total of 1,256 departures, only 23 delays could be attributed to maintenance. This is a fair record and we are striving to improve on it.

We had 18 engine changes for the month of January. Of these 18 engines, only one was a scheduled change. There were 11 Garrett TPE 331 Turbo Prop engines changed and the other 7 were reciprocating engines of one type or another. The reasons for the unscheduled engine changes were varied and no pattern was followed.

Out station recoveries this month were 10.

6. Approximately 1,450 rotary-wing hours were flown during the month with no major problems, but we are finding it rather hard to keep the choppers flying on N.I.S. slips. Also some parts drawn from Supply are not acceptable for various reasons, these are being returned to MAB with an attached memo to DQC explaining the problems. Numerous parts had to be "procured through local source" to prevent extended down time of helicopters. The engines that have been extended to 2,000 hrs are now nearly out of time again, so in the very near future Saigon will be in need of a couple engines. We do not have a spare engine at this time at Saigon.

7. The overall shop activities remained on an even par, with the exception of an increase in overtime in the Sheetmetal Shop, and an accident on 11 January 1969, when C-47 number 147 sustained major damage to the right main landing gear, hitting a stack of PSP and then collapsing.

Depending upon Air Vietnam, Continental Air Service or the U.S. Air Force should be reduced to a minimum. The skill level of our mechanics in the shops is relatively high. The proverbial weak link in the chain of production is lack of tools. Motivating our own personnel into putting forth that extra effort when the pressure is on is not very difficult but depending upon other outfit to meet our schedules in another story.

8. The New Year has got off to a good start in Quality Control. The month of January went by in a very routine manner with the normal types of problems being uncovered.

9. General Maintenance : Renovation of the old GMD Carpentry Shop is nearing completion. The Toilet facilities are presently being installed. The major set back now are the electrical fluorescent fixtures being procured out-of-country. These have been on order since the 23 December 1968. As soon as these light fixtures arrive, AAM Personnel and CAT Ticketing Offices will be moved into the building.

Renovation of the new FIC office, AR No. 8089 is underway and is about 85% complete.

Power cable which was installed in underground conduit since 1965 were pulled out from the transmitter room towards the Traffic Terminal junction box to reinstall a 50 pair communications cable. Other power cables in the conduit, not in use, will be pulled as soon as possible.

A bench grinder was fabricated in the GMD Welding Shop using a spare motor from Supply and will be put into service as soon as painting is completed. The Welding Shop is still overloaded repairing damaged and cracked Tow bars and work stands.

All RGMD Departments were kept busy this month due to many CWRs and urgent projects going on. GMD has fabricated a large steel rack to accommodate pipes, angle iron, G.I. sheets and other assorted steel for various projects. Also being fabricated this month is a Lathe Machine which will be used to turn down brake drums and fabricate motor bushings. This will save considerable time and expense now incurred taking than downtown. A hydraulicly operated fire escape is nearing completion to be installed at the rear of the RMD Shops building. Both Lathe Machine and fire escape were designed by Oscar V. Bernardo SPMD/SGN.

A concrete fundation has been poured for Saigon's new 60 KW emergency power unit. The power unit will be installed on it as soon as the concrete has sufficiently curred.

Utilities:

(a) Base power plants - Nil

(b) City power - Invoice not yet received

(c) Base water consumption:

1. Potable water VN$70,250.00 (for 1-15 January)
2. Commercial water - Bill not yet arrived

10. Facilities Development: The Utilities Tunnel is approximately 63% finished. We are experiencing some difficulties due to the fact that the backhoe being rented broke down. We expect it to be back in operation in the next couple of weeks.

The connecting of pipe outlets and vents are being installed on the 5000 gallon kerosene tank located at the back of the GMD Shops.

ary was the most successful month to date in our Technical Training program. emphasis being placed on [redacted] training, many of our department heads i people for various training and many courses were started. The Helicopter cs Course finished its first group of 10 men; the Vietnamese Ramp Service is in progress; a course for GTD drivers has turned out two classes; the AES quipment Course was completed with 5 AES Mechanics; a Ramp Service and Ground ng Course is being given to all personnel that work on and around the ramp; A Airframe and Powerplant students are on their last course subject and will he FAA written examination in March.

echnical Training department has acquired a section of shop space that now .ts us to OJT students in shop courses. Tools for sheetmetal and general anic training are on order and as soon as received, a sheetmetal course for [redacted] will be started. The DTT visited Saigon; the purpose of his [redacted] was to interest the Vietnamese Government in permitting [redacted] to go to Tainan for advanced training. With our expanded local training, plus nan Aircraft Mechanics Course, Air America will lead in the training [redacted] sonnel within the field of aviation.

. Supply

new POL monthly report in Stock Control will indicate total receipt and daily ssues of mobile gasoline, diesel fuel and kerosene in addition to the monthly eport on mobile jet oil. With the new set up of Bien Hoa and Cantho station, otal 102 line items of parts and equipment have been shipped to Bienhoa; 269 line items of parts and equipment was shipped to Cantho station (Project 55555) as an initial support. The procurement function has experienced about the same work load as that of the last month. To place a more tight control on AR spending, all DDPs and PRs pertaining to approved AR purchases must be processed with a cost estimation from the vendors and have the station Accounting Office certified that the AR fund is available. This will cut down the over spendings on AR purchases. Property & Inventory has completed the cycle inventory of classes OlC and OlE for a total of 998 line items. There were 11 Aircraft AGP cases in contrast to December's 35. Only three hours total revenue time lost was charged during this period. The stores operation remained normal. Undertaken were the ever continous relocation projects;; space again is becoming a problem. Recently, we received a large amount of backlogged cargo from MMB, and proper storage of these parts especially the bulky items is becoming more difficult. The tool Crib had a total of 6098 line items loaned out during this reporting period, of which 6084 line items were returned and left 14 line items outstanding.

The General Maintenance/POL Issue Unit experienced normal operations during this reporting cycle with only a slight increase in its work load. Still to be accomplished within the main storage area is the relocating of the existing lighting equipment. The POL area is nearing completion as the protective fencing for the outside stores is being put into place.. Movment of POL products to new POL area scheduled for 31 January. Shipping and receiving remained normal.

MONTHLY ACTIVITY REPORT
1 - 31 JANUARY 1969

PART I
AIRCRAFT INCIDENTS

Date	A/C No, Type & Contract	Place	Description
8 Jan	N1303X 204B VN-41	BS 6040	Acft was flying low due wx. PIC heard one round pass near acft. A high speed turn was executed. No acft damage or personnel injury involved.
10 Jan	N393R PC6C 4395	3 miles E. of V-272	Acft received one hit in the left rear portion of the horizontal stabilizer. Acft was on third trip into V-272 at low level due wx. No personnel injuries involved.
15 Jan	N1304X 204B VN-41	BS 5276 between V-204 and V-23	PIC was flying at 1000' passing over a bend in the river when he noticed personnel poling bamboo rafts on the river. The personnel commenced firing on the acft with moderate intensity. PIC continued on course clearing the area.
17 Jan	N1307X 204B VN-41	YS 1054	Acft was inroute to VO1 when the AHD heard enemy gunfire. No acft damage or personnel injury involved.
22 Jan	15559 C-47 VN-41	SW of V-17 final approach	PIC was letting down through the haze, turning into final for a landing at V-17 when the acft took one hit in the left wingtip. PIC continued the approach and landed safely at V17. No personnel injury involved.
22 Jan	XW-PBT H-395 4395	V-247	On right downwind for rwy 10 at V-247 six rounds of enemy gunfire were directed at the acft. No acft damage or personnel injury involved.
22 Jan	B-817 C-47 VN-41	On ramp at VO3	Danang AB received 15 rounds of rocket fire at 0600L. During pre-flight inspection, PIC found three small in fabric on top side of left airleron which PIC attributes to flying debris caused by nearby rocket impact point.

25 Jan	N9871Z C-45 VN-41	VOI	Acft was in traffic pattern at VOI when PIC observed muzzle flashes of enemy small arms fire presumably directed at his acft. No acft damage or personnel injury involved.	
29 Jan	N1303X 20AB VN-41	An Outpost at YS 7388	Acft was on final approach to an outpost when one round of small arms fire was heard believed to have originated from a treeline in the vicinity of the outpost. No acft damage or personnel injury involved.	

PART II
SITUATION SUMMARY

The enemy continued to move large amounts of supplies and ordnance into South Vietnam. Many large caches were discovered, some near Saigon. Terrorists acts appear to be increasing, the primary targets being Government Officials and facilities. Many of our crews are breaking curfew restriction in the mornings in an effort to meet the schedule imposed by the customer. This practice is becoming increasingly more dangerous with the arming of more teenager by the Government. They have killed or wounded numbers of people who were out during curfew, including a palace guard on his way to work and military personnel. Several times they have opened fire on one of their own units. They will shoot at anything or anyone that moves during curfew.

There has been an increase in Anti-Aircraft fire in I Corps. Airburst have been reported up to 16,000 feet.

There have been a number of UFO's reported in II Corps. They apparently are Choppers, as the speed is usually under 100 M.P.H. The sightings are mostly at night and could be a movement of troops and supplies by the enemy. Indication are that the enemy plan to launch their spring offensive prior to TET. Major targets are reported to be Danang, Nha Trang, Bien Hoa, Saigon and Can Tho.

SAFETY MONTHLY REPORT - JANUARY 1969

1. GENERAL

Pilot meetings.

- Porter - 3 January. Discussion of the military Operational Hazard Report program. AAM has received a number of these OHR reports, mainly concerning the Porter and Beechcraft operations. All of them concern air traffic pattern and taxiway conflicts. In most of the instances, a lack of proper radios and/or frequencies on Company aircraft has resulted in our pilots not being able to receive tower instructions or advisories.

- Beechcraft - 10 January. Same topic as above.

Investigation.

During the months of January and February the frequency and scope of accident investigations has prevented completion of the following accident investigations has prevented completion of the following accident reports:

PC-6C N748N, 4 January 1969 - Completion of this report delayed by (1) seven subsequent accidents, (2) Captain Segarra departed on emergency leave 4 February, prior to final meeting with Investigation Team. (3) Non-receipt of PC-6C maximum glide performance data, (4) Non-receipt of tear down analysis. Estimate Local Review Board by 10 March.

C-47 16147, 11 January 1969 - This report has been delayed by non-receipt of engineering profile of V-260, Bao Loc Airfield. Estimate Local Review Board by 4 March.

C-47 15949, 16 January 1969 - In country investigation completed, report being assembled in Taipei.

Fatal ramp accident at V-01, 20 January 1969 - Preparation of report delayed by subsequent investigations. Estimate Local Review Board by 7 March.

PC-6C N391R, 31 January 1969 - Tear down analysis not received by Investigation Team. Estimate Local Review Board by 14 March.

VTB N91295, 3 February 1969 - No information received to date regarding victim fatally injured by landing aircraft. Estimate Local Review Board by 17 March.

Preparation of report data for above accidents delayed one additional week by inactivity during TET holidays.

2. Safety Suggestions

Undated Safety Comment - Problem of lack of identification by enroute and approach control radar. Suggests installation of transponder. Comment forwarded to DSAFE.

Undated Safety Comment - During January, PIC was vectored through thunderstorm by Departure Control, vectored out of a cloud directly into an airstrike, lost on GCA final at V-07, lost turning GCA final at V-03, all because of lack of transponder. Recommends installation of transponders. Forwarded to DSAFE.

3. Follow-up Action

Reference Safety Hazard Report No. 05057, dated 28 November 1968, regarding Beech C-45/10-2 carburetors leaking under pressure. It was determined by the Supervisor, Accessory and Hydraulic Shop, TNN that the pressurization test should be limited to one minute. Everyone concerned has been advised.

4. Unfriendly Action

DATE	A/C NO./TYPE	LOCATION	REMARKS
04	C-47/B&17	UNK	Left landing light lens had 2½" bullet hole.
10	PC6/N393R	V-272, 31 mi E	A/C hit in stabilizer by one rd of small caliber AW, no injury. Flying at 500' due WX.
17	204B/N1303X	BS6040	Near miss by 1 rd small arms while flying at 1800' due to WX.
21	204B/N1307X	YS1054	Near miss by 30 sec of small arms fire while proceeding to V-01 at 2500'.
22	204B/N1304X	BS5276	Near miss by 5 sec of small arms fire from raft in river while flying at 1000 from V-204 to V-23.
22	C-47/B&17	V-03, on ramp	A/C hit by 3 small rocket fragments top of left aileron. Found on preflight after V-03 received 15 rds of rockets.
22	Helio/XW-PBT	V-247, downwind	PIC informed by tower be had near miss by 7-10 sec AW fire on downwind at 500'
22	C-47/15559	V-17, in traffic	A/C hit by one rd small arms in left wing tip while turning final at 950'.
26	C-45/N9871Z	V-01, downwind	PIC and tower observed 10 sec of AW fire while on downwind at 1000'.
30	204B/N1303X	YS7388	On descent to outpost at 800', copilot heard 1 rd small arms fire.

5. Minor Incident/Inflight Irregularities

DATE	A/C NO./TYPE	LOCATION	REMARKS
23	VTB/N7695C	V-01	Landed W/flat tire - 70% of inboard sidewall blew out, brake and wheel damaged. Tire failure with tread in good condition.
27	10-2/N9573Z	V-07	Pilot tube bent and right main wheel dented by Marketeer cart on ramp. Corrective action - remedial training and establishment of minimum approach distance from A/C for carts.
29	Helio/B857	V-20	A/C stopped on runway, could not unlock tail wheel. Crash crew pushed A/C rearward damaging wingtip and aileron on fire truck. Pilots have been advised to closely supervise manhandling of small A/C.

6. Accident Reports

DATE	A/C NO./TYPE	LOCATION	REMARKS
04	PC6/N748N	CP0538	Flame out at 11,000' - radar descent through clouds - ditched 200 yds off Cam Ranh beach. Under investigation, engine teardown analysis not available.
05	C-45/N9871Z	V-01, ramp	While backing A/C towbar slipped off, broke wheel assy fins. Ramp crew negligent-received discipline.
11	VTS/N3674C	V-01, ramp	Torque links bent and bolt sheared-tow tug exceeded turning limits. Entire ramp crew scheduled for ground-handling ramp safety course on 20 January.
11	C-47/B147	V-260	Right main gear broken by obstacle on runway while landing. Under investigation.
16	PC6/N394R	V-242	Full power go-around W/full flaps due to motorbike pulling on runway. Rivets pop and skin torn at left flap center bracket.
16	C-47/B949	ZD1506	A/C destroyed, 12 fatalities. Impacted on high terrain in bad weather. Under investigation.
18	204B/N8535F	UNK	ADF antenna and A/C belly each had 2½" hole, cause unknown, probably landed on enemy.

20	N/A	V-01, ramp	AAM employee fatally injured - sitting atop plywood panels on towed cart - prop blast blew panels off and employee was thrown 15' landing on head.
21	204B/N8535F	UNK	T/R blade had ¼" dent on leading edge. Found on post-flight, cause unknown, probably small stone.
22	10-2/N77Y	V-07	6" crack in pilot's windshield - log item found on return to V-01. Cause unknown.
23	PC6/N194X	V-133	Right main tire flat, found small cut on sidewall, probably sharp object on runway.
23	VTB/N7695C	V-01	Right main tire went flat on landing roll. A/C taxied some distance on flat to clear runway. Tire cut around sidewall, probably at rough strip.
23	PC6/N12450	V-07	Landed with right main tire flat, found large nail in tire. Tire and wheel assy had to be replaced.
29	10-2/N7950C	V-01, in hangar	Marketeer cart damaged right rudder, brakes on cart failed, found plunger in master brake cylinder damaged.
29	C-46/B146	V-27	Right main tire flat, tread worn through. Probably due to excess braking.
31	C-47/B817	V-50	Pilot reported hard landing. Both main gear wheels replaced, damaged beyond repair.
31	PC6/N391R	V-53	Flame out on precautionary go-around, A/C crashed in level attitude from 50 feet. Two pilots had cuts, abrasions, and bruises, one VN pax critically injured, still in coma. Under investigation. PRES informed MSAFE fuel pump spline shaft failed due no lubrication. Have not received tear down analysis from MMB. (Note - MSAFE was informed by AAM employee TDY from another base several days before PRES called.)

MONTHLY REPORT
NHA TRANG
JAN. - 1969

GENERAL

This month started off with a bang with porter 48N loseing its engine and ditching in the ocean at Cam Ranh Bay, happily there were no injuries and part of the wreckage was recovered.

Much effort is being devoted to the cost reduction program, with good results for the comeing year. A review of the past year, discloses all projects planned and undertaken were completed, which speaks well for all departments at this station.

Although the customer has informed us there will be a 30% reduction, an increase in all departments for the month belies the fact. Planning personnel wise is very difficult under the curcumstances.

CUSTOMER RELATIONS

Relations remain good.

OPERATIONS

This department has been routine for the month. One OM is on H/L and we are getting an assist from one OM from DaNang. Our new pilot lounge should be completed this comeing month and hope fully we will be able to cut down congestion in operations.

SECURITY

Remains good, with very little activity in the area.

REPORT CLASS
COUNTRY: SOUTH VIETNAM
SUBJECT: SITUATION REPORT ON QUANG NGAI ON 1 FEBRUARY

AMB

ACQ: VIETNAM, DANANG (1 FEBRUARY 1969)
SOURCE: THIS IS A SITUATION REPORT ON 1 FEBRUARY PREPARED BY CAS.

(b)(3)

1. BY THE EVENING OF 30 JANUARY ALL INTELLIGENCE REPORTS INDICATED THAT THE VIET CONG (VC) WERE IN THE PROCESS OF A BUILDUP WITH THE INTENTION OF ATTACKING QUANG NGAI CITY. DIVERSIFIED TARGETS WERE CITED, BUT MOST GAVE THE CITY AS THE MAIN TARGET. WHILE SUCH REPORTS ORIGINATED IN THE OFFICIAL VIETNAMESE/AMERICAN COMMUNITY, THE QUICKLY SPREAD THROUGHOUT THE CITY ACTIVITY IN THE CITY CONTINUED NORMAL, HOWEVER, FOR THE PRE-TET (CHINESE NEW YEAR ON 30 JANUARY) PERIOD. ON 31 JANUARY, AFTER THE INITIATION OF THE VC ATTACK ON THE NIGHT OF 30 JANUARY, THERE WAS REDUCED "NORMAL" ACTIVITY, BUT THERE

NND 941536 ---141

WAS CONSIDERABLE MOVEMENT OF PEOPLE ABOUT THE CITY. THOSE MOVING APPEARED TO BE GOING FROM ONE POINT TO ANOTHER, PROBABLY TO GATHER WITH FRIENDS AND RELATIVES FOR COMFORT AND SECURITY. NO MOVEMENTS APPEARED AIMLESS.

2. ON 1 FEBRUARY ACTIVITY AND MOVEMENT IN QUANG NGAI CITY APPEARED NORMAL, SHOPS WERE OPEN AND MANY CURIOSITY SEEKERS WERE MOVING ABOUT THE CITY TO SEE WHAT WAS GOING ON AND VIEWING THE VC BODIES AND DAMAGE RESULTING FROM THE MILITARY ACTION OF THE PAST TWO NIGHTS.

3. ACCORDING TO A REPORT FROM MACV G-2, I CORPS HEADQUARTERS, TWO UNIDENTIFIED ENEMY BATTALIONS WERE MOVING TOWARD QUANG NGAI CITY FROM THE WEST AT APPROXIMATELY 2000 HOURS ON 1 FEBRUARY. THEY WERE UNDER HEAVY HARASSMENT AND INTERDICTION FIRE.

4. FIELD DISSEM: STATE USMACV III MAF CORDS

MONTHLY REPORT

NHA TRANG

FEBRUARY 1969

GENERAL

All activities have been routine for the month. The TET holidays plus the short month cut all totals considerable but not as bad as was expected.

Our only worthwhile report would be the closeing of our large hostel and moving the crew members into the Nautique hotel. This will have a threefold effect, crew moral, financial savings and a better operations all the way around.

TRAFFIC

This department under Mr DIAMOND's direction and reorganization is providing the customer with much better service -

COMMUNICATIONS

This department has functioned well despite the constant equipment break down that has plagued us this month. Our Motorola remote station has been out of commission most of the month for one reason or the other.

SECURITY

Terror activity has picked up in town, also the base has been shelled twice, luckly nothing has fallen in the AAK area.

PERSONNEL

See SCN break down.

TECHNICAL SERVICES

The office building has been painted, which has improved the appearance of the area. A well was put down and water tank installed for the A/C washing area. We are very short on storage area for supply and move shops area, the lean to extension is badly needed.

SAIGON BASE
MONTHLY REPORT
FEBRUARY 1969

I. GENERAL

1. The month of February when reviewed with an unemotional approach to problems such as sub-standard housing at exorbitant prices, police harassment, continual exposure to newspaper propaganda of VC capabilities, increased terrorist activities, 122mm rockets and the tension created by waiting for the expected ground offensive against Saigon and other major cities in Vietnam, was just like any other dull month in Vietnam.

2. Flying time was the lowest since 1965. The short month, TET holidays and general reduction in customer activity resulted in 6469 hours flying which was only 67% of our forecast. It is generally expected there will be considerable changes in overall activity during the next few months. Both customers have gone on a five and half day week for their management personnel. This should reduce Sunday flying to a minimum; however, there is no apparent effect at this time.

3. Our new contingency plan was exercised for the first time on 26 Feb 69 when Tan Son Nhut was placed on a red alert. All Vietnamese were denied to 1500L. Our afternoon shift assembled in the designated assembly area (about 2 Km from the main entrance gate) and awaited further instructions. We obtained authority to shuttle our employees to the AAM area in company transportation with minimum loss of manhours. As a matter of interest, AAM is the only company with an assembly area designated by an appropriate sign to cover such contingencies as VC activity, security restrictions, strikes etc.. In this way we can maintain control over employees and reduce the total loss of manhours when various contingencies occur whereas the employees of other companies return to their homes to "try again tomorrow."

II. FACILITIES DEVELOPMENT

1. The TET holidays coupled with the VC activities between Saigon and Bien Hoa have slowed down the progress of the West Ramp surfacing. The contractor was unable to get to his quary for crush rock because of the VC. Other projects are moving towards completion with usual number of problems, i.e. Personnel Office completed except for lighting which have been ordered from Japan. Supply was unable to obtain satisfactory fixtures in SEA, HKG or Taiwan.

III. FISCAL

1. Move to larger quarters is being held up by lack of lighting in new PND Office. Personnel continues to be a problem with the Vietnamese Government drafting present employees and refusing to grant visa to TCN personnel. This has resulted in extra heavy work loads for remaining employees thereby decreasing efficiency and accuracy.

Piaster payroll - [redacted]	7,693,736	= $65,201.15
" " - [redacted]	2,855,880	= 24,202.37
" " - American	1,366,791	= 15,829.75
Total Piaster Expenditure	19,669,626	= 166,691.75

IV. FLYING (See 204B report on page 10)

1. With the prospect of TET occuring during the month, low flight time and long periods of stand-by at the airport was forecase. The forecasted activities prevailed throughout the month. The only bright spot was "Charlies" activities did not reach the expected proportions, though we did suffer a loss of an aircraft at the hands of the VC.

2. On 22 February while landing at Tra-Vinh (V52) the landing gear of N137L folded. This necessitated change of both engines and propellers. This was done on 24 February. During the night of 24 February the aircraft was destroyed. In the charred wreckage we found the tail pipe of a Chinese B-40 rocket.

3. DFD concluded his visit in SVN with visits to Nha Trang and Da Nang. During the course of his visit at Da Nang, he was confronted with the persistent obstacle to our operation; communication with Da Nang RAPCON. Captain Stallman made a station visit at Da Nang for the purpose of eke-ing out the reason for our lack of communications with RAPCON. Basically his findings were our lack of UHF communication equipment and transponder equipment installed on our aircraft. This point will be reiterated later on in this report. All in all DFD visit was most constructive and his counsel was most appreciated. We would like to see him more ofter.

4. A joint meeting consisting of BM, ABM, MSAFE, MTS, MFD and all AMFs was conducted to study our method of operation in I Corps Area and to make recommendations to the President for safer operations. Though we have suffered many losses in the I Corps Area the recommendations made by the counsel were directed toward all areas in SVN. Basically the recommendations were: install transponder, UHF, and TACAN equipment in all aircraft; accept the VFR restrictions outlined in ICAO regulations; emphasize safety and professionalism in pilot's meetings; implement a safety award incentive program.

5. On 11 February Air America, Inc. was represented at a briefing of the 1st Air Brigade at Long Binh by BM, ABM, DSAFE, MSAFE and MFD. Purpose was to acquaint Air America with the operation of the air arm of the US Army. We were the guests of Major General John Williams, Commander of the First Air Brigade. This is indicative of closer liaison of all Units operating in the airspace of SVN which should effect a greater mutual understanding of problems encountered.

6. On 28 February the MFD made a station visit to Bien Hoa with the CORDS Assistant for Air Operation for III Corps area, Mr. Bill Cain. During the course of the visit, a trip ensued to Long Be. This airstrip had been closed by the MFD due to uncontrolled pedestrian and vehicular traffic on and around the strip. A meeting with the US Military, CORDS Province Representative, and MACV Advisory personnel was convened to determine a course of action to control hazardous traffic. A joint effort towards positive control of the field was assured and the MFD re-opened the field. Capt Ackley transferred to VTE departing 13 Feb. Captain Waller arrived 22 February and assumed duties AMF for VTB and DHC-4. Captain Mccarthy is welcomed to the staff as A/AMF for H-395.

7. The month closed out with MF/AW's return. Both are to be commended for jobs well done.

8. Beechcraft - Total flight time for the month was 971 hours, a drop of 706 hours over Jan. 69 and 129 hours under programmed flight time.

We have seven aircraft on contract. At the present time it appears that we are about nine pilots over in the Beech Program at the present.

The flight time programmed for March is around 1400 hours approximately 300 hours over the present month.

Safety is one of the thoughts foremost in our minds these days. The pilots are beginning to talk safety, hoping this will help toward making a better safety record.

9. Total C-46 time for the month dropped 179 hours. Most of this was due to the Tet holidays plus the lack of Customer cargo to be moved.

Average time per captain was 55 hours while the average for first officers was 60 hours.

The lack of flying has caused the usual drop in morale. With inactivity we can expect some incidents as the old saying goes: "Idle hands are the devil's workshop". The flying should pick up a bit in March. Should the program continue to slump some resignations may be forthcoming.

10. The C-47 droped 262 hours from the previous month. The customer dropped two bailed aircraft from the contract plus the loss of 949 cut the number of contract aircraft to five. Since the bailment contract precluded the use of 083 and 994 on a daily call basis, the flying time dropped drastically.

It would appear that the customer was a bit premature in dropping the two aircraft as he is now trying to get one back on contract and the other on a daily call basis.

If these two aircraft are put back on contract the time should build back up a reasonable amount.

Morale is fair but inactivity is a dangerous and trying thing and if the situation continues as is there will be resignations forthcoming. Unfortunately the ones that resign are usually the people you would most like to keep.

11. The DHC-4 program continues to be slow and unpredictable. Captains averaged 59 hours with only one reaching the 70 hour mark. First officers flew an average of 53 hours.

12. The Helio program flew 870 hours this month slightly over the 810 hours that were estimated. The time was flown by 15 pilots were on station throughout the month. One pilot flew 77 hours and one flew 70; the others were close to the average of 58 hours. One pilot Capt D.E. Morris was grounded after 13 hours and is waiting release to flight duty from Taipei. Capt McCarthy flew only 28 hours before assuming duties as AMF/Helio on 24

Proficiency and route check are up to date and all pilots are current in ground school.

March should prove to be a better month time wise with 1148 hours estimated.

13. Fleet time for PC6s during February was 1663 hours, even lower than January's total of 1711. The drop-off (both January and February) can be attributed primarely to lesser requirements for the aircraft by the customer. In February an additional reason for low time was the lack of two aircraft (which were non-available due to maintenance repair) and the fact that February was a short month, which included the Tet holidays.

14. It is anticipated that March will be a better month flight-time-wise, with an AMP estimate of 1800 hours. Should this evolve, our present manning level of 28 pilots will still be two pilots over. Should there be a return to 1900-2000 hours a month the program will be appropriately manned.

15. A great stress has been placed on safe operating procedures, to include the re-emphasizing of adequate consideration being given to the conduct of flights under VFR outside controlled airspace. Two pilots meetings were held in Feb. during which extensive discussion was conducted on the above subject. The pilots were infact knowledgeable concerning the "Rules and Reg's" but a re-emphasizing of the company's goal and intent in this operation was definitely required. It is believed a safer, better alighed operation will result.

16. OPS 815's and "SAFETY COMMENT" forms have been re-explained to the pilots and timely submission of same has been encouraged.

There has been some reluctance to engage heartily in this program inasmuch as previous requests and suggestions submitted have gone without response.

During Februafy a balanced leave program for 1969 was firmed up and submitted, and the outlook shows no catastrophies.

17. Projected VTB flight time was 735 hours. Actual aircraft time was 690:07 hours. All pilots finished the month with less than 70 hours. The captains averaged 46 hours and first officers 37 hours. It may appear that the program is over manned; however, this is not the case because of the many standby requirements at Saigon and outstations.

Moralo could be much improved if a suitable facility could be provided for night standby at the airport in Saigon. See additional FLYING at the 10th page of the report.

V. OPERATIONS

Due to our previous inaccurate flight time forecasts we continued to struggle thru February in search for a formula to enable us to foresee what the future flying hours would be. We are preparing a daily performance chart of our aircraft similiar to the one done at Taipei. With this we

can see how our forecast compares on a daily basis.

Work on the new FIC progressed slower than expected and it will probably be sometime in April before Operations can expand to what in presently FIC.

1. Our Ramp Coordinators have been keeping the duty OM timely advised of any ramp problems even though the walkie talkie radios continue to be under repair most of the time. The Ramp Coordinators submit to A/SOM a daily delay report. This report still lacks refinement but should be satisfactory for distribution by 1 April. The Traffic Department has been preparing the delay report for the past 18 months.

2. GTD has improved but we continue to have the problem of Saigon traffic congestion and curfew restrictions. We had reservations about hiring female drivers but some of them have proven to be better than their male counterparts. The GTD drivers are now required to attend driver education classes for two weeks. Mr. Kohler, Supr./Trng set up this course and 15 drivers have attended so far.

We will go into a 3 shift operation for clerks and OD's this month. The only problem with this is an overlap of 3 hours in the afternoons. Again, curfew restrictions do not allow us to schedule personnel as we would like. The Emergency Equipment room is functioning orderly. Two locals have replaced the slots previously held by TCN's.

SOM/SGN should be relieved of his duties as A/SZ-DNG the end of March. He will then take 3 months home leave. The OM shortage remains the same.

		Jan	Feb
3. Statistics:	Passengers carried VN	45,070	33,150
	Aircraft arrivals SGN	1,079	895
	" departures SGN	1,080	921
	Cargo carried VN	5,198,778	3,998,173

3(a) Flight time report (See attachment A)
3(b) Accidents & Incidents (See attchment B)
3(c) Flight time information (See attachment C)
3(d) Flight Frequency (See attachment D)

4. Communications - All pertinent information including equipment specifications and data concerning our request to locate the Motorola UHF/VHF remote systems within military facilities was forwarded to Hqs Seventh Air Force for their consideration and recommendations. They in turn forwarded same to Hqs Pac GEEIA Rgn with the recommendation that installation authorization be granted. Thus far, there has been no reply from Pac GEEIA Rgn and we are still awaiting CINCPAC's decision.

5. An AR was prepared for BM to procure a lease-maintenance agreement with Motorola for walkie-talkies to be employed on a ramp control network. In regard to this agreement, Embassy customer wrote to 7th AF Judge Advocate's office seeking that office's ruling to allow Air America to enter directly into such an agreement. Copies of the 4395 contract was forwarded along with similar documents obtained from SZ-CLK in which the SJA, Clark AB, [illegible]hat Air America constitued an agency of the U.S. Government when [illegible] a similar contract. We hope to have the decision soon.

6. Post and Telecommunications turned down our request for allocation of HF frequencies since the frequencies desired had already been reserved for ITU use for international point-to-point circuits. MACV J6 advised they are holding up RFA for 10115 KHz pending CINCPAC approval of all Air America frequency allocation requests submitted by NCRD.

Crystals for 9818 KHZ were installed in the Can Tho and Saigon RSD TR-20 sets and excellent results have been obtained.

A daily pouch schedule has been set up for Can Tho for Company mail. There are two flights daily to that so no problems are anticipated.

7. Arrangements have been made locally whereby Cathay Pacific has agreed to deliver Company mail to Hong Kong aboard their flights. This is a verbal agreement with CX's Saigon Station Manager and no payment is expected. We have asked SCC and KC Hong Kong to make a similar agreement for direct delivery to Saigon. Such arrangements will greatly assist CPRL and MFA in conducting their business.

CCMENG has reluctantly been assigned Minister Extraordinary and Plenipotentiary of the company APO mailroom with all due prerequisites.

8. Message traffic

	Jan	Feb
Incoming	8870	6901
Outgoing	12273	9851

VI. TRAFFIC/USAID

1. Statistics

	Cargo (including AF Caribou A/C) Jan	Feb
Outbound (lbs) SGN	1,307,416	1,018,392
Inbound (lbs) SGN	91,821	98,639

2. TRAFFIC/AAM

Results of review of the new operating hours coupled with new curfew restrictions has again necessitated a change in schedule operating hours for March to 0630-2030 daily. Personal review of the 2100 hour closing indicated that little or no work was performed after 2030, the government has imposed some 2000 and some 2200 hour curfew restrictions and AAM GTD has rearranged the bus schedule, thereby necessitating the operating hour change.

3. A review of the thermos loss situation revealed that not placing them on the small aircraft did not adversely affect the operation. Consequently the firm policy has been enforced with approval of MFD and BM to issue only to aircraft having and AFD/AFS or FM assigned, VIP and International flights and the Danang and Nhatrang circuit flights. An appreciable decrease in losses has been noted.

A review of lost and found baggage procedures indicated need for improvement. Therefore a comprehensive procedure has been formalized and will be sent out to other stations for guidance.

4. During ADTD's visit he suggested a change in our procedure for returning tie down equipment for repair. We immediately put his idea in force and will now turn the straps in to Supply thru QC and request immediate re-issue,

leaving the repair and shipment procedures up to Supply.

A CWR was initiated to review the hot water system and instructions given to either repair or give a detailed account as to why repairs cannot be effected.

5. With one PTT line and one Company telephone extension servicing the SRTM, TM, Terminal and Cargo sections it was necessary to request a buzzer system be installed to preclude delayed communication. This has not been completed as of this writing.

6. Due to lack of classroom space and the TET holicays the English class has been temporarily discontinued.

7. Difficulty has been noted in shipment of damaged aircraft on board the B727 aircraft. A separate letter is being prepared by the SRTM in this regard.

8. Time Card problems again arose, and it has been necessary to have the cards checked in and out with the supervisor to preclude falsification of records by various individual. This is only a stop gap measure until the new time clocks arrive.

Additional workload has been placed on the terminal agetns to insure VN-13D approvals have been received on all travel of company personnel on board USAID sponsored aircraft. This is a new requirement imposed by CORDS and agreed to by Air America Station personnel

9. Statistics

	Jan	Feb
Passenger departures SGN (All contr.)	5,534	4,805
" arrivals SGN " "	6,439	5,432
Outbound cargo	70,566	77,322
Inbound cargo	157,537	90,279

VII. GROUND TRANSPORTATION
See attachment "E".

VIII. HOSTEL OCCUPANCY
1. During Feb. 1969, only 64 beds were occupied for a percentage of 45.6%. This low percentage is due to Tet holidays and very few visitors during last 15 days of the month. Non-availability slips issued: 7

IX. PERSONNEL
See attachment "F"

X. MEDICAL
1. Number of sick call: 1454
Accident: 40 minor, and only one of them was considered to be a little more serious.
1(a) [redacted] - RGMD Welder - Employee was on his way to work, before reaching the Main Gate of AAM one man on a scooter overpass him hitting the rear end of his motor. He fell on the ground causing laceration of the right foot. He was treated in Base Clinic and 4 days sick leave was granted.

Hospitalized sick call - None
Hospitalized accident - None
Unhospitalized accident - 40
Outcall - 1
Physical examination: 1. Flight crew phy. 18
2. Pre-employment phy. 8
3. Accident flight phy. 4

Total: 30

Sanitation: Cafeteria - Satisfactory
Toilet - Fair
Vaccination: 22
Total man days lost by reasons of sickness: 936½ days
Total man days lost by reasons of accident: 42½ days

XI. SAFETY

1. Pilot meetings

- Porter - 7 Feb, 14 present. Theme of this meeting was: "IF IT CAN'T BE DONE SAFETY, DON'T DO IT." Emphasis on use of the Safety Comment, and "GO NO GO" weather criteria were also discussed.

- Porter - 24 February, 10 present. This meeting repeated the above subjects for pilots not attending the first meeting.

- Beechcraft - 12 Feb, 14 present. Discussion concerned use of the Safety Comment, and compliance with all regulations governing flight operations.

- C-46 and C-47 - 14 Feb, 29 present. Discussion points were:

1. Use of Safety Comment as a pilot tool to improve flight operations and reduce hazardous conditions.

2. IFR and SVFR: The watchward is; if you cannot complete the flight in a safe manner, don't fly.

3. Dangers involved when pilots fail to report hard landings.

4. Accident rates and the need for a more serious and professional approach to flying.

2.

Investigation

1. Local Board of Review of C-47, 43-16147 accident of 11 January completed on 11 March.

2. Status of other investigations listed in January Safety Report is unchanged.

3. VTB, N9638Z accident of 2 March 1969 is also under investigation. The PIC involved proceeded on STO before completing the required accident information. BMSGN has issued a Memorandum precluding flight crews and Investigation Team members from further flying duties, TDY, STO, or leave, except emergency leave, until released by the Investigation Team Head.

3. Ground Safety Inspection. The quarterly inspection was accomplished 13-22 February by MGS TNN. General impressions were that there has been improvement in reducing equipment and facility hazards, and the supervisors are definitely aware of the need for a tighter approach to ground safety. Lack of needed safety equipment and supplies affects the safety program, however, the supervisors have shown ingenuity in improving material and facilities available. Emphasis will now be placed on correcting the safety hazards which were picked up as repeat items.

4. Coordinating Meetings - On 11 Feb., the BM, ABM, MFD MSAFE SGN and DSAFE TPE attended a briefing on U.S. Army Aviation in Vietnam at the request of Major General Robert R. Williams, USARV Aviation Officer. Mutual problems in operations and flight safety were discussed. Pilot fatigue is a definite problem in USARV, however operational requirements take priority. USARV has limited Army Aviators to 140 flying hours in any 30 consecutive day period.

On 26 Feb., MFD and MSAFE SGN attended a meeting of the Joint Air Operations Group. The composition and purpose of this group has been discussed in previous reports. Frankly, Air America does not enjoy a good image with the military. AAM was grouped with VN civilians entering runway, and Air Vietnam flights as hazards over which the military is cognizant but has no effective control. As stated before, the great majority of traffic conflicts are due to lack of UHF and FM radios in AAM aircraft. The conflicts will be largely eliminated by installation of these vital radios.

XII. TECHNICAL SERVICES

1. February was a very low month for flying times. Several factors are involved (1) The short, 28 day month (2) The 4 day Tet holidays (3) The Viet Cong starting their new military offensive in the last week (4) The City curfew restrictions (5) Airport Security reducing our graveyard work shift by 30%, affecting production schedules.

The Can Tho RMD Project is continuing to improve in capability and performance. We finally received our new radio HF crystals from Conus, with very prompt action/support from DED-TNN. RMD now has a maintenance radio set up that gives RMD Can-Tho direct contact with RMD Maintenance Control Office Saigon. The TR-35 HF sets are on long term loan from the Customer. The improved communications has enable prompt support to Can-Tho and reduce down times of the aircraft based there.

2. Concentrated efforts are being made to reduce the employees' accumulated CTO, on the books. We have held down the scheduling of overtime and positive results reflect it. The the Viet Cong dropped a few rockets into Saigon and the curfew changes and greater restrictions on the airfield cut into our production and forced us to schedule overtime, particularly on the graveyard shift.

3. The West Ramp repaving project is moving at a steady pace, but it now appears the contractor will not make the completion deadline of 1 April 1969. A more realistic date is probably 1-15 May 1969.

4. PEMD has taken over the daily/periodic maintenance of all powered ground equipment and reliability is expected to improve considerably.

5. PMD has been assigned more plant daily maintenance responsibilities, such as trash disposal formerly handled by RMD. In addition PMD has arranged a custodial service crew that will take care of the office cleaning to include polishing of floors.

IV. FLYING (Continued of page 2)

18. For the 204Bs, February turned out to be disastrous to say the least. Between the customers' cut back, the Tet holiday and the temporary breakdown in liaison with TNN maintenance on major over haul parts, the program will end up with 950 hours of flying. This is down about 300 hours from last month.

19. The monthly pilots' meeting was held on the 14th with 16 attending. The rest were briefed throughout the month. MFD sat in on the meeting. He also made some comments about the professional attitude of the pilots.

20. Four route checks were given this month. The AMFSD/RW did not make his regular trip to Saigon. The program was not hurt too bad, due to fact that we were ahead on proficiency checks. The two First Officers up for initial Captain checks will be held up till next month.

21. The manning level for the 204B program is down to 33 pilots with one more pilot resigning effective 10 March 1969, with the loss of flying time and pilots, the situation has equaled itself out. In fact, the pilot flying time is down. This month the average pilot time will be about 60 hours a month.

22. During the month it was discovered locally that TNN, in the process of over hauling major components, was putting parts back into major components that were out of time and should have been thrown away. The components were in the control systems of the helicopter. Immediate grounding orders went out to all aircraft affected; then the long process of getting the 7 aircraft flying again. It took 4 days plus 8 hours of C46 Non-Revenue time

and countless hours of lost revenue time on the grounded helicopters.

23. The overall morale in the program is very good despite the lack of flying. For the most part, everybody is very optimistic about the months ahead.

SAIGON
MONTHLY ACTIVITY REPORT
1-28 FEBRUARY 1969

PART I
AIRCRAFT INCIDENTS

Date	A/C No, Type & Contract	Place	Description
1 Feb	N1306X	CR 0963	Pilot was flying low down the coast due to weather when he took one round in the heater compartment, door, passing through the transmission deck, puncturing a hydraulic line and exiting through a rotor blade.
2 Feb	N9664C	V-01	Pilot was turning base for 25R when he observed 2 tracers off his right wing. No hits.
10 Feb	5559	V-23	PIC was climbing out from V-23 when they took one hit in the right prop dome. They had to shut down the right engine and returned and landed.
13 Feb	8084	V-23	Plane was turning on right base for lndg on rnwy 10 when PIC heard small arms fire directed at his aircraft. He added and continued his approach for a landing.
13 Feb	N539Y	V-68	Plane was climbing out from the strip when approximately one mile out it came under fire, sustaining two hits in the tail section.
20 Feb	N51259	V-40	Plane was on final for runway 29 when a rifle shot was heard, and the round was heard passing close aboard the aircraft. No hits.
22 Feb	N1305X	XS 9326	Aircraft was enroute to V-184 at an altitude of 1200' when three small arms rounds were heard passing nearby. PIC climbed into the overcast and continued on course. No hits.

22 Feb	N1305X	XS 9225	Six rounds were heard and observed being fired from this position. No damage. Aircraft had a different PIC from the incident above.
27 Feb	XM-PBT	V-236	Shortly after take off from the field PIC heard small arms fire directed toward the aircraft. No hits.
28 Feb	9592Z	WR 3585	While flying from V-167 to V-225 at 700' due to low weather conditions, plane came under fire at this position. PIC climbed into the overcast and departed the area. No hits.

PART II
SITUATION SUMMARY

The enemy launched their spring offensive in the early morning hours of 23 February instead of before TET as mentioned in last months report. The attacks by fire on military units and civilian populated areas have been too numerous to count. During the reporting period, Saigon was hit by a number of rounds of rocket and mortar fire on several occasions, resulting in a number of dead and wounded. Hundreds have been made homeless. VC penetrated both Saigon and Danang. The small unit which entered Saigon distributed propaganda in the Cholon area. The enemy entering Danang were driven from the city by allied troops. Their actions restricted our activities at Danang because of a 24 hour curfew imposed on the area. Bien Hoa was the scene of one of the heaviest ground attacks so far in the offensive. The attacks on the Base there caused an increased alert status here, which delayed many employees on their way to work. Terrorists activities greatly increased in Saigon, as well as other cities, immediately prior to, and since the start of the new offensive. The enemy has brought a number of AA gun were reported in operation within four kilometers of the field. One was captured and another destroyed. Another 37 MM gun was reported three miles south of the field at Quang Ngai (V-23). A number of smaller AA gun positions were reported, mostly in Region III. In one of the largest caches found in Region III northwest of Saigon, the enemy had stored 250 122MM rockets with oversized war heads. Many AA machine guns were also in the cache. A thirty truck enemy convoy was sighted just 15 miles from the Bien Hoa Airbase. The number of truck and vehicle sightings have been increasing monthly.

The enmy has committed only a small part of his available troops and resources so far. There are indications that the ground attacks on Long Binh, Bien Hoa and other installations have been probing actions and the major assault is yet to come and will probably be sometime in the next 30 to 45 days.

MEMORANDUM

TO : BM/SGN

DATE: 05 February, 1969

FROM : A/SZDNG

REF. No. SZDNG/69/009

SUBJECT : DANANG Station Monthly Report for January, 1969

Airport facilities continue to reflect improvements although progress is slower than desired. Utilizing in-house capabilities does not, due to the limited member of personnel, permit the most suitable work schedules but with close coordination and tighter controls projects are being completed on a priority basis.

Painting of the Operations/Administration building has been completed. White semi-glass ceilings and flat pastel green walls present a more cheerful atmosphere accented by dark gray doors, door and window casings and a 4 inch baseboard in each office - which harmonizes with the lighter gray floor tile.

The winter weather to date has been less severe than during previous years. This has worked to our decided advantage in that the sunny dry days have assisted our continued improvement of the AAM access road. On 21 January the USAF completed the asphalting, including the AAM parking area to a depth of 3 to 4 inches. This hard smooth surface not only improves the overall appearance but eliminates much dust, and will eliminate mud during the rains.

Several signs fabricated in Saigon have been received and installed. The most recent addition is the new Air America, Inc. sign received on 30 January and installed the same day. The completion of others is pending and as received will be positioned to further identify departments and assist passenger and visitor information.

Several other small projects are pending in this building area and are receiving attention in accordance with priorities and manpower availability. The general theme, however, has been to begin improvements at the front door and continue through the back door. This then, with a few exceptions, now positions us in the area behind the Operations/Administration building.

Construction of the drainage ditch at the rear the facilities continues, with it being approximately 60% completed. While this work continues we are researching ways and meas of leveling and packing the ground around the warehouse and nose hangar area in preparation for pouring concrete. It is hoped that in next month's report we will have much more favorable comments regarding this project.

Routine work continues at both hostels. Transportation has been arranged for the Engineer to make routine inspections and follow up actions, as required, to maintain both units in proper serviceable condition. Additionally periodic inspections are made by the undersigned and a form devised and posted on the bulletin board which encourages crew members to comment on deficiencies, or suggestions, noted during their stay at DaNang.

Paint has been procured for painting the inside of the old hostel. This we plan to begin in early February; again using pastel non-glass shades, but in four colors: azure blue, apricot tangering, and two shades of green. Additional colors were sought but not available at NSA.

Further improvements, such as floor resurfacing, window curtains and pictures on the wall are planned for the back rooms of the old hostel. When accomplished we hope the above will provide a much more pleasant atmosphere in the "home away from home" for our crew members and other visitors.

Due to the occupancy of the new hostel being considerable lighter than the old the upkeep is proportionally reduced. Nevertheless close contact is maintained with the building and its custodian to reduce maintenance and provide suitable support.

Other areas, both at the downtown and airport locations do require attention and we are cognisant of their existance. As time and workloads permit each will be reviewed and corrective action implemented.

Customer and Company relations remain very good to excellent. Since all concerned are in daily contact any or all problems are discussed and appropriate action taken before they are allowed to become major issues. Outstanding support was received from both 4395 and 0041 during the recent search and recovery operations involving C-47, 43-15949.

This period DaNang station has had several visitors from Saigon, including the ABM, who remained overnight. Additionally the VPFO spent same time with us, having arrived on 18 January and departed in the afternoon of 19 January.

MONTHLY REPORT

NHA-TRANG

MARCH 1969

GENERAL

Responsibility for the Nha-Trang Station was turned over to Mr. DAN LAWSON on 30 March 1969. Mr. LAWSON arrived on station 26 March 1969 for review of station with Acting Station Manager Mr. THEISEN. [redacted] (CCTR USAID) and [redacted] (Deputy CCTR USAID) accompanied Mr. LAWSON to NHA and were provided a station inspection.

The station turn-over proceeded smoothly. Mr. LAWSON's personal effects have arrived from DNG in good order and station administration is progressing in good order.

TRAFFIC

A. GENERAL : Station Traffic activities for March reveal increases in Cargo, passengers, and aircraft movement over the previous month.

The Traffic area of the building is undergoing maintenance and repairs to allow a better passenger flow and to keep unauthorized personnel off of the ramp. The TM office is now in the passenger terminal, however TM is well aware of his primary work at the Ground services warehouse and is not letting the physical separation affect his work there.

B. SATISTICS :

Passengers		March	Last month	1968
Departing		3,411	2,366	1,344
Arriving		3,407	2,291	566
CARGO				
1. Ground Services

Arriving	(lbs)	284,187	166,100	241.464
	TOTAL	631,496	573,970	374,063
2. Company Cargo				
Departing	(lbs)	12,066	23,170	5,274
Incoming	(lbs)	22,315	19,042	17,623
	TOTAL	34,381	42,212	23,347
3. GRAND TOTAL (1+2)		666,877	616,182	398,670

CUSTOMER RELATIONS

At this point, the customer relations appear transitive. The New SZ has not been on station long enough to chart a definite course but is well aware of the need to reverse the previous situation. SZ was welcomed warmly (if not sincerely) by both customers and will work towards a feeling of mutual

OPERATIONS

A. GENERAL

Good weather prevailed throughout the month. The sole trouble spot was considerable cloud build-up in inland areas in the afternoons. This did not noticeably hinder operations but is expected to be more troublesome in the next two months.

A standard ANA information board has been requested for the pilot lounge. This is the same type used at DIG and will provide for a central location for posting of all required reading.

Esso apparently lacks some proper defueling equipment, and has so for some time, SZ will have more to say on this in the next report.

Crew billiting has improved in closing hostel 1 and placing the crews in the Nautique Hotel. Some complaints were voiced by a few pilots as to room size, cleanliness, and facilities however, the hotel Manager has been very cooperative in correcting deficiencies when found. A gradual improvement can be expected.

B. FLIGHT FREQUENCY (see attached)

C. ARRIVAL AND DEPARTURE COMPARISON

	This month	Last month	Last year
Arrivals	614	476	671
Departures	611	465	661
Ron's	340	294	312

D. DELAYS 39 50 —

Percentage on time departures 94% 90%

E. ACCIDENTS/INCIDENTS .... None

FISCAL

The major change in this department was that the Accounting Representative has been given control of all station funds. Station funds will no longer co-mingle with those of the SZ.

LEGAL

No major problems.

SECURITY

No major problems.

TECHNICAL SERVICES

Aircraft Maintenance :

Aircraft maintenance :

	This month	Last month	Last year
1. Transient services	226	182	453
2. Overnight services	340	294	312
3. Engine changes	2	2	2
4. Propeller changes	1	1	-
5. No.1 services	6	4	8
6. No.2 services	1	0	1
7. Intermediate services	1	1	-
8. Delays (Maintenance/Mech)	10	5	17
9. MAR's	16	13	18
10. Outline recoveries	4	0	3
11. Accident report (CA/C)	3	2	1
12. Accident report (F.R.)	1	0	0

The workload took a sharp rise during the month. Much of this was due to the recent increase in trouble with the Lycoming IO/2 engines. With the increase in operations, the delays went up. The contributing factor being MIS parts.

ELECTRONIC MAINTENANCE

The Motorola UHF/VHF relay continues to perform poorly with numerous outages and inteferance. All required assistance will be given the technical representative and SCF and TPE kept informed of results.

SUPPLY

Activities were fairly routine. The workload increased with increased flying and maintenance. ACP's increased due to MIS parts but this is being overcome.

Mr. ANDERSON (Asst.Dupt.-MSD) visited the station in connection with the disposition of property items removed from Hostel no.1.

ADMINISTRATION

No major problems encountered by the present SA. Having been assigned to MPA for one day during this report period, this situation is not likely to continue.

FILE

SAIGON BASE
MONTHLY REPORT
MARCH 1969

I. GENERAL

1. The overall activities returned to normal with flight time higher than the previous month, but lower than January. Otherwise, the month passed rather uneventable with the exception of the continued combat environment which complicates living in Saigon

2. The cost of living continues to spiral with the upward trend, house owners are again returning to practice of the late fifties, requiring two years rent in advance. A one small bedroom apartment in downtown Saigon brings US$640.00 per month with advance payment. Minor items such as eggs, which are seldom found in the commissary are an indicator of inflation. Cost per egg US$0.128 each or US$1.54 per dozen.

3. There is continued police harassment of our personnel by the police. The U.S. Embassy advises not to pay circulation taxes on vehicles, however, the word has not been received by the Vietnamese Government who instructs the police to impound vehicles that have not paid the tax. It is one big happy merry-go-round, but very discouraging to the individual who has his car impounded.

II. FACILITIES DEVELOPMENT

1. West Ramp Concreting (SGN)

Contractor has placed approximately 95% of the base course. First shipment of cement has arrived at the jobsite and concrete placement is underway (approximately 5% complete). Work on drainage structures is now approximately 90% complete, Contractor has his paving operations fairly well organized; steady progress is anticipated.

2. Transmitter Building and Antennas (SGN)

Procurement action for hardware and equipment has been held up due to the lack of a Form F. Customer insists on a Form F with detailed invoice costs before he will consider Form F reimbursement approval. SCM has received most of the Worksheets from TNN which are based on firm vendor quotations. When all such worksheets are on hand, a Form F will be prepared and presented to the Customers. Hopefully, this will occur in April.

3. Blast Fence, West Ramp (SGN) AR Closure Notice initiated by SFD/SGN on 20 March 1969 due to Airport Commandant's desire that this project not be implemented.

4. Utility Tunnel Section B (SGN) The Utility Tunnel itself has now been completed to a point immediately in front of the MGMD Complex. Contractor's backhoe is now operating and progress on this important project is speeding up.

5. Temporary Personnel Office (SGN) This project was completed during this month; AR Closure Notice initiated by SFD/SGN.

6. Cafeteria Annex (SGN) Roof trusses for the extension have been completed and GI sheet roofing is in place. Masonry work (bricks) has been completed on all exterior walls and plastering is underway. The base for the floor slab is being leveled and compacted.

7. Revetment Walls (SGN) Vendor has completed approximately 100 panels and will begin delivery to jobsite during April. MGMD personnel will commence foundation work, etc., in the near future.

8. Danang Nose Hanger Work is continuing on the installation of lighting fixtures and electrical circuits. It is believed that the project will be completed in April.

9. Power distribution (NHA) Work is continuing on this project as men are available and as materials arrive.

10. Concrete Areas (DNG) AR Closure Notice initiated by SFD/SGN during March 1969 due to exhaustion of funds.

11. Concrete Accessway (DNG) AR Closure Notice initiated by SFD/SGN during March 1969 due to exhaustion of funds.

12. FIC Office Renovation (SGN) This project was completed this month. AR Closure Notice initiated by SFD/SGN.

13. TSN Common Use Water Supply (SGN) Air America and Air Vietnam have given formal approval of this project. The Airport Commandant is ready to sign the contract with the Contractor but is being held up by Pan Am who have still not received N.Y. approval. Airport Commandant is applying pressure on Pan Am to act.

14. Completion of Base Area Lighting (SGN) Long lead procurement items were ordered in February and have not yet arrived at Saigon Base.

15. Completion of South Ramp Revetment Wall This AR was approved on 27 March 1969. Contract documents are being prepared.

16. Miscellaneous AR 2123, Power Poles for CITCA, was approved 27 March 1969. This AR is supplemental to AR 5532, CITCA Relocation. Poles have been installed and AR Closure Notice will be initiated in the near future.

The design of a 3 Bldg ADMIN OPS Complex as an alternative to the 2 story Operations and Administration Building (rejected by Customers) is nearing completion.

III. ADMINISTRATIVE

1. March was in general, a typical month: (1) a little progress here and there in the form of important new projects; (2) a little more attention to old, still-unfinished business; (3) still more time spent in coping with the ever-changing administrative requirements of USG and GVN; all of this during (4) temporary absences of key BMSGN staff members.

2. Under Category 1, comes our current efforts to form a group of 25 to 50 qualified [redacted] employees for the intensive 50-week MMB training course in basic aircraft mechanics. On 31 March, 42 employees had filed applications and were taking [redacted] mechanical aptitude tests while APM was continuing efforts in PM's absence on leave to resolve questions of pay, recruiting new-hires and further liaison with USAID and GVN. The 1 May target date for arrival of a final-selection team from TWN seems a bit ambitious as of now, but we can report some headway and much enthusiasm.

3. Numerous items comprise Category 2. Noteworthy among them are our 45-, month-old, $16,326,36 claim against Air Vietnam for damage incurred by Porter N184L on 5 July, 1965 (our local file now contains 72 different pieces of paper); our 27-months-old effort (now amounting to 75 pieces of paper) to settle, to the satisfaction of offices and parties concerned, the case of Mr. Hua Khac PHUOC, who was killed by a Vietnamese military vehicle on 31 Dec, 1966; lease-renewal negotiations on the SGN hostel and the BMSGN residence; and others, such as liaison with the Cafeteria, Base Manual revisions, etc.

4. Category 3 includes continuing attempts to gather vehicle census data from employees and GTD while the Embassy, which wants this data for the GVN, repeatedly changes instructions; attempts through the Embassy, to retrieve vehicle registration cards - and vehicles themselves - from the Vietnamese National Police, who are confiscating them for non-payment of the controversial Vietnam road tax, which the Embassy for the past 13 months has been advising our employees not to pay; etcetera.

5. Category 4. Because of annual leave, illness, resignation and TDY, the Base Manager's staff operated at about 69% of capacity during the month.

IV. COMMUNICATIONS

1. Since it was notified that CPA has confirmed by letter to ship Company mail pouch SGN-HKG-SGN, and per DCD's instructions that one Company mail pouch must be shipped from each end each day 7 days a week, we started to use this service immediately. But it is not one each 7 days in a week because mail bag and personnel shortage problem. However, M/C was advised that they must follow up this new system of handling from April 1969.

2. Message Traffic

	February	March
Incoming	6901	8111
Outgoing	9851	1831

V. SAFETY

1. Pilot meetings

Following safety topics were discussed at pilot meetings in March

1. Necessity of visually checking Beech and VTB landing gear members several times daily for obvious fatigue, misalignment, and overloaded down stops.

2. Continued emphasis on SAFE 15, Safety Comment, as the pilot's tool for accident prevention.

3. Operational Hazard Reports continue to flow in regarding traffic violations by AAM aircraft. Attention was drawn to page 5 of the March Tactical Aerodrome Directory for South Vietnam. General rules are given for traffic at uncontrolled airfields. Non-compliance with these rules will continue to result in OHR's. Some pilots ignore NOTAMS which set up traffic control by Combat Control Teams at forward airfields.

2. Investigation

There are 8 investigations in varying degrees of completion. Hopefully, 6 of them will be processed forward to Taipei by the end of April.

3. Safety Suggestions

SAFE 15, Safety Comments for March:

02 March - Helio pilot comment on XW-PBY accident of 3 January 1969. Suggests tighter precautionary measures in bad weather. Forward to DSAFE.

04 March - Change USAID radio antennae blinkers to shorter intervals. These obstructions lights have been altered to burn steadily, were previously blinking at 50 second intervals.

05 March - Numerous gripes by one pilot about C-45 shortcomings. Still being processed locally.

05 March - Lack of response to transmissions on 118.0. Forwarded to DSAFE.

07 March - Hazards to pilot in field while loading or unloading Beech 10-2 nose baggage compartment. Forwarded to DSAFE.

07 March - Improper loading of SAT 727 at V-01 on 7 February 1969. Local investigation forwarded to DSAFE.

11 March - Army helicopter onto runway at V-14 while AAM aircraft was on take-off roll. Process through USARV - info to DSAFE.

12 March - C-47 seat belts too long at buckle portion. Forwarded to DSAFE.

12 March - C-45 lost twice on radar final at Danang because of no transponder Later cancelled IFR flight to Quang Tri because their APC not VHF equipped. Forwarded to DSAFE .

14 March - Phony radio beacon at Dong Ha. Notified all pilots, info to DSAFE.

[illegible] March - PC-6 pilot suggests green tinted plastic and fresh air louvres to [illegible]eve heat problems, and removal of cockpit curtains for better [illegible]. Forwarded to DSAFE.

4. Follow-up Action
Letter to Embassy Air Operations regarding hazards at Hon Quan, V-133.

5. Unfriendly Action

DATE	A/C Type/No.	Location	Remarks
28 Feb	C-45/95922	WR3535	Under overcast at 600', PIC came under 5 sec SA fire, climbed into overcast to avoid.
02 Mar	204B/N1306X	BT1249	2-3 sec SA fire at 1000', PIC turned tai toward fire.
02	204B/N1306X	BT1747	A/C hit in belly by one rd SA while at 1400'. Rd passed through fwd pax seat through roof and lodged in spoiler stabilizer. No injuries.
08	C-46/B928	BS5972	A/C took 2 hits by AW while turning final for rwy 10 at V-23 at 800'. 1 rd leading edge of left wing, 1 rd through belly damaged elevator turnbuckle. No injuries.
12	10-2/N77Y	XR4293	A/C drew AW fire while at 1500' on long final for V-52. Climbed out and made close-in approach.
13	C-47/994	BT1510	A/C drew 10 sec AW while descending at 1800'. Evaded by diving right hand turn.
22	204B/N8512F	BT0454	A/C drew 3 rds SA while flying at 50' below WX. Increased airspeed and descende to know friendly area. Did not climb because of traffic above.
24	204B/N1303X	BT2424	A/C drew 1 short burst AW while at 2400' with sling load. No hits.
30	204B/N1306X	BS7332	A/C drew 5-8 rds SA, and 2 5-6 sec bursts of AW enroute between sites at 1000'. No hits, reported to Army gunships in vicinity.
31	204B/N1306X	BS2217	A/C drew 2-5 rds SA, and 2 bursts of AW enroute at 1200' due to WX. No hits.

6. Minor Incident/Inflight Irregularity

Date	A/C Type/No.	Location	Remarks
07	C-46/B146	Cheo Reo	CORDS jeep driven by Homer Chae, V-27 dented left elevator tip just after A/C parked on ramp. Pilot says this also a potential hazard at V-04. Requests to customer through OM V-07, to correct have been fruitless.

10	10-2/N9573Z	V-03	Left engine very rough and backfired just after take-off. PIC feathered and landed after engine quit. Replaced carburetor and # 3 cylinder.

7. Accident Reports (SAFE 4)

Date	A/C Type/No.	Location	Remarks
02	VTB/N9838Z	V-133	A/C substantially damaged on landing. Under investigation, suspect hard landing.
Unk	C-47/16147	Unk	Rudder bracket found cracked on # 2 Svc at V-01. Suspect A/C parked w/o control locks.
06	10-2/N5269V	V-02	Left main tire flat on landing, no obvious damage.
07	C-46/B146	V-27	Damaged elevator tip described in SAFE 9 above.
08	C-46/B928	V-23	Bullet damage described in Hostile fire above.
09	PC-6/N192X	V-01 Ramp	Aft cabin door blew open on run-up frame broken and latch pushed in. Not locked prior to run-up.
12	Helio/B839	V-132	Engine and prop being removed as unit, due prop could not be pulled. Engine assy and hoist tipped over in strong wind one prop blade bent rearward.
12	C-45/N9855Z	V-01 Ramp	10-2 was being run up by mechs 15' in front of 55Z. 55Z was improperly chocked (too close proximity anyway). 55Z blew back into APU damaging left elevator.
13	2C4B/N1304X	XT9125	A/C substantially damaged when M/R blade struck tree on take-off. Under investigation, suspect engine FCU malfundtion.
14	PC-6/N152L	V-07	Parking brake failed to release on left brake. Left brake, wheel assy, and tire damaged beyond repair when PIC attempted to taxi.

16	PC-6/N285L	V-01 Ramp	AES mech ran APU into lower right nose section. 6-8" cut in skin. Improper operation of ramp equipment.
22	PC-6/N185K	V-14	Rotor wash from CH-47 caused right wing tip to scrape ground on landing. No SAFE 9 or PIC statement has been submitted.
23	Helio/B875	V-17	LH inboard flap bellcrank found broken. Suspect flaps extended at too high airspeed.
25	C-46/B926	V-27	Left main tire blew while taxiing on parking ramp. Casing gave way or recap parted. Numerous large rocks at Cheo Reo.
28	Helio/B867	V-01	Fuselage and wing found damaged during unloading from B1014. Airshipped from TNN to SGN.

FLYING

1. Many resignations were tendered during the month of March. Three captains in the C-47 program. In addition Capt JB Henson was terminated. F/O's [redacted] Brown, J.F. tendered their resignation during the month. Capt Aultman submitted his as well. Captains Ball and Aultman, [redacted] resignations are to be e effective during the month of April. It was felt the C47 resignations would be of benefit until the trend in flying time started rising. We could have used all four captains who departed during the month very nicely.

2. Our advertisement in the Saigon Daily newspapers for pilot positions to be filled was answered by one prospect. The review of his qualifications posed some questions not previously considered. What are the minimum qualifications? The question was asked of DFD. The answer was in accordance with the MFD manual "FAA Commercial license with an instrument rating". If these are the qualification it is most dubious that any of the indigenous applicants would ever qualify. If the qualifications in the MFD manual were amended to "Equivalent of FAA commercial license with instrument rating" what aircraft would they be allowed to crew? It is by word of month that all new applicants for pilot positions require a STANINE examination. For this requirement we were referred to PMBKK. [redacted] Enlifhtenment on these questions would be rewarding.

3. We were not free from accidents during the month. We suffered two major accidents. Preliminary investigation is indicative of material failure in both accidents. One accident VTB N9838Z experienced landing gear failure and Bell 204 N1304X encountered power failure on lift off. Minor injuries were incurred only in the 204 accident. No geound or traffic accidents were reported.

4. Capt JE Stallman had his car impounded by local police for non payment of the Vietnamese circulation tax. This tax was deemed not applicable by the US Embassy. We have encountered much harrassment by the local authorities heretofore. It is felt Captain Stallman's case will resolve this at last.

VII. TRAFFIC/AAM

1. No major items of interest occurred during the month. Lt. Freeman CORDS liaison officer departed for the ZI and was replaced by Mr. White.

2. Another helio was transhipped via SAT [redacted] of TAW Traffic was on hand to observe.

3. A question arose as to the authenticity of VN passengers. CORDS requested a check for 2 weeks of each VN passenger by I.D. Card against manifest and/or ticket. No unauthorized passengers were discovered.

4. Due to the many varied Supply letters issued regarding shipments of items to Bangkok on board AAM aircraft, a meeting was held between Supply/ Traffic to try and reduce the verbage to plain English. A mutual understanding of Supply and Traffic documentation was reached and a local Traffic SOP will be formulated and followed. It is noted that some Supply indicates are not passed on to Traffic while others are sometimes difficult to interpret.

The new baggage lost and found procedure has been sent to the other stations and seems to be working out as expected.

5. Statistics

	February	March
Passenger departures SGN (All Contracts)	4,805	5,957
Passenger arrivals " (" ")	5,432	7,274
Outbound cargo	77,322	94,692
Inbound cargo	90,279	120,974

VIII. HOSTEL OCCUPANCY

1. During March 1969, only 74 beds were occupied for a percentage of 47.7%. In compliance with Internal Auditor Report, the hostel report will be computed on a five bed availability basis for each day. During this period a total of 5 non-availability slips were issued.

IX. PERSONNEL

(See Personnel Strength Attachment A)

X. MEDICAL

1. Number of sick call: 1989

2. Accident: 71, and only two of them were considered to be a little more serious.

3. Miscellaneous cases: 1) [redacted] Operations Dispatcher and [redacted] of Emergency Equipment both suffered from food poisoning after eating ham and cheese sandwiches in the AAM Saigon Base cafeteria. Both of them were sent to hospital for treatment. [redacted] stayed in the hospital for one day and [redacted] went home after the treatment.

2) The late [redacted] RMD Quality Control was found dead in his residence by his housekeeper at the night of March 15, 1969. Cause of death unknown.

4. Hospitalized sick call : One
Hospitalized accident : None
Unhospitalized accident: 71
Outcalls : Two

Physical examination:	1. Flight crew physical	34
	2. Pre-employment physical	15
	3. Accident flight physical	5
	Total:	54

Sanitation: Cafeteria - Fair (except two employees suffered food poison)
Toilet - Fair

Vaccination: 76

Total man days lost by reasons of sickness: 383½ days
Total man days lost by reasons of accident: 44 days

XI. SECURITY

1. On 19 March 1969 at 0.30 A.M., Tan Son Nhut airport experienced to one alert which last about 30 minutes when 3 VC rockets landed outside the VNAF security fence.

2. During this month, VC shelled the rockets almost to all parts of the South and Central Vietnam. Saigon capital had been also shelled.

- On 3 March, at 5 A.M., two rockets (one hit the Bach Dang quai, 1st precinct and another hit Do Thanh Nhan street 4th precinct and caused insignificant damage).

- On 6 March, at 6 A.M., 6 rockets hit the agglomeration of the 4th precinct, killing 22 civilians and wounding 17 others.

- On 16 March, at 6 A.M., 2 rockets (one hit the Bach Dang quai, killing 1 civilian, destroying one house and damaging 10 vehicles; another hit the 9th precinct, no damage was reported).

- On 30 March, 3 rockets (2 landed at 4th precinct and another landed at 9th precinct, no damage was reported).

3. Several insignificant terrorism cases were noted during this month in Saigon capital. On 30 March at 10 A.M., the main post office located at Nguyen van Trach street, Cholon was blown up by terrorism causing serious damage to the building.

4. These VC activities proved the presence of the VC in all the parts of the South and Central Vietnam as well as to support the political objective of the communists at Paris Peace Talk as so far it does not bring any success to the communists of North Vietnam and meantime by the political military activities to make a pressure to the Republic Government of Vietnam to a direct negotiation with the Liberation Front of South Vietnam for the fate of South Vietnam.

XII. TECHNICAL SERVICES

1. Aircraft Maintenance production in all SVN Stations, measured in flights handled, overnight checks, heavy service checks, and shop support work increased along with the approximately 23% increase in flying over the

month of February (a short month with a long holiday). Flying and the relative workload were still down from that of January by approximately 20%.

2. Unscheduled workload as measured in aircraft delays recoveries, premature replacements, incidents and accidents indicated slight improvement in relation to flying hours. We hope this to be the beginning of an upward trend; however, the trend is questionable only because of two accidents, still under investigation for cause: A landing gear failure on Volpar N9838Z, which has been repaired and returned to service; and Helicopter N1304X.

3. The Can Tho RMD Project continues to go well, and has helped practically to eliminate recoveries from that station.

The curfew restrictions at the airport still requires working unbalanced shifts, which is an obstacle to the reduction of CTO and best man power utilization.

4. Visits to SVN by DGM and MAC from Tainan, and S/POL VTE were beneficial to SVN Stations, and it is hoped that we will see more of such visits.

5. The drive towards "Safety Thinking" continued with the installation of additional aircraft grounding pins; fire extinguisher and ramp equipment marking and location, etc. Decidedly noticeable improvement was made at all SVN Stations in general housekeeping, and in equipment and facilities appearance. The review of all SVN refueling equipment this month promises improvement in aircraft fuel servicing equipment and procedures. Recertification of personnel for taxi, towing and run up continues as a regular program.

6. Facilities continue to improve with the near completion of the Utilities Tunnel; with continued progress on the West Ramp repaving project, now estimated at approximately mid-May completion; with approval for completion of the South Ramp wall; and with approval for the Communications Transmitter Building installation.

MEMORANDUM

TO : BM/SGN

DATE : 04 March, 1969

FROM : A/SZDNG

REF. No. SZDNG/69/019

SUBJECT : DANANG Station Monthly Report for February, 1969

The month of February proved to be another productive month in the area of facilities improvements. Much of the work in the operations/ administration building has been completed - the most significant outstanding project is the installation of signs. A few have been received from Saigon and installed, however many more remain on order and their arrival is expected within the month of March.

Continued emphasis has been placed on preparing the ground in the area of the nose hangar for concreting. Excuvation to the desired depth was accomplished by the USAF grading (after their normal duty hours) and dirt removal by the Civic Action Group who were in need of dirt fill. Forms have been laid for concreting approximately 120 ft X 13 ft which will extend from the present ramp to the nose hangar. On completion of this section the process will be repeated until area is completed to the edge of the perimeter drainage ditch. Actual pouring of concrete is expected to begin about 5 March and construction will continue through this reporting period.

Painting of walls and ceilings in the old hostel continues. To date all rooms in the main building have been painted, but one complete room and the walls of a second in the back rooms remain to be done. Following this, planned are: interior woodwork painting, tiling floors in all back rooms, painting showers, hanging curtains (in back rooms), hanging pictures, tiling floors in back showers and painting dividers. Target date for completion of the above had been set for 15 March 1969, but due to the first day of TET falling. On Monday several workers failed to report for duty on the following Friday & Saturday, and presumably planned a full week of holidays, thus causing project completion date to be slipped. Work schedules were further hampered due to the airfield being closed to Vietnamese personnel on both Sunday and Monday (24 & 25 February), as results of the recent attacks on the cityand Airbase.

While hostile activity was unexpectedly quiet during the TET season the anticipation became a reality on the night of 20 February. Action that night throughout the area resulted in a 24 hour curfew on the Airbase which was later revised to 0700L to 1800L (for VN personnel) with in town curfew being revised to 0600L to 1900L. While Danang curfews do not normally pertain to US & TCN personnel, it has been highly recommended that only essential travel be conducted, until the situation improves, by these cateogory of personnel after curfew hours.

CS-4 R2

Deadline for the renewal of the Company NSA credit account was set at 1 February. This was accomplished in a timely manner, after the approving authority had ascertained the Companys authorized participation and emphasized the Company's responsibilities in prohibiting illegal transactions of these duty free products, and reminded that NSA procurement would be authorized only for items to be used in South Vietnam.

Due to the TET holidays, and the local activity which followed, these were fewer apportunities for visiting personnel to observe the station under normal operating conditions. Still, quite a few visitors did arrive and we hope they benefited from their visit with us as we profited by our visit with them.

One significant change which transpired during this period was the assignment of CM Jack Burton, on the 28th. This is Jack's second tour of duty at Danang and we have every reason to believe that we will experience the same fine performance that he displayed during his first tour.

M O N T H L Y R E P O R T
N H A - T R A N G
APRIL 1969

GENERAL

Mr. H. CHUNDY and Mr. M. HULSE paid a visit to NHA this month. All personnel are proud of NHA and appreciate the interest shown in the visit.

The month went by calmly. We were mortered and rocketed on 21 April with no damage to AAK property or personnel. This was the only incident during April. May might prove more active if HUMAN is correct. We hope not.

TRAFFIC

A. GENERAL

Station Traffic activities declined slightly in April compared to March. This resulted from runway closures on April 18th and 19th in preperation for and celebration of VietNam Air Force day. Another contributing factor was the mechanical problems on our C46 and C41 aircraft. From the Traffic standpoint, the month passed rather smoothly with only minor operational problems handeled well.

Better contract over cabin equipment (Thermos Jugs, Fans; etc) is being exercised and a decrease in losses is expected. One female employee was terminated when it was learned that she had taken at least one unit home.

New gate signs, and new fences were installed and a new baggage-conveyer system completed this month.

B. STATISTICS

		April	Last Mo.	1968

Arriving	259,265	306,502	257,983

CUSTOMER RELATIONS

From this point of view, the relationship between ourselves and the customers has shown some improvement. We are back to speaking to each other and there appears to be less tension in the air. There were two occasions on which SZ/NHA played the role of moderator between department heads and customer but, all in all, relations were quiet. Better improvement is expected as we work out our problems together.

OPERATIONS

A. GENERAL

The first 20 days of April ran rather smoothly however, the last 11 days very hectic due to extensive maintenance problems. The situation now appears back to normal. Maintenance problems and customer cut back in scheduling resulted in a slower than usual month. The 4395 contract reduced its aircraft by one PC6C "Porter" but, we have added another VTB "Volpar" with the signing of the 0069 contract. This becomes effective 1 May 1969.

B. FLIGHT FREQUENCY (See attached)

C. ARRIVAL AND DEPARTURES COMPARISON

	This No.	Last No.	Last year
Arrivals	573	614	649
Departures	571	611	654

D. DELAYS 31 39 -

Percentage on time Departures	95% 94%

E. ACCIDENTS/INCIDENTS . . . . None

FISCAL

The accounting Representative has been made custodian of the piaster working fund. We are in process of having SZ/NHA custodian of the PFC fund but, will be handeled by the Accounting Representative.

LEGAL

No major problems -

. . . 3 . .

SECURITY

The one problem involving an assult on our security representative has been reported to CSY/SGN. In an attempt to be certain of our A/C gas deliveries, Security/Nha now "Spot" monitors deliveries to the aircraft. This supplements the RMD efforts. Each delivery checked is compared with the fuel delivery slip.

11. Accident report (CA/C) . .	3	3	1
12. Accidnet report (FNL) . .	0	1	1

Work load this month increased sharpely due primarily to a rash of engine changes. We had 11 engine changes this month versus a "Norm" of two or three. AGP incidents assisted in accounting for the increase in delays.

ELECTRIC MAINTENANCE

The UHF/VHF relay was finally put back into service on 25 April with no outages since that time. The performance of this unit, while effective, still does not perform as well as it can. We are testing the unit for further improvements.

SUPPLY

Activities reasonably routine. Area given thorough cleaning and refurnishing including painting inside warehouse and floors.

ADMINISTRATION

No major problems encountered. Have established a construction work request system for minor maintenance and upkeep of the area. This allows the Chief Mechanic to schedule the general maintenance personnel a day or two in advance.

SAIGON BASE
MONTHLY REPORT
APRIL 1969

I. GENERAL

The overall situation in Vietnam remains about the same. The direct military pressure on Saigon has decreased but the terrorist activities continue unabated. Danang has received the majority of rocket attacks during the past month. There were six attacks in Danang compared with one attack in Saigon.

2. The overall activities remain approximately the same as the previous month. Flying time for the month was 8053 + 36 hours which was approximately 100 hours below the previous month. The Helio program for Vietnam ended on 30 April. It is expected there will be some Helio flying, but it will be extremely low. The movement of the Helio aircraft out of Vietnam has been requested.

3. The VN-41 COTR has departed on Home Leave and customer relations continue to improve.

II. FACILITIES DEVELOPMENT

There is one major and several minor projects underway and progressing slowly. The West Ramp is approximately 60% completed. There have been several delays due to police refusing to let the contractors trucks on base. This is a continual problem for all small contractors.

2. Several of the smaller projects, i.e. Revetment walls, Utility Tunnel, Lighting, Antenna Relocation etc.. are in various stages of completion. It is hoped most of these will be completed during the month of May.

III. OPERATIONS

1. Actual flight time for April was approximately 400 hours more than forecasted. This was primarily due to the VN-41 customer acquiring an additional Porter. Also there were more special VIP flights than normally scheduled.

2. Toward the end of April the VN-41 customer was advised to implement additional cost reductions. As a result they dropped all Helios from contract effective 1 May 1969. This should not drastically effect the over-all flying picture as the customer will probably schedule more effectively the Porter and Beech aircraft. Dropping the Helios from contract will present a manning problem for the Flying Department as the Helios will only fly as spares when the Porter commitments can not be made.

3. Effective 1 May 1969 a Volpar was assigned to the new 0069 contract; adding an additional 85 hours/month to this program.

4. There has been a noticeable reduction in controllable departure delays. BM, MTS, MFD, SRTM and SOM are receiving each night, at their homes, a revised printed schedule for the following day. This way, Department Heads are

finding errors which might result in a delay which previously were not found until the following morning. The same Department Heads are receiving advance notification on forms of VIP flights and they are giving these flights their personal attention.

5. Senior Operations Specialist made an Orientation Trip to VTE and UDN last month. We will attempt to schedule this trip for all of our OMs and OPSPs this year.

Flight Time Report (See Attachment A)

Aircraft Incidents (See Attachment D)

IV. TRAFFIC/USAID

1. Statistics

	Cargo (including AF Caribou A/C)	
	March	April
Outbound (Lbs) SGN	1,556,474	1,544,585
Inbound (lbs) SGN	141,568	80,117

TRAFFIC/AAM

1. TM/SGN has been fulfilling the additional duties of SRTM since 15 April during SRTM TCS to Danang.

2. There have been no major items of importance during the month with shipments of both passengers and cargo going fairly smoothly. No complaints have been received from the customers and on a couple of accasions they have been heard to pass on complimentary remarks.

3. We have been handling increased amount of CAX cargo, therefore have begun reporting total movement with this report.

4. A new contract was effected so that we now handle passengers for 4 separate activities.

5. Statistics

	March	April
Passenger departures SGN (All Contracts)	5,957	6,144
Passenger arrivals " (" ")	7,274	7,633
Outbound cargo	94,692	116,067
Inbound cargo	120,974	119,553

V. HOSTEL OCCUPANCY

1. During April, only 93 beds out of 150 were occupied during this period for a percentage of 62% occupancy. Also during this period, a total of two Non-availability slips were issued.

VI. GROUND TRANSPORTATION

(See Attachment B)

VII. MEDICAL

1. Number of sick call: 1710

2. Accident: 65. One traffic accident causing two utilitymaids died instantly and [illegible]racture case.

(a) [redacted] RGMD - Mech. 1/C was assigning working night shift to take care of the water pump & power unit. When he found that one water pump located in front of Main Building was out of order, he tried to start the engine, in order to supply water to the cafeteria, while cranking the engine his hand slipped and cut the little finger of his right hand resulting in fracture & laceration. He was treated in the 7th Day Adventist Hospital, Saigon.

(b) The late [redacted] both RGMD Utilitymaids - April 5, 1969, [redacted] was riding her Honda going home after work from AAM base with [redacted] sitting on the back seat. On the Bien Hoa highway about a few miles from Binh Thanh, a big Army truck came from the other side of the road hitting them right in the front. Both of them died instantly on the accident spot. [redacted] was 3½ months pregnant [redacted] was 9 months pregnant.

3. Hospitalized sick call: 3

4. Hospitalized accident: 1

5. Unhospitalized accident: 64

6. Outcalls: 9

7. Physical examination:

1.	Flight crew phy.	21
2.	Pre-employment phy.	11
3.	Accident flight phy.	1
	Total:	33

8. Sanitation: Cafeteria - Fair - It is suggested that air conditioners be installed in the cafeteria. A few ceiling fans are not able to keep the room cool enough especially during lunch time when all tables are occupied.

9. Vaccination: 78

10. Total man days lost by reasons of sickness: 374 days

11. Total man days lost by reasons of accident: 169 "

VIII. PERSONNEL
(See Attachment C)

IX. FLYING
1. Three more resignations were submitted during the month. Captain Koch, F/Os [redacted] with F/O [redacted] to be effective during the month of May.

2. No other indigenous applicant for pilot positions were received. The questions submitted in the Monthly Report for last month were answered. A general pilots' meeting was conducted on 8 April. The main topic was VN-41

Customer requirement in FSO's. This customer has adamantly avered that no payment would be made on deviated FSO's. All trips flown by our crews has to be entered on the FSO prior to flight and attested to by a customer representative. The schedule "Customer Direction" is no longer a valid order.

3. April was an accident free month. It is hoped that we have accident proneness out of our system for the rest of the year. No ground nor traffic accidents were reported. We had one incident of note which is still under investigation. This is an alledged misapplication of flap control during a minimum run take-off in a C-47.

4. The incident involving Captain Stallman's car ended with a typical indigenous twist. The American Embassy wrote many pieces of correspondence protesting the action by the National Police. The Minister of Finance withdrew the order of payment of circulation tax on tax exempt automobiles. On 5 April, after one week of having his car impounded, Captain Stallman's car was released along with the coveted registration papers. A few more registration papers on other cars were released as well. Three days later the Minister of Finance reversed his order. We are now required to pay the circulation tax.

5. All but two Helio Courier are off contract. Effective 1 May 1969 the final two Helios will be dropped from contract. This poses an acute problem in finding a new home for old Helio pilots. There was some rumor that three of these pilots would be transferred to Vientiane. This question has been posed to DFD without answer. Regardless we plan to train four Helio pilots into the PC6C.

6. Beech - Due to Customer changing to Volpar on many of their requirements the Beechcraft program has taken quite a set back, however, we feel we have reached a leveling off point now.

We flew over 1000 hours the month of April and should fly about the same during the month of May.

Beechcraft program has enjoyed 67 accident free days. Think safety and fly safely.

7. C46 & C47 - To fulfill C123 manning requirements at Vientiane, we were assessed with the requirement to furnish 3 nominees.

Forecast hours for the month were:	C46	718 hours	- 789 hours flown
	C47	838 "	- 994 " "

8. Helio - April was a bad month for the Helio program 1004 hours were forecast but only 759 hours were flown.

The VH-41 customer has removed all Helios from his inventory effective 1 May and the program is about dead.

9. PC6C - The April flight time estimate of 1633 hours was exceeded by approximately 400 hours and only one of the twenty-eight captains assigned failed to make minimums. This pilot was on company business and after returning could not catch up even though sent to a high time station.

This time increase is due mainly to the PC6 assuming the work load of the Helios which went off contract with both customers on 1 May 1969. We had contemplated checking out two Sr. F/Os but are holding this in abeyance until the problem of what to do with Helio PIC's can be resolved.

The pilot morale situation, which is good, seems to be most negatively influenced by the low flight hours per duty day which this month was 3.8 hours per duty day with the average duty days being twenty. This is in keeping with the previous month and seems to be quite normal when dead heads, night standby, airport standby, home standby, etc. are considered.

Barring any serious incidents and with continued increasing reliability on the Garrett power plant the coming month should approximate a new high for the SVN Porter program.

10. VTB - Projected flight time for April was 1,000 hours. This proved to be quite a close estimate as 970 aircraft hours were flown.

Four Beech pilots were cross-trained into the VTB during the month.

We have started a project to train every pilot in FCF procedures by taking them on test flights. The training value is well worth while even though they may not be designated as test pilots.

11. 204B - April has shown a slight increase in flight time over last month. The total hours for the month were 1250.

Tainan again is costing the program flying time. In March two helicopters were grounded for a period of 17 days for engines. This month we are again hurting for engines, with one helicopter grounded at the present time. The fuel control problem is a growing concern.

The average pilot time for the month should be about 83 hours. This in itself is a good morale builder.

X. TECHNICAL SERVICES

1. April was a good month in that Customer/Company funding approvals were received for several long-awaited projects i.e. additional toilets for RMD, Fire Brigade Building, water system expansion, Nose Hanger Lean-To (DNG), Motorcycle Shed (NHA) and Nose Hangar Lean-To (NHA). The majority of these projects will be executed by outside contractors. The availability of contractors to accept these small construction projects is something new for us. In the past, we have always had to do these projects with in-house manpower. Our daily Preventive Maintenance of buildings and ground equipment took second place and suffered considerably. Construction Work Request (CWR) type projects were very slow in getting done, as manpower from the Plant Maintenance Shops were overloaded on "Major" construction projects. Hopefully

now we can devote the proper time and manpower into developing a good custodial service and an effective preventative maintenance system of buildings and ground equipment.

2. The overall flying hours was down some 300 hours from the previous month. Actually this is about average considering a 30 day month with one holiday. We can expect to see our flying hours average out to something like 250-270 hours for each calendar day. Flying time per aircraft on station has increased, as we transferred four C45 types to Tainan in March and two H395 types to Laos in April. We expect to send three more H395 types to Udorn next month, yet we have received only one PC6C as additional.

3. This month saw RMD plagued with tire/wheel shortages on Porters, Helios and Volpars. It got so bad that we had two Helios in the hangar with main wheel assys removed, in order to keep the other Helio's flying. A Porter in Can Tho had to ferry to Saigon where the last spare main wheel assy was. A Volpar VIP flight that came in with a main tire scuffed had to get a tire from a bird in the hangar undergoing heavy service. The stock levels are established but are not being maintained. Engine oil coolers were in shortage again this month. The revised engine change sheets call for the oil cooler to be replaced, no matter what the reason is for the engine being changed. This is a very good precautionary maintenance practice, but we must be supported with spare coolers or suffer lost revenue flying hours. When an engine is being replaced for reasons other than internal metal failure and the oil system inspection reveals no contamination, it is almost a crime to ground the aircraft when a spare oil cooler is not available. We has about six aircraft grounded for oil coolers during this month.

4. Spare engines were in the spot-lights again - the lack of sufficient spare engines that is. With our engine changes showing about 93% as unscheduled and only 7% scheduled, our spare engine situation is not helped. The stock levels established is adequate to meet our needs but the total spares on-station rarely even gets near 40% of that authorized. TPE-331 and T-53-11A types are the most critical shortages.

5. It would be interesting to see what our aircraft availability and flying hour figures would be if our stocks of spare parts (engines, oil coolers, tires, brakes, etc) were reasonably maintained somewhere near the established stock levels.

SAIGON
MONTHLY ACTIVITY REPORT
1-31 MARCH 1969

PART I
AIRCRAFT INCIDENTS

Date	A/C No, Type & Contract	Place	Description
02 Mar	N1306X 204B VN-41	BT 1249	Acft was enroute to V-206 when PIC heard small arms fire pass near his acft. Acft immediately departed the area. No acft damage or personnel injuries involved.
02 Mar	N1306X 204B VN-41	BT 1747 (2NM NE V-63)	Acft was enroute to QUE SON carrying a sling 2000 lb sling load when an estimated 5 to 6 enemy weapons fired on the acft. The acft sustained one hit in the forward belly area. No personnel injuries involved.
08 Mar	B-928 C-46 VN-41	BS 5972 V-23	PIC was turning in for final to rwy 10 at V-23 when the acft came under fire. Acft took two hits, one in the leading edge of the left wing - the other through the belly, dameging a turnbuckle on the elevator control cable. No personnel injury was involved.
12 Mar	N77Y 10-2 Beech VN-41	V-52	While on final approach, acft received enemy ground fire from XR 4293. PIC elected to abort approach and proceeded to climb and make a close-in approach. Acft landed without further incident. No personnel injuries or acft damage involved.
13 Mar	994 C-47 VN-41	BT 1510 3NM SE V-239	Acft was on descent to V-239. After making a turn to avoid military acft pulling of their target, the acft received ground-fire. PIC elected to make a right-hand diving evasive turn. No acft damage or personnel injuries involved.
23 Mar	N8512F 204B 4395	BT 0454	Acft was flying below weather when PIC heard three rounds directed at N8512F. PIC increased airspeed and descended. Acft continued mission without further incident. No personnel injuries or acft damage occurred.

MEMORANDUM

TO : BM/SGN

DATE: 4 April, 1969

FROM : A/SZDNG

REF. No. SZDNG/69/028

SUBJECT : DANANG Station Monthly Report for March, 1969

ABM/SGN arrived in DaNang on 29 March after one week TCS at Nha-Trang as Acting Station Manager there. At the moment he is finding the DaNang area a much more complex environment (over-all) to because adjusted to VS Nha-Trang because of geographic considerations and the immense scope of military operations in the area. Otherwise the level of AAM operations appears to be quite similar.

It is obvious my predecessor has done much in a short period of time to improve our facilities. Three major projects remain to be done: Paving of the open ramp area around the nose hangar and completion of the hangar lean-to to provide an efficient working environment for the Chief Mechanic, his staff and also automotive maintenance. These functions have been "camping out" for too long. Also the completion of our remote VHF/UHF facilities [redacted] needs stimulated action. In coordination with COMENG SGN, this will be done.

Less strategic to our local situation is our Snack-Bar operated by the Air Force NCO Club - it needs a good cleaning up plus more space to configure it into a more efficient and pleasant facility.

With the completion of the hangar lean-to, cited above, and the movement of the Chief Mechanic's office from the Administrative Operations Building, we will be in position to correct this problem.

Meanwhile the squeeze is on the Air Force management to improve their standards.

CS-4 R2

SAIGON BASE
MONTHLY REPORT
MAY 1969

I. GENERAL

1. With only 6755 revenue block hours, May 1969 was our lowest month in over two years. This we attribute to several factors:

a. The general decline in U.S. military and non-military activities since the commencement of the Paris Peace Talks;

b. The normal end-of-the-fiscal year doldrums which affect all U.S. Government activities;

c. A change in customer requirements which has put the Helios and Caribous out of business and is about to close out the Beech C-45's.

2. The new fiscal year should begin at a fairly stable level of approximately 6500 monthly revenue block hours. Since it is too early to make a more solid forecast, we are watching the trend closely with a view to reducing our resources should there be any further cutbacks. Although precipitate action right now would be unwise, especially while "the road ahead" is not yet too clear we are nevertheless letting normal attrition reduce our manpower gradually and painlessly.

3. Viet Cong terrorism and other harrassments continue with occasional inbound rocket and mortar ordnance to keep things tensed up, but the over-all level of conflict appears to have been reduced to that which prevailed before the infamous 1968 TET offensive. The "celebration" of Ho Chi Minh's birthday on 19 May did not materialize as advertised except for a brief increase in terrorism in Saigon and other populous cities.

4. Twenty-five [redacted] candidates and fifteen alternates have been selected from test results to attend Air America's formal technical training course at AMB Tainan. It is expected initial student input will commence within thirty days.

II. FACILITIES DEVELOPMENT

1. Contracts were signed for a Fire Brigade Station and a Toilet and Shower Facility at Saigon Base. Both projects are underway.

2. The West Ramp Paving Project is nearing completion (80% paved) and should be usable by the end of June.

3. The Cafeteria Annex will be ready for business approximately 1 July 69. This facility will be superior in size and equipment to the original Cafeteria. It will have a Vietnamese Menu featuring a VN$60 lunch whereas the Main Cafeteria, because of lower volume of business will continue [redacted]

4. The Revetment Wall project is now being erected by RCHD. Footings and columns are being poured. The Base Area Lighting Project will get underway when materials arrive from Japan.

It should be noted that the Saigon Electric Power Company is preparing a

proposal to provide Air America with an additional 200 KVA of badly needed power; a Proforma AR will be initiated upon receipt of the proposal.

5. A & M Enterprise completed the South Ramp Revetment Wall Project. The Utilities Building is well underway. The TSN Common Use Water Well and Distribution Systems jointly funded by AAM, PAA and AVH via advanced water rent will start soon.

6. At Danang Station a contract was signed for the erection of the Nose Hangar Leanto. Contractor has begun excavation and foundation work.

At Nha Trang, two contracts were signed, one for the erection of a Nose Hangar Leanto and one for a Parking Lot and Scooter Shed to be located behind the Nose Hangar. Proforma ARs have been initiated for the completion of the Concrete Paving and for a Power Distribution System including a city power hook-up.

III. FISCAL

1. Customer Relations - A number of routine contacts were made with each of the two primary contracts and no serious problems were encountered. The VN-41 customer requested information on obtaining "carnay cards" for flight crew purchasing of POL for GFA of locations where Esso is not available. The customer was advised that the company cannot obtain these cards - that it is the function and responsibility of customer personnel to provide such for these particular aircraft.

2. General Comments: The subject of the T Reports has come under discussion again, here in Saigon, as it did during my recent assignment in Vientiane. It has been discussed with base management here in Saigon and several department heads passing through Saigon. No one I have discussed the T reports with are able to read them much less effectively use them. It would seem that there is a great cost incurred by the company for a report that serves no great meaningful purpose in the field since it seems a "well guarded secret" just what goes into the various accounts including how allocations are made. Several department heads have expressed a keen dislike at having certain "Base expenses" charged to their particular department, instead of a method of allocation being established to distribute many of these costs to the using departments.

3. The Monthly Base Manager's Report was briefly discussed with the ABM, with the current formats for the T Report and Base Manager's Report, management is unable to determine how the two are related and how they harmonize if they indeed do.

IV. FLYING

1. Flying time has undoubtedly been the greatest source of perplexity for all. Lack of flying time affects the pilots, and the spasmodic utilization of aircraft induces havoc in crew scheduling and crew manning. At present the morale in the Porter Program is excellent, in the 10-2 Program is good and in the others, comme-ci comme-ca. The VTB Program has proved our biggest

headache. We are confronted with long duty days and low flying time for the pilots. The present utilization factor for manning the VTB has proved useless. We are attempting to counteract these deficiencies with dual qualification. We have dual-qualified quite a few 10-2 pilots into the VTB, but manning has prevented training the VTB pilots into other aircraft. At best it is a "one-at-a-time" deal.

The Helio Program was another source of mal-contentment. That is until we received the order to put the remaining Helios in storage. This allowed full concentration on training those pilots who were covering the spare Helios. The storage of the Helios also gave us an excellent source for Porter Program input. The flight time from the Helio Program was picked up by the Porter Program. This levied an additional requirement for Porter pilots to fill the gap.

2. All plans came to a screeching halt with the proposal of reverting four Junior captains to F/O. This will entail cross training two more VTB pilots and possibly three more Porter pilots from another source. We are at present training two pilots to fill gaps in the C46 program. Since the flight time in the C47 program has deteriorated this is an excellent source. All programs will be reviewed.

Beech

1. The Beech program finished the month with approximately 1019 hours. Programmed flight time for June should be about the same. All proficiency and route checks are current at the present. The Beechcraft program had 98 accident and incident free days.

C-46

1. Forecast time for the month was 695 hours and actual time was 741 hours. This made a lot of people very happy/ Two captains were transferred to Vientiane which put the work on the balance of captains.

2. The customer has indicated that he will increase the utilization of the C46 and cut down on the C47. Time will tell. There were no accidents or incidents for the month.

C47

1. Forecast flight time for the C-47 was 942 hours and actual time flown was 653 hours. Few of the assigned pilots made minimums. If the trend continues, serious thought will be given to cross-checking some C47 PIC's in the C46 to spread the time and the wealth more evenly.

DHC-4

Caribous are still unemployed. An off-the-top guess projected 121 hours for the month and 77+49 aircraft hours were flown. Captains averaged 38 hours and First Officers 20.

H-395

1. During May there were no Helios on contract; however, we flew 31+08 revenue hours of which 12+08 were flown for the 4395 customer and 19 hours for the 0041 customer. The 19 hours resulted from ferrying three helios to LOS (B865-B869 & B857). 12+45 hours of non-revenue were flown. The non-

revenue hours consisted of three proficiency checks one route check 2 airfield check outs and test flights.

2. Three of our cross qualified pilots were deleted from the program, and six were transferred to other programs: five to the PC6C and one to the DHC-4. Of the six remaining captains, 3 are on leave.

3. The AMF did not get 40 hours nor did any of the line captains get 70 hours as the entire program flew only 44 hours total. June looks even more grim unless we can cross-qualify some of our Helio pilots into other programs to enable them to get some flight time and maintain some degree of proficiency.

PC6

1. This month lived up to expectations, the PC6 program logged an all-time high of 2385 hours with no accidents or major incidents.

2. Average pilot time was approximately 85 hours with two pilots exceeding the maximum time allowable by four hours each. In one case the PIC informed us of his reaching 90 hours and all efforts to relieve him at VO7 prior to exceeding 100 hours failed. Nha Trang consistently is low time for the PC6 but in this case VTB's in maintenance created a requirement for the Porter. The other PIC was negligent and has been reprimanded.

2. PC6 total time is inflated somewhat due to considerable non-revenue training time being charged to five Helio PIC's transitioning into the PC6. Also FSD VTE flew seven pilot proficiency flight checks during their stay.

3. The transition training of the Helio captains, including line checks, should be completed by 8 June 1969. Interim proficiency checks were flown by the Acting AMF with TPE approval.

4. This action was necessary since final word on Helio PIC transfers to VTE was not received until after FSD pilots were finished and preparing to leave SGN, although we had requested clarification of Helio PIC transfer status several weeks before.

5. The number of duty days per pilot remains high but when high flight time is considered work days are not a morale problem

June should be a repeat of May in flight time, but we will have our manning level to 31 PICs which will permit a more relaxed operation.

6. During May we received excellent maintenance support and all maintenance personnel associated with the PC6 are to be commended. Without their cooperation we would never make it.

VTB

1. May aircraft time of 911+40 was approximately 10% short of the projected 1,063. With 19 line captains effective, their average was 55 hours with none in excess of 70 hours. The 5 effective First Officers averaged 39 hours and again no overtime.

The ratio of duty time versus block time is still most undesirable. There has been a change of personnel in the customer Air Operations at VO7 and I expect a noticeable improvement in II Corps.

2. One accident occurred during the month. N3728G at V206 on 27 May 1969 encountered a combination of factors all working together to produce a double propeller to runway accident which is still under investigation.

204B

1. May has shown a slight increase in flight time over last month. The total hours for the month were 1185.

The monthly pilots meeting was held on the 30 of April, 16 pilots attended. The remainder of the pilots will be briefed on the meeting.

2. AMFS/RW Capt. Webb did not make his regular trip to Saigon this month. One interim proficiency check was given by MF/RW. Two route checks and three spot evaluation checks were given; also three SIC training rides were given to Capt. Bengtson. There was no ground school instructor available so the ground school was administered by MF/RW. With the exception of one pilot on sick leave and another on home leave, the program is caught up on all check rides as of this date.

3. The manning level is currently at 32 pilots, one of which is under training. The average pilot's time will be about 80 hours. With this amount of flying time versus pilots available, there is no need to update our manning level.

V. OPERATIONS

1. Total revenue block time for May was 900 hours less than April's time. This reduction in flying was due to a lack of cargo to be moved by the VN-41 customer and the termination of all the Helio contracts. Helio time for April was 731 hours versus 31 hours for May. We can expect further reductions in flying time, especially in the C-47 program. The VN-41 customer indicates there will be further cut-backs in cargo flights and wherever possible he will utilize C-46's instead of C-47's.

2. There were 32 controllable delays in May versus 51 in April, but there were 153 less Saigon departures in May. In the coming months we must expect an increase in uncontrollable delays due to weather.

3. There were considerably less GTD complaints during May. We are encouraging users to note their complaints on the GTD trip tickets in an effort to alleviate recurrent problems.

FIC and the Emergency Equipment Room are in good order.

Due to the decrease in revenue flying a study on FOD cost reduction is underway at this time.

4. Flight Time Report (See attachment B)
   Accidents & Incidents (See attachment C)
   Ground Transportation (See attachment D)

VI. SAFETY

VII. COMMUNICATIONS

1. Monsoon rains have played havoc with our leased teletype landlines between the exchange at the Tan Son Nhut civil terminal and the Saigon Post Office. Since the first heavy rainfall, these landlines have been intermittently inoperable approximately 70% of the time. The Post Office thus far has been unable to effect permanent repair to the cable. This has required Message Center personnel to route traffic to Bangkok via our CW Link for onward transmission and also to pouch cut message tapes to HKG for entrance into the SEA Teletype Network.

2. Because of the above we have sent a letter through the Embassy Customer to the Director General, Posts and Telecommunications requesting that Air America be permitted to establish a direct full duplex radioteletype circuit, using either VHF or UHF equipment, between Air America and the Post Office. Air America would have full financial responsibility to provide equipment, installation and maintenance. We more than likely would also have to pay a fee for rental of space within the Post Office building. We are not optimistic; PTT has disapproved similar demands from other contractors.

3. The inauguration of the new message format and procedures on April 30th which was necessitated by the change over to the semi-automatic relay system at Cable and Wireless Company, Hong Kong proved to be a relatively easy one and only minor problems were encountered. Saigon M/C personnel had been well briefed by C/Comm-SVM [redacted] and any questions regarding proper procedures and techniques were quickly and efficiently solved by advice and guidance from C&W personnel.

4. A burn-in period of approximately four or five months will be required to ensure that all procedures are understood and used effectively before C&W will convert to the full time and completely computerized automatic relay of traffic for the Company's SEA Teletype Network.

5. This period can be reported as favorable. Major projects long delayed by interlocking with each other and with other facilities development projects are now showing progress. Primary to such progress was course the satisfactory compromise of funding difficulties. The only major remaining difficulty is the establishment of adequate facilities in the communication center to accommodate the expansion now within the grasp of reality.

	Message Traffic	
	April	May
Incoming	9912	10436
Outgoing	12969	12854

VIII. TRAFFIC/AAM

1. TMSGN has remained in the position of SRTM as additional duty during the reporting month. [redacted] reportedly expires 14 June 1969.

In regard to the above position TMSGN made two visits during the month, the first to Can Tho and then second to Danang.

Loss of equipment at NhaTrang has been attributed to thievery by one of the Traffic employees and proper property control is now underway.

2. A request by TMSGN to have porter seats remodified by addition of an extra track lock was turned down by Saigon QC. Separate correspondence will be forthcoming in this regard.

3. The average of daily passengers handled was 395. Monthly total for May was 12,252, an decrease of 11.07% from last month. Company cargo handled for the month of May was 286,236 lbs which was an increase of 21,48% from the last month. Total CAX outgoing cargo handled for May was 21,077 lbs, which was an increase of 124.65% from the last month.

4. As stated previously we are experiencing difficulty in hiring acceptable replacement agents. Six applicants meeting the requirements have been approved for hire but thus for none have shown for duty. Personnel has been requested to assist in this matter as the vacation season is approaching and the remaining agents are due annual leave.

5. Customers use of plush Burns seats on the C-47 Can Tho runs is presenting difficulty in the safe stowage of baggage/cargo during flight. This is under discussion between base and customer; and the customer has been informed that we are required to refuse baggage in some instances due to the lack of adequate tie-down area.

6. Statistics -

	April	May
Passenger departures - SGN (All contracts)	6,144	5,539
Passenger arrivals - SGN (All contracts)	7,633	6,713
Outbound cargo - SGN	116,067	135,663
Inbound cargo - SGN	119,553	150,573

7. Traffic/USAID

	(Cargo including AF Caribou A/C) April	May
Outbound (lbs) SGN	1,544,585	1,317,907
Inbound (lbs) SGN	80,117	50,522

IX. HOSTEL OCCUPANCY

During May 1969, 97 beds were occupied out of 165 for a percentage of 58.7% occupancy. Also during this period, nine non-avail. slips were issued. Since 22 May until approximately 6 Sept 69, the occupancy rate will be computed at a six beds per day basis as the Hostel Custodian will be on Home Leave during this period.

X. PERSONNEL

1. Apart from routine activities, a large amount of time was spent on work relating to the impending technical training course [redacted] in Tainan. Applicants were interviewed and tested during the first half of the month. Testing of non-Company applicants was conducted in RVN vocational school classroom space provided by the Ministry of Labor. DTT Max A Mims visited; evaluated and selected candidates; and met with RVN government officials, together with APM, GAM and PM, for the purpose of promoting and keeping alive interest in the program.

2. The Ky Con Employment Office was closed on 29 May. Local employment activities are being handled from the Phu Kiet Office temporarily until such time as a suitable location can be found.

See Personnel Strength (Attachment E)

XI. MEDICAL

Number of sick call : 1882

Accident: 70, and one of them was considered to be serious

Mr. R.B. Hohmann - RMD Crew Chief - On May 22, 1969 Mr. Hohmann was installing transmission cowling of a helicopter and while the main motor running at 90 percent for purpose of tacking tail motor Mr. Hohmann slipped from left engine deck fell and struck back of his head on left passenger step. He was taken into Base Clinic immediately with 4 inches laceration posterior skull with profuse bleeding but conscious. He was then taken to the US 3rd Field Hospital and later transferred to 24th Evacuation Hospital at Long Binh. Doctor reports stated that he suffered a compound depressed skull fracture and his general condition is good. Operation was performed on May 24th and his condition was good. He was evacuated to Yokota, Japan on May 29th and then airevacuated by chopper to Yososuka Naval Hospital where he is now hospitalized. As recommended by doctor in Long Binh that Mr. Hohmann will remain in Japan for about two weeks convalescence and after that time he will probably be able to return to Saigon. Upon return he will have to make periodic check up visits to Long Binh until full recovery.

2. Hospitalized sick call: 2
Hospitalized accident : 1
Unhospitalized accident: 69
Outcalls: 3
Physical examination: Flight crew phy. 34
Pre-employment phy. 38
Accident flight phy. 0
Total: 72

Sanitation - Water exam. - Satisfactory
Cafeteria Fair
Toilet Fair

Vaccination: 37

Total man days lost by reasons of sickness - 298½ days

Total man days lost by reasons of accicnet - 78 days

XII. SECURITY

1. The extensive security precautions had been taken by Vietnamese Government throughout Saigon and Gia Dinh province to prevent VC terrorist activities and possible demonstration on the Commemorative of the Buddist birthday which took place on 30 May 1969. VC had intensified their terrorist activities in Saigon and in Gia Dinh province causing 9 incidents as follows:

- Six TNT blasts that damaged three electric transformer stations; the Dien Hong overpass near the Saigon Central market; the Gia Dinh Information Service.

- Two attempted attacks the 5th Police Precinct and a sub-police station of the 3rd precinct with TNT charge.

- [illegible] at Van Don populated area of the 4th Precinct.

2. The curfew at Tan Son Nhut airport is from 1930L-0630L.

3. Due to the escalation of the cost of living under these circumstances in Saigon, civil servants and servicemen will receive a 25-30 percent increase on their basic salaries. This increase will be effective from 1st July 1969.

XIII. TECHNICAL SERVICES

1. A welcome decrease was made in the percentage of maintenance delays versus aircraft departures this month. The delays chargeable to maintenance at Saigon Base was only nine (9) for the 1058 departures. One these should be charged to the pilot, when he refused to accept a C-47, because the electric starter was inoperative at departure. The Flight Manual clearly states this is a "GO" item, if the manual engage system is working. This was a SGN/DNG RON flights with no stops in between. Even with this extra delay, the nine delays is a record low, unequalled for over a year at Saigon. (had 28 in April).

2. Our new Cafeteria Annex Building will open for business on 9 July 1969. This building will seat 90 employees at a time, (the Main Cafeteria Building seats 80). All food services will be moved to the Cafeteria Annex on 9 July. At this time, we will perform some renovations general cleaning, painting and rescreening the windows and doors. This work will take about 2-3 weeks and then we will operate both buildings. [redacted] with a daily low priced special lunch for 60$VN. All employees will be welcome to eat in either of the two Cafeterias, depending on their personal choices.

3. Additional toilet facilities are finally under construction for the RMD hangar area. This amounts to two stools and two sinks for the ladies, four stools, six urinals and a large oval hand wash basin for the men, plus two shower stalls adjoining the men's room. The facility is located between the RMD hangar and the RMD Shops Building at the west end. This is a long awaited and highly appreciated addition to the facilities.

The flying hours for the month were down to a total of 7018:40 with the following breakdown by types:

PC6C	2384:29	C-46	741:18
204B	1185:22	C-47	653:24
102/C45	1019:59	DHC-4	77:49

SAFETY REPORT

May 1969

1. General

Pilot meetings.

MSAFE was unable to attend any pilot meetings during the month, however all meetings stressed monsoon hazards and the safety precautions to be observed with adverse winds, thunderstorms, and rain-slick runways.

Accident investigations.

1. Hard landing incident of C-47, 48C84 has been investigated. Report will be submitted in June.

2. Local Board of Review was completed for VTB, N9838Z accident of 2 March 1969, has been completed and placed in Company mail.

3. Local Board of Review for Beech 10-2, N137L accident of 22 February 1969 was convened on 27 May, but was recessed because of VTB, N3728C accident the same afternoon. N137L Board rescheduled for 2 June.

4. Review Board is pending for 204B, N1304X accident of 13 March, estimate completion by 12 June.

5. VTB, N3728C accident of 27 May at V-206, Hoi An is under investigation at present.

6. Mr. R.V. Hohmann, 204B Crew Chief was serio sly injured in a fall from N8535F on the V-01 ramp on 22 May. SAM/nW investigation stated that safe work practices were being followed. This is questionable and will be further investigated.

7. On 22 May, C-46, B-138 was overloaded with steel pipe at DNG, resulting in a landing at V-01 5,175 pounds over maximum landing weight. This is under investigation by A/SAFM/SGN. In view of past cargo loading problems at DNG vigorous corrective action is indicated.

2. Safety Suggestions.

Safety Comments and Pilot Reports.

13 May - Captain J.F. Smith cited inadequacy of the PC6 brake assembly due to excessive disc wear. He recommended a double puck assembly or more rigid adherence to disc tolerances. Processed to MTS, MFD, AMP/PC6, and USAFI.

13 May - Captain J.F. Smith cited the possibility of inadvertent movement of the engine switch to the stop position on the PC6. He suggests a spring loaded guard over the switch.

Captain McCauley stated the Beechcraft cross-chest safety belt cannot be fastened properly, restricts movement, and will not remain securely fastened. Processed to USAFI.

30 May - Captain Hildebrand's complaint about the length of C-47 seat belts (12 March 69) is still being circulated. MTS is now trying to determine what the Company standards are for seat belt lengths.

30 May - Captain McCauley cited the problem of being lost by radar because of no IFF, while flying through thunderstorms and artillery vectors. Routed to DSAFE.

30 May - Captain McCauley requested study of R-985 engine reliability due to the recent increase in failure and malfunction incicents. Routed to DSAFE.

30 May - Recommendation was submitted to study the use of inferior fluorescent ballasts as a result of numerous ballasts fires (140 some odd in the past three months). A/SSSD has requested authorization to purchase approved ballasts. Info has been forwarded to DSAFE.

3. Follow-up Action

Airfield Survey. - On 20 May the local Company Airfield Evaluation Team inspected V-243, V-151, V-242, and V-203 as a result of several accident/incident report recommendations. The Team consisted of MFD, SFD, Chief PIC, MSAFE, and Mr. Sparks of CORDS Air Operations. Copy of the report has been forwarded to DSAFE for info. SFD should be highly complimented for an excellent report.

Ground Safety - MTS has established a form, "GROUND SAFETY VIOLATION", to report individual violations of Company Safety Regulations. This will improve the ground safety program by "putting some teeth" into enforcement of the rules. MTS interest in both ground and flight safety is noteworthy. A copy of the new form is attached.

4. Unfriendly Action

DATE	A/C TYPE/NO	LOCATION	REMARKS
01	10-2/N77Y	XT9295	PIC observed AW tracers directed at A/C at 1800'. Evaded by steep left turn.
08	2048/N1305X	XS9459	PIC observed 2-5 sec bursts of AW fire at 3500' above terrain. En position was under attack by Army gunships.
08	C-46/B928	V-23	A/C sustained 8 30 cal hits at 500' while turning final. 4 rds rt inbd wing, 2 rds rt inbd flap, 2 rds left inbd flap. No injuries.
10	PC6/N9444	VS8517	PIC heard and saw 10 sec burst of AW at 2,500 feet. Evaded by flying out over water.

5. Minor Incident/Inflight Irregularity (SAFE 9)

None submitted to date.

6. Accident Reports (SAFE 4)

DATE	A/C TYPE/NO	LOCATION	REMARKS
03	C-45/N90732	V-01, South ramp	Tug driver towed A/C so that right wing struck wall. Wing tip walker gave erroneous signal. Personnel received 3 days LWOP.
06	10-2/N7950C	V-12	Right tire blew out while taxiing. Suspect FOD on runway.
08	C-46/B146	V-01	Embassy fork lift driver loading C-46 CA-3, backed into right horizontal stabilizer tip. Substantial damage.
08	C-46/B928	V-23	Aircraft hits described in paragraph 4.
09	PC6/N393R	V-01	Right rear pax door flew open during O/N runup. Fuselage bent and door stringer broken. Disciplinary action taken for crew failure to lock door.
09	VTB/N3728G	V-104	Rt main tire went flat after A/C parked Suspect FOD.
10	DHC-4/N539Y	V-17	Left fuselage torn by fork lift driven by Embassy driver. Submitted to COMUS Air Ops for corrective action. (Note - No action taken.)
11	C-45/N9896Z	V-01	Tug operator was turning to park A/C, left rudder struck wing tip of N9573Z. No signalman used, disciplinary action taken against ramp crew.
14	10-2/N9521Z	Unk	Damage to rt wing tip found on O/N svc. Dirt & asphalt stuck in 4 in scrape on bottom of trailing edge. Pilot claims he noticed damage on preflight but did not make log entry. SAFE 9 will be submitted.

MONTHLY ACTIVITY REPORT
1-31 MAY 1969

PART I
AIRCRAFT INCIDENTS

Date	A/C No, Type & Contract	Place	Description
01 May	N77Y Beech 10-2 VN-41	XT 9295 5 miles NE of V147	After observing groundfire, PIC immediately executed a hard left turn. No acft damage or personnel injuries occurred.
08 May	N1305X 204-B VN-41	XS 9459	Acft was enroute to an outpost when PIC observed two burst of gunfire directed at his acft. PIC executed immediate departure from the area. No acft damage or personnel injuries occurred.
09 May	B928 C-46 VN-41	BS 6272 left Base leg for rwy 10 at V-23.	Acft sustained eight hits while turning from base to final for rwy 10. Acft. landed without further incident. No personnel injuries involved.
10 May	N9444 PC-6C VN-41	VS 8517	Acft was enroute to V-56 when PIC heard and observed a short burst of automatic weapons fire off his right wing. No acft damage or personnel injury occurred.

PART II
SITUATION SUMMARY

Although the aircraft incidents were the lowest since August 1966, the terrorist incidents and attacks by fire during the reporting period ranked among the highest since TET, 1968. Things were relatively low key the first ten days of the period. Then, on 10/11 May, a country wide upsurge of terrorist incidents took place. In Saigon alone, there were over 20 incidents. On the eleventh, the VN Information Center was 70% destroyed. Tan Son Nhut and near-by areas were attacked by rockets on three different occasions. All the RON stations were hit. Danang three times by rockets, Can Tho at least once, and Nha Trang 15 to 20 RR rounds on 31 May at approximately 1400 hours. Ban Me Thuot, another field where we RON aircraft occasionly, took over 50 rounds of mixed rockets and mortars. On 21 May, an ammo dump at TSN was destroyed.

In Saigon there were over 20 grenade throwing incidents, 20 explosive charges detonated and 4 power stations blown, resulting in extensive damage or destruction to vehicles and property, as well as loss of life and numerous wounded.

Terrorist activities were not confined to Saigon alone. The other areas came in for their share.

The outlook for the coming period is more of the same, possibly on an increasing level, with the possibility of the summer offensive commencing in June. Personnel should exercise caution, limiting their movements during the hours of darkness to those essential. Travel during curfew hours should be done only as required to protect life. Many violators are being shot.

MONTHLY REPORT
NHA - TRANG
MAY 1969

GENERAL

May was a rather quiet month again. On Saturday 31 May we received about ten rounds in the afternoon but with little damage to the base and no damage to AAM facilities. There were a few incidents in town where two servicemen were killed. These were attributed to conflict with some of the local popular rather than an organized effort of hostile forces.

The station continues with a general clean-up and improvement campaign. Mr. D.A. STRAND, Senior Air Operations Officer of USAID/CORDS relinquished his position to Mr. Thomas Lilly at this station on 29 May. Mr. Lilly, arriving from Can Tho, was previously assistant to Mr. Strand at Nha Trang prior to his transfer to Can Tho. Initial contacts indicate a great improvement in customer relations.

TRAFFIC

A. GENERAL

Overall Traffic activities decreased very slightly from the last month with an increase in passenger handeling of some 801 persons.

MTD visited NHA during this month and assisted by pointing out areas of potential improvement. All suggestions will be handeled during June.

B. STATISTICS

Passengers	May	Last Mo.	1968

Arriving	328,595	259,265	415,147

. . . 2 . .

CUSTOMER RELATIONS

Customer relations continue to improve slowly with the arrival of Mr. T. Lilly who has replaced Mr. D.E. Strand as Sr. Air Operations Officer USAID/CCIDS. An initial coolness is expected until such time as both parties evaluate each other. We are not overlooking the fact that previous difficulties may have been between subordinates and clears of both groups. The most important faced is to build and retain good communications between PAF and USAID/CCIDS at the highest local/airport level in order to moderate any difficulties at a lower administrative level. Mr. Lilly and SZ/NEA already concur on this point and we are both working towards this.

OPERATIONS

A. GENERAL

SCR J.D. Paulding returned to the United States on A/L. Mr. T.Sheely has assumed his duties. All in all a smooth month.

B. FLIGHT FREQUENCY (See attached)

ELECTRONIC MAINTENANCE

UHF/VHF relay continues to operate in a fairly good mode. [redacted] arrived from DNG to assit in "peaking-up" our overall station radios. He will return in June to complete the work and much improvement is expected.

ADMINISTRATION

While May was a fairly routine month, June is expected to be quite busy. We begin construction of the hanger leanto, the parking lot, and Maintenance improvements of the Administrative/Traffic Building. June should prove to be a month of many accomplishments.

MEMORANDUM

TO : BM/SGN

DATE: 05 May, 1969

FROM : A/SZDNG

REF. No. SZDNG/69/038

SUBJECT: DANANG Station Monthly Report for April, 1969

GENERAL

The undersigned arrived on station on 14 April and assumed Acting Station Manager duties upon the departure of ABM/SGN on 19 April.

Hostile activity was limited to one incident, fifteen 122mm rockets were launched against the city of DaNang during the evening of 16 April, two of which impacted on the airbase. Casualties were reported as twelve Vietnamese killed, thirty wounded, and one American wounded. No company property or personnel were physically affected by this attack; one rocket did partially destroy a Vietnamese house approximately 600 yards from the Air America facility. From a briefing by USAF Security it was learned that these attacks are usually launched from an area formed by a seven and eleven kilometer radius from the city.

At 1030 AM on 27 April a U.S. military ammunition/bomb dump located on the southwest perimeter of the airbase was ignited by a grass fire causing explosions which continued for approximately 12 hours. The control tower was evacuated in the early afternoon when 2000 pound bombs started to explode which resulted in the base being closed to air traffic except for take-offs at pilot's discretion. Two Air America flights were cancelled for a total revenue loss of two hours. Our fixed wing aircraft were moved to the northeast parking ramp and the one 204B parked adjacent to a USAF revetment. Only minor concussion damage was sustained by company structures which has all been repaired; one piece of shapnel did land on the ramp. No personnel injuries were reported.

The air base was closed to all Vietnamese personnel on 28 April for no apparent reason since the activity from the ammunition dump had completely subsided. Those personnel who were able to report for duty performed admirably, handling eleven additional and special flights without a delay.

Notification was received from the American Consul that the Vietnamese authorities intend to enforce the 2000 to 0600 hours city curfew and make it applicable to all nationalities. A list of all American and TCN personnel will be submitted to the Mayor of DaNang on 5 May as requested, in order to obtain curfew passes. It is not known at this time what special proceedures might be required for our HON crew-members.

Ten Southern Air Transport flights were scheduled into DaNang during the month, however, only nine were handled by company personnel due to non-receipt of a portion of the relevant re-scheduling message. Fortunately this flight was a ferry return and no maintenance problems developed. It should be pointed out that these flights do place a significant burden on station personnel when they arrive after normal duty hours, especially on the Traffic Department when round trips are scheduled.

In the area of Facilities Development, the contract for the construction of the RMD Nose Hangar lean-to has been signed and the contractor should commence work during the last part of May. Final plans for the completion of the hangar accessway and work area paving have been formaulated and hopefully funding will be approved for this project in the not too distant future.

The estimate for making city electrical power available to the facility has been received and preliminary reports indicate that customer funding for this work may be rapidly forthcoming. The completion of these three projects should alleviate all the major problems at this station concerning facilities.

CUSTOMER RELATIONS

The only significant problems voiced by the VN-0041 customer during the month concerned the performance of 2043 number 2 services at DaNang and Security for the Ground Service warehouse. The capability for performing these services is in the process of being established and should be available by the end of May, although personnel support on a TCS basis from Saigon will be required for each one. The warehouse security problem will be examined in detail upon the arrival of a Security Team from Saigon in mid-May and two Ground Services utility positions are being presently held vacant for possible upgrading to guard slots.

Overall, rapport with both customers remains excellent.

FISCAL

One time clock has been received, but installation and use is being deferred pending a visit from MFA/SGN in May. AR/DNG will require a detailed briefing on timekeeping procedures required in conjunction with this equipment and it is possible that a requirement for a timekeeping clerk may generate.

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures for the month totaled: 49,313$VN

OPERATIONS

Revenue flight time decreased by 120+36 hrs as compared to March. VN-0041 and 4395 flying was reduced 64+31 and 64+33 hours respectively. Revenue losses during April were the lowest to date, primarily due to good weather.

The following is the break-down of flight time generated by this station during April:

VN-0041	751+25 hours
4395	306+35 hours
0005	16+25 hours
Non-Revenue	1+49 hours
Grand Total	1076+14 hours

Revenue losses for the month are broken down as follows:

Weather	19+40 hours
Maintenance	6+45 hours
Other*	2+00 hours
Customer Cancellations	1+00 hours
Grand Total	27+25 hours

* Two flights were cancelled on 27 May due to the air base being closed during the afternoon.

COMMUNICATIONS

The Motorola remote VHF relay system was installed at the Monkey Mountain site on 18 April. It cannot as yet be considered operational since there have been but six days when it has worked properly. Coverage during these times has been excellent, and it appears that the effective range of the equipment approached 180 nautical miles. AESU and Motorola personnel visit the site at least twice weekly to make adjustments on the equipment and the problems being experienced are considered normal.

Incoming and outgoing messages totaled 2280 and 1558 respectively.

TRAFFIC

The VN-41 customer office located in the CORDS warehouse was completed on 15 April and is planned for occupancy on 10 May. This move will vacate one large office in the administration building which may be utilized for expanded passenger processing facilities. The first

CORDS contracted Continental Air Services C-47 cargo flight arrived on 17 April and during the month 12 such flights were handled by Traffic Ground Services. A total of 664 departing and 661 arriving flights were handled.

Passenger and cargo statistics for the month are as follows:

	Passengers In	Passengers Out	Cargo In	Cargo Out
VN-0041	2640	2866	304,373 lbs	385,140 lbs
4395	475	544	17,700	29,457
0005	17	12	None	200
Ferry	32	32	None	None
AAM	84	140	5,527	23,032
TOTAL	3248	3594	327,600 lbs	437,829 lbs

PERSONNEL

One Third Country National employee had to delay starting his annual leave due to non-receipt of his exit/re-entry visa and extension of stay. This problem is expected to be compounded in May and could result in the re-scheduling of some leave plans. The requisite paperwork for obtaining the above visas are presently being submitted two months in advance of travel, but it appears that even more lead time is required.

The personnel breakdown for DaNang Station during April is as follows:

	[redacted]			
Permenant	4	17	33	113
Temporary	1	0	0	1
Pre-Process	0	0	0	7
Daily Hire	0	0	0	0
TOTAL (176)	5	17	33	121

TECHNICAL SERVICES

Only 3 maintenance delays were incurred during the month out of a total of 635 departing flights. The number of heavy services totaled 9, a decline of 3 from the previous month. There were no engine changes and two aircraft were grounded for parts. AGMD expended a total of 1756 man-hours of which 294 were utilized for hostel maintenance. All work on the nose hangar was completed with the installation of overhead flourescent lighting. A replacement cylinder head for the GMC truck was received but was found to be unusable due to hairline cracks. No significant problems were encountered in the realm of MSA procurement.

INTELLIGENCE MEMORANDUM

The Liberation Front's New Peace Proposal

1. The Vietnamese Communists have proposed a new approach to a settlement of the Vietnam war. Their goal remains, as before, the unilateral withdrawal of US forces and the replacement of the present government of South Vietnam with a coalition government which the Communists will have a hand in forming and be able to control. The latest Communist proposal, however, is packaged in what Hanoi hopes is a much more attractive wrapping that conspicuously avoids attacks on the US and the South Vietnamese Government. The new proposal was probably stimulated by the Communists' desire to regain the propaganda initiative from Thieu and to maximize the opportunities for creating confusion and disarray among non-Communist political elements in Saigon. Nevertheless, the public dialogue which has taken place between Thieu and the Communists has now served to move them both somewhat in each other's direction. Both sides have now set forth the terms under which they would agree to discussions on a political settlement.

2. In essence, the National Liberation Front ten-point proposal of 8 May, called "the Main Principles and Contents of the Total Solution," seeks to eliminate the US from discussions on all issues except that of the withdrawal of US and other free world forces, which still must be complete and unconditional. The status of North Vietnamese troops would be taken up by the Vietnamese delegations.

Note: This memorandum was prepared largely by CIA, with contributions from the Department of State, which concurs in it.

APPROVED FOR RELEASE
DATE 6/29/98

SA99 D-64

NND 942005-700

10

6. A number of omissions appear to be intended to suggest a softer line toward the South Vietnamese Government and its constitutional structure. Thus, the Front statement makes no demands for the overthrow of the "lackey puppet administration," in conspicuous contrast to the emphasis placed on this demand in the 1967 Front program. By this omission the Front appears to be suggesting that the South Vietnamese Government can be included among the "political forces" that are to negotiate the establishment of a provisional coalition government. This impression is reinforced by the prohibition of discrimination against those who have "cooperated with one side or the other" and the absence of references to "repentance" in one form or another as a precondition to equal treatment, although the Front does insist on adherence to "peace, independence, and neutrality". This wording is sufficiently vague that it does not necessarily exclude the South Vietnamese Government; it would certainly allow such political forces as the Alliance, the militant Buddhists and virtually every other disparate Vietnamese politician to participate. Point five may also have been intended to suggest that the negotiations for a provisional government could take place while US forces are still in country, although a cease-fire would be in effect. This would also be a first for the Communists.

7. The Front statement deals in familiar terms with the normalization of North-South relations and reunification. (Point Seven) It reiterates that the demarcation line as established in the 1954 Geneva Agreements is "provisional" and "not a political or territorial frontier." Pending reunification, "the two zones will agree upon the status of the Demilitarized Zone and set forth the regulations for crossing the provisional demarcation line of the Demilitarized Zone." This statement appears to require bilateral control of the Demilitarized Zone and, by implication, to exclude the Zone question as something to be negotiated multilaterally as part of the peace settlement.

8. Another new and hard element tossed into the Front proposal is point nine, which calls for negotiations on the release of prisoners of war but which couples this with a virtual demand for the reparations from the US to both North and South Vietnam for war damage.

NND 942005-701

M O N T H L Y R E P O R T

H E A - T R A F F I C

JUNE 1969

GENERAL :

June proved to be another quiet month with respect to non-friendly activity. Incidents between local populace and non-indigenous persons are increasing, however. The effect of the much-publicized "troop pull out" has not been felt as yet. There has re-location of some support units within the PHA Delta area, but no noticeable decrease of military personnel.

The new lean-to adjacent to our hanger is 90% completed. Upon completion, the scooter shed will be begun with a construction time of 15 days. All material and base pass problems have been resolved and we will finish with in the allowance [illegible] protection fins.

The radio room was enlarged, pilot lounge relocated, and a new S-2 office completed. All with locally obtained material and in-house labor.

All-in-all a smooth month with only minor problems involved.

TRAFFIC :

A. CARGO

Station activities declined while a C-46 was replaced with a C-47. While per flight uplift will be effected, we will increase flexibility in scheduling smaller cargo loads to smaller fields in II Corps.

In line with the cost reduction, and at the request of COMUSMACV, a report has been submitted to COMUSMACV and II/SOTA recommending surplusing of 5 persons from the ground services contract. We wait a decision on this. Reduction of base traffic personnel is undergoing scrutiny.

B. STATISTICS

3. CARGO TOTAL (1 + 2)

Reporting	328,018	321,641
Arriving	322,575	155,762

CUSTOMER RELATIONS

From this point of view, Customer relations remain fair with no MAJOR complications this month. The one problem area existing is the one in which two of our base Traffic personell are physically located in the CHDS office. The major portion of their work is an Air Service function, the other work is strictly a CHDS responsibility. Difficulties develop from time to time when supervisory responsibility/ authority for these positions is questioned by either party. Ultimately we hope to have these persons transferred to the CHDS payroll thus resolving this problem.

OPERATIONS

A. COMMUNICATIONS

No equipment outage this month. The radio room was enlarged, wiring cleaned up and routed in an orderly manner and receivers and transmitters separated by the length of the room.

Relocation of the UHF/VHF Antennae and tuning of the equipment on [illegible] Island is providing improved operating conditions.

One Radio Operator has resigned, and in keeping with the cost reduction program, he will not be replaced.

B. WEATHER

Inland weather has been extremely bad. Weather along the coast remains comparatively good.

C-46 Aircraft no longer Ops. at LHI. The one remaining C-46 was replaced with a C-47.

C. FLIGHT REGULARITY (See attached)

D. [illegible] MILITARY CONTRACT

SAIGON BASE
MONTHLY REPORT
JUNE 1969

I. GENERAL

1. Revenue block hours declined to a new low of 6220 in June. The previous low over the past two years was 6755 as reported for last month. It appears our SVN operations will stabilize at the 6500 block hour level.

2. Keeping pace with our reduced work load, 148 personnel have been terminated "for the convenience of the company". This does not include the normal attrition due to resignations, terminations for disciplinary reasons etc., The pereonnel terminated are of the following categories: [redacted]

3. Except for sporadic rocket attacks against Saigon and Danang, enemy activity has declined to the level which existed prior to the infamous 1968 TET offensive.

II. FACILITIES DEVELOPMENT

1. June saw considerable construction activity at Saigon, Danang and Nha Trang. At Saigon, Contractors have completed the Utilities Building and made substantial progress on the Fire Brigade Station and RMD Toilets & Crew Shower.

Despite a delay due to theft of wire mesh, the west Ramp should be completed by 25 July. 90% percent of the ramp surface is now cured and in use. The Utilities Tunnel is 40 Linear ft. from completion.

2. The Revetment Wall project is moving faster than expected; the Northeast Ramp portion is complete.

The Saigon Base Area Lighting Project and the RCMD Water Supply Project are about to get underway as materials are being received.

The TSN Common use Water Distribution System project will be installed in July. This should bring a much needed water supply to AAM area in August.

3. RMK-BRJ, at the request of AFRCE, installed a culvert under the main taxiway leading into the Air America area. This will considerably help the drainage of the area west of the main hangar.

4. The Leanto project at Danang is moving rapidly. The Contractor has the shell erected and is working on the partitions.

The Nha Trang Leanto is nearing completion; siding and roofing are being installed.

The Parking Lot and Scooter shed project at Nha Trang will be completed by the Contractor before 1 August

The Power Distribution System Project at Nha Trang is in work and should be completed in September.

5. Link Trainer. Our Link Trainer became fully operational on 11 June 1969. It is being scheduled for four, two hour periods, six days per week.

III. FLYING

1. The unprecedented reduction of four Reserve captains has induced much concern among other Junior captain. Speculation ran high as to further reduction. Requirements from Vientiane has reduced, somewhat, our pilot inventory. Four First Officers have transferred to VTE to fill slots there. One Captain and one First Officer transferred to UTH to fill H-34 vacancies there.

Manning in the VTB program is still a cockle-burr under a horse blanket. The program itself; considering flight time, does not authorize the manning needed. We were relieved of night standby requirements (a welcome relief) but other low flight time, long duty days are still in evidence.

2. The flight time in the PC6 program is most flexible. We were called upon to expect reconversion of two of the PC6C to PC6A. The other programs are running smoothly.

3. ANF Anderson is temporarily with FSD/VTE as Flight Examiner for VTB, 10-2/C45 during F/E Meier's absence on Home Leave.

Beechcraft

The program took another set back this month due to Customer in III Corps VO2 replacing the Beechcraft with a Porter. We gained one more Beechcraft in Can Tho IV Corps.

Morale in the Beechcraft program continues to be good. All the customers feel that our pilots are doing a good job throughout the system/

Safety is one everyone's mine - we have approximately 118 accident free days. We hope to continue.

4. C-46 - Forecast time for June was 726 hours but the actual time flown was 696+34 which was less than time for May. One minor accident marred the safety program.

5. C-47 - The program picked up a bit from the previous month but is still rather slow. The forecast hours were 776 and only 679+40 were flown.

One taxi accident marred the safety program and the PIC was awarded two weeks LWOP.

6. Helio - All but one Helio are in temporary storage here in Saigon. The one remaining Helio B867 is still in commission and 2 hours and 53 minutes were flown on 2 non-revenue flights.

7. 204B - The flight time for June dropped about 55 hours for a total of 1131 hours.

With the addition of one captain the manning level is 32 captains and 1 First Officer. With the manning level and the loss of flying time, the program is holding up very good on pilot time. The average pilot time was 78 hours for the month.

The possibility of transferring some captains to Udorn in the future has boosted the morale of the pilots. Especially some of the old pilots that have been in Saigon for 3 years.

8. PC6C - June fell below the predicted flight time by 200 hours and a realistic porter flight time average will be 2250 instead of 2400. We have been advised by III Corps Air Ops. that flight 431 will not be flown on Sunday, and flights 131 and 231 will be reduced on Sunday from eight and ten hours to five and five each. This is an average loss of sixty hours per month.

AMF/PC6C has expressed to MTS-SVN his concern and requested MTS's assistance in trying to overcome the problem of engine failures on power plants with low time since overhaul. Since AMF/PC6C has had overhauled engines fail after 24, 5, 340 and 425 hours. There was one other for sure but the elapsed time since overhaul is not known to him.

As June ended the Porter Program was taking on a more suitable air.

9. VTB - The program was manned with 15 captains and six First Officers as we started the month. Pilot qualifications in the VTB are at a new all time high and improving.

Projected aircraft flight time was 1,113 hours with 938+03 being flown. Some loss was due to temporary non-availability of aircraft and some to weather, however, these were minimal. Lack of utilization accounted for the majority of the difference.

We have once again shaken the yoke of night stand-by. This commitment cost us four man days for two pilots to standby each night. Relief from this requirement will permit a better regulated STO program.

IV. OPERATIONS

1. Total revenue block time for June was 6220 + 43 as compared with 6755 + 16 for May and 7682 + 49 for April. Three Helios, B875, B849 and B839 are in temporary storage in Saigon

2. Flight time report (See attachment A)
   Aircraft Incidents Report (See attachment B)
   Flight Frequency Report(See attachment C)
   Flight Time Information (See attachment D)
   Ground Transportation (See attachment E)

3. Communications - Posts and Telecommunications technicians succeeded in repairing the damaged cable which carries our leased teletype circuit. Since mid-June we have enjoyed good service and outages have been negligible.

We have not yet received any reply from Posts and Telecommunications regarding our proposal to establish a direct radioteletype circuit between Tan Son Nhut and the Post Office Building. This proposal is not as pressing as heretofore but it still remains quite desirable. We hope to hear from them soon - yea or nay.

The remote VHF/UHF automatic retransmission systems at Da Nang and Nha Trang worked well.

SCM composed a memorandum advocating that the company establish the necessary stock level of spare parts and procure the test equipment required to enable the Company to provide direct maintenance support for the systems utilizing ED personnel rather than depend upon Motorola's technicians.

We have received no official correspondence regarding our request for allocation of additional HF frequencies. However, we have been informed by MACV Frequency Branch that CINCPAC did in fact recommend that Air America be allocated five frequencies. Formal authorization is pending approval action by DOD Frequency Allocation Board in Washington.

Air America signed two lease agreements with Posts and Telecommunications for the transfer of phone lines 21298 and 22726.

New procedures for intra-SVN Company mail pouch handling were published whereby the M/Cs will use only scheduled passenger flight aircraft since there are adequate daily flights to all stations.

SCM continues to receive hardware for the relocation of transmitter sites at Saigon, Danang, and Nhatrang. Word was received that the antenna towers are on the high seas and should be in hand in approximately a month's time. The cable for the Base telephone distribution system has been received and installation will begin shortly. OKI has indicated a delivery date of mid-October for PABX.

No word has been received from AMTRACO regarding GE's willingness to provide equipment for our Base ramp control network.

4. EMD

The favorable trend of continued progress on long dormant projects continues. With the exception of excessive outages on leased teletype lines between AAM Airport Base and the Central Saigon Post Office, (PTT), we encountered no major problems. SCM visited Danang and Nhatrang stations with the duel objectives of formulating a Company maintenance capability on the UHF/VHF Retransmission Installations, and updating on the HF relocation projects, for which material procurement is in progress.

Telephone cable ordered under FE-5000 for Saigon Base telephone cable distribution has been received and installation will commence shortly.

5. A plan for the company to acquire a maintenance capability for the Motorola UHF/VHF Retransmission facilities at Danang and Nhatrang has been formulated and forwarded to DED and MCRD. This action is considered mandatory if the operational advantages gained by these installations are to be retained.

6. We have begun phasing all company owned teletype equipment held at Saigon and Danang to MMB for IRAN in anticipation of long planned Company radio-teletype circuits finally approaching activation.

	Message Traffic	
	May	June
Incoming	10436	9615
Outgoing	12854	10979

V. TRAFFIC/AAM

TM/Base has remained in the temporary additional position of SRTM/SVN. During this month, the primary mission [redacted] was to tag all aircraft seats with AAM property tags and initiate proper traffic inventory control. All ramp agent slots have been filled thus giving full strength in that area of responsibility

	May	June
Passengers departure SGN (All contracts)	5539	5375
" arrival SGN (All contracts	6713	6137

VI. HOSTEL OCCUPANCY

During the month, 77 beds out of 180 were occupied for a 42.7% occupancy rate. Also during this period a total of three non-avail. slips were issued, one for the month of April.

VII. CANTHO SUB-BASE

1. Can Tho facilities have been improving during the past month. The new terminal building is presently occupied by CORDS Air Operations while AAM RMD is occupying the Pre. Fab. and a CORDS 110V generator accommodated the whole area. The construction of a ramp from the PSP to the concrete area adjacent to our building is pending Air Field Commanders decision. 191 ASO numbers were assigned for routine and light non-routine maintenance; 2 heavy service ASOs were assigned for engine changes on aircraft N9664C and N5269V.

XI. TECHNICAL SERVICES

1. There was a decrease of 600 flying hours this month representing some 8.7% of our total for June. We all like to think this drop is because of the customers fiscal year (spending) is coming to its end. A portion of the lower flying no doubt can be contributed to this, but not all.

2. Available manpower must be reduced to align with the workload, as programmed to the flying hours. We are programming a "phased reduction" to better evaluate the changing requirements without putting ourselves in a bind. Unfortunately we are now having to select many good performers as excess, because the workload has decreased below that anticipated.

3. The RMD aircraft reliability has shown considerable steady improvement with the stress on better troubleshooting and Log Book reviews, not to mention closer supervision. Training classes are also being given on engine conditioning to include ignition systems. General ground safety habits have improved within all Technical Service Departments, particular on the ramp.

4. Near elimination of aircraft heavy services at our sub-bases has helped to balance the workload at Saigon Base and personnel reductions were then possible at Da Nang and Nha Trang. Supply stock levels are under process at Sub bases to meet the lower station classifications. We would like to eventually discontinue all heavy services at Danang. At present we are doing Number 1 Services on the 3 Porters at Danang using Danang personnel and in addition we send a field maintenance team from Saigon to perform Number 2 Services on the 204B's which occurs about 4 times each month.

5. We have visited by USAF Contract personnel from Japan. They reviewed our facilities for possible maintenance contract work to be done in Saigon. C-47 IRAN work capabilities was the main topic. These men have previously toured the Tainan and Udorn Facilities, so we could not compare, but they felt our aircraft looked better and were impressed with the quality of the end product in view of our limited hangar space, facilities and supporting shop equipment

6. The flying hours for the month were down to a total of 6408:07 with the following breakdown by types:

PC-6C	2169:39	C-46	676:34
204B	1131:02	C-47	679:40
10-2/C45	770:42	DHC-4	36:42

INTELLIGENCE MEMORANDUM

Expansion of North Vietnam's International Radiobroadcasting Effort

Summary

Since early 1968, international radiobroadcasts controlled by Hanoi have climbed from nearly 300 hours per week to more than 500 hours. Radio Hanoi and Radio Liberation (the clandestine voice of the Viet Cong) have accounted for most of this expansion, with smaller increases in the clandestine broadcasts known as Radio Pathet Lao and Radio of the Patriotic Neutralist Forces (Laos).

The primary target audiences for Hanoi's official and clandestine international broadcasting are the indigenous populations of South Vietnam and Laos. Allied forces in South Vietnam also have begun to receive substantially increased attention, and since the beginning of the Paris talks, Hanoi has initiated radiobroadcasting to the European area. Transmissions to Europe now amount to almost 40 hours per week.

The clandestine broadcasts of Radio Liberation, Radio Pathet Lao, and Neutralist Forces Radio are not independent operations originating from South Vietnam and Laos, as represented by North Vietnam and other Communist countries. From all indications, these clandestine broadcasting operations are tightly controlled by North Vietnam and probably are carried out from the Radio Hanoi transmitting complex located at Me Tri.

North Vietnam has achieved this rapid expansion in international programing by importing seven new

Note: This memorandum was produced solely by CIA. It was prepared by the Office of Economic Research and was coordinated with the Office of Current Intelligence [redacted]

transmitters -- bringing to at least 18 the number of transmitters in international service -- and by making more intensive use of existing facilities. Hanoi is procuring more broadcasting equipment from both Communist and Free World countries, and it can be expected that the North Vietnamese radio propaganda effort will be further stepped up.

North Vietnam's Radio Propaganda Apparatus

1. North Vietnam's international radio propaganda apparatus is tightly controlled by both the Lao Dong (Communist) Party and the government. To reach its target audiences, located primarily in Indochina, Hanoi has developed a coordinated schedule of both overt and clandestine broadcasting. At the policy level, guidance and control over the international broadcasting effort is exercised in tandem by the Propaganda and Training Department of the Lao Dong Party Central Committee and by the General Directorate of Information, attached directly to the Office of the Premier. Provision of facilities, equipment, and technical personnel is the responsibility of the Directorate of Broadcasting, a subordinate arm of the Ministry of Communications.

2. For day-to-day operations, the focal organizations are the Vietnam News Agency (VNA) and Radio Hanoi, as shown in Figure 1. The VNA provides Radio Hanoi with the information used in daily international broadcasts and utilizes Radio Hanoi's facilities to broadcast its international radio-teletype news service.*

3. There is strong evidence that in addition to its own official radiobroadcasting effort North Vietnam exerts direct control clandestinely over the radio propaganda activities of the Viet Cong (the so-called National Front for the Liberation of South Vietnam, or NFLSV) and the indigenous Communist forces in Laos -- both the Pathet Lao and the less important dissident Neutralist Forces. The VNA in Hanoi maintains direct radio communications with the Liberation News Agency of the NFLSV in South Vietnam and with the Pathet Lao News Agency in Laos. There also is evidence that the dissident Neutralist Forces in Laos use the Pathet Lao radio communications facility to stay in contact with Hanoi.

4. From all current indications, the clandestine stations share with Radio Hanoi the use of the transmitter complex at Me Tri, just outside Hanoi,

---

* *In addition to their international radio propaganda activities, VNA and Radio Hanoi are also responsible for domestic radiobroadcasting.*

although their broadcasts are represented by North Vietnam and other Communist countries as independent operations carried out from South Vietnam by the NFLSV's Radio Liberation and from Laos by Radio Pathet Lao and Radio of the Patriotic Neutralist Forces. Daily international radio-teletype services operated by the Liberation News Agency and the Pathet Lao News Agency also are broadcast clandestinely over the Me Tri facilities.

Broadcasting Buildup

5. North Vietnam has substantially increased its volume of international broadcasting -- both official and clandestine -- since early 1968. The total volume of programing rose from 294 hours per week in February 1968 to 508 hours per week by May 1969, with most of the increase directed at audiences in South Vietnam and Laos (see Figure 2).* Within this period, the number of broadcast hours targeted at South Vietnamese audiences alone jumped from 94 hours to about 168 hours per week, an increase of nearly 80 percent.

6. Overt international broadcasting by Radio Hanoi climbed from 152 hours to 270 hours weekly. This was sufficient to raise North Vietnam from eleventh to eighth place among Communist countries in the volume of official international broadcasting. Radio Hanoi's international broadcasts are directed mainly at South Vietnamese and Montagnard audiences, but an increased amount of broadcast time has also been allocated to Allied forces in South Vietnam, to Thailand, and to Cambodia. Until 1968, North Vietnam beamed no broadcasts to Europe. Since the beginning of the Paris talks, however, Radio Hanoi has developed a schedule of voice news broadcasts to Europe that currently consists of 21 hours a week in English, French, and Vietnamese. These broadcasts are nominally directed to VNA offices in Paris and Moscow but can be heard by anyone tuned to the right shortwave frequencies.

7. Liberation Radio's international programing has more than doubled since early 1968, increasing

* *In contrast, the volume of domestic broadcasting by central radio stations in Saigon and Vientiane has remained relatively static since 1966.*

from about 53 to 125 hours per week. As the voice of the Viet Cong, its broadcasts are targeted primarily at the South Vietnamese population, but it does carry some programs in Cambodian, Mandarin, French, and English. Like Radio Hanoi, Radio Liberation began in 1968 to broadcast to Europe and has recently increased its programing to this area from 14 to 17.5 hours per week.

8. Radio Pathet Lao has increased its programing output by about 30 percent to almost 80 hours per week since early 1968, with all of its broadcasts aimed at Laotian audiences. About 55 percent of Radio Pathet Lao's weekly broadcast hours are in the Lao language, with the remainder allocated to programs in minority languages such as Lao Theung, Lao Soung, La Ve, and French.

9. Radio of the Patriotic Neutralist Forces showed a relatively modest increase of more than 20 percent -- from about 29 to about 36 hours per week -- between early 1968 and early 1969. This broadcast operation evidently was originally organized and sustained by North Vietnam for the purpose of winning over moderate neutralist sentiment in Laos to the Communist side. Coincident with the beginning of a North Vietnamese military offensive in Laos, however, Neutralist Forces Radio went off the air abruptly on 6 February 1969 and remained silent for almost three months. Since resumption of operations late in April, Radio of the Patriotic Neutralist Forces has abandoned its relatively moderate propaganda line and now is virtually indistinguishable from Radio Pathet Lao.

Transmitting Facilities

10. The Me Tri radiobroadcasting complex, located about four miles southwest of Hanoi, houses the only known international radiobroadcast transmitters in North Vietnam. The main transmitter building at Me Tri is connected by cable to the control area of the Hanoi International Radio Transmission Station at Dai Mo, which is North Vietnam's principal international point-to-point communications facility and is located about two miles southwest of Me Tri. It is probable that Dai Mo is the facility used by the VNA in maintaining its out-of-country radio communications

with Liberation News Agency and Pathet Lao News Agency headquarters. Another cable and a wireline lead northwest from the Me Tri control building toward the Hanoi Citadel. These landlines are probably used to link studio facilities and government authorities in central Hanoi with the two transmitting stations.

11. The number of transmitters used by Radio Hanoi for overt international broadcasting evidently increased in 1968 from three to 13, all but one operating in the shortwave band. Of the ten transmitters added to Radio Hanoi's schedule, one probably was transferred from the domestic service, two apparently were reassigned from Radio Liberation broadcasting, and the remaining seven were newly procured from foreign suppliers (four from Communist China and three of unknown origin). At least five other transmitters are assigned to the clandestine broadcasting effort, and it is also possible that Radio Hanoi allocates some program time on its own transmitters to clandestine broadcasting.

Outlook

12. North Vietnam can be expected to continue expanding its international radiobroadcasting effort in terms of both total broadcasting hours and geographic coverage. A new 20-kilowatt shortwave broadcast transmitter -- ordered from Japan in late 1968 -- probably will go into operation before the end of 1969, and North Vietnam has concluded contracts with other Communist and Free World countries for an unknown quantity of additional broadcast equipment. Hanoi also may choose to expand its broadcasting output by using existing transmitters more intensively. South Vietnam and Laos will remain the primary targets for radio propaganda out of Hanoi, but broadcasting to other parts of southeast Asia and to the European area -- including the Communist countries -- probably will share in any increase in the broadcasting effort.

MEMORANDUM

TO : BM/SGN

DATE: 07 June, 1969

FROM : A/SZDNG

REF. No. SZDNG/69/055

SUBJECT: DANANG Station Monthly Report for May, 1969

GENERAL

During the month of May there were approximately five occasions in which the city of DaNang received hostile fire from enemy rockets. None of these incidents were of sufficient intensity to merit detailed reporting, but they do point out Viet Cong's continued capability to launch such attacks. The increased enemy activity anticipated prior to Ho-Chi-Minh's and Buddha's birthdates failed to materialize, therefore plans for night stand-by crews at the airbase were cancelled.

A curfew exemption for our essential personnel was received from the Office of the Mayor of DaNang, but it was in the form of one approved list. The requests for curfew exemptions were so numerous that the issuance of individual passes was precluded, but other than a few TCN employees being stopped at check points, no serious curfew incidents were reported. The American Consul advised they would offer all possible assistance should any personnel be arrested as a result of a curfew violation.

The number of Southern Air Transport flights into DaNang increased from April, totaling eight round trip and three one way missions. All these flights were met by representatives from MED, Operations and Traffic even though there were several arrivals during curfew and the early morning hours. None of these personnel ever failed to report for work as scheduled due to handling these flights but there were generalized complaints as to their efforts going seemingly unrewarded.

One outstation recovery was necessary; on 27 May VTB 3728G sustained damage to both propellers during a landing at Hoi-An, approximately 15 miles south of DaNang. Efforts to have the aircraft lifted back to DaNang that evening by helicopter were discontinued due to high surface winds. Repairs were made the following day, which included changing both propellers and one engine; the aircraft was flown to DaNang for further inspection, and subsequently ferried to Saigon.

LEGAL

The lease for the company hostel [redacted] was renewed during to the month for an additional year. A supplementary agreement was negotiated for a fifteen thousand piaster annual rent reduction for the duration of the contract which deleted the requirement for the lessor to repaint the building at least every two years. Past experience seems to indicate it would be next to impossible to enforce the painting provisions of the lease contract at other than renewal time.

..... Cont'd

SUBJECT: DANANG Station Monthly Report for May, 1969

CUSTOMER RELATIONS

The VN-41 customer has expressed particular satisfaction over the performance of 2048 number two services at DaNang, the expeditious arrival of a VT3 to replace 37228 (arrived the evening of the above incident), and our parking of C46 and C47 scheduled passenger flights adjacent to the boarding gate rather than on the back ramp. It was not possible to perform the third number two service required on the VN-41 assigned 2043 at DaNang during the month, but since a replacement aircraft arrived in time to permit an uninterrupted flight schedule, no strong complaints over the ferry expense were received.

The 4395 customer continues to be far more reasonable and understanding of the problems involved in the operation, and those which do develop can usually be resolved on the local level.

FACILITIES

Contractor construction of the lean-to extension to the nose hangar commenced on 16 May, and by the end of the month, work representing twenty per cent of the bid price was completed. The lean-to componets were all received from Nha-Trang and to date the contractor has not expressed any disenchantment as to the obvious amount of materials which will be required in addition to the basic framework and siding.

The requirement for a reliable source of electrical power is becoming more and more apparent. The USAF supplied 100 KVA generator was inoperative on several occasions, and was shut down the greater part of a day in two instances. The third generator in six weeks was installed, each successive unit seeming less reliable than the one it replaced. These power failures are more than just an inconvenience since all routine work ceases for the duration due to lack of interior lighting in the Operations/Administration building. A pro forma Ad for the installation and distribution of city power to the facility has been submitted and expeditious approval of this project would be most appreciated.

FISCAL

The use of a time clock for timekeeping purposes was deferred until at least 16 June due to the time clock received being a 50 cycle unit which is incompatible with the 60 cycle electricity presently available. Minor problems of the instruction booklet printed in Japanese, and company timecards which are too wide to fit the time clock slot will be more easily resolved. The clock is being shipped to Saigon for possible modification or further shipment to Japan for conversion to 60 cycles.

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures for the month totaled: 56,235$VN

SUBJECT: DANANG Station Monthly Report for May, 1969

OPERATIONS

Revenue flight time increased over the previous reporting period for the first time this year. VH-41 and 4395 flying increased 87+41 hours and 5+33 hours respectively over April. Revenue losses during May were down considerably from April for a total of 5+30 hours as compared to 27+25 hours.

The following is the breakdown of flight time generated by this station during May:

AID/VH-41	839+06
4395	312+08
0005	Nil
Non-Revenue	4+48
Total	**1,156+02**

Revenue losses for the month are broken down as follows:

Maintenance	3+30
Customer Cancellations	2+00
Weather	Nil
Other	Nil
Total	5+30

COMMUNICATIONS

The Motorola remote UHF/VHF system seems to be becoming more and more reliable with experience; it was out of service on eight occasions during the month. The use of the station VHF as a back up unit has minimized difficulties during the above periods.

Incoming and outgoing messages totaled 2402 and 1648 respectively.

TRAFFIC

The only significant problem encountered during the month was the decrease of the passenger seat allocation on Flight 12 to eight for this station. Consequently it may prove more difficult to move company personnel from DNG to NHA as this flight provides the most frequency between these two points travelling southbound.

SUBJECT: DANANG Station Monthly Report for May, 1969

TRAFFIC (Cont'd)

Passenger and cargo statistics for the month are as follows:

	Passengers In	Passengers Out	Cargo In	Cargo Out
VR-41	2,705	3,023	225,466 lbs	329,665 lbs
4395	569	758	11,820	14,027
0005	3	2	Nil	Nil
Ferry	29	29	Nil	Nil
AAH	139	137	29,502	32,387
TOTAL	3,445	3,949	266,788 lbs	376,079 lbs

Eleven Continental Air Service and fourteen USAF caribou flights were handled by this department during May.

SECURITY

Based on the recommendation of the Security Team Survey conducted during May, the VR-41 customer has verbally approved the upgrading of two Ground Services UTM positions to guard slots to provide overnight guard surveillance of the CONUS warehouse. Written confirmation of this approval is expected shortly.

An NSE was submitted requesting authorization for the position of Guard Supervisor, which if approved, will provide effective direction and supervision of the security effort at this station which is presently lacking.

PERSONNEL

A change in processing procedures at Saigon has shown some signs of relieving the backlog of visa and extension of stay applications for DaNang personnel. The problem has become less serious than that which prevailed during April.

The personnel breakdown for DaNang station during May is as follows:

	[redacted]			
Permanent	4	16	33	106
Temporary	1	0	0	0
Pre-Process	0	0	0	11
Daily Hire	0	0	0	0
TOTAL (171)	5	16	33	117

SUBJECT: DANANG Station Monthly Report for May, 1969

TECHNICAL SERVICES

RMD handled a total of 683 arriving and 684 departing flights, of which only 5 of the latter were delayed due to maintenance. The VTB 3728G recovery accounted for the only engine change and two of a total of three propeller changes. Ten heavy services were performed, including three 204B number two services which were supported by TCS personnel from Saigon. With the exception of 28G, no aircraft were delayed due to being grounded for parts.

BCMD expended a total of 1478 manhours, of which 268 were utilized in hostel maintenance and painting. The cylinder head discrepancy on the GMC truck was remedied when a serviceable head was obtained from local sources. This vehicle should be back in service during the early part of June.

A more detailed examination of each MSA invoice is planned so that a large outstanding credit balance can be reconciled with their fiscal office. Assurances have been given by MSA that this problem will be rectified in the May invoice.

WORKING PAPER

The Central Office for South Vietnam (COSVN):
Its History, Organization and Functions

10 June 1969

This is not an officially approved publication of CIA. It is circulated for information subject to the enclosed statement of limitations.

SECRET
NO FOREIGN DISSEM

MICROFILMED

(1)

APPROVED FOR RELEASE JULY-1999

C 763

SCOPE

The Central Office for South Vietnam (COSVN): Its History, Organization and Functions, 10 June 1969, 83 pages plus a 4-page Table of Contents, a 3-page list of abbreviations used, a 6-page attachment summarizing schematically COSVN's organization and personnel, a similar 3-page attachment concerning the National Front for the Liberation of South Vietnam (NFLSV), and a 15-page index of all personal names cited. The paper, after a brief review of the steps leading up to the formation of COSVN in October 1961, discusses in detail the organization, functions and personnel of the various COSVN components, both civilian and military. In many cases, biographic data are included on the individuals mentioned. The paper ends with a discussion of the role of the NFLSV in the communist insurgency and the nature of COSVN's relations with its subordinate echelons. The paper was prepared by a CIA research unit in the field on the basis of all information available to it. A discussion of the sources used constitutes the first paragraph of the body of the paper.

LIMITATIONS

Any questions with respect to the use of this document or the material therein in a manner contrary to the dissemination controls should be addressed to Document Division, OCR.

I. CAVEAT

1. While some original research has gone into the preparation of this report, the bulk of it is based on other reports. Due to a short due date for the report and the extremely broad range of coverage, the compilation could not be especially critical either. In some instances, for example, parts of other reports were incorporated without any significant changes. An attempt has been made to credit some of these sources within the text. In general, the most used sources were MIC and CMIC interrogation reports, FVS's, Documents and Research Notes No. 23 and 40 of CICV Newsletters and Special Studies, JACV J2 SRA Newsletter 11, the [redacted] study on Security Sections, CDEC Translation Summaries, and [redacted] Memoranda. (See the list of abbreviations for the above acronyms.) (61 63 (5))

2. Given the Viet Cong (VC) propensity for clandestine working procedures and their use of pseudonyms, an itemization of COSVN leadership is tentative at best.* In addition, there never has been any one source of information on COSVN as a whole, therefore, the information is spotty. Nor is there an abundance of current information; much of what is available is out of date. The currency gap is particularly a vulnerable drawback because under the current pressures of the war and peace talks, it is certain that COSVN has undergone even more than the usual number of alterations.

3. The whole VC structure always has been flexible and subject to continuing reorganization, and COSVN is no exception. Thus, the major value of this study is that it pulls together under one cover the products of numerous other studies. As such, it should be viewed and utilized more as a framework for future compilations and as a background against which future changes can be measured, rather than as a definitive study of COSVN.

4. At present, the VC flexibility seems to be evidencing itself in a trend toward closer control by COSVN personnel in the forward areas around Saigon and to a lesser extent in the Delta. This is particularly true in the staffing of the Sub-Regions (SR) surrounding Saigon and Forward Military Command Posts (Fronts). Another area where COSVN personnel appear in great numbers in exposed forward areas is in the field of espionage and intelligence. Particularly vulnerable in this

[illegible] are cadres assigned to Military Intelligence, Military Proselyting, and Security. Even more vulnerable are its communication lines between the COSVN base areas and teams of its undercover cadres, although COSVN appears to be turning to radio and other electronic means of communications to overcome this weakness. However, the fact that cadres are operating out of COSVN is no guarantee of their importance since COSVN sees and does draft people from lower echelons.

5. The bulk of this paper probably will preclude a complete reading by any but the most dedicated. For this reason, it should be pointed out that the introductory section and the discussion of the members of the Current Affairs Committee are of general interest. At the end, the discussion of COSVN's relationship with its subordinate regions and MR's is also of general interest although less so. The detail contained in the intervening discussion of the sections of COSVN, civilian and military, and of the Front are not designed for the casual reader.

II. BACKGROUND

6. During the Viet Minh period (1946-1954), the whole of Vietnam was divided by the Vietnamese Communists into nine inter-regions. With the exception of two provinces, the area of SVN was covered by two of these; Inter-region V (Southern Trung Bo) and Inter-region VI (Nam Bo). The two exceptions were Quang Tri and Thua Thien Provinces which were part of Inter-region IV. In 1951, the Nam Bo Regional Committee was replaced by COSVN as the key communist control element in South Vietnam (SVN). After the Geneva Accords were signed in 1954, COSVN was dissolved. Control of communist activities was again divided between the Trung Bo and Nam Bo Regional Committees. In May 1959, the Politburo of the North Vietnamese Lao Dong (Communist) Party formulated its plans to wage war to recover SVN. On 10 September 1960, the NVN Third Party Congress adopted the resolution that led to the creation of the National Front for the Liberation of South Vietnam (NFLSV) and the re-establishment of COSVN. The NFLSV was brought into being on 20 December. On 15 February 1961, the South Vietnam Liberation Army (SVNLA), now "officially" called the People's Liberation Armed Forces (PLAF), was christened and COSVN was re-established in October 1961. As such, COSVN became the central organ for the entire Southern Branch of the Lao Dong Party, as distinct from control over just the Nam Bo region during 1951-54.

was established on 1 January 1962, COSVN then became the Central Committee of the new Party for the South with its highest leaders making up the Standing and/or Current Affairs Committee of the PRP. Establishment of the PRP was a tactical maneuver prompted by Hanoi's strategy of depicting the revolution in SVN as a movement strictly indigenous to the South. Actually, the PRP operated as the Southern Branch of the Lao Dong Party. Since COSVN was re-established in 1961, most members of the COSVN Current Affairs Committee (CAC) also have been members of the Central Committee of the Lao Dong Party in Hanoi. In addition, most senior military officers at COSVN and the SVNLA headquarters are also members of the high command of the Army of North Vietnam (NVN). It is by means of such an interlocking organization that COSVN is able to control the Party, the Front, and the SVNLA simultaneously.

8. COSVN has been a mobile and dispersed headquarters. Located in "War Zone D," north-northeast of Saigon in the early 1960's, more recently it has moved to "War Zone C," a heavily forested area in Tay Ninh Province near the Cambodian border, and part of COSVN now is believed to be in Cambodia. The different components of COSVN are generally dug-in and widely dispersed under triple canopied jungle. According to one source, it took four days to travel by foot from the site of the Organization Section to that of the Finance and Economy Section.

9. It is possible to approach the subject of the organization of COSVN by separating it into four components: the Central Executive Committee and its CAC; the "civilian" Party sections of the Central Committee; the Military Affairs Committee (SVNLA or PLAF Command); and the Front organization. These four components will be the basis for the organization of the text that follows. The fifth and final section of the paper will deal with the relationship of COSVN to its subordinate sections.

III. THE CENTRAL COMMITTEE

10. Leadership at all levels within the VC Infrastructure is provided by the PRP, through Party Committees set up at each echelon. According to the statutes of the PRP, the Central Committee--or more formally, the Central Executive Committee--is the highest decisionmaking body of the PRP between Party Congresses. A Congress is supposed to convene

every four years to elect a new Central Committee, though there is no evidence of any Congress having taken place since the inception of the PRP in January 1962. The Central Committee, in turn, is supposed to elect the Party secretary and deputy secretaries and the CAC. Although the composition of the Central Committee has never been announced publicly, various sources report that 30 to 40 persons make up its membership. Aside from the secretary and deputy secretaries, they probably include heads of the functional sections under COSVN, regional secretaries, and the top military officers. In addition to full members of the Central Committee, there are a number of alternate or candidate members.

11. An isolated Central Committee would be useless. There has to be a method of control. Apart from the actual dispatch of investigators, supervisors, and trouble-shooters, the VC system seems to rely primarily on a constant flow of directives down the chain of command matched by an equally constant flow of situation reports up the chain of command. The cardinal principle in the VC managerial system is the "steering" concept. The directives generally are broad enough to allow their recipients considerable leeway for local conditions. The principle is that senior echelons guide or steer lower echelons until the final echelon has the action. This principle is in effect from Hanoi to the smallest liberated hamlet.

12. Hanoi exercises its control principally by the placement of its own cadres, including Lao Dong Politburo members, in command positions in SVN and the use of directives and resolutions. In the military field, particularly north of Nam Bo, NVN also appears to exercise considerable direct tactical control. In the political sphere, the normal procedure at the highest level is for the Lao Dong Politburo to formulate the strategic policy and guidelines, usually after taking into consideration representative views and recommendations of COSVN. If fundamental enough, then this policy will be placed before the NVN Central Congress resulting in its becoming a Resolution and being given a number, such as Resolution 12. In other cases, the policy is sent South as a Politburo Resolution. In theory there is a difference, but in fact the end result is the same since the Central Congress acts largely as a rubber stamp. Often the decision hinges on whether the subject matter has international implications (such as a statement on the Sino-Soviet rift) or is devoted solely to the war in SVN. In the former case, a Central Congress Resolution is the rule, while in the latter it is not.

13. These broad policy statements either may be carried physically to COSVN or they may be sent electrically. Both methods have been used. In any event, once they reach COSVN, the COSVN Central Executive Committee will meet to discuss the policy. They are free to make changes, particularly those that reflect an appreciation of local conditions under which the policy is to be implemented. Although not universally followed, COSVN also may issue its own number to the policy. In addition, as the policy filters down the chain of command, other echelons also may utilize a different numbering system, thereby further disguising and confusing the issue.

14. Following the high-level COSVN discussion of the policy, it is then presented to the other COSVN personnel. This is sometimes in writing, but apparently more often it is by briefing. At this time, or sometimes at the next stage, leading cadres are called in from the next Communist organizational echelon, the Military Regions (MR) and Sub-regions (SR), for briefings and discussions on the policy. This pattern basically is repeated at each level. For example, the Region Party Committee interprets the broad COSVN policy decisions in terms of regional differences or special requirements, passing a somewhat modified or mission-type directive to provinces for action. The Province Committee formulates specific directives for implementing COSVN policies. The District Committee translates these directives into specific actions; thus, it is the indispensable link between COSVN, the Region and Province Committees, and the villages. The Village Committee executes orders received from the District Committee, and exercises final authority over use of village guerrillas.

15. Although at the lower levels there may be more specificity concerning what is to be done locally, there also is a higher degree of generalization and propaganda concerning the overall strategy and its rationale. Indeed, at the lowest levels, only the barest glimmer of the original statement remains. Unfortunately, it is from these lower levels that most of the information is obtained on these policies.

16. In addition to the high-level resolutions and directives, each echelon and element of the VC apparatus issues and receives numerous other orders, directives, reports, and the like from higher levels and from lateral sections of the infrastructure. This is particularly true when speaking of the Party's functional sections. For example, the Region Party Committee might discuss a COSVN resolution, but a facet of it might be the responsibility of the Military Intelligence (MI)

Section of the Military Staff of the Military Affairs Committee. And, to implement this facet, the MI Section may need to coordinate with the Party's Security and the Military Proselyting Sections, both of which deal with penetration agents. A second example, the Party's Finance and Economy Section must be firmly coordinated, almost daily, with both the local Party Secretary and the Forward Supply Council; it also must maintain contact and account for its actions with the next higher echelon Finance and Economy Section, while supervising the activities of the next lower echelon section simultaneously.

17. All this criss-crossing of papers places a great load on the commo-liaison system. In addition, such heavy reliance on bureaucratic decision-making slows reaction time and makes the commo-liaison an all-important, yet vulnerable, link in the overall operation. COSVN uses three basic means to communicate: couriers, land lines, and radios. Land lines are almost never used outside secure base areas (and even then tend to be buried or otherwise camouflaged). Radios are used primarily as a means of coordinating wide-spread military operations, although there are indications COSVN would like to expand the use of radios, especially in the MI area. For the vast bulk of the paper flow, couriers are used and these couriers often are required to pass through hostile territory. The larger the flow and the more reliance placed upon it, the more vulnerable the VC apparatus will be.

IV. CURRENT AFFAIRS COMMITTEE (CAC)

18. Meetings of the Central Committee are supposed to be held at least once every six months. In the interim, the daily business of the Party is conducted by the CAC. Ten men or so reportedly comprise this committee. As the highest ranking leaders of COSVN, and many of them concurrently members of Hanoi's Central Committee, they constitute the highest Communist leadership in SVN. Although the CAC members must follow the overall guidelines established by the Lao Dong Party and the PRP Central Committee, they enjoy considerable operational independence in the day-to-day execution of policy. Their authority is exercised not only by means of the broad Resolutions and directives issued in their name, but through their supervisory roles as well. Each top leader usually functions either as the actual head of a functional section or agency, or he is assigned a sort of general supervisory role over one or more areas, such as finance, proselyting, or military. At this level, personalities probably play an important part and the actual position an individual occupies may not reflect his true power or role.

19. Though theoretically not paramount, the actual leadership of the CAC apparently is vested in the Secretariat. At present, the three members of the Secretariat appear to be Pham Thien Hung (aka Pham Hung, Cao Dang Chiem*, Bay Hong), Nguyen Van Cuc (aka Muoi Cuc, Muoi Ut), and Nguyen Van Dang (aka Hai Van, Pham Xuan Thai, Hai Ram).

A. Muoi Cuc

20. From 1962 to 1964, the chief member of COSVN and Secretary of the PRP apparently was Muoi Cuc. Like so many other NVN and VC leaders, Cuc's revolutionary career extends far into the past and is interwoven with that of other leaders. About 1935 or 1936, Cuc was arrested and imprisoned on Con Son Island. Taking advantage of the general confusion prevailing among the Japanese authorities just after the end of World War II, Cuc and several other high-level prisoners escaped. They located a large Japanese boat, repaired it on their own and successfully navigated to Soc Trang, a distance of some 75 miles. The escapees included the future secretary of the Lao Dong Party, Le Duan; and the entire Secretariat of COSVN in its earlier stages, Cuc (secretary), Hai Van (first deputy), and Vo Chi Cong (third deputy who has since returned to NVN for medical reasons).

21. Cuc's childhood consisted of his being orphaned, raised by an uncle in Tonkin, and later sent to Saigon. By 1956, he was reported to be the deputy secretary of the Nam Bo Regional Committee and Party secretary of the Saigon-Cholon area. During the period from 1957-1959, he operated out of Phnom Penh, Cambodia where he contracted lung trouble, forcing him to give up smoking. He was among those allegedly elected to the Lao Dong Central Committee in 1960 and, according to one source, secretly elevated to the Lao Dong Politburo in February 1967. Personally, Cuc appears to be a studious, quiet, and serious sort. He is well read, able to read French and some Chinese. His COSVN office is full of books. His preferences run to Party literature (which he also writes), philosophy, works on foreign lands, and novels. He is considered to be affable, warm in his relations with his colleagues, and receptive to their ideas and problems. Le Thi Rieng, a leading PRP cadre arrested in 1967, has described him as an imaginative leader, though not quite as sharp as his friend, Le Duan. His wife, Ngo Tui Hue, is a member of the NVN

*The name "Cao Dang Chiem" apparently also is used by one of the members of COSVN Security Section. To further confuse the situation, the same name also appears to be used by a NFLSV cadre operating in IV Corps.

National Assembly.

22. During 1964, the evidence indicates Senior General (Sen. Gen.) Nguyen Chi Thanh arrived from Hanoi to assume command of COSVN. This change probably was not meant to reflect on Cuc, but rather on the tremendous increase in the numbers of NVN military being infiltrated at this time. Thanh possessed unusually strong credentials for the job. He was considered second only to Sen. Gen. Vo Nguyen Giap, and they were the only two holding this rank. He was a member of both the NVN Defense Council and the Secretariat. Cuc probably stepped down to the position of first deputy secretary of the Party. Thanh appears to have concentrated more on the military issues, and Cuc may have possessed considerable latitude on the civilian side. When Thanh died in late June or early July 1967, possibly from a B-52 raid, Cuc probably resumed charge of COSVN. But recent reports indicate that Cuc soon stepped down again (about September 1967) when Pham Hung, first deputy Premier of NVN, arrived in the South to head COSVN.

B. Pham Hung

23. If Sen. Gen. Thanh could be described as Giap's right-hand man, Pham Hung certainly could be considered the protege of NVN Prime Minister Pham Van Dong who has been described as the protector and benefactor of Hung. Apparently born in SVN in 1912 (Long Ho District, Vinh Long Province), Hung went to school in My Tho. In 1920, he joined the Revolutionary Youth Group and in 1930, the Communist Party. In 1932, he was arrested and sentenced todeath in My Tho for complicity in a "Secret Society" and for his role in assassination plots. The sentence was commuted to life and he was sent to Con Son Island where he remained until September 1945. His initial assignment on his return seems to have been as commander of a detachment of the Viet Minh 18th Division at Sadec. He quickly moved to the civilian side and by 1947 was the deputy chief of Security for Eastern, and then all of the Nam Bo Inter-region (including Saigon-Cholon).

24. From 1949 to 1951, Hung reportedly was in NVN attending the assembly that established the Lao Dong Party and replaced the Nam Bo Regional Committee with COSVN. Hung was elected to the Central Committee and appointed to the Southern Affairs Bureau. It was at this juncture that he began his association with Le Duan, then head of the Southern Bureau. From 1950 to 1952, he appears to have been in charge of Security for SVN. In 1952 he married Mai Khanh, chief of the Women's Association of

Can Tho Province. And from 1952 to 1954, he assumed the position of Secretary and Commander of the Eastern Nam Bo Region. In 1954, after the Geneva Accords, Hung was given the rank of Colonel (Col.) and named to head the military mission to the International Control Commission (ICC) in Saigon. Actually, this last appointment appears to have been a cover to allow him to travel in the Saigon area so that he could direct clandestine operations against the Government of Vietnam (GVN). As of 1955, his true position appears to have been NVN Minister in charge of SVN affairs.

25. In 1956 he apparently returned to NVN where he served as a minister, ostensibly without portfolio. In 1957 he was elected to the Lao Dong Central Executive Committee and a year later promoted to Deputy Premier. In 1958, the NVN press identified him as Chairman of the Drought Prevention Commission and in July 1959 as Chairman of the National Reunification Board. During this period (1957-1960) he served on a number of top-level delegations to foreign countries. In 1960, he was appointed chairman of the Agricultural Bureau and elected to the Party Secretariat. In 1963, he transferred chairmanship to the Trade Bureau. In July 1964, he was reelected Deputy Premier after which little was heard of him until he assumed control of COSVN.

26. It has been said of Hung that while he assumes the correct or popular role in public, he actually is authoritarian and presumptuous. He also has been accused of possessing a surly facial expression and acting arrogantly. On the other hand, he has been described as an able administrator and an exceptional planner. His record would indicate that he is more of a political animal than his predecessor, Sen. Gen. Thanh. What is more, unlike Thanh, Hung apparently has placed a powerful military commander between himself and the SVNLA in the person of Lieutenant General (Lt. Gen.) Hoang Van Thai. Where this leaves Nuoi Cuc, the politician, is not clear although he continues to be first deputy and politically oriented. Cuc is said by one source to have supervisory responsibility for the Propaganda, Culture and Indoctrination Section.

C. Hai Van

27. The third member of the Secretariat, Hai Van (aka Nguyen Van Dang, Pham Xuan Thai, Hai Ram), has been identified as a COSVN deputy secretary since its inception. He was second deputy until Cuc moved down to second deputy and the third slot was vacated by Vo Toan (aka Vo Chi Cong, Nam Cong). Vo Chi Cong

reportedly specialized in proselyting activities and also acted as Party secretary of VC MR-5 until August 1966 when he is believed to have returned to Hanoi for medical treatment. Not much is known about Hai Van, despite the belief that he holds the overt position of chairman of the NFLSV's Liberation Federation of Trade Unions Association under the pseudonym of Pham Xuan Thai. About 52 years old, he apparently was born in Vinh Long Province. He apparently remained in SVN at the time of the 1954 regrouping. Party organization, security, and propaganda are said to be under his general supervision. He also has been reported to be a member of the Lao Dong Central Committee as well as an overt member of the NFLSV Presidium.

D. Others

28. Eight other names have been associated with the COSVN CAC. Three of them have at one time or another been considered to be in charge of the military side of the show. They are Major General (Maj. Gen.) Tran Phi (aka Hai Hau, Tran Luong, Tran Nam Trung (overt name), Tan Phi), Lt. Gen. Tran Van Tra, and Lt. Gen. Hoang Van Thai. Tran Phi is known to others mostly by the names Hai Hau and Tran Luong. Since both he and Tran Van Tra have used the alias Tran Nam Trung (which apparently goes along with the position of head of Front Military Affairs Committee), and since their assignments often placed them simultaneously in the same geographical area, much of their earlier activities were attributed to a single individual.

29. Hai Hau. It now would appear that Hai Hau was born Tran Phi about 1910 in Quang Ngai Province. His revolutionary career began about 1930 at which time he was arrested and detained at Ban Me Thout, Lao Bao, and Lao Xa in Hanoi. In 1944, he was sent to the Ba To prison in Quang Ngai where he gained his freedom in the Ba Tu uprising of February 1945. In August 1945 he was deputy secretary of the Viet Minh Inter-Region V Committee. Sometime during 1950-1954 he received military training in Communist China. During the period 1946-1954, his primary responsibility was Party dealings with the Montagnards. In 1954 he reportedly regrouped to NVN. His wife and six children still live in Hanoi.

30. Hau returned to SVN by 1961 and reportedly was a member of the first NFLSV Central Committee (under the name of Tran Nam Trung and as the representative of the SVNLA) and also of the first COSVN CAC. From this period to 1967, Liberation

Radio and similar sources placed him in the positions of deputy chairman of the NFLSV Presidium and head of the NFLSV Military Affairs Committee. Returnee Lt. Col. [redacted] believed Hai Hau had been both Commanding Officer (CO) and Political Officer (PO) of the SVNLA from 1961 to 1963, but was replaced by Nguyen Chi Thanh in 1964. At this point, Hau appears to have dropped out of the military picture, although he continued as a member of the CAC. Some sources claim that financial and economic affairs have since become his major area of interest. As Tran Nam Trung, Hai Hau meets with foreigners; his name is used by Liberation Radio; and his photograph is well circulated (one is on the dust cover of Douglas Pike's book on the VC). This might suggest that he may be more of a front man than a nuts-and-bolts military man. However, a rallier, [redacted] has stated that Hau [redacted] was supervisor of both the military proselyting section and the Propaganda, Culture, and Indoctrination Section of COSVN. b1 b3 (S)

31. Tran Van Tra. Such is not the case of either Tra or Hoang Van Thai, who may be in competition for the title of first soldier of the SVNLA. Lt. Gen. Tra (aka Tu Chi, Nguyen Van Tra, Le Van Thanh, Tran Trung Lap, Tran Nam Trung) is believed to have been born around 1918 at Bung Tich, Quang Ngai Province. He attended an industrial school in Hue from 1936-1939, during which period he joined the Republican Youth Movement. Arrested by the French colonial authorities in 1939, he was sentenced to six months imprisonment and a period of residence under surveillance in Hue. In 1941, he left Hue and made his way to Saigon where he adopted the name Le Van Thanh. He was arrested again in 1944 but was freed by the 1945 revolution. As Tran Van Tra he began to take part in the activities of the Viet Minh. According to [redacted] he and To Ky (current status not known, but once was PO of VC MR-3) organized the 14 "Chi Doi" (Viet Minh for Division), and he was the CO. They both reportedly disliked Le Duan. Nonetheless, he became a member of the Current Affairs Commission of the Viet Minh's Committee for SVN. b1 b3 (S)

32. By August 1946 Tra was commanding Viet Minh Region 8 (in 1946 Nam Bo consisted of Regions 7 to 9, and the Inter-regions were not established until March 1948). He possibly continued in this command until 1950, although he also had other assignments during this period and record of these is sometimes conflicting. He was reported to have replaced the head of Region 9 and to have taken over the Saigon-Cholon-Special Region. He relinquished the latter post in June 1950 to become

to become CO of Region 7. Tra was accused of forcing out the CO of Region 7 (and falsely, of murdering him - he later turned up alive). By mid-1951, Tra was deputy to the CO of Inter-Region VI (Nam Bo), Nguyen Binh. Binh was forced from his post in August 1951 for suspected Titoist tendencies, and in November was killed by French troops in a situation believed to have been set up by his colleagues. In the period 1948-1951, Tra seems to have successively headed the military commands of all the regions of Nam Bo. From the multiplicity of his assignments, and the fate of Nguyen Binh, and a report that he was not known as a strong military strategist, it has been speculated that Tra served as either a political troubleshooter or a 'hatchet man'.

33. Tra served for a short period as Binh's successor, but later in 1951 when Inter-Region VI was reorganized into two Sub-Inter-Regions (Eastern and Western Nam Bo), he assumed command of Eastern Nam Bo, remaining in that post until the mid-1954 cease fire. By February 1955, Tra was in Hanoi and in September radio Hanoi identified him as deputy chief of the North Vietnamese Army (NVA) General Staff. In 1959 he was promoted to Maj. Gen. and in 1960 names as alternate member of the Lao Dong Central Committee, and he possibly replaced Hoang Van Thai in 1960 as head of the Thai Meo Region headquarters at Dien Bien Phu (probably supporting Pathet Lao Operations).

34. Conflicting reports from 1960 to 1963 place Tra in NVN and SVN. Returnee [ ] reported that about the time Hai Hau relinquished his command of the SVNLA (1961-1963), his deputy also left the scene. The deputy was Lt. Gen. Tran Van Quang (aka Bay Tien), currently Party Committee secretary of VC Tri-Thien-Hue Military Region. Another returnee, [ ] stated Quang returned to NVN in June 1964 and that both he and Tra used the name Tran Nam Trung when signing documents. Such a change in command made a certain amount of sense. The increase in the NVA presence was being felt, Son. Gen. Nguyen Chi Thanh took over command from both Muoi Cuc (former General Secretary) and Hai Hau (head of the Military Affairs Committee /MAC/). In addition, with the increase in Communist Main Force (MF) units, there was a corresponding increase in the number of deputy commanders of the SVNLA, Tra being the senior deputy. The others, according to [ ] were: Maj. Gen. Le Trong Tan (aka Ba Lam, Ba Long, Nguyen Trung Tan, Ha Ke Tan, Thanh Song, Tran Van Hai, Phu Chu, Chinh Nam); Nguyen Huu Xuyen (aka Tam Den Den, Tam Kien Quoc); Maj. Gen. Hoang Duc Anh (aka Sau Nam, Le Duc Anh); Nguyen Thi Dinh (aka Ba Dinh, Ba Han, Bich Tri Van, Ba Tan, Bay Thanh); and the assistant PO, Maj. Gen. Tran Do (aka Chin Vinh, Truong Son, Tran Quoc Vinh).

b1 b3 (S)

b1 b3 (S)

b1 b3 (S)

35. Tra appears to have continued as undisputed senior deputy until Pham Hung's arrival about September 1967. According to [redacted] Hung in effect replaced Tra by giving the command of the SVNLA to Thai. Strictly speaking, Tra was not demoted, however. Nguyen Chi Thanh had held this command himself and with his death it passed from Muoi Cuc to Hung who vested it in Thai. If this was, in fact, what happened (there are indications that Hung retained direct command), then Tra continues as senior deputy, but subordinate to Thai nonetheless. If not, then it is questionable which is the more senior. [redacted] had heard that Tra, who was in direct command of the Tet and May-June Offensives against Saigon, had been criticized for their ineffectiveness. [redacted] who was captured in [redacted] believed Pham Hung and Muoi Cuc were the secretary and deputy secretary of the MAC, while Thai was CC of the SVNLA Headquarters (Hqs.) and Tra was senior deputy or Executive Officer of the Hqs. (S)

36. Hoang Van Thai. Thai (aka Muoi Khang, Hoang Van Khang, Ngo Quoc Binh, Hoang Xuan Thai) is believed to have been born about 1906 in Thai Binh Province, NVN, and orginally to have been a teacher by profession. Thai reportedly joined the Party in the 1930's and became a close friend and associate of Sen. Gen. Vo Nguyen Giap with whom he shared a Chinese exile in 1939. Thai who is believed to have undergone training in the USSR at some time may have re-entered Vietnam in 1941 or 1943, since a NVN source stated he returned with Ho Chi Minh when World War II broke out.

37. In 1945 with the end of the war, Giap set out to build a "new model army" with Thai's help. In 1946 Thai was promoted to Chief of Staff, second only to Giap. In 1952, according to [redacted] sources, Thai rather than Giap was directing military operations in NVN. However, by 11 October 1954 when Giap made his ceremonial entry into Hanoi, Col. Gen. (Three Stars) Van Tien Dung was publicly identified as the Chief of Staff and Thai as Dung's deputy. Dung apparently had covered himself with glory, particularly at Dien Bien Phu, and was also intensely loyal to Giap. First identified as Chief of the Military Training Department in May 1958, Thai was named a member of the newly established National Scientific Research Board the following December. He was named chairman of the Central Physical Culture and Sports Committee in May 1959 and promoted to Maj. Gen. the following September. While it has been reported that Thai acquired expensive tastes, he also is reported to be serious and correct in dealings with others. He also is supposed to be a proponent of guerrilla warfare in the spirit of Nguyen Chi Thanh.

b1 b3 (S) [redacted] noted that Thai's position previous to his appointment to COSVN was as head of VC MR-5 (essentially an [illegible] position) where he replaced Maj. Gen. Nguyen Don. When Thai assumed this command is not known definitely, although it appears to have been sometime between October 1966 and April 1967.

38. Tran Do. A good deal less is known about the remaining identified members of the CAC: Tran Do, Ba Buong, Sau Dan, Mai Xe Ngua, and Tran Bach Dang. The most famous, due to the apparently premature notices of death during the Tet Offensive, is Maj. Gen. Tran Do (aka Chin Vinh, Truong Son, and Tran Quoc Vinh). The name "Tran Quoc Vinh" has been used overtly in referring to Tran Do since he has been in SVN. GVN authorities discovered an enemy body which they thought matched Tran Do's description, but several sources since have sworn they saw Tran Do alive in COSVN after the discovery. From 1945-1950, his career was that of Chief of Staff, CO or PO of a succession of Viet Minh battalions, regiments, and one division, the 312th. In 1958 he was reported to be the head of the NVN Right Bank MR, and in 1960 he was elected as an alternate member to the Central Executive Committee of the Lao Dong Party. In February 1965, he infiltrated into SVN, joined the CAC, and became the Deputy Political Officer (DPO) of the SVNLA, Sen. Gen. Nguyen Chi Thanh retaining the post of PO for himself. Tran Do probably is still the DPO. There is rare unanimity among such sources as [redacted] b1 b3 (S) and [redacted] on Tran Do being the DPO.

b1 b3 (S) 39. Kiet, Xe, Buong, and Dang. Le (or Nguyen) Van Kiet (aka Sau Van, Chin Dung, Phang Trong Dan, Sau Dan) was secretary of VC MR-4 prior to the late 1967 reorganization of the Saigon-Cholon area into SR's. There were reports he also commanded one of the military fronts during the Tet attack against Saigon. A finance and economy expert, Nguyen Van Xe (aka Hai Xe Ngua, So Le Van, Chu Tich Xe Ngua), reportedly returned to NVN for medical treatment in 1967. According to [redacted] b1 b3 (S) Hai Xe Ngua translates as "Two Horse-carts" and Chu Tich Xe Ngua comes out "Chairman of the Horse-carts," which indicates a possible sense of humor. Nguyen Van Buong (aka Ba Be and Ba Buong) reportedly was MR-3 Party secretary from 1965 to 1966, and now may be supervising both the Security and Organization Sections of COSVN. Buong reportedly was one of the prisoners who escaped from Con Son Island in the famed boat in 1945. The last member of the COSVN inner sanctum is Tran Bach Dang (aka Tu Meo, Tu Anh, Nam Quang). He presumably is still a CAC member. His last reported position is as secretary to the CAC of VC SR-6 (Saigon); however, this position is not incompatible with Dang also still being a member of the CAC of COSVN.

V. THE "CIVILIAN" SECTIONS

40. There are numerous "civilian" functional sections. Each of these is a specialized office which fulfills a dual role. First, each section is responsible for advising the CAC and for developing Party policies within its own area of competence. Second, each section oversees the execution of specific policies by lower levels of the VC infrastructure. The main functional sections are as follows:

A. Organization Section

41. The Organization Section is the office with primary responsibility for all affairs pertaining to civilian political cadres. It handles problems of Party recruitment and development, and the assignment of personnel at higher levels of the PRP. It has the additional responsibility of maintaining Party discipline. According to returnee [ ] CAC member Hai Van is chief of this section, and Le Tu Nhien his deputy. According to another returnee, [ ] at the COSVN Base), the chief and deputy since 1961 had been Hai Mai and Ba Thanh, and the PO is Ba Nhan. However, [ ] also has mentioned Ba Buong (aka Nguyen Van Buong and Ba Bo) as "supervisor" of the Organization Section. Ba Buong, a COSVN CAC member, also has been reported to be the "supervisor" of the COSVN Security Section and the Rear Services Section.* The chief and deputy chief, according to a 1966 collated study [ ], was Sen. Col. Hiep and Maj. Muoi Tai. The section appears to consist of six sub-sections:

a) The Correspondence Sub-section reportedly was headed by Nguyen Van Nhan, according to [ ] (as [ ]). This sub-section is responsible for all incoming and outgoing correspondence, including requests for NVN civilian political cadres. It also censors private correspondence handled by the VC postal system.

*As mentioned earlier, some of the confusion concerning who actually heads a section stems from the ambiguity between the terms "chief" and "supervisor." The chief of a section almost always refers to the individual who is responsible on a day-to-day basis. The supervisor, especially as used by [ ] is a higher ranking cadre who has general responsibility over the section as well as other duties in the Communist hierarchy.

b) The Personal Affairs Sub-section, headed by Nguyen Van An (according to [redacted] b1 b3 (S) is responsible for the food supply, pay and uniforms and clothing for all personnel in the Organization Section. Members of this sub-section cultivated all of the food required by the Organization Section.

c) The Planning and Policies Sub-section, according to [redacted] was directly under the control of the chief of the Organization Section. Its function was to draft policies concerning civilian political cadres (assignments, training, promotions, citations) and to study GVN policies concerning land development and pacification and determine counter measures to thwart these GVN policies.

d) The Movement Sub-section, allegedly headed by Hai Thua, conducts investigations of cadre activities at the region and province levels to determine problem areas and to find solutions. According to [redacted] the major problem areas have been defined as allied sweep operations, defoliation, and loss of cadres.

e) The Cadre Administration Sub-section, reportedly under Ba Nghi, is responsible for maintaining statistical records of cadre strength throughout SVN; assignment, training, and indoctrination of cadres; promotions, awards, and disciplinary actions. According to [redacted] this sub-section did not control the specific assignments given to cadres after they had been initially assigned either to a functional agency or to a region, nor were they responsible for assignment of military cadres. The sub-section also maintains personnel records on all SVN cadres who leave for NVN, and prepares requests for their return.

f) The Party Construction Sub-section, headed by Hai Que, is responsible for the management of the PRP. It directs the execution of Party policies and monitors and evaluates the activities of Party chapters. It keeps records in the utilization of Party cadres, their attitudes and motivations. According to [redacted] as of October 1966, approximately 40 percent of all civilian political cadres in SVN were Party members. Total membership was estimated at 1,000,000 and some villages contained as many as five chapters with an average membership of 25 to 30. b1 b3 (S)

9. Propaganda, Culture, and Indoctrination Section

42. Lt. Col. [redacted] thought that Hai Van ran this section, as well as the Organization Section. [redacted] thought the section was under CAC member Tran Bach Dang (aka Nam Quang), which agrees with [redacted] (both referring to time period of 1966). The chief of this section since 1961, according to [redacted] is Hai Tau. [redacted] also lists a "supervisor" in charge of the Propaganda, Culture, and Indoctrination Section. In this case, [redacted] claims that CAC member Tran Luong is supervisor of the section, as well as being supervisor of the Military Proselyting Section. Although [redacted] is not sure which individual holds what position, the assistant chief and IO are Tran Hau and To Lam. In October 1968, To Lam was reported as the editor of Tien Phong (Vanguard, the Party's theoretical journal). This section serves as the psychological warfare headquarters and is charged with monitoring the propaganda activities of subordinate levels while producing a great deal of propaganda on its own in the form of Party and Front publications. In addition, this section is responsible for ensuring that Party cadres are properly motivated, and also for supervising whatever school systems may exist in liberated areas. Included in this section's purview are the fields of the arts, press, radio, and cultural dissemination both in SVN and abroad. This section also controls such front groups as the Cultural Association, the Teachers' Association, and the Newsmen's Associations.

43. An unusually large number of sub-sections have been identified, many with only a vague idea of what their functions are. For the sake of organizational simplicity, these sub-sections could be divided into four broad categories. The first would be those sub-sections which are concerned with the person-to-person approach to influencing people. The second would be those concerned with propagandizing through communications media, and on an international as well as a domestic level. The third category would be the Party's own setup for educating their higher level cadres in Party theory. And the last would be the usual support sub-sections common to any large endeavour. The specific sub-sections then would be:

(1) (a) The Propaganda or People/Culture Sub-section (B.7). B.7, the chief sub-section in the "person-to-person" category reportedly plans propaganda campaigns around cultural improvement programs. It specializes in indirect, subtle forms of propaganda. In 1966, its chief was Tu Ou, and its deputy was Chu Tam Map (these and most other names

associated with the sub-sections are taken from

b3

b) The Education Sub-section (B.18). B.18 is also involved on the person-to-person level and provides administrative and technical support for the VC school system. The support includes obtaining textbooks, teachers, and school rooms. The goal, not always realized, is to set up a school system in all VC-controlled areas. The main emphasis is on school children, but adult literacy is not ignored. Teachers are urged to make classroom problems revelent to the Revolution. For example, math problems might entail dividing the number of punji stakes produced by the number of Liberation Youth Association members making the stakes. In 1966, the chief and deputy of B.18 were Nam Dieu and Huynh Dan (or Dan) Thang (aka Nam Giai). Other members were Liet, Thanh, Hieu, Miss Lam, Miss Cui, Miss Hue, Miss Hang, and Miss Dung.

c) The Entertainment Sub-section (B.5) definitely is involved in person-to-person propaganda-ing. It reportedly plans the content of, produces, and presents entertainment to both military units and civilians. In 1966 the chief was Bui Kinh Luong. Other members were Tuan Khanh (chief musician), Pham Anh Tuan (musician), Hong Anh and Linh Thu (actresses), and Luong, Bac, Diep, and Dung (all actors). Phan Lac Tuyen, Giang Nam, Lan, Le, and Anh (a NVN comedy actress). There also were reports of a Montaguard Entertainment Sub-section (B.23). There also may be a Motion Picture Sub-section that travels from place to place with the entertainers, forming a mobile psywar component. Finally there are reports of Painting Subsection (B.20) under Huynh Phuong Dan. Other members mentioned were Tan Song Chau and Trang Phong.

d) The Liberation Radio Broadcast Station (B.6): the clandestine station serving as the voice of the Front is the most well-known sub-section concerned with the mass media. In 1966 its chief and deputy were unknown, but the following members were identified: Phuoc Rau (announcer and reportedly the son of Nguyen Huu Tho, NFLSV chairman), Hanh (assistant announcer), Chin Nam (editorial announcer), Tuyet Anh (Chinese announcer), Ba Tai, Muoi, and Tan Tong. The powerhouse for the station was itself a sub-section (B.16). Its chief and deputy were Ba Nhi and Tam Tong. Two other members were Hoa and Dung.

e) The Liberation Press Agency (B.6) disseminates information with emphasis on VC victories, for national and international consumption, as well as for use at the Paris peace talks. In 1966, the chief of B.6 was Thanh Nho. Other members were: Tam Rau (in charge of editorials), Ba Do (in charge of information), Truc and Mien Gan (typists), Miss Suong (mimeographer), Cong (editor), Tam Chi (steno), and Nghia (printer).

f) The Foreign Relations Sub-section (B.13) is responsible for propaganda designed to influence foreign opinion.* It handles virtually all of the international propaganda in the name of the NFLSV. It also may be responsible for the content of The Fighting South which is published in English and French. In 1966 the chief was Chin An. He had three deputies: Truc Tung, Le Van Thu, and Ba Binh. Ba Thu was the English teacher. Another member, Chau, has been reported to be a son of the NFLSV chairman, Nguyen Huu Tho. Other members mentioned were Tan, Hai, Sau, Thuong, and Me.

g) The Newspaper Sub-section, according to the SMA Newsletter, 11, is responsible for gathering news items pertaining to local, national, and international Communist affairs and editing them as required to conform to VC policies. The sub-section publishes bulletins and small newspapers for public consumption. This may be the element that is responsible for the following three Vietnamese language newspapers Tien Phong (Vanguard, the Party's theorectical journal), Co Giai Phong (Liberation Flag), and Van Nghe Giai Phong (Liberation Arts and Culture). This also may be the sub-section referred to elsewhere as the Publications Office (B.22). If it is, then the chief in 1966 was believed to be Sau Hai (or Hai Thai). Other members were Dong, Nhao, Khoi, Nguyet, and Duong.

h) The Editorial Office (B.21) and The Giai Phong Film Workshop (B.15) may be closely related to publications, although little is known about them. In 1966 the chief of

*This sub-section should not be confused with Foreign Relations Committee of the NFLSV which is an overt body. The NFLSV Committee is headed by Tran Buu Kiem, currently co-head of the NFLSV delegation at the Paris peace talks, presumably the Front body supervises the NFLSV's overseas representatives.

B.21 was Thanh Nho. Other members were Ngoc Anh, Tat Tan, and Muoi Quan. The chief and deputy of B.15 were Hien Lien and Long Pha. Other members included two cameramen, Hong Son and Pham Khac; and Bu (aka Tran Thanh), a photographer.

i) The Indoctrination and Training Sub-section probably is responsible for training Party cadres in the arts of propaganda and Communist theory, although this is not confirmed. What is fairly certain is that the Propaganda Section is responsible for two training schools. Little is known about one - the Trang Tan School (B.24). The other is quite well-known and goes by Ho Chi Minh's real name - the Nguyen Ai Quoc Political Theorizing School (located in September 1963 at XT 500 680). According to [redacted] the director was Nam Trieu, the deputy was Thanh Nam, and the secretary was Tu Xuat. It is, of course, possible that this school is involved in producing the Party's theoretical journal, Tien Phong (Vanguard). According to [redacted] to attend the Nguyen Ai Quoc School, the trainee must be equal to a member of a Provincial Party Committee or at least a Regimental Commander. The courses lasted 18 months.

b3 b1 b3 (S)

j) The Administrative Sub-section (B.4) probably is first among the support elements. This element probably keeps the records of the personnel, procures and issues supplies, and provides other similar services. The chief and deputy, as of 1966, were Doan Chi Cao (aka Nam Phi, Tu Nam) and Nam Canh. Also assigned to this sub-section were: Tu Xuat (clerk), Hai and Dat (finance), Misses Xuan and Mai (treasurers), Miss Lan (typist), Tam Thi (radio), Du, Hoang, and Hue (liaison), Sau Nho (Party Chapter secretary), and two others, Sau Chau and Mai Thin.

k) The Tran Phu Printing House (B.8) probably handles most of the job orders for leaflets, bulletins, journals and books. In 1966 its chief and deputy were Nam Nam and Nguyen Khac Tu, respectively. There were two zincographers, Ngan and Huy; two bookbinders, Miss Truc Chi and Viet; and a stenographer, Loi. Also assigned to B.8 were Dung, Phuong Nam, and Tu Rau. This sub-section probably includes a printshop element and a photo-offset printing element.

l) The Medical Sub-section (B.13) was directed by Sau Tung and his deputy, Duong Nhon Quy. Its staff in-

cluded three medics; Son, Hung, and Bang, and one other member, Chin Hue. The Radio Communications Sub-section (B.10) was directed by Sau Nghia and his deputy, Chin Chieu. Other members of B.10 were Thieu, De, Phia, Hoang, Huong, Van, Loi, Tho, and Ba Do, an editor. The Production Sub-section (B.11) was led by Tu Lap and his deputy, Bay Ha. Members of B.11 were Buoi, Can, Tong, Be, Sum, and Cu. The Defense or Security Platoon (B.12 or B.14) was under Nam Dua and his deputy, Muoi Quan.

m) A Rear Services Sub-section (B.9) with at least six sub-divisions of its own has been identified in addition to the above support units. As of 1966 the chief and two deputies of B.9 were Muoi Nga, Bay Cong, and Hai No. The Administrative Branch included Muoi Nga again, as well as Bay Cu; another deputy was Tri; two members were Cuc and Miss Sau Chau. There were land and river supply transportation teams. The members of the waterway team were: Sau Sang Hung (chief), Phung (deputy), Tong, Thanh, and Thu. The land team included: Hai Truong (chief), Hai Chau (aka Hai Den) (deputy), Mui (or Mai), Chat, and Be (aka Thanh). There was an Equipment Team consisting of Tinh (chief), Quan (deputy), Miss Nga, Miss Phung, and Viet. The head and deputy of the Rice Mill were Huynh Van Lanh (aka Nam Den) and Buoi. Also assigned to the mill: Ngoc, Minh, Dan, Son, Hai, and Tan. The final element of B.9 was the Warehouse Team of which only one member's name is known, Nam Thang.

C. Finance and Economy Section

44. The Finance and Economy Section is responsible for the overall finances and budgeting of COSVN, and for the guidance and supervision of financial activities of the lower echelons. In 1966, according to [redacted] the section consisted of from 20 to 30 members. Among the section's duties, according to [redacted] was the preparation of the annual budget, including prediction of income and support of those areas expected to operate at a deficit. The section also establishes tax quotas for each MR, and details to subordinate echelons those tax collection procedures that have had the most success and those that have failed. It also prescribes the accounting procedures that will be used at all echelons within the Party structure down through District level, and establishes rules and regulations governing expenditures of funds. [redacted] thought that every

b1
b3
(S)

expenditure of each organization of the Front had to be reported to the section. In addition, each organization (functional and regional only) had to submit a budget request to the section every six months. [ ] section (Organization) usually received only 70 to 80 percent of its requested budget. He believed the ones that always received 100 percent were the Military, Military Proselyting, Civil Health, and Foreign Affairs (as of 1966). b1 b3 (S)

45. In order to perform these tasks, the Finance and Economy Section is reportedly dependent on experienced and extremely well-trained, competent cadres. Lt. Col. [ ] believed the chief of the section was CAC member Hai Xe Ngua (or "Two Horse-carts"). [ ] thought Hai Xe Ngua was the section's "supervisor", as well as being "supervisor" of Rear Services. But [ ] felt that the "chief" had been Chin Phuoc since 1966 and that his assistant was Sau Lau who also was PO. [ ] listed Maj. Tu Tranh as chief, and Senior Captain (Sen. Capt.) Muoi Thiem as deputy, and Tu Tan Long as head of budgeting and financial affairs. b1 b3 (S) b3

46. There are at least eight or nine identified sub-sections. [ ] and the SRA Newsletter II agree on seven; while the former lists a Medical Sub-section as eighth where the latter lists a School Sub-section as the eighth. The major sub-sections are: b1 b3 (S)

a) The Administrative Sub-section which presumably handles managerial, secretarial, and minor supply problems. Most COSVN sections have such a sub-section.

b) The Finance and Statistics Sub-section probably is the accounting office and may, therefore, play the most important part in the budgeting process. It also probably is safe to assume that this sub-section plays a key role in levying requirements and checking on subordinate elements both within COSVN and at the regional level.

c) The Currency Sub-section is responsible for foreign currency transactions, including acquisition and distribution. Judging from a number of captured messages referring to U.S. dollars, as well as the actual capturing of American dollars in VC caches, this sub-section must be heavily involved in black market activities, especially in the Saigon area. The VC, however, have their problems in getting near the going rate of piastres for dollars. Several documents

have complained of "gouging" tactics being used against the VC.

d) The Trade or Commerce Sub-section generally is responsible for overseeing commercial activities in its geographic area. It selects sites for tax collection points and regulates the flow of goods through VC-controlled areas. At lower echelons, this sub-section has been known to manage trading agencies which act more or less as middle-men in selected trade activities.

e) The Transportation Sub-section is claimed by both [redacted] and SRA Newsletter II to be responsible for the movement of goods. It supposedly plans the routes, and schedules the time for moves. According to the Newsletter, porters who are used to move the goods usually are supplied by other agencies, especially the Forward Supply Council and the Liberation Youth Association. Actually, this sub-section's existence is somewhat in doubt, at least with the functions enumerated. Current indications are that the movement of goods is the function of Rear Services (for the long haul) and the Forward Supply Council (to meet more immediate needs).

f) The Production Sub-section, a common element in most VC agencies, is to produce food and materials for the immediate use of the section.

g) The Finance and Economy School Sub-section and the Medical Sub-section. The former is listed in SRA Newsletter II, while [redacted] cites the latter. Actually, both would quite logically be found at the COSVN level especially since: (1) the distances between COSVN Sections would indicate the need for a small medical facility, and (2) the special skills required for Finance and Economy cadres would make the presence of a special school almost inevitable, as other less-specialized sections generally have been found to have schools.

D. Forward Supply Council

47. The Forward Supply Council is a special organization maintained until recently at all levels within the Infrastructure. It was designed to aid frontline troops during the Liberation Army campaigns. The COSVN Council is said to be composed of the chief of the Finance and Economy Section, a deputy who is also

chief of the Rear Services Staff of the SVNLA, and cadres from Region-level Rear Services. It could issue directives to both the civil and military sides of the VC structure. According to one study, [ ] under the original arrangement, the Finance and Economy Section was to collect taxes and draft financial plans. The Rear Services was responsible for the procurement, storage, and issue of food and supplies. The Forward Supply Council was responsible for providing civilian labor to military units and for transporting supplies to the frontline military units that could not re-supply themselves from the Rear Services. b3

48. The Forward Supply Councils encountered problems, principally the overlapping functions between it and Rear Services. In late 1967, COSVN issued a directive ordering that the councils be deactivated and its components merged into other organizations as follows: mobilization of material resources to Finance and Economy; civilian labor procurement to the district units; and administration of the Assault Youth units to the Rear Services and Assault Youth command. The decision to deactivate the council below region level was left to the individual provinces, and some continued to operate. The strain created by the Tet Offensive on supply sources caused COSVN to reactivate the councils at all levels around mid-1968.

49. The organization of the Forward Supply Council at the COSVN level is not known, though it may be similar to that found at lower levels. According to [ ] Spot Report [ ] 6 January 1969, at the lower levels each council is supposed to have two elements: the council itself composed of a chairman plus deputies and members; and a Standing Committee with three to five cadres. The council is responsible for mobilizing the manpower and material resources while the Standing Committee is to carry out specific functions based on the general duties of the council. Sub-sections of the council include (a) civilian labor and Assault Youth; (b) provision procurement and storage; (c) civil health; and (d) organization and planning. b1 b3 (S)

K. Security Section

50. The COSVN Security Section, although subordinate to the COSVN hierarchy, ultimately is responsible to the NVN Ministry of Public Security in Hanoi, which supplies the section with many of its members, especially in leadership positions. According to [ ] July 1967, the majority of the section's own cadres are trained in NVN, and their selection is controlled

b1 b3 (S)

by the Ministry in Hanoi. In addition, from province upward Security reports directly to Hanoi as well as to the Party Committee at their echelon, and the Security Section at the next higher echelon. In recent years, the COSVN Security Section has grown considerably; an interrogee stated it had 150 members in late 1962, of whom 70 were office personnel. By 1964, it had increased to 250, and in 1965 it reached 481, with a planned strength of 602.

51. The Security Section is responsible for Party internal security and counter-intelligence, physical security of the COSVN area and for visitors to COSVN, for maintaining public order through criminal prosecution, and for clandestine reconnaissance and intelligence missions. The section also maintains a school for personnel training, and a detention camp. Its functions resemble those of the Soviet KGB and the Ministry of Public Security of Communist China. Security case officers from the COSVN level downward are tasked with penetrating Allied security and intelligence organizations and SVN political parties and religious sects. Armed reconnaissance groups assassinate or kidnap GVN officials, especially police and intelligence personnel. Security personnel also are responsible for compiling black lists of GVN officials marked for execution in the event of a VC victory. This section's cover number was C.298, but recently may have been changed to M.40 (which also may refer to COSVN in general).

52. According to Lt. Col. [ ] the chief and deputy chief of the Security Section were Hai Van and Sau Hoang (aka Cao Dang Chiem, Cao Dong Chiem).* [ ] has reported a "Colonel Thai" as chief of this section; this almost certainly is Pham Xuan Thai, one of the aka's for Hai Van. [ ], an intellectual [ ] also stated that Hai Van and Sau Hoang headed the section. A [ ] who served in the B.3 sub-section of the COSVN Security Section from [ ] to [ ] also listed Hai Van and Sau Hoang as chief and deputy chief. The 1966 collation [ ] listed Sau Hoang as chief and Le Van Son (aka Muoi Cong) and Ba Chung as deputies. Finally, according to [ ], the section's

b1 b3 (S)

b1 b3 (S)

b1 b3 (S)

*As noted in the footnote to paragraph 19, this "Cao Dang Chiem" should not be confused with Pham Hung, head of COSVN, who also uses the same aka.

supervisor was Ba Buoug: Buong is a COSVN CAC member and also has been reported by [redacted] to be supervisor of the Organization Section. b1 b3 (S)

53. [redacted] listed several other members of the COSVN Security Section, most of whom appear in the discussion of the sub-sections. Some, however, he failed to associate with any sub-section. The principal member of this group is Hai An (aka Hoang), a member of the Security Committee, a former Lt. Col., and CO of the Secret Police in NVN. Another Committee member he mentioned is Tu Trong (aka Tai). [redacted] also listed a Tan Nam as head of the Secret Police Service of the COSVN Security Section. The following were listed simply as cadres: Quoc Vu Khanh, Lam (aka Hong Ha), Bui Khung, and Hon (aka Quoc Hung). b1 b3 (S)

54. According to [redacted] the COSVN Security Section was believed to have ten major sub-sections (code named B.1 through B.10). The ten sub-sections are: b1 b3 (S)

a) The Administrative Sub-section (B.1). B.1 is divided into twelve elements. Five of these elements have been identified as correspondence, management, food supply, operations, and finance. The sub-section's strength dropped from 96 to 63 between 1965 and 1966.

b) The Internal Security or Political Protection Sub-section (B.2). According to [redacted] B.2 is divided into three major parts: an office staff (with 32 men), an armed reconnaissance component (consisting of units 15, 17, 19, and 21, totally 46 men), and a component entitled "Permanent Section (" (with 87 men). In early 1966, its total complement was 165, almost double the number it had a year earlier. According to SEA Newsletter II, this sub-section performs counter-intelligence (CI) functions and has two subordinate elements. The first is the Reconnaissance Element which is responsible for countering Allied sweeps into VC areas, primarily by developing and disseminating intelligence on the raiding forces so other VC units can counter the sweep. The other is a Judicial Element (People's Courts), which administers courts in VC areas. The chief of B.2, according to [redacted], is Sau Anh. b1 b3 (S)

c) The "Research" Sub-section (B.3). According to [redacted] B.3's staff grew from 4 to 17 men between b1 b3 (S)

1965 and 1966. It maintains extensive files on counter-revolutionaries, including foreign newsmen - Chinese, Cambodian, French, Japanese, and English. More current intelligence indicates that this section, while still often called Research, is actually the Espionage and Intelligence Section, and it is also supposed to be involved in black propaganda, especially misleading documents. Since COSVN Security Section case officers operate in both Cambodia and SVN, there may be a foreign and domestic breakdown. There also probably is a city breakdown, especially since much of the espionage component's activities appear to be centered around Saigon.

Before being sent to Bien Hoa, [ ] was associated with B.3. from [ ] and is still undergoing (he was [ ] interrogation). [ ] maintained that B.3's chief was Tam Toan. [ ] assignment was to study the activities of [ ] by [ ] their [ ] He said other cadres assigned to B.3 were Hai (aka Anh Son) in charge of studying the enemy situation; Viet Hong (similar duties); Kinh Chau (in charge of code numbering); Kiem Lap (similar duties). [ ] assignment in Bien Hoa appears to have been [ ]

b1
b3 (S)

d) The Guard Sub-section (B.4). B.4 appears to have numbered about 30 men whose duties included the protection of foreign visitors. This unit also has been referred to as a Public Order unit. According to [ ], the chief of B.4 is Nam Tra and one of the cadres is named Le Chat.

b1
b3 (S)

e) The Production Sub-section (B.5). B.5 is the production component common to most VC agencies. Charged largely with growing rice and raising cattle, this sub-section is omitted from distribution of Security Section circulars and from the pay rosters.

f) The Internal Security and Intelligence School (B.6). In early 1965, B.6's staff was top heavy with a strength of 87. Like other components, it came under intense pressure to reduce its administrative personnel in 1965. By 1966, only 24 staff members remained. This

school does not have regular semesters. Classes start at irregular intervals with as many as four going on at the same time. [redacted] mentioned two Security Section instructors who probably were assigned to this school; Toan Thang and Sau Hoc (aka Doc). He also named the chief of B.6, Hai Binh, but did not refer to him as associated with instructing. b1 b3 (S)

g) The "Organic Mobile Unit" (B.7). Sub-section B.7 may be the "organic mobile unit" occasionally appearing in documents. In 1965, its strength was 102 with a planned complement of 204. This unit also has been referred to as the Border Defense Public Security Unit and presumably would be responsible for border surveillance at COSVN. [redacted] mentioned several cadres of Region C (meaning Cambodia), which may be a possible additional sub-section, but also may refer to B.7 (or less likely, B.3). The chief is Tu Thang who, according to [redacted] also is a Security Committee member. Two cadres [redacted] listed are Muoi Thanh and Ba Kha. While [redacted] called him "Officer Chief of Security," Chin Nghia is probably also connected with the Region C group. b1 b3 (S)

h) Commo-Liaison Sub-section (B.8). B.8 had a staff of 35 in 1966. In 1965, the sub-section reportedly made 164 routine trips, performed 83 unexpected escorts of visitors, transmitted direct and express correspondence, and guided recruits. Permanent commo-liaison corridors appear to have been set up with MR-1 through 4 and with districts and provinces in the area of War Zone C. A document of early 1966 suggests the COSVN-Saigon corridor is one of the most heavily traveled.

i) The Logistical Sub-section (B.9) maintains an armory and food depots, and has a distribution unit equipped with pack bicycles. The sub-section's last known strength was 39 people. The armory's stock of weapons includes silencer pistols and explosives. Besides the COSVN Section, its customers include the regions, and Tay Ninh and Binh Long Province Security Sections. The chief of B.9, according to [redacted] is Chin Cat. b1 b3 (S)

j) The Interrogation and Detention Sub-section (B.10). B.10's last known strength (April 1968) was 35 men with plans to add 15 more. The sub-section is organized to include a leadership committee, an interrogation and indoc-

trination element, a jail administration component, and a guard unit. Reportedly, the number of detainees rarely exceeds 20. They are of two types: VC personnel from COSVN agencies suspected of harboring anti-revolutionary sentiments, and various military and civilian Allied officials, including important Vietnamese.

55. Available information is unclear regarding the organizational subordination of some elements of the COSVN Security Section. A signal component almost certainly is present, because of the large amount of radio equipment mentioned in Security Section documents. Some of the radio operators seem to have been trained in NVN. It also seems likely that the Security Section has its own cryptographers, because lower echelons have been identified as having them. b1 b3 (S) [redacted] mentioned the names of several radio operators: Tho Minh (in charge of radio communications), Sau Hai (chief of the Secret Code Cell), Ten Leo, Ten Thuy, Ten Trieu, and Bay Thanh (all cadres of the Secret Code Cell). A "Guerrilla Unit," code-named "Village 5," also has been mentioned as part of the Security Section. Apparently the unit is not a permanent formation, but seems to take shape only when Allied sweep operations threaten War Zone C. A report of May 1966 listed its armament as four machine guns, 14 submachine guns, and 114 rifles.

F. Military Proselyting Section

56. The Military Proselyting Section draws up and disseminates instructions concerning the proselyting of enemy soldiers and civil servants. Its goal is to motivate these personnel to desert to the VC, or remain at their posts as fifth columnists or undercover agents. [redacted] noted that this section is a civil agency of COSVN, although up through 1964 it had been one of the four sub-sections of the SVNLA Headquarters. There still is a small military proselyting section (most often referred to as the Enemy Proselyting Section or Branch) under the Political Staff of the SVNLA Headquarters. b1 b3 (S)

57. Supervision of enemy proselyting activities by lower echelons appears to be the section's principal function. In performing its task, the section prepares propaganda materials to be used by lower echelons, forwards instructions on policy and techniques, and maintains special advisory teams at lower echelons. Whether the COSVN Section conducts penetration operations or whether all such activities are transferred to

Military Intelligence or Security is not clear. At lower echelons, it is known that military proselyting often has provided undercover agents for Military Intelligence and possibly Security, and that they run innumerable low level penetrations themselves. However, at this level the sections seem more oriented toward recruiting fifth columnists to be used to sabotage equipment or help overthrow isolated outposts at the crucial moment when they come under VC attack. Such fifth columnists can be transferred to more sensitive posts in the GVN and thereby become a distinct intelligence asset.

58. Military proselyting elements also are responsible for running prisoner of war (POW) facilities, as distinct from Security Section detention and reform camps which are oriented toward incarceration of criminals, spies, "wicked elements," and counter-revolutionaries. In these camps, the Military Proselyting Sections are responsible not only for maintenance, but for interrogation and thought reform, and determining what prisoners should be released, retained, or punished. Some evidence suggests the COSVN Section may operate camps for high level SVN and foreign prisoners.

59. Lt. Col. [redacted] and [redacted] are in rare b1 b3 agreement on the name of the chief of this section - Tran Van Du (aka Bay Du), a CAC member. Bay Du is believed to have been born around 1927 and to have come from Ben Tre Province where his wife (Le Thi Tuyet) was a village level cadre. His name has been associated with the Military Proselyting Section since COSVN was organized. There are reports that he may have been replaced by Nguyen Van Thoi (aka Nam Thoi) to free him for service on the SR-1 Committee. There also was equal agreement over the name of the former deputy. [redacted] listed Ba Cung (aka Ba Xe) as of 1966. [redacted] listed Tran Van Thanh (aka Ba Cung), but said he had been relieved by a person unkown to [redacted] [redacted] did not know who the deputy was, but did state that the overall supervisor was CAC member Maj. Gen. Hai Hau and/or Tran Luong. b1 b3 (S)

60. According to SRA Newsletter II and [redacted] there b3 were seven sub-sections in the Military Proselyting Section, and apparently an eighth has been added recently:

a) The Administrative Sub-section provides both administrative and logistical support. The sub-section consists of eight elements; Secretarial, Finance, Liaison, Transportation, Mess, Cadre Protection, Medical and Security.

In 1966, according to [redacted] the chief was Lt. Nam (or Lam) Quang. There were two deputies, Ha Tho and Hoang Vinh Sung. Lt. Tho was in charge of the secretariat. Hong was responsible for records. Hai was in charge of transportation and security, and Bay Co was his assistant. Cu Can Ky was responsible for production. b3

b) The Training Sub-section, headed by Capt. Ba Hung, provided training aids and other instructional services for the section. It consisted of two elements: School and Documents.

c) The Propaganda Sub-section consisted of five elements: Photo, Press, Information, Leaflet, and Book. According to [redacted] the chief was Maj. Muoi Tai (aka Tu Kien) and the deputy was Khiet. Tho was responsible for leaflets and Trong for newspapers. According to [redacted] b3 b1,b3(S)

the chief of the Propaganda Sub-section is Tu Hao. Tu Hao reportedly studied English as a student in Hanoi during the French Resistance period. Apparently around the beginning of 1966 a new "combined proselyting plan" was initiated which placed greater emphasis on proselytizing U.S. troops, especially Negroes. Tu Hao was charged with preparing the line to be used in leaflets directed against U.S. troops as part of this plan. b3

d) The Fifth Column or Penetrations Sub-section supervises the recruiting of in-place agents and sympathizers within the ranks of the GVN and ARVN. It is believed that there are three subordinate elements: Urban, Rural, and Enemy Installations. In 1966, the chief and deputy were Sau Vu and Tu Viet. In addition, there may be more specialized elements operating either under this sub-section or, more likely, in close coordination with it. One of these is the Military Officers' Proselyting Sub-section, and another is the Capital Military Proselyting Section (both of these are discussed below).

e) The POW Sub-section has been known to include such functional elements as camp security guards, camp administration, an interrogation and indoctrination element, and a production element. This sub-section is responsible for determining which POW's should be released,

retained, or punished. The total POW population is usually spread over several smaller camps. In the case of high level or foreign POW's, the number of POW's is restricted to a low of ten or less. And it would be safe to assume that only the most important prisoners are the concern of COSVN. In 1966, its chief and deputy were Capt. Chuong and Tu Quy.

f) The Organization Sub-section is responsible for maintaining the personnel records of Party members serving in the section. It constitutes the Party's version of the Administration Sub-section. In 1966, its chief was Ba Hung.

g) The Research or Management Sub-section is supposed to analyze performance and plan operations for the section. The three elements of this sub-section are: Reports and Analysis, Enemy Installations, and Directive Writing. In 1966, its chief was Bay Kiem.

h) The Military Officer Proselyting Sub-section. This sub-section was established in late 1965 and was tasked with recruiting selected GVN military personnel. Bay Nghia, a senior PRP cadre, was detailed from VC MR-2 to head the sub-section. He was supposed to report directly to Tran Van Du (aka Bay Du), Chief of the COSVN Military Proselyting Section. About four months after the sub-section's formation, another cadre, Ba Ke, was assigned to assist Bay Nghia. According to [ ] who was a [ ] of the [ ] until early [ ] the sub-section was ineffective, primarily because experienced cadres were not available to conduct high level proselyting operations. By late 1967, the situation had deteriorated to the point that Bay Nghia issued orders that the sub-section was to concentrate on general propaganda activities, if it could not implement an effective officer proselyting program. b1 b3 (S)

i) The Capital Military Proselyting Sub-section (CMPS). The CMPS is a new sub-section of COSVN's Military Proselyting Section. The creation and operation of the CMPS offers considerable insight into the modus operandi and vulnerabilities of COSVN forward elements operating in the Saigon area (most particularly those operating out of Military Proselyting, Security, and Military Intelligence). Information on the CMPS was provided by [ ] b1 b3 (S)

[redacted] had been at the time of his capture [redacted] for Ben Tre Province when in November 1967, Bay Du contacted him regarding recruiting cadres for operation in Saigon. [redacted] said Bay Du at the time was deputy chief of the COSVN Military Proselyting Section. It was not until a meeting held in Long An Province in March 1968, that [redacted] learned the cadres he had recruited (all from Ben Tre) were to be part of the new CMPS. b1 b3 (S)

61. A review of the formation and operation of the CMPS affords considerable insight to the mechanics of COSVN's modus operandi; and its ad hoc nature. At the time of the March 1968 meeting, the May Offensive was imminent so the organization of Armed Propaganda Teams (APT's) was paramount. It is interesting to see how COSVN went about setting up these APT's. Bay Du gave [redacted] a letter of introduction to take to the deputy chief (Tu Quy) of SR-3's Military Proselyting Section at Long Phung Village, Can Giuoc District, Long An Province. It was Tu Quy who arranged for equipping APT and coordinating its activities with SR-3's military forces. [redacted] was dispatched to Saigon ahead of time, but the APT failed to link up with him. b1 b3 (S)

62. During early August 1968, [redacted] and the seven remaining members of the APT were escorted to the Ba Thu Base in Cambodia [redacted] lost control of the APT at this time because the members were dispersed to other elements of the COSVN Section. Bay Du did not attend the reorganizational meeting because he was no longer the chief of the CMPS. As reorganized, the CMPS consisted of six key cadres: b1 b3 (S)

Chief: Tu Kien (aka L10, a member of the COSVN Section)
Deputy: Ut Hao (aka N30)
Deputy: Hai Be
Member: Sau Cong
Member: Nam Hau
Member: Tu Minh

63. Ut Hao, Sau Cong, and Tu Minh were assigned particular GVN and Army of the Republic of Vietnam (ARVN) installations which were highly desirable targets for penetration. Ut Hao was assigned the ARVN Joint General Staff (JGS) and Capital Military District (CMD) Compounds. Besides the personnel of these compounds, he was also to recruit civilians who lived in the areas

surrounding the compounds. All of these personnel were to be utilized to recruit additional sympathizers, to provide information concerning the installations and, if opportune, to smuggle in explosives for sabotage purposes. In addition, the civilians could be organized into propaganda teams to spread leaflets in the areas around the compounds. Sau Cong was assigned Independence Palace, the National Police Directorate and the Saigon Radio Station. Tu Minh's targets were not known. Nam Hau and Hai Be continued to perform their previous assignments, the former as Tu Kien's assistant, and the latter as leafleteer. Each member was to make periodic progress reports to Tu Kien who, in turn, was directly responsible to Bay Du at COSVN. With the exception of those personnel operating under each of the cadres, this comprised the CMPS's entire organizational system.

64. Ut Hao set up his base of operations at Tu Kien's base in My Thanh Village, Cay Lai District, My Tho Province. From this location, Ut Hao communicated with his personnel in Saigon by comms-liaison runner and also personally. His organization consisted of five cadres, eight sympathizers, and seven comms-liaison runners. Two of the cadres had not begun operations; Tu Tien and Hai Tot. The other three had; Sau Trung (aka Tuan), Tu Phuoc, and Tam Duc.

65. Sau Trung concentrated on the JGS Compound and had successfully recruited three ARVN soldiers, known to [ ] as 1002, 1003, and 1004; one of whom worked in the JGS. Tu Phuoc concentrated on the CMD Compound. He recruited three sympathizers: Loc, Thinh, and an ARVN Lt.Thanh. The latter worked in the CMD Compound. [ ] accidently discovered a letter written by Thinh to an ARVN Major requesting a different "intelligence assignment," so [ ] ordered Phuoc to break contact with Thinh and Loc. Tam Duc also had recruited three sympathizers: Khiet or Thiet, a National Policeman named Be, and Hai Sang. None of these personnel were effectively exploited by Duc. b1 b3 (S)

66. [ ] communicated with Sau Trung through a letter drop at the home of Hai Truong, a sympathizer whom he had known from the Ben Tre days. This was where he met with Tu Kien, the deputy chief of the CMPS. To establish contact with all of these agents, [ ] utilized the comms-liaison runners originally recruited in Ben Tre, including Tu Moi, Muoi Chanh, Ba Ut, Thu (aka Hong), Huynh Le, Tu Tien, and Hai Hoa. One additional runner, Ba Ro, was recruited by Tu Phuoc. There was no system employed in the use of the runners; they were used as needed. b1 b3 (S)

To avoid being conspicuous, [ ] did not send these couriers to the base very often. Two more cadres were assigned to [ ] by Tu Kien in late January 1969. He was enroute to Hoc Mong District to make the initial contact with them when he was apprehended at a control station for possession of a false ID card. b1 b3 (S)

67. [ ] made some interesting admissions to the authorities. As a result of the August 1968 meetings at Ba Thu, Cambodia, he clearly recognized that the use of APT s during the May Offensive had been a failure. He also recognized that the General Uprising in the cities could come only as a result of vigorous and continuous proselyting. However, his morale was quite low as he had experienced many difficulties. Chief among these was the antipathy towards the VC shown by the people of Saigon. It simply was not possible to recruit them readily. Most of his associates were people he had recruited or known in Ben Tre. The population control exercised by the GVN through checkpoints and public security forces was particularly difficult to outmaneuver. The checkpoints proved to be a constant limiting factor on his mobility. He had lived in constant fear of being apprehended and was convinced that he eventually would be captured while traveling. False identification cards (ID cards) were expensive and difficult to procure. (This is corroborated by a [ ] who also experienced a great deal of difficulty procuring ID cards, despite the fact that COSVN is supposed to be able to forge them.) b1 b3 (S)

68. Because [ ] and most of [ ] personnel were from the countryside, they had difficulties adjusting to the city and finding their way around. They feared they would be recognized as strangers and be turned in to the authorities. Because of the strong population control and the likelihood that [ ] personnel would be apprehended, his organization had to operate under a compartmentalized system, thereby lessening his control over [ ] cadres' activities. Furthermore, [ ] experience with Trinh and Loc made him very apprehensive of the possibility that [ ] organization would be or had been penetrated. Although he anticipated that it would take a long time to establish his organization, he felt that the results of his efforts from September 1968 to January 1969 were very meager. b1 b3 (S)

C. Civilian Proselyting Section

69. One of the principal functions of all levels within the infrastructure is the recruiting of personnel. COSVN has

different sections devoted exclusively to the function of proselyting. Although each is often listed as a separate entity, it is possible that all sections except Military Proselyting are grouped into an overall Civilian Proselyting Section (sometimes referred to as Front Section, especially in older documents). According to [redacted], there was such a section headquartered in Tan Lap Village, Tay Ninh Province with a total personnel strength of 20 to 25 persons. [redacted] maintained that the section was composed of three major sub-sections --Farmers, Women, and Youth-- which prior to 1966 had been separate sections. [redacted] stated that the function of the Civilian Proselyting Section was to send cadres into the villages to establish Liberation Farmer's, Liberation Women's, and Liberation Youth's Associations. As soon as the organizations were established, the section cadres withdrew, relinquishing their leadership function to the local people. b1 b3 (S)

70. The collated study, [redacted] listed former Under-Secretary Vo Chi Cong as the Chief of the Civilian Proselyting Section in 1966. This was logical since at the time Cong was the overt PRP representative to the NFLSV, a function now performed by Tran Luong under his overt name of "Tran Nam Trung." Indeed, one source has reported that this section is now headed by "Tran Nam Trung." Lt. Col. [redacted] believed that the "Front Section" was under Rau Kem. [redacted] did not know who headed the section. He believed that the chief of the Farmer's Proselyting Sub-section was Nguyen Huu The (aka Tu Gia), who also is a member of the NFLSV Presidium. [redacted] also estimated that the total membership of the Liberation Farmer's Association in 1966 was 22,000 to 25,000. At the time, the Women's Sub-section was headed by Mrs. Nguyen Thi Gieng.* Other important leaders were Mrs. Ma Thi Cu and Mrs. Nguyen Thi Lu. Total membership in the Liberation Women's Association (LWA) in 1966 was estimated at 40,00 to 50,000. Nguyen Thi Dinh, an NFLSV Presidium member and DCO of the SVNLA, currently heads the LWA. [redacted] believed the Youth Proselyting Sub-section was headed by Nam Quang (who he thought was also chief of the Propaganda, Culture, and Indoctrination Section). He directed the activities of both the Liberation Youth's Association (LYA) and the Liberation Student's Association (LSA). Total estimated membership of these two groups in 1966 was 60,000 to 70,000. At the present b1 b3 (S)

*This almost certainly is Le Thi Rieng, a leading PRP cadre arrested in May 1967 and subsequently killed, apparently inadvertently, by the VC during the 1968 Tet Offensive.

time. Tran Bach Dang, a COSVN CAC member and also a member of the NFLSV Presidium, is LYA Chairman; while Tran Van Kiem, a member of the NFLSV Presidium and currently in Paris heads the LSA.

71. [redacted] mentioned that the People's Revolutionary Youth Group (PRYG) membership in 1966 was estimated at 25,000 to 30,000. [redacted] quite correctly noted that the PRYG chapters came directly under the supervision of the local party chapter. He might have added that PRYG chapters in the SYNLA came under the unit's Party chapter. The PRYG, therefore, was not part of the Civilian Proselyting Section's responsibility. But there was a close tie-in because PRYG members at the local level were responsible for much of the active leadership of the Liberation Youth or Student Association chapters and cells.

b1
b3
(S)

72. There have been reports of a Chinese, a Workers, a Religious, an Intellectual, and a Montagnard Proselyting Sub-section. From time to time, cadres of such sub-sections at lower echelons have been captured or firmly identified; especially at the Saigon-Cholon echelon. In addition, NFLSV organizations are known to exist for these and other segments of society in South Vietnam, and the usual practice is to assign the responsibility for proselyting in a given segment of the population may be assigned to a member of the Civilian Proselyting Section, a separate sub-section may be created to perform this function, or the responsibility may be given to a closely affiliated section (e.g., the Newsmen Association appears to come under the Propaganda, Culture, and Indoctrination Section). An overlap of personnel undoubtedly exists between all of these proselyting sub-sections, and the NFLSV Committee (discussed later). The actual Liberation Associations technically are a part of the NFLSV structure, while the organizing cadres work out of the proselyting sub-sections. Often the same individual works both sides of the house, sometimes operating under the thin cover of pseudonyms.

E. Civil Health Section

73. The Civil Health Section provides medical care to the personnel of COSVN and provides guidance and supervision for subordinate civil health sections, hospitals and dispensaries at lower echelons. It also has some responsibility for the supply of medical equipment and drugs to lower echelons, and for processing of bulk pharmaceuticals into useable drugs. A facility is maintained for training medical technicians, first-aid personnel and pharmacists. In addition, the section

including a program of continuing medical education by distributing training bulletins on medical techniques to interested physicians. The supervisory responsibility also appears to include the use of inspection teams. A plan captured in 1968 proposed the dispatch of an inspection team to undertake a thorough survey of village medical facilities to determine the progress being made in improving public health systems. Other aims of this inspection mission included acquisition of first-hand knowledge of local medical facilities and the selection of pilot villages where measures would be instituted for improved leadership.

74. According to [redacted] Civil Health doctor, personnel working in the Civil Health Sections in SVN were classified into four categories. [redacted] expertise is the product of experience. He received his medical training in [redacted] SVN. On graduation he infiltrated in SVN, eventually becoming the chief of the [redacted] Civil Health Section. [redacted] rallied on 5 May 1968. He reported that the four categories were: (a) doctors and highly trained druggists; (b) medical practitioners and intermediate druggists; (c) nurses and druggist assistants; and (d) first aid personnel and midwife assistants. The COSVN Section had to furnish intermediate and high-level doctors and druggists for the Regional Civil Health Sections who, in turn, had to provide similar personnel to the Provincial Sections. The provinces had to provide the districts with medical practitioners, nurses, and druggist assistants. The districts supplied nurses, midwives, midwife assistants, and first aid personnel for the villages.

b1
b3
(S)

75. [redacted] believed that as of May 1968, there was an adequate number of doctors and qualified druggists, but there was a shortage of medical practitioners, intermediate druggists, nurses, midwives and their assistants, and first aid personnel. In May 1968, Provincial Civil Health Sections usually had three or more doctors, depending on the size and importance of the province, and one or two mobile surgical teams. Each team was composed of one surgeon, one or two medical practitioners, and two or three nurses. The District Civil Health Section usually had one or two medical practitioners. Village Sections were staffed with no more than two nurses and two midwife assistants, and three to five first aid personnel. Some Village Sections were operating with only a third of the required staff, due to desertions and losses, and inability to effectively recruit in GVN areas.

76. [redacted] stated the chief of the COSVN Civil Health Section was Nguyen Van Thu (aka Ba Thu, Nguyen Van Chi). Early in 1967, Ba Thu returned to Hanoi because of tuberculosis and Dr. Muoi Nang, the section's DO, took over as acting chief. An earlier source, [redacted] also reported Nang as chief in August 1967. According to [redacted] the chief was Phung Van Cung; but the section actually was managed by Ho Thu, a pharmacist and member of the CAC.* In 1966, the chief and deputy, according to [redacted] were Dr. Nguyen Van Vy and Hon (aka Hoang). b1 b3 (S)

77. The SRA Newsletter II listed eight sub-sections, the first four of which correspond roughly with the six sub-sections listed by [redacted] The sub-sections were: b1 b3 (S)

a) The Administration Sub-section (B.1) is called the "Civil Health Headquarters" by [redacted] According to the SRA Newsletter, it keeps medical records and charts, maintains supply levels, and assures an adequate level of medical personnel. b1 b3 (S)

b) The Hospital (B.2), according to [redacted] is responsible for treatment and convalescence of civilian cadres of provincial Party Committee rank and above. [redacted] described COSVN's surgical facilities as primitive. He stated the operating room was set in a trench four meters deep, six meters long, and three meters wide. It was covered with parachute cloth. A bicycle lamp was used for illumination which was powered by turning a bicycle wheel. b1 b3 (S)

c) The Dispensary (B.3), according to [redacted] is provided for civilian cadres and personnel, regardless of branch. The SRA Newsletter lists a Hospital and Dispensary Sub-section which at least in name would combine the activities of [redacted] B.2 and B.3. The Newsletter states that the sub-section is responsible for physical and technical support such as obtaining proper sites, building shelters, issuing supplies, and performing routine hospital duties. b1 b3 (S)

*Phung Van Cung is head of the presumably overt NFLSV Public Health Commission; this probably is the basis for [redacted] contention. It should be noted, however, that the NFLSV position and chief of the COSVN Civil Health Section may be identical. b1 b3 (S)

d) The Bacteriological Institute (B.4), according to [redacted] cultivated bacteria to make vaccines for use by subordinate echelons against such diseases as cholera, typhoid, and smallpox. b1 b3 (S)

e) The Pharmaceutical Factory (B.5 or B.29), according to [redacted] produced medicines for B.2 and B.3. The Newsletter also listed this sub-section, stating its functions to be obtaining drugs and medical supplies through production or via the black market, for distribution by the Pharmaceutical Sub-section. According to [redacted] the raw material for the preparation of Western medicines came from Hanoi. The COSVN factory also produced Oriental medicines. Apparently, some pharmaceuticals are sent to lower echelons while others are not. [redacted] mentioned leucorrhea and cataplasm which were reserved for B.2 and B.3 until 1966, at which time COSVN began to supply them to regions and provinces. b1 b3 (S)

Regional Health Sections produced nearly the same medicines as COSVN. Even provincial Civil Health Sections make pharmaceuticals, particularly those near enough to the border to set up their facilities in Cambodia. At the district and village level, GVN products frequently are purchased. [redacted] stated the VC were able to purchase medicines through the use of prescriptions issued by GVN doctors. They also gave written instructions specifying type and quantity of medicines to sympathizers to buy for them. They also organized groups of regular purchasers with connections with drug stores and hospitals. GVN-recognized nurses often were used to do this. They easily could buy any quantity of medicine, and receive a good profit in the bargain. b1 b3 (S)

[redacted] was not clear in his delineation of duties between B.4 and B.5. For instance, he stated B.5 produced a "secret" medicine called "subtillis" made from bacteria cultivated from meat and eggs and used to combat several strains of bacterial infection. It would seem that this medicine would more likely be produced by B.4. This medicine, incidentally, had been provided to the regions and provinces since 1965. [redacted] also stated that neither NVN nor the VC had been able to produce penicillin. b1 b3 (S)

f) The Cadre's Formation and Advanced School (B.25) was the name given by [redacted] to what the Newsletter des-

cribed as the Medical Education Sub-section. The Newsletter described its functions as providing printed information and oral lectures to midwives, technicians, and nurses and in general supporting the Military and Civil Health Sub-sections. [redacted] had more detailed information. From 1964 to 1966, it trained nurses to become medical practitioners. In that period the school conducted three courses for 100 students. Since 1967, the medical practitioner training had been entrusted to Regional Civil Health Sections. MR-1, 2, and 3 had conducted seven courses for 350 students selected from experienced nurses. Training lasted from six months to a yerr. Further down the line, midwife assistants were selected by provincial sections to attend the midwives and nurses courses which lasted from two to three months. District Civil Health Sections trained for one to two months. Since terminating the medical practitioner courses, COSVN began training medical technicians to become doctors. Two courses had been held. The 1966-1967 session trained 22 doctors, and a September 1967 to September 1968 course provided 27 more.

g) The Drug Preparation and Storage Unit was the final sub-section mentioned by [redacted]. It did not correspond to any mentioned in the SRA Newsletter. This unit's functions were storing medicines and medical instruments supplied by Communist countries for distribution to regional and provincial dispensaries.

78. The following four sub-sections were mentioned in the SRA Newsletter, but not by [redacted]. In the case of the last two, their functions are such that they probably do exist, and probably were of no interest to [redacted]. The existence of the first two (Military Health and Civil Health) is more problematical. However, since their functions also are less medical than sanitary, they also may have escaped the attention of [redacted] The four sub-sections are:

h) The Military Health Sub-section insures that hygiene and sanitation programs are initiated and followed within the armed forces.

i) The Civil Health Sub-section specialized in preventative medicine and sanitation programs in VC-controlled

areas.

j) The Printing Sub-section produces printed material on medical topics for use by the populace under VC control, as well as by members of VC military and civilian agencies.

k) The Protection Sub-section provides physical security for the Medical Section.

VI. THE "MILITARY" SECTIONS

79. The COSVN Military Affairs Committee (MAC) originally was a special committee of the Party which met on a regular basis (said to be monthly) to resolve major problems of military police, distinct from operational details. About 1965, as the tempo of military operations increased, a separate military headquarters was required and the SVNLA Headquarters (Hqs.) was established as a working organization. The MAC continues to exist in name, but is virtually synonymous with the SVNLA Hqs. Technically speaking, the MAC handles Party affairs, while the Hqs. handles the military. The Hqs. exercises command of the Main Forces (MF), Local Forces (LF), and guerrilla units. It is the central command organization through which the military policy of the SVNLA is executed. It is subordinate to the CAC of COSVN, but can also communicate directly with the NVA command in Hanoi.

80. Returnee Lt. Col. [redacted] provided a list of the commanders of the SVNLA Hqs. from 1961 to 1968. While the individuals he cited may not have held these exact positions (for biographic sketches and further explanations, see the CAC section of this paper), they probably occupied positions quite close to those he named: b1 b3 (S)

1961-1963

CO & PO — Maj. Gen. Tran Phi (nka Hai Hau, Tran Luong, Tran Nam Trung, Tan Phi)

Executive Officer (XO) — Lt. Gen. Tran Van Quang (aka Bay Tien)

1964-1965

CO & PO	Sen. Gen. Nguyen Chi Thanh (aka Sau Di)
XO	Lt. Gen. Tran Van Tra (aka Tu Chi, Tran Nam Trung, Le Van Thanh, Tran Trung Lap)
XO	Maj. Gen. Le Trong Tan (aka Ba Lam, Ba Long, Nguyen Trung Tan, Ha Ke Tan, Thanh Song, Tran Van Hai, Phu Chu, Chinh Nam)
XO	Nguyen Huu Xuyen (aka Tam Don Den, Tam Kien Quoc)
XO	Maj. Gen. Hoang Duc Anh (aka Sau Nam, Le Duc Anh)
XO	Lt. Col. Nguyen Thi Dinh (aka Ba Dinh, Ba Han, Bich Tri Van, Ba Tan, Bay Thanh)
DPO	Maj. Gen. Tran Do (aka Chin Vinh, Truong Son, Tran Quoc Vinh)

September 1967 to 1968

CO & PO	Pham Thien Hung (aka Pham Hung, Bay Hong)
XO	Lt. Gen. Hoang Van Thai (aka Muoi Khang, Hoang Van Khang, Ngo Quoc Binh, Hoang Xuan Thai)
XO	Lt. Gen. Tran Van Tra
XO	Lt. Gen. Le Trong Tan
XO	Nguyen Huu Xuyen
XO	Maj. Gen. Hoang Duc Anh
XO	Lt. Col. Nguyen Thi Dinh
DPO	Maj. Gen. Tran Do

[redacted] who was [redacted] had a slightly different way of looking at the leadership of the SVNLA Hqs. He separated the membership of

the MAC from that of the Hqs. The secretary and under-secretary of the MAC were Pham Hung and Muoi Cuc; and the members were Hoang Van Thai, Tran Van Tra, Tran Do, and Le Trong Tan. The head of the Hqs. was Lt. Gen. Hoang Van Thai. His deputies were Lt. Gen. Tran Van Tra, Maj. Gen. Le Trong Tan, Nguyen Huu Xuyen, and the ever present female representative, Nguyen Thi Dinh. The PO was Pham Hung, with two deputies, Tran Do and Muoi Cuc.

82. Most of these military leaders were discussed earlier in the section on the CAC. Some will be discussed in the section that follows on the operation of the Staff Departments. The remaining deputies who are not covered in either place are: Maj. Gen. Le Trong Tan, Nguyen Huu Xuyen, and Lt. Col. Nguyen Thi Dinh.

83. Le Trong Tan. According to [redacted] sources, Le Trong Tan (aka Ba Lam, Ba Long, Nguyen Trung Tan, Ha Ke Tan, Thanh Song, Tran Van Hai, Phu Chu, Chinh Nam) was director of the Hon Gai (north of Hai Phong city in NVN) police under the Japanese occupation. At the end of 1947, he appeared as the CO of the Viet Minh 97th Regiment and of Region XIV with the rank of Lt. Col. During the period 1948-1949, he was DCO of the Tonkin Inter-region X. From 1950-1951, he was CO and PO of the 209th Song Le--"Claire River"--Regiment (Regt.), which was the basic unit of the future 312th Division. He commanded this unit from its formation and became a Brigadier General (Brig. Gen.) in 1952. From 1957 to 1960 he was commandant of the NVA Ground Forces Officers School at Son Tay. In 1960 he was promoted to Maj. Gen. and attended a Communist Chinese War College. In 1961 he became a deputy chief of the NVA General Staff. b1 b3 (S)

84. [redacted] alleges that Tan became a deputy chief of the SVNLA in 1964-1965. In 1966 he was reported to have the additional duty of chief of the Combat Operations Staff (B.1). He is now believed to be acting as commandant of the VC Ground Forces School. He is a member of the Central Committee, and has written numerous articles on military subjects, one of which was on the subject of strengthening on-the-job training of officers. These articles appear regularly in Hanoi newspapers. Training, rather than combat or staff work, would appear to be his current speciality. He has been described as very nervous and he seldom speaks. Tan reportedly dresses in khaki uniforms. b1 b3 (S)

85. Nguyen Huu Xuyen. Not much is known about Nguyen Huu Xuyen (aka Tam Den Den, Tam Kien Quoc) [redacted] mentioned a b1 b3 (S)

Col. Xuyen as deputy SVNLA commander and stated that formerly he had been CO of VC MR-1, but that he was sent to NVN in June 1964 because he thought it unnecessary to use regular troops for battles. [redacted] heard he had returned to SVN in October 1965. [redacted] mentioned a deputy CO named Tam Venh Venh or Tam Xuyen in charge of Rear Services. This probably was Xuyen since his most used aka is Tam Don Den, the "Venh" being mistakenly substituted for "Dan." From such lackluster early reports, it might be concluded that Xuyen's star is on the wane. But according to more recent reporting [redacted] 21 April 1969), as far as direct command of the forces earmarked for use against Saigon, the role envisaged for Xuyen is second only to that of Tran Van Tra.

b1 b3 (S)

b3

86. Nguyen Thi Dinh. Nguyen Thi Dinh (aka Ba Dinh, Ba Han, Bich Tri Van, Ba Tan, Bay Thanh) is the only SVNLA DCO whose position also is overt. Although there is considerable conflict in detail, in general terms her background is fairly well established. She apparently was born in 1920, either in Nam Dinh Province (NVN) or Ben Tre Province (SVN). In either event, she spent her early years in Ben Tre. In 1937, she and her husband Bich joined the Ben Tre Popular Front stationed at Ba Tri. They were arrested in 1939. He was sent to Con Son Island and died, possibly as early as 1940. She was sentenced to forced residence until 1943, when she was allowed to leave.

87. She immediately rejoined the Resistance and next was heard of as participating in the August 1945 uprising in Ben Tre Province. In 1946 she and other cadres were in Hanoi to receive weapons and training for stepping up the guerrilla war. By 1954 she was reported to be Chairman of the Liberation Women's Association (LWA) in Saigon-Gia Dinh. Other reports describe her as Secretary General of the entire LWA. On 8 March 1965, at the alleged first convention of the LWA, she was elected its Chairman, a position she still holds according to overt reports. In 1960 she was appointed deputy secretary of Ben Tre Province. Other sources, including [redacted] designate her as Province Party secretary. In 1961 she was elected to the Executive Committee of the Nam Bo NFLSV and presently she is an overt member of the NFLSV Presidium. In May 1965, she was appointed DCO of the SVNLA, although according to [redacted] she assumed this position in 1963. As SVNLA DCO, Dinh appears to specialize in guerrilla affairs.

b1 b3 (S)

88. Another source stated that Dinh was a cadre for Ben Tre from 1950 to 1960, and for MR-2 from 1960 to 1963, and that

She married twice. According to this source, Dinh had four children by her first husband (she is supposed to have had one), and that he was reportedly killed in 1962. This source also stated that she was a Lt. Gen., whereas [redacted] reported she was a Lt. Col. She was last reported to have taken personal command over MR-2 sometime during the summer of 1968, but this is unconfirmed. b1 b3 (S)

90. Most sources do agree on her personal description. She has been described as stout or fat, frank, talkative, outgoing, and folksy. She prefers field trips to office work, and does not wear make-up or jewelry. She does not smoke and drinks little. Her military abilities reportedly are not very great, and there exists a feeling that she may be more of a figurehead to inspire female recruits than an actual military activist.

VII. THE STAFF DEPARTMENTS

90. Three staff departments are included in the SVNLA Hqs: Military, Political, and Rear Services. According to [redacted] when COSVN was reactivated in 1961, these divisions were designated as sections (ban). They later were changed to offices (phong). By 1964 they had been up-graded to departments (cuc). Under the present military structure, the term cuc is used in the south only at COSVN and in MR-5; all other MR's use the term phong for the corresponding sections of their staffs. b1 b3 (S)

A. The Military Staff Department

91. The Military Staff Department is the equivalent of the American G-1, G-2, and G-3 Staffs. It is responsible, according to [redacted] for troop replacement, including infiltration and assignment of recruits. It prepares the annual training program for main, local, and guerrilla force troops. Further, this department provides guidance to the Rear Services on weapons and material distribution priorities. It collects intelligence and advises the SVNLA Hqs. on strategy, operations, and tactics; and it also trains military cadres and specialists. b1 b3 (S)

92. There is remarkable agreement among the major sources on the chiefs and deputy chiefs of the Military Staff Department. [redacted] all agree the chief of staff is Hoang Duc Anh (aka Sau Nam). There was some difference of opinion with regard to his rank, ranging from [redacted] Maj. Gen. to [redacted] Col. Sau Nam b1 b3 (S)

believed to be a member of the Central Committee. [redacted] formerly to have been an assistant chief of staff on the NVA General Staff. Major [redacted] on 6 January 1969 described Sau Nam as easy going, an excellent staff worker, a regroupee, and former chief of the Military Forces Department of the NVA General Staff. Sau Nam also was reported to be CO of a Vanguard or Forward Hqs. operating during the 1968 General Offensive which had control over units in MR-1 and 2. b1 b3 (S)

93. Col. Tran Vinh Xu (aka Tran Minh Ho, Ba Dinh) consistently has been reported as a deputy chief of staff. [redacted] listed him, but [redacted] thought he had been replaced in June 1965 by Lt. Col. Ba Tran. According to [redacted] Xu left his post to become military commander of VC MR-4 in June 1965. Indications are Xu currently holds the position of MR-1 CO, and may still be a deputy chief of staff at COSVN. b1 b3 (S)

94. The man who [redacted] said replaced Xu was Lt. Col. Ba Tran, who formerly had been deputy chief of the MI Staff (B.2). The major source on B.2 at this time [redacted] corroborates that Ba Tran made this change, differing only in that [redacted] believed Tran had been chief, not deputy chief of B.2. [redacted] listed Ba Tran as deputy chief of staff and concurrently chief of B.2. [redacted] listed Ba Tran as a deputy chief of staff, and a Lt. Col. Tu Binh as deputy chief of the MI Staff. [redacted] lists Col. Tu Binh as deputy chief of staff, concurrently chief of the MI Staff, and a former deputy chief of the MI Department of the NVA General Staff. There are reports that Ba Tran and Tu Binh are the same person, but this evidence is not conclusive. The biographic record of Ba Tran (aka Tu Binh) suggests that he was born around 1927 in SVN. During the French resistance, he reportedly was a MI chief in a province in Eastern Nam Bo. He regrouped to NVN where he served in the NVA MI Staff, and then returned to SVN "sometime in early 1960." Presumably he served on the COSVN MI Staff, "either as chief or deputy until 1965 when he was made assistant chief of the Military Staff Department. He may have reached the rank of Brigadier General. One source has described him as big and robust; a man of few words, with a weakness for cigarettes. [redacted] b1 b3 (S)

95. Another deputy listed by [redacted] is Col. Hai (or Nguyen) Nghiem. [redacted] noted that Nghiem formerly had been a deputy in the Combat Operations Staff (B.1); [redacted] thought Nghiem's position was that of chief of B.1, rather than [redacted] b1 b3 (S)

deputy chief of staff. [redacted] described him as about 50 years of age, heavy set, wore glasses, and was very handsome-looking part French. He was very good-natured, extroverted, and well educated (speaking French, German, and English), and was fond of European music.

96. [redacted] added a final candidate for an assistant chief of staff not mentioned by the others, Sen Col. Hoang Cam (aka Nam Thach); who [redacted] believed was concurrently CO of the 5th Front (in SR-5). Cam reportedly was born in Hung Yen, NVN, around 1927. He also was reported at one time to have been the CO of the 9th VC Division.

97. According to [redacted] the Military Staff Department of COSVN was located, as of October 1967, within a twenty square kilometer area bounded by map coordinates XT 4883, XT 4888, XT 5283, and XT 5288; map sheet 6232 II. Chuoc's Battlefield Preparation Section was located (map coordinate XT 4968, map sheet 623 II) just north of the intersection of Ba Chiem and Dong streams.

98. Combat Operations Staff (B.1). This staff, according to [redacted] was supposed to keep the Hqs. posted on the friendly and enemy situation, draw up operation plans for subordinate units, provide operational support to these units, and deliver orders to units directly subordinate to COSVN and to the MR's and SR's. In addition, this staff was supposed to analyze and draw lessons from past battle experiences.

99. [redacted] listed Col. Nghiem as the chief of the Combat Operations Staff. [redacted] listed Lt. Col. Vu Ba as a deputy. [redacted] listed Lt. Col. Van as deputy, as well as five assistants: Lt. Col. Thanh and Sen. Capts. Tuoc, Kohn, Minh, and Xam. [redacted] allotted the chief's role to Lt. Col. Ho Tam, a regroupee and former member of the Training Staff of the NVA General Staff. His assistant chiefs were Lt. Col. Vu Ba, Maj. Mai Thanh, and Maj. Hai Bang. All were regroupees. Mai Thanh was in bad health; he had been a member of the Combat Operations Department of the NVA General Staff.

100. [redacted] maintains that there were ten subordinate sections of the Combat Operations Staff:

a) The General Combat Situation Staff (A.1), whose chief was Maj. Chin Do; age 40 years, heavy build, quiet, and well educated. He spoke French, Russian, and some German, and reportedly spent seven years studying in a

Command and Staff School in Russia. This section received information such as casualty reports (enemy and friendly) and victory reports from independent units and those of the MR's and SR's. The MI Staff also was used as an information input, primarily for verification. All of the information was checked and passed up to this staff by means of immediate, weekly, monthly, quarterly, semi-annual, and annual reports. This section also evaluated strengths and weaknesses of friendly units and forcast future enemy moves.

b) The Planning Section (A.2) under Lt. Col. Yu Ba, concurrently assistant chief of the staff. After receiving both the objectives from the Military Staff Department and the battlefield situation report from the General Combat Situation Section, this second section would plan the general timing, duration, and areas of operations for the main force units directly subordinate to COSVN. The Planning Section dealt in the higher level aspects of operations. This section also maintained some control over MR and SR units.

c) The Main Force Section (A.3) was led by Maj. Ho Xuan (aka Vum Xuan), of whom [redacted] described as 42 years of age and a regroupee from Thua Thien Province. This section advised the Military Staff Department on the personnel and materiel strengths, missions, and general activities of the divisions and independent regiments directly subordinate to COSVN. One group of cadres kept track of each Main Force Unit. b1 b2 (S)

d) The Local Battlefield Section (A.4) was under the direction of Maj. Bay Thanh, 40 years old, half-Chinese, and a regroupee. This section was similar to and complimented the Main Force Section in that it had the same mission, but covered area forces. This section informed the Military Staff Department on strengths and activities of Main Force, Local Force, and guerrilla forces in the MR's, SR's, and independent provinces in all of SVN.

e) The Campaign Section (A.5) was headed by Maj. Hai Bang, concurrently assistant chief of the staff. This section studied large American sweep operations to learn how to escape with the least damage to VC forces. The section proposed ways to neutralize sweep operations with counter-sweep operations or by avoiding contact. The primary emphasis had been on a study of the Junction City

Operation.

f) The Tactical Research Section (A.6) was under Maj. Ba Tran, 40 years old, with three years of college in Hanoi and a regroupee from Binh Duong Province. This section collected battlefield information about United States (U.S.) tactics and VC responses in an attempt to determine what responses were most effective. The results were disseminated to field units and training cadres. This section primarily studied U.S. tactics because it was felt the Army of the Republic of Vietnam (ARVN) used the same tactics.

g) The Combat Control Envoy Section (A.7) consisted of about ten cadres and 20 to 30 guard personnel. The chief was Sen. Capt. Tam Thun, a 40 year old regroupee from Ben Tre Province. The cadres of this section carried special messages from the Military Staff Department to battle units. Generally they were used when some form of explanation was required with the messages, such as the reason why some very important request was turned down. These cadres were to reinforce the order and lift the morale of recipients of orders and messages. This section, according to [redacted] was not used very often. b1 b3 (S)

h) The Battlefield Preparation Section (A.8) was headed by Maj. Tu Hiep, 42 year old regroupee originally from Ben Tre Province. In this section there were 13 cadres, 15 security guards, 3 draftsmen, 2 cooks, and one medic, totalling 34 persons. The cadres were: [redacted] current information on the operation and organization of the COSVN Military Staff Department); Sen. Capts. Xuan, Cau Cuong, Hai Phan, Tu Dung, Kien, Bay Dai, and Vu Coi; and Capt. Hai Phoc. This was a relatively long-range planning section. It sent out cadres to reconnoiter terrain and enemy installations in large areas. For example, [redacted] reconnoitered the U.S. installations in Long Binh-Bien Hoa area. This section covered VC MR-6, MR-10, parts of Binh Duong, and Bien Hoa Provinces, as well as Long Khanh, Ba Ria, and Tay Ninh Provinces. After the reconnaissance, the cadres recommended the type and size of unit and tactics that could best be utilized against the target. The Combat Operations Staff reviewed their recommendations, and prepared tentative plans for the Military Staff Department. If the Military Staff Department and Hqs. approved the plan, it was sent to the MF units in the area which then ran their own reconnaissance b1 b3 (S)

preparatory to executing the mission. This section drew up plans only for units directly subordinate to COSVN; the MR's and SR's planned their own targets.

i) A.9 was the Administrative Section. It had two main functions. First, it took care of the paperwork and typing for the Combat Operations Staff. Second, it supplied food and clothing to the other sections of the staff.

j) A.10 was the Map Section which maintained the combat situation map for the Combat Operations Section. It also made map overlays and enlargements, and printed maps in three scales; 1:25,000, 1:50,000, and 1:100,000.

101. Military Intelligence (B.2). B.2 is the equivalent of the U.S. G-2, but actually it is more than that. VC MI has its own penetration agent nets, armed reconnaissance units, base areas, comms-liaison, radio and crypto personnel, and analytical personnel. It is responsible for coordinating the activities of the "People's Military Intelligence Nets." In addition, when the situation warrants it, MI probably also processes intelligence gathered through Military Proselyting agent operations, as well as from the activities of Special Action Units. Finally, there are very firm indications that since the May-June offensive, the old B.2 MI office assumed a strategic counterpart designated B.22. (See [ ] b3 3 April 1969). While it is not clear as yet, B.22 appears to be a conglomerate of NVN Intelligence Service Cuc Nghien Cuu (CNC) espionage nets (at least in the Saigon theater of operations), the more strategic of B.2's espionage nets, and any support or miscellaneous personnel and facilities that seemed particularly suited to strategic, rather than tactical, collection activity.

102. The capture of documentation on B.22 and several of its agents since December 1968 has revealed considerable information about the operations of the new organization. But for an overall description of the operation of MI at the COSVN level, it is necessary to refer to the now dated information supplied by Sen. Capt [ ] In May 1964 [ ] b1 b3 (S)
was assigned to the [ ] where he remained [ ] a Reconnaissance/
Sapper training cell of the then newly-activated Special Action Force.

103. According to [redacted] B.2 had the responsibility of collecting and following up daily and hourly activities on the military situation, tactically and strategically. It was supposed to anticipate enemy combat plans and provide guidance to the Military Staff Department in the preparation of their plans. In consideration of B.2's important operation, the Department reserved all priority facilities for B.2, such as supply and engineering developments. The chief, Anh Tu (cover name), was assigned in April 1965 to replace Ba Tran who was reassigned as an assistant to the Department. Tu's assistant was Hai Nguyen.*

104. The MI component of the Military Staff Department has several operational elements:

a) A.1, the Enemy Situation Study Section. Its chief and assistant were Maj. Hung and Sen. Capt. Thanh respectively. The cadres were Sen. Capts. Thong, Tai, Dung, and Thao; Capts. Son (aka Son Vang), and Long (aka Hung); and Sen. Lt. Tho, as well as others unknown to [redacted] The section consisted of several cells responsible for the political situation, military situation, cultural-social-economic situation, "recapitulation," and translation. This section was supposed to study all information received on military, political, economic, and cultural activities, keeping COSVN abreast of the situation of the GVN and the latter's policies, along with suggested countermeasures. It was also responsible for studying and commenting on intelligence received from subordinate units, and disseminating this intelligence to subordinate units. The intelligence was supplied by the regional level MI; MI tactical, campaign, and technical (radio intercept) reconnaissance elements; and espionage agents.

b) A.2 was the Reconnaissance Section. The chief and assistant were Maj. Son and Sen. Capt. Mieng. The training cadres were Sen. Capt Hai (aka Hai Ham); Capts. Son and Dong (alias Thi), and Trong [redacted]; and Sen. Lt. Tu Kieng. The battlefield study cadres were Sen. Capt. Bich and Capts. Luan, Ngu, and Van; and Sen. Lt. Thanh. The "Major Reading Cadre" was Sen. Lt. An. The subordinate

*For a discussion of whether Ba Tran and Tu Binh are the same individual, refer to paragraph 94 above.

elements were the Training Teams, the Battlefield Study Team, and the Map Team. This section was responsible for controlling the reconnaissance activities of the C.252 Combat Reconnaissance Battalion and of Main Force Regiments, for studying prospective campaign battlefields. A.2 also prepared training materials and followed up on reconnaissance training activities.

c) A.3 was the Espionage Section. This section had no chief because it was directly under the control of the chief of B.2, An Tu. Capt. Tam was responsible for espionage activities in Saigon and other cities. Sen. Capt. Kien was responsible for suburban and contested areas. b1 b3 (S) [redacted] knew of two other cadres; Hoa (a northerner), and Vinh (from central VN). A.3 was supposed to administer and guide all espionage agents and their rear base areas, and also to process and revise the intelligence furnished by these agents. It was this section that most directly involved in the establishment of B.22.

d) The Crypto Section was A.4. The chief and deputy were Capts. Thuan and Phung. This section was a company-size unit, but instead of having the organization of a company, it consisted of 7 or 8 cells. Each cell was responsible for ciphering and deciphering messages passed between B.2 and other agencies, battlefields, or MR's.

e) A.5 is the Administration Section under Capt. Sau and his deputy, Lt. Thanh. It consisted of about 30 men divided into three squads. The Communication Squad (A.12) maintained liaison between B.2 and its various divisional, tactical, and strategic teams. The Correspondence Squad (A.9) was responsible for internal liaison. The Transportation and Troop Feeding Squad (A.10) appears to have been responsible for food production and messing. This section was responsible for routine personnel administration of B.2, procurement and issue of facilities and equipment, and maintenance of communication lines between B.2 and its subordinate sections.

f) A.6, the Political Section, was under Sen. Capt. Nam Son (aka Son Den); and Sen. Lts. Tran Le, Tac, and Huy. There were four sub-sections: Organization, Cadre, Propaganda and Training, and Security. A.6 was responsible for maintaining the records of all MI cadres, including those assigned to MR's. A.6 also was responsible for the place-

ment and reassignment of MI cadres, for their awards and promotions, and for their Party records.

g) The People's Intelligence Section's (A.7) chief was Sen. Capt. Huynh Long, and Lt. Tam was deputy chief. This section was charged with organizing and controlling people's nets in liberated, contested, and suburban areas. It also received information from those nets for study, evaluation, and processing and dissemination.

h) The A.8 Technical Section forged various types of documents for use by agents. It also compiled and analyzed captured documents for possible use. The chief was Sen. Lt. Truong. There were two platoon leaders, Hung and Hoang Anh. There were three sub-sections: documentation and photo reproduction; document and photo compilation; and document and photo forgery.

i) The Signal and Radio Communication Section (A.13) actually was a Signal Company, but it was not organized like a military unit. It had a strength of about 100 and included a Receiving Sub-section, a Transmitting Sub-section, and a Radio-and-Equipment Repairs Sub-section. A.13 transmitted messages between B.2 and the MI sections of the MR's and the campaign and tactical reconnaissance teams.

j) The Technical Reconnaissance Section (A.29) actually was a cryptanalysis battalion and organized like a combat unit of three companies. The chief was Sen. Capt. Duy Tien. The three companies were supposed to monitor all GVN or ARVN transmitting stations and decipher all coded messages. It was generally held that the personnel of A.29 received special treatment because their intelligence had proven to be highly valuable and accurate, particularly in their monitoring of ARVN communications. For example, this section monitored ARVN fire mission requests and troop maneuver (both withdrawal and attack) movement traffic. In April 1965 when [redacted] he heard that there were plans to set up another Technical Reconnaissance Battalion, code named A.28, equivalent to A.29. He also heard that Sen. Capt. Ba was appointed PO of this unit. More current information on the Technical Reconnaissance Section was provided by [redacted] b1 b3 (S)

[redacted]

[redacted] He maintained that the Technical Reconnaissance Section provided the bulk of MI information. According to [redacted], the section was composed of approximately 400 men who monitored all Allied radio nets on a 24-hour basis. As a radio message was intercepted, it was written down and immediately passed to a man known as a decoder. The decoders were guarded constantly by a three to four man group which always moved with the decoders. [redacted] maintains that the chief of this section, [redacted] that code books used by the decoders contained basic Allied code terms obtained from NVN, the USSR, and Communist CHina. [redacted] had heard that Col. Tam Si had been trained in France. The section also obtained code information through paid informers within the Allied community. Once the decoder received the message from the interceptor personnel, he decoded it, and sent it to the MI Staff commander who would then disseminate it on a need-to-know basis. b1 b3 (S)

k) Campaign Intelligence Teams, according to [redacted] also fell under B.2's purview. There were four teams with each being a battalion-sized unit. The teams and their chiefs and deputies were: (1) A.16 under Capt. Nguyen and Sen. Lt. Sau Thi; (2) A.20 under Sen. Capt. Sau Tri and Sen. Lt. Bay; (3) A.22 under Capt. Dang and Capt. Bay Hieu; (4) A.30 under Sen. Capt. Nam Tra and Sen. Lt. Nam Chinh, as well as Capt. Giau, the PO. Their general mission was to study the battlefield for prospective campaigns and follow developments as they occurred. However, they also ran agent nets, especially near ARVN and U.S. base camps and installations. [redacted] heard that once the team concerned had organized the net, it transferred its operational control to the Espionage Section (A.3), but still acted as a liaison and support unit. Actually, current information indicates these teams may have been the Forward Command Elements of A.3 (Espionage Section), especially since the Sau Tri who [redacted] commanded A.20 may be the Sau Tri who now is considered to be the deputy CO of B.22. b1 b3 (S)

According to [redacted] A.16 operated near the SVN-Cambodian border (Bacham and Tapang Robon - map coordinates XT 015 445). It was responsible for maintaining contact with various espionage units which were operating on Cambo- b1 b3 (S)

Bien territory and with various NVN CNC teams. Part of A.16's mission was receiving and transmitting agents and supplies. A.20 operated in the Loc Thuan (Doc Thuan) and Cu Chi areas (map coordinates XT 620125). A.22 operated in the Phu Hoa Dong, Ben Co, and Phu An areas (map coordinates XT 700335 and XT 740330). A.30 possibly was operating in the areas northeast of Vung Tau. [redacted] had heard A.30 had been a NVN CNC Strategic Intelligence team reporting to Hanoi until September or October 1964 when it was subordinated to B.2. A.30 had its rear base in the Vung Tau area and was the largest of the four campaign teams. A.30 reportedly possessed a company-size combat reconnaissance element, a radio element, a crypto element, and a cryptanalysis element. b1 b3 (S)

l) "Tactical Intelligence Teams," according to [redacted] included: (1) A.14 under Sen. Lt. Hoang Thao and Lt. Thinh; (2) A.15 under Sen. Lt. Hung (aka Tan); and (3) A.32 under Sen. Lt. Man. Each team had from 30 to 40 men and consisted of two elements, one for reconnaissance and the other for combat and security. Team leaders had the rank of company commander. They were to collect information on ARVN activities and submit daily reports to B.2. Tactical teams also were responsible for espionage nets, whether organized by the team or assigned by B.2 for watching specific ARVN units or positions. A.14 operated in Ba Den mountain area (Tay Ninh Province), A.15 near the Binh Duong Province capital, and A.32 in Bien Hoa. b1 b3 (S)

m) C.252 Combat Reconnaissance Battalion. This unit had been led by Maj. Sau Duyen until his death during the battle of Binh Gia. The deputy, concurrently XO, was Sen. Capt. Nam Thanh. [redacted] heard the names of two of the company commanders, Sen. Lt. Long and Sung. The battalion consisted of about 400 men armed with light weapons. There were three companies with rumors of a fourth in the making; among the company commanders were Sen. Lts. Long and Sung. C.252 was responsible for preparing the battlefield for COSVN (in compliance with plans issued by the Military Staff Department) by tracing the courses of action prescribed for long-range campaigns. They were to survey terrain conditions, defense obstacles, and coordinate with MR and Main Force Regimental MI and reconnaissance units. In case a terrain survey was extremely important, it would be conducted by the CO of C.252, such as the Binh Gia battle. C.252 usually operated in units of platoon and company strength. b1 b3 (S)

They were trained in stealthy infiltration, handling unusual weapons, close combat techniques, observational techniques, map drawing, and field survey techniques.

105. Describing the communications undertaken by B.2, [redacted] noted an upward and downward vertical channel and a horizontal channel. Upward was the NVA MI; downwards included the six MR's, four campaign and three tactical intelligence teams; espionage elements, MI sections of divisions and regiments subordinate to COSVN and the C.252 Combat Intelligence Battalion. B.2 maintained horizontal communications with the Combat Operations Staff (B.1), the Cryptographic Staff (B.6), and the NVN CNC Strategic Intelligence Teams, and the Security and Military Proselyting Sections of COSVN. B.2 received and transmitted intelligence through the Radio Signal Section (A.13) after it was deciphered/ciphered by the Crypto Section (A.4). All messages passed by the Radio Signal Staff (B.3) also had to go through B.6, the Cryptographic Staff. b1 b3 (S)

106. [redacted] reported that quarterly reports were submitted to the NVN General Staff, but he did not know how they were transmitted. Most messages concerned reports on organization and activities, request for support, or the transmittal of directives. Contact with subordinate elements was daily, but [redacted] did not know how contact was made. Contacts with the Combat Operations Staff (B.1) were made many times daily by various means, including telephone and messenger. These contacts covered information received from NVN, the battlefield situation throughout SVN, and information coming from the MR's and COSVN's Main Force units. During combat operations, every piece of information had to go through the Forward Command Post. In this instance, B.2 directed its subordinates to send their information to the Command Post which then would be responsible for relaying the information back to B.2. b1 b3 (S)

107. At the time of his interrogation [redacted] stated that it [redacted] normal for B.2 to be informed ten to fifteen days in advance of important ARVN operations. He was told that in some cases, the information was received as soon as the operation planning was completed. The NVA MI provided the most accurate information on ARVN strategy and deployment, large-scale operations, B-52 bombings, and GVN policies. AT 0500 hours each day, the NVA MI sent a message to B.1 and B.2 on the deployment of ARVN units, regimental size or larger. Espionage elements often provided accurate information on ARVN operations, as well as on major policies of the GVN. Cryptanalysis units collected very b1 b3 (S)

accurate information on planned artillery and aerial attacks by monitoring messages requesting such support as they were relayed from sector to division to corps and JGS. Cryptanalysis also proved effective in determining both advances and retreat of ARVN units during operations. They had more trouble with U.S. messages because the majority of cryptographers had a very poor command of English.

108. The Formation and Functions of B.22 (Strategic Intelligence Office). According to one of several captured documents in June 1968 a "section" (possibly all or part of A.3) was separated from B.2 and combined with C.2, (probably a cover for NVN CNC units) to become B.22 (aka Doi 22, H.22). The C.2 is probably an abbreviation for Cuc 2, a term which has been used by MI personnel to refer to the CNC and its operating elements. B.22 was dubbed the Strategic Intelligence Office (also referred to as Bureau Department and Staff). It was to serve not only the SVNLA, but the leadership of the "Central level" and the "Central Military Party Committee" (probably here referring to Hanoi), as well. Besides military intelligence, it was charged with covering the political, economic, and diplomatic fields as well.

109. Just exactly what this split did to the organization of the two parts is not clear (See [redacted] b3 [redacted] b3 [redacted] and [redacted]. Judging from the interrogations of the chiefs of three intelligence collection detachments, most of the reorganization consisted of doubling numbers. Apparently B.2 retained all its old sections, while B.22 duplicated five of them, doubling their code numbers in the process. The new sections appear to be A.33, A.55, A.77, A.88, and A.99. A.33 corresponds to B.2's A.3, or the Espionage Section. According to [redacted] b1 b3 b7 b3 (S) [redacted] this section included three former NVN CNC cadres; Son, Capt. Tu Kien, and Capts. Ba Tam and Ba Thu, plus one SVN MI cadre, Tran Thang. The former [redacted] stated that this section's code number was A.3 and it was called the Operations Section and was headed by Ba Tam and his deputy, Tu Kien. Actually, the section could be called either since its function was espionage operations. It probably was numbered A.33 since all other numbers were doubled; and since there are indications B.2 still has responsibility for some espionage detachments, certainly for those engaged in tactical intelligence collection.

110. [redacted] (of A.42) referred to A.55 as the Rear Services Section, while Ba Minh (of A.20) referred to it as the Administration and Rear Services Section. Actually, from [redacted] description of B.2's Administration Section (A.5), both rear services and administration functions would be appropriately combined.

111. Both [redacted] and [redacted] referred to A.77 as the Political Section. [redacted] thought its chief was Cao Van. According to [redacted] A.7 was the People's Intelligence Section and A.6 was the Political Section (under Sen. Capt. Nam Son). Both [redacted] and [redacted] also agreed that A.88 was the Technical Section. [redacted] said it was headed by Thu and Duc. A.88 would correspond nicely with [redacted] A.8 Technical Section in charge of document compilation, reproduction and forgery.

112. Both [redacted] and [redacted] referred to A.99 as the Signal Section. [redacted] listed its heads as Duc A and Duc B. [redacted] called A.9 the Correspondence Section and A.13 the Signal Section. He listed the chief of A.13 as Sen. Lt. Duc. A.99 might be related to either. The functional responsibility for A.9 was for internal liaison within B.2. Both [redacted] and [redacted] mentioned that B.2's Comms-liaison Section (A.12) continued to function under B.2, but that it closely supported B.22.

113. When it comes to listing the Intelligence Detachments (called "cum") of B.22, there is less agreement among the sources and the picture becomes more confusing. [redacted] thought the A.3 (probably should be A.33) Operations Section oversaw the operations of the detachments under B.22. The only detachments he knew of were [redacted] A.42 and two others; A.24 (chief, Nam Van), and A.30 (chief, Ha). [redacted] thought the Operations Section under B.2 was A.54, headed by Tu Sac and his PO, Bay Anh. The only element he knew of that was subordinate to A.54 was A.34.

114. Another source, [redacted] has been in charge [redacted] for A.54 before him [redacted]. He knew nothing of B.22, indicating only that COSVN had ordered the amalgamation of two former MR-1 MI units and another, numbered A.38, in July 1968. The former MR-1 units were renumbered A.34 and A.44. The new organization was called A.54. Another unit was added later, A.40. A.54 operated closely with SR-1 and the 9th Division, and may have corresponded to a Campaign Intelligence Unit. It did, however, have espionage nets [redacted] listed A.54's chief, deputy, and PO as Tu Sac, Ba Song, and Bay Anh respectively. The chiefs and

location of the others were: A.34, Tu Trung and Ut Thanh; A.38, Muoi So and Ly Van Ri; A.40, Muoi Rau; A.44, Chin Tan; and two cadres, Tu Lan and Rang.

115. According to the former chief of [redacted] prior to the B.22 reorganization, there were several NVN CNC units operating in SVN, including B.44 in Central SVN and B.48, B.49, B.50, and B.52 in the Saigon area. B.44 was led by Maj. Nam Den (aka Xuan); B.48 by Maj. Hung and Sen. Capt. Mai Thang; B.49 by Maj. Nguyen Thanh Tung (aka Huynh Kim Trong, Muoi Tung, Muoi Co, Phung Co); and B.52 by Maj. Phan. [redacted] was an [redacted] for B.49. He identified the following cadres: Maj. Nam Tam (PO); Maj. Trung Tieu (Chief of Research); Sen. Capt. Doanh (Chief of Training); and the following Sen. Capts. [redacted] Ba Can, Tam Nam (aka Nam Sach), Ba Lieu, and Ut Dong. b1 b3 (S)

116. In late 1968, those CNC units operating in the Saigon area were slated to be merged into the newly formed B.22. In August 1968, a conference of B.49 was held in the Ba Thu-Ta Noi area of Cambodia. [redacted] presided. [redacted] indicated the CNC espionage organization might possibly be merged with the COSVN MI Espionage Section. The process of merging B.48 with B.49 began in October 1968, and the four resulting agent nets (or cums) were to be numbered A.68, A.69, A.70, and A.71. The command section was designated A.72 under Maj. Muoi Tung, the former chief of B.49. The former head of B.48, Maj. Hung, was ordered back to B.22. By December 1968, the merger was completed with some assets and agents and one agent net chief of [redacted] b1 b3 (S)

B.48 merged with B.49. The [ ] were Ba Can (A.68), Nam Sach (A.69), Hai Thang (A.70), and Ut Dong (A.71). b1 b3 (S)

117. [ ] maintained that the chief of B.22 was the colonel who presided over the conference, Tu Hiep. The deputy was Col. Sau Tri, and the PO was Col. Tran Van My (aka Tam My). [ ] agreed with this lineup, except that he lowered everyone's rank one grade. In this, [ ] has been consistent and probably in error. [ ] also noted Sau Tri had been former chief of A.3, and that Tam My was former PO for B.2. [ ] only knew that Sau Tri was the deputy, but he added that the command staff of old B.2 was: Tu Binh (chief); Nam Nam (deputy); Son Map (deputy); and Chin Loc (political officer). b1 b3 (S)

118. It should be noted by way of conclusion that documentation on the creation of B.22 and the merger of B.48 and B.49 indicates that these reorganizations were implemented as part of a general trend toward upgrading strategic capabilities. The documents and interrogations reveal that the communications breakdown during the first two offensives led to the assignment of radio and crypto men and equipment to enable agents to maintain contact when regular liaison links become blocked. The documentation also reveals an increased concern with strategic reporting. According to the captured documents summarized in [ ] 11 April 1969, this concern with strategic reporting has reached the point where both Security and MI are re-evaluating their agents' strategic potential and are attempting to guard the better agents from premature exposure. Such exposure apparently occurred during the initial stages of the General Offensive. Now, with the cold reality of the situation sinking in and an eye cocked toward the Paris talks, the VC appear to be digging in their agents for the long haul. b3

119. The Signal Staff (B.3). The next subordinate element of the Military Staff Department is B.3, the Signal Staff. [ ] agree that the chief of B.3 is Col. Tran Nam. The deputy chief, according to [ ] is Maj. Oanh. According to [ ] the functions of the Signal Staff include drafting the annual plan for the establishment of signal units, telephone and radio communications, and couriers for Regional and Main Force units. It also is responsible for training cadres and organizing communications between COSVN and the Regional and Main Force units. This staff also is supposed to change communication codes every three months and organize an emergency communications system. Other functions are planning for radio requirements and checking the daily communication procedures of the different radio-telephone stations. b1 b3 (S)

120. According to CICV Report ST 69-01, 10 March 1969, B.3 has a reported strength of 565 personnel including two combat support element, recent documentation places the 44th subordinate to B.3. The battalion consists of three companies; one each for radio, telephone, and courier communications. Each company numbers about 85, for a total strength of 265. The remaining elements appear to be two signal companies of 75 men each, a signal liaison element of 25 persons, and an administrative element.

121. The Military Personnel (or Armed Force) Staff (B.4). According to [redacted] the chief of this staff is Col. Duc, and the administrative staff chief is Maj. Minh. [redacted] listed Duc as the chief, and a Maj. Hoat as the deputy chief. Again, according to [redacted], the functions of B.4 consisted of drawing up plans for writing Army regulations, inspecting lower echelons to insure compliance with regulations, keeping records of platoon leaders and their assistants in all of the units subordinate to COSVN Hqs, except cadres in the MR's. B.4 also was responsible for drawing up an annual manning plan based on COSVN requirements for the reception and assignment of recruits from NVN and the MR's. Depending on the situation, these strength requirements were changed quarterly. Additional duties, according to [redacted] were to inventory weapons caches, make arrangements with the Ordnance Branch to maintain weapons, and to provide weapons, ammunition, and signal equipment to the MR's and other units. b1 b3 (S)

122. The Engineer Staff (B.5). According to [redacted] the Engineer Staff is headed by Col. Ung Rang. [redacted] thought its chief was Maj. Bui Tue. [redacted] listed the chief as Maj. Nhan and the PO as Maj. Ky. According to [redacted] the functions of B.5 were to draw up plans for training activities for all engineer units under COSVN, to prepare specialized research for the Engineer Branch for all campaign activities, and to study combat engineer techniques. These techniques included employment of mines to support attacks, construction of air raid shelters, and methods of sabotaging bridges. b1 b3 (S)

123. Formerly considered combat support elements, according to CICV ST 69-01, the individual engineer companies subordinate to B.5 now fall under the definition of administrative service. The staff consists of a 55 man Headquarters Section, four engineer companies, and an engineer school. The strength of the remainder is estimated to be 70 for C.23, 60 for C.24, 55 for C.25, 65 for C.26, and 45 for H.18 the school. The total strength is set at 350 persons.

124. The Military Training Staff (B.6). [redacted] thought the chief of B.6 was Lt. Col. Tam, and the deputy was Maj. Cang. [redacted] believed its chief was Lt. Col. Bang. This staff is supposed to organize and guide discussions on past experiences, record those of tactical value, and disseminate these to lower echelons. B.6 also draws up the infantry training program for COSVN units and gives training guidance to the cadres of training schools at the platoon and company level of main force units. According to CICV ST 69-01, B.6 includes in its staff the 76th and 80.A Training Regiments with 850 personnel between them. b1 b3 (S)

125. The Political Staff (B.7). Little is known about the Political Staff. It is listed in the CICV Study ST 69-01. Lt. [redacted] however, called it B.9 and listed its chief as Lt. Col. Bay Phat, the deputy chief Sen. Capt. Thuan, and the chief of organization as Sr. Capt. Lan. b1 b3 (S)

126. The Cryptographic Staff (B.8). Both [redacted] and [redacted] agree its chief is a Maj. Hong or Hoang. [redacted] listed its functions as compiling codes, training and assigning crypto personnel to the MR's and other units directly subordinate to COSVN. B.8 also is charged with investigating and prescribing rules of security in communications procedures, decoding and recording all messages received and sent by COSVN, and uniformly organizing all crypto units employed in combined military operations. b1 b3 (S)

127. The Adjutant Staff (B.9). CICV Study ST 69-01 lists B.9 as the Adjutant Staff. Neither [redacted] mentioned an Adjutant Staff, although [redacted] dated 18 June 1966 did, stating in addition that its chief was Tu Do. [redacted] thought B.9 was the Political Staff. b1 b3 (S)

128. The Message Center (B.10). CICV Study ST 69-01 lists B.10 as the Message Center. [redacted] mentioned an Administration and Message Center as B.7. [redacted] listed its chief as Capt. Tam Phuong and the following minor members: Thi Phuong (typist) Thi Lan and Thi Ry (supply), Hung and Tho (security). [redacted] listed an unnumbered Administrative Branch that logically would have followed as B.10. Its chief was listed as Capt. Khon. Sen. Lt. Phuong was listed as in charge of administration. Sen. Sgt. Tuan for supply. b3 (S)

129. The Chemical Staff (B.12). Although listed in the CICV study, neither [redacted] or [redacted] mentioned a Chemical Staff. [redacted] did, however, stating its deputy chief was Maj. Dung b1 b3 (S)

and five years of college, had studied chemistry in Bulgaria and was formerly a member of the NVA Chemical Staff of the General Staff.

130. The Military Postal Service (B.14) (B.14 is the new Military Postal Service (aka Office of Postal Service and Communications) which is responsible for the maintenance of courier service and other communications. This responsibility originally belonged to the Postal Transportation and Communications Section of COSVN's CAC, but on 25 August 1966, COSVN issued a directive transferring the section to military control and changing the name to Military Postal Service. However, the directive never has been fully carried out throughout SVN, and many echelons still retain the system as a civil function.

131. The courier system not only handles written communications and mail, but also moves cadres and furnishes guides for visitors to the COSVN area. Although it operates directly only in the COSVN area, it also supervises the system throughout SVN. No limitation is placed on the number of private letters that can be sent through the system and no stamps are required. The Party District Committee where the addressee is located is responsible for final delivery of letters to the addressee. All letters are censored by the Correspondence Sub-section of COSVN's Organization Section.

132. The primary mission of the COSVN Postal Service is to control the infiltration of personnel and goods to intermediate stations within its own area of responsibility. At the intermediate stations, the infiltrators and goods are turned over to MR or province comms-liaison systems. This transfer may take place at an infiltration staging area, such as the one located at Ba Thu in the Parrot's Beak of Cambodia which is used extensively for the infiltration of people and goods into MR-2 and MR-3.

133. According to CICV Newsletter No. 4, 5 June 1965, the COSVN office is divided into three subordinate elements; a Military Staff Department, a Political Section, and an Administrative Committee. The Military Staff Department appears to be in charge of the movement of men and materiel. It also is responsible for the Binh Long Corridor Section which maintains infiltration routes leading from Cambodia to VC Binh Long Province in MR-10. The Political Section reportedly has the responsibility of supervising Party activities. The Administrative Committee acts as both a clerical and personnel office. There is no information available on the current leadership. Back

In 1968, under the old Commo-liaison Section, the chief was reported to be Ba Cao, and his deputy, Ngo Van Chuyen (aka Muoi Chuyen).

134. Others, [redacted] all list a Militia Staff, [redacted] cites it as B.10. The CICV Study ST 69-01 and [redacted] omit it. [redacted] listed the chief as Maj. Nguyen and the deputy in charge of operations as Sr. Capt. Chuoc. [redacted] thought the chief was Col. Hien. [redacted] listed the chief as Col. Tu Hien, and its mission as one of drawing up developmental plans for guerrilla forces and making quarterly inspections of these forces. On the one hand, this staff was to gather experiences and disseminate reports on guerrilla activities. On the other hand, the staff was to coordinate with mass organizations such as the Youth's, Farmer's, and Women's Associations to seek support for the guerrillas.

135. Both [redacted] listed an Artillery Staff under the Military Staff Department. [redacted] (a former [redacted] of the 58th Independent Recon Platoon of the Artillery Hqs. and/or U69) maintained there was a separate artillery command directly subordinate to the SVNLA Hqs. which [redacted] called U69. [redacted] on the other hand, noted that in NVN the Artillery Branch was large and rated a command separate from the General Staff, but that in SVN it was still subordinate to the Military Staff Department. [redacted] stated that this staff's mission was to plan the establishment of artillery forces in SVN, supervise those units directly subordinate to COSVN, prepare tactical guides, and provide equipment and other facilities for the COSVN Artillery Branch.

136. [redacted] allegation that the Artillery Hqs. is separate from the Military Staff Department is bound up in his description of that Hqs.' CO, Sr. Col. Nguyen Minh Khanh (aka Hoang Minh Khanh, Tran Soan Dau, and Tu or 4th Khanh). According to [redacted] Tu Khahn [redacted] listed Tu Khanh as the head of the Artillery Staff) had been DCO of the SVN Artillery Command during the Resistance. He regrouped toNVN and became DPO of the NVA Artillery Command Hqs. In 1963 he returned to SVN to establish another SVN Artillery Command called U69. In 1965, Col. Ba Bich, CO of the NVA Artillery Hqs., came south as Khanh's deputy in charge of the actual military operations, leaving political affairs to Khanh. When the NVA Artillery Hqs. was divided to form a new Missile Command in November 1968, Bich was recalled to take over the new Missile Command. Khanh then resumed command of U69 until 1967, when

newly-infiltrated Sen. Col. Ba Vu [ ] listed two [illegible] Lt. Cols. Phuc and Bui Khac Vu) took over and Khanh again resumed his duties as PO. [ ] stated that Tu Khanh had suffered from trachoma since Resistance days. His condition is serious and he suffers occasional near-blindness. He is thoroughly disliked and a known lecher with the nickname Vua Gu "King Flirt" and Vua Ai Tinh "King of Love." According to [ ] he is considered unknowledgeable in artillery, bull-headed, a perfectionist when it comes to his own comfort, and not especially dedicated to duty. b1 b3 (S)

137. [ ] and [ ] also listed a Sapper Staff, but gave no 'B' number. The existence of this organization as a part of the Military Staff is not confirmed. With the increased emphasis on sappers, it may exist as a separate command, like the artillery command. [ ] believed the Sapper Section was under Sen. Capt. Mai. [ ] thought its commander was Lt. Col. Tu Cang, and that its functions were to draft plans establishing and organizing sapper units, provide training programs and aides, conduct research on sapper objectives, and evaluate past experiences. b1 b3 (S)

B. The Political Staff Department

138. Despite, or perhaps because of, the relative importance of this department, little is known about its operations. [ ] provided some information on this department's overall mission. It is responsible for developing Party membership within the military, monitoring troop morale, and suggesting methods for eliminating morale problems. It is charged also with preparing and guiding programs for political indoctrination and disseminating current events information by radio and paper. Further, the Political Department drafts COSVN resolutions and sends them to MR Party Committees and independent unit Party Committees. This department also gives guidance on maintenance of security for the MR's and independent units, and it maintains records on cadres from battalion level on up, especially the regimental level. b1 b3 (S)

139. There is little agreement on who heads this department. [ ] and [ ] list Maj. Gen. Tran Do. Lending credence to these assertions is the well-confirmed fact that Do is a deputy PO of the SVNLA, and at lower levels, the chief of the Political Staff; consistently also is a deputy PO [ ] lists Sen. Col. Le Chau (aka Le Chau) which agrees with [ ] b1 b3 (S) b3

[redacted] lists Ba Thang (who he says may have been replaced by Sau Khan); [redacted] lists Ba Thang as a deputy chief. Both [redacted] and [redacted] list Col. Tam Tran as a deputy. Both the [redacted] and [redacted] list Sen. Col. Hai Tuong (aka Hai Chau) as a deputy. [redacted] lists a Sen. Col. Nam Tan (aka Nam Thanh) as a deputy. [redacted] listed still two more deputies: Col. Ba Luu and Tran Quoc Hung (aka Nam Thai). Finally, to further confuse the issue, [redacted] a VC rallier from [redacted] lists Ba Hung as chief and Bay Phuong as deputy chief. b1 b3 (S)

140. Although there is not much agreement on who heads the subordinate staffs of the department, there is general agreement on the existence of the first six of its component staffs:

a) The Propaganda and Training Staff (B.1). [redacted] alleges that the functions of this staff include monitoring troop morale and preparing papers on problem areas, compiling training and indoctrination documents, and disseminating information through newspapers and radio. This staff also is responsible for guiding psywar, entertainment, and movie groups. [redacted] believed its chief was one of the deputy departments heads, Sen. Col. Hai Tuong. [redacted] listed Lt. Col. Le Dinh Le (chief) and Lt. Col. Nguyen Huu Minh (deputy). [redacted] listed Lt. Col. Sau Khiet (chief) and Capt. Ba Huong (deputy). [redacted] gave the following breakdown: chief, Lt. Col. Chuc (or Truc); deputy, Maj. Minh; press, Sen. Capt. Thuong; information, Capt. Nguyen Van Hich; documents, Capt. Tau; recreation, Capt. Ta; and photography, Sen. Lt. Hy. b1 b3 (S)

b) The Enemy Proselyting Staff (B.2). Neither [redacted] nor [redacted] mentioned it, but the existence of a Military Proselyting Staff is fairly firm. [redacted] listed its chief as Sen. Capt. Binh. Not much is known about its operation at the COSVN level, although several of its directives on treatment of prisoners of war are available. It appears to be the military version of the Military Proselyting Section. As such, its responsibilities probably are chiefly directed at indoctrination of VC troops in an attempt to convince them of the advantages of capturing prisoners and treating them well, and at organizing military interrogation and detention facilities. It also would be responsible for activities aimed at encouraging the enemy to desert or surrender, usually a matter of using bull horns, leaflets, and the like. b1 b3 (S)

c) The Organization Staff (B.3). According to [redacted] this staff had to keep track of the overall number of Party members in the military. This staff also prepared plans in the development of the Party and prepared training programs and documents. It also is responsible for monitoring the morale of Party members in the military. [redacted] said that the staff supervised the H.25 Agency, a Transient Facility for military officers awaiting re-assignment. [redacted] believed the chief was Col. Lan. [redacted] said the chief was Lt. Col. Ba Lan (aka Ba Luu). While this would indicate they agreed, [redacted] listed a Col. Ba Lau as head of the Cadre Staff. [redacted] listed Maj. Ba Lam as chief of the Organization Staff; Ba Lam may be identical with Ba Lan, although the ranks involved are not consistent since [redacted] rallied long before [redacted] b1 b3 (S)

d) The Cadre Staff (B.4 or B.7). [redacted] thought the chief of the Cadre Staff was Lt. Col. My, and [redacted] thought it was Col. Ba Trang. [redacted] listed Bay Thuong as chief and Nam Duc as deputy; a 1968 captured document confirmed that Bay Thuong was connected with the Political Staff Department. [redacted] described the functions of this staff. It was supposed to keep abreast of the development of cadres from platoon up to COSVN, prepare plans for the assignment of cadres from regiment upward, and maintain records on military cadres from battalion upward. In addition, this staff received and reassigned NVA cadres. It also was responsible for training schools for cadres company level and up, and for formulating policy on promotions and discipline of cadres, and aiding their families. b1 b3 (S)

The Security Staff (either B.4 or B.5). [redacted] and [redacted] all agree that the chief of this staff is Col. or Lt. Col. Thai (aka Ba Thai, Nam Tai, Tran Quoc Hung, Quoc Hung), a former assistant chief of the Security Department in NVN. [redacted] listed the deputy as Lt. Col. Nguyen Van Sen, and [redacted] as Sen, Capt Mai Thang. This staff, according to [redacted] was responsible for formulating plans for the organization of security systems in troop units throughout COSVN, and for the maintenance of the SVNLA Hqs. security system. This staff also keeps records of and investigates personnel suspected of being enemy agents, and drafts plans for security preservation during military operations. b1 b3 (S)

f) The Administrative Staff. Little is known about the Administrative Staff. [redacted] listed a Maj. Tu Van as its chief. [redacted] listed Sen. Capt. Khoe as its chief with the following subordinates; Sang (Security), Hoang (Food Supply), Hieu (Liaison), Lt. Hoi (Supply), Chien (Medical), Lap (Printing), and Tuy (Secretariat). b1 (S) b3 b3

141. In addition to the six staffs above, the [redacted] also listed an Intermediate Political School Staff under Sen. Capt. Viet Hung. [redacted] listed an Entertainment Staff under Capt. Xuan Hong and his PO, Sen. Capt. Bay Hien; and [redacted] listed a Militia Political-Mission Staff under Lt. Col. Do Khanh Van which specialized in ministering to guerrilla forces. b3 b1 (S) b3

142. The existence as separate entities of the three staffs above cannot be considered especially firm, although they may well exist as subsidiaries of other staffs. [redacted] for instance, also mentioned an Intermediate School of Political and Military Affairs (cover number 86/R) which might be the one referred to in paragraph 141 above. But [redacted] listed it under Schools, rather than the Political Staff Department. He had heard that the school was built in late 1961 and specialized in advanced training in political and military affairs for cadres of company level and up. [redacted] in [redacted]. He stated the students came from various locales, and that the school gave two five-to-six month courses yearly. Its organization consisted of a seven man Party Committee and a three man Board of Directors. There were three agencies subordinate to the Board: Military Training (11 persons), Political (12 persons), and Rear Services (25 persons). The director was Lt. Col. Phi Hung; the PO was Lt. Col. Thanh, and his assistant was Sen. Capt. Minh. Three tactical instructors were Sen. Lts. Bien, Ha, and Minh. The political trainers formed one company and the military trainees formed two. These companies ranged from about 80 to 90 persons each. [redacted] knew of four other schools: Signal Training, Engineer Training, Reconnaissance Training, and the Nguyen ai Quoc Political Reasoning School (referred to under the Propaganda Section of the COSVN CAC). (S)

C. The Rear Services Staff Department

143. The Rear Services Staff Department is the equivalent of the American G-4 Staff. It is responsible for providing logistical support to the armed forces. According to [redacted] b1 b3 (S)

this staff ultimately is responsible for insuring the adequacy of materiel support based on the requirements of the Military Staff Department. Among its functions are supervising ordnance repair and production facilities, supplying and controlling expenditures of Main Force units of COSVN, and training cadres for the Quartermaster Branch. This staff also transports, distributes, and maintains all types of ordnance and military equipment infiltrated from NVN, and it manages a system of caches in COSVN's operational areas. Finally, it is this staff which manages hospitals and provides care for soldiers of COSVN's Main Force units.

144. As was noted in CICV Study ST 69-01, the Rear Services consists of the Headquarters Staff and subordinate Rear Services Groups. These groups are responsible for providing all logistical support to the Main Force, combat support, and administrative service units throughout the area directly controlled by the SVNLA. The composite strength of the overall staff element, not including the groups, is about 1,000. According to the CICV Study, there has been much documentation indicating an increase in the strength of the groups during the past year. There is a great deal of overlapping control between elements of the groups and the Rear Services Staffs of the SR's; many of the operations of the groups cut across SR boundaries.

145. Most sources appear to be referring to the same individual as chief of Rear Services. [redacted] listed Sen. Col. Tu Hoa; [redacted] listed Sen. Col. Nam Hoa; and [redacted] listed Sen. Col. Nam Thi. [redacted] listed Col. Ba Ngoan as PO and Lt. Col. Nhan as DPO. [redacted] listed two DCO's: Cols. Sau Ngap and Phung. [redacted] listed Nam Quoc Dang (aka Nam Thuoc) as a DCO; [redacted] also listed Hai Vo as another DCO. b1 b3 (S)

146. According to CICV ST 69-01, there are nine sub-divisions of the staff element, and a school, security guard, and an induction station. The nine sub-divisions are:

a) The Plans Staff (B.1). [redacted] believed B.1 was headed by Col. Sau Ngap. [redacted] described its functions as one of advising other staffs on making out their plans in coordination with the general plan of the department. b1 b3 (S)

b) B.2 is The Political Staff (B.2) which presumably handled Party affairs for the staff.

c) The Quartermaster Staff was B.[redacted] thought its chief was Sen. Col. Hai Chanh. [redacted] maintains this b1 b3 (S)

staff dealt only with units directly subordinate to COSVN. It was supposed to draft plans for, and organize the collection and purchase of, foodstuffs for these units. It also organized the transportation system, the network of caches and warehouses, and the deployment of the quartermaster network for operational purposes.

d) B.4 is the Ordnance Staff which, according to [redacted] was responsible for drawing up plans for the transportation and distribution of weapons and ammunition to the units of COSVN and the MR's. This staff supervised the workshops that produced weapons in accordance with the Military Staff Department requirements, and arranged for the issuing of the weapons to all subordinate units of COSVN. The staff provided technical guidance on the invention of new weapons and notified the MR's about the invention of new weapons. The staff also advised the MR's on transportation, maintenance, and replacement of weapons, and constructed caches and transported equipment during military operations. b1 b3 (S)

e) The Medical Staff was B.5. [redacted] believed the chief of this staff was Dr. Hue, a Major. This staff was responsible for training medical cadres, planning the organization of the military medical staff and setting up medical stations during military campaigns. This staff also prepared medicines and instructed the MR's on how to do the same. Finally, this staff was responsible for treating the wounded and sick soldiers of COSVN's military units. b1 b3 (S)

f) B.6 was the Financial Affairs Staff. [redacted] thought this staff was directed by Maj. Ba Nonn and his assistant, Sen. Capt. Ban. [redacted] maintained this staff provided funds only to units directly subordinate to COSVN. It received these funds from the COSVN Finance and Economy Section. It was supposed to account for or settle all its expenditures with the COSVN Section. b1 b3 (S)

g) Supply, Transportation, and Secretary Staffs. The Supply Staff (B.8), according to [redacted] receives the purchase applications of the departments of COSVN, and organizes these purchases in accordance with the requirements of COSVN. It supplies COSVN units with such items as office supplies, medical instruments, and signal equip- b1 b3 (S)

ment. [redacted] also alleges that it is this staff that deals with transporting goods from legal areas to the Secret zones. This would more likely be the function of B.9, the Transportation Staff. b1 b3 (S)

147. Rear Services Groups. The Rear Services Staff Department, according to CICV ST 69-01, consists of seven Rear Services Groups (RSG) plus one special Transportation Group. The RSG's are numbered 81, 82, 83, 84, 85, 86, and 100, and the Transportation Group is number 70. Very little is known about Transportation Group 70. There is one report that Cao Phong is the group's CO. The CICV Study noted that the documented strength of RSG 81 was 2,226, but that only about 70 percent of these were available for duty during the fall of 1968. This group operates in the War Zone D and SR-6 areas. According to [redacted] Muoi Thiem is CO of RSG 81; however, a captured VC document dated April 1969 listed Nguyen My as head of the Party Committee and Command Committee of RSG 81. b1 b3 (S)

148. The total strength of RSG 82 is reported to be 1,816. This group operates in War Zone C and in Tay Ninh Province. [redacted] stated that Muoi Bi was CO of RSG 82; however, two POW's and a captured document list Muoi Bi as CO of RSG 83. [redacted] in RSG 82 who [redacted] in September 1967, held that the CO and PO of RSG 82 was Maj. Nguyen Huu Tan; that the DCO was Ba Van; and that the two DPO were Chi Trung and Ly. [redacted] b1 b3 (S)

149. The estimated strength of RSG 83 is 885. Muoi Bi has been identified as the CO of this group by two POW's from RSG 83 and from a captured document. One of the POW's listed a Ba Son as DCO in 1966, while both of the POW's and a 1 August 1966 document listed Doan Sau as the group's PO. Conflicting reports exist concerning the CO of RSG 84; an April 1966 captured VC document listed Le Minh Thinh in this position, while a December 1966 document had Nguyen Van Hue as CO. RSG 85 was activated in February 1965 and its current estimated strength is 400. It operates primarily within Binh Long Province and northern SR-1 and SR-5. RSG 85 is basically a trucking unit. At one time, it was thought that RSG 85's transportation mission had been assumed by Transportation 70, but it now appears that they operate in adjacent areas, with Group 70 operating along the Cambodian border. According to one field study, as of the beginning of 1968, the CO, XO, and PO of RSG 85 were Vo Van Chanh, Luu Van Luong, and Nguyen Kim respectively.

150. The mission of RSG 86 is one of logistical support

two COSVN combat elements operating in Phuoc Long and Binh Long Provinces, including elements of the 7th and possibly the 1st NVA Infantry Divisions. This unit has an estimated strength of 2,450. A possible additional transportation group operating in the same area as RSG 85 was formed from the D.4 Transportation Battalion, formerly attached to RSG 86. The unit growing out of the amalgamation of D.4 with other smaller units is Transportation Group 70. Its area of operation extends from the Cambodia/Binh Long-Phuoc Long border south at least as far as Route 13. The personnel strength has been documented at 302. According to one report, RSG 86 is commanded by Tran Van Trung, however, a [redacted] earlier from [redacted] stated that a Lt. Col. Dang headed the group. b1 b3 b5

151. Although RSG 100 is subordinate to COSVN, this administrative service organization of 600 personnel was formed from a nucleus of elements of the Rear Services Staff of SR-2. Its primary operating area is SR-2, which serves from base areas in Cambodia and Tay Ninh. Its major depots and transportation lines are also located in SR-2. This SR provides the easiest access into the capital from base areas in Cambodia and therein lies its importance as a key communications link. One of the most extensive logistical bases in the III Corps Tactical Zone area is Ba Thu village which is located in Cambodia just across the border from SR-2.

152. The brief but checkered existence of the Forward Supply Council took another turn in the latter half of 1963, when it was officially reactivated from COSVN down to the village level. This reestablishment necessitated a transfer of personnel to it from the Finance Economy Section and the Rear Services Section. The latter probably provided military personnel with experience in two specific areas of activity of the Forward Supply Council: manpower (civilian labor and Assault Youth) and food provisions. Some of the personnel transferred at this time may have originally been members of the Forward Supply Council, for one document mentions that certain members of COSVN Rear Services Group 81 were to resume their former functions. The top echelon of the Forward Supply Council at the COSVN level is the permanent section consisting of a chief, who is a member of the Party Current Affairs Committee, and two deputies, one of whom is a high-level Rear Services official. Possibly one or both of the members in charge of manpower and provisions may also have a concurrent Rear Services function. Coordination between the Forward Supply Council and the Rear Services probably takes place through members of the permanent section who were

formerly, or still are, attached to the Rear Services organization. This coordination is vitally needed for the Forward Supply Council to fulfill its primary role of supporting the battlefield operations with supplies and the civilian laborers to move them.

VIII. THE "FRONT"

153. In the preceding section, the subject was COSVN's Party Committee with its functional sections. Each echelon below COSVN has a similar, if less elaborate, Party organization. No matter what the level, the decision-making power rests with the Party organization. But, wherever the Party meets directly with the uncommitted masses, it prefers to operate through Front groups whose connections with the Party are either wholly camouflaged or made to look less dictatorial than they really are. VC infiltration of an otherwise nationalist Buddhist Student Group would be an example of total camouflage. The NFLSV, the first among the Front groups, would be an example where only the extent of Party control is disguised.

154. There are at least four reasons why the Party prefers to operate through the NFLSV. First, for international appearances the NFLSV is used to mask NVN and Communist direction of the insurgency. This tactic is used to gain sympathy from foreigners for an alleged internal movement for liberation from an oppressive "puppet" government. The NFLSV handles foreign affairs. Not being openly connected with the Party, its international appeal is more widespread. Thus, while part of the Front's task is traditional diplomatic representation (especially in other Communist states), it has the additional task of drumming up international support such as liaison with international trade unions or U.S. student protest movements.

155. Second, the Front also is used to mask Party control of the insurgency at home. Everything is conducted in the name of the Front, rather than the Party. Tax receipts, execution judgments, and other documents meant for public consumption are invariably signed and sealed in the name of the Front. This charade even includes the actions of the SVNLA. As mentioned above, the SVNLA is called the People's Liberation Armed Forces (PLAF) when acting publicly. Thus, Liberation Radio broadcasts PLAF announcements in its own name, as well as those of the alleged PLAF sub-divisions. These latter generally may or may not correspond to an actual VC military command. For instance, when the VC released three U.S. prisoners in December 1968, in

widely publicized rendezvous with U.S. military representatives in Tay Ninh Province, the prisoners were released in the name of the "People's Liberation Armed Forces Command, Eastern Nam Bo."

156. Third, the Front represents an attempt to mask the real leadership of NVN and the PRP. Although the facade has long since worn away, the Communists continue to utilize the Front. What is done publicly is done by a Front leader. This also allows the Party to utilize "notables," a term often used by the VC to denote individuals of public renown. For example, while the Communist Party is avowedly athiestic, it is still able to enlist the services of such Buddhist and Catholic representatives as Thich Thien Hao and Joseph Mario Ho Hue De respectively. There also are Hoa Hao and Cao Dai members among the NFLSV leadership.

157. The use of notables naturally leads to a fourth reason for the Front; its capacity for allowing the VC to appeal to a broader mass of people than would be the case if they relied on Party members and well-known sympathizers alone. Recruitment of non-Party members is principally accomplished through such mass organizations as the Farmer's, Women's, and Youth's Liberation Associations. While it is the Party's proselytizers that direct the establishment of the mass organizations and supervise or directly engage in recruiting, this is done in the name of the Front. Thus, while the Liberation Youth Association is a Front group, its direction comes from the Youth Section of the local Party Committee's Civilian proselyting apparatus. It might be worth noting that at these lower echelons, the Party will also use non-members to staff its functional sections. In fact, this is one of the more common ways the Party gains new members.

158. According to a former senior Party military cadre who had spent from [redacted] at COSVN, the top NFLSV personalities were satisfied with their roles. He also claimed that

63

In theory, the PRP is only one component of the NFLSV. As such, it is overt and since 1966, Tran Nam Trung (aka Tran Luong) has served as the overt PRP representative to the Front. (Vo Chi Cong held this "distinction" until 1966.) Denigrating the PRP's effort to disguise its control, Tran Nam Trung also is the overt chairman of the NFLSV's Military Affairs Committee.

the special treatment given to the Front leaders did not unduly antagonize realistic Party cadres. The outstanding characteristic of these Front personalities is that they are representative of large segments of the population and, therefore, valuable to the Party. This representative factor outweighs all others, including executive ability which can be supplied by more anonymous Party cadres serving in the NFLSV mass organizations. In the same vein, this source felt acceptance of a man like Nguyen Huu Tho into the Party would be foolish. The news could not help but leak out and erode Tho's Front image. [redacted] however, claims that Tho in fact is a PRP member, and [redacted] stated that Tho was a member of the COSVN Civilian Proselyting Section--a position which roughly would coincide with most valuable on-the-ground aspect of the Front.

b1
b3
(S)

159. To handle the affairs of the Front, the Party attempts to create a Front Committee to correspond to the Party Committee at every echelon from COSVN down to the village. Thus, there is an NFLSV Central Committee that corresponds to the COSVN Central Committee, and a Presidium that corresponds to the COSVN CAC. This Presidium appears to have an additional off-shoot called the Secretariat which may be the Party's principal organ of control.* The sub-divisions of the Central NFLSV Committee that have been identified are: the Military Affairs Committee, the Information, Culture and Education Committee, the External Relations Committee, the Economic Affairs Committee, the Commission for Public Health, and the Korean Relations Committee. The NFLSV's regional sub-divisions, corresponding very roughly to the VC MR's, are the Central Committee of Saigon-Cholon-Gia Dinh, Eastern Nam Bo, Western Nam Bo, Central Trung Bo, and Tri-Thien-Hue. The province, district, and village committees follow in line. The principal leaders and NFLSV-associated organizations are listed at Attachment B.

160. The Party's control over the NFLSV apparently has become so transparently obvious that even the PRP felt it necessary by the time of the 1968 Tet Offensive to create another

*It is likely that Tran Nam Trung (aka Tran Luong), the official PRP representative to the NFLSV and a PRP Central Committee member, and Pham Xuan Thai, a PRP Deputy Secretary and member of the Front Presidium, perform the function of insuring that Party control is maintained.

nationwide Front group in conjunction with their initial Tet 1968 Offensive. Called the Vietnam Alliance of National, Democratic, and Peace Forces, this group was created not only to broaden the base of popular support, especially in urban areas, beyond that of the NFLSV, but also apparently to provide a negotiating element possibly more acceptable to the U.S. and the GVN. The Alliance relies almost totally on the Liberation Radio for its official pronouncements. Moreover, the Alliance and NFLSV issue joint communiques. Finally, Trinh Dinh Thao, Chairman of the Alliance, was once a law partner of NFLSV Chairman, Nguyen Huu Tho. The movement to form alliances in various urban areas has been very weak to date. There are chapters in Saigon, Hue and Danang.

161. At the lower levels, the Communists have created People's Revolutionary Councils and People's Liberation Committees. This effort constitutes an attempt on the part of the VC to establish their long-promised legitimate government. As such, the councils more or less are powerless. The committees, however, do exercise some control. Thus, it is not surprising that the various sub-divisions of the Committee, such as Security, or Finance and Economy, still generally are directed by individuals who already head these sections within the Party Committee structure.

IX. COSVN'S RELATIONS WITH ITS SUBORDINATE ECHELONS

162. Historically, Vietnam has been divided into three parts: North, Central, and South. The Viet Minh began their operations with fourteen regions that they reduced to six inter-zones in March 1945. Inter-zones 1, 2, and 3 formed North Vietnam (Bac Bo); 4 and 5, Central Vietnam (Trung Bo); and 6 was South Vietnam (Nam Bo). The division between NVN and SVN provided by the Geneva Accords of 1954 ran roughly along the 17th parallel which split off the two southernmost provinces (Quang Tri and Thua Thien) of NVN's inter-zone 4, leaving them in SVN. Also remaining in SVN were inter-zones 5 and 6; i.e., the southern half of Trung Bo and all of Nam Bo. When the NFLSV was proclaimed on 20 December 1960, six sub-divisions of Nam Bo and Trung Bo were established: South Trung Bo, Western Highlands Autonomous Region, Eastern Nam Bo, Central Nam Bo, Western Nam Bo, and the Saigon-Cholon-Gia Dinh Special Zone. Quang Tri and Thua Thien Provinces were placed under the jurisdiction of Southern Trung Bo.

163. Officially in 1961, COSVN was formed from an amalgamation of the Nam Bo and Trung Bo Committees. Initially, a lack of staffing at the regional level left the inter-zone the primary level of planning and coordination. COSVN probably did exercise nominal control over the Trung Bo area, but with the inter-zone 5 committee still remaining largely independent. As for the Western Highlands Autonomous Region, the VC Vontguard policies were largely unsuccessful, and it appears probable that the entire region initially remained subordinate to inter-zone 5 and now is subsumed in the B-3 Front area.

164. With the passage of time, the effectiveness of the regional level increased. This was due in large measure to the difficulties in coordination caused by extremely poor transportation and communications. In May 1963, the inter-zone echelon was completely eliminated. Inter-zone 5 was divided into two regions, MR-6 in the south and MR-5 in the north. The sub-divisions of the Nam Bo inter-zone remained unchanged, but were assigned numbers as follows: MR-1, Eastern Nam Bo; MR-2, Central Nam Bo; MR-3, Western Nam Bo; and MR-4, Saigon-Cholon-Gia Dinh Special Zone. At this time, MR-6 came fully under the control of COSVN, but the remaining portions of former inter-zone 5 continued to exercise a great deal of autonomy. In 1964, probably due to the enormous distances involved, MR-5 created two SR's. The southern SR covered VC provinces Phu Yen, Khanh Hoa, and Daklak. The northern SR included Quang Tri and Thua Thien.

165. In mid-1965, the U.S. entered the war and Hanoi began infiltrating integral NVA units. This change led to an upgrading of the military committee system and an increase in Hanoi's direct control of MR-5. By the spring of 1966, these new stresses led to a major reorganization of VC administration throughout SVN, including the formation of MR-10 and the Tri-Thien-Hue Region (TTH-MR), the Western Highlands Front Command (B-3 Front), and the consolidation of districts and provinces in MR-1.

166. In April 1966, recommendations were made by the MR-5 Party Committee to Hanoi that the MR be divided into three sub-divisions. In June of that year a formal sub-division was made, creating the TTH-MR and the B-3 Front, leaving as MR-5 the remaining provinces along the coast. It appears the Western Highlands did not have a Party Committee as did the TTH-MR, and for this reason was a Front Command with MR-5's Party Committee remaining responsible for the political side of the war in VC provinces Kontum and Gia Lai. Daklak Province of the southern

SR falls under the B.3 Front militarily and the MR politically. To the north, it was simply a case of elevating the northern SR to full MR status. According to [redacted] this MR also controls the central part of the Laotian panhandle and has occasionally been referred to as the Tri-Thien-Central Laos MR. There are also indications a connection may exist between this MR and the NVN province of Quang Binh, resulting in the name Binh-Tri-Thien MR. Military control of these areas is almost completely in the hands of NVA Front Commands. However, they are still considered to be nominally subordinate to COSVN, if only to maintain the facade of the NFLSV being the guiding hand of the insurgency. b1 b3 (S)

167. If the net effect of these changes in the North was one of lessening COSVN's influence, the opposite is probably true in the South. COSVN had already inherited MR-6 which, prior to 1963 had been part of inter-zone 5. In October 1964, shortly after the formation of the B.3 Front, MR-10 was established by merging one MR-6 province, Quang Duc, with two MR-1 provinces, Phuoc Long and Binh Long. According to a captured diary, the establishment of base areas, control of the southern end of the infiltration route, ethnic minority problems, and land development for the large plantations in the three provinces were the principal problems to be solved by the new MR.

168. The reorganization of the remainder of MR-1 appears to have occurred in response to Allied operations. The attrition of VC cadres made the consolidation of existing structures necessary. Tay Ninh was the only province not affected. Binh Duong and most of Phuoc Thanh provinces were merged to form Thu Dau Mot Province. Long Khanh, Bien Hoa, and Ba Ria were merged into Ba Bien Province. The Rung Sat, a heavily forested swamp lying astride the river mouths leading to Saigon, was also reorganized in the spring of 1966. Before it had formed two districts under Bien Hoa Province, now it became a special zone numbered T-10 with the mission of constructing a strong base area and interdicting the water lines of communication to Saigon. This eliminated the need to staff two District Committees whose political responsibilities encompassed a sparsely populated swamp. There was little reason to alter the VC organizational structures in MR-2 and 3 in the Delta, south of Saigon. This area was still firmly controlled by COSVN.

169. By November 1967, COSVN had ordered a major reorganization of all areas contiguous to Saigon to facilitate the planned general offensive against Saigon in January-March 1968.

The territory of former MR-1 (minus Tay Ninh, Ba Bien, and U-1 Provinces), MR-4 and MR-2's Long An Province were divided into six SR's. SR-1 through 5 formed wedges around Saigon-Cholon, which became SR-6. For the first time, the traditional Nam Bo divisions were ignored and established provinces dissolved to create entirely new entities. If anything, this reorganization resulted in COSVN taking even firmer control of this area, one in which COSVN had always shown special interest.

170. The boundaries of the old MR-4 enclosed an area too limited for the concealment of VC forces during Allied operations in the area. This situation became especially critical after the VC decided to move from guerrilla warfare into a new phase of conventional warfare which meant not only larger military units, but Rear Support bases as well. The new SR arrangement gave each SR a common border with the city and a large rural hinterland for base areas. The breakup of MR-1 and MR-4 also enabled the VC to place relatively high-level personnel from these organizations into the SR's, thus improving the quality of leadership farther down the line. This was also achieved by the direct placement of COSVN personnel down on the SR level on a temporary basis.

171. At this time there were indications the VC also planned to turn Tay Ninh, Ba Bien, and U-1 Provinces into SR's, but never did so. There were also indications that an MR-4 type organization was performing some sort of intermediate headquarters function between COSVN and the SR's, although it now appears that this experiment has been dropped. The overall effect remained, however, one of a COSVN-directed attack against Saigon on several fronts, the coordination of which was the responsibility of Lt. Gen. Tran Van Tra. Despite the close control exercised by COSVN, according to [redacted] the VC command believed the Tet Offensive was marked by a lack of coordination between the military and political forces, a lack of central control over military forces under the SR's, and an inability of the SR's to provide reinforcements. (S) b1 b3

172. In March 1968, COSVN apparently assumed direct command over all military forces in the SR's by turning the military headquarters of each SR, except SR-6, into a Front responsible only to the SVNLA Hqs. As a result, the SR Party Committees no longer exercised command over their own military forces, a departure from normal Party practice. Rather than create a Front for Saigon, SR-6's sapper units and area of responsibility

were divided between the outside SR's. This was probably due to the lack of coordination that occurred between the outside units infiltrating Saigon and their SR-6 supporters during the Tet Offensive. The May-June Offensive proved to be just as ineffective, despite the further reorganization, but it remained evident that with regard to operations for the Saigon area, COSVN intended to assume direct control to the point of placing its own cadres in roles of direct command.

173. COSVN was similarly tightening its grip over the Delta. As outlined in CICV Newsletters No. 5 and 7, 27 July 1968 and 14 October 1968, the COSVN was troubled by decreasing cadre strength and loss of population control in the Delta. On 6 April 1968, there was a meeting between COSVN representatives and high-level cadres from the Delta. Attending were: Dong Van Hieu, a COSVN representative; Mrs. Nguyen Thi Dinh, deputy CO of Hqs. SVNLA; Nguyen Tri Hung, MR-2 representative; and Tran Van Lap, MR-3 representative. One major topic discussed at this meeting was a plan to reorganize the political boundaries of MR-2 and 3. These changes consisted of shifting districts about to accommodate for the change in emphasis resulting from Long An Province being divided into SR-2 and 3. Where, for instance, Tan An city had formerly been a focus of VC efforts in Long An Province, it was now suffering neglect due to the concentration on the Saigon area. Therefore, the district containing Tan An was shifted to My Tho Province. Then, to relieve My Tho Province from the responsibility of administering three large cities - My Tho, Tan An, and Go Cong - a new Go Cong Province was split off eastern My Tho. Further south, MR-2's Ha Tien District was transferred to MR-3, giving MR-3 complete control of supply routes passing through Ha Tien on the way to MR-3. The COSVN representatives also discussed closer coordination of military operations. Mrs. Nguyen Thi Dinh reportedly took personal command of MR-2; with the former deputy CO of the SVNLA, Maj. Gen. Dong Van Cong taking over command of MR-3. In addition, COSVN ordered 90 percent of all Delta village and district forces to be formed into battalions directly subordinate to COSVN.

174. Further reorganization of the Saigon area followed in the path of the May-June Offensive. As mentioned previously, there are indications COSVN's original SR plan envisaged turning Tay Ninh, Ba Bien, and U-1 Provinces into SR-'3, but the plan was never carried through. There also appeared to have been

[illegible] and unsuccessful attempts to set up a new version of MR-4; at the same time, a new MR-7 was created, apparently successfully. Captured documents indicated that between late May and early June 1968, COSVN formed these two MR's (designated T-4 and T-7) with T-4 controlling the territory west and north of Saigon (SR-1, 2, 3, and 5) and MR-7 controlling the territory to the northeast, east, and southeast (SR-6, 9, and 4 including the Rung Sat Special Region). SR-6 was the U-1 Province, and SR-9 was Ba Bien Province (aka Ba Long Province). A general lack of further commentary indicates the MR-4 portion of the reorganization never got off the ground. The existence of MR-7, however, is relatively firm.

175. In fact, a great deal of the reorganizational activity undertaken by COSVN in the Saigon area during this period assumed a sort of trial-and-error, Alice-in-Wonderland quality. Take for example U-1: according to [redacted] and of the [redacted] of U-1, he had learned in December 1967 that MR-1 had been dissolved and U-1 had been redesignated SR-8, reporting directly to COSVN. The U-1 Party Committee* complained that it could not function as an SR with territory including only one district and the province capital of Bien city and an inadequate infrastructure. COSVN apparently agreed because after May, U-1 continued under the old designation. There are indications that U-1 eventually fell under the control of T-7, and T-7 began to function sometime around or after the May-June Offensive. b1 b3 (S)

176. Apparently T-7's creation was designed to enable COSVN to more effectively control this side of the Saigon area of operations by dealing with one rather than several headquarters. It may also be of some significance that during the February 1969 offensive, the incidence of heaviest action shifted from the T-4 to the T-7 theater of operations. The command pattern of that latter offensive was familiar. In the estimation of Lt. Col. [redacted] the Bien Hoa Front was led by Gen. Song Hao, formerly with the Political Department of the NVA General Staff**. Under his command were combined b1 b3 (S)

*In 1955, MR-1's provinces were given "U" numbers. In late 1964, the capital city of Bien Hoa Province was separated from U-3 Province and assigned the code U-1. Except for U-1, the U Series was dropped when the MR's were superceded by the SR's.

**There has been no corroboration that Gen. Song Hao is in SVN, and [redacted] allegation therefore appears doubtful. b1 b3 (S)

independent COSVN maneuver elements and MR-7 forces."

177. This disposition of forces also reveals another interesting pattern. There were three offensives during which the VC made a major effort in the Saigon area - Tet, May-June 1968, and February 1969. In the first, SR-1 and 2 supposedly had the crucial role. In the second, SR-4 and 5 had the principal roles. In the third, what would have been SR-4, 8, and 9 played the major role. As far as local force units were concerned, this arrangement allowed them to share the honors and the losses, as the thrust of the attacks moved from east of Saigon to the coast, to even further west. Apparently SR-3 was experiencing too many internal difficulties to be of much aid.

178. A larger pattern also seems to be forming. As NVN assumes more and more responsibility in the Trung Bo area, COSVN is able to concentrate its personnel on the problems of the Nam Bo area. It also would appear that with the new emphasis on urban areas, harrassment of the Saigon area has become the principal concern of COSVN. Possibly never before have so many COSVN level cadres appeared in the front areas of Saigon, increasing the chance of their being captured or being able to defect. COSVN's Military Intelligence cadres are particularly vulnerable in this respect.

SAFETY - JUNE REPORT

1. General - Pilot Meetings.

1. Beechcraft - 17 June. R-985 engine problems were reviewed. Proper starting procedures and general operating procedures were discussed. The importance of precise legible maintenance write ups was emphasized.

2. C-46, C-47 - 30 June. Pilots were requested to take a more critical view of unusual cargo loads, and to request a check of cabin loads which appear heavy or may have effect on C.G. limits.

Operational Hazard Reports were discussed. The importance of checking NOTAMS daily before each flight was emphasized. Three ORR's were received this month in which pilots violated closed portion of a runway (2), and landed against traffic when USAF Combat Control Team was directing air traffic (1). Both items were listed on the NOTAM board.

Other Meetings.

Tan Son Nhut Integrated Base Safety Council Meeting - 30 June. MSAFE attended the first meeting following invitation by the Base Safety Director. Agenda items were mainly of military interest, except for the OHR revies, and vehicular traffic hazard reports. There are an average of two air traffic pattern OHR's per week. AAM is apparently receiving more than proportionate share of these.

Accident and Incident Investigations.

1. Status of Accident Investigations. Accident reports on Beech 10-2, N137L, and 204B, N1304X have been reviewed by the Local Board and sent to Taipei. Investigation of VTB, N3728G has been completed, and review is pending. This will complete the back log created by the rash of accidents during the first calendar quarter of 1969.

2. Incident Reports. Investigation of incidents involving C-46, B910 of 12 June, and C-47, 16083 of 23 June has been completed. Estimate B910 report in Company mail on 3 July, and 083 report on 5 July.

2. Safety Suggestions

Safety comments and Pilots reports.

01 June - Captain pointed out excessive high speed traffic through AAM ramp entry gate at Danang, suggests traffic humps be installed in AAM roadway such as the ones at Saigon. A/SZ Danang indicates USAF may install the humps. Still in process.

04 June - Capt McCauley was lost twice under radar control because of no transponder. Processed to DSAFE on 7 June.

11 June - Captain McCauley again lost twice on radar on IFR. Processed to DSAFE 17 June

17 June Captain Seale incurred serious sunburn, fatigue, and nausea due to exposure in the PC6 cockpit. Captain Wiehrdt reported same problem verbally to MSAFE. Processed to DSAFE 24 June.

19 June Captain McCauley reported more R-985 problems. Processed to DSAFE 24 June. (This is the worst safety of flight item we have at this time. Impeller seals are highly suspect)

27 June Captain D.E. Morris was cleared by VN tower operator to taxi across 25L at VO1 immediately. He was not in position to observe the runway, and applied surge of power to cross, at which time he saw an F-4 on landing roll. Braked heavily to avoid collision. This report is being processed locally.

27 June Captain Vikre lost on radar approach to TSN, due no transponder, and ADF's ineffective due to thunderstorms. This situation will now pertain at Saigon during the Southwest monsoon, a serious safety of flight situation. Processed to DSAFE 1 July.

3. Follow-up Action

Safety comment form, 1 June has been returned to A/SZDAD for report on status of installation of traffic humps.

4. Minor Incident/Inflight Irregularity (SAFE 9)

DATE	A/C TYPE/NO.	LOCATION	REMARKS
05	VTB/N91295	V-01	Engine unwound to 30% in cruise at 7500' PIC feathered and executed single engine landing at V-01. Improper rigging of link between fuel by - pass and shut-off valves resulted in loss of fuel pressure.
06	Helio/B367	Tan An	On touchdown at V-247, left brake had no effect, A/C veered 4' off right side of runway, no damage. Probable faulty seals in brake assembly, previous corrective actions included new linings, master cylinder and system bleeding.

5. Accident Reports (SAFE 4)

05	VTB/N9838Z	Unk	Bullet damage reported in paragraph 4.
05	C-47/B817	V-03	Left hand fuselage skin below cargo door damaged by customer truck. Loading crew provided no guidance to backing truck.
06	C-46/N67985	V-01	Ramp crew towing A/C with bottom cowlings hanging down. Right hand oil cooler air scoop damaged by striking tire. Employee received reprimand.

10	PC6/N12450	Unk	Right hand rear panel forward of tail wheel attach found buckled and warped on preflight. Probably caused by fast taxi turn on rough surface.
12	C-46/B910	V-19	Left hand wing tip damaged by striking tree on approach. Still under investigation
17	10-2/N9573Z	V-17	Cowling removed, lying under left wing. USA, U-1A #8-1718 blew cowling into left rudder, tearing 6 x 10" hole in fabric. No structural damage.
17	10-2/N5269V	V-17	Smoke emitted from right hand scoop and cowling on start. Motoring did not start engine or reduce smoke. Mechanic used hand extinguisher. Hot box duct was burned and paint blistered on scoop. Fuel inlet fitting to carburetor found loose. Further investigation by MTS requested.
19	PC6/N394R	Unk	Probable rock damage to leading edge and bottom of horizontal stabilizer, discovered during No.2 Service.

S/R.E. Noah

COMMUNISTS RENEW FIGHTING IN LAOS

Communist forces have launched a series of ground attacks against government positions near the Plaine des Jarres in north Laos.

The action was highlighted by a sharp attack on 24 June against the neutralist headquarters at Muong Soui. At least two battalions of North Vietnamese troops supported by tanks overran a number of the base's outlying defense positions and inflicted light casualties on government defenders. The airstrip, however, remained in government hands.

One North Vietnamese prisoner claims that his unit moved into Laos from North Vietnam in early June with the specific purpose of attacking Muong Soui. The ability of the North Vietnamese to move their forces rapidly into position around Muong Soui demonstrates the vulnerability of the neutralist headquarters to enemy forces situated directly east on the Plaine. It also is fresh evidence that the North Vietnamese can deploy troops into Xieng Khouang Province with little warning or chance of detection.

In apparently related moves, the Communists drove government troops from Phou Soung, a recently won position north of the Plaine, and hit government guerrilla outposts on the southern rim. These actions are almost certainly in response to General Vang Pao's recent effort to re-establish a government presence on the Plaine.

The attack against Muong Soui is the first major action against that position in five years. It may have been intended as a commensurate response to the government's occupation for six weeks this spring of the once inviolate Communist base of Xieng Khouangville. The attack may also have been launched for political reasons. In recent weeks the Communists have made a concerted effort to portray Communist "patriotic neutralist" elements as the "true representatives" of the neutralist faction. Such pretensions presumably would be furthered by the capture of the neutralist headquarters at Muong Soui. (~~SECRET NO FOREIGN DISSEM~~)

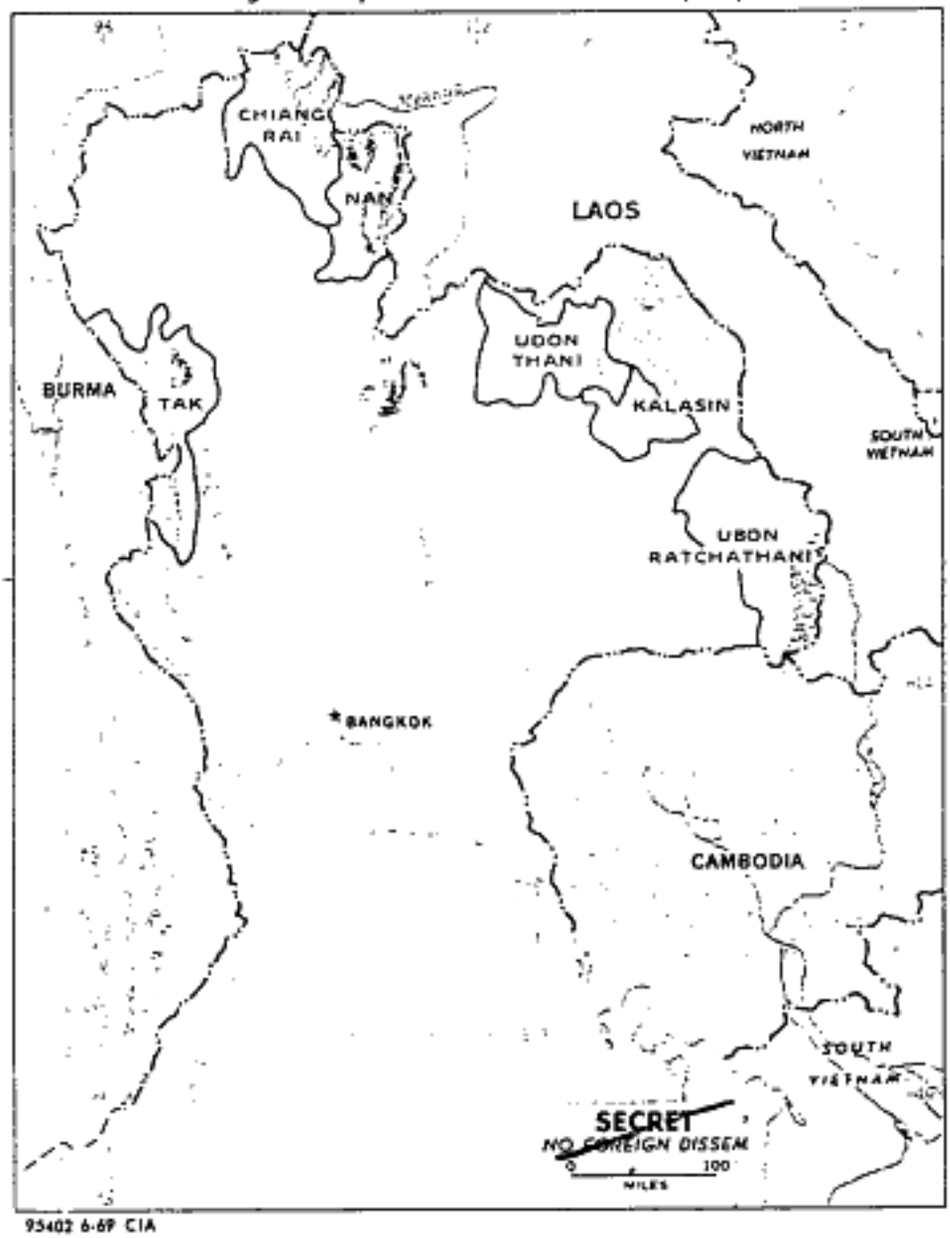
Thailand: Insurgents Improve Positions in Widely Separated Areas



95402 6-69 CIA

NND 941536 --- 3 E 2 y

COMMUNIST GUERRILLAS ACTIVE IN THAILAND

Communist insurgents continue to make headway in the north while they try to improve their assets in the northeast.

In the north and north-central provinces, the Communists are consolidating their control over tribal areas. Village propaganda meetings and sightings of larger insurgent bands attest to the insurgents' growing strength in Nan and Chiang Rai provinces. Village reports also indicate the guerrillas are strengthening their organization in Tak.

The guerrillas continue to harass government security forces, but incidents have become less frequent because several army units have been pulled out of the area for security duty in adjacent lowlands. Bangkok has assigned a new military commander to the north who has a reputation for being aggressive. Nevertheless, the leadership still appears to be divided on the best course to follow in combatting the tribal insurgency.

In the northeast, the guerrillas are apparently carrying out plans drawn up last December to pare down and improve their organization. An increased number of sightings of insurgents in Udon Thani and Kalasin provinces indicate the guerrillas may be establishing footholds in neighboring areas that are relatively free of government security forces. They are reported to have established new political and military training facilities in Kalasin. Bangkok has been particularly concerned over the spread of insurgent activity in southern Ubon Province, an area that is especially vulnerable because of the proximity of Laos-based Communist forces.

The guerrillas also continue to avoid armed encounters with superior security forces, although periodic Thai Army operations have resulted in some small unit clashes.

There are some indications that the Communists intend to increase their military assets in the northeast. A senior Communist defector has stated that several hundred insurgents were scheduled to return earlier this year from extended training in North Vietnam and Laos. There have also been reports that the insurgents have acquired a few mortars and rocket launchers, but there has been no indication of their use. ~~(SECRET NO FOREIGN DISSEM)~~

LITTLE PROGRESS MADE AT DEFENSE TALKS IN CANBERRA

The five-power Commonwealth defense talks held in Canberra on 19 and 20 June were strongly influenced by uncertainties in the key Malaysia-Singapore relationship, which were generated by communal violence in Malaysia last month.

The attitude of Australia and New Zealand during the talks reflected concern that their military presence might entangle them in Malaysia's internal problems and in frictions between Malaysia and Singapore in the event of a serious deterioration in Malaysia's internal security situation. They did, however, reaffirm their commitment to keep forces in the Malaysia-Singapore area after the British withdraw in 1971.

Australian Prime Minister Gorton bluntly reiterated that his country's presence would be directed solely against external aggression. He also said he anticipated that assistance from outside powers would be required should a major external threat develop. Canberra's interest in carefully limiting its commitment was also reflected in the rejection by External Affairs Minister Freeth of a formal agreement to replace the Anglo-Malaysian Defense Agreement that expires in 1971. Australia prefers a general understanding rather than specific treaty obligations.

The five-power meeting also revealed differences over the command structure of Commonwealth forces committed to the Malaysia-Singapore area. While Kuala Lumpur and Singapore favor an integrated command structure, Canberra and Wellington emphasized that they intend to retain direct control of their military units. They did agree, however, to establish a joint services advisory working group, in addition to existing air, ground, and naval advisory groups, to implement plans and policies.

Although planning will go forward at the working-group level, the differences that surfaced at Canberra strongly suggest that progress toward governmental-level understandings and agreements will be slow and limited. (SECRET NO FOREIGN DISSEM)

NND 941536 --- 382

SAIGON BASE
MONTHLY REPORT
JULY 1969

I. GENERAL

1. While flying recovered slightly, the month of July was marred by three accidents.

2. There is every indication that flying will stabilize around 6000-6500 revenue hours. There is at the present time a decrease in all activities in Vietnam which indirectly effects Air America. The V.C. apparently is preparing for another offensive. Unfortunately, the decreased level of terrorist and combat activities I believe, are resulting in people being lulled into over confidence and false security which could result in disaster.

3. The Department Heads are continually looking for areas of cost reduction and avoidance. Unfortunately, this centers around personnel and as a result there is continual need for staff reductions. This is being accomplished in a systematic manner, and will continue on a monthly basis as long as the flying hours continue to decrease.

II. FACILITIES DEVELOPMENT

1. The major accomplishment during the month was the completion of the West Ramp - four years, three months, and three contractors after starting.

2. Other minor projects at SGN, NHA and DAD continue to improve and upgrade the facilities at each station.

III. FLYING

1. The biggest highlight of the month was a general Pilots' meeting conducted by the VPFO and the DFD. The VPFO spoke on what he expects of the pilots and what the pilots can expect of the VPFO. He also spoke of some of the conditions being negotiated for in the new contracts. During the meeting the change in atmosphere was almost visible. It was like a person being lost suddenly finding his way. The consideration for financial and material increase partly affected the change in morale but not nearly so much as the VPFO's assurance of his support of the pilots.

2. The support of the VPFO was brought to test within a week. We have been suffering a great magnetude of R-985 engine failure. This problem was presented to Mr. Walker who took firm and positive action. An investigation team headed by the VPTS arrived at Saigon. Their work was commendable. Corrective action began to eliminate the problem area. The R-985's are humming like sewing machines. The most significant factor of all this is the marked improvement in pilot morale because they feel that management is in consort with them. Matter of fact if the VPFO said "frog" we would have pilots hopping all over the place.

3. There are no other significant problems. Our privilege of being able to shop in the commissary has denied us the right to eat in US Gov't field ration dining rooms throughout the country. This started out to be a big problem but it has almost resolved itself.

IV. OPERATIONS

1. Total revenue block time for July was 6397 + 43 for June. Our Flight Time Forecast for the month was more realistic than previous months. The revenue forecast was 6560 hours. It is predicted the revenue flying picture for the next 3 months will be in the vicinity of 6500 hours.

2. Phase one of our cost reduction program was accomplished by reducing our TCN force by 3 people. CM/NHA Paulding resigned and a study is being made on the possibility of releasing this slot. Two FIC American personnel were released and a study is underway on the feasibility of eliminating one or both of these slots.

3. There were 19 controllable and 48 non-controllable delays during the month with a total of 928 Saigon departures.

4. We are considering ways to reduce GTD costs. A review of the GTD operation reveals that numerous trips are being made by the microbuses instead of the less expensive utilization of our motorbikes and scheduled bus services. A report is being submitted to the Base Manager for his approval on eliminating certain departmental requirements for microbus services.

FIC and the Emergency Equipment Room are in good order.

Flight Time Report (See Attachment A)
Aircraft Incidents Report (See Attachment B)

5. Communications - Post and Telecommunications approved Air America's request to establish a direct full duplex UHF radioteletype circuit between our Tan Son Nhut Base and the Post Office. Preliminary discussions were held with the appropriate Service Chiefs at the Post Office concerning installation of the equipment. They were most helpful and no problems are foreseen. There is adequate space for our equipment within the overseas communications center and our antennas can be readily erected on the roof of the building.

6. However, since the equipment has not yet arrived from Bangkok, and since it will take approximately three to four weeks to receive frequency allocation ffom USMACV J634, it was decided to postpone further talks with Posts and Telecommunications until we receive both the equipment and the frequency assignment. Then, too, it will take a few more weeks to order and receive crystals if the already installed frequencies cannot be used by Air America in SVN.

7. A letter to this effect was sent to MACV J634 requesting frequency allocation. MACV was given copies of Air America's original request and Posts and Telecommunications subsequent letter of approval as background information and justification for our frequency assignment request. They have promised to handle the matter as quickly as possible.

8. Apropos of frequency assignments MACV has informally advised us that Air America has been allocated five additional HF frequencies although no official notification has been received from CINCPAC or DCD.

9. AMTRACO has not received as yet any correspondence from General Electric regarding our ramp control network equipment.

10. The BKK-HKG leased radioteletype circuit was terminated effective 2400Z July 31. Temporarily all traffic for that station will be relayed via the SGN-BKK CW circuit until the UTH-VTE radioteletype circuit is established. As soon as that has been accomplished UTH will protect BKK traffic under normal circuit conditions.

V. TRAFFIC/AAM

1. Although the SRTM position was transferred to Danang [redacted] it was requested by the BM to leave the administrative responsibility at Saigon. Accordingly TM/SGN has remained with this additional duty during the reporting month.

2. [redacted] was unable to depart until 4 July due to visa/ticket problems and is scheduled for return to duty on 3 August. During his absence [redacted] was assigned additional duties as ATM and performed very well.

3. [redacted] was sent to Cantho for two days to indoctrinate the Traffic personnel on proper paperwork procedures for shipment of company cargo. He indoctrinated them on AWB preparation, manifesting, types of cargo shipment authorized on passenger aircraft and record maintenance. An improvement in documentation has been noted.

All personnel records were screened and records of personnel having been terminated or resigned for over one year were forwarded to personnel.

	June	July
Passengers departure SGN (All contracts)	5375	6021
" arrival SGN (All contracts)	6137	6622
Outbound cargo - SGN	72742	72793
Inbound cargo - SGN	90017	89632

4. TRAFFIC/USAID

	Cargo (including AF Caribou A/C)	
Outbound (lbs) SGN	1,092,917	2,841,844
Inbound (lbs) SGN	86,747	586,425

VI. HOSTEL OCCUPANCY

1. During the month of July, 64 beds out of 186 were occupied for a 34.4% occupancy rate. Also, there were no Non-Avail. Slips issued during the month.

VII. SAFETY

1. Pilot Meetings - Beechcraft - 21 July. Mr. Wueste and Mr. Chambers were present to review the investigation of R-985 problems and requested assistance from the pilots in accurately reporting observed abnormalities. Mr. Wueste is desirous of improving communications between the stations and MMB, and further stated he desired direct messages from the operations side to avoid delays in investigation of problems. It was found that exhaust valve guides were being reamed to zero clearance due to an undersize reamer at MMB. Correction of this problem seems to have solved the incidence of backfiring.

2. There was also a discussion of weight and balance, limitation on cargo aft of rear seats in the C-45, and the requirement for WB Form in the 10-2 with fuel in rear tanks or with load in rear cabin.

Accident Investigations - Three accidents occurred during the month and are presently under investigation:

1. VTB, N3674G gear up touch-and-go at Nha Trang on 8 July

2. Serious injury to VN National who ran into tail rotor of 204B, N1306X at Mo Duc on 23 July.

3. 10-2, N9521Z landing accident at Vung Tau resulting in serious injuries to five persons, and substantial damage to Army Ov-1C and 21Z.

VIII. PERSONNEL

1. Apart from routine activities our efforts this month have been concentrated on expediting [redacted] participation at the Line Maintenance School in Tainan. We played host to a group of visitors from the Ministry of Labor Department of Vocational Training who appeared impressed by our facilities and with our local training efforts. The Director of Vocational Training, [redacted] assured us that the Ministry of Labor is doing all possible to secure Ministry of Defense approval for our candidates to obtain their exit documents, and we feel reasonably optimistic that this approval will be forthcoming shortly.

2. We are experiencing some difficulty in obtaining Work Permit renewals for our Third Country National (TCN) personnel in country, and Work Permits and Entry Visas for TCN personnel awaiting transfer to Vietnam. The Ministry of Labor is taking a long hard look at all work Permit applications in view of the large number of TCNs illegally living and working within the country, and because so many Vietnamese are now unemployed (or will be soon) due to U.S. Government contract cutbacks.

3. APH was interviewed, selected and is now participating in a two hour biweekly seminar for Vietnamese executive level personnel. The seminar, entitled Successful Management Action, is sponsored by USAID, and will run for about 12 weeks.

4. One new addition was made to the Department's staff [redacted] who will work in the Passport and Visa Section.

5. Personnel Strength (See Attachment C)

IX. TECHNICAL SERVICES

1. It would appear that our flying hours are going to stabilize around the 6500 per month figure. June was 6408 and this month was 6574. The personnel reductions are based on a 6500 figure and our strength is getting down to the level where our manpower will be much better aligned to the workload. The 204B and PC6C have always been the highest two programs for flying hours and still are, but these two programs were each down about 100 hours for July versus June. The C-47, VTB and C45/10-2 each picked up near equal amounts. The fourth and last H395 was put into temporary storage during the month.

2. VPTS, Mr. Hueste visited with us for about 5 days. This is about the appropriate length of time for a good close look at our operation. So many visitors buzz through on a two or three day "firemans tour" and rarely have the time to observe/discuss local problems or plans. VPTS visited DaNang (HCN), Nha Trang and Can Tho stations with sufficient time to sit down and conduct good meaningful discussions with the concerned supervisors. This is a worthy morale booster, to the sub-bases in particular because they realize their problems and projects are of honest interest to higher management in Tainan. VPTS visit was quite beneficial to all of us and a much better understanding from everyone concerned is obvious.

3. Another relocation of several (some 10) offices and shop functions is to be implemented in the near future. Reason is funding for addition facilities is quite unlikely under the new contract coming up and the pilots need a locker room(?) and a decent toilet facility. In addition Communications Center is in dire need of more space for sure, as is the Emergency Equipment Room. With the Accounting Offices planned into the RMD shops 2nd floor offices and Security Dept planned for occupying the present Airborne Electronics Shop area in the RMD hangar (west side), this would then vacate some 75% of the ground floor of the Operations Building for Flying Dept to expand. It would seem that a more economical approach would be to erect a TALCO Building of 26' x 100' along the north side of the Operations Building which could house all the Flying Dept. requirements. The majority of such a TALCO Building is now in storage at our CMD area.

INTELLIGENCE MEMORANDUM

Anomalies in Soviet Shipping to North Vietnam During the First Half of 1969

Summary

Recent anomalies in Soviet shipping to North Vietnam suggest that the USSR has expanded the categories of military-related cargo that it is willing to ship to North Vietnam by sea since the bombing halt. Soviet ships during the first half of 1969 delivered the first seaborne consignments to North Vietnam of Soviet Chief Engineering Directorate (GIU) cargo and and ammunition, a large number of

and the first shiploads of vehicles to North Vietnam from the Soviet Far East. In contrast to previous practice, Soviet ships en route to Haiphong have stopped at intermediate ports to discharge military cargo without advance notice Even though deliveries of military-related cargoes have become more frequent, there is no conclusive evidence of any seaborne deliveries to North Vietnam of combat arms or ammunition.

The GIU cargoes were shipped under contracts dealing with both aviation equipment and land armaments. Shipments by the GIU to other countries in these categories have included both combat materiel and military-related items. Soviet delivered in the past to North Vietnam (by rail) and to Cuba were models designed for training or target competition. shipped by the USSR to the Middle East and Cuba have

Note: This memorandum was produced solely by CIA. It was prepared by the Office of Economic Research and was coordinated with the Office of Strategic Research.

~~TOP SECRET~~

ranged from trucks to combat aircraft. The quantities involved in these suspicious shipments to North Vietnam were small. Even if every suspicious item were combat materiel, total deliveries of such cargo would be negligible compared with the amount of military aid which North Vietnam receives from the USSR.

The deliveries of vehicles from the Soviet Far East may have been diversions from rail shipment across China as a result of Chinese harassment. The presence of five 100-mm antiaircraft guns in the railyard near the wharves in Haiphong on 10 May 1969 suggests a diversion of combat materiel from rail to sea, but the mode of arrival of these guns in Haiphong has not been determined. Similar guns have been used in the Haiphong area for some time.

If Soviet shipments across China are being delayed or harassed, as some reports indicate, the USSR is likely to switch more military-related cargoes, and possibly some combat materiel, to sea shipment. Soviet authorities probably could conceal some shipments of combat materiel for a time, if they wished to do so. Repeated shipments by sea of large quantities of combat materiel, however, probably would be detected.

Chief Engineering Directorate Cargo

1. During 1969 the first seaborne shipments of cargo by the USSR's Chief Engineering Directorate (GIU) to North Vietnam were detected. The first shipment arrived in Haiphong from the Black Sea on 15 April aboard the Soviet large-hatch ship *Partizanskaya Iskra*.* This 39-ton cargo, which has not been identified,

2. The GIU is frequently involved in shipments of combat materiel and military support equipment such as trucks and radar to other countries, both by rail and by sea. It has also been involved in at least one rail shipment to North Vietnam. In 1966 a large-hatch ship, which eventually called at

* *A dry cargo ship with at least one hatch 50 feet or more in length. This oversize hatch facilitates the handling of large items of cargo. Nearly all of the general cargo shipped to North Vietnam from the Black Sea is carried by ships of this type.*

North Vietnam, delivered GIU cargo to an intermediate port, Djakarta.* In another instance, 3 tons of GIU cargo were shipped from North Vietnam to the USSR by sea. However, the GIU had never been previously identified, as the shipper of seaborne cargo *to* North Vietnam.

3. The voyage of the *Partizanskaya Iskra* was noteworthy in other respects. The ship passed the Bosporus on 24 February declaring from Ilichevsk (near Odessa) to Singapore. Before calling at Singapore it called at Djakarta and Surabaya without advance notice, probably to discharge military cargo. Previous calls at intermediate ports by ships suspected of delivering military cargo had always been forecast Moreover, 2,200 of 7,000 tons of cargo on board the *Partizanskaya Iskra* for Haiphong were unidentified.

4. The second detected seaborne shipment of GIU cargo to North Vietnam is aboard the *Partizanskaya Slava*, which should arrive in Haiphong in early July.

Much of the other cargo for Haiphong on the *Partizanskaya Slava* has been identified and consists of a variety of general cargo, including 100 motorcycles weighing 45 tons consigned to the

---

* *The* Baymak, *which declared from Nikolayev to Djakarta, delivered aviation material to Djakarta. Later it called at Haiphong.*

There were also
of 8 x 12 x 20 feet on the deck of the *Bratslav*; their contents have not been identified. The *Oktyabrskaya Revolyutsiya*, was supposed to deliver
weighing 130 kg to Singapore with transshipment to be made to Djakarta. However, the ship is reported to have discharged in Haiphong.

8. The first and only seaborne shipment of to North Vietnam is aboard the *Berezovka*, which is scheduled to arrive in Haiphong about 1 July.

9. The munitions on these ships probably are what they purported to be

Kaznoeksport (meaning "various exports"), which is subordinate to the Soviet Ministry of Foreign Trade and has dealt in the past with the export of tobacco products, building materials, mica, hides, hardware, insulators, firefighting equipment, leather goods, crockery, domestic electrical appliances, sewing machines, clothing, knitted goods, sports goods, sporting guns, *matches, toys, musical instruments, and so on.*

One delivery of ammunition and firing pins was consigned to North Vietnam's quasi-military "Central Committee for Sports and Gymnastics." No deliveries of were observed between September 1967 and early 1969.

10. Soviet shipments by sea of and ammunition to other destinations are not unusual. There have been 13 such deliveries to Cuba since the beginning of 1967.* Most of these were and, where identified, turned out to be of 5.6 mm caliber. Most of the shipments were small. There is no evidence that any of them included combat weapons or ammunition.

Technical Cargo

11. Several of the Soviet arrivals in Haiphong during the first half of 1969 delivered

to Cuba and the UAR. The *Nizhneudinsk*, a 2 January arrival, carried nearly a full load of flour, some caustic soda, and 1 ton of

12. The *Oktyabrskaya Revolyutsiya* and the *Bratslav*, both discussed previously in connection with consignments of also delivered to Haiphong. The *Oktyabrskaya Revolyutsiya* is reported to have unloaded at Haiphong.

13. On 1 April 1969 the *Ignatiy Sergeyev* declared at the Bosporus for Haiphong from Nikolayev, the port of origin for many previous arms shipments.

* *There were deliveries by Soviet ships to Cuba prior to 1967. References to or ammunition have not been made in connection with voyages of non-Soviet ships to Cuba.*

This was only the second ship to declare for Haiphong from this port. Ten tons of

included in its cargo for North Vietnam. were The ship made an unscheduled stop in Sihanoukville, Cambodia, on its way to Haiphong and probably offloaded military equipment under an aid agreement with Cambodia. A vehicle resembling a compressor-oxidizer truck, which is used with missile systems, was photographed on the deck of the *Ignatiy Sergeyev* when it passed the Bosporus. When the ship was photographed again, seven days after its arrival at Zero Buoy in Haiphong, this vehicle was no longer on deck. Therefore, it had been unloaded at Sihanoukville (unlikely because the Cambodians have no missiles) or lightered off at Haiphong. The nature of the cargoes shipped to North Vietnam has not been determined, but there is a strong suspicion that they are at least military-related.

Suspicious Voyages in the Past

14. Six of the 10 ships discussed above have made suspicious voyages to North Vietnam in the past (three of the remaining four ships were on their first voyage to North Vietnam). The *Partizanskaya Iskra* delivered a cargo to North Vietnam in August 1967 that included 26 crates identified as resembling Styx missile crates, but no Styx missiles have ever been observed in North Vietnam. The nature of this suspicious cargo, however, has not been determined. The *Belgorod Dnestrovskiy* carried cargo to North Vietnam in February 1966 and February 1968. Moreover, it berthed at Haiphong five days before four 29-foot mansard-roof crates, similar to those used to transport military equipment, were photographed near the Haiphong wharves. In September 1968 it delivered 7,900 tons of cargo to Haiphong, 7,700 tons of which have not been identified.

15. The *Bratislav* arrived in Haiphong on with 3,500 tons out of 4,200 tons of its cargo unidentified, including 12 boxes of unspecified cargo shipped by Aviaeksport. In October 1968 it delivered 8,100 tons; 7,200 tons were unidentified. The *Oktyabrskaya Revolyutsiya* carried equipment to North Vietnam in

May 1968. The *Nizhneudinsk* early in 1968 delivered three "assemblies," and "field kitchens" weighing a total of 37 tons and shipped by Prommasheksport, which handles both commercial and military-related goods. The *Berezovka* delivered to Haiphong in July 1968. In January 1969 it offloaded 6,500 tons of cargo in Haiphong, 6,100 tons of which were unidentified.

Motor Vehicle Shipments from the Soviet Far East

16. In January 1969 the Soviet large-hatch ship *Vitim* delivered a shipload of vehicles to North Vietnam from Vladivostok.* This was the first full shipload of vehicles carried to North Vietnam from the USSR since February 1966 and the first shipload from Soviet Pacific ports. In April and May 1969, there were three similar voyages, each with substantial cargoes of vehicles. The *Orekhov*, a 16 April arrival, delivered 1,065 tons of vehicles, including 218 trucks and 9 ambulances, from Vladivostok. The deck cargo consisted of 44 ZIL-157 trucks, 6 GAZ-66 trucks, and 16 dump trucks. The *Vysokogorsk*, on its first voyage to Haiphong, arrived on 26 April with 1,029 tons of cargo loaded at Nakhodka, including 111 ZIL-157 trucks, 32 ZIL-MMZ-555 trucks, 2 GAZ-66 trucks, and 64 TAG-53A trucks. On deck were 44 trucks and 6 double-decker buses. The *Vysokogorsk* again arrived in Haiphong on 20 May, this time from Vladivostok, carrying at least 553 tons of trucks, 8 trailers, 2 buses, 7 unspecified vehicles, and small amounts of transformers, vodka, flour, and cheese. All three voyages were accorded priority handling in Haiphong. Each ship was unloaded in less than four days.

* *The* Vitim *was only the fourth large-hatch ship to sail to North Vietnam from the Soviet Far East. The first voyage was made by the* Ostrogozhsk, *a July 1966 arrival, which delivered 977 tons of cargo loaded at Sovetskaya Gavan and Vladivostok, none of which has been identified. The* Omsk, *a September 1967 arrival, delivered four 47-ton "heavyweights" which had been loaded in Vladivostok and which were never identified. The* Votkinsk, *a January 1968 arrival, delivered only 216 tons of cargo, including "field kitchens."*

17. The vehicles delivered from the Soviet Far East may originally have been intended for rail shipment through China, only to be diverted because of Chinese harassment. According to a Soviet radio broadcast of 27 April 1969 the Chinese at the end of 1968 delayed a Soviet freight train loaded with motor vehicles for North Vietnam at the Sino-Soviet border for three months. A Soviet official in Peking reported in late May that the Chinese continually harassed and delayed Soviet rail shipments to North Vietnam and that this harassment had continued up to late May 1969. He stated that there had been no noticeable increase in harassment, however, as a result of the initial Ussuri River incident. A Haiphong port official claimed in March or early April that Soviet supplies were being stopped by the Chinese, but that henceforth these supplies would come by ship. However, [redacted] that Soviet rail shipments across China are continuing.

Antiaircraft Guns in Haiphong

18. Photography of Haiphong on 10 May 1969 showed antiaircraft guns (probably 100 mm) on flatcars in the main railyard four-fifths of a mile south of the main wharf area. Antiaircraft guns of this size have been emplaced in the Haiphong area for some time. Goods on other cars in the yard appeared to have arrived by sea, but it has not been determined how the guns arrived or whether they were incoming or outgoing cargo. If they were delivered by sea, the most likely vessels to have carried them were the *Partizanskaya Iskra* and the *Bratslav* (discussed previously) and the *Pavlovsk*, which arrived on 27 April 1969. Each ship offloaded cargo immediately preceding or during the time the antiaircraft guns were photographed. The *Pavlovsk* was the first large-hatch ship to sail directly to Haiphong from the Black Sea since August 1968. Of its 6,700 tons of cargo carried for North Vietnam, 5,700 tons has not been identified.

19. The *Pavlovsk* also was one of the first large-hatch ships to depart from a Black Sea port subsequent to the outbreak of the Ussuri River hostilities. It left the Black Sea approximately on 15 March -- 13 days after the initial Ussuri River incident, about enough time for the USSR to begin rerouting rail shipments destined for Vietnam.

However, no direct evidence connects any of these vessels with the delivery of antiaircraft guns to North Vietnam.

Conclusions

20. The various anomalies noted in the past six months suggest an expansion in the categories of military-related cargoes the USSR has been willing to ship by sea to North Vietnam since the bombing halt, but they do not constitute conclusive evidence of seaborne shipments of combat arms and ammunition. In any event, the volumes involved are small. Even if every unidentified and suspicious item were combat arms or ammunition, total deliveries of such cargo would be negligible compared to the entire amount of military aid which North Vietnam receives from the USSR.

21. This apparent change in Soviet policy may represent a diversion of cargoes from rail shipment across China because of the threat of Chinese harassment. If the Chinese continue to delay and harass Soviet rail shipments, as some sources report, the USSR may ship more military-related cargoes, and possibly some combat materiel, by sea to North Vietnam. The USSR could conceal shipments of combat materiel for a time if it wished to do so.

Combat materiel delivered to North Vietnam by sea, however, presumably would be shipped together with commercial cargoes.

22. Detection of such cargoes would be difficult. Security at Soviet loading ports is excellent;

and photography of Haiphong has been sharply reduced since the bombing halt. Even though the advantages of concealment appear to be with the USSR, repeated sea shipments to North Vietnam of large quantities of combat materiel probably would be detected.

MEMORANDUM

TO : BM/SGN

DATE: 03 July, 1969

FROM : A/SZDAD

REF. No. SZDAD/69/069

SUBJECT: DANANG Station Monthly Report for June, 1969

GENERAL

During the month there was one occasion in which the DaNang Air Base received hostile fire from enemy rockets. On the night of 6 June at least nineteen 122mm and 140mm rockets impacted within the confines of the air base causing minor damage to military installations. Five U.S. military fatalities were rumored but not officially confirmed as a result of this attack. Several satchel charges were exploded in the City of DaNang but no casualties were reported. Company personnel and property were not directly affected by these actions.

The DaNang city curfew was extended one hour and is now in effect from 2100 to 0600 hours daily. The air base curfew remains from 1900 to 0600 hours for indigenous employees. No serious curfew incidents were reported during the month with the exception of a short term detention of one Filipino employee by Vietnamese authorities. This type of problem results from police insistence that Third Country National personnel should have their passport in their possession at all times. Such a requirement is completely untenable since employee passports are usually held by the Saigon Passport and Visa section for visa and extention of stay processing. Individual letters of identification have so far sufficed to remedy the problem but employees are still subject to minor harassment.

The number of Southern Air Transport flights declined from the previous month for a total of six. No problems were encountered in the ground handling of these flights, but the possibility of utilizing a local ground handling service is being investigated. Authorization from VNAF security to permit two Vietnamese utility personnel to remain on the air base overnight to assist in the handling of the SAT round trip flights scheduled to arrive during the curfew has been requested, but no reply has been received to date. Seven such flights are already scheduled into DaNang during July.

A Per Diem rate survey was conducted during June, the results of which indicate that the DaNang rates should be raised significantly, especially for Third Country National personnel who may not utilize U.S. Government messes. Use of these messes by American civilian personnel was nearly curtailed as the result of a MACV directive which was to be effective 1 July. This directive stipulates that civilian personnel must have Field Ration Mess privileges authorized on their MACV privilege cards, but the effective date was extended to 15 July. No company personnel presently have such an authorization, and since most crew members utilize one of these messes located close to the Old Hostel, serious problems may result if a solution is not reached by the above suspense date.

SUBJECT: DANANG Station Monthly Report for June, 1969

LEGAL

The lease on the Station Manager's residence [redacted] was renewed for another year. Although the lessor had requested an increase in the lease price, a supplemental agreement was negotiated whereby the painting clause in the lease contract was deleted but the rent remained constant. This agreement also provides for two subsequent one year renewals at a twelve percent increase in annual rent.

The possibility of letting the lease on the New Hostel [redacted] expire is under consideration. This hostel has a very low occupancy factor but alternatives to relinquishing this building must still be determined. The rent on this property is pre-paid thru 09 August 1969.

A proposal was received from Barclay & Co., a private concessionaire, concerning the assumption of the station snack-bar operation. Certain problem areas will have to be resolved, primarily those of electric power supply and an account with the NSA commissary, but a first class type of operation, with a complete redecorating of the snack bar interior is proposed if an agreement can be reached. The service presently provided by the USAF NCO Club can only be considered less than satisfactory.

CUSTOMER RELATIONS

No significant problems were encountered in this area during the month.

FACILITIES

Construction of the Nose Hangar Lean-to is progressing at a fairly rapid rate. The project is nearly fifty percent complete and the contractor estimates it should be ready for final acceptance by the end of July.

The station continues to be plagued with electric power failures. A fourth 100 KVA generator was installed by USAF, but it seems to be no more reliable than the previous three. The problem is very intermittant and rarely occurs when service personnel arrive. Fuel contamination is suspected but unconfirmed.

A series of unseasonal rain showers have pointed out the strong need for paving the unsurfaced areas of the station facility, particularly that portion between the Operations/Administration building and the Supply warehouse. This area was previously at least graded fairly smooth, but with the lack of drainage, and the heavy vehicular traffic experienced, rather large pools of water and mud have been created which frustrate any efforts to keep the interiors of the adjacent buildings clean.

SUBJECT: DANANG Station Monthly Report for June, 1969

FISCAL

The station time clock was shipped to Japan for conversion to sixty cycle operation. Implementation of a timekeeping system based on this piece of equipment must be deferred until it is received.

[redacted] payroll for the month totaled: [redacted]

Petty Cash expenditures for the month totaled: 78,529$VN

OPERATIONS

Total revenue flight time declined slightly from the previous month, although 4395 and 0005 contract flying increased. Revenue losses were 8+00 hours as compared to 5+30 hours during May.

The following is a breakdown of flight time generated by this station during June:

AID/VN-41	786+11
4395	335+14
0005	9+59
Non-revenue	7+12
Total	1,138+36

Revenue losses for the month are broken down as follows:

Maintenance	2+00
Customer Cancellations	6+00
Weather	Nil
Other	Nil
Total	8+00

COMMUNICATIONS

The Motorola remote VHF/UHF was only out of service twice during the month. Although several actual communication difficulties were reported, these problems have been attributed more to weather phenomena, terrain and other radio interference than equipment discrepancies.

Incoming and outgoing messages totaled 2114 and 1399 respectively.

SUBJECT: DANANG Station Monthly Report for June, 1969

TRAFFIC

[redacted] resigned as Traffic Manager and was replaced by [redacted]. This changeover of personnel was accomplished smoothly and with a minimum loss of continuity.

Passenger and cargo statistics for the month are as follows:

	Passengers In	Passengers Out	Cargo In	Cargo Out
AID/VN-41	2,851	2,896	191,833	281,285
4395	618	635	1,800	39,084
0005	7	7	Nil	Nil
Perry	59	59	Nil	Nil
AAM	107	107	20,270	14,699
Total	3,642	3,704	213,903	335,068

16 Continental Air Services flights were handled by this department during the month.

SECURITY

No information has been received from the VN-41 customer regarding the upgrading of two ground services utility slots to Guard positions. It was originally requested that their support for this recommendation be communicated directly to Saigon. The status of this proposal will be confirmed when the VN-41 Air Operations Officer returns from leave.

Additional high intensity lights are being installed to illuminate potential pilferage areas within the facility. This lighting, when complete, should aid the airport security guards in maintaining surveillance over the entire compound.

PERSONNEL

The processing of employee extention of stay and visa applications continues to be a time consuming procedure, but the Saigon Passport and Visa section has been able to support the most urgent requirements on a timely basis.

The personnel breakdown for DaNang Station during June was as follows:

		[redacted]		
Permanent	5	31	14	105
Pre-Process	0	0	0	12
Temporary	0	0	0	0
Daily Hire	0	0	0	0
Total (167)	5	31	14	117

SUBJECT: DANANG Station Monthly Report for June, 1969

TECHNICAL SERVICES

RMD handled at total of 616 arriving and 617 departing flights, of which seven of the latter were delayed due to maintenance. There were two engine changes and no propeller changes during the month. A total of nine heavy services performed, including two 2048 number 2 services which were supported by personnel TCS from Saigon. In the future, only number 1 services on PC-6 and VIB aircraft will be performed at DaNang.

RGMD expended at total of 1360 manhours, of which 262 were utilized in hostel maintenance and painting.

The substantial credit expected on the May NSA invoice was not received, but coordination was effected with the concerned offices to delay payment pending the receipt of credit on the June invoice. Overall, NSA has been very cognisant of this problem and appears to be making a serious effort to resolve their internal accounting problems.

SAIGON BASE
MONTHLY REPORT
AUGUST 1969

I. GENERAL

1. The overall activities during the past month were routine with the flying decreased slightly as forecasted. The forecast was within .2% of actual. Enemy activities have increased considerable and Saigon continued to receive rockets and terrorist activities which make living a little uncomfortable.

2. The Saigon Retail Price Index remained rather stable from August 1968 to April 1969, but is now 12% above the April level. The rate of increase has declined. The index for all items rose 7% in May, 4% in June and only 1% in July. The July increase was almost entirely attributable to the impact of the increased per equation tax.

II. FACILITIES DEVELOPMENT

1. SFD Phil Doyle was transferred to Udorn leaving SGM the responsibilities of Facilities Development. There are two major projects underway. (1) The revetment fence along the northwest side of the area. (2) The water system. Both of these projects are approximately 90% completed. The new antenna masts and accessories are scheduled for arrival during September so we will start the final phase of relocating the transmitters toward the end of the month.

III. OPERATIONS

1. Total revenue block time for August was 6128 + 34 compared to 6397 + 22 for July. Our revenue forecast for the month was nearly perfect as we predicted 6135 revenue hours. The Caribous flew 169 + 07 revenue hours which was a substantial increase over previous months.

2. One other TCN was transferred giving a total of 4 less TCN's and 3 Americans since we initiated our cost reduction program. PM/SGN has been advised to hire locals to fill the slots of TCNs. OM Macfarlane is cross-trained to cover OM and FIC shifts.

3. There were 18 controllable and 46 uncontrollable delays with a total of 907 Saigon departures. These figures are practically the same as the previous months.

FIC, GTD and the Emergency Equipment Room are in good order. Customer relations have remained good.

Flight Time Report (See attachment A)

Aircraft Incidents Report (See Attachment B)

F

IV. TRAFFIC/AAM

1. The SRTM position reportedly has again been transferred to Saigon. Although no written direction from management has been received I have continued to perform the functions during the reporting month.

A "Vector Control" program was instigated with a score of 5 KIA rodents for the month. This will be a continuous program with traps set during aircraft HONs.

2. The new Contract of Carriage forms were placed in use. Several problem areas have been noted and this will be discussed in a separate letter.

As mentioned in my SRTM/SVN/M/69/135 dated 20 August there have been some differences of opinion on baggage to be carried on our aircraft. We are attempting to conform to basic safety guidelines and still satisfy the Customer using the criteria outlined in BM memo BMSGN/69/285.

3. We have secured adequate storage in the Customer Warehouse and the covered area outside the warehouse for Company cargo. Although somewhat removed from our work area it has proven to be sufficient for our needs.

4. Checking of Beech seats by numbers with drawings indicated an error in seat numbers. We have received an engineering evaluation and have started to have the seats configured correctly.

			July	August	
Passengers departure	SGN	(All contracts)	6021	6153	5, 857
" arrival	SGN	(" ")	6622	6731	5, 980
Outbound cargo	SGN		72793	69543	90,217
Inbound cargo	SGN		89632	88103	90, 207

5. TRAFFIC/USAID

		Cargo (including AF Caribou A/C)		
		July	August	
Outbound (lbs)	SGN	2,841,844	1,626,899	1, 369, 252 lb
Inbound (lbs)	SGN	586,425	540,886	519, 783

V. HOSTEL OCCUPANCY

1. During the month of August 1969, 3 beds out of 186 were utilized for a 1.6% occupancy rate. Also, there were no Non-Availability slips issued during the month.

VI. FLYING

1. The gravest problem confronting the Flying Department in many respects is lack of utilisation of the VTB yet the schedule requires many hours of standby by the crews. This problem has been prevelant for some time. I do not think it will be with us too much longer as we will have no VTB crews to worry about. This standby problem is becoming so serious that, to date, four Captains have voiced a strong indication of resigning, and five Captains have vehemently requested transfer out of the VTB program. Such actions seem natural enough considering for every four hours of duty time, a VTB Captain receives only one hour for pay purposes.

To counteract these inequities:

- We have forwarded studies to the BM for discussion with the customer,
- We forwarded a study to the DFD for salary consideration regarding standby time,
- We have cross-trained personnel into the VTB but so far we have been unsuccessful in cross-training any personnel out, as every PIC trained-in are being utilized standing-by.

2. So far no assistance from the customer appears to be forthcoming, the DFD has not had time to act upon salary adjustment, and our cross-training program has reached a stand still, as far as getting volunteers to train into the program, and from an economical view point.

3. Morale in other programs is naturally very good. The flying time is up in all other programs and there were no accidents for the month.

VII. SAFETY

1. Pilot Meetings - VTB - 7 August

a. Recent aircraft troubles, Saigon and out-station maintenance, maintenance write-ups, and wind, weather, and airfield hazards were discussed.

b. Technical and printing errors in the new VTB Flight Manual were brought to the pilots' attention.

C-46 - 11 August. Following items affecting flight safety were discussed:

a. Use of non-standard cockpit signals. This practise will be discontinued and flight crews will be spot checked for compliance.

b. It has been observed that many pilots are failing to use checklists installed in aircraft. Disciplinary action will be taken against further infractions of this rule.

c. Taxiing with hands hanging out of windows and not holding yoke was discussed.

d. Removal of landing gear pins. After #2 has been started and the hydraulic pressure is up, the PIC will signal for removal of the gear pins prior to starting #1.

Beechcraft - 26 August. Following safety items were discussed:

a. Caution about vehicular traffic on the new road which crosses the AAM taxiway.

b. Pilots were informed to check for proper installation of forward and rearward facing seats. Seat failures in a recent accident may possibly have resulted from improper installations.

c. Recently, a passenger in the copilot seat of a VTB grasped the control wheel during landing. Pilots were warned to thoroughly brief any passenger occupying this seat.

d. A recent accident at another station revealed that some passengers aboard did not have seat belts available. Pilots were warned to assure that every occupant has available, and wears a seat belt. Exceptions should be made only in grave emergencies.

e. Pilots were cautioned to check for accumulation of mud in wheel wells after operating on muddy surfaces. Excess mud in wheel wells can result in a gear-up landing.

204B - 30 August

a. N1307X FCU malfunction of 27 August was reviewed. Pilots were advised of residual high EGT during emergency, and necessity for slow application of power after switching to manual fuel control. This emergency occurred at 1800' and approximately 500' was lost in entering autorotation, diagnosis of problem, and effecting manual control to recover.

b. Pilots were reminded of necessity for complete, accurate write-ups whenever a malfunction occurs. This will enable MMB to diagnose malfunctions which in the past may have gone undetected.

2. Accident Investigations

a. Investigation of Beech 10-2, N9521Z accident at V-05, Vung Tau on 26 July 1969 has been completed except for the report of analysis on landing gear and brake components. Anticipate completion of Local Board of Review prior to 15 September.

b. Local Board of Review for VTB, N3674G accident was completed on 14 August and submitted to the Head Office.

c. Traffic utilityman [redacted] suffered the loss of a finger as a result of being caught in a lowering forklift boom at Danang on 29 August. Employee Accident Form PD-137R5 will be submitted.

VIII.
PERSONNEL

1. As was the case in July, activities were largely routine with the exception of the work done on the Vietnamese Line Maintenance Training Program and on Work Permits. Ministry of National Defense approval to leave the country has been granted to 22 of the primary Trainee candidates and to all 10 alternates. What remains is Directorate of Civil Aviation and Ministry of Education program sanction and approval. The Ministry of Labor advises that these approvals will be forthcoming shortly, and also that the candidates' passport and exit permit applications will be expeditiously handled.

2. Work Permit approvals continue to be a problem. The new application procedures are not moving along smoothly at all. Unfamiliarity with this new system together with the large amount of paperwork necessary for each application has resulted in confusion and mishandling at all stages in the procedure. We have our hands full with this further compounded by the government's attitude toward TCNs.

3. [redacted] recommended and instituted a follow-up procedure which, assuming cooperation from the application handling personnel, will enable us to maintain better control over the Work Permit applications. Heretofore we had depended on USAID for this control, but with little positive result. Hopefully with our direct control throughout all stages of the procedure we will be able to enjoy success.

4. Personnel Strength (See Attachment C)

IX. TECHNICAL SERVICES

1. August was a quiet month without any major crisis or serious incidents. Our cost reduction program continued with emphasis on personnel reductions. The goal we set for ourselves was $90,000 a month reduction by 31 October 1969, and to date we have finalized plans for slightly over $70,000 monthly, but our "goal" is a long way off. The manpower is approaching the balance point in respect to our current overall workload. RMD and GMD have shown the best results in tightening of the purse strings as related to cost (personnel) cuts. Da Nang and Nha Trang Technical Services Depts have also done very well in reductions of personnel.

2. The flying hours for August was about 6,327 total, which is the range we are trimming our manpower for. This was near the figures for June and July. One of our competitors (CASI) is supposedly pulling up stakes at the end of October and we are hopeful that some contract arrangements can be put together, so as to enable us to acquire most of their current flying contracts. At this point our chances are probably 50-50.

3. Our revetment (perimeter) wall along the northwest edge of our ramp is nearing completion. This wall is made of pre-cast reinforced panels that insert between poured columns. The wall extends from the USAID warehouse along N.W. ramp to the west end of the RMD ground equipment parking area near the Utilities Building. Ramp lights are being mounted on poles on top of every fourth column, as part of the perimeter lighting A.R. project.

4. The newly concreted west ramp is now being fully occupied with aircraft. China Air Lines was assigned four parking spots (2 - C46 & 2 - C123), this permits us to park 2 - DHC/4 and 6 C46/C47 aircraft. This has really helped to relieve most of the conjestion from the area in front of the USAID warehouse. Now if we can obtain funding for lighting, and electrical (power) system and some other utilities, the west ramp would be very good.

5. The RMD Ramp Crew was issued some "AAM SGN made" day-glo vests to identify themselves to flight crews and other associated functions. These vests are worn over their white uniforms. The orange (day-glo) and white color contrast gives them a very professional appearance as well as improving overall ramp safety.

MONTHLY ACTIVITY REPORT

1-31 AUGUST 1969.

PART I

- AIRCRAFT INCIDENTS -

Date	A/C No., Type & Contract	Place	Description
11 Aug.	N1307X 204-B 4301	Between V-246 & BT3210	While moving sling loads between V246 & BT3210 acft received one hit thru the belly striking a main spar. No personnel injuries.
17 Aug.	N1305X 204-B 4101	XS 6744	Acft sustained three hits in rotor blade tip, while circling village at customer direction. No personnel injuries.
17 Aug.	N8535P 204-B 4102	Soccer Field at V-23	While on ground, one round of unknown caliber rocket fire impacted on S.E. portion of field. No acft damage or personnel injuries occurred.
18 Aug.	N1303X 204-B 4101	BT 3108	After touchdown at IZ, 03X received sniper fire, which impacted in front of acft. No acft damage or personnel injuries occurred.
27 Aug.	N539Y DH2-4 4203	Landing V-20	The left inboard main tire rec'd one round of groundfire while landing at V20. Damage repair completed at V17. No personnel injuries involved.
28 Aug.	N1305X 204-B 4301	NE of V-149	Acft was flying below weather when PIC observed four flashes from ground fire being directed at 05X. PIC applied max power and executed immediate climbout. Acft continued mission without further incident. No acft damage or personnel injuries involved.

PART II
- SITUATION SUMMARY -

Few major attacks occurred during August, however many scattered and separate incidents took place. DANANG AB received a 14CMM rocket attack. CAM RANH BAY received both rocket and sapper attacks including attacks on the 6th Convalescent Hospital with plastic charges. Many base camps and fire support bases in III Corp received scattered rocket and mortar attacks. In SAIGON a USAF Language School in front of the Dong-Khanh Hotel was sabatoged with a sixty pound plastic charge, killing eight and wounding sixty-two. During this period SAIGON received rockets in the dock area and terrorist remained active with several grenade incidents reported. Significant enemy buildup occurred in parts of IV Corp with several major population centers including CAN-THO, receiving rocket and mortar attacks. For the present time enemy activity is expected to remain at a moderate level. Emphasis is expected to remain on small unit action. Attacks by fire, sapper actions, and ground probes against small unit installations is expected to continue.

MEMORANDUM

TO : BM/SGN

DATE: 04 August 1969

FROM : A/SZDAD

REF. No. SZDAD/69/084

SUBJECT : DANANG Station Monthly Report for July 1969

GENERAL

No incidents involving hostile activity against the DaNang Air Base were reported during the month, but rumors persist that large scale rocket and perhaps ground attacks could be forthcoming at anytime. A few, relatively close, B-52 raids did shake the buildings and windows substantially but no damage resulted.

The DaNang City and Air Base curfews remain unchanged, being 2100 to 0600 hours and 1900 to 0600 hours respectively. The base curfew is still applicable to indigenous personnel only, and no curfew incidents involving personnel downtown were reported. Two [redacted]mployees were arrested and detained for a short period of time by the Vietnamese Police for an alleged House Record discrepancy.

The number of Southern Air Transport flights increased tremendously over the previous month for a total of 26. A similar number of such flights is expected in August. Traffic has had to resort to utilizing TCN personnel to assist in handling these flights and RMD will most likely lose the services of one crew chief a good part of the time during the last half of August if the present scheduling of these flights continues. Authorisation has been received from VNAF security to permit three Traffic utility personnel to remain on the base overnight when required.

American personnel were barred from using the MACV Field Ration Mess located near the main company hostel for two days, but customer co-signed travel orders, specifying that crew members were on bonifide TCS status has resolved the problem to date. Permanently assigned American personnel have the option of electing either Field Ration Mess or Commissary Privileges but are not entitled to both.

LEGAL

Due to the difficulty in selecting a suitable alternative to relinquishing the company hostel [redacted] in the time available, it was decided to rent these premises for another six months, the duration of the present lease renewal. In the interim, it will be possible to more precisely determine what the expected flight crew RON requirements will be.

No further information has been received from Barclay & Company regarding their proposal to assume the operation of the DaNang Terminal Snack-Bar. It is planned, however, to draw up a preliminary agreement for approval the next time their representative visits this office. From comments made

..... Cont'd.

by representatives of the Base NCO Club, little or no improvement can be expected from that quarter. They seem to be of the opinion that the Snack-Bar operation is insignificant compared to their other commitments and would just as soon be rid of the responsibility for running it.

CUSTOMER RELATIONS

The VN-41 Air Operations Officer has indicated that he will make an official complaint if the handling of SAT flights in any way interferes with the Air America Traffic operation. Two of the three personnel from Traffic, who presently meet these flights, are technically Ground Services personnel, and although it is not always possible for them to work a full eight hours at Air America and also meet SAT flights at nine o'clock at night and five o'clock in the morning, the basic Traffic responsibility has not been affected.

VN-41 has also shown some interest in modifying the station passenger terminal in order to obtain a layout similar to that at Nha-Trang, i.e., a completely enclosed, air conditioned waiting room. Such a project would require the removal of half of two walls which provide the main support for the roof of the building in addition to the air conditioning. The modifications could be done, but it would be quite expensive and would most likely require customer funding.

FACILITIES

The nose hangar Lean-to was eighty five percent complete at the end of the month and should be ready for final acceptance by mid August. One steel angle will have to be removed temporarily from the Nose Hangar to permit the attachment of the siding required for the east end of Lean-to since the materials received from Nha-Trang were short a few items.

Work was started on the Danang Station Electric Power Distribution Project. A rather major modification was made whereby using existing underground power cable it will be possible to eliminate all overhead power lines. Not only will this method contribute to the better appearance of the area, it should also require fewer manhours to accomplish. The installation of the 100 KVA transformer by S.I.P.E.A. should be completed in early August.

Since the station paving project has been deferred for an indefinite period, consideration is being given to the possibility of obtaining sufficient gravel, in exchange for the cement presently on hand, to cover the highly travelled areas and planting grass in the remaining

SUBJECT: DANANG Station Monthly Report for July (Cont'd)

portions. This plan would not provide for any needed drainage but it would reduce the amount of dust and mud now experienced.

FISCAL

The station time clock was received, converted to 60 cycle operation. A time card system was initiated on 1 August as a trial basis to determine what problem areas might arise. Several generator shutdowns have made it necessary to adjust the clock frequently, but by 16 August it should be possible to start keeping employee time and attendance records with time cards rather than attendance rosters.

[redacted] payroll for the month totaled: [redacted]

Petty Cash expenditures for the month totaled: 27,307$VN

OPERATIONS

Total revenue flying declined nearly 100 hours as compared to the previous month. Although AID flying increase slightly, Embassy requirements were reduced approximately 30 percent. Revenue losses were 45+30 hours as compared to 8+00 hours during June.

The following is a breakdown of flight time generated by this station during July:

VN-41/AID	811+11
VN-41/Embassy	230+59
0005	Nil
Non-revenue	6+04
Total	1048+14

Revenue losses for the month are broken down as follows:

Maintenance	Nil
Weather	42+00
Customer cancellations	3+30
Other	Nil
Total	45+30

COMMUNICATIONS

After some serious problems at the beginning of the month, the Motorola Remote VHF/UHF has remained in operation continuously. Both SCC and Ground Radio personnel agree that the system is now working satisfactorily.

Incoming and outgoing messages totaled 2257 and 1610 respectively.

SUBJECT: DANANG Station Monthly Report for July (Cont'd)

TRAFFIC

With the exception of the numerous SAT flights scheduled into Danang, workload remained fairly constant. As a result of close coordination with both customers, a set of procedures regarding passenger processing, baggage limitations, and manifest close-out times were formulated which have greatly reduced many of the minor problems previously encountered. An electric Marketeer was received from Saigon which has significantly increased the efficiency of the station's baggage handling system.

Passenger and cargo statistics for the month are as follows:

	Passengers In	Passengers Out	Cargo In	Cargo Out
VN-41/AID	2,821	2,856	202,504	319,118
Embassy	508	537	6,683	6,056
0005	37	37	Nil	Nil
0069	7	8	Nil	Nil
Ferry	38	38	Nil	Nil
AAM	100	129	10,933	20,207
Total	3,511	3,605	220,120	345,381

6 Continental Air Services flights were handled by this department during July.

SECURITY

A Blick Time Clock was received during the month and the eleven key stations associated with this system were installed at various locations around the facility. Night surveillance of the area can now be closely monitored since a permanent record tape is printed when the security guard punches in at a given station. This system may prove sufficiently effective to eliminate any requirement for separate CONS warehouse security personnel.

PERSONNEL

A significant reduction in personnel, both TCN and indigenous, was accomplished during July. Total personnel strength declined from 167 to 142. The individual separations were handled smoothly and with a minimum of ill will.

SUBJECT: DANANG Station Monthly Report for July (Cont'd)

The personnel breakdown for Danang station at close of business, 31 July, was as follows:

[redacted]

Permanent	5	15	24	88
Pre-Process	0	0	0	10
Temporary	0	0	0	0
Daily-Hire	0	0	0	0
TOTAL (142)	5	15	24	98

TECHNICAL SERVICES

RMD handled a total of 670 arriving and 669 departing flights, of which seven of the latter were delayed due to maintenance. A total of three out station recoveries were performed including one C-47 cylinder change at Cha-Lai. No engine or propeller changes were required during the month. Heavy services totaled eight, all but two of which were performed on 2048 aircraft.

RMD expended a total of 1469 manhours, of which 105 were utilized in hostel maintenance.

Although the expected credit from MSA was not received on the June invoice, positive assurances were given that substantial portion of it would be included in July. In order to minimize these problems in the future, the company operated GMC truck will be utilized to make all pick-ups from MSA since most requests for credit result from over-shipments and billings for items not received.

PEMD accomplished the re-painting of the three station Mitsubishi Jeeps and one micro-bus. All company operated vehicles are now painted blue.

MONTHLY REPORT
NHA - TRANC
JULY 1969

GENERAL

July was an active month which saw the completion of two major projects. The nose hanger Lean/To and the Scooter Shed were completed and the ARs closed. Both projects were finished well within the allocated funds. The remaining open AR for power and light distribution will be completed in August.

There has been considerable military activity in the hills surrounding NHA, all being visable from the airport but, little activity in town.

Hostel II contract for 1969/70 was completed and conformed with no increase in rent.

A good month.

TRAFFIC

A. GENERAL

Station Traffic activities have increased over the previous month. Aircraft arrivals/departures,cargo and passenger handeling were much higher than June but, still remain considerably lower than the same month in 1968.

The position of Traffic Manager has removed from the 4101 contract. This was in accordance with a letter submitted to BM/SGN.

In line with the cost reduction program, TM is to be cross-trained with OM duties with the shorter flying time and hours, it is felt that one American personnel can handle these positions at NHA. This requires, of course, greater operations support from SGN Operations, POD, and Managment at NHA and SGN are cooperating in this venture which can mean considerable savings to the company.

STATISTICS

PASSENGERS	JULY	LAST Mo.	1968

CUSTOMER RELATIONS

No major problems in this area this month. The one remaining sore spot thereby two of AAH personnel are physicallt working in the Cords/Usaid area is being worked on. Paperwork to change these to the Cords/Usaid payroll has been submitted.

OPERATIONS

A. COMMUNICATIONS

The Motorola VHF has performed well during this period with only minor outages. We are experiencing an inordinate amount of interference on the HF. Several local stations cut in making flight watch very difficult.

B. GROUND TRANSPORTATION

One driver was excessed leaving four regular drivers. This requires paying a limited amount of overtime each week, but is on the whole, a savings to the company.

C. FLIGHT FREQUENCY (See attached)

D. ARRIVAL AND DEPARTURE COMPARISON

VIETNAM

INTRODUCTION

Vietnamese communist attention to President Nixon's Asian tour includes attacks at the Paris talks on 31 July by both the PRG and DRV delegates. But only PRG Foreign Minister Mme. Binh acknowledged--and deprecated--the President's statement in Saigon that it is time for the communists to respond to allied initiatives. Xuan Thuy claimed that by talking about "problems after the Vietnam war," President Nixon is trying to make people believe that peace will come soon. President Thieu's 11 July proposal for elections in which the NFLSV would participate was again attacked at the session on the 31st. And propagandists as well as the communist delegates castigate Ambassadors Lam and Lodge for repeating their "unreasonable demands" for mutual troop withdrawal and "so-called" free elections and for refusing to accept the NFLSV 10-point proposal.

VNA on 4 August reports that the three American prisoners of war, whose pending release had been announced on 3 July, had been handed over to U.S. representatives of a peace organization. VNA reports that Mme. Bui Thi Cam, identified as a member of the Secretariat of the Vietnam Committee for Solidarity with the American people, said captured U.S. personnel "are treated in accordance with the humanitarian policy" of the DRV.

Attention to the situation in the North includes propaganda commemorating the fifth anniversary of the Tonkin Gulf incident (2 August) and the coincident 14th anniversary of DRV Navy Day (5 August). Hanoi also marks the 22d anniversary of "war invalids day" (27 July) with "instructions" from Premier Pham Van Dong on observance of the anniversary and a QUAN DOI NHAN DAN editorial claiming good results in implementing the policy toward war dead and disabled and their families.

Hanoi makes more claims to have downed U.S. planes, with the alleged downing of an unmanned reconnaissance plane over Nam Ha Province on the 6th bringing the total to 3,313.

The lull in the fighting in the South is reflected in a paucity of battle reports. But a VNA item on 1 August claims that during July the PLAF and the people in the South "continued their unremitting and powerful attacks on the enemy in all battlefields." Hanoi on 29 and 31 July broadcasts a review of the military situation by "Quyet Thang" (Determined to Win) which reportedly is also published in the July issue of the QUAN DOI NHAN DAN magazine.

Approved for Release
Date
26 SEP 1997

Attention to political developments in the South includes the 2 August LPA report of a PRG communique, dated 24 July, on an "ordinary session" of the Council of Ministers on the 22d and 23d which heard a report on the Paris talks from Tran Buu Kiem. Reports of additional provincial revolutionary committees are broadcast, but there are still contradictory propaganda claims as to the total number. The recent arrest of many GVN personnel suspected of being a part of a communist espionage ring is treated as further evidence of a policy of terror and repression by a government which, propagandists claim, is rent with rivalry and disunity.

PARIS TALKS

THIEU PROPOSAL

At the 28th session of the Paris talks on 31 July, Mme. Binh once again voiced the PRG's rejection of President Thieu's election proposal; and this time she called the "rejection" a serious one "stemming from the responsibility of defending the real right to self-determination of the South Vietnam people." DRV delegate Xuan Thuy expressed his "full agreement" with Mme. Binh's analysis of the question of the Vietnamese people's right of self-determination. Both delegates said the election proposal is aimed at consolidating and maintaining the GVN, and Mme. Binh repeated the charge that proposed elections would be "fraudulent and void" like those held by the Diem regime and, more recently, by the Thieu-Ky government. She also claimed again that the Thieu proposals require that the South Vietnamese "people" lay down their arms while the GVN uses its army and police to "control" the elections. She made no reference to Thieu's provision for an electoral commission, although this had previously been acknowledged and denounced.

The VNA account of the session says GVN delegate Pham Dang Lam "again rehashed the shopworn allegations about the so-called proposal for free elections" made by President Thieu, a proposal which "has been laid bare and flatly rejected" by the PRG and DRV. It notes that Ambassador Lodge also "repeated his old arguments aimed at dolling up" Thieu's proposal and that he "responded negatively to the logical and reasonable" 10-point proposal of the NFLSV and "tried to dodge the demand" for an unconditional troop withdrawal.

A 2 August Liberation Radio commentary claims, inaccurately, that the allied ambassadors at the 28th session said "the last concessions" had been offered. Mme. Binh in her presentation noted the President's remarks in Saigon that the allied side has gone far enough to open negotiations leading to peace and that now it is the other side's turn to respond. She went on to denounce the United States for continuing and intensifying the war, adhering to its "position of a colonialist aggressor," opposing the legitimate demands of the Vietnamese people, and "unceasingly" obstructing the Paris talks.

Approved for Release
Date 26 SEP 1997

Xuan Thuy did not acknowledge the President's remarks on a settlement, but VNA notes that he said the trip to Saigon was clearly "of no use for the settlement of the South Vietnam problem." VNA says Thuy "analyzed Nixon's latest deceitful allegations about peace," which by dealing with questions that would arise after the Vietnam war "were designed to make believe that peace would come soon." Thuy charged that this was "only a crafty move to appease Americans and world public opinion."

U.S. "OBSTRUCTIONISM" Both the PRG and DRV delegates again pointed to communist "goodwill" and claimed that it is the United States which is obstructing progress at the talks, and this charge is repeated in the Liberation Radio commentary on the 2d. Mme. Binh stressed those sections of the NFLSV's 10-point solution and its call for a provisional coalition government as representing the correct basis on which the people can express their political self-determination. Xuan Thuy hailed the "good will" of the NFLSV and PRG, which had proposed the formation of a provisional coalition government that will "organize and control the free general elections to elect an official coalition government." He declared that this is the "most correct, reasonable and appropriate measure to settle the problem." Mme. Binh, in a defensive aside, denied as "mere invention and distortion" the view that the proposed coalition government would be the government of a single group or political force.

Both the VNA and LPA accounts note Mme. Binh's remark that if the United States really wants to settle the war, it must, on the basis of the 10 points, "hold direct talks" with the PRG, "the genuine and competent representative of the South Vietnamese people."*

In charging U.S. obstruction of the talks, Xuan Thuy stressed that the DRV had come to Paris "with good will and a serious attitude to find, together with the other parties, a peaceful solution to the Vietnam problem." In an apparent response to Ambassador Lodge's charge at the last session, on 24 July, that the other side was unwilling to negotiate on the basis of the proposals before the conference and had in fact rejected them flatly, Thuy said "we have carefully studied and analyzed all the proposals put forth by the representatives of the United States and the Saigon administration." Thuy continued, according to VNA, that "not only refuting these proposals," the DRV Government had

---

* This demand for direct U.S. talks is recurrent. It is contained in Article 1 of the PRG's 10 June program and was last raised by both Mme. Binh and DRV delegate Ha Van Lau at the 12 June Paris session. It was also made in a 16 July LPA release of a "war crimes" communique, and by Mme. Binh in an unpublicized interview which appeared in the NEW YORK TIMES on 20 July.

Thai Insurgents May Open New Area of Operations

Communist insurgents may be planning to set up a new area of operations in northeast Thailand. A recent compilation of reports indicates that since early this year perhaps as many as 200 North Vietnamese - trained cadre have been infiltrated across the Laotian border into southern Ubon Province.

The capture of some modern weapons, the recent attack on the Ubon Air Base, and reports by low-level village informants of Communist proselytizing could be harbingers of a substantial insurgent effort in southern Ubon. Such an effort would be facilitated by Ubon's proximity to Communist bases in Laos and by the familial and other ties of many people on the Thai side of the border to Lao Communists.

There is no evidence to indicate what the Communists expect to achieve if they do establish a new area of operations. They may hope that southern Ubon can be developed into a firm toehold for further expansion in the strategic northeast region. They have been trying for several years to build a viable organization in other northeast areas but have not made much progress.

One reason for the Communists' difficulties has been the activity of the Thai Army, which has pressed them hard, particularly in the northeast. There is some evidence, however, that the army now wants to cut back its effort in this area. The army's chief of staff reportedly has seized on the deteriorating situation in Laos as an excuse to put into effect contingency plans calling for the partial withdrawal of army units engaged in the counterinsurgency effort. If such a withdrawal takes place, it would give the insurgents a respite from government pressure.

The government, meanwhile, has once again restructured its counterinsurgency apparatus. A Communist Suppression and Prevention Command has been established under the direct control of Deputy Prime Minister Praphat. Aside from further strengthening Praphat's voice in Thai affairs and ostensibly "regularizing" the counterinsurgency effort, it is not yet clear what this new setup will accomplish. Communists Setting Up New Insurgency Area in Thailand

NND 941536 --- 362

Chinese Communists Expand Hydrofoil Patrol Boat Program

The Chinese Communists have designed, developed and are producing two types of hydrofoil patrol craft. In addition they may be refitting some of their old Soviet-designed P-6 motor torpedo boats with hydrofoils.

The hydrofoils are designed to lift the bow of the patrol boat out of the water, giving higher speeds and greater stability.

The Chinese began work on hydrofoils for military craft at least as early as 1964 when the first type--designated the Hu-chuan class--was initially identified. This boat probably went into serial production in 1965. The Chinese are turning out about 20-25 per year at the Hu-tung shipyard in Shanghai. Thus far about 65 Hu-chuans have been deployed to all three fleet areas. The Chinese have also exported six of these boats to Albania and reportedly have agreed to deliver 24 more. Three have been given to North Vietnam.

Another new hydrofoil motor gunboat, the Shan-tung class, first appeared in December 1966. Only two units have been seen so far, but it is possible that this class is now in production. Unlike the Hu-Chuan, which is a torpedo boat, the Shan-tung carries only light armament and no torpedo tubes.

There are indications the Chinese may install hydrofoils on some of their old Soviet-designed P-6s. One P-6 has been seen with hydrofoils installed, probably as a test model. If the test is successful, additional P-6s and other motor gunboats may be similarly equipped. (~~SECRET NO FOREIGN DISSEM~~)

Military's Political Role in China Poses Problems

The Army Day rally on 1 August shed little new light on problems currently besetting Peking, but there are indications that the army's performance on the domestic front remains a source of concern at the highest level. The appearance in Peking during the celebrations of high military leaders from some of China's most troubled provinces also suggests that the central authorities are still trying to untangle local political disputes in which the army plays a key role.

The authoritative joint editorial marking the occasion attempted to balance the military's continued heavy involvement in

NND 941536 --- 3828

SAIGON BASE
MONTHLY REPORT
SEPTEMBER 1969

I. GENERAL

1. We logged 6346 block hours in September which represents 75 hours less than the month of August, however revenue time went up six hours. On the other hand, customer passenger handling declined 18.3% and cargo handling declined 11.8%.

2. Ennemy activity in Saigon has been on a steady decline and appears to have reached the level which existed prior to the nefarious 1968 TET offensive. Two rockets impacted in outlying districts causing negligible damage. There were three terrorist incidents involving plastic charges resulting in eight Vietnamese killed.

3. We were approached separately by RMK and the Postal Division of MACV concerning the possibility of providing airlift service. Both agencies are conferring with USAID to determine the feasibility of an agreement for AAM to provide this service under the new USAID contract. (It appears at this moment RMK's current airlift contractor will stay in business with RMK for at least one more year.)

II. FACILITIES DEVELOPMENT

1. We are happy to announce that the much-needed RMD toilet and aircrew shower facility is completed and in full use. The TSN common use water distribution system has been completed and AAM, AVN, PanAm and Air France are receiving adequate supply of water with good pressure. Initial USAF tests indicate this water is potable. The Electric Power Distribution System at Danang with commercial power input, is completed. Also the Hangar Lean-To at Danang is completed. (Attached hereto is a pictorial display of a number of current facilities developments).

III. GENERAL AFFAIRS

1. Exemption of taxes on airfield meal and transportation allowances was granted by GVN as of Sept. 1, 69. As a result of this exemption, Vietnamese employees monthly pay was increased from a modest amount VN$20 to a substantial VN$700 depending on the employees' pay and family status.

2. The company is requested to forward to GVN Customs in SGN, TSN and DAD schedule of its international (maintenance) flight 48 hours prior to departure or arrival. Apparently, this measure was taken after 360kgs of opium was found mixing up with company cargo originated from VTE aboard a Royal Air Laos regular flight. The unofficial opinion of the Customs officials is that organized smuggling on this scale cannot operate without cooperation between smugglers, airport customs and airlines employees.

3. Letter of renewal of lease for Phu Kiet Office was acknowledged and accepted by land-owner. The next step is to negotiate the incorporation of a right of renewal clause into the lease as suggested by LGA-TPE.

IV. OPERATIONS

1. Total revenue block time for September was 6134+45 compared to 6128+34 for August. Our revenue forecast for the month was 6120 hours. The revenue time for Porters was 382 hours less than the previous month; this is because the customers were behind on their quarterly minimums for Volpars + Beechs and these aircraft were used for flights normally flown by Porters. We can expect our flight time forecasts to be less accurate in the coming months since we will be operating under new contracts with many schedule changes.

NHA/OM resigned, the SZ and TM are taking over the OM duties; therefore an OM replacement is not planned for the station and the position has been eliminated. To date we have reduced our working force by 4 Americans, 5 TCNs and 3 locals. Plans for reducing additional personnel are underway.

2. An extensive study has been made of the GTD operation. Realighment has already begun and reductions are planned. New procedures have been implemented with more to follow. Due to the scope involved it is anticipated that the majority of changes will not be effected until the latter part of the coming month.

3. We expect to reduce our spare aircraft fleet by sending 3 C-45s to Tainan this month and we will possibly deposition one Helio to Viehtiane.

There were 21 controllable and 38 non-controllable delays for the months out of a total 913 Saigon departure.

4. Flight time report (See attachment A)
Aircraft Incidents report (See attachment B)

V. TRAFFIC/AAM

1. A letter suggesting changes to the Contract of Carriage Form was forwarded to DTD on 6 Sept. 69. Implementation of the changes would save considerable storage space and allow for a more streamlined operation.

2. [redacted] was transferred to SAT as TM, after a week's orientation at Tachikawa prior to physical movement. General overseeing and assistance to him will be rendered by this office as discussed with DTD.

3. Terminal painting is still not started due to lack of customer provided paint. Discussions with the CORDS representative indicate paint will arrive during second week of October.

4. Many of the same problems remain regarding procedures, logistics and movement of International Company cargo. Daily efforts are made to resolve long range and daily problems and it is felt that thru the operation of the customer and other Air America sections that progress is being made.

5. The Water Supply seems to be adequate now however, we will watch the pressure and flow for another month before a good evaluation can be made

	August	September
Passengers departure SGN (All contracts)	6153	5,837
" arrival SGN (All contracts)	6731	5,980
Outbound cargo SGN	69543	94,217
Inbound cargo SGN	88103	90,205

6. TRAFFIC/USAID

	Cargo (including Af Caribou A/C)	
	August	September
outbound (lbs) SGN	1,626,899	1,369,868 lbs
Inbound (lbs) SGN	540,886	519,743 lbs

VI. HOSTEL OCCUPANCY

1. During the month of September, 1969,44 beds out 120 beds were utilized for a 40% occupancy rate.

VII. SAFETY

1. Pilot Meetings - 204B - 22 Sept. The following items affecting flight safety were discussed:

a. Pilots were reminded of the necessity for assuring there is a seat belt for each passenger aboard.

b. The FAA regulation regarding drinking prior to flight were reviewed. (Twelve hours from "bottle to throttle.")

c. Pilots were warned to observe the utmost caution in the vicinity of air strikes and military airfields because of the recent rash of mid-air collisions.

d. Pilots were reminded of the proper procedure for checking autorotational RPM.

e. Pilots were cautioned about accepting aircraft with obvious FCU discrepancies such as: (1) More than 1% RPM surge, or (2) a drop in NII with booster pumps turned off.

2. Accident Investigation - 1) Local Board of Review for N9521Z is scheduled for 10 October. 2) Estimate N7770B Review Board on 14 October. 3) Estimate N1306 Review Board on 20 October.

VIII. PERSONNEL

1. Activities were largely routine with, again as last month, the exceptions of the time spent on Work Permit applications and on the Vietnamese Line Maintenance Training Program. Progress has been slow in both areas due to the everchanging procedures, forms, requirements, etc. However, we plug along with undiminished faith that there are indeed silver linings.

2. Some progress has been made toward obtaining Gia Dinh Labor Service approval of our Rules of Employment. We have met with the Labor Service Personnel several times in the past few weeks and have ironed out most of their points of contention. A few points yet remain which we hope will soon be resolved.

3. By directive of the Ministry of Labor (MOL), all foreign workers in Vietnam must have in their possession, by 15 October 1969, a Workers' Card (at VN$1000 per copy). So, during the last week of September we compiled and submitted to MOL applications for all of our expatriates (to which we attached a check for VN$ 619,000). For our efforts and expense we were rewarded with blank Worker's Card forms which we must complete and return to MOL for their validation stamp. A businessman's dream becomes a government reality.

4. See Personnel Strength Attachment C.

VN$ 19,470,848.00
Free Market Rate: VN$ 226 to US$1.00

X. TECHNICAL SERVICES

1.September started off about as bad as it could possibly be, Volpar N7770B incurred substantial damage when the nose gear collapsed during a post service engine run up by RMD. We were lucky in that no one was seriously hurt, but the two props contacted the ground and more or less disintegrated. Both engines were badly damaged from sudden stoppage and the fuselage nose section buckeled inside with shrapnel damage outside. About seven days of hard work, totaling some $60,000.00 US is estimated for this accident. The investigation has been completed at Saigon and various actions are underway (at SGN and TMN) to prevent recurrence.

2. The new RMD toilets have finally been completed and opened for use during the last part of the month. Of course it seems smaller than we would like and it is not equivalent to the Hongkong Hilton but it is a big improvement for which most all of us appreciate.

3. A reshuffle of the various RMD Shop functions is underway to provide a more direct access for 204B work, a better working arrangement for the Sheetmetal Shop, a relocation of the Tire Shop and expansion of the Paint Shop (to accommodate the new spray booth).

4. A new hard fresh review of the supply handling, arrangement and procedures is being made by the new Superintendent of Supply Mr. A.C. Anderson. He has brought up some fine ideas that should be a big improvement to the overall effort.

5. Our total flying hours for the month again was quite stable, with only a drop of some 40 hours from the previous month.

XI. FLYING

1. Speculation and anticipation ran high on the outcome of the new contract. The proposed pay increase has been somewhat over shadowed by the impending resolvement of the standby time. The star of this particular show is the VTB program. Numerous studies have been presented in regards to this, the latest of which was hand carried to Taipei by the Base Manager to be considered in the contract negotiation.

2. The Base Manager's efforts proved fruitful. On his return his briefing included the well sought for answers. In essence there will be no airport standby for customer requirements. If an aircraft is not scheduled there will be not requirement for a crew to standby just in case something does come up during the day. We will continue to schedule airport standby for Company requirements in order to meet the published schedule. Emergency requirements ordered by the customer will be excepted. Education of the customer is now in order.

3. The ATC (Air Traffic Control) working group of JAOG (Joint Air Operation Group) is to submit their recommendations to JAOG on 6 Oct 1969. The point proffered is to insure closer control of aircraft at uncontrolled airstrips in RVN. Use of common frequencies, education of various publications and directives, emphasis on courtesy and realignment or updating

of equipment were the main considerations. Note the consideration "realignment or updating of equipment". This is a recommendation that Air America, Inc. be directed to equip their aircraft with an FM radio as this is common to all military aircraft, controllers, portable towers and other military agencies. All recommendations are to enhance safety.

E.J. Theisen

SAIGON BASE FLIGHT TIME REPORT
SEPTEMBER 1969.

1. Contract 4101 -

FLIGHT INFORMATION CENTER

- S A I G O N -

- MONTHLY ACTIVITY REPORT -
1 - 30 SEPTEMBER 1969

PART I
- AIRCRAFT INCIDENTS -

Date	A/C No., Type & Contract	Place	Description
02 Sept.	8084 C-47 4101	AR 9663	Acft was in a turn enroute to V04 when Capt Greenway and a passenger heard automatic weapons fire directed at the acft. PIC increased the rate of turn and departed the area. No acft damage or personnel injuries involved.
07 Sept.	N539Y DHC-4 4101	BS 7270	Acft was enroute to V23 flying below weather when three rounds of automatic weapons fire impacted in the fuselage. No personnel injuries involved. Acft continued mission without further incident.
16 Sept.	N9956Z VIB 0069	AR 0333	Acft was on final approach at V219 when the PIC heard six rounds of small arms fire pass near his acft. Capt Gustafson notified the twr & landed safely without further incident. No personnel injuries or acft damage involved. Twr launched two military acft to look for sniper, but negative contact was rptd.
22 Sept.	N391R PC-6 4101	UNK - DELTA, RVN	Acft flew most direct route from V17 to V20 (Vinh Long) to V183 (Binh Duc) to V14 (Truc Giang) and back to V17. At no time did pilot notice anything unusual. Bullet hole was discovered by mechanic at V17 during post flight inspection. Bullet entered upper skin of right wing, penetrated 3 stringers and exited at leading edge, tearing a four inch hole in same.

PART II

- SITUATION SUMMARY -

I CORP - With the exception of 6 Sept., enemy initiated activity remained at a low level. On 6 Sept. a total of 16 attacks by fire and ground sappers were reported in the Danang area. Approximately 43 rockets and 270 mortar rounds impacted in the area. The outlook is for activity to remain at a low level throughout the corp with attacks by fire and small unit contact dominating activity.

II CORP- This reporting period saw little significant activity in II Corp. However harassment of the coastal provinces continued. The National Police Training Center in Dalat received 40 rounds of mortar fire on 6 Sept. and on 14 Sept. Ban-Me-Thuot airfield received 11 rounds of mortar fire. It is likely that the present low level of activity will continue. Propaganda, proselyting, and harassment of coastal population centers and remote allied installations will continue.

III CORP - Activity in the Corp has been sporadic with several nights of little activity and several with relatively high levels. This peculiar behavior can possibly be attributed to the death of Ho-Chi-Minh. Bein-Hoa received 18 rounds of rocket fire on 6 Sept. Terrorism in Saigon continued with several incidents reported. In keeping with the enemy's intent to destroy the people's faith in the GVN, terrorism was directed mainly at government officials and PSDF troops. The road between Bien-Hoa and Saigon remains insecure as evidenced by the Sept. 26 midday attack on an ARVN convey. That attack damaged or destroyed 15 out of the 20 vehicles in the convoy. The enemy will likely to continue his present low level of operations as he resupplies, retrains, and makes preparations for his next series of operations.

IV CORP - Activity was scattered throughout the corp and was typified by small unit involvement. The enemy's main efforts are being directed at objectives which will enhance a long term political rather than a military victory. The Chi-Lang ARVN Training Center was attacked on 11 September. Activity is on the rise in the Chau-Doc area with the threat of ground attacks and attacks by fire high. It is probable that the enemy will continue to limit concentration to harassment and attacks by fire in order to keep friendly forces off balance.

NHATRANG

SEPTEMBER 1969

GENERAL

September witnessed a further decline in revenue flight activity however, there was an overall increase in cargo and passengers. This results from an increase in C/47 and C/46 utilization with decreased VIP activity. It would appear that we have just about reached the bottom of a graphic curve and should maintain this level or possibly increase our flight time in the coming months. This is a calculated "Guesstimate" based on present and foreseeable requirements of our customers.

Most of the military personnel have moved from downtown Nha-Trang onto the beach. Some units have left Nha-Trang airbase for other areas. All of this has resulted in a light but noticable decline in social activity and hotel availability in the area. Houses are more available but rents have not decreased appreciably as yet.

The cost of commodities on the local market however continue to increase.

TRAFFIC

Station traffic activities declined in arrival and departure of flights but there was an increase in overall passenger and cargo activity. This is reflected in the following statistics.

STATISTICS

Passenger	September	August	1968
Departing	3285	3732	3655
Arriving	3514	2285	1192

CUSTOMER RELATIONS

Customer relations this month were supprisingly good. A difficult month due to many weather problems went smoothly with cooperation and understanding on the part of everyone.

FACILITIES

Cdr T. Cheely departed this on 23 September. The O function is now being shared by S2/S4A and T/PA. To date the change over has proceeded smoothly. More time and experience in these positions will provide continued improvements. In addition to the Operations Administrative Guide, Operators Manual etc; we have on hand a copy of the NAVAIR Dispatcher & Examination Study Guide which both S2 and T are reading and studying.

A. COMMUNICATIONS

The Motorola unit was out of service for 5 days this month. It appears to be doing well now and continued maintenance experience by our own personnel will provide more reliable service.

C M D

Nha Trang Station electrical distribution was completed this month. The CCC team did an excellent job. It looks good and works well. All circuits were load balanced and emergency power generators were wired with key areas utilizing this limited source.

MEMORANDUM

TO : BH/SGN

DATE: 05 September 1969

FROM : SZ/DAD

REF. No. SZDAD/69/092

SUBJECT: DANANG Station Monthly Report for August 1969

GENERAL

Hostile activity remained at a relatively low level during the month. There were a few occasions when rockets were launched against the DaNang Air Base, but none of these attacks were large and no damage or casualties were reported. A USMC guard has been positioned at the side entrance to the U.S. Consulate, which is adjacent to the Old Hostel, but this situation may only continue for the duration of a large construction project being performed on the main access road to the Consulate.

The DaNang City and Air Base curfews remain unchanged, and no curfew incidents concerning company personnel were reported.

The anticipated volume of Southern Air Transport flights did not materialize, but sixteen of these flights were handled, a decrease of ten from the previous month. On one occasion, a SAT flight arrived nearly two hours ahead of schedule, at 0440L, and consequently no company personnel were on hand to handle same. The flight departed without undue delay, but MAC personnel were a little disturbed about it. It should be realized that it is impossible to inform the concerned personnel of such early arrivals during the night.

LEGAL

Further progress on the proposal from Barclay and Company to assume the operation of the Terminal Snack-Bar is pending the receipt of a formal agreement from SLC. Should this agreement be acceptable, efforts will then be directed towards obtaining a commissary account from the Naval Support Activity. The VN-41 Air Operations Officer has indicated that CORDS will offer all possible support in this endeavour. It is conceivable but unlikely that the snack bar could be under new management by October.

CUSTOMER RELATIONS

VN-41 has shown strong interest in several facilities improvements, and has indicated that efforts will be made to secure the required funding from Saigon. The main projects under consideration are the renovation of the passenger terminal area (including making more space available to the snack-bar) and paving the unsurfaced areas of the facility. This customer interest in the latter project (action on a pro-forma AR to accomplish same was deferred in July for an indefinite period due to lack of funds) has interrupted efforts to obtain sufficient gravel to cover these areas in exchange for cement presently on hand. Overall relations with AID/VN-41 remain satisfactory.

CS-4 R2

.....Cont'd.

SUBJECT: DANANG Station Monthly Report for August 1969

The permanent Embassy Air Operations Officer has been on temporary assignment to SGN, but continued excellent relations with his replacement have been maintained.

FACILITIES

An Engineer from SGN, with the assistance of RCMD/DAD, prepared a working drawing for the proposed passenger terminal renovation. A cost estimate is now being formulated based on supplying a contractor with all materials obtainable from MSA. It is anticipated that bids for this project will be solicted in September.

The RMD Lean-to project is all but completed. For unknown reasons the contractor has failed to install a stair to the upper storage area which would effectively permit a final settlement.

Only minor in-house work remains on the City Power Project, all underground cables are in place and the company 75 KVA generator (in need of overhaul) has been moved to the new generator pad. S.I.P.E.A. has completed the installation of the 100 KVA transformer so that only two terminal splices and the relocation of the USAF 100 KVA generator are required to make the system operational. Fortunately, the USAF generator's reliability has been quite high during the past few weeks.

FISCAL

With the exception of a few minor difficulties, such as power failures and adjustments, the station timekeeping system based on a time clock is working satisfactorily. The use of attendance rosters for personnel punching time cards has been discontinued.

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures for the month totaled: 41,945$VN

OPERATIONS

Total revenue flight time increased 8+30 hours as compared to the previous month. Customer requirements seem to have stabilized and little variation is anticipated in the future. Unlike other locations, very few special or VIP flights are operated out of DaNang. Revenue losses were the lowest of any reporting period to date and resulted from a Volpar Fuel Control Unit change.

The following is a breakdown of flight time generated by this station during August:

SUBJECT: DANANG Station Monthly Report for August 1969

VN-41/AID	812+07
VN-41/Embassy	230+52
0005	7+37
Non-Revenue	9+52
Total	1,060+28

Revenue loss for the month was as follows:

Maintenance	1+30
Weather	Nil
Customer Cancellations	Nil
Other	Nil
Total	1+30

In order to more equally balance the flying between the two assigned 204B aircraft, an agreement was reached between AID and Embassy whereby AID would fly the Embassy helicopter on Mondays, Wednesdays, and Fridays. AID will now pay half the maintenance ferry cost involved when it is necessary to perform services at Saigon on the Foxtrot Helicopter.

Hostel occupancy factors were 75% and 24.7% for the Old and New hostel respectively.

COMMUNICATIONS

No problems were encountered with Motorola remote VHF/UHF during the month. AESU has commenced preliminary work on transferring the station radio transmitters to their new location in the RMD Lean-to.

Incoming and outgoing messages totaled 1985 and 1527 respectively.

TRAFFIC

Aside from the inauguration of two additional weekly C-46 passenger flights from Saigon, workload has remained fairly constant. A new conditions of Contract form was initiated during the month which requires a few more entries than that used previously, but no real problem in this regard has been experienced. A total of 637 departures were handled during the month.

Passenger and cargo statistics for the month are as follows:

SUBJECT: DANANG Station Monthly Report for August 1969

	Passengers In	Passengers Out	Cargo In	Cargo Out
4101	2,972	3,213	241,754	293,105
4102	486	604	1,477	10,998
C005	9	15	Nil	Nil
C069	8	9	Nil	Nil
AAH	81	116	6,459	29,635
Total	3,556	3,957	249,690	333,738

6 Continental Air Services flights were handled during August.

SECURITY

No problems were encountered in this area during the month; the Blick Time Clock system is working very effectively. No further action will, therefore, be taken to provide seperate guards for the USAID warehouse.

PERSONNEL

Extension of stay approvals are again being delayed, apparently due to a problem concerning work permits for TCN employees. As a result, a few planned leaves have had to be deferred.

The personnel reduction accomplished in July has had no noticeable affect on the overall station operation, and further reductions are being considered for September.

The personnel breakdown at DaNang station at the close of business, 31 August, was as follows:

[redacted]				
Permanent	5	14	22	96
Pre-Process	0	0	0	3
Temporary	0	0	0	0
Daily Hire	0	0	0	0
TOTAL (140)	5	14	22	99

TECHNICAL SERVICES

ABD handled a total of 650 arriving and 652 departing flights during the month. There were a total of five delays of which only one

involved a revenue loss. Two outstation recoveries were necessary but only minor maintenance was required in each case. Seven heavy services were performed, all on 204B aircraft, three of which being number 2 services required maintenance personnel support from Saigon. No engine or propeller changes were required.

MMD expended a total of 1277 manhours of which 136 were utilized in hostel maintenance. The old hostel air conditioners and water pump have been particular problems. Due to four air conditioners being out of service, it was necessary to remove one unit from the new hostel to support the old.

A substantial credit was received on the July MSA invoice, and a further credit for some previous double billings is expected in September. No other problems with MSA account were experienced.

SUBJECT Lessons Used in the Indoctrination of American Prisoners of War

DATE DISTR. 15 SEPTEMBER 1969

[redacted]

DATE OF INFO. June 1968

PLACE & DATE ACQ. Vietnam, Saigon [redacted]

FIELD REPORT NO. [redacted] 1.3(e)(4)

SOURCE [redacted]

1.3(e)(4)

Summary. A series of four lessons is given American prisoners captured in the area of Front 7. The first, after containing a brief historical review, emphasizes the unjustness of the current American participation in the war. The second develops the theme that the war is causing a split in American society. The third dwells on racial discrimination in the US and links the Negroes' struggle for civil rights to the Viet Cong cause. The last concerns the clemency policy of the Viet Cong toward American prisoners. Directed discussions follow each of the lessons. End Summary.

1. The first indoctrination lesson given American prisoners of war (POW's) in the Front 7 area of Quang Tri proposes to show them that their country's participation in the war is unjust and immoral. It is also designed to help the prisoners understand and sympathize with the Viet Cong insurgency. The lesson begins with the situation following the Geneva Accords

5 4 3 2 1

[redacted] 1.3(e)(4)

5 4 3 2

STATE	DIA	ARMY	NAVY	AIR	NS	AID	OCR	

Approved for Release Date August 1993

of 1954, noting that the latter provided for the withdrawal of the French Army and the holding of free elections leading toward unification. It then states that the French abandoned their responsibility for supervising these elections because of the Algerian war and handed South Vietnam (SVN) over to the Americans in order to repay them for their help during the Indo-China War. The course material goes on to characterize the Diem regime as having been established by the Americans, as having been completely dependent on them, and as having been the cruelest in Vietnamese history. The Thieu-Ky Government is then described as representing the elite only, not the populace; and its support by the US is purported not to be in the latter's national interest.

2. This lesson also claims that SVN has become a virtual colony of the US, that the latter has taken over in all aspects of its life, and that this has not been to the good. Examples of this takeover are seen in the American participation in Diem's overthrow, the continued presence of US troops in the country, the complete dependence of SVN economically on American aid, and the corruption of the manners and morals of Vietnamese women (attributed in large part to the influence of American arts and entertainment). The Americans are also blamed for the spread of venereal disease in the country, the lack of adequate public hospital facilities, the growing gap between the rich and the poor, the violation of traditional customs and manners, and the destruction of temples, pagodas, tombs, villages, and populations.

3. Finally, this lesson contrasts what it contends is the just and winning cause of the Viet Cong (VC) with the unjust and losing one of the Government of Vietnam (GVN) and its American supporters. Comparisons are drawn here with the Americans' victory in their own War of Independence and with the failure of the French to defeat the Vietnamese during 1945-1954. Specifically, the lesson states that the Americans cannot win because the unjustness of their cause has alienated world public opinion, because they lack the support of the majority of the Vietnamese people, and because the American public will be increasingly split as the protracted guerilla warfare of the Viet Cong results in continued attrition of men and money. The Viet Cong, on the other hand, are pictured as having the support of world public opinion because of the justness of their cause, as being able to mobilize the patriotic zeal of the Vietnamese people as a result of the "American aggression," and as being experienced guerrilla warriors.

4. The second lesson aims at showing the POW's that the internal cohesiveness of the US is being ruptured by its government's "absurd determination" to continue the Vietnam War. First it claims that America is facing economic disaster because of the war, that tens of billions of dollars a year must be spent on the Vietnam effort, that unemployment and poverty in America are on the increase, that the dollar is depreciating in value, and that America's overseas markets are being lost to France, West Germany, and Japan. Then the lesson points out what it considers to be the political problems caused by the war, that the split within the Democratic and Republican Parties over the war (anti-war congressmen of both parties are noted here) has compounded the pre-existing split between the two parties (which in turn is cited as the cause of the John F. and Robert Kennedy assassinations) and that the American people have shown their opposition to the war and support of the Vietnamese people in many ways; e.g., bloody demonstrations, burning of draft cards, and self-immolations. The lesson concludes that if you (the POW's) [illegible]

1.3(e)(4)

a Vietnamese, you are going against the conscience and concepts of humanity and justice held by most of your fellow Americans. (Field comment. As presented by the source, this lesson seems ill-organized, building up an anti-war case based upon national self-interest and then switching to a moralistic appeal.)

5. The third lesson concerns racial discrimination in America and is designed to make Negro POW's fully aware of "their condition of slavery" so that they will oppose the US Government. The line is pressed here that racial discrimination is caused by the American Government and not by the American people, who respect all races. It is stated that the government fosters racial discrimination as a means of reducing the collective strength of the people, thus making their exploitation easier. The point is then made that Negroes are also human beings, are intelligent, and can contribute to society and that all people have the right to equal treatment according to the letter of the US Constitution. This is contrasted with the "facts" of segregation and the brutality and economic privation to which the American Negro has been subjected. The situation whereby the Negro becomes a soldier fighting in Vietnam is pictured as being of no benefit to him but only to the large industrial corporations which are growing rich off the war. The civil rights movement is praised as a struggle against genocide, and the assassination of Martin Luther King is presented as a sign that the US Government has embarked upon such a course of extermination. Finally, the Negro struggle in America is likened to the struggle of the Vietnamese "people" against "aggression".

6. The final lesson deals with the application of the VC "clemency policy" towards US POW's. The purpose of this lesson is to convince the prisoner that this policy stems from the humane spirit of the resistance forces. It is stated that the POW himself is not considered an enemy and that it is only the "imperialists" who fall into this category. The prisoners are told that despite the fact that they resisted the VC and committed atrocities against them, they will not be subjected to cruelty. Nevertheless, it is announced that three levels of treatment will be meted out to Americans coming under VC control, depending on whether they are "counter-war," ralliers or those willing to serve as penetration agents; "non-resisters," those who desert on the battlefield or who put up no resistance to being captured; or POW's, those forced to surrender on the battlefield. It is further stated that only weapons, binoculars, radios, compasses, helmets, watches, and fountain pens will be taken from the prisoners and that they will be left with what is considered their personal property; e.g., checks, money orders, contracts, pictures, clothes, shoes, field bags, belts, lighters, combs, and money. Finally, notice is given that the VC will do whatever it can to have delivered POW's letters to their families and to accommodate those Americans wishing not to return home but to remain in the "liberated" area.

7. The following procedures are used in teaching each lesson:

a. The classroom presentation consists of an oral verbatim reading of a previously-prepared standard text. The time required varies from six to eight hours. It is given in intervals of 50 minutes, with a 10 minute break between intervals.

b. The discussion period lasts three or four days, perhaps even longer depending on the receptivity of the

particular group of POW's. The indoctrinator fields the discussion questions and monitors the subsequent discussion which it is hoped will ensue among the POW's. He keeps the discussion keyed to the particular question and observes what part of the class holds a pro-VC view and what part does not. When approximately two-thirds of the class becomes pro-VC, the discussion stops and the text of that particular lesson is re-written for its final presentation in class before proceeding to the next lesson. If two-thirds of the class fail to hold a pro-VC view, the text is re-written again, presented again, and discussed again, or else the particular indoctrinator is replaced by another one from the next higher echelon.

c. The presentation of the revised text requires two to three hours.

LAO GOVERNMENT FORCES ARE FACING HEAVIER RESISTANCE

Government forces last week continued to make some slight progress in trying to advance farther north of the Plaine des Jarres. Enemy resistance has stiffened, however, and there are signs that North Vietnam is dispatching reinforcements into north Laos.

General Vang Pao's weary troops have had only limited s c-cess in repeated efforts to se-cure the high ground north of the Plaine, where substantial numbers of North Vietnamese forces are dug in. In the northwest sector of the Plaine and in the key area near the Route 7/71 junction, gov-ernment units have been checked by several small but sharp enemy counterattacks. The government wants to hold this area as long as possible to impede enemy re-inforcements from North Vietnam.

On the more positive side, a small government element has advanced to within five miles of Muong Soui, meeting light enemy resistance. Northeast of Khang Khay, government guerrillas oc-cupied a large, abandoned cave complex believed to be the former Pathet Lao headquarters in north Laos. (~~SECRET NO FOREIGN DISSEM~~)

* * *

NND 941536 --- 3845

Thai Insurgents Seek To Improve Their Position

Communist guerrilla leaders are striving to strengthen their political base in the villages and to improve the caliber of their guerrilla forces. The insurgents' new tactics appear to be better tailored to meet the problems they face, but they are still unable to mount a significant military campaign against the numerically superior government security forces.

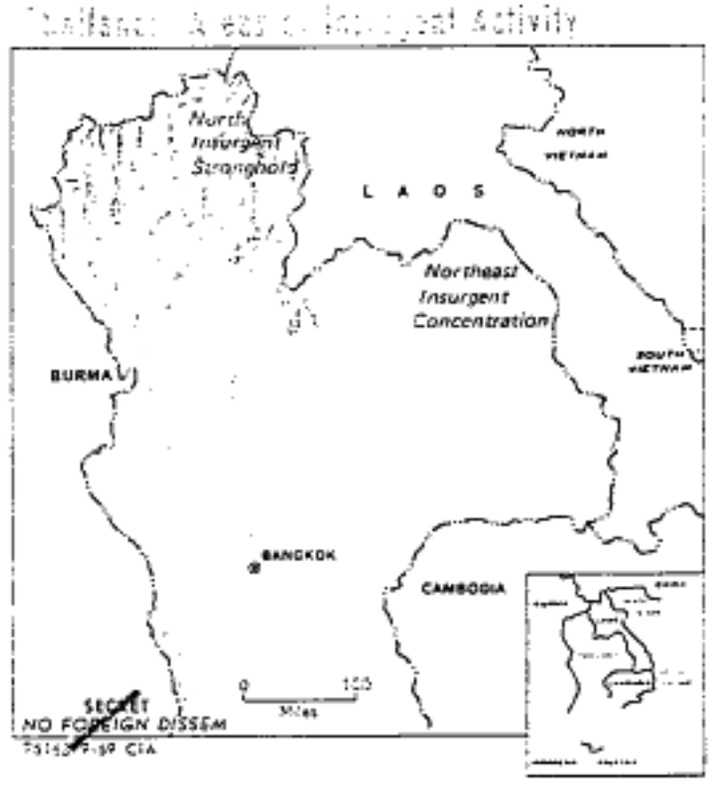
In the key northeast region, guerrilla leaders seem to be making some progress in implementing decisions taken last year to overhaul their village support structures and to tighten security procedures. They have tried to establish more effective supply and information networks in the villages and have concentrated on improving their jungle units by more selective recruiting and better training. To improve their standing with the villagers, the guerrillas are buying rather than confiscating food and are generally playing down terrorism.

Although the insurgents continue to avoid armed clashes, their improved organizational practices could pose a new challenge to Bangkok's counterinsurgency programs. One measure of the Communists' progress in the northeast will be their ability to establish themselves in villages that have active government programs, rather than in remote areas relatively free of government influence. Thai security officials, apprehensive over still unconfirmed reports of increased infiltration of men and weapons, have taken some remedial steps. Deputy Prime Minister Praphat, for example, has directed army commanders to operate more forcefully against known Communist base areas.

The Communists appear to be having more success in the north and north-central provinces, where tribal guerrillas in some remote areas are virtually unchallenged. Although the evidence is fragmentary, the insurgents seem to be using the current rainy season to stock up on supplies and win recruits among the tribal population. The transfer of additional guerrilla leaders to the north from the northeast indicates the Communists are trying to solve their shortage of trained and dedicated cadre. This has been a major Communist weakness in the north, as in other parts of the country.

NND 941536 --- 3846

Senior Thai Security officials believe the situation in the north has deteriorated and expect the Communists to try to extend control over the northern border area adjoining Laos during the coming dry season. On the government side the appointment of a new, energetic army commander in the north offers some hope that newly developed programs will be more than window dressing. These programs, which are designed to win the cooperation of the tribespeople while simultaneously protecting the ethnic Thai population in adjacent lowland areas, so far have not been effectively carried out. (SECRET NO FOREIGN DISSEM)



Preparations for China's National Day Proceeding in Low Key

The regime's preoccupation with pressing internal problems has resulted in a subdued approach to the National Day celebrations on 1 October. Peking has set the mood for the rest of the country by discouraging the hoopla that might be expected to accompany the 20th anniversary of the founding of the republic.

In part, the restrained mood stems from the fact that only a fragile tranquility has been imposed inside China.

Peking probably does not want to jeopardize the newly imposed order by staging major rallies in Peking and provincial capitals, events which by their very nature

NND 941536 --- 345

bring crowds into the streets and tend to raise emotions.

Diplomatic sources report that Peking intends to keep this year's celebrations a "family affair," with few invited foreign guests.

Provincial radiobroadcasts have taken Peking's cue and are urging restraint in celebration planning. A recent Anhwei broadcast, for example, stated that National Day should be observed in a "down-to-earth" manner and that unnecessary expenditures should be avoided.

National Day traditionally has been the occasion for a major leadership turnout. Rumors that Mao is incapacitated have become widespread lately, and he has not appeared in public since 19 May. Mao has been absent for long periods before, however, and has reappeared each time to confound speculation about his health. He has never missed a National Day celebration, and a failure to show up this time would give substance to reports that he is seriously ill. The Chinese, in trying to counter such rumors, have been publicizing recent decisions they say were made by Mao.

Despite the low-key approach to the celebrations, Peking will undoubtedly exploit the occasion for its maximum propaganda value to help promote the commonly heard themes of national unity and preparedness against war. The regime has taken the unusual step of releasing separately 29 National Day slogans, giving particular emphasis to those slogans concerned with war preparations. This probably reflects Peking's growing concern over the possibility of expanded conflicts with the Soviet Union and also serves to dramatize for the population the seriousness of the current war preparations drive and the need to economize and increase production. M O N T H L Y R E P O R T

K I A - T R A N G

OCTOBER 1969

****

GENERAL

October 1968 was the month of the greatest revenue block time shown in our statistics.

This month, October 1969 we flew approximately 67% of that month. This results from a 11.5% increase in revenue block time from the month of September this year. This upward trend is most welcome. We look forward to next month.

Other than two mortar attacks on the field in the early part of the month, Kha-Trang remained relatively quiet. More often than not, the military has had the town "[illegible]" to military personnel, and as a result, social activity and incidents between the Vietnamese and military personnel have decreased. I feel certain that this "[illegible]" trend will continue.

OPERATIONS

A. Personnel arrived from SGN to locate an appropriate place for our new antenna. Relocating the antenna and transmitting units should assist greatly in eliminating the constant interference we are now experiencing.

The monsoon season has arrived and we may expect difficult flight and communication problems this next month. Completion of a shed on the side of our building now allows us to work without the usual two inches of water in the office.

SGN-1 MA

SAIGON BASE
MONTHLY REPORT
OCTOBER 1969

I. GENERAL

1. Block and revenue time remained on a par with last month when comparing a 30 day month in September with a 31 day month in October. For Sept. it was 6135 revenue hours and 6346 blocks hours total for SVN vs 6345 revenue hours and 6608 block hours for October.

2. Security conditions remain relatively quiet with only occasional terrorist incidents. There were no concentrated military actions or rocket attacks directed against the Saigon area.

3. We plan to further reduce our spare fleet this month by sending 3 10-2's to Tainan for storage. Beech 10-2 N77Y has been placed in temporary storage at Saigon.

II. GENERAL AFFAIRS

1. Exemption of tax on airfield meal and transportation payment initially granted by GVN to employees working at TSN airport was extended to employees at DAD and NHA Stations.

2. The Government of Vietnam has just decreed a tax (austerity) increase on 1523 imported commodities. As a result of this measure a US dollar's worth of imported commodity will cost from VN$25 to VN520 more; the more luxurious an imported item the higher the tax.

Official statistics which is very conservative by nature, estimate the overall price of imported commodities to rise by 40% and the cost of living 20%

Price of spare parts for automobile, construction materials and office supplies which account for the bulk of company local procurement increase as follows:

Office supplies	+ 100%
Iron bar	+ 100%
Engine parts	+ 160%
Tubes and tyres	+ 103%

III. FACILITIES DEVELOPMENT

1. Among the projects completed this month were: revetment walls

SGN, Antenna masts for Transmitter Building SGN, Nose Hangar Lean-to DNG, Emergency RGMD Water Supply SGN, Power Distribution and Lighting System NHA, and Electrical Power Distribution System DAD.

IV. CUSTOMER RELATIONS

1. Our relations with all customers have never been better. There are no outstanding problem. The rapport between the primary VN-70 customer and this office have improved 100%.

V. FISCAL

1. Budget Matters: Costs are continually being reduced by reduction of work force. A total of 20 persons were either transferred to other bases or surplussed during the month. Particular attention is being given to the payment of overtime to indigenous personnel. Total payments for overtime have been substantially reduced. We believe further reductions are possible in CTD. FCMMR are now being checked 100% against Log Sheets. During the past three monthss we have discovered per diem was being overclaimed by $500.00 to $600.00 per month.

2. Tax problems: We received in writing a ruling from the Tax authorities that the Transportation and Meal Allowance paid to Vietnamese employees are exempt from Vietnamese income tax.

3. Billing Difficulties: No additional problems except as noted under Customer relations.

4. Revisions of exchange rates: There have been many rumors of a devaluation of the piastre. However knowledgeable sources indicated no devaluation will occur for the remainder of 1969.

VI. SECURITY

1. November 1, 1969 will be Vietnamese National Day. This year, the National Day Celebration is very simple in keeping with the Government austerity policy. No parade or demonstration is anticipated.

2. Rumored public disturbances: The majority of Vietnamese people complained about the hike in prices of commodities by the newly decreed austerity taxes imposed on 24 October 1969 by the Vietnamese Government, as the government was compelled to take urgent financial and economic measures to put an end to the inflation threat which could bring about a collapse of the national economy and also cause difficulties in the political and social fields.

VII. MEDICAL

1. Number of visits: 1501

2. Accidents: 51

3. Hospitalization: 2

4. Outcalls: 5

5. Physical Examinations: 36

6. Sick leaves: 312½

VIII. PERSONNEL

1. Work Permit approvals for our Third Country Nationals continue to be a problem. To date we have received only 20. The Ministry of Interior, however, has been kind enough to grant our TCNs temporary Residence Permits valid through 31 January 1970, which presumably will cover them for the period during which their applications for one year work and Residence Permits are under process.

The recent (24 October) imposition of an Austerity Tax on most imported commodities has knocked the value of the piastre to an all-time low (MRH is in possession of some relative VN press articles). The piastre is now being traded on the open market at approximately VN$275 to US$1.

Approval for the Vietnamese Line Maintenance Training Program is pending at the Ministry of Education. At each follow-up call we make we are assured that approval will be forthcoming "any day now".

2. Personnel strength - Saigon Base

IX. TECHNICAL SERVICES

1. October was a smooth month with no serious incidents or accidents in any department at any station.

2. Several employees have been selected for transfer to Udorn as that station is in dire need of qualified men. We hope to send at least 20 men by mid December. It must look like old home week there with all the men we have sent to Udorn already. Some six Americans have gone there since May of this year, plus over 30 TCNs either sent or under process to go.

X. TRAFFIC/AAM

Nothing of general interest transpired during the month with all areas operating smoothly.

	September	October
Passengers departure SGN (All contracts)	5,837	5,870
" arrival SGN "	5,980	6,492
Outbound cargo SGN	94,217	77,121
Inbound cargo SGN	90,205	97,140

Outbound (lbs) SGN	1,369,868	1,948,049
Inbound (lbs) SGN	519,743	560,231

XI. OPERATIONS

1. Total revenue block time for October was 6345 + 39 compared to 6134 + 45 for September. Our revenue forecast for the month was 6365 hours. Grand total block time for the month was 668 + 02 with a forecasted figure of 6623 total block hours for the month.

2. We had 20 controllable and 61 non-controllable delays with a total of 916 Saigon departures.

3. Aircraft availability boards and flight watch boards were relocated in FOD allowing for a window on the east wall. Plans are being formulated to make additional improvements to FOD. Three new air conditioners were purchased and installed.

4. We plan to further reduce our spare fleet this month by sending 3 10-2's to Taiwan for storage. Beech 10-2 N77Y has been placed in temporary storage at Saigon.

5. Flight time report (See attachment A)
Aircraft Incidents report (See attachment B)

Sup by vehicle

XII. FLYING

The month of October was highlighted by one major point of interest: No crew induced accidents during the month. This is a reflection of the pilot's professional ability and to the AMF's close supervision and emphasis on safety. October is the second consecutive accident free month.

With the deletion of the Beechcraft from both the contract and the station a number of on station crew assignments have been realized. Six of the Beechcraft captains have been moved to the Volpar Program.

Flying time was good in all programs except VTB and Beechcraft. The VTB is picking up and conversely the Beechcraft is dropping. Morale of course is directly reflected by the high or low time. The greatest inequity in flying time is projected in American First Officer group. We are still working towards a F/O pool. All the VTB F/O's have received C47 training and should receive their flight checks early in November.

The yearly, 1000 hour per pilot, flying time appears to be well under control. The yearly OBH is being closely monitored as well. The year end should reveal an equal distribution of OBH by program. Any major change in customer requirements should not present too great a problem due our cross training program.

In result of the month bring a rather routine month, it seems that the was that it was a successful one.

XIII. SAFETY

1. Accident investigations

1. Beech 10-2, N9521Z accident report forwarded to TPE on 20 October 69.
2. 204B, N1306X accident report forwarded to TPE on 4 Nov 69
3. VTB, N7770S Review Board will be scheduled for 11 Nov 69.

2. Safety suggestions

1. SAFE 15 - 26 Sep 69. Captain McCauley questions the maximum gross weight of 10,200# for the Special 10-2 aircraft because they do not perform as well and are placarded for seven passengers only. Forwarded to ESAFE 27 Sep 69.

2. SAFE 15 - 14 Oct 69. Capt McCauley recommends the top of one main rotor blade of the 204B's be painted white to aid in being seen by other aircraft. This is being submitted on SAFE 14.

3. TRIP REPORT 22 Oct 69. Capt Rogers pointed out an ambiguous instruction in the Volpar Maintenance manual because of an elevator trim tab problem on 54U. He believes the mechanics get confused about the proper degree of rigging the tab up or down because of the way the manual states the settings. This now in local processing prior to being mailed to TPE.

3. Follow-up Action

Designated runup areas have been prepared and equipped with chocks which fit into pipes to prevent aircraft from moving. This should completely eliminate runup accidents such as the nose wheel collapse on 70B, the death of the man who was blown away on a sheet of plywood by prop blast, and the numerous instances of control surface damage by prop blast.

MEMORANDUM

TO : BH/SGN

DATE: 04 October 1969

FROM : SZ/DAD

REF. No. SZDAD/69/099

SUBJECT: DANANG Station Monthly Report for September 1969

GENERAL

Hostile activity for the month was limited to one significant incident, but in terms of reported casualties and projectiles fired, it was the largest attack in the past five months. This attack occurred in the early morning on 6 September and consisted of an estimated 76 rockets and 43 mortar rounds impacting in the Danang and surrounding area. 21 fatalities and approximately 100 injuries, mainly to Vietnamese civilian personnel, were reported as a result of the attack. One rocket apparently exploded an ARVN ammunition dump and the resulting concussion caused minor damage to some doors and windows in the company hostels. No injures to company personnel were reported.

The Danang City and Air Base curfews remained unchanged; a curfew pass in the form of a letter was obtained for those personnel who might be required to remain on the base after 2100 hours. This pass will be renewed monthly without any anticipated problems.

Southern Air Transport flights were limited to 8 and no problems were encountered in their handling. 8 such flights are already scheduled to transit Danang during October.

The maintenance of company air-conditioners became a serious problem during the month with several unit failures. The station repair capability is satisfactory in most instances, but in several cases, the units require replacement compressor motor assemblies which are unavailable. As a result of this situation it has been necessary to remove all the air-conditioners (4) from the new hostel to support the old hostel and 2 offices at the air base are without air-conditioning.

LEGAL

Negotiations with Barclay & Company concerning their proposal to operate the terminal snack-bar have ceased as a result of a MACV directive which cancelled their operating authority in Vietnam. As an alternative, discussions are being held with a Sergeant Dobbs who apparently was responsible for setting up the snack-bar originally and is now serving another tour at Danang. Through his efforts with the Base NCO Club, an operation far superior to the present may be forthcoming.

..... Cont'd.

CUSTOMER RELATIONS

Two minor problems developed with the Embassy customer concerning the handling of their VIP passengers and cargo on company aircraft. The former was resolved locally by permitting an Embassy representative to pick-up the required conditions of contract from Traffic and escort the VIPs to the aircraft without Traffic assistance. This customer has their own protocol procedures and apparently feels that such passengers are best handled internally. The ultimate responsibility for the correct loading and tie-down of Embassy cargo on company flights is somewhat undefined since the 4395 contract is no longer in effect. This matter has been referred to Flying Contracts for clarification.

The AID customer seems satisfied with the progress made on the design of the passenger terminal renovation project, but funding for the project is still not assured.

FACILITIES

Detailed drawings were prepared by SGN for the passenger terminal renovation project and bids have been received from four local contractors to accomplish the required construction. A reimbursable pro-forma AR has been submitted by SGM/SGN based on the lowest bid.

The Danang City Power Project was completed during the month and payment was made to S.I.P.E.A. for the transformer installation. Although the facility has remained on USAF generator power almost all of the time, very satisfactory voltages are received from the transformer. A technican was sent from SGN to balance the current loads and the slight heating problem in the main distribution lines seems to have been eliminated.

The Nose Hangar Lean-to Project was also completed and final settlement was effected with the contractor.

A re-evaluation of the deferred Paving Project has been requested so that a firm determination can be made as to whether or not the 2500 bags of cement on hand should be retained or exchanged for gravel. The local AID customer supports the project but funding for it is still indefinite. The rainy season is rapidly approaching and it is doubtful that any of this cement will be useable if it is not utilised fairly soon.

FISCAL

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures for the month totaled: 26,815$VN

OPERATIONS

Total revenue flight time increased 3+55 hours as compared to the previous month. 204B flying was reduced significantly due to a lack of requirements by the Embassy and the substitution of a PC-6 for Quang-Ngai on the part of AID on Sundays. Revenue losses increased significantly primarily as a result of poor weather when Danang was within the influence of tropical storms.

The following is a breakdown of flight time generated by this station during September:

VN-41/AID	876+36
VN-41/Embassy	162+04
0005	9+39
0069	6+12
Non-Revenue	9+19
Total	1,063+50

Revenue loss for the month was as follows:

Maintenance	7+00
Weather	16+00
Customer Cancellations	1+00
Other	0+00
Total	24+00

Hostel occupancy factors were 80.71% and 40.33% for the Old and New hostels respectively. The higher utilization of the New hostel resulted from extended DHC-4 and unscheduled C-47 RONs.

COMMUNICATIONS

The remote VHF/UHF was out of service only once during the month and the problem was repaired within one hour at the [redacted] The transfer of the ground radio transmitters to the RMD Lean-to was commenced, and all the required underground audio cables were installed. Temporary antennas have been erected for interim use until the programmed 80 foot antenna mast is received from SCN and installed.

Incoming and outgoing messages totaled 1853 and 1425 respectively.

TRAFFIC

A planned reduction of 5 Ground Services personnel was deferred at

customer insistence. Although the manning of this department is considered excessive, the AID customer apparently wants to continue to bear the additional expense involved.

Passenger and cargo statistics for the month are as follows:

	Passengers In	Passengers Out	Cargo In	Cargo Out
4101	2,624	3,177	230,044	351,176
4102	495	556	8,401	20,486
0005	11	3	Nil	Nil
0069	0	7	Nil	Nil
AAM	83	120	8,693.5	18,099.1
TOTAL	3,213	3,863	247,138.5	389,761.1

No Continental Air Services flights were handled during September.

SECURITY

A crewmember reported the theft of a flight case from the entrance of the New Hostel while awaiting transportation to the airfield but no conclusive evidence could be found that the hostel security guard was negligent. According to the guard's statement, other crewmembers were in the immediate vicinity of the case when the theft apparently took place.

PERSONNEL

No solution to the work permit problem has been reported and as a consequence, visas, extensions of stay and air base pass processing are still being delayed. PM/SGN indicates that progress in this area is being made but at a very slow rate.

A third major personnel reduction was accomplished during September which brings station manning down to a level not experienced in nearly two years. With only a very few exceptions and those requiring a re-definition of policy, any further reductions can only be sustained with a very noticeable decrease in service or capability.

The personnel breakdown at Danang station at the close of business, 30 September, was as follows:

[redacted]				
Permanent	5	22*	14	85*
Pre-Process	0	0	0	0
Temporary	0	0	0	0
Daily hire	-	0	0	0
TOTAL (126)	5	22	14	85

* Includes two personnel who will be transferred to SGN when Tan-Son-Nhut base passes are obtained.

TECHNICAL SERVICES

RMD handled a total of 620 arriving and 624 departing flights during the month. Maintenance delays remained the same as August for a total of 5. No outstation recoveries were required. Heavy services amounted to two number 1 PC-6 services, three number 1 204B services and two number 2 204B services. One engine change (C47) and no propeller changes were required during the month.

BGMD expended at total of 1435 manhours, of which 323 were utilized in hostel maintenance. In an attempt to reduce air-conditioner problems in the old hostel, heavier guage wire and U.S. switches were installed in addition to replacing the thin plastic windows with plywood sheeting.

MSA transactions were disrupted for a brief period as a result of the substantial damage sustained by their facilities during the rocket attack of 5 September. The only enduring problem was that their September invoice did not include IBM cards which will delay reconciliation of the invoice with company records.

STATISTICS

From previous monthly reports the following data was extracted:

	September 1967	September 1968	September 1969
Flight Time (hours)	1093	1452	1055
Arrivals	719	748	620
Departures	713	737	624
Passengers (outbound)	2451	3499	3863
Personnel	103**	143	127
[redacted]	7	7	5
	18	31	22
	10	13	14
	68	92	86

** Does not include Traffic Ground Services Labor Force.

Although the above figures are not necessarily comparable, they do give some indication of the changes over the years covered.

MEMORANDUM

RECEIVED
18 OCT 1969
BM-SGN

TO : Distribution via AVP JDM

DATE: 7 October 1969

FROM : AA/AVP

REF. NO. AA/AVP-69-105

SUBJECT: Monthly Report

The Monthly Report should periodically be reviewed and evaluated. Some Officers and Directors have indicated that the reports are deviating from the standard format, some reports are to voluminous, some are simply a consolidation of departmental reports and some reports with all the attachments are too repetitious and too much to read.

The Monthly Reports provide quick, general information to Officers and Division Directors to keep them current on activities for which they may or may not be responsible. It is information they should know and use as a guide so they may better administer their respective responsibilities. A report should be concise but complete in itself and should not make references to other reports, memorandums or letters.

The Monthly Report is a consolidation of information of all activities at a Base prepared in one single report, usually based on information submitted by the persons responsible locally for the various activities. The Monthly Report is fundamentally a Base Manager's report and not a grouping of a number of separate individual activities reports submitted to the Base Manager. The report should not contain every tidbit of information, but instead should be limited to only the essentials of the activities of the month including unusual and non-routine items. It should concentrate on substantial matters written concisely and yet clearly without the need of lengthy verbiage to explain a point and without detailed descriptions. The Monthly Report should cover all the points necessary in as few words as possible. Concise statistics are very useful, but the report should not give lengthy detailed statistics; instead it should limit such figures, in totals, to assist in the overall explanation of the narrative where appropriate.

Since the basic purpose of the Monthly Report is to provide information, it should of course, not contain requests for action on any given matter. However, matters requiring actions may certainly be included in the report for informational purposes. The actual request for action on any given matter should be a separate memorandum to those responsible.

Controversial subjects as well as sensitive matters such as expressing opinions about our competitors should not be included in the report (a few of these have been noticed in reports.) The Monthly Reports are circulated through the field head office and matters dealing with salaries, benefits, allowances, bonuses, personnel policy, sensitive subjects of any type, opinions regarding Company policy, etc., are not appropriate for inclusion in the Monthly Report. If there is any doubt about an item being sensitive, controversial or confidential, do not include it in the Monthly Report. All such matters should be handled by separate correspondence with the distribution limited to those concerned and, if appropriate, sent under confidential cover.

Three copies of the Monthly Report (1 original and 2 copies) should be forwarded to AVP under cover of a transmittal memo to reach Taipei not later than the 10th of each month. Do not indicate any distribution, do not use paper with preprinted letter-head notations and do not use paper other than the standard 8½ x 11 plain, white paper. There should be a one and one quarter inch (1¼) margin on the left side of the paper to allow for binding all of each month's reports under one cover.

A standard format for the Monthly Report is attached. However, it may not always provide the desired flexibility to cope with the wide and ever changing variety of non-routine matters which you wish to report. Therefore, please regard the format as a guide rather than a hard and fast standard which is limited solely to the items listed; but, the deviation should only be that which is required.

This is not to introduce more paperwork, but to reduce it where possible and to re-emphasize what is already in effect.

Monthly Report

(Month Year)

GENERAL

Under this heading include items which are related to the Base as a whole rather than to one Division's activities.

Information of General interest.

Governmental relations.

Legislation affecting air agreements, business licenses, etc.

Political incidents or situations which might affect the company.

The company's position nationally and locally in the community.

High level public relations and promotion.

ADMINISTRATION

Include items which are related to Administration of the Base as a whole rather than to one activity.

Forecasts

Savings

Accomplishments

Observations

Company activities (Club and other)

PUBLIC RELATIONS

The company position in the community from a public relations point of view.

Situations which may lead to poor public relations and uncomplimentary press reports.

Relationship with press and other news media.

CUSTOMER RELATIONS

Brief statement, about customer relations.

EMPLOYEE RELATIONS

Brief statement, about employee relations.

LEGAL

Legal matters and related subjects.

State of leases, rentals and agreements.

Matters which may eventually become legal in nature.

Contract and agreement processing matters.

Laws and regulations which may affect the company, including those which are under consideration.

FISCAL

Budget matters.

Tax problems and related subjects.

Billing difficulties and related matters.

Insurance.

Revisions to exchange rates.

SECURITY

Company security matters, such as protecting property, etc. (not confidential matters).

Historical or customary dates and particulars of anticipated forthcoming demonstrations.

Rumored public disturbances.

MEDICAL

Number of visits.

Accidents:

(1) aircraft
(2) ground

Hospitalization.

MEDICAL cont.

Out-calls.

Physical Examinations.

Sick leaves.

PERSONNEL

General

Outstanding personnel matters, community labor situation, company labor situation and new or revised labor laws or regulations.

Substantial changes in living costs or per diem rates.

Personnel Strength

Use the present format for reporting personnel as established by memo AA/AVP-68-135, 23 November 1968.

STATION REPORTS

SAIGON BASE
MONTHLY REPORT
NOVEMBER 1969

I. GENERAL

1. Total AAM block time for the month was 6238 hours vs 6574 hours in October. The customer failed to meet 204B and Volpar minimums and consequently released 204B N8512F and Ten-Two N9573Z effective 1 December 1969 (73Z flying hours were included in Volpar Minimums). We reduced our Ten-Two fleet by three when we ferried N21412 N51259 and N5454V to Tainan on 17 November 1969. C47 B817 was also ferried to Tainan for storage.

2. Security conditions have remained calm with no unusual incidents to report in the AAM areas of activity with the exception of mortar fire at Gia Nghia on 10 November 69 as C47 15559 was taxiing out. All in all, there were fewer ground-fire incidents reported in November than in any other month over the past two and one-half years.

II. GENERAL AFFAIRS

1. The company presented the Directorate of Civil Aviation with materials required to build a wire fence for DCA housing compound in Dalat [redacted]. The fence proved necessary to the security of DCA employees in Dalat after VC infiltrators slained one employee and wounded another one in August. The major credit of this project should go to SZNHA who helped make the materials available.

2. Efforts have been made to negotiate lease term shorter than the normal one-year period to take advantage of potential decline in rent that may develop as a result of US replacement in Vietnam. A case in point is the lease for our SGN downtown office. The landloard agreed to the six-month lease term and to add to the new lease a clause providing for six 6-month periods renewal after he had been notified in writing of our intention to renew subject lease under old conditions and terms.

3. On 3 Dec., Air Vietnam employees went on strike to demand a 50% salary increase and the removal of some top management staff. The strike was backed by the Confederation general of Labor as opposed to the Confederation general of workers with which Air America union is affiliated. The strike ended on 8 Dec. after the Prime Minister signed an order empowering the Minister of Transport and Communications to requisition all Air Vietnam employees regardless of nationality if necessary and the Board of Administration promised to consider employees' request within 48 hours.

III. FACILITIES DEVELOPMENT

1. The Antenna mast at Danang is scheduled for erection on 11 Dec 69. The power distribution and lighting system at Nha Trang has

been completed. We are having difficulty with the Saigon City Power Company to secure the 200 KVA transformer which we have contracted for. The Utility Tunnel - Phase I SGN has been completed. The Emergency RGMD Water Supply has been completed.

2. Principal projects awaiting TPE approval are: Completion of Concrete Ramp Pavement and Drainage Ditch at Danang, Renovation of Operations Building Saigon, Relocation and Renovation of various AAM Shops and Offices Saigon (including BM office), Improvement of Passenger Lounge Danang and 204B Landing Pads Saigon.

3. RGMD SGN PFAR 69/067 for US$42,470 to "pave terminal parking apron and adjacent PSP ramp (total 15,550 sq. ft.) was submitted on 29 Nov 69.

IV. FISCAL

1. Budget Matters: Total net reduction of work force during the month was 3 persons. Overtime payments to GTD personnel have been reduced by 50% from previous months. During the month we discovered that our record keeping for ARs especially Form F projects was not detailed enough. Payments for material costs were being exceeded by large margin and not all labor costs were being charged to respective ARs. We are in the precess of revising our method of keeping track of AR expenditures to show all costs by type, ie. material, labor, etc.. Persons filling out DTRs were abusing use of J-4 code number. We have worked with MTS and his staff to correct this abuse.

2. Revision of Exchange Rate - Knowledgeable sources still indicate that there will not be any devaluation of the piastre during 1969. They feel these are strong possibility of devaluation occuring during early 1970.

3. Billing procedures - AID/VN-70 customer has now indicated that a separate 1034 payment voucher should be prepared for each end uses, i.e. CORDS, EMB, RDC. This is contrary to instructions given by Miss Voltz in a letter to T/C. We are complying with their wishes.

V. MEDICAL

1. Number of visits: 1610
2. Accidents: 67
3. Hospitalization: 4
4. Outcalls: 4
5. Physical examinations: 27
6. Sick leaves: 202½

VI. PERSONNEL

Although no breakthrough has been made in securing Work Permit [illegible] for our TCNs, we do not feel as though we are facing any contractor treatment in that they are issuing most of the TCNs

special Residence Permits. Those special permits are enabling the TCNs to obtain Exit/Re-entry visas and airfield passes, and should take care of us quite well until the U.S. and Vietnamese governments come to terms over the issuance of the Labor Cards (Sept. Monthly Report refers).

2. The Prime Minister has given his approval to [redacted]rticipation in the Line Maintenance Training Program at Tainan. Hopefully we can have the candidates in place right after the first of the year.

3. The value of the piastre continues to decline (approx. VN$290 to US$1). Several companies are considering P/S revisions but are reluctant to do anything definite until some settling point is reached (or until the remored official devaluation is made).

VII. TECHNICAL SERVICES

1. A quiet month has passed us without serious incident or major problems. Much effort was put for in reducing the CTC now on the books, we are attempting to come very close to a zero balance by 31 Dec. 69.

2. The general appearance of all stations was at their best - for DRH/TNN visit. This reflects quite favorably on the Supts and Chief Mechanics as little effort was required, because daily housekeeping ground safety habits and ground safety habits and ground equipment maintenance standards are above average and practiced daily.

Considerable improvements were noted in the reduction of manhours on aircraft services, as well as total monthly operating costs in general. More improvements can and will be made in proper accounting of expended manhours on the Daily Time Record (DTR), which reveals utilization (good or bad) of available manpower resources. Everyone is very cost conscious and continued progress toward cost reduction is being made daily.

VIII. TRAFFIC/AAM

1. We were visited by A/DTD and benefited from the general discussions relating to Traffic policy. Mr. Bill Sparks has departed the station and Mr. Boyce is now Chief of Air Operations - TSN.

	October	November
Passengers departure SGN (All contracts)	5,870	6,007
" arrival SGN (" ")	6,492	6,677
Outbound cargo SGN	77,121	81,893
Inbound cargo SGN	97,140	96,146

2. TRAFFIC/USAID

	Cargo (including AF Caribou A/C)	
	October	November
Outbound (lbs) SGN	1,948,049	1,534,916
Inbound (lbs) SGN	560,231	101,577

IX. OPERATIONS

1. ADOFD/A visited SGN the first week of December. He spent a few hours at NHA and DAD. He seemed pleased with the FOD Department and noted there were many improvements since his last visit.

2. There were 27 controllable and 61 non-controllable delays with a total of 936 Saigon departures. Reducing our spare fleet, we and expect an increase in controllable delays. By the middle of December our active spare fleet will consist of N67984, N544Y and N152L.

3. Flight Time Report (See Attachment A)
Aircraft Incidents Report (See Attachment B)

4. Accident Reports

Date	A/C Type/No.	Location	Remarks
13	VTB/N7770B	V-07	Traffic marketeer struck and damaged left flap. (Note - This is second such incident at V-07 in 1969)
15	204B/N8535F	Dai Loc	Indigenous ran into T/R blades, incurred serious injury. T/R blades required replacement. (local review board scheduled 3 Dec.)
16	VTB/N9577Z	V- 225	Right main tire went flat, cut by PSP.
24	PC6/N185K	V-01 AAM ramp	Forklift driven by AAM employee struck and caused minor damage to right wing tip and aileron. 15 manhours required for repair.
26	DHC-4/N539Y	V-01, AAM	Air Vietnam boarding stand blown into nose and tow bar by VNAF C-119 prop blast. Tow bar bent and nose wheel rotated 60°, minor dent in front nose door. A/C required retraction test, no damage to gear found.

5. Communications - Project 6683: Transmitter Building and Antennas, Saigon - Antenna installation is complete. All coaxial cable runs, balun rigging and suspension of transmission lines into the building for the four wide-band antennas have been completed. Tests with DaD, NHA, and BKK produced results of QRK 4/5, QSA 4/5. Minor wiring inside the building is near completion.

Project 6696: 200 KVA Transformer - Installation held up pending delivery of item to Saigon Dien Luc Cong Ty (CEE).

Project 6700: 60' Antenna Mast, Nha Trang (HF Transmitter Relocation) - To commence excavation [redacted] pouring of cement for base #10.

Project 6701: 80' Antenna Mast, Da Nang (HF Transmitter relocation)

Cement base completed and in curing process. Anticipate erection of mast on [redacted] All Antenna hardware at site and will begin installation [redacted] HF transmitter relocation will begin shortly thereafter.

Projects 6708 and 6709: Telephone Cable Distribution System and Base PABX - Complete PABX system received L28. OKI Factory representative to arrive on [redacted] Security Department to obtain necessary gate passes. Plan to commence installation [redacted]

6. Ground Transportation

Aggregate microbuses mileage	:	23794 km or 14871 miles
Microbuses down-time	:	206 hrs
Microbus pax-carried	:	3468
Isuzu bus mileage	:	5941 km or 3713 miles
Isuzu bus down-time	:	168 hrs
Isuzu bus pax-carried	:	10846 pax
Supply vehicles mileage	:	1802 km or 1126 miles
Supply vehicles down-time	:	57 hrs.

Total:	5,351 + 57	6,073 + 17
CAL	296 + 42	395 + 50
Grand Total:	5,648 + 39	6,469 + 07

X. FLYING

1. The only real highlight of the month was the visit by the VPFO to discuss the new leave system and the pilots' pay raise. This was the major subject of conversation for several days afterward. Much concern was also in evidence regarding FEPA and what they would or would not do and the effect any action might have on everyone.

Flying time was bettter than expected, although nothing to get excited about. The 2048 program established a new low which was not good for morale. However, the C46/C47s did very well and helped during the overall totals up.

2. It appears that staying within the 1000 hour flight time limit for the year will only require watching a few individuals and should not present a problem unless flying time literally "sky-rockets" beyond all reasons.

In summary, the month could best be described as relatively routine and uneventful.

FLIGHT INFORMATION CENTER

- S A I G O N -

MONTHLY ACTIVITY REPORT
1-30 NOVEMBER 1969.

PART I

- Incidents -

Date	A/C Type, No.& Contract No.	Place	Description
10 Nov.	15559 C-47 7001	On ground at V-202	Mortar fire commenced as acft was taxiing out and as acft executed T/O. Ten rounds impacted on strip. One C-123 was damaged. The afld radio control vehicle was destroyed. The closest mortar impact from the acft was approximately 150 feet. No personnel injuries or acft damage involved.

Fewer Company fire incidents were reported for the month of November than any other month on record. However, we feel that this is not truly reflective to the tactical situation here. Some pilots have been reluctant to report this information in view of recent criticism involving Company aircraft in ground fire incidents.

PART II

- Situation Summary -

I CORPS : During the reporting period enemy contacts were made in the areas south of the DMZ, west of Tam-Ky [redacted] and in southern I Corps. While additional information is needed to determine the validity of recent POW reports the enemy is reported to be presently engaged in a three phase campaign the ~~third~~ third phase of which will last from February through April 1970. Some slippage of this time frame is expected, however, due to the discovery of several weapons and equipment caches west of An-Hoa [redacted]

II CORPS : For the fourth straight week the enemy has maintained a high level of activity almost all of which has been centered in the western provinces the most significant locations being Bu-Prang and Duc-Lap. The latter is expected to be the enemys' premary objective in the coming weeks.

III CORPS : Enemy activity during the reporting period has been primarily confined to the northern portions of the Corps. Bu-Dop [redacted] remains the most highly threaten area as enemy forces continue operations in the area. Enemy units remain in Central War Zone C engaged in operations designed to tie down allied forces while infiltration is carried out. On 22 November two explosions occured in front of the HongKong BOQ located in Cholon area of Saigon. Explosives captured at the scene consisted of 70 pounds of TNT, 100 pounds of plastic, and 22 blasting caps. Vung-Tau [redacted] is reportedly targeted for rocket attacks at an unspecified time.

IV CORPS : During the reporting period there were no noticeable high points of activity. Five provinces are showing a higher level of activity than the rest of the Corps. Continued penetrations of the U-Minh Forest by GVN forces will probably result in a high level of activity in that area in the coming weeks as the enemy attempts to defend his strongest base area. Reports continue to mention large concentrations of enemy troops along the Cambodia/IV Corps border.

OPSP/SGN

MEMORANDUM

TO : BM/SGN

DATE: 10 November 1969

REF. No. SZDAD/69/111

FROM : SZ/DAD

SUBJECT: DANANG Station Monthly Report for October 1969

GENERAL

No significant incidents of hostile activity were reported during October, but according to Embassy sources, large scale attacks are anticipated prior to the end of the year.

Although the Danang Air Base curfew remains constant, the city curfew was reduced one hour and is now effective from 2200 to 0600 hours daily. Since the RMD late shift is scheduled from 1200 to 2100 hours, there is time for personnel to return home without curfew difficulties.

Nine Southern Air Transport flights transited Danang during the month, but no difficulties were experienced; all were ferry departures.

The station air conditioner situation is still critical; four units failed during the month due to burned out fan motors. One unit, received from Tainan, developed this problem after only three days operation. Local repair capability has made it possible to maintain a full complement of air conditioners in the old hostel and essential offices but nine units are presently inoperative. Two units in the worst condition were shipped to Saigon for repair.

Preliminary discussions were held with the local Customs Authorities regarding inspection of transiting international flights. Arrangements for providing them with advance notification of these flights were made. It was admitted, however, that at the present time, there are insufficient customs personnel available to inspect all flights. The possibility of being authorized to load and off-load cargo on these flights at Danang was mentioned and not rejected, but an official decision on this matter must await future meetings.

LEGAL

The operation of the terminal snack-bar has shown a great deal of improvement under the management of Sergeant Dobbs. If his position becomes definitely permanent, it may prove advantageous to draw up a formal agreement with the Danang NCO club to outline the responsibilities of both parties.

CUSTOMER RELATIONS

An impasse was reached with both local customer representatives concerning the assignment of aircraft numbers to specific flights. Although more efficient aircraft scheduling would accrue from Flight Operations assigning actual tail numbers, the Embassy customer maintains that their agreement with AID assigns two PC-6 and one 204B aircraft for Embassy use and

control. In order to facilitate this control, according to the Embassy, it is necessary that the aircraft be assigned by tail number. Use of any of these aircraft on a non-Embassy flight requires prior permission. It is also claimed by both customers that tail number assignments are necessary to specify which customer is responsible for the payment of maintenance ferry flights.

Problems would be encountered when ferry flights are required or when all Danang Based aircraft might be scheduled at the same time when one or more is not available. Resolution of this situation is pending discussions with the respective customers in Saigon.

FACILITIES

The AID customer has indicated that Saigon is favorably disposed towards providing funds for the Danang Terminal Renovation and Paving Projects. Expedited company approval of these facility improvements has been requested. Due to the fact that the cost estimates for these projects are based largely on contractor bids, significant delays will create problems since both contractors maintain that rising costs will require upward price revisions if contracts are not signed in the near future.

An informal agreement was reached with VNAF Power Production whereby they will continue to supply a generator for station use even though commerical power is available. In turn, commerical power will be supplied to the snack-bar during periods of generator failure.

It has been decided to accomplish the installation of the new transmitter antenna mast through in-house efforts. Verbal approval for erecting the mast has been obtained from the VNAF, and written confirmation is expected in early November. Most of the excavation for the mast footing has been completed. Due to the curing time required for the concrete footing, this installation will not be operational until December.

FISCAL

Minor problems are encountered with the station time clock whenever commerical power is being utilized due to the difference in current frequency (50 Hertz). Although the clock runs slow during these periods, 60 Hertz generator power is available most of the time.

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures for the month totaled: 20,601$VN

OPERATIONS

Total revenue flight time increased 19+11 as compared to the previous month. Although weather was responsible for a great many flight cancellations with substantial revenue losses, these were offset by a significant increase in overall Embassy requirements and the temporary assignment

of one DHC-4 aircraft. The Embassy customer does forecast increased 204B flying and AID has mentioned there is a very remote possibility of an additional PC-6 being requested for Danang.

The following is a breakdown of flight time generated by this station during October:

VN-41/AID	871+10
VN-41/Embassy	202+32
0005	Nil
0069	Nil
Non-Revenue	13+30
Total	1,087+12

Revenue losses for the month were as follows:

Weather	63+25
Maintenance	17+15
Customer Cancellations	5+30
Total	86+10

Hostel occupancy factors were 86.45% and 31.97% for the Old and New hostels respectively.

COMMUNICATIONS

No problems were encountered during the month with the [redacted] remote VHF/UHF. All ground radio transmitters were transferred to the RMD lean-to. Although some reception difficulties were reported by SGN on HF, the problem was corrected by the middle of the month.

Incoming and outgoing messages totaled 2210 and 1642 respectively.

TRAFFIC

Overall Traffic workload continues to remain fairly constant with no significant deviations from the previous reporting period. No Continental Air Services or USAF aircraft were handled during the month.

Passenger and cargo statistics for the month are as follows:

	Passengers In	Passengers Out	Cargo In	Cargo Out
VN-41/AID	3,072	2,670	330,788	284,120
VN-41/Embassy	505	615	3,987	7,689
0005	0	6	Nil	Nil
AAM	94	106	12,043.3	22,870.3
TOTAL	3,671	3,397	346,818.3	314,679.3

SECURITY

It was learned from the VNAF Security Officer that requests for local personnel to remain on the air base after the established curfew (1900 hours) might be approved if operating circumstances warrant same. Such an approval for a few GTD drivers may be requested to avoid problems with late workshift transportation.

PERSONNEL

Delays in obtaining extensions of stay for third country national personnel may create serious problems in the coming months since many air base passes are expiring. These passes will not be renewed without written evidence that application has been made for an extention of stay which in turn, will not be accepted without a work permit. It is understood that no Danang employee presently has a valid work permit.

The personnel breakdown at Danang station at the close of business, 31 October, was as follows:

	[redacted]			
Permanent	5	21	14	83
Pre-Process	0	0	0	0
Temporary	0	0	0	0
Daily hire	0	0	0	0
TOTAL (123)	5	21	14	83

TECHNICAL SERVICES

RMD handled a total of 640 arriving and 646 departing flights during the month, 20 more of each than experienced in September. Flight delays attributable to maintenance decreased slightly for a total of 4. Four outstation recoveries were necessary, 2 involving DHC-4 aircraft. Two Number 1 services were performed on PC-6 aircraft; the remaining four Number 1 and two Number 2 services were performed on 204B aircraft. No engine or propeller changes were required during the month.

BGMD expended a total of 864 manhours of which 479 were utilized in hostel maintenance and painting the Station Manager's residence. Additional ceiling fans were installed in the rear rooms of the old hostel to provide some additional air circulation in the event of air conditioner failures.

From a visit by MPEMD/THH it was learned that a rebuilt Caterpillar engine will be shipped to Danang to replace the engine installed in the 75 KVA generator. It will not, therefore, be necessary to attempt an overhaul on the present unit.

Routine requisitions from NSA are presently encountering delays due to higher priority customers, but urgent items have been handled by the time consuming but expeditious walk-thru method.

Thai Insurgents Look for Fair Weather

Communist guerrillas in several parts of the country appear ready to take bolder action during the approaching dry season. Bangkok has made some moves in anticipation of additional pressures, but foresees no major jump in the Communist threat.

In the north and north-central provinces, the Communists have improved their tribal guerrilla organization in the mountains, presumably in preparation for their seasonal campaign against government security forces. Villages and defectors have been reporting increases in the number and size of these tribal units, some of which appear better armed than in the past. The Communists have improved their support mechanism by shifting some of their Laos-based command and supply units into Thailand. As many as 1,600 guerrillas now may be operating near the Laotian border, an increase of 500 during the past year. They have been virtually unopposed by government security forces, which have been ordered to minimize suppressive operations.

The Communists may also be setting the stage for their first serious effort to move into adjacent lowlands. Sightings of ethnic Thai guerrillas and scattered incidents in these previously quiet areas indicate the Communists are beginning to extend their influence among this part of the population in the north. The effort could run into considerable difficulty, however, because of Communist support for tribal peoples who are looked down on by the ethnic Thais and because of more determined government efforts to ensure security in the lowland areas.

In the northeast, the insurgents have begun to spread out from their traditional operating areas, apparently as part of their year-long effort to broaden village support structures. These incursions, consisting mostly of food- and intelligence-gathering missions, may also be designed to keep security forces off balance, a tactic used in previous years with only limited success. There is no indication, however, that the Communists in this area soon intend to take on government military forces.

In the southern peninsular provinces, Thai insurgents appear to be challenging the government's presence for the first time. They have doubled their strength in the last year to about 400 and recently have made violent attacks on local defense forces and government development projects that have dramatized their presence beyond their actual strength. The government has made desultory efforts to strengthen its security forces and has ordered the national Communist Suppression Operations Directorate to take charge of security efforts in the south. Bangkok will have to do much more, however, to generate the comprehensive counterinsurgency programs necessary to blunt a sustained Communist initiative in the south. (SECRET)

SINGAPORE ATTRACTS COMMUNIST COMMERCIAL INTEREST

Singapore's modern commercial facilities and its position at the crossroads of Asian trade is attracting increasing Communist interest. Particularly for Communist China, it is a significant source of foreign-exchange earnings and provides an important outlet for trade with the free world. Singapore is seeking to retain its role as a middleman and would like to develop new markets in Communist countries for its small and slow-growing exports of manufactures. Trade with these countries, however, continues to account for only about nine percent of Singapore's total trade.

Trade relations with Communist China, Singapore's most important Communist trading partner, have returned to normal following a dispute this summer with the local branch of the Bank of China. Chinese commercial activities have increased significantly since 1967 when Peking transferred a large share of its re-export trade to Singapore following the riots in Hong Kong. Last year Singapore, with earnings of some $124 million, was Peking's largest source of foreign exchange, after Hong Kong. Trade in 1968 totaled $176 million.

North Korea also has found Singapore a main source of its small foreign-exchange earnings. Trade that was minimal before the establishment of a North Korean trade mission in 1967 amounted to $8 million in 1968. North Vietnam's recent efforts to encourage trade with Singapore, however, have not yet met with much success.

Next month Singapore will open a trade office in Moscow, its first in a Communist country. It will be under the auspices of INTRACO, the state trading company that was established last year to provide more control and an improved bargaining position in trade with Communist countries.

Moscow has had a trade office in Singapore since 1966, when the two countries signed their first trade agreement. Trade totaled about $45 million last year, and has consisted very largely of Soviet purchases of Malaysian rubber sold through Singapore. Moscow is increasing its efforts to expand exports to Singapore, however, and reportedly plans to hold a trade fair in Singapore next year. Last year the Soviets formed a joint shipping agency with Singapore, and Moscow has recently initiated regular weekly civil air service to the city-state.

Singapore's trade with Eastern Europe reached about $30 million last year. Czechoslovakia, Hungary, Poland, and Bulgaria have established local trade offices, and the latter two countries also have concluded trade agreements. A high-level Bulgarian trade delegation visited Singapore last month to open two Bulgarian-owned factories, bringing the total number of such businesses to seven. The Bulgarians also have investigated direct air service between Sofia and Singapore. (~~CONFIDENTIAL NO FOREIGN DISSEM~~)

NND 941536 ---3854

SAIGON BASE
MONTHLY REPORT
DECEMBER 1969

I. GENERAL

1. January 70 started with a real bang with heavy gunfire all over the city of Saigon. Fortunately, it was friendly fire although quite frightening to many Saigon residents. I am sorry to report this irresponsible performance was 100% American.

2. Otherwise the year ended quietly without serious incident. In reviewing progress and improvements for 1969, we feel that many noteworthy accomplishments were made. To recap the highlights;

Saigon

(1) We received and installed a 60 Kw and a 30 Kw generator for our initial backup power, when city power fails.

(2) We renovated an old GMD Shop Bldg and made it into a nice Administrative Bldg for all Personnel Dept activities.

(3) We received a link trainer and installed it in the OPS Bldg - tail number of the bird is "007".

(4) We erected revetment walls along the majority of our property perimeter.

(5) We have installed ramp flood lights on almost every ramp and perimeter wall.

(6) We had a new Bldg built for the Fire Brigade Dept, which includes vehicle shelter.

(7) A magnuflux machine was received, made operational and a room constructed for that activity.

(8) The old GMD Warehouse was renovated into a nice Cafeteria Annex facility, serving Vietnamese style food only.

(9) The West Ramp (dust bowl) was finally concrete paved by A&M Enterprises and is being well utilized.

(10) A new large (50,000 Gal) elevated water tower and deep well was constructed by TSN Authorities A&M shared cost interms of advanced water rent. This has nearly resolved all our water supply problems of the past.

(11) Some additional toilet facilities were constructed adjoining the RMD hangar. A welcome relief to the other limited facilities.

(12) The city power transformer was replaced with a company financed 300 KVA unit and hopefully soon a 400 KVA transformer will be available. A big improvement in our previous marginal power supply problems

(13) At years end, we finally installed our new PABX telephone system (100 drop unit). Telephone communications have been tremendously improved by this new system.

Can Tho

(1) We saw the opening of a new station on 10 Jan 69 at Can Tho. Mr. John Carter is the Senior Company Representative there and also the Supervisor of RMD.

(2) The new RMD/Supply Bldg there was completed in May. It houses Supply, RMD and AED Functions.

Nha Trang

(1) A new lean-to was constructed onto the RMD Hangar.

(2) The ramp lighting and rewiring project added considerably to general improvement there.

(3) A new enclosed employees scooter shed was built.

Da Nang

(1) The new aircraft concrete ramp was completed.

(2) A new lean-to was built onto the RMD hangar for use by RMD, PEMD and AED.

(3) Ramp floodlights, blast fence and public address system were installed there.

Two 204B helicopters were transferred to Udorn. We now have seven Bells as does Udorn Base.

3. All the Beech C-45 aircraft were moved to TNN for storage. The Helio H395 aircraft were transferred to VTE, except for two which were put into storage here.

Only three Beech Ten/Two aircraft are left here. Two of these are in storage and the last one is on contract until end Jan 70.

Overall flying hours slowly dropped from Jan through May and then settled around 6200-6400. The rest of the year June thru Dec was in this same range.

4. The year saw considerable progress in development and advancement of our [redacted] employees. Much emphasis was directed towards training. We now have eleven (11) female mechanics in RMD Shops, seven of which are Sheetmetal Mechanics. They were formerly Utilitymaid sweepers.

5. Total block time was 6332 in December 69 as compared with 6238 in November.

6. BMSGN Merrill Hulse departed on 18 Dec 69 for extended leave which will keep him absent from the company for at least five months and very probably for a longer period. Mr. Hulse has been with the company for seventeen years serving as Assistant Supply Mgr., Tachikawa; Station Manager, Seoul, Korea; President's Office; Assistant Base Mgr. Udorn; and Base Manager Saigon 1965-1969. The entire staff at Saigon wishes him the very best in his future endeavors. The undersigned E.J. Theisen, has been designated to function as Base Manager SVN. It became immediately apparent that certain decentralization of authority via delegation to Departments is necessary to prevent an administrative hang-up. A new Base Manual Notice is being printed and will be circulated to all concerned. It should be noted, last year at this time the BM Office was staffed with seven personnel including BM, ABM, and AA/BM. The AA/BM position, has been abolished plus several clerk positions. Our current office staff stands at one Acting BM plus two [redacted] female clerical assistants. Meanwhile, the administrative workload (despite a decline in flying hours) continues to rise due greater sophistication in company and customer management and administrative policies, procedures and requirements.

Acting BM is becoming more and more strapped to his desk (Sundays included) with less & less opportunity to move about within the SVN AAM complex or to maintain an adequate personal rapport with customers and associate company representatives. Decentralization with discrete delegation of authority will help but will not come close to resolving this problem. A proposal to correct this situation is being finalized for forwarding to the Head Office.

The imposition of a stiff Austerity tax (up to 400% on some items) plus strong rumors concerning the devaluation of the piaster has created a highly evolutionary condition within the local economy. I do not think anyone knows the full impact of this development. There are as many opinions as there are experts and we have an abundant supply of both. Actually I doubt if anyone knows exactly where we are now and what direction we are headed. Meanwhile, the "Free Market" rate is running at 350 to 400 to one US Dollar. The situation is reminiscent of the status of the currency on the Chinese mainland in 1944 and 1945.

7. On 17 December 69 Saigon experienced its first rocket attack since 15 August 1969. One 122mm rocket landed six kilometers southwest of Tan Son Nhut. On 19 December four 122mm rockets landed

on Tan Son Nhut causing five US wounded, one Vietnamese killed and twelve wounded. Tan Son Nhut was last hit on 29 June. Terrorist incidents occurred in Saigon on 8, 16, 22, 23 and 24 December with the employment of explosives against the civilian population. These incidents were largely in effective.

II. GENERAL AFFAIRS

1. [redacted] a 15 years veteran [redacted] was appointed Director General of the company as a result of Air Vietnam strike in December. No immediate solution, however, is in sight for the employees' demand for a 50% salary increase. The company basic salary is far from being competitive but its cost of living allowance now stands at 200% thereof. A 50% salary increase, therefore, means a 150% increase in pay.

2. The new austerity tax promulgated by the GVN on 24 November, 1969 on the strength of the decree-law 20/61 was in serious trouble. The Supreme Court to which the decree-law as referred by the Senate for review of constitutionality and legality has declared it barred by limitation thus depriving the Executive action of its legal basis. The Senate is working on a compromise bill with reportedly a much lower tax rate (half of the Senate members are up for re-election this year).

3. Meanwhile the 1970 budget forecasted on the basis of the high tax rate has already been approved by both Houses. The pressure for inflation and devaluation of the piastre is mounting.

III. FACILITIES DEVELOPMENT

1. AR 7658 - Antenna Mast for Danang Station
Mast was erected on schedule, 11 December 1969.

2. AR 7659 - Antenna Mast for Nha Trang Station
The Base was poured on 11 December 1969. The mast was erected on 9 January 1970 using a 35' mobile crane borrowed from PA&E.

3. AR 2077 - Completion of Base Area Lighting (SGN)
Lights have been placed around the perimeter of the Northeast Ramp. RCAD crew is in the process of installing electrical connections.

4. AR 2236 - Additional 200 KVA Transformer (SGN)
On 16 December 1969, the SDL (City Power Company) arbitrarily installed a 300 KVA transformer in lieu of a 400 KVA transformer. They also informed us that a 400 KVA transformer will be installed when it becomes available probably next month.

5. Project 6695 - Renovation of the Operations Bldg. (SGN)
This project awaiting TPE approval.

6. Project 6702 - 204B Touchdown Pads (SGN)
This project awaiting TPE approval.

IV. SECURITY

1. Rumored Public Disturbances - The rumor from mouth to mouth that the Vietnamese currency will be devaluated to the lowest point after RVN Government puts into circulation the 1,000 bank notes which are expected to be issued soon this coming year, and the cost of living will be higher.

V. MEDICAL

1. Number of visits: 1670
2. Accidents: 74
3. Hospitalization: 1
4. Outcalls: 4
5. Physical examinations: 21
6. Sick leaves: 292

VI. PERSONNEL

1. Business for the month was a bit slow owing to the holiday season. "part from routine activeties our efforts were directed toward overseeing the Vietnamese Employee Representatives' Election and decking the Personnel Office halls with boughs of holly.

Employee participation in the election was somewhat less than impressive. Only 38.2 percent of the electorate in Saigon got out to vote. Most of the primary representatives elected are repeaters from past years.

2. Personnel Strength - Saigon Base

VII. TECHNICAL SERVICES

1. Aircraft Maintenance, fixed wing - December has been an average month in expending skilled manhours on aircraft maintenance. Although workload has varied, from light to moderately heavy, it has been possible to fully utilize the manpower most of the time

2. Rotary wing - Approximately 1085 helicopter hours were flown during December.

N8512F was transferred to Udorn the first part of the month, this leaves a total of 7 helicopters based at Saigon now. Two Saigon helicopters (N1303X and N1305X) went over 7000 hours airframe time during the month.

The change over to Esso 2380 oil was completed during the prescribed amount of time listed on SL-208-004 so far no problems with any excessive carbon etc.. in any filters.

3. Shop Section - The overall RMD Shops activities remained on an even par. No annual inspections were performed this month, however, two form 337s were forwarded to the FAA Manila Office. These reports covered the installation of the B2C Automatic Flight Control System on aircraft N393R and N153L.

Since this is the final monthly activity report for the year 1969, it is a good time for reminiscing. Progress has been made in all areas and this is as it should be. Perhaps the best was to measure progress is by comparing the end product.

If one achievement during the past year were to be selected as the most significant, it would be the training of unskilled indigenous personnel as replacements for journeyman TCNs. One year ago there were no indigenous personnel in the Sheetmetal Shop. [redacted] This progress is not limited to only one shop. The combined RMD Shops complex has increased from a 17.2 percent indigenous staff one year ago to 41.2 percent today.

4.Planning - The present personnel strength of the Maintenance Planning Department in Saigon is 14 in comparison to the 19 persons in April 69, this personnel reduction percentage equals to the reduction of aircraft assigned in SVN.

Since the support from MMB by transferring to SGN a reconditioned stencil machine on exchange basis, the Publication Unit has been in its most efficient operation. It saves an estimate of US$300 permonth.

In December, the scheduling and Production section pre-planned, scheduled and processed, for aircraft of all types: 500 overnight services; 28 number 1 services; 22 number 2 services; 2 number 3 services; 2 number 4 services; 7 engine changes (2 for 204B); 7 propeller changes; 59 BA's; 130 SI's; 16 EI's; 219 time controlled components change on 204B; two T53 engine hot section inspections; 12 DRR's; and 383 shop work orders; 204

5. General Maintenance - A 300 KVA Transfer was installed 16 Dec. 69 in the vault by the City Power Company. A 400 KVA transformer will be installed soon as replacement.

A 200m^2 power cable is being laid between the utilities building and GMD complex.

Building and Grounds Manitenance Excavation of another manhole infront of the hangar is in progress.

The water supply problem is being worked on. A gate valve was installed on the piping system at the TSN well and their operators have been instructed on the pumping schedule. With proper monitoring of theconsumption, AAM will have water available from 0600-2200 from the elevated tank.

6. Technical Training - The following courses were completed during December: (a) Garrett TPE 331: Two courses were held at Can Tho; (b) Courses in Progress (Auto Maintenance): This course for GMD auto mechanics.

On 13/14 Dec. the FAA written examination was held in Saigon. Fourteen AAM students from the Powerplant course completed the written part.

Three FAA oral and practical mechanics successfully passed written and practical examinations and received their FAA mechanics licenses.

1969 was a year of increased training for our [redacted] employees with a total of 296 [redacted] receiving technical training in Aviation training.

The completion of our first helicopter flight mechanics course enabled four TCNs to qualify for flight mechanic.

7. Supply - Stock Control

In December, Stock Control's workload showed a slight four percent decrease in its overall transactions as compared with the previous month

In early part of this month, there were a total of 262 line items needed for the project; 126 line items were available in stock; 26 line items NIS and 111 line items found never carried in this station.

Procurement Section of Supply-Saigon experienced a high increase (42%) in the number of transactions during this reporting cycle. A total of 301 line items of commodities were purchased from local market in comparison with 212 line items procured last month.

Total value of commodities purchased from the Saigon/Cholon market amounted to VN$921,527.00.

A decrease of AGP cases was noted the past month with five aircraft grounded caused by the lack of six rotable or recoverable parts with no revenue hours lost.

Shipping and Receiving

This section's workload remained at the same busy level than during the previous months. Ever increasing emphasis has been given to this Section's personnel training in the correct handling and documentation of cargo.

The flow of critical items remained also constant and is being watched closely for faster processing back to MMB.

The movement of Personal Effects is still very much in evidence. Improved or new methods of handling Personal Effects to and from the SVN satellite stations are under discussion with the "door-to-door" VANPAC SEA representative.

The Customs Unit is kept hoping and is doing a remarkable job despite the holidays' congestion.

VIII. TRAFFIC/AAM

	November	December
Passengers departure SGN (All contracts)	6,007	5,997
Passengers arrival SGN (All contracts)	6,677	6,754
Outbound cargo SGN	82,893	64,725
Inbound cargo SGN	96,146	86,628

2. TRAFFIC/USAID

	Cargo (including AF Caribou A/C)	
	November	December
Outbound (lbs) SGN	1,534,916	1,717,396 lbs
Inbound (lbs) SGN	101,577	538,788 lbs

IX. OPERATIONS

1. We can expect a smoother running operation with our new telephone system. All incoming calls are routed thru Operations when the Air America Telephone Operator secures for the day and these calls can be transferred to other departments. Outgoing calls have been much simplified by the new automatic dialing system.

There were 28 controllable and 58 non-controllable delays with a total of 929 Saigon departures.

2. There were considerably less GTD complaints during the month. The earlier survey made on improving GTD certainly has a bearing on it becoming a smoother operation. New rules governing GTD have been made a part of the Base Manual. A study is underway now to reduce our Microbus fleet as a means to cut costs in this department. Subsequently, this opportunity will be used to release some of the less desirable drivers, however positions will be maintained to hire more suitable personnel to bring the department up to it newly established operations strength.

3. Flight Time Report (See attachment A)
Aircraft Incidents Report (See attachment B)

4. Accident Reports

Date	A/C Type/No.	Location	Remarks
05	PC6/N153L	V-167	One prop blade tip dented beyond limits on T/O or landing.
06	PC6/N192X	V-248	A/C arrived V-248 with left tire flat. Sharp object caused 3/4' puncture in sidewall.
08	VTB/N7770B	V-05	A/C arrived V-05 with right main tire flat. Tire blew out at large flat spot probably caused by excessive braking.
12	DHC-4/N539Y	V-05	Left nose gear damaged - stayed open on retraction. Inspection revealed erroneous pin-ball-lock had been installed. Wrong part P/N BLS4R1.25N, correct part P/N BLS4R1.5N.
13	PC6/N153L	V-56	Tail wheel dropped into 6' rut while turning around for T/O. Tail section buckled rt side fwd of tail wheel post and under right stabilizer tail wheel strut piston bent.
16	VTB/N9838Z	V-20	Cabin door came open on T/O roll, slight damage. Door not properly closed and latched.

16	DHC-4/N539Y	V-01	Both nose gear doors failed to open on retraction, both extensively bent. Link assy's P/N C4B1215-1 found bent, probably undiscovered after door incident on 12 December. Leadman received 3 days LWOP.
16	C-46/B928	V-27	Same damage reported in paragraph 5.
20	C-46/B910	V-01	Marketeer struck belly of A/C below passenger door, very slight dent in A/C, steering column of Marketeer bent back, and driver slightly injured. He stated Marketeer went forward when he placed trans handle in reverse. Marketeer transmission handles move forward for reverse and rearward for forward which is unnatural movement of control lever.
21	VTB/N9838Z	V-07	Right prop struck runway during landing, prop and nose section substantially damaged. Investigation complete, scheduled for Board Review on 9 Jan.
22	C-47/083	V-01	Left elevator found with 3' tear and trailing edge bent. Crew had no knowledge of damage, cause undetermined, suspect damaged on V-01 ramp by vehicle or cart.
23	PC6/N391R	V-17	Left horizontal stabilizer incurred a 1sq ft hole 6' deep on landing at V-17, suspect struck by rock
25	PC6/N185K	V-01	Right wing tip and aileron damaged by forklift. AAM driver received 3 days LWOP.
27	204B/N1307X	AT8647, SVN	Fatal injury incurred by VN National, ran into tail rotor. No A/C damage. Report being prepared.

5. Ground Transportation

Aggregate microbuses mileage:	22774 km or 14233 miles
Microbuses downtime:	378 hrs 24'
Microbus pax-carried:	3256 pax
Isuzu bus mileage:	6434 km approx. 4021 miles
Isuzu bus downtime:	255 hrs 72'
Isuzu bus pax-carried:	10520 pax
Supply vehicles mileage:	2859 km approx. 1786 miles
Supply vehicles downtime:	52 hrs.

X. FLYING

1. MFDSVN was absent during the first part of December and returned in time to step into the middle of the messes.

A week visit of AVPFO to Saigon and sub-stations was probably the single highlight of the month. It is believed he should now have a better current understanding of our problems. Equally important, the fact that anyone from the Taipei management level actually spent a considerable amount of time "out-amongst-um" gave a boost to crew morale when it was badly needed.

2. We finished the year without the myriad scheduling problems of attempting to stay within the flight time limits that plagued us a year ago. One captain had 1000 hours + 58 minutes. All others stayed under the limit.

XI. FISCAL

1. Budget matters - Total net reduction of work force during December was 31 persons. An analysis of salary costs by department was prepared and shown to weekly staff meeting. This created much interest in the total cost reduction program. Each department was asked to prepare a written evaluation of his department manning requirement and additional savings he can make during the last quarter of our fiscal year.

E.J. Theisen
Base Manager - Saigon

26 Dec	M8535F 204-B 7002	XS5266	A/C was enroute to V-17 when the PIC observed a burst of tracer fire directed at his a/c. Capt. KNOTTS immediately changed his a/c direction and gained altitude. No personnel injuries or a/c damage involved.	

PART II

- Situation Report -

I CORPS : Emphasis has been given to reports of LOC's (Lines of Communication) in Laos leading into RVN undergoing repair and logistic activity by recent sensor activation and sightings of vehicular movement along the Quang Tri/Laotian border just west of Khe Sanh [redacted] Sightings of logistic activity have been reported also in an area just south of the DMZ in NE Quang Tri province. These sightings along with a captured enemy document revealing objectives for a forthcoming offensive give credence to speculation of an enemy offensive in I Corps during Tet 1970.

II CORPS : During the reporting period enemy activity was largely concentrated in southwestern II Corps. Elements of the units involved in the attacks against Bu Prang and Du Lap Special Forces Camps are believed to be moving northwards towards the Tri-border area. Low level sources continue to mention the possibility of increased enemy activity prior to Tet 1970.

III CORPS : While there was a decline in attacks by fire for the reporting period, there was a sharp increase in the number of terrorists incidents the most significant taking place in Saigon. From the 22-24 of this month 9 terrorist sapper incidents were carried out in the capital. All involved the use of explosives apparently aimed at the civilian polulace, but were not particularly well executed. On 16 December two terrorist incidents were reported. On 8 December one incident was reported.

On 17 December Saigon had its first rocket attack since 15 August 1969. A 122mm rocket impacted six kilometers SW of Tan-Son-Nhut. On 19 December four 122mm rockets impacted on Tan-Son-Nhut Air Base resulting in five US wounded, one Vietnamese civilian killed, and 12 Vietnamese wounded. This was the first rocket attack against the base since 29 June. On 12 December Bien Hoa [redacted] took 11 rounds of 122mm rocket fire followed three days later by a rocket attack on the Naval Facility at Vung Tau [redacted] resulting in 2 Vietnamese civilians killed and seven US wounded.

IV CORPS : During the reporting period activity remain at a moderate level. The first indications of the 101D NVA Regiment intentions of infiltrating into Chau Doc province was provided by captured documents. Although there were numerous low level reports mentioning enemy plans to attack population centers, the GVN pacification program is still considered to be the primary goal.

D E C E M B E R 1969

GENERAL

All U.S. Military facilities on our side of the Airport are now closed. Eating facilities have vanished in this area. Breakfast is now being taken at the "Neptune" NCO Club and we have obtained refrigerators for Sodas, Sandwiches and Doughnuts sold to flight crew for lunch when desired. The only remaining alternative would be to transport crewmembers to the other side of the airbase for these meals. Presently we are investigating the possibility of having someone operate a Snack-bar in the area. More will be known by the next report time.

No military incidents occured this month.

TRAFFIC

Another slight decrease in revenue flying time this month due to the CHARTER schedule, inclement weather, and loss of one DC-3 from this station. (See statistics)

MEMORANDUM

TO : BM/SGN

DATE: 05 December 1969

FROM : SZ/DAD

REF. No. SZDAD/69/121

SUBJECT: DANANG Station Monthly Report for November 1969

GENERAL

The apparent lull in hostile activity continued throughout the month of November. Nearly three months have now elapsed since the last significant incident involving casualties and destruction in the Danang Area.

No further changes have been effected in air base and city curfew hours. However, on 22 November, nine TCN personnel were denied entrance to the base due to expired air base passes. Special arrangements were made which would allow these personnel to enter the base and applications for temporary passes were submitted to the VNAF security authorities. These efforts can only be considered as expedients since applications for permanent 1970 base passes will be processed in December with valid extensions of stay required as supporting documents for all TCN personnel. Very few of these personnel have been granted an extension of stay due to difficulties being encountered in obtaining prerequisite work permits.

No problems were encountered with the five Southern Air Transport flights which transited Danang; routine turnaround maintenance support for these aircraft have ceased with the transfer of the station maintenance supervisor to Saigon.

The critical airconditioner situation reported previously was somewhat alleviated with the advent significantly lowered temperatures experienced during the last half of the month. As a result, airconditioning has not been a serious requirement.

The local director of Customs has verbally indicated that there should be little problem in obtaining authorization to load and offload cargo on company international flights transiting Danang. Formal written authorization has been requested but no reply has been received to date.

CUSTOMER RELATIONS

The AID/VN-70 Air Operations Officer has expressed some dissatisfaction with the amount of time being required to obtain company approval for the passenger terminal renovation project. It is understood that the proforma AR has now been forwarded to Washington for final approval.

Considering the number of flight delays and cancellations due to weather, overall relations with both customers on an operational level have remained excellent.

LEGAL

A local national was seriously injured when he entered the tail rotor arc of 204B N85357 at Dai-Loc on 15 November. He was evacuated to the Danang/USAID hospital where he was treated for a severe left arm fracture and moderate facial abrasions. The attending physician advised that skin grafts should be made on the arm, but the facilities for same are only available in a private clinic. SLC has been queried as to whether or not any company liability should be assumed for the cost of this medical treatment.

FACILITIES

The footing for the station eighty foot, free standing, antenna mast was poured during the month. Erection of the mast should take place on or about 10 December when the concrete will have adequately cured.

The USAF furnished generator was unusually reliable during the month. Power failures were infrequent and of short duration. Commercial power consumption was therefore substantially reduced.

The city power company, S.I.P.E.A., has announced an increase in electricity rates. The price per kilowatt hour is now 14 piastres, an increase of 1.63 piastres.

Routine maintenance of the station facilities has been reduced pending clarification of the means for obtaining customer materials support. All buildings at Danang are considered Government Furnished Property.

FISCAL

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures for the month totaled: 24,829$VN

OPERATIONS

Total revenue flight time declined substantially during November as compared to October. The decrease amounted to 155+02 hours. Although poor weather was the primary causal factor, the revenue loss figures somewhat conceal this fact since many flights were not even scheduled by the customers due to adverse weather conditions.

The following is a breakdown of flight time generated by this station during November:

VN/70 AID	692+03
VN/70 END	226+37
0005	Nil
0069	Nil
Non-Revenue	10+19
Total	928+59

Revenue losses for the month were as follows:

Weather - - - - - - - - - - -	15+40
Maintenance - - - - - - - - - -	2+00
Customer Cancellations - - -	30+30
Total - - - - - - - - - - -	48+10

Flight dispatch activity was somewhat hampered by a lack of timely weather reports. With the significant deterioration in overall I Corps weather the need for extensive and up to date weather information is becoming more and more critical. Although weather telstype and autowriter equipment has been installed in operations for over a year it has not been connected to the base circuits due to alleged radio interference problems associated with the ground radio transmitters.

Since these transmitters have been relocated and the USAF had recently installed a new 25 pair underground telephone cable in the Operations/Administration building, coordination with the local communications squadron was effected whereby this equipment will be reconnected in the near future. In fact, it appears as though Air America Danang is programmed to receive, from the Air Force, an upgraded weather teletype capable of receiving 100 words per minute in January.

Hostel occupancy factors were 85.65% and 33.50% for the Old and New hostels respectively.

COMMUNICATIONS

Periodic failures of the VHF/UHF ground radios were experienced during the month, but no extensive problems were encountered in their repair.

Incoming and outgoing messages totaled 1803 and 1388 respectively.

TRAFFIC

The Danang Traffic Manager, Mr. Ogsbury, resigned effective 25 November. Since this position was funded under the Ground Services complement, the AID customer has decided that a PS-D replacement is not necessary to supervise and manage the activities of the USAID warehouse operation.

Pending future developments in this area, TM/GS-SGN has been assigned to the station on a temporary basis. He is being primarily utilized in Flight Operations as a tentative replacement for SOR/DAD who is on extended home leave.

Passenger and cargo statistics for the month are as follows:

	Passengers In	Passengers Out	Cargo In	Cargo Out
VN-70/AID	2,574	2,696	316,868	346,454
VN-70/Embassy	476	525	1,200	2,982
0069	3	8	-	-
0005	5	1	-	-
AAM	105	119	8,482	34,564.9
Total	3,163	3,349	326,550	384,000.9

SECURITY

A meeting was held by the VNAF Security Office to outline the processing requirements for 1970 Air Base passes. Although it was admitted that air base pass processing procedures had been standardized throughout South Vietnam, a given pass will only be valid for the installation where issued. No problems are anticipated in obtaining new passes for local personnel, but as previously mentioned, serious difficulties may result if extension of stays are not received for TCN employees.

PERSONNEL

An employee representatives election is scheduled for 8 December. APM-SGN made a station visit to set up the election procedures and to coordinate with the local labor ministry officials. From all appearances, there is little employee interest in this matter and a scarcity of volunteer candidates.

This office has yet to be approached by any employee regarding the increased cost of living which has resulted from the recent government implementation of austerity taxes. The U.S. Consulate advised that several basic food prices have increased significantly in the Danang Area, but no formal manifestations of discontent have so far occurred.

The personnel breakdown at Danang station at the close of business, 30 November, was as follows:

	[redacted]			
Permanent	3	20	14	83
Pre-Process	0	0	0	0
Temporary	1	0	0	0
Daily-Hire	0	0	0	0
TOTAL (121)	4	20	14	83

TECHNICAL SERVICES

RMD handled a total of 616 arriving and 617 departing flights during the month, a slight decrease as compared to October. Flight delays attributable to maintenance also decreased, for a total of 3. Heavy services for the month totaled 6, including one PC-6 number 1 and two 204B number two services. Only one outstation recovery was necessary; two engine changes, and one propeller change were required. For the second consecutive month, five aircraft were placed on AGP status.

RGMD expended a total of 842 manhours of which 465 were utilised in general maintenance at the Old and New hostels.

No significant problems in the area of MSA procurement were reported during the month, but long delays are continuing to be encountered in the delivery of construction materials and POL products.

THAI-US RELATIONS TAKE ANOTHER THUMPING

Thai government leaders have voiced their strongest criticism of the US in several years over what they believe to be US interference with a pending sale of 20,000 tons of Thai rice to South Vietnam. Some cabinet officials assert that Saigon withdrew from the negotiations on US "orders," and they view the substitution of a delivery of US rice to Saigon as clear evidence of US chicanery. Foreign Minister Thanat has led the attack, implying to the US ambassador that Washington's action was deliberately cutthroat and labeling as specious the ambassador's explanations to the contrary.

Although the Thai leaders in a more halcyon period might have treated the incident as an isolated one, it has come at a time when they are deeply troubled over the nature of their relations with the US. Already apprehensive over what they believe to be a weakening in the US commitment to Thailand's security and dismayed over criticism in the US of Thailand's role in the Vietnam war, the Thai are reacting strongly to each instance in which Washington appears to be downgrading Thai interests.

Bangkok is apparently prepared to pursue the rice issue forcefully in an effort to regain an appearance of equality in its dealings with the US. Although the Thai have been careful in the past to mute their differences with the US, both Thanat and Prime Minister Thanom have made the issue a central theme in recent press conferences. Thanom also said his government plans to put the controversy on the top of its list of things to discuss during Vice President Agnew's coming visit to Bangkok. Thanat has already warned the US ambassador that a formal protest might be made if Washington is not "responsive" to his strong verbal protest.

Although the Thai can be expected to press hard for greater US recognition of Thai interests, for instance in the rice trade, they are aware of the limited leverage they can apply. The dispute over the rice contract will probably not go much beyond protests, but the Thai could complicate other matters of mutual concern, such as the determination of who has criminal jurisdiction in cases involving US personnel in Thailand. (~~CONFIDENTIAL NO FOREIGN DISSEM~~)

NND 941536 --- 3922

SAIGON BASE
MONTHLY REPORT
JANUARY 1970

I. GENERAL

1. Total block time in January 1970 was 6114 vs 6332 hours for December 1969.

2. VN-70 Customer (USAID/CORDS) Terminated 2 VTBs (N9838Z and N7695C) plus one C-46 (B138) effective 31 January 70. B-138 will remain in Tainan in temporary storage status whereas the VTBs (for the time being) will remain in SGN. VTB N7695C will go to temporary storage in SGN and N9577Z will be carried as a SGN spare. The VTBs were terminated due to internal customer problems however we expect full utilization of the spare aircraft and our experience so far in February bears this out. We will watch this situation very carefully and make recommendations accordingly. Meanwhile VN-70 has issued a Call Order for DHC-4 N544Y effective 1 February 70. I would forecast a fairly stabilized flying program between 6200 to 6500 block hours for an indefinite period.

3. The change in our pilots uniforms with the addition of epaulettes and "scrambled egg" hats for the Captains has had a noticeable effect. Our aircrews look sharper, act sharper, and (I hope) will fly sharper. Their over-all personal appearance is much improved with better creased trousers, haircuts and better polished boots resulting from what I believe is the psychological effect of the improved uniform. I am, indeed proud of their appearance. The customer is also favorably impressed.

II. FACILITY DEVELOPMENT

1. We are quite stabilized in our facility development with no major projects which urgently need doing except Project 6695 - Renovation of the Operations/MFD Building which formerly housed the Base Manager's Office, and Project 6697 - Relocation & Renovation of various Shops and Offices. These have been substandard facilities throughout our evolution as a major base within the company system. Both projects have been forwarded to the Head Office - TPE for approval.

III. CUSTOMER RELATIONS

1. Our relations with all customers has never been better. They are so congenial, it is unbelievable.

IV. GENERAL AFFAIRS

1. Cost of living - According to the National Institute of statistifs, the consumption index for Dec. 69 as compared with that of 1968 increases by 28.4% for the middle class and 31.7% for the workers class. Compared with the index of the base year 1963 of 100, the 1969 index is as follows: Middle class: 452.1 ; Workers class: 500.2

The cost of electricity has recently increased by 40% from VN$6 to VN$8.4 per kw/hr.

2. Air VN pay increase - The employees' demand for salary increase was finally settled. Effective 1 January 1970, The Board of Administration approved salary increase as follows:

Grade I - 4	:	2100	VN$	per month
Grade 5	:	1500	"	" "
Grade 6	:	1200	"	" "

The pay raise results in the company's payroll being increased by 5 million piastres per month.

3. Tet gifts - In appreciation for assistance during the past year, token gifts were presented to 148 GVN officials or ARVN officers with the following breakdown:

High level : 36
Supervisory level: 33
Working level: 79

V. SECURITY

1. Rumored public disturbances - None

2. Historical or customary dates & particulars forthcoming demonstration - The Vietnamese New Year "TET" took place on 6 through 8 Feb. 1970. All business has been suspended on those days and no customary demonstration anticipated. According to a joint communique of the Commander of the Special Military Capitol and the Military Governor of the Saigon and Gia Dinh, fire crackers were strictly prohibited.

VI. MEDICAL

Number of visits: 1351
Accidents: 78
Hospitalization: 1
Unhospitalization: 77
Outcalls: 6
Physical examination: 19
Sick leaves: 261

VII. PERSONNEL

1. General Information - It looks as though the Year of the Dog is also to be the Year of the [redacted] Trainees. We are assured at this time that a majority of the Tainan candidates will be able to leave for Tainan in February. As appropriate, cable correspondence will be sent to all concerned keeping them advised of all late developments.

There is lots of talk of an impending devaluation; the value of the piastre on the open market is still about VN$350 to US$1.

2. Personnel Strength - Saigon Base

	December 69	January 70
Outbound (lbs) SGN	1,717,396	1,458,201
Inbound (lbs) SGN	538,788	450,007

IX. OPERATIONS

1. There were 23 controllable and 68 non-controllable delays with a total of 930 Saigon departures. Early morning Saigon ground fog was a major factor in the number of non-controllable delays.

2. Flight Time Report (see Attachment A)

Acircraft Incidents Report (See Attachment B)

3. Accident Report

Date	A/C Type/No	Location	Remarks
02	PC6/N9444	V-02	Right wing struck Army truck while A/C was being marshalled into parking spot by USAF lineman. Substantial damage. Investigation complete, Local Board during week 8-14 February.
11	PC6/N394R	V-84 to V-23	PIC heard 1 rd hit A/C while at 1000' above terrain. PIC maintained heading and increased altitude. Minor damage from 30 cal hole leading edge of left wing.

4. Communications

Project 6683: Transmitter Building and Antenna System, Saigon Ninety-five percent completed. All transmitters and ancillary equipment were moved into the new transmitter building in mid-January/ Only power hook-up to the 300 KVA generator and minor wiring remain to be completed. Old transmitter building has been razed and all old antennas and antenna towers have been lowered.

Project 6696: Installation of 400 KVA Transformer, Saigon Base continues to utilize 300 KVA transformer which was installed on a temporary basis by the power company. Completion of power cable distribution system awaiting arrival of stand-off insulators from Hong Kong.

Project 6700: 60' Antenna Mast, Nha Trang (HF Transmitter Relocation) Mast and antennas erected. Construction of transmitter building near completion and expect to have transmitters relocated and operational by mid-February.

Project 6701: 80' Antenna Mast, Danang (HF Transmitter Relocation) Completed. All transmitters were relocated and were operational by mid-January.

Project 6708 & 6709: Telephone cabel distribution system and Base PABX Completed and 100 percent operation as of 7 Jan.

ATTITUDE SSB Voice Circuit: Transmitters installed in new transmitter building and new beam antenna erected in late December. Receiver console and ring down equipment transferred to Message Center. Muting devices for

receiver installed allowing headset operation only (no speakers).

The above represents the major projects which have been completed during the past two months after many years of planning and waiting for the fruition of said plans. Many projects remain to be completed. Some are, Southeast Asia Radio-teletype circuits, Tan Son Nhut/PTT Saigon speach plus radiotyletype UHF link, Saigon Paging System and P.A. System, Message/Communications Center Installation including added on and off-line teletype circuits as well as expanded on base teletype distribution system. These are but a few of the projects to improve the everincreasing need for more and better communications. They are in various stages of partial development with much remaining to be done before final completion.

5. Ground Transportation

Aggregate microbuses mileage:	23098 km or 14430 miles
Microbuses downtime:	154 hrs 23'
Microbus px-carried:	3248 pax
Isuzu bus mileage:	6315 km or 3946 miles
Isuzu bus downtime:	51 hrs 30'
Isuzu bus pax-carried:	10502 pax
Supply vehicle mileage:	2162 km or 1351 miles
Supply vehicle downtime:	131 hrs

6. Flying - The month also saw FEPA and associated activities take up a lot of time. The problem is becoming more acute as to just what position, attitude and relationship should exist between FEPA and MFD. There is the problem as to what and how much office and administrative support is to be provided. There does not appear to be any abuse of their requirements but the volume of work required continues to increase and there is a definite need for a definitive decision as to the policy that is to be applied to this area. A request for this guidance has been requested in a separate memo submitted earlier in the month but no response has been received to date.

In the middle of the month we received the new epaulettes and the hat bills for Captains. The general impression appears to be that it was an improvement from before but there was obvious disappointment in that the epaulettes were not the design that was the overwhelming choice of the crews.

FEPA and the Flying Department did considerable work in attempting to arrive at a reasonable and satisfactory proposal for the hostels and general crew accomodations at outstations.

The arrival of the first few transponders is already getting favorable comments from the pilots and greatly surprised reactions from various ground controllers.

Discussions at the end of the month with Senior representatives from the Embassy Customer indicate complete and enthusiastic support in obtaining UHF radios.

X. TECHNICAL SERVICES

1. January was an uneventful month in respect to unplanned/unscheduled events, but progress was made in most areas on production and administrative problems.
The Cantho Station celebrated the completion of its First Year of successful operation on 10 January.
Inspite of progress in other areas, our primary objective: Flying hours took another drop with reduced hours on all types of aircraft, with the exception of the C47 and C46. The total flying being down more than 200 hours from the December level. The number of C45/10-2 aircraft assigned here remains at three with two in storage. Helios are reduced to one, in storage. Performance of the turbo-prop aircraft continued to improve . Consolidation of the Ground Communications facilities was completed with the transfer of the remaining transmitting equipment, and the CMD Offices to the CMD Complex.

2. Aircraft Maintenance The work load has remained steady during the month of January. Three C-46 and one C-47 aircraft were reported to have engine vibration in flight, the cause of which has been mainly the props. Shortage of serviceable props and engines for Porter and the Volpar aircraft was experienced for awhile.

The crew supervisors received class room instructions on various types of propellers.

3. Rotary Wing This month has been normal maintenance wise with total flying hours about average at 1010.

4. Shops Shop activities remained on an even par during the first half of the month, then picked-up during the second half. No annual Inspections were performed this month.

The number four service on PC-6 N285L is progressing.

Effective 1 January, an Open Maintenance Work Order numbering system was put into operation. There is no change in the basic system but this revision does eliminate a lot of unnecessary paperwork.

The installation of the ATC Transponders is progressing very well. It was necessary to change the location of the control unit on g the VTB-18 instrument panel from the position indicated on the proposed EA print. Engineering has been advised.

5. Planning/Engineering The Planning and Production Control Section pre planned, scheduled and processed, for aircraft of all types; 499 Overnight Svces, 29 Number 1 Svces, 19 Number 2 Svces, 5 Number 3 Svces, 2 Number 4 Svces, 13 Engines Changes, 16 Propeller changes, 56 EA's, 71 SI's, 2 EI's, 180 time controlled components change on 204B, two T53 engine hot section inspections, 4 DRR's, 4 CRR's and 313 shop work orders.

6. General Maintenance - All transmitter equipment from the old Transmitter Building has been moved to the new Transmitter Building located in the GMD Complex.

7. Equipment Maintenance - On 1 Jan. 70 PEMD went to the day/date scheduling of routine maintenance of equipment.

8. Electronics - Activities for the early part of the monthe were planning and scheduling of work for the approved AR-9053, EA draft, Freq plan changes for SEA, FM Transceiver Evaluation and approved EA were received simultaneously.

SCM and COMENG SGN Office was transferred to the new PABX room located in the GMD Complex.

9. AED Line Service - Completion of EA - issued for protection of VHF Antenna A-15 was made. A number of A-15 Antenna unit had to be repaired upon removal. S/Shops provided us support in manufacturing lock nut through machine lathe.

10. Technical Training activities increased during the month of January and with the holidays behind us several courses were completed: Garrett TPE-331, Integral fuel tanks, Propellers, A/C control cables, T-53 fuel control.

Courses in progress: Auto maintenance.

Three mechanics received their FAA Oral and Practical examinations with two men passing.

11. Quality control - The station started their first PC-6C No. 4B Service this month with only a few problems being encountered that involved Quality Control and most of them came from problem on components sent from TNN or from lack of parts.

12. Stores - During this reporting period, the workload for this section was increased by approximately 15% due to the original work of No. 4B SVC and PC6C Porter aircraft.

The tools display cabinets fabrication and installation are nearing the completion stage. This project should also see its conclusion during the next month.

Rearrangement and updating of stock records for all classes are still in progress and expected to be complete in the early part of February.

A total of 265 line items of commodities was purchased from the local market this month. Total valud of commodities purchased from the Saigon/Cholon market amount to VN$904,215.00.

FLIGHT INFORMATION CENTER

- SAIGON -

- MONTHLY ACTIVITY REPORT -
1-31 January 1970

PART I
—Ground Fire Incidents—

Date	A/C No., Type & Contract	Place	Description
02 Jan	N9577Z Volpar 7001	YD 3156	A/C was in climbout from Quang-Tri (V78) when pilot observed two men in separate small boats stand up and fire alternate automatic bursts at a/c. Pilot turned right and continued climb. No personnel injuries or a/c damage.
05 Jan	N1303X 204-B 7001	BT 0431	A/C was flying below weather when PIC heard a burst of small arms fire directed at the a/c. PIC immediately increased airspeed and departed area.
09 Jan	B138 C-46 7001	Vicinity of XT9903	A/C was being radar vectored to Tan-Son-Nhut ILS final approach on heading 280 degrees 3 to 4 miles east of outer marker. Tracer fire was noted to the right (north) of the a/c. Twelve to fifteen rounds of white, golf ball sized tracers passed just beneath the right wing arching to the left above the wing. PIC turned off the rotating beacon and advised Approach Control of ground fire. No personnel injuries or a/c damage involved.
11 Jan	N394R PC-6 7001	BS 6358	Pilots only awareness of ground fire was when he felt impact of one round on left wing. Pilot maintained heading and increased altitude. Bullet pierced front edge of left wing causing minor damage.

PART II
- Situation Report -

During January enemy activity and movements were observed closely for indicators of enemy intentions during the traditionally active Tet holiday period the most critical time frame being from late January to the middle of February. I Corps

ATTACHMENT "B"

and the Delta were shaping up during the month to become the focal points for pre-Tet activity; however, neither area was subject to the degree of activity predicated.

In northern I Corps pressure was maintained on Allied units below the central and eastern DMZ and logistical activity continued in the western provinces specifically into and around the A Shau Valley. Enemy units were reported in an advanced tactical position in the Danang-Hoi An City area prepared to launch coordinated attacks against friendly ~~ix~~ installations, refugee camps, and hanlets. An NVA regiment reportedly moved from southern I Corps to Quang Nam province (Danang area) to support these attacks. All indicators pointed for a high point of activity prior to Tet. On the night of 31 Jan - 1 Feb contact was made with an estimated three enemy companies SW of Con Thien (eastern DMZ area) and areas in southern I Corps came under attacks by fire. However, pre-Tet activity was not achieved to the degree anticipated and predications now call for a high point in I Corps following the Tet holidays.

In early January an NVA Division with all its elements moved into II Corps in the vicinity of Binh Dinh Province with the Pacification Program reported to be its primary target. Cam Ranh Bay, Phu Cat, and Phan Rang Air Bases came under attack during the month with light damage and no casualties reported. While much speculation was made as to possible pre-Tet activity, it now appears that an increase in activity can be expected in Binh Dinh, Pleiku, and Kontum Provinces following the Tet holidays due to large numbers of enemy troops in and near these three Provinces.

In III Corps the most significant increase in enemy activity came on the night of 20-21 January as 49 attacks by fire (ABF) were recorded against Allied positions throughout the Corps. One of the hardest hit of these targers was Song Be (V30) MACV Compound which received 90-100 rounds of 82mm mortar. It was hit again at 1350 on 21 January with an unknown number of 120mm mortar rounds which caused a fire destroying the ammo and POL dumps (AAM had an acft on the ground there at this time but sustained no damage). In what was described as "heavy" infiltration was reported coming from the Parrotss Beak and Angel's wing portions of the Cambodia border. Saigon was subject to a number of terrorists ~~inx~~ incidents two of which involved explosions in movie theaters and three others taking place from one to six kilometers from Tan Son Nhut involving charges placed in jeeps parked near military installations. A post-Tet increase in activity can be expected in connection with the initiation of the first phase of the spring campaign. Northern III Corps and Central War Zone C will see activity. No specific mention has been made of Bien Hoa, Saigon, or Tan Son Nhut during the upcoming phase.

Recent enemy infiltration into the Delta, IV Corps, from the Crow's nest portion of the Cambodian border and a build up of troops along the north-western portion of the border gave rise to much speculation as to the enemy intentions during the critical Tet time frame. Cities mentioned targeted for activity included Chau Doc and My Tho. Since much emphasis is being placed on the Vietnamization Program here, it is considered likely that the enemy will attempt to discredit the ARVN and at the same time hit targets involving the Pacification Program. These attacks should come following the Tet holidays.

JANUARY 1970

GENERAL

January remained a quiet month with only routine problems. There was a slight increase in revenue block time relative to last month from 891 to 936 hours. This is reflected in the attached statistics.

The nearby camp Mc Dermott was hit twice by morters causing short term alerts.

TRAFFIC

No major problems a slight decline in passengers and cargo carrued. This however appears to be a seasonal fluctuation.

STATISTICS

MEMORANDUM

TO : BM/SGN

DATE: 05 January 1970

FROM : SZ/DAD

REF. No. SZDAD/70/002

SUBJECT: DANANG Station Monthly Report for December 1969

GENERAL

Hostile activity in the Danang area was neglible throughout the month. During a few evenings explosions were heard, but these were attributed to outgoing artillery fire.

Only two Southern Air Transport flights transited Danang in December, one of which operated the scheduled World Airways Stars and Stripes mission.

No information has yet been received regarding an authorization from the local Customs Directorate to permit the loading and offloading of company cargo on international flights transiting this station. Apparently the matter has been referred to Saigon for approval.

One local national sustained a severe head injury at An-Hoa on 27 December when he entered the tail rotor arc of 204B N1307X. The victim was evacuated to the Danang/USAID hospital but died shortly after arrival. According to the physician, the brain damage was so extensive that it was doubtful he would have lived regardless of the treatment facilities available.

CUSTOMER RELATIONS

Both AID and Embassy had TCS Air Operations Officers assigned at Danang during December but no significant problems have resulted during their assignments.

Numerous flights were cancelled due to weather, but with the exception of certain Volpar flights, difficulties in this regard were minimal. AID voiced some generalized complaints concerning the long block times experienced when Volpars were filed IFR. ATC departure delays in excess thirty minutes are common and extensive holding time is not infrequent for approaches, but AID would not make a clear cut decision as to whether or not flights should be dispatched IFR. In most instances, it was necessary to obtain their approval for the flight on the basis of the number of passengers manifested.

LEGAL

The lease on the New Hostel [redacted] will expire on 9 February. Due to the low occupancy rate at this facility it is doubtful that renewal of the lease will be recommended. Alternatives

LEGAL (Cont'd)

to relinquishing this property through either leasing another building to combine both hostels or leasing rooms in a local hotel are being investigated.

FACILITIES

The CSD shipping and receiving warehouse located adjacent to the ramp area was recently transferred to COMDS for operational control. Considering the long delay being experienced in obtaining approval for the Terminal Renovation Project, AID is exploring the possibility of renovating this warehouse for use as a passenger processing facility and to relocate flight operations so as to give this department visual access to the flight line. All work on this warehouse project, if approved, would be performed thru customer channels utilizing their GSO capability. The primary company expense and effort entailed in such a move would be the relocation of the station radio receivers and intercom system.

The station eighty foot antenna mast was erected on 11 December. A 204B was utilized to lift the mast into position which required 10 minutes flight time. Four poles are in the process of being installed to provide supports for the antennas. It is anticipated that this antenna may be operational by the end of January.

The USAF generator was almost one hundred per cent reliable during December. Commerical power was only required when scheduled maintenance was being performed on the unit.

FISCAL

[redacted] payroll for the month totaled [redacted] (includes year end bonus payment)

Petty cash expenditures totaled: 20,530$VN

OPERATIONS

Revenue flight time increased 74+57 hours as compared to the previous month. Although weather was responsible for several flight cancellations, there were days when unrestricted flying was possible. On these occasions, additional flights were scheduled which tended to compensate for previous revenue losses.

The following is a breakdown of flight time generated by this station during December:

VN-70/AID	764+56
VN-70/EMB	220+19
0005	8+22
0069	Nil
Non-Revenue	0+10
Total	993+47

Revenue losses for the month were as follows:

Weather - - - - - - - - - - -	49+45
Maintenance - - - - - - - - -	Nil
Customer Cancellation - - -	Nil
Other - - - - - - - - - - -	Nil
Total - - - - - - - - - - -	49+45

The station weather teletype and autowriter circuits were reactivated during the month by USAF personnel. NOTAMS are transmitted over the same circuit as the weather but these are usually transmitted at night. Presently, the teletype is being operated between 2230 and 2400 hours to receive the daily NOTAM summary. The night security guards turn the machine on and off at the above times.

Hostel occupancy factors were 78% and 43% for the Old and New Hostels respectively. The use of TCM flight mechanics and an increase in TCS RMD personnel are the primary reasons for the above distribution.

Mr. E.A. Clay, OM/SGN, arrived on 28 December to replace SOR/DAD who is on home leave.

COMMUNICATIONS

Telephone communications capability was doubled during the month with the installation of one additional Class A and Class C line. The Class C telephone is connected to an instrument in the passenger terminal for passenger use only. The remaining three telephone circuits are connected to the station intercom/telephone system. Unfortunately, there are no provisions for having two of these lines ring on incoming calls. Ground radio is attempting to connect the one ringer available to sound when any incoming call is received.

Incoming and outgoing messages totaled 1581 and 1433 respectively.

TRAFFIC

The PCS transfer of TM/GS SGN to DAD was approved, and with the arrival of Mr. Clay, TM/DAD has been relieved of responsibilities in Flight Operations.

Utilizing paint and materials supplied by the Embassy customer, the passenger processing area was repainted and rearranged and now presents a very attractive facility in comparison to the previous layout.

Passenger and cargo statistics for the month are as follows:

	Passengers In	Passengers Out	Cargo In	Cargo Out
VN-70/AID	2,393	2,581	372,963	298,404
VN-70/EMB	520	603	3,070	20,529
0069	5	2	-	-
0005	11	9	-	-
AAM	104	114	9,729.6	52,060.5
Total	3,033	3,309	385,762.6	370,993.5

SECURITY

Due to internal administrative difficulties, VNAF Base Security announced that 1970 base pass processing dates would be extended. Seventeen TCN personnel have yet to receive an extension of stay so it would not have been impossible to process new passes for these employees if it had been necessary to submit applications on 31 December as originally scheduled.

PERSONNEL

An employee representatives election was conducted on 8 December in compliance with Vietnamese Labor Law. Even though most indigenous employees participated, there was little interest displayed in the affair. One employee, elected as an alternate representative, formally resigned from the position.

The personnel breakdown at Danang station at the close of business, 31 December, was as follows:

	[redacted]			
Permanent	3	18	14	83
Pre-Process	0	0	0	0
Temporary	2	0	1	0
Daily Hire	0	0	0	0
TOTAL (121)	5	18	15	83

TECHNICAL SERVICES

RMD handled a total of 625 arriving and 624 departing flights, a slight increase as compared to November. There were no flight delays which resulted in a revenue loss attributable to maintenance during the reporting period. Four heavy services were performed during the month, all on 204B aircraft, two of which were Number 2 services. Only one aircraft was placed on AGP status.

RGMD expended a total of 740 manhours, of which 325 were consumed by leased properties. The main completed project was the installation to two high intensity lights to illuminate the PC-6 parking area.

No problem in the realm of MSA procurement was experienced, but a detailed reconciliation of those requisitions on back order status was requested.

MONTHLY REPORT

NHA-TRANG

DECEMBER 1969

GENERAL

All U.S. Military facilities on our side of the airport are now closed. Eating facilities have vanished in this area. Breakfast is now being taken at the "Neptune" NCO Club and we have obtained refrigerators for Sodas, Sandwiches and Doughnuts sold to flight crew for lunch when desired. The only remaining alternative would be to transport crewmembers to the other side of the airbase for these meals. Presently we are investigating the possibility of having someone operate a Snack-bar in the area. More will be known by the next report time.

No military incidents occured this month.

TRAFFIC

Another slight decrease in revenue flying time this month due to the CHARTERAIR schedule, inclement weather, and loss of one 204B from this station. (See statistics)

STATISTICS

Passenger		Dec.	Nov.	1968

SAIGON BASE
MONTHLY REPORT
DECEMBER 1969

I. GENERAL

1. January 70 started with a real bang with heavy gunfire all over the city of Saigon. Fortunately, it was friendly fire although quite frightening to many Saigon residents. I am sorry to report this irresponsible performance was 100% American.

2. Otherwise the year ended quietly without serious incident. In reviewing progress and improvements for 1969, we feel that many noteworthy accomplishments were made. To recap the highlights;

Saigon

(1) We received and installed a 60 KW and a 30 Kw generator for our initial backup power, when city power fails.

(2) We renovated an old GMD Shop Bldg and made it into a nice Administrative Bldg for all Personnel Dept activities.

(3) We received a link trainer and installed it in the OPS Bldg - tail number of the bird is "007".

(4) We erected revetment walls along the majority of our property perimeter.

(5) We have installed ramp flood lights on almost every ramp and perimeter wall.

(6) We had a new Bldg built for the Fire Brigade Dept, which includes vehicle shelter.

(7) A magnuflux machine was received, made operational and a room constructed for that activity.

(8) The old GMD Warehouse was renovated into a nice Cafeteria Annex facility, serving Vietnamese style food only.

(9) The West Ramp (dust bowl) was finally concrete paved by A&M Enterprises and is being well utilized.

(10) A new large (50,000 Gal) elevated water tower and deep well was constructed by TSN Authorities AAM shared cost interms of advanced water rent. This has nearly resolved all our water supply problems of the past.

(11) Some additional toilet facilities were constructed adjoining the RMD hangar. A welcome relief to the other limited facilities.

(12) The city power transformer was replaced with a company financed 300 KVA unit and hopefully soon a 400 KVA transformer will be available. A big improvement in our previous marginal power supply problems

(13) At years end, we finally installed our new PABX telephone system (100 drop unit). Telephone communications have been tremendously improved by this new system.

Can Tho

(1) We saw the opening of a new station on 10 Jan 69 at Can Tho. Mr. John Carter is the Senior Company Representative there and also the Supervisor of RMD.

(2) The new RMD/Supply Bldg there was completed in May. It houses Supply, RMD and AED Functions.

Nha Trang

(1) A new lean-to was constructed onto the RMD Hangar.

(2) The ramp lighting and rewiring project added considerably to general improvement there.

(3) A new enclosed employees scooter shed was built.

Da Nang

(1) The new aircraft concrete ramp was completed.

(2) A new lean-to was built onto the RMD hangar for use by RMD, PEMD and AED.

(3) Ramp floodlights, blast fence and public address system were installed there.

Two 204B helicopters were transferred to Udorn. We now have seven Bells as does Udorn Base.

3. All the Beech C-45 aircraft were moved to TNN for storage. The Helio H395 aircraft were transferred to VTE, except for two which were put into storage here.

Only three Beech Ten/Two aircraft are left here. Two of these are in storage and the last one is on contract until end Jan 70.

Overall flying hours slowly dropped from Jan through May and then settled around 6200-6400. The rest of the year June thru Dec was in this same range.

4. The year saw considerable progress in development and advancement of our [redacted] employees. Much emphasis was directed towards training. We now have eleven (11) female mechanics in RMD Shops, seven of which are Sheetmetal Mechanics. [redacted]

5. Total block time was 6332 in December 69 as compared with 6238 in November.

6. BASGN Merrill Hulse departed on 18 Dec 69 for extended leave which will keep him absent from the company for at least five months and very probably for a longer period. Mr. Hulse has been with the company for seventeen years serving as Assistant Supply Mgr., Tachikawa; Station Manager, Seoul, Korea; President's Office; Assistant Base Mgr. Udorn; and Base Manager Saigon 1965-1969. The entire staff at Saigon wishes him the very best in his future endeavors. The undersigned E.J. Theisen, has been designated to function as Base Manager SVN. It became immediately apparent that certain decentralization of authority via delegation to Departments is necessary to prevent an administrative hang-up. A new Base Manual Notice is being printed and will be circulated to all concerned. It should be noted, last year at this time the BM Office was staffed with seven personnel including BM, ABM, and AA/BM. The AA/BM position, has been abolished plus several clerk positions. Our current office staff stands at one Acting BM plus two [redacted] female clerical assistants. Meanwhile, the administrative workload (despite a decline in flying hours) continues to rise due greater sophistication in company and customer management and administrative policies, procedures and requirements.

Acting BM is becoming more and more strapped to his desk (Sundays included) with less & less opportunity to move about within the SVN AAM complex or to maintain an adequate personal rapport with customers and associate company representatives. Decentralization with discrete delegation of authority will help but will not come close to resolving this problem. A proposal to correct this situation is being finalized for forwarding to the Head Office.

The imposition of a stiff Austerity tax (up to 400% on some items) plus strong rumors concerning the devaluation of the piaster has created a highly evolutionary condition within the local economy. I do not think anyone knows the full impact of this development. There are as many opinions as there are experts and we have an abundant supply of both. Actually I doubt if anyone knows exactly where we are now and what direction we are headed. Meanwhile, the "Free Market" rate is running at 350 to 400 to one US Dollar. The situation is reminiscent of the status of the currency on the Chinese mainland in 1944 and 1945.

7. On 17 December 69 Saigon experienced its first rocket attack since 15 August 1969. One 122mm rocket landed six kilometers southwest of Tan Son Nhut. On 19 December four 122mm rockets landed

on Tan Son Nhut causing five US wounded, one Vietnamese killed and twelve wounded. Tan Son Nhut was last hit on 29 June. Terrorist incidents occurred in Saigon on 8, 16, 22, 23 and 24 December with the employment of explosives against the civilian population. These incidents were largely in effective.

II. GENERAL AFFAIRS

1. [redacted] a 15 years veteran of Air Vietnam was appointed Director General of the company as a result of Air Vietnam strike in December. No immediate solution, however, is in sight for the employees' demand for a 50% salary increase. The company basic salary is far from being competitive but its cost of living allowance now stands at 200% thereof. A 50% salary increase, therefore, means a 150% increase in pay.

2. The new austerity tax promulgated by the GVN on 24 November, 1969 on the strength of the decree-law 20/61 was in serious trouble. The Supreme Court to which the decree-law as referred by the Senate for review of constitutionality and legality has declared it barred by limitation thus depriving the Executive action of its legal basis. The Senate is working on a compromise bill with reportedly a much lower tax rate (half of the Senate members are up for re-election this year).

3. Meanwhile the 1970 budget forecasted on the basis of the high tax rate has already been approved by both Houses. The pressure for inflation and devaluation of the piastre is mounting.

III. FACILITIES DEVELOPMENT

1. AR 7658 - Antenna Mast for Daneng Station
Mast was erected on schedule, 11 December 1969.

2. AR 7659 - Antenna Mast for Nha Trang Station
The Base was poured on 11 December 1969. The mast was erected on 9 January 1970 using a 35' mobile crane borrowed from PA&E.

3. AR 2077 - Completion of Base Area Lighting (SGN)
Lights have been placed around the perimeter of the Northeast Ramp. RGMD crew is in the process of installing electrical connections.

4. AR 2236 - Additional 200 KVA Transformer (SGN)
On 16 December 1969, the SDL (City Power Company) arbitrarily installed a 300 KVA transformer in lieu of a 400 KVA transformer. They also informed us that a 400 KVA transformer will be installed when it becomes available probably next month.

5. Project 6695 - Renovation of the Operations Bldg. (SGN)
This project awaiting TPE approval.

6. Project 6702 - 204B Touchdown Pads (SGN)
This project awaiting TPE approval.

IV. SECURITY

1. Rumored Public Disturbances - The rumor from mouth to mouth that the Vietnamese currency will be devaluated to the lowest point after RVN Government puts into circulation the 1,000 bank notes which are expected to be issued soon this coming year, and the cost of living will be higher.

V. MEDICAL

1. Number of visits: 1670
2. Accidents: 74
3. Hospitalization: 1
4. Outcalls: 4
5. Physical examinations: 21
6. Sick leaves: 292

VI. PERSONNEL

1. Business for the month was a bit slow owing to the holiday season. Apart from routine activeties our efforts were directed toward overseeing the Vietnamese Employee Representatives' Election and decking the Personnel Office halls with boughs of holly.

Employee participation in the election was somewhat less than impressive. Only 38.2 percent of the electorate in Saigon got out to vote. Most of the primary representatives elected are repeaters from past years.

2. Personnel Strength - Saigon Base

Classif. [redacted]								Total

VII. TECHNICAL SERVICES

1. Aircraft Maintenance, fixed wing - December has been an average month in expending skilled manhours on aircraft maintenance. Although workload has varied, from light to moderately heavy, it has been possible to fully utilize the manpower most of the time

2. Rotary wing - Approximately 1085 helicopter hours were flown during December.

N8512P was transferred to Udorn the first part of the month, this leaves a total of 7 helicopters based at Saigon now. Two Saigon helicopters (N1303X and N1305X) went over 7000 hours airframe time during the month.

The change over to Esso 2380 oil was completed during the prescribed amount of time listed on SL-20B-004 so far no problems with any excessive carbon etc.. in any filters.

3. Shop Section - The overall RMD Shops activities remained on an even par. No annual inspections were performed this month, however, two form 337s were forwarded to the FAA Manila Office. These reports covered the installation of the B2C Automatic Flight Control System on aircraft N393R and N153L.

Since this is the final monthly activity report for the year 1969, it is a good time for reminiscing. Progress has been made in all areas and this is as it should be. Perhaps the best was to measure progress is by comparing the end product.

If one achievement during the past year were to be selected as the most significant, it would be the training of [redacted] personnel as replacements for journeyman TCNs. One year ago there were [redacted] in the Sheetmetal Shop. [redacted] This progress is not limited to only one shop. The combined RMD Shops complex has increased from a 17.2 percent [redacted] staff one year ago to 41.2 percent today.

4.Planning - The present personnel strength of the Maintenance Planning Department in Saigon is 14 in comparison to the 19 persons in April 69, this personnel reduction percentage equals to the reduction of aircraft assigned in SVN.

Since the support from MMB by transferring to SGN a reconditioned stencil machine on exchange basis, the Publication Unit has been in its most efficient operation. It saves an estimate of US$300 permonth.

In December, the scheduling and Production section pre-planned, scheduled and processed, for aircraft of all types: 500 overnight services; 28 number 1 services; 22 number 2 services; 2 number 3 services; 2 number 4 services; 7 engine changes (2 for 204B); 7 propeller changes; 59 BA's; 130 SI's; 16 EI's; 219 time controlled components change on 204B; two T53 engine hot section inspections; 12 DRR's; and 383 shop work orders;

5. General Maintenance - A 300 KVA Transfer was installed 16 Dec. 69 in the vault by the City Power Company. A 400 KVA transformer will be installed soon as replacement.

A 200m^2 power cable is being laid between the utilities building and GMD complex.

Building and Grounds Manitenance Excavation of another manhole infront of the hangar is in progress.

The water supply problem is being worked on. A gate valve was installed on the piping system at the TSN well and their operators have been instructed on the pumping schedule. With proper monitoring of theconsumption, AAM will have water available from 0600-2200 from the elevated tank.

6. Technical Training - The following courses were completed during December: (a) Garrett TPE 331: Two courses were held at Can Tho; (b) Courses in Progress (Auto Maintenance): This course for GMD auto mechanics.

On 13/14 Dec. the FAA written examination was held in Saigon. Fourteen AAM students from the Powerplant course completed the written part.

Three FAA oral and practical mechanics successfully passed written and practical examinations and received their FAA mechanics licenses.

1969 was a year of increased training for our [redacted] employees with a total of 296 [redacted] receiving technical training in Aviation training.

The completion of our first helicopter flight mechanics course enabled four TCNs to qualify for flight mechanic.

7. Supply - Stock Control

In December, Stock Control's workload showed a slight four percent decrease in its overall transactions as compared with the previous month.

In early part of this month, there were a total of 262 line items needed for the project; 126 line items were available in stock; 26 line items NIS and 111 line items found never carried in this station.

Procurement Section of Supply-Saigon experienced a high increase (42%) in the number of transactions during this reporting cycle. A total of 301 line items of commodities were purchased from local market in comparison with 212 line items procured last month.

Total value of commodities purchased from the Saigon/Cholon market amounted to VN$921,527.00.

A decrease of AOG cases was noted the past month with five aircraft grounded caused by the lack of six rotable or recoverable parts with no revenue hours lost.

Shipping and Receiving

This section's workload remained at the same busy level than during the previous months. Ever increasing emphasis has been given to this Section's personnel training in the correct handling and documentation of cargo.

The flow of critical items remained also constant and is being watched closely for faster processing back to MMB.

The movement of Personal Effects is still very much in evidence. Improved or new methods of handling Personal Effects to and from the SVN satellite stations are under discussion with the "door-to-door" VANPAC SEA representative.

The Customs Unit is kept hoping and is doing a remarkable job despite the holidays' congestion.

VIII. TRAFFIC/AAM

	November	December
Passengers departure SGN (All contracts)	6,007	5,997
Passengers arrival SGN (All contracts)	6,677	6,754
Outbound cargo SGN	82,893	64,725
Inbound cargo SGN	96,146	86,628

2. TRAFFIC/USAID

	Cargo (including AF Caribou A/C)	
	November	December
Outbound (lbs) SGN	1,534,916	1,717,396 lbs
Inbound (lbs) SGN	101,577	538,788 lbs

IX. OPERATIONS

1. We can expect a smoother running operation with our new telephone system. All incoming calls are routed thru Operations when the Air America Telephone Operator secures for the day and these calls can be transferred to other departments. Outgoing calls have been much simplified by the new automatic dialing system.

There were 28 controllable and 58 non-controllable delays with a total of 929 Saigon departures.

2. There were considerably less GTD complaints during the month. The earlier survey made on improving GTD certainly has a bearing on it becoming a smoother operation. New rules governing GTD have been made a part of the Base Manual. A study is underway now to reduce our Microbus fleet as a means to cut costs in this department. Subsequently, this opportunity will be used to release some of the less desirable drivers, however positions will be maintained to hire more suitable personnel to bring the department up to it newly established operations strength.

3. Flight Time Report (See attachment A)
Aircraft Incidents Report (See attachment B)

4. Accident Reports

Date	A/C Type/No.	Location	Remarks
05	PC6/N153L	V-167	One prop blade tip dented beyond limits on T/O or landing.
06	PC6/N192X	V-248	A/C arrived V-248 with left tire flat. Sharp object caused 3/4' puncture in sidewall.
08	VTB/N7770B	V-05	A/C arrived V-05 with right main tire flat. Tire blew out at large flat spot probably caused by excessive braking.
12	DHC-4/N539Y	V-05	Left nose gear damaged - stayed open on retraction. Inspection revealed erroneous pin-ball-lock had been installed. Wrong part P/N BLS4R1.25N, correct part P/N BLS4R1.5N.
13	PC6/N153L	V-56	Tail wheel dropped into 6' rut while turning around for T/O. Tail section buckled rt side fwd of tail wheel post and under right stabilizer tail wheel strut piston bent.
16	VTB/N9838Z	V-20	Cabin door came open on T/O roll, slight damage. Door not properly closed and latched.

16	DHC-4/N539Y	V-01	Both nose gear doors failed to open on retraction, both extensively bent. Link assy's P/N C4B1215-1 found bent, probably undiscovered after door incident on 12 December. Leadman received 3 days LWOP.
16	C-46/B928	V-27	Same damage reported in paragraph 5.
20	C-46/B910	V-01	Marketeer struck belly of A/C below passenger door, very slight dent in A/C, steering column of Marketeer bent back, and driver slightly injured. He stated Marketeer went forward when he placed trans handle in reverse. Marketeer transmission handles move forward for reverse and rearward for forward which is unnatural movement of control lever.
21	VTB/N9838Z	V-07	Right prop struck runway during landing, prop and nose section substantially damaged. Investigation complete, scheduled for Board Review on 9 Jan.
22	C-47/083	V-01	Left elevator found with 3' tear and trailing edge bent. Crew had no knowledge of damage, cause undetermined, suspect damaged on V-01 ramp by vehicle or cart.
23	PC6/N391R	V-17	Left horizontal stabilizer incurred a 1sq ft hole 6' deep on landing at V-17, suspect struck by rock
25	PC6/N185K	V-01	Right wing tip and aileron damaged by forklift. AAM driver received 3 days LWOP.
27	204B/N1307X	AT8647, SVN	Fatal injury incurred by VN National, ran into tail rotor. No A/C damage. Report being prepared.

5. Ground Transportation

Aggregate microbuses mileage:	22774 km or 14233 miles
Microbuses downtime:	378 hrs 24'
Microbus pax-carried:	3256 pax
Isuzu bus mileage:	6434 km approx. 4021 miles
Isuzu bus downtime:	255 hrs 72'
Isuzu bus pax-carried:	10520 pax
Supply vehicles mileage:	2859 km approx. 1786 miles
Supply vehicles downtime:	52 hrs.

X. FLYING

1. MFDSVN was absent during the first part of December and returned in time to step into the middle of the messes.

A week visit of AVPFO to Saigon and sub-stations was probably the single highlight of the month. It is believed he should now have a better current understanding of our problems. Equally important, the fact that anyone from the Taipei management level actually spent a considerable amount of time "out-amongst-um" gave a boost to crew morale when it was badly needed.

2. We finished the year without the myriad scheduling problems of attempting to stay within the flight time limits that plagued us a year ago. One captain had 1000 hours + 58 minutes. All others stayed under the limit.

XI. FISCAL

1. Budget matters - Total net reduction of work force during December was 31 persons. An analysis of salary costs by department was prepared and shown to weekly staff meeting. This created much interest in the total cost reduction program. Each department was asked to prepare a written evaluation of his department manning requirement and additional savings he can make during the last quarter of our fiscal year.

N H A - T R A N G

FEBRUARY 1970

GENERAL

Continued routine problems and a quiet month during February. A decrease in revenue block time flown relative to January due to the Four day "TET" holidays.

The city of NHA TRANG remains "off limits" to all military personnel. This situation has continued from before "TET" and there is no indication that it will change. The reasons for this appear to be both economic and military.

TRAFFIC

As stated, a decline in all phases was experienced this month due to the "TET" holidays. This situation is outlined in the included statistics.

CUSTOMER RELATIONS

Mr. B. KYKER, the 7002 Air Operations Officer returned from a tour of reserve military duty while Mr. W.F. SPARKS, the 7001 Air Operations Officer has assumed the temporary duties of Assistant Director of Administration for Cords in NHA. Mr. T. LILLY replaces Mr. SPARKS. Relations remain unstrained and good.

OPERATIONS

A. The major accomplishment this month was the restoration of communication service via the remote Motorola unit and the switch-over to the new antenna. This switch-over was componied by a remoting of the transmitter equipment to the new location. This has eliminated XMTR feed-back into our RCVRS.

SAIGON BASE
MONTHLY REPORT
FEBRUARY 1970

I. GENERAL

1. Total block time for February was 5482 hours vs 6332 hours in ~~December~~. January

2. VN-70 Customer (USAID/CORDS)terminated C-47 (GFE)43-16083 and C-47 (CFE) B829 effective 1 March 1970 due to failure to attain prescribed minimum on C-47 aircraft. C-47 083 is now in temporary storage at Tan Son Nhut.

3. Effective 28 February 1970, Beech N7950C was dropped from the ARPA (0030) contract and replaced with VTB N9577Z on 1 March 1970. N7950C was ferried to BKK on 6 March.

4. C-46 B912 will be substituted for B146 on 10 March after receiving No. 3 service at Tainan.

5. In view of the foregoing, the Saigon fleet stands at 49 aircraft vs 78 aircraft two years ago, with one C-47 #083, one VTB #695C, two 10-2s #622C and #77Y, and Helio #B849 in temporary storage. 41 aircraft comprise the active (basic) fleet on contract with C-46 #984, Porter #152L and C-47 #B829 carried as spares.

Two helicopters N8514F and N8535F were sent to UTH for TCS 18-28 February 70 at customer direction.

6. There were no major flying accidents in February 1970.

7. Our pilots continue to look sharper each day due to recent improvement in uniform by adding shoulder insignia and "scrambled eggs" to the hat shield. I observe the "duck tails" and sideburns getting shorter gradually. Attached are pittures of MFD Tidwell and Senior FEPA Representative SGN, Capt Zurla. I sincerely feel we must go one step further in the professional appearance of our pilots: Stay-pressed "wash and wear" pants of good quality plus an "Arrow Decton" type stay-pressed shirt. It has been my observation that if we dress our pilots up like gentlemen they tend to act that way both on and off the job with an improved professional performance.

8. Proposals to upgrade upcountry hostel facilities are being formalized to forward to AVP in the very near future. FEPA has participated with us and their recommendations have been considered..

9. The rising "free market" rate of 180 MPC to one USD and 400 piastres to one USD is having a marked effect on local economic conditions. Also merchants and local business men are taking into account the

strong rumor that the piastre will soon be devalued. They either delay any further business transactions while they wait to see what happens, or attempt to "make a deal" at an exorbitant price.

II. FACILITIES DEVELOPMENT

1. The hotest facility development projects are AR/69/055 "Renovations of Operations Building" ($20,605), and AR/69/054 "Renovation/Relocation of various AAM Shops and Offices" ($6,170). These ARs were forwarded to BCO TPE in October 1969. Priority approval would resolve a long standing problem of inadequate working environment due to past customer resistance to approving development of a new Operations/Administrative facility. With the accomplishment of the two cited ARs, Saigon Base will finally achieve an efficient working environment for all activities and provide a long standing facility requirement (i.e. locker and shower room) for pilots.

III. GENERAL AFFAIRS

1. Cost of living - Prices go on increasing amidst strong and sustained rumors that the piastre will soon be devalued. These rumors were based on the following indicators:

a. Forecast of GVN-financed import program for 1970 is lower than that of 1969. The reason being, as the US is pulling out, GVN funds of US Dollars accruing from the sale of piastres to the GI and Army's contractors is decreasing.

b. The commercialized import program (American aid) and P.L. 480 (US agricultural surplus products) may remain unchanged or slightly increase but far from being adequate to offset GVN increase spending, as a result of Vietnamisation of the war (particularly defense spending).

2. The piastres generated by these import programs and the resulting tax normally accounts for almost half of the total Government revenues. With these sources of revenues decreasing, the budget deficit estimated at 50 billions piastres is likely to be greater. More and more money will be chasing fewer and fewer goods.

3. The government efforts to bring rice from the rice surplus area (the Mekong delta) to the rice deficit area (Central VN and the highland) has failed. The farmers deliberately postpone sale in anticipation of higher price in the near future. Price of gold is officially fixed at 12,000 piastres per tael but the market price is VN$20,000. The black market rate for the green dollar and the MPC reached an all-time high of VN$400 and VN$180 respectively.

IV. SECURITY

1. Rumored public disturbances - None

2. Historical or customary dates & particulars forthcoming demonstration - None.

V. MEDICAL
Number of visits: 1069
Accidents: 80
Outcalls: 8
Physical Examination: 13
Sick leaves: 210

VI. PERSONNEL
1. A very routine month, with one exception: the TNN Training Program Candidates finally departed. We kept quite busy ministering to their last minute needs and assisting in their preparations for departure.

2. Personnel Strength - Saigon Base

Outbound (lbs) SGN	1,458,201	1,209,056
Inbound (lbs) SGN	450,007	491,550

VIII. OPERATIONS

1. There were 16 controllable and 77 non-controllable delays with a total of 937 Saigon departures. Early morning Saigon ground fog continued to be the major factor in the non-controllable delays.

FIC, GTD and the Emergency Equipment Room are in good order.

2. Flight Time Report (see Attachment A)
Aircraft Incidents Report (See Attachment B)

3. Accident Report

Date	A/C Type/No.	Location	Remarks
16	DHC-4, N544Y	Noted at SGN after last trip of day	R.H. nose gear outer rim damaged. Suspect from piece of rock/large stone or the edge of bent-up PSP during days operation.
22	C-46/N67985	CORDS Warehouse Ramp	Driver attempted to pass under left wing of aircraft - Forklift impacted aileron resulting in minor damage. Driver was issued a written reprimand - Two days suspension.

4. Ground Transportation

Aggregate microbuses mileage	20601 km or 12875 miles
Microbuses down-time	184 hrs 12'
Microbus pax carried	3242 pax
Isuzu bus mileage	4556 km or 2847 miles
Isuzu bus downtime	54 hrs
Isuzu bus pax carried	10490 pax
Supply vehicle down-time	1504 km or 940 miles 108 hrs

5. Flying The month brought many changes in supervisory personnel and instructor pilots. Considerable P/O training was accomplished during this month. We had (DHC-4) and C-47 initial & ground school coverage. The realization of equitable flying time and duty time among our American First Officers is slowly approaching.

FEPA still is in the "lime light" with negotiations continuing at Tokyo. There was a strong threat of a standdown beginning on 20 Feb. Proper negotiations on part of the company must have been accomplished as the threat of a standdown was averted. The morale of our pilots are at an all time high with great expectations on the part of the negotiations taking place.

Morale of the VTB pilots has improved tremendously with an increase in flying time in the program.

The most significant item for the month was that it was a totally accident/incident free month.

IX. TECHNICAL SERVICES

1. February was a good month with Maintenance Delays far less than January. It does indicate improvement in Maintenance quality.

We are now screening several of our TCN's who have responded to our request for 204B Flight Mechanic Trainees.

We recently finalized a formal Training Program for upgrading our Vietnamese employees working in the Supply Dept at Saigon. The intent is to utilize the Supply Trainee course that was developed by Tainan.

2. Aircraft Maintenance - The general activity and work load have further declined during the month, which has resulted in a low total number of aircraft departures and arrivals.

The completion of No.4B service on Porter N285L was delayed by several days due to late return of several overhauled components from the Main Base and also the nonavailability of some of the items in stock.

3. Rotary Wing - Flight time was down somewhat for the month because of Tet holidays and the temporary transfer of N5514F and N8535F to Udorn for 10 days.

Transponders are now installed in all but one 204B, however with no spares available it's rather difficult to maintain these units as no repairs are allowed at Regional Stations.

4. Shops Overall Shop activities remained on an even par.

The USFAA Inspection Authorization (IA) activities increased during the month with Annual Inspections on two Porters and one Volpar.

5. Planning/Engineering - The Planning and Production Control Section pre-planned, scheduled and processed, for aircraft of all types; 493 overnight services; 17 number one services; 19 number two services; 2 number three services; 3 annual inspections 6 engine changes (1 for 204B); 6 propeller changes; 85 EA's; 30 SI's; 4 EI's 137 time controlled components change on 204B; one T53 engine hot section inspections; 1 main rotor hub change; 1 main transmission change; and 204 shop work orders.

6. Utilities Maintenance - The TSN Airport well pump broke down for 5 days during this month and PMD had to revert to reinstallation of water pumps in the well near the Operations Bldg, as a source of water.

7. Electronics - This month must be registered as one of much accomplished EA, EI, SI to SVN base aircrafts.

A total of 13 ATC Transponder installation was completed. This brings to a total of 26 aircrafts equipped with transponders in SVN.

8. Technical Training - The following courses were completed during February: Auto Maintenance, Non Destructive Testing. Courses were in Progress: Ground Equipment and Aircraft Welding. Four FAA Oral & Practical A&P examinations were conducted.

Fifteen [redacted] Trainees were sent to Tainan for the International Line Service Mechanic's Course. The remaining ten Trainees should depart within the next few days.

9. Quality Control - Four Inspectors have satisfactorily completed the Technical Training Course on Non-Destructive Inspection.

The number 4 service on PC-6 N285L was completed this month with no major problems encountered for this dept.

10. Supply - The relocation project is still underway. The tools sale display cabinets fabrication and installation was completed early this month. The relocation of the Tool Crib Issue Window, now next to the Main Issue Window was completed too. Both Stock Control Section and Shipping & Receiving Section have maintained a smooth and normal function.

E.J. Theisen
Base Manager - Saigon

ADDENDUM

FISCAL

1. Customer Relations - Contract VN-70 has dropped two C-47 as of 1 March 1970 and also notified us they plan to drop the C-46 on the CAL sub-contract.

2. Budget Matters - Total net reduction of personnel during the two month period was 34. The monthly presentations of cost data continued to generate a lot of interest in our progress. Evaluation of monthly salary costs indicates almost all departments have made significant progress in reducing costs this fiscal year. For example total salary costs for April 1969 were $779,934 while total salary costs for December were $595,622 for a total reduction of $184,312.00. We are looking hard at remaining pooblem areas to see what further improvements can be made.

3. Exchange Rate - No change has occurred in the official exchange rate for piastres. Rumors abound or to the possibility of devaluation although no one can give us any definite information as to when or how much. Meanwhile the Black market rate continues to rise. Latest information is VN$400 to US$1.00.

FLIGHT INFORMATION CENTER

- S A I G O N -

- MONTHLY ACTIVITY REPORT -

1 - 28 February 1970

PART I

- Ground Fire Incidents -

Date	A/C No., Type & Contract	Place	Description
01 Feb.	N8535F 204-B 7001	XR 1192	After take off from an outpost, the PIC heard heavy small arms fire directed at the a/c. Capt. BASHAM immediately made a sharp left hand turn and departed the area. No a/c damage or personnel injury involved.
06 Feb.	N1305X 204-B 7002	XR 3196	As a/c was on touchdown at LZ, Capt. CASE observed ground personnel running for cover. After hurriedly disembarking six RD troops, the PIC immediately took off observing mortar fire in the LZ as a/c gained altitude. No a/c damage or personnel injury involved.
17 Feb.	N1304X 204-B 7001	BT 1050	As a/c was climbing, the PIC observed tracer fire to the rear of a/c. Capt. WINSTON changed course and departed the area. No a/c damage or personnel injury involved.

PART II

- Situation Summary -

Light enemy activity prevailed during the month of February. Acts of terrorism in Saigon and the uncovering of rice and weapons caches highlighted this months reports. Some fourteen terrorist/sapper incidents were reported in Saigon which included the shooting and subsequent wounding of a MACV courier who was proceeding down Pasteur Street shortly before sunrise on the 8th. Some twelve hours later an estimated twenty pound charge detonated at the corner of Tu-Do and Le-Loi Streets

PART II

- Situation Summary - (Con't) -

on top of the VN Press Club resulting in extensive damage but no casualties. On the 27th terrorists placed a ten pound charge near the wall of the metropole BEQ resulting in 4 WIA and minor damage. Two km SE of MACV headquarters, a USAHAC bus entering the intersection of Vo-Tanh and Truong-Tan-Buu Streets received one round of sniper fire wounding a USN Petty Officer.

Allied forces reported discovering enemy caches in the Central highlands, III Corps, and the Delta. Certainly one of the biggest finds of the war was uncovered at Ran-Rang (VL48) where to date 169 tons of various types of rifles, mortars, rockets, and munitions have been unearthed at 33 different cache sites. In addition to munitions and weapons, large numbers of picks, shovels, and entrenching tolls (manufactured in India) were recovered as well as bicycles, medical supplies, radio equipment, clothing, detonating cord (533, 525'), rocket motors (139) and rocket warheads (16). Of particular interest is how and when this amount of supplies reached an area 45 miles from the closest point of the Cambodian border. Analysts estimate that some of the material had been in place less than three months and that some storage bunkers were constructed less than six months ago. The supplies were in good condition with no sign of deterioration. While it is believed the supplies were transported via what is know as the JOLLEY Road to what extent vehicles were utilized is undetermined. Interestingly enough local newspapers report that a herd of some forty elephants were sighted at the cache site six months ago and another herd of some ninety elephants five months later.

MONTHLY REPORT
NHA-TRANG
FEBRUARY 1970

GENERAL

Continued routine problems and a quiet month during February. A decrease in revenue block time flown relative to January due to the Four day "TET" holidays.

The city of NHA TRANG remains "off limits" to all military personnel. This situation has continued from before "TET" and there is no indication that it will change. The reasons for this appear to be both economic and military.

TRAFFIC

As stated, a decline in all phases was experienced this month due to the "TET" holidays. This situation is outlined in the included statistics.

STATISTICS

	FEB.	JAN.	1969

CUSTOMER RELATIONS

Mr. B. KYKER, the 7002 Air Operations Officer returned from a tour of reserve military duty while Mr. W.F. SPARKS, the 7001 Air Operations Officer has assumed the temporary duties of Assistant Director of Administration for Cords in NHA. Mr. T. LILLY replaces Mr. SPARKS. Relations remain unstrained and good.

. . . 2 . .

OPERATIONS

A. The major accomplishment this month was the restoration of communication service via the remote Motorola unit and the switch-over to the new antenna. This switch-over was componied by a remoting of the transmitter equipment to the new location. This has eliminated XMTR feed-back into our RCVRS.

MEMORANDUM

TO : BM/SGN

DATE: 09 February 1970

FROM : SZ/DAD

REF. No. SZDAD/70/016

SUBJECT : DANANG Station Monthly Report for January 1970

GENERAL

The lull in hostile activity continued throughout the month of January. An increase in enemy action during the upcoming TET holidays is not unexpected, however. Three isolated instances of explosive charges being thrown at military vehicles were reported in the last week of the month.

Two Southern Air Transport flights transited Danang within the reporting period. Both were ferry departures and created little difficulty.

The Director of Danang Customs has tentatively approved the loading and offloading of cargo on international flights transiting this station, but this authorization contained several qualifications. These are being studied in SGN where a determination will be made as to the feasibility of utilizing this authority.

CUSTOMER RELATIONS

No problems were encountered in this area during the month.

LEGAL

No written notice of intention to renew the lease on the hostel [redacted] was furnished to the landlord of this property, therefore the present contract will expire on 9 February. There should be no difficulty in vacating these premises by the required time.

Alternative hostel arrangements continue under discussion and should be finalized by the end of February. No significant problems are expected in the interim due to not having the above hostel available.

FACILITIES

Plans to renovate the CSD shipping and receiving warehouse into a passenger terminal and flight operations office are progressing at a reasonable rate. Preliminary blueprints have been made and it appears funding by COMUSDS, Region I, should not be a problem. However, no target date to commence work has been established.

Dual HF antennas were hoisted into place on 24 January and were made operational the same day. The eighty foot antenna mast project can now be considered complete.

The contractor who submitted the lowest bid in April for the completion of the concrete paving and drainage ditch project has stated that he would still assume the job at the same price if awarded. Status of this project is pending higher echelon company approval.

FISCAL

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures totaled: 44,480$VN

OPERATIONS

Revenue flight time declined 15+04 hours as compared to December. Poor weather, a reduction in Embassy requirements, and the replacement of the AID Porter by a VTB all contributed to this decrease.

The normal complement of RON aircraft at this station will be reduced early in February. Due to a reduction in scheduled flight service between SGN and DAD, the C-47 RON will be eliminated. Requirements for two PC-6, two 204B and two VTB aircraft should continue.

The following is a breakdown of flight time generated by this station during January:

VN-70/AID	781+05
VN-70/EMB	196+00
0005	Nil
0069	1+38
Non-Revenue	Nil
Total	978+43

Revenue losses for the month were as follows:

Weather	24+40
Maintenance	Nil
Customer Cancellation	Nil
Other	Nil
Total	24+40

Hostel occupancy factors were 86% and 26% for the Old and New Hostels respectively.

COMMUNICATIONS

Some improvement in HF reception was reported by other stations since the installation of the new HF transmitting antennas, but interference problems continue to be experienced when receiving SGN signals.

The incoming ringing problem on the station telephones was eliminated, all four lines are now completely usable. The two Class A lines ring in Operations, and the two Class C lines ring in Traffic.

The [redacted] remote UHF/VHF was out of service one day, but AESU personnel were able to repair it without difficulty.

Incoming and outgoing messages totaled 1541 and 1591 respectively.

TRAFFIC

A Pro-forma AR was submitted for a set of cargo weighing scales for the USAID warehouse operation. No scales were includes in the provisions of the AID/VN-70 contract so it anticipated that their cost would be reimbursable.

Passenger and cargo statistics for the month are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-7001/AID	2,456	2,358	384,478	287,078
VN-7002/EMB	682	679	635	6,371
0069	5	6	-	-
0005	-	-	-	-
AAM	85	89	7,582.5	14,877.5
TOTAL	3,228	3,132	392,695.5	308,326.5

SECURITY

All but eight TCN employees have received extensions of stay, and twenty three 1970 air base passes were received for TCN personnel. There are still three such personnel who do not have an extension of stay and whose temporary passes have expired. Special approval has been requested from VNAF Security to permit these employees to enter the base until the support documents for their permanent pass applications can be obtained.

PERSONNEL

The personnel breakdown at Danang Station at the close of business, 31 January, was as follows:

	[redacted]			
Permanent	4	18	14	81
Pre-Process	0	0	0	0
Temporary	1	0	0	0
Daily Hire	0	0	0	0
TOTAL (118)	5	18	14	81

TECHNICAL SERVICES

RMD handled a total of 603 arriving and 606 departing flights, a slight decrease as compared to December. For the second consecutive month there were no flight delays which resulted in a revenue loss attributable to maintenance. Heavy services increased substantially for a total of 9 (3 PC-6 and 4 204B number 1 services and 2 204B number 2 services). One engine change was required during the month. One aircraft was placed on AGP status, but no revenue loss resulted.

RGMD expended a total of 792 manhours of which 300 were consumed on leased properties. The routine airport building maintenance functions of this department have been somewhat frustrated by a lack of workable procedures whereby needed materials and supplies can be obtained. Although contractually it appears USAID is required to furnish, or at least reimburse the cost of, such supplies, little success has been forthcoming in this area. A CRR was submitted to the local customer for paint for the nose hangar, but this was forwarded to SGN for final approval. No action, either approval or disapproval, has been reported on this CRR since it was initiated on 06 December 1969.

MEMORANDUM

TO : AVP-TPE

FROM : BM-SGN

SUBJECT : Monthly Report

DATE: 18 February 1970

REF. No. BMSGN/70/55

Saigon Base Monthly Report for January 1970 is forwarded in three copies for your file.

E.J. Theisen

FORM 5670406

SAIGON BASE
MONTHLY REPORT
JANUARY 1970

I. GENERAL

1. Total block time in January 1970 was 6114 vs 6332 hours for December 1969.

2. VN-70 Customer (USAID/CORDS) Terminated 2 VTBs (N9838Z and N7695C) plus one C-46 (B138) effective 31 January 70. B-138 will remain in Tainan in temporary storage status whereas the VTBs (for the time being) will remain in SGN. VTB N7695C will go to temporary storage in SGN and N9577Z will be carried as a SGN spare. The VTBs were terminated due to internal customer problems however we expect full utilization of the spare aircraft and our experience so far in February bears this out. We will watch this situation very carefully and make recommendations accordingly. Meanwhile VN-70 has issued a Call Order for DHC-4 N544Y effective 1 February 70. I would forecast a fairly stabilized flying program between 6200 to 6500 block hours for an indefinite period.

3. The change in our pilots uniforms with the addition of epaulettes and "scrambled egg" hats for the Captains has had a noticeable effect. Our aircrews look sharper, act sharper, and (I hope) will fly sharper. Their over-all personal appearance is much improved with better creased trousers, haircuts and better polished boots resulting from what I believe is the psychological effect of the improved uniform. I am, indeed proud of their appearance. The customer is also favorably impressed.

II. FACILITY DEVELOPMENT

1. We are quite stabilized in our facility development with no major projects which urgently need doing except Project 6695 - Renovation of the Operations/MFD Building which formerly housed the Base Manager's Office, and Project 6697 - Relocation & Renovation of various Shops and Offices. These have been substandard facilities throughout our evolution as a major base within the company system. Both projects have been forwarded to the Head Office - TPE for approval.

III. CUSTOMER RELATIONS

1. Our relations with all customers has never been better. They are so congenial, it is unbelievable.

IV. GENERAL AFFAIRS

1. Cost of living - According to the National Institute of statistics, the consumption index for Dec. 69 as compared with that of 1968 increases by 28.4% for the middle class and 31.7% for the workers class. Compared with the index of the base year 1963 of 100, the 1969 index is as follows: Middle class: 452.1 ; Workers class: 500.2

The cost of electricity has recently increased by 40% from VN$6 to VN$8.4 per kw/hr.

2. Air VN pay increase - The employees' demand for salary increase was finally settled. Effective 1 January 1970, The Board of Administration approved salary increase as follows:

Grade I - 4	:	2100	VN$	per month
Grade 5	:	1500	"	" "
Grade 6	:	1200	"	" "

The pay raise results in the company's payroll being increased by 5 million piastres per month.

3. Tet gifts - In appreciation for assistance during the past year, token gifts were presented to 148 GVN officials or ARVN officers with the following breakdown:

High level : 36
Supervisory level: 33
Working level: 79

V. SECURITY
1. Rumored public disturbances - None

2. Historical or customary dates & particulars forthcoming demonstration - The Vietnamese New Year "TET" took place on 6 through 8 Feb. 1970. All business has been suspended on those days and no customary demonstration anticipated. According to a joint communique of the Commander of the Special Military Capitol and the Military Governor of the Saigon and Gia Dinh, fire crackers were strictly prohibited.

VI. MEDICAL
Number of visits: 1351
Accidents: 78
Hospitalization: 1
Unhospitalisation: 77
Outcalls: 6
Physical examination: 19
Sick leaves: 261

VII. PERSONNEL
1. General Information - It looks as though the Year of the Dog is also to be the Year of the [redacted] We are assured at this time that a majority of the Tainan candidates will be able to leave for Tainan in February. As appropriate, cable correspondence will be sent to all concerned keeping them advised of all late developments.

There is lots of talk of an impending devaluation; the value of the piastre on the open market is still about VN$350 to US$1.

2. Personnel Strength - Saigon Base

ate	A/C Type/No	Location	Remarks
12	PC6/N9444	V-02	Right wing struck Army truck while A/C was being marshalled into parking spot by USAF lineman. Substantial damage. Investigation complete, Local Board during week 8-14 February.
11	PC6/N394R	V-84 to V-23	PIC heard 1 rd hit A/C while at 1000' above terrain. PIC maintained heading and increased altitude. Minor damage from 30 cal hole leading edge of left wing.

4. Communications

Project 6683: Transmitter Building and Antenna System, Saigon Ninety-five percent completed. All transmitters and ancillary equipment were moved into the new transmitter building in mid-January/ Only power hook-up to the 300 KVA generator and minor wiring remain to be completed. Old transmitter building has been razed and all old antennas and antenna towers have been lowered.

Project 6696: Installation of 400 KVA Transformer, Saigon Base continues to utilise 300 KVA transformer which was installed on a temporary basis by the power company. Completion of power cable distribution system awaiting arrival of stand-off insulators from Hong Kong.

Project 6700: 60' Antenna Mast, Nha Trang (HF Transmitter Relocation) Mast an antennas erected. Construction of transmitter building near completion and expect to have transmitters relocated and operational by mid-February.

Project 6701: 80' Antenna Mast, Danang (HF Transmitter Relocation) Completed All transmitters were relocated and were operational by mid-January.

Project 6708 & 6709: Telephone cabel distribution system and Base PABX Completed and 100 percent operation as of 7 Jan.

ATTITUDE SSB Voice Circuit: Transmitters installed in new transmitter building and new beam antenna erected in late December. Receiver console and ring down equipment transferred to Message Center. Muting devices for

receiver installed allowing headset operation only (no speakers).

The above represents the major projects which have been completed during the past two months after many years of planning and waiting for the fruition of said plans. Many projects remain to be completed. Some are, Southeast Asia Radio-teletype circuits, Tan Son Nhut/PTT Saigon speach plus radiotyletype UHF link, Saigon Paging System and P.A. System, Message/Communications Center Installation including added on and off-line teletype circuits as well as expanded on base teletype distribution system. These are but a few of the projects to improve the everincreasing need for more and better communications. They are in various stages of partial development with much remaining to be done before final completion.

5. Ground Transportation

Aggregate microbuses mileage:	23098 km or 14430 miles
Microbuses downtime:	154 hrs 23'
Microbus pax-carried:	3248 pax
Isuzu bus mileage:	6315 km or 3946 miles
Isuzu bus downtime:	51 hrs 30'
Isuzu bus pax-carried:	10502 pax
Supply vehicle mileage:	2162 km or 1351 miles
Supply vehicle downtime:	131 hrs

6. Flying - The month also saw FEPA and associated activities take up a lot of time. The problem is becoming more acute as to just what position, attitude and relationship should exist between FEPA and MFD. There is the problem as to what and how much office and administrative support is to be provided. There does not appear to be any abuse of their requirements but the volume of work required continues to increase and there is a definite need for a definitive decision as to the policy that is to be applied to this area. A request for this guidance has been requested in a separate memo submitted earlier in the month but no response has been received to date.

In the middle of the month we received the new epaulettes and the hat bills for Captains. The general impression appears to be that it was an improvement from before but there was obvious disappointment in that the epaulettes were not the design that was the overwhelming choice of the crews.

FEPA and the Flying Deparment did considerable work in attempting to arrive at a reasonableand satisfactory proposal for the hostels and general crew accomodations at outstations.

The arrival of the first few transponders is already getting favorable comments from the pilots and greatly surprised reactions from various ground controllers.

Discussions at the end of the month with Senior representatives from the Embassy Customer indicate complete and enthusiastic support in obtaining UHF radios.

X. TECHNICAL SERVICES

1. January was an uneventful month in respect to unplanned/unscheduled events, but progress was made in most areas on production and administrative problems.
The Cantho Station celebrated the completion of its First Year of successful operation on 10 January.
Inspite of progress in other areas, our primary objective: Flying hours took another drop with reduced hours on all types of aircraft, with the exception of the C47 and C46. The total flying being down more than 200 hours from the December level. The number of C45/10-2 aircraft assigned here remains at three with two in storage. Helios are reduced to one, in storage. Performance of the turbo-prop aircraft continued to improve . Consolidation of the Ground Communications facilities was completed with the transfer of the remaining transmitting equipment, and the CMD Offices to the CMD Complex.

2. Aircraft Maintenance The work load has remained steady during the month of January. Three C-46 and one C-47 aircraft were reported to have engine vibration in flight, the cause of which has been mainly the props. Shortage of serviceable props and engines for Porter and the Volpar aircraft was experienced for awhile.

The crew supervisors received class room instructions on various types of propellers.

3. Rotary Wing This month has been normal maintenance wise with total flying hours about average at 1010.

4. Shops Shop activities remained on an even par during the first half of the month, then picked-up during the second half. No annual Inspections were performed this month.

The number four service on PC-6 N285L is progressing.

Effective 1 January, an Open Maintenance Work Order numbering system was put into operation. There is no change in the basic system but this revision does eliminate a lot of unnecessary paperwork.

The installation of the ATC Transponders is progressing very well. It was necessary to change the location of the control unit on g the VTB-18 instrument panel from the position indicated on the proposed EA print. Engineering has been advised.

5. Planning/Engineering The Planning and Production Control Section pre planned, scheduled and processed, for aircraft of all types; 499 Overnight Svces, 29 Number 1 Svces, 19 Number 2 Svces, 5 Number 3 Svces, 2 Number 4 Svces, 13 Engines Changes, 16 Propeller changes, 56 EA's, 71 SI's, 2 EI's, 180 time controlled components change on 204B, two T53 engine hot section inspections, 4 DRA's, 4 CRA's and 313 shop work orders.

6. General Maintenance - All transmitter equipment from the old Transmitter Building has been moved to the new Transmitter Building located in the GND Complex.

7. Equipment Maintenance - On 1 Jan. 70 PEMD went to the day/date scheduling of routine maintenance of equipment.

8. Electronics - Activities for the early part of the monthe were planning and scheduling of work for the approved AR-9053, EA draft, Freq plan changes for SEA, FM Transceiver Evaluation and approved EA were received simultaneously.

SCM and COMENG SGN Office was transferred to the new PABX room located in the GND Complex.

9. AED Line Service - Completion of EA - issued for protection of VHF Antenna A-15 was made. A number of A-15 Antenna unit had to be repaired upon removal. S/Shops provided us support in manufacturing lock nut through machine lathe.

10. Technical Training activities increased during the month of January and with the holidays behind us several courses were completed: Garrett TPE-331, Integral fuel tanks, Propellers, A/C control cables, T-53 fuel control.

Courses in progress: Auto maintenance.

Three mechanics received their FAA Oral and Practical examinations with two men passing.

11. Quality control - The station started their first PC-6C No. 4B Service this month with only a few problems being encountered that involved Quality Control and most of them came from problem on components sent from TNN or from lack of parts.

12. Stores - During this reporting period, the workload for this section was increased by approximately 15% due to the original work of No. 4B SVC and PC6C Porter aircraft.

The tools display cabinets fabrication and installation are nearing the completion stage. This project should also see its conclusion during the next month.

Rearrangement and updating of stock records for all classes are still in progress and expected to be complete in the early part of February.

A total of 265 line items of commodities was purchased from the local market this month. Total valud of commodities purchased from the Saigon/Cholon market amount to VN$904,215.00.

FLIGHT INFORMATION CENTER

- SAIGON -

- MONTHLY ACTIVITY REPORT -
1-31 January 1970

PART I

—Ground Fire Incidents—

Date	A/C No., Type & Contract	Place	Description
02 Jan	N9577Z Volpar 7001	YD 3156	A/C was in climbout from Quang-Tri (V78) when pilot observed two men in separate small boats stand up and fire alternate automatic bursts at a/c. Pilot turned right and continued climb. No personnel injuries or a/c damage.
05 Jan	N1303X 204-B 7001	BT 0431	A/C was flying below weather when PIC heard a burst of small arms fire directed at the a/c. PIC immediately increased airspeed and departed area.
09 Jan	B138 C-46 7001	Vicinity of XT9903	A/C was being radar vectored to Tan-Son-Nhut IIS final approach on Heading 280 degrees 3 to 4 miles east of outer marker. Tracer fire was noted to the right (north) of the a/c. Twelve to fifteen rounds of white, golf ball sized tracers passed just beneath the right wing arching to the left above the wing. PIC turned off the rotating beacon and advised Approach Control of ground fire. No personnel injuries or a/c damage involved.
11 Jan	N394R PC-6 7001	BS 6358	Pilots only awareness of ground fire was when he felt impact of one round on left wing. Pilot maintained heading and increased altitude. Bullet pierced front edge of left wing causing minor damage.

PART II

- Situation Report -

During January enemy activity and movements were observed closely for indicators of enemy intentions during the traditionally active Tet holiday period the most critical time frame ~~was~~ being from late January to the middle of February. I Corps

ATTACHMENT "B"

and the Delta were shaping up during the month to become the focal points for pre-Tet activity; however, neither area was subject to the degree of activity predicated.

In northern I Corps pressure was maintained on Allied units below the central and eastern DMZ and logistical activity continued in the western provinces specifically into and around the A Shau Valley. Enemy units were reported in an advanced tactical position in the Danang-Hoi An City area prepared to launch coordinated attacks against friendly ~~ix~~ installations, refugee camps, and hanlets. An NVA regiment reportedly moved from southern I Corps to Quang Nam province (Danang area) to support these attacks. All indicators pointed for a high point of activity prior to Tet. On the night of 31 Jan - 1 Feb contact was made with an estimated three enemy companies SW of Con Thien (eastern DMZ area) and areas in southern I Corps came under attacks by fire. However, pre-Tet activity was not achieved to the degree anticipated and predications now call for a high point in I Corps following the Tet holidays.

In early January an NVA Division with all its elements moved into II Corps in the vicinity of Binh Dinh Province with the Pacification Program reported to be its primary target. Cam Ranh Bay, Phu Cat, and Phan Rang Air Bases came under attack during the month with light damage and no casualties reported. While much speculation was made as to possible pre-Tet activity, it now appears that an increase in activity can be expected in Binh Dinh, Pleiku, and Kontum Provinces following the Tet holidays due to large numbers of enemy troops in and near these three Provinces.

In III Corps the most significant increase in enemy activity came on the night of 20-21 January as 49 attacks by fire (ABF) were recorded against Allied positions throughout the Corps. One of the hardest hit of these targers was Song Be (V30) MACV Compound which received 90-100 rounds of 82mm mortar. It was hit again at 1350 on 21 January with an unknown number of 120mm mortar rounds which caused a fire destroying the ammo and POL dumps (AAM had an acft on the ground there at this time but sustained no damage). In what was described as "heavy" infiltration was reported coming from the Parrotés Beak and Angel's wing portions of the Cambodia border. Saigon was subject to a number of terrorists ~~ixx~~ incidents two of which involved explosions in movie theaters and three others taking place from one to six kilometers from Tan Son Nhut involving charges placed in jeeps parked near military installations. A post-Tet increase in activity can be expected in connection with the initiation of the first phase of the spring campaign. Northern III Corps and Central War Zone C will see activity. No specific mention has been made of Bien Hoa, Saigon, or Tan Son Nhut during the upcoming phase.

Recent enemy infiltration into the Delta, IV Corps, from the Crow's nest portion of the Cambodian border and a build up of troops along the north-western portion of the border gave rise to much speculation as to the enemy intentions during the critical Tet time frame. Cities mentioned targeted for activity included Chau Doc and My Tho. Since much emphasis is being placed on the Vietnamization Program here, it is considered likely that the enemy will attempt to discredit the ARVN and at the same time hit targets involving the Pacification Program. These attacks should come following the Tet holidays.

N H A - T R A N G

MARCH 1970

GENERAL

March proved to be a month of increased activity. This is a welcome change from the "doldrums" we had been experiencing. Revenue block time increased some 200 hours along with increases in all phases of activity.

The city remains "off limits" to all military personnel and the latest indication is that this situation will remain for an indefinite period.

The military situation remained quiet during March, however increased activity is expected during April.

TRAFFIC

Increased activity in all phases of the Traffic Department are shown in the attached statistics.

CUSTOMER RELATIONS

Mr. B. KYSER, The 7002 Air Operations Officer, has returned to the United States and has been replaced by Mr. Holly Garrard, a new arrival from Conus. Our initial relations with Mr. Garrard are very good, and hopefully will remain so.

Relations with Mr. T. Lilly, 7001 Air Operations Officer remains unstrained and good. All previous problems on this front appear eliminated.

C069 relations continue to travel on an excellant plane.

OPERATIONS

A. COMMUNICATIONS

The last remaining problem area here is continued interference by the Usaid and/or other transmitters. Working with the 7001 customer, we will try to have them realign their XMTR and relocate their antenna. This will not guarantee an improvement but should help some.

SAIGON BASE
MONTHLY REPORT
MARCH 1970

I. GENERAL

1. SGN Base was honored by the visit of PRES and AVP on 26 and 27 March, as well as a follow-on visit by VPFO and DFD on 28 and 29 March. All departments gained much from an on-the-spot exchange from these gentlemen.

2. Total block time for March 1970 was 5910 hours as compared with 5482 hours in February 1970. The trend including performance so far in April, appears to be coming up.

3. The security situation in Saigon and RVN continues to improve with sporadic exceptions - - almost as good as Chicago and Washington.

4. Received a letter of termination for C-47 43-48084 (GFA) effective 1 April 1970 with a Call Order for Caribou B-851 effective 1 April 1970.

Due to possible other priority requirements for B-851, the Customer cancelled the termination on C-47 084 pending further developments.

5. Pictures attached were candid shots by BMSGN in our Saigon Shops area. I am very proud of the local Technical Services effort of over nine months to screen and train those pictured from coolies to Aircraft Technicians. In line with U.S. Government policy, we shall continue with follow-on programs. Meanwhile, we have 25 [redacted] Aircraft Technicians undergoing one year of intensive training in Tainan. This is an epoch-making endeavor never done before, by an American company in RVN. It also resulted in favorable press coverage previously reported.

6. The decision to close the Saigon hostel appears to be a wise one. We have issued only three Non-Availability Certificates from 25 March through 11 April 1970.

7. I cannot predict what will happen to our local economy as the trading rate goes up and buying-power of the piaster continues go down. It is now VN$450 to one U.S. Dollar. Sooner or later an adjustment in piaster pay scales might very well be in order.

8. There were NO MAJOR ACCIDENTS OR INCIDENTS in March to equal our February record. We have had one mishap since 1 January 1970 - a taxi accident. This is a vast improvement over our record last year when we experienced nine (9) accidents during the first three months.

II. CUSTOMER RELATIONS remain outstanding.

III. FACILITIES DEVELOPMENT
1. Forms "Fs" have been submitted for the Terminal Parking Apron, Renovation of MFD/SOM Bldg., Renovation of Various other Shops and Offices, and 204B Concrete Helicopter Pads for SGN. The customer has signed Form Fs for the improvement of the passenger lounge at Danang and also for Completion of Ramp Paving, and drainage ditch at Danang. MED SGN AR 69052 for an audiometric booth has been cancelled as the result of discussions with MFD and SMO. It was found that using existing facilities, failures of the audiometric test are extremely rare. If an individual should fail an audiometric test, he will be sent to the U.S. Air Force Clinic for further testing.

IV. GENERAL AFFAIRS
1. The company provided the Directorate of Civil Aviation with materials to reinforce the fences of its storage building for telecommunications equipment which has been the object of sporadic stealing recently.

2/ To build better relationship with the Government of Vietnam, a visit of AAM installations and Management by the Tan Son Nhut Airport Commandant and Staff was organized. Similar visit by other GVN agencies will be conducted in the near future.

3. Plan to improve company transient quarters up-country has been finalized and submitted to the Head Office for approval.

V. MEDICAL
Number of visits: 1341
Accidents: 51
Hospitalization: 7
Unhospitalization: 50
Outcalls: 1
Physical Examination: 34
Sick leaves: 235½

VI. PERSONNEL
1. After three long years, several meetings, countless revisions, the Gia Dinh Labor Service finally gave its seal of approval to our rules of Employment.

PM travelled to UTH to participate in the meeting called to discuss the terms of the agreement between the Company and the Far East Pilots Association.

2. Personnel Strength - Saigon Base

VII. TRAFFIC/AAM

1. During the month many difficulties with Immigration and Customs were encountered. Local officials desire to setup three control points within the Terminal for personal baggage check both outgoing and incoming, but the customer is strongly opposed.

2. Aircraft 912 arrived from HongKong with properly documented paperwork but with manifests showing only "Personal Effects" for some Customer HongKong purchases. The Customs people wanted to hold the aircraft and contents in bond until the individuals cleared the items.

One of the CORDS sponsored passengers on aircraft 084 failed to clear Immigration and caused some difficulty, which was cleared the next day.

Inbound (lbs) SGN	491,550	414,349

VIII. OPERATIONS

1. Pres/TPE and AVP/TPE visited Saigon Base. The President was impressed with the new window in FOD overlooking the ramp and he suggested a study be made on the feasibility of installing a mirror outside which would enable us to view the departures from the Traffic Terminal. In conjunction with this requirement a study of closed circuit TV installation is being made.

2. [redacted] presently engaged in Operations Dispatcher OJT is progressing well. We expect her check out in routine operations by 1 June 1970. She will be the first female Flight Dispatcher in the history of Saigon Base.

The 7001 customer added VTB N7695C to the contract effective 1 April 70.

There were 13 controllable and 53 non-controllable delays with a total of 905 Saigon departures. This averages out to be 98.6% on time departures.

3. Flight time report (see attachment A)
Ground Fire Incidents report (see attachment B)

4. Accident reports

Date	A/C Type/No.	Location	Remarks
02	VTB/N3674G	V-193	R.H. engine flamed out and started smoking while taxiing to ramp after landing - F/O noted flame in tail pipe. R.H. engine fire bottle was discharged. A thorough inspection of the engine was made by maintenance and was found to be satisfactory. The cause of the engine flame out was not determined. The presence of smoke and flame in the engine exhaust tail pipe was possibly due to the residue of fuel in the Plenum Chamber and the failure to motor engine immediately after flame out.
22	VTB/N3674G	SVN operation exact location unknown	During overnight service found L.H. engine impeller blades damaged from foreign object damage. Foreign object damage was not determined.
	VTB/N6154U	SVN operation	On walk around after days flight, found R.H. engine first stage compressor blades have several deep nicks. Engine was satisfactory on previous overnight service. Foreign object damage source unknown. Continued emphasis on FOD is in progress.

5. Ground Transportation

Aggregate microbuses mileage	22661 km or 14163 miles
Microbuses down-time	216 hrs 06'
Microbuses pax carried	3188 pax
Isuzu Bus mileage	5792 km or 3620 miles
Isuzu bus down-time	31 hrs. 30'
Isuzu bus pax carried	10408 pax
Supply vehicle mileage	2147 km or 1341 miles
Supply vehicle down-time	45 hrs. 12'

6. Flying - The first half of the month was spent in anticipation of the Company/FEPA agreement and the last half in awe absorbing what was agreed upon. The FEPA agreement has been bolstered by the installation of transponders in the VTB aircraft. The transponders installation has done its share of raising morale. Our installation is running well ahead of schedule. Next item on the agenda to improve our lot - UHF.

MFDSVN with the BMSGN, PMSGN and MFASGN attended a meeting convened by the President at Udorn. This meeting attended by corresponding representatives from other bases, was to apprize all of the contents and interpretation of the FEPA agreement.

Our last operational 10-2 departed the station for Bangkok on 6 March. This leaves two 10-2s in storage for which there are no crews assigned. We have one Helio in storage for which we have no crews assigned or current.

IX. TECHNICAL SERVICES

1. March was very productive and passed without a major problem. Several facility projects were completed and closed out.

2. We are trying to improve ground safety and general housekeeping. Two of these areas are (1) Employees walking across the East ramp at shift change with aircraft taxiing in/out of the same ramp. (2) Vehicle controls for possibly permitting a few managers to park their private vehicles behind the RMD hangar.

3. Regarding CTO accumulation, progress is being made in every department of Technical Services. The same equal attention has been applied to Home Leave and Annual Vacations.

4. The new elevated TSN airport water tower is not living up to our expectations - by any means. It is unable to supply all the water requirements of the few Airline users. Water supply lines are being turned off during the lunch period and also from about 1900L to 0600L every day, and we have to pump from our 50,000 Gal. underground reservoir, which must obtain its resupply from that same TSN tower.

2. Aircraft Maintenance - The aircraft maintenance activity was on the increase during the month with the resultant increase in work load which was generated by the higher number of aircraft departures and arrivals, engine changes and No.4B services on PC-6C N394R.

Ten aircraft departure delays were charged to maintenance during the month which has sharply increased over the month of February. Some of the delays appear to be beyond control of maintenance personnel however the majority were not and could be avoided if everyone concerned did put more thorough effort into aircraft maintenance.

3. Rotary Wing - This month we have been quite busy flying over 1000 hours and performing ten number two services, two No.3A services, one No.3B service, two high time engine changes and two engine changes with hot end inspections to facilitate turn around time.

A new Flight Mechanic Training Course started on the 30th and eleven TCN's were transferred into R/W Section for OJT.

4. Shops - Overall Shop activities remained on an even par. The number 4 service on PC-6 N394R was accomplished without any major problems.

5. Planning/Engineering - The Planning and Production Control Section pre-planned, scheduled and processed, for aircraft of all types; 503 overnight services; 28 number one services; 18 number two services; 7 number three services; 2 number 4 services; 5 annual inspections; 18 engine changes (4 for 204B); 7 propeller changes; 72 EA's; 33 SI's; 5 EI's; 237 time controlled components change on 204B; two T53 engine hot section inspections; 1 main rotor hub change; 3 DRR's and 160 shop work orders.

6. General Maintenance - Several moves have been made this month to better utilize existing space and enable the demolition of two shacks that have been eyesores for years. Offices affected in the moves were SGM, Technical Training offices, SAT, Accounting and Supply Storage. The Time Shack and Supply Storage (Rice Room) near the Operations Bldg were demolished. MSAFE was moved back to the BM Office.

Installation of porcelaine insulators for the 200 ^{2}mm power cable between the Utilities Building and the RGMD Complex is in progress.

7. Electronics - This month 15 ATC Transponder installations: 7EA PC6-34-2, 5 EA-VTB-34-9, 1 EA-C45-34-3 and 2 EA-204-34-2 were completed.

The project of in-country teletype circuits is dormant pending receipt of customers willingness or acknowledgement of intent to furnish the required land liner and circuit pattis at and betwwen SGN-DAD-NHA.

8. Technical Training - March had our Technical Training Department operating on a reduced schedule due to a shortage of two Instructors. However, no courses under instruction were dropped and the following courses were completed: Non-destructive Testing, Heat treating, Welding. Classes now in progress are: Management course, Helicopter Maintenance & Flight Mechanics course.

9. Quality Control - The month of March was about the same as the month of February. The work load has settled down on an even keel.

We had four Inspectors satisfactorily complete the four week Technical Training course on Non-destructive Inspection.

10. Stores Section - The closing of the hostel and tearing down of the C-Ration/rice room has placed a temporary burden on RSD as secured storage space needed for bulky items of this nature is becoming a scarcity.

11. Stock Control Section - During the month of March, Stock Control workload experienced a slight decrease as compared to previous months.

12. Customs - The Customs Agent continues to perform in an outstanding manner despite the never-ending petty and irritating problems which have to be faced daily. Thanks to his ability, fortitude and loyalty, he again managed to clear all commercially shipped Company cargo with celerity, thereby reducing any officially planned delays to a minimum.

13. Cycle Inventory - During the month of March, the Property and Inventory Unit completed cycle inventories of classes 01H and 01Q for a total of 738 line items. Also completed was property cycle inventory of A/C 1636 (A-D) for a total of 1242 line items. In addition to cycle inventories 173 property transactions were made.

FLIGHT INFORMATION CENTER

- SAIGON -

- MONTHLY ACTIVITY REPORT -
1 - 31 March 1970

PART I

- Ground-Fire Incidents -

Date	A/C No., Type & Contract	Place	Description
08 Mar.	N9577Z VTB 7001	BS510720	77Z was turning a right base for landing on runway 28 at V23 when the control tower requested he make a left 360 deg. turn. Entering the turn Capt. TURNER heard a chatter of automatic weapon's fire and felt the impact of one round against his a/c. Capt. TURNER continued the 360 deg. turn with no further incident. Inspection revealed the extent of a/c damage to be one round in through the right wheel well door and out through the engine exhaust. There was no personnel injuries.
12 Mar.	N3674C VTB 7001	BT309186	Capt. STOUDT was on final when he heard one small arms round pass near the a/c. No personnel injury or a/c damage involved.
16 Mar.	N1307X 204-B 7001	XR 3097	On landing at hotel pad PIC observed three rounds of 60mm mortar or 40mm grenades impact about 150 feet in front of a/c. PIC flew out immediately. 07X continued to operate in same area, but a safe distance from this pad. The PIC observed no further activity.
23 Mar.	N1303X 204-B 7001	BT 0534	While on climbout PIC heard groundfire directed at the a/c. PIC continued climbout and departed the area. No personnel injury or a/c damage involved.
31 Mar.	N1304X 204-B 7001	Vicinity of: XR 1494	While a/c was on the approach to an LZ, crew observed mortar fire in the vicinity of the LZ. PIC elected to go around and make his approach from a different direction. After landing, mortar fire impacted 100 meters from LZ. PIC immediately took off and departed the area. No personnel injury or a/c damage involved.

PART II

- Situation Summary -

During the early part of March all eyes here were focused on events transpiring on the Plain De Jars and in Cambodia. Reports were being received that the Cambodian Military Forces were pressuring the NVA to vacate their border by attempting to cut off enemy supply depots and transportation corridors. Enemy logistic activity was reported in all bordering provinces throughout RVN and increased terrorist/ sapper incidents were carried out in the larger cities for the second consecutive month (some 23 incidents in Saigon alone) most of which involved use of grenades thrown from motorbikes and small quantities of plastic charges targeted for allied and Vietnamese installations. On the evening of the 29th That-Son (V-173) in the Delta reported receiving an estimated 500 rounds of mixed mortar and rocket fire commencing what has turned out to be a country wide coordinated offensive (called a "highpoint" in military jargon) and what is believed to be another phase of the Spring Campaign. Attacks by fire and small unit ground attacks can be expected until the termination of this current phase of activity in early April

QUARTERS A CENTRAL OFFICE FOR SOUTH VIETNAM (COSVN) DIRECTIVE ON THE TREATMENT AND DISPOSITION OF AMERICAN PRISONERS OF WAR. THE DIRECTIVE, ISSUED BY COSVN'S MILITARY PROSELYTING SECTION, WAS READ TO ALL MEMBERS OF THE BORDER SECURITY BATTALION BY THE BATTALION'S POLITICAL OFFICER, CAPTAIN TU P H U O N G. HE PREFACED HIS READING OF THE DIRECTIVE BY STATING THAT IT PERTAINED TO AMERICAN PRISONERS ONLY. FOLLOWING A VERBATIM READING OF THE DIRECTIVE, PHUONG RELATED SR-2 HEADQUARTERS' SPECIFIC INSTRUCTION FOR THE BORDER SECURITY BATTALION AND ADDED HIS OWN COMMENTS.

1.3(a)(4)

2. ACCORDING TO THE DIRECTIVE, A GREATER EFFORT WAS TO BE MADE DURING THE BALANCE OF 1969 AND ALL OF 1970 TO CAPTURE AMERICAN SOLDIERS. ALL CAPTURED SOLDIERS WERE TO BE TREATED VERY WELL IN PREPARATION FOR THEIR EVENTUAL RETURN TO THE UNITED STATES. THEY WERE TO BE RE-INDOCTRINATED AND TO BE SHOWN THAT COMMUNISM OFFERS A BETTER WAY OF LIFE, BECAUSE THEIR "INEVITABLE" CONVERSION TO COMMUNISM WOULD BE OF GREAT

1.3(a)(4)

NND 927660-104

1.3(a)(4)

(classification) (dissem controls)

PSYCHOLOGICAL VALUE TO THE COMMUNIST CAUSE THROUGHOUT THE WORLD. THE DIRECTIVE FURTHER INSTRUCTED ALL UNITS TO BE PREPARED TO MOVE AMERICAN PRISONERS TO THE COSVN HEADQUARTERS AREA IMMEDIATELY, WHERE THEY COULD BE TREATED AND FED PROPERLY, WHERE SECURITY WAS GOOD, AND WHERE THEY COULD BE MORE EASILY RE-INDOCTRINATED. THE DIRECTIVE ALSO WARNED THAT ANY MISTREATMENT OR KILLING OF AMERICAN PRISONERS WOULD RESULT IN STRONG DISCIPLINARY ACTION.

3. PHUONG THEN RELATED THAT AN UNNAMED OFFICER FROM SR-3 HEADQUARTERS HAD VISITED SR-2 HEADQUARTERS AND THAT AN AGREEMENT WAS REACHED THAT ANY AMERICANS CAPTURED BY SR-3 WOULD BE BROUGHT TO SR-2 HEADQUARTERS. ALL PRISONERS FROM SR-2 AND SR-3 WOULD THEN BE MOVED FROM SR-2 HEADQUARTERS TO THE SR-2 BORDER SECURITY BATTALION FOR TRANSFER BY NIGHT THROUGH CAMBODIA TO THE COSVN HEADQUARTERS AREA. PHUONG REMARKED THAT HIS LISTERNERS SHOULD FEEL HONORED THAT THEIR BATTALION WAS SELECTED TO DELIVER THE PRISONERS TO COSVN HEADQUARTERS, AND THAT THEY SHOULD BE VERY CAREFUL WHEN MOVING THE PRISONERS. THE PRISONERS WERE TO BE GUARDED AT ALL TIMES AND WERE TO BE WELL FED WHEN THEY ARRIVED AT

1.3(a)(4)

MEMORANDUM

TO : BM/SGN

DATE: 04 March 1970

REF. No. SZDAD/70/025

FROM : SZ/DAD

SUBJECT: DANANG Station Monthly Report for February 1970

GENERAL

Reports of hostile activity during the month of February were limited to one small ground probe of the airbase perimeter and minor mortar attacks directed at Marble Mountain, about ten miles south of Danang. No increase in enemy activity was apparent during the TET holidays.

No Southern Air Transport flights transited Danang during the month.

Inauguration of the utilization of transiting international flights for the shipment of Danang originating or terminating cargo is now pending an interpretation of a certain customs form. Although this form ostensibly is to approve the payment of overtime to customs inspectors, it appears to also include provisions for supplying them transportation and an agreement to comply with any terms the Director of Customs may deem necessary.

CUSTOMER RELATIONS

At the request of AID a joint meeting was held between company, AID and Embassy to determine the feasibility of formulating written procedures to govern the routine aspects of the operation. No agreement was reached due to the differences between the AID and Embassy policies and methods.

LEGAL

The hostel [redacted] was vacated on 9 February. The remaining hostel is presently layed out to provide accommodations for fifteen personnel, but could be modified to increase this capacity slightly.

The normal complement of RON flight crew personnel dropped to seven for a two week period when the DAD/SGN early morning departure C47 flight was rescheduled and the Embassy 204B was reassigned temporarily to another location. However, due to revised scheduling, and the return of this 204B, thirteen RON crew members will again be required and additional hostel capacity may be desireable to handle contingencies. Hostel accommodations are no longer being provided for China Air Lines flight crews on a routine basis.

FACILITIES

No further information has been received concerning AID plans to renovate the CSD warehouse into a passenger terminal/flight operations office. One difficulty reported is that Embassy will not provide positive assurances that the building will not be required in the future for cargo storage purposes.

The status of the Concrete Paving/Drainage Ditch and the Passenger Terminal Renovation projects remains indefinite.

FISCAL

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures totaled: 40,225$VN

OPERATIONS

Revenue flight time declined substantially in February as compared to any previous month. Contributing factors included poor weather, the rescheduling of flights on the part of AID, reduced Embassy requirements, the lack of flying over the TET holidays and only one 204B being assigned during the last half of the month. Prospects for March are a little more encouraging although Embassy is not forecasting any significant increase in flying.

The following is a breakdown of flight time generated by this station during February:

VN-70/AID	501+50
VN-70/Embassy	148+18
0030	6+16
0069	4+18
Non-Revenue	2+30
TOTAL	663+18

Revenue losses for the month were as follows:

Weather	12+45
Maintenance	11+00
Customer Cancellation	Nil
Other	Nil
TOTAL	23+45

The Old Hostel occupancy factor was: 65%.

COMMUNICATIONS

Interference on HF was again pronounced and reception ability was reduced accordingly during several periods. On one day it was necessary to relay all message traffic thru Nha-Trang. Since both the Saigon and Danang improved transmitting antennas are in operation, better reception than experienced was expected.

The Monkey Mountain remote VHF/UHF relay was out of service approximately thirty six hours due to maintenance on the power supply.

Three ATEA telephone/intercom instruments are presently out of service due to broken dial gears. COMEMG/SGN has been requested to procure or fabricate replacements.

Incoming and outgoing messages totaled 1527 and 1771 respectively.

TRAFFIC

Traffic workload did not decrease significantly in February as had been expected. In fact, a projection of passenger handlings reveals a greater number of departing passengers in February as compared to January.

Passenger and cargo statistics for the month are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-7001/AID	2,182	2,198	207,050	239,775
VN-7002/EMB	554	652	350	11,391
0069	-	3	-	-
0005	-	-	-	-
0030	1	3	-	-
AAM	79	90	2,819	12,964.7
TOTAL	2,816	2,946	210,219	264,130.7

SECURITY

A general increase in air base security measures threatened to create problems for all personnel not in possession of valid pass in gaining access to the base. For a few days Americans were stopped at the gates to produce identification. Fortunately no company employees were unduly detained.

The VNAF Security Officer has stated that effective 1 March, even flight crew personnel in uniform must have a valid pass (many of which will expire in March). However, to date this policy has not been enforced.

PERSONNEL

Another personnel reduction was accomplished in February involving Security Guards, Hostel Maids, and GTD drivers. However, the cost savings will be offset almost completely by the recent increase in meal per diem authorized for American flight crew personnel.

A potential problem may develop with the local immigration authorities concerning a requirement that non-indigenous personnel have their passports and extension of stay documents in their possession for possible residence checks. Compliance with this requirement, if enforced, will lead to serious consequences since employee passports are held in Saigon most of time for processing visas, work permits, extensions of stay, et cetera.

The personnel breakdown at Danang Station at the close of business, 28 February 1970, was as follows:

	[redacted]			
Permanent	4	13	18	72
Pre-Process	0	0	0	1
Temporary	1	0	0	0
Daily-Hire	0	0	0	0
TOTAL (109)	5	13	18	73

TECHNICAL SERVICES

RMD handled a total of 539 arriving and 542 departing flights, as compared to 603 and 606 respectively in January. Delays attributable to maintenance totaled three. Only three number 1 services were performed, all on 204B aircraft. Two aircraft were placed on AGP status during the month.

RGMD expended at total of 616 manhours, of which 250 were utilized in the maintenance or improvement of leased properties. Since MFA/SGN has advised that company furnished materials and supplies are required for all building maintenance and upkeep, with the exception of the USAID warehouse, additional projects of this nature will be commenced in March.

MEMORANDUM

TO : BM/SGN

DATE: 04 March 1970

FROM : SZ/DAD

REF. No. SZDAD/70/025

SUBJECT: DANANG Station Monthly Report for February 1970

GENERAL

Reports of hostile activity during the month of February were limited to one small ground probe of the airbase perimeter and minor mortar attacks directed at Marble Mountain, about ten miles south of Danang. No increase in enemy activity was apparent during the TET holidays.

No Southern Air Transport flights transited Danang during the month.

Inauguration of the utilization of transiting international flights for the shipment of Danang originating or terminating cargo is now pending an interpretation of a certain customs form. Although this form ostensibly is to approve the payment of overtime to customs inspectors, it appears to also include provisions for supplying them transportation and an agreement to comply with any terms the Director of Customs may deem necessary.

CUSTOMER RELATIONS

At the request of AID a joint meeting was held between company, AID and Embassy to determine the feasibility of formulating written procedures to govern the routine aspects of the operation. No agreement was reached due to the differences between the AID and Embassy policies and methods.

LEGAL

The hostel [redacted] was vacated on 9 February. The remaining hostel is presently layed out to provide accommodations for fifteen personnel, but could be modified to increase this capacity slightly.

The normal complement of RON flight crew personnel dropped to seven for a two week period when the DAD/SGN early morning departure C47 flight was re-scheduled and the Embassy 204B was reassigned temporarily to another location. However, due to revised scheduling, and the return of this 204B, thirteen RON crew members will again be required and additional hostel capacity may be desireable to handle contingencies. Hostel accommodations are no longer being provided for China Air Lines flight crews on a routine basis.

FACILITIES

No further information has been received concerning AID plans to renovate the CSD warehouse into a passenger terminal/flight operations office. One difficulty reported is that Embassy will not provide positive assurances that the building will not be required in the future for cargo storage purposes.

The status of the Concrete Paving/Drainage Ditch and the Passenger Terminal Renovation projects remains indefinite.

FISCAL

[redacted] payroll for the month totaled: 1,131,330$VN

Petty cash expenditures totaled: 40,225$VN

OPERATIONS

Revenue flight time declined substantially in February as compared to any previous month. Contributing factors included poor weather, the rescheduling of flights on the part of AID, reduced Embassy requirements, the lack of flying over the TET holidays and only one 204B being assigned during the last half of the month. Prospects for March are a little more encouraging although Embassy is not forecasting any significant increase in flying.

The following is a breakdown of flight time generated by this station during February:

VN-70/AID	501+50
VN-70/Embassy	148+18
0030	6+16
0069	4+18
Non-Revenue	2+30
TOTAL	663+18

Revenue losses for the month were as follows:

Weather	12+45
Maintenance	11+00
Customer Cancellation	Nil
Other	Nil
TOTAL	23+45

The Old Hostel occupancy factor was: 65%.

COMMUNICATIONS

Interference on HF was again pronounced and reception ability was reduced accordingly during several periods. On one day it was necessary to relay all message traffic thru Nha-Trang. Since both the Saigon and Danang improved transmitting antennas are in operation, better reception than experienced was expected.

The [redacted] remote VHF/UHF relay was out of service approximately thirty six hours due to maintenance on the power supply.

Three ATEA telephone/intercom instruments are presently out of service due to broken dial gears. COMENG/SGN has been requested to procure or fabricate replacements.

Incoming and outgoing messages totaled 1527 and 1771 respectively.

TRAFFIC

Traffic workload did not decrease significantly in February as had been expected. In fact, a projection of passenger handlings reveals a greater number of departing passengers in February as compared to January.

Passenger and cargo statistics for the month are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-7001/AID	2,182	2,198	207,050	239,775
VN-7002/EMB	554	652	350	11,391
0069	-	3	-	-
0005	-	-	-	-
0030	1	3	-	-
AAM	79	90	2,819	12,964.7
TOTAL	2,816	2,946	210,219	264,130.7

MEMORANDUM

DATE: 13 March 1970

REF. No. BMSGN/70/83

TO : AVP-TPE

FROM : BM-SGN

SUBJECT : Monthly Report

Saigon Base Monthly Report for February 1970 is forwarded in three copies for your file.

Comments concerning Customer Relations was overlooked in the attached report. This oversight will be corrected in suceeding reports. Meanwhile Customer Relations remain unbelievable - good, that is.

E.J. Theisen

SAIGON BASE
MONTHLY REPORT
FEBRUARY 1970

I. GENERAL

1. Total block time for February was 5482 hours vs 6332 hours in ~~December~~ January.

2. VN-70 Customer (USAID/CORDS)terminated C-47 (GFE)43-16083 and C-47 (CFE) B829 effective 1 March 1970 due to failure to attain prescribed minimum on C-47 aircraft. C-47 083 is now in temporary storage at Tan Son Nhut.

3. Effective 28 February 1970, Beech N7950C was dropped from the ARPA (0030) contract and replaced with VTB N9577Z on 1 March 1970. N7950C was ferried to BKK on 6 March.

4. C-46 B912 will be substituted for B146 on 10 March after receiving No. 3 service at Tainan.

5. In view of the foregoing, the Saigon fleet stands at 49 aircraft vs 78 aircraft two years ago, with one C-47 #083, one VTB #695C, two 10-2s #622C and #77Y, and Helio #B849 in temporary storage. 41 aircraft comprise the active (basic) fleet on contract with C-46 #984, Porter #152L and C-47 #B829 carried as spares.

Two helicopters N8514F and N8535F were sent to UTH for TCS 18-28 February 70 at customer direction.

6. There were no major flying accidents in February 1970.

7. Our pilots continue to look sharper each day due to recent improvement in uniform by adding shoulder insignia and "scrambled eggs" to the hat shield. I observe the "duck tails" and sideburns getting shorter gradually. Attached are pittures of MFD Tidwell and Senior FEPA Representative SGN, Capt Zurla. I sincerely feel we must go one step further in the professional appearance of our pilots: Stay-pressed "wash and wear" pants of good quality plus an "Arrow Decton" type stay-pressed shirt. It has been my observation that if we dress our pilots up like gentlemen they tend to act that way both on and off the job with an improved professional performance.

8. Proposals to upgrade upcountry hostel facilities are being formalized to forward to AVP in the very near future. FEPA has participated with us and their recommendations have been considered..

9. The rising "free market" rate of 180 MPC to one USD and 400 piastres to one USD is having a marked effect on local economic conditions. Also merchants and local business men are taking into account the

strong rumor that the piastre will soon be devalued. They either delay any further business transactions while they wait to see what happens, or attempt to "make a deal" at an exorbitant price.

II. FACILITIES DEVELOPMENT

1. The hotest facility development projects are AR/69/055 "Renovations of Operations Building" ($20,605), and AR/69/054 "Renovation/Relocation of various AAM Shops and Offices" ($6,170). These ARs were forwarded to BCO TPE in October 1969. Priority approval would resolve a long standing problem of inadequate working environment due to past customer resistance to approving development of a new Operations/Administrative facility. With the accomplishment of the two cited ARs, Saigon Base will finally achieve an efficient working environment for all activities and provide a long standing facility requirement (i.e. locker and shower room) for pilots.

III. GENERAL AFFAIRS

1. Cost of living - Prices go on increasing amidst strong and sustained rumors that the piastre will soon be devalued. These rumors were based on the following indicators:

a. Forecast of GVN-financed import program for 1970 is lower than that of 1969. The reason being, as the US is pulling out, GVN funds of US Dollars accruing from the sale of piastres to the GI and Army's contractors is decreasing.

b. The commercialized import program (American aid) and P.L. 480 (US agricultural surplus products) may remain unchanged or slightly increase but far from being adequate to offset GVN increase spending, as a result of Vietnamisation of the war (particularly defense spending).

2. The piastres generated by these import programs and the resulting tax normally accounts for almost half of the total Government revenues. With these sources of revenues decreasing, the budget deficit estimated at 50 billions piastres is likely to be greater. More and more money will be chasing fewer and fewer goods.

3. The government efforts to bring rice from the rice surplus area (the Mekong delta) to the rice deficit area (Central VN and the highland) has failed. The farmers deliberately postpone sale in anticipation of higher price in the near future. Price of gold is officially fixed at 12,000 piastres per tael but the market price is VN$20,000. The black market rate for the green dollar and the MPC reached an all-time high of VN$400 and VN$180 respectively.

IV. SECURITY

1. Rumored public disturbances - None

2. Historical or customary dates & particulars forthcoming demonstration - None.

V. MEDICAL
Number of visits: 1069
Accidents: 80
Outcalls: 8
Physical Examination: 13
Sick leaves: 210

VI. PERSONNEL
1. A very routine month, with one exception: the TNN Training Program Candidates finally departed. We kept quite busy ministering to their last minute needs and assisting in their preparations for departure.

2. Personnel Strength - Saigon Base

Outbound (lbs) SGN	1,458,201	1,209,056
Inbound (lbs) SGN	450,007	491,550

VIII. OPERATIONS

1. There were 16 controllable and 77 non-controllable delays with a total of 937 Saigon departures. Early morning Saigon ground fog continued to be the major factor in the non-controllable delays.

FIC, GTD and the Emergency Equipment Room are in good order.

2. Flight Time Report (see Attachment A)
Aircraft Incidents Report (See Attachment B)

3. Accident Report

Date	A/C Type/No.	Location	Remarks
16	DHC-4, N544Y	Noted at SGN after last trip of day	R.H. nose gear outer rim damaged. Suspect from piece of rock/large stone or the edge of bent-up PSP during days operation.
22	C-46/N67985	CORDS Warehouse Ramp	Driver attempted to pass under left wing of aircraft - Forklift impacted aileron resulting in minor damage. Driver was issued a written reprimand - Two days suspension.

4. Ground Transportation

Aggregate microbuses mileage	20601 km or 12875 miles
Microbuses down-time	184 hrs 12'
Microbus pax carried	3242 pax
Isuzu bus mileage	4556 km or 2847 miles
Isuzu bus downtime	54 hrs
Isuzu bus pax carried	10490 pax
Supply vehicle mileage	1504 km or 940 miles
Supply vehicles down-time	108 hrs

5. Flying The month brought many changes in supervisory personnel and instructor pilots. Considerable F/O training was accomplished during this month. We had (DHC-4) and C-47 initial ground school coverage. The realization of equitable flying time and duty time among our American First Officers is slowly approaching.

FEPA still is in the "lime light" with negotiations continuing at Tokyo. There was a strong threat of a standdown beginning on 20 Feb. Proper negotiations on part of the company must have been accomplished as the threat of a standdown was averted. The morale of our pilots are at an all time high with great expectations on the part of the negotiations taking place.

Morale of the VTB pilots has improved tremendously with an increase in flying time in the program.

The most significant item for the month was that it was a totally accident/incident free month.

IX. TECHNICAL SERVICES

1. February was a good month with Maintenance Delays far less than January. It does indicate improvement in Maintenance quality.

We are now screening several of our TCN's who have responded to our request for 204B Flight Mechanic Trainees.

We recently finalized a formal Training Program for upgrading [redacted] employees working in the Supply Dept at Saigon. The intent is to utilize the Supply Trainee course that was developed by Tainan.

2. Aircraft Maintenance - The general activity and work load have further declined during the month, which has resulted in a low total number of aircraft departures and arrivals.

The completion of No.4B service on Porter N285L was delayed by several days due to late return of several overhauled components from the Main Base and also the nonavailability of some of the items in stock.

3. Rotary Wing - Flight time was down somewhat for the month because of Tet holidays and the temporary transfer of N8514F and N8535P to Udorn for 10 days.

Transponders are now installed in all but one 204B, however with no spares available it's rather difficult to maintain these units as no repairs are allowed at Regional Stations.

4. Shops Overall Shop activities remained on an even par.

The USFAA Inspection Authorization (IA) activities increased during the month with Annual Inspections on two Porters and one Volpar.

5. Planning/Engineering - The Planning and Production Control Section pre-planned, scheduled and processed, for aircraft of all types; 493 overnight services; 17 number one services; 19 number two services; 2 number three services; 3 annual inspections 6 engine changes (1 for 204B); 6 propeller changes; 85 EA's; 30 SI's; 4 EI's 137 time controlled components change on 204B; one T53 engine hot section inspections; 1 main rotor hub change; 1 main transmission change; and 204 shop work orders.

6. Utilities Maintenance - The TSN Airport well pump broke down for 5 days during this month and PMD had to revert to reinstallation of water pumps in the well near the Operations Bldg, as a source of water.

7. Electronics - This month must be registered as one of much accomplished EA, EI, SI to SVN base aircrafts.

A total of 13 ATC Transponder installation was completed. This brings to a total of 26 aircrafts equipped with transponders in SVN.

8. Technical Training - The following courses were completed during February: Auto Maintenance, Non Destructive Testing. Courses were in Progress: Ground Equipment and Aircraft Welding. Four FAA Oral & Practical A&P examinations were conducted.

Fifteen [redacted] Trainees were sent to Tainan for the International Line Service Mechanic's Course. The remaining ten Trainees should depart within the next few days.

9. Quality Control - Four Inspectors have satisfactorily completed the Technical Training Course on Non-Destructive Inspection.

The number 4 service on PC-6 N285L was completed this month with no major problems encountered for this dept.

10. Supply - The relocation project is still underway. The tools sale display cabinets fabrication and installation was completed early this month. The relocation of the Tool Crib Issue Window, now next to the Main Issue Window was completed too. Both Stock Control Section and Shipping & Receiving Section have maintained a smooth and normal function.

E.J. Theisen
Base Manager - Saigon

ADDENDUM

FISCAL

1. Customer Relations - Contract VN-70 has dropped two C-47 as of 1 March 1970 and also notified us they plan to drop the C-46 on the CAL sub-contract.

2. Budget Matters - Total net reduction of personnel during the two month period was 34. The monthly presentations of cost data continued to generate a lot of interest in our progress. Evaluation of monthly salary costs indicates almost all departments have made significant progress in reducing costs this fiscal year. For example total salary costs for April 1969 were $779,934 while total salary costs for December were $595,622 for a total reduction of $184,312.00. We are looking hard at remaining pooblem areas to see what further improvements can be made.

3. Exchange Rate - No change has occurred in the official exchange rate for piastres. Rumors abound or to the possibility of devaluation although no one can give us any definite information as to when or how much. Meanwhile the Black market rate continues to rise. Latest information is VN$400 to US$1.00.

FLIGHT INFORMATION CENTER

- SAIGON -

- MONTHLY ACTIVITY REPORT -

1 - 28 February 1970

PART I

- Ground Fire Incidents -

Date	A/C No., Type & Contract	Place	Description
01 Feb.	N6535F 204-B 7001	XR 1192	After take off from an outpost, the PIC heard heavy small arms fire directed at the a/c. Capt. BASHAM immediately made a sharp left hand turn and departed the area. No a/c damage or personnel injury involved.
06 Feb.	N1305X 204-B 7002	XR 3196	As a/c was on touchdown at LZ, Capt. CASE observed ground personnel running for cover. After hurriedly disembarking six RD troops, the PIC immediately took off observing mortar fire in the LZ as a/c gained altitude. No a/c damage or personnel injury involved.
17 Feb.	N1304X 204-B 7001	BT 1050	As a/c was climbing, the PIC observed tracer fire to the rear of a/c. Capt. WINSTON changed course and departed the area. No a/c damage or personnel injury involved.

PART II

- Situation Summary -

Light enemy activity prevailed during the month of February. Acts of terrorism in Saigon and the uncovering of rice and weapons caches highlighted this months reports. Some fourteen terrorist/sapper incidents were reported in Saigon which included the shooting and subsequent wounding of a MACV courier who was proceeding down Pasteur Street shortly before sunrise on the 8th. Some twelve hours later an estimated twenty pound charge detonated at the corner of Tu-Do and Le-Loi Streets

PART II

- Situation Summary - (Con't) -

on top of the VN Press Club resulting in extensive damage but no casualties. On the 27th a terrorists placed a ten pound charge near the wall of the metropole BEQ resulting in 4 WIA and minor damage. Two km SE of MACV headquarters, a USAHAC bus entering the intersection of Vo-Tanh and Truong-Tan-Buu Streets received one round of sniper fire wounding a USN Petty Officer.

Allied forces reported discovering enemy caches in the Central highlands, III Corps, and the Delta. Certainly one of the biggest finds of the war was uncovered at Ran-Rang (VL48) where to date 169 tons of various types of rifles, mortars, rockets, and munitions have been unearthed at 33 different cache sites. In addition to munitions and weapons, large numbers of picks, shovels, and entrenching tolls (manufactured in India) were recovered as well as bicycles, medical supplies, radio equipment, clothing, detonating cord (533, 525'), rocket motors (139) and rocket warheads (16). Of particular interest is how and when this amount of supplies reached an area 45 miles from the closest point of the Cambodian border. Analysts estimate that some of the material had been in place less than three months and that some storage bunkers were constructed less than six months ago. The supplies were in good condition with no sign of deterioration. While it is believed the supplies were transported via what is know as the JCILEY Road to what extent vehicles were utilized is undetermined. Interestingly enough local newspapers report that a herd of some forty elephants were sighted at the cache site six months ago and another herd of some ninety elephants five months later.

PHNOM PENH IS SERIOUSLY CHALLENGING SIHANOUK'S POWER

Sihanouk is returning to Cambodia to reassert his authority in the wake of unprecedented attacks against the Vietnamese Communist embassies in Phnom Penh. The sacking of the North Vietnamese and Provisional Revolutionary Government diplomatic installations by thousands of students caps a period of growing anti-Communist sentiment and has produced the most serious crisis to date in Cambodia's relations with Hanoi and the Viet Cong.

There is no doubt that the attacks, which protested the presence of Vietnamese Communist troops on Cambodian territory and the forthcoming visit of North Vietnamese Prime Minister Pham Van Dong, were government inspired. The assaults in the capital were preceded and followed by anti - Viet Cong demonstrations in several provinces, and portions of the Vietnamese community in Phnom Penh also were objects of mob actions. The attacks received the unanimous support of a special session of both houses of the Cambodian legislature, which passed a declaration asking the government to take all measures necessary immediately to solve the problem of Viet Cong infiltration.

The Cambodian chief of state has curtailed his scheduled visits to Prague, Moscow, and Peking and notified the Queen that he is returning to Cambodia to call for a referendum, asking the people and the army to choose between himself and "those personalities" who organized the sieges on the embassies on 11 March. He threatened to step down if he loses; he has used such threats in the past to quiet domestic criticism.

Sihanouk's decision to return abruptly is a clear sign that he interprets these events as a strong challenge to his authority. Sihanouk and the government have been at odds for some time, but the assaults on the Vietnamese represent the first overt attempt by the government to undermine his foreign policy. Although Sihanouk has led the criticism of Vietnamese Communist activities in Cambodia, he has taken some pains to avoid pressing the Communists too far.

It is still not clear what government leaders hoped to achieve by the attacks. By playing on traditional Cambodian animosity toward the Vietnamese, they may have wanted to confront Sihanouk on an issue on which popular opinion would be against him. They may also, however, have miscalculated Sihanouk's reaction. Until now, the government's strategy has been to limit Sihanouk's power slowly and carefully. They must now decide whether to meet Sihanouk head on or give ground. Much will depend on how hard Sihanouk presses them and whether individuals like Deputy Prime Minister Matak, who has led the anti-Sihanouk forces, calculate that they can count on firm and continuing support from those forces. (CONFIDENTIAL)

BANGKOK STIFFENS EFFORTS AGAINST MALAYSIAN COMMUNISTS

Thai security forces, operating under Bangkok's newly reorganized security command in the south, are exerting more pressure along the Malaysian border against the Communist Terrorist Organization (CTO). The Thai Government, responding to rising domestic criticism of increased banditry and Communist terrorist activity in the southern provinces, late last year ordered its civilian-military Communist Suppression Operations Directorate (CSOD) to take over security responsibilities in the south. CSOD's newly appointed regional commander, who set up his headquarters in January, has indicated that he intends to step up operations against the CTO along the border as well as against Thai Communists. A gradual increase in minor contacts with CTO elements attests to greater Thai patrolling efforts.

In early March, Thai security forces in the border region may have ended their past practice of avoiding contact with the well-ensconced CTO units when they overran a major CTO base camp. It was their largest skirmish to date with the Malaysian Communists. Although discovery of the camp--believed to have been the headquarters of the CTO 8th "regiment"--was mostly accidental, Thai commanders were quick to commit substantial reinforcements to the fray, which claimed a dozen casualties on each side. Although poor Thai tactics allowed the 200 defending guerrillas to escape, a precedent for future actions may have been set.

As part of its pressure on the CTO, Bangkok has responded to Malaysia's long-standing effort to expand the limited border agreement that has governed joint border security operations between the two countries since 1965. The two governments announced last week the signing of a new agreement that for the first time allows Malaysian military forces to cross the border in "hot pursuit" of guerrillas and to operate five miles inside Thailand for a 72-hour period. Kuala Lumpur took immediate advantage of this concession by launching a sizable sweep operation into Thai territory. The agreement also provides for a new bilateral headquarters to facilitate joint security operations.

In spite of their increased aggressiveness, it remains to be seen if Thai security forces will mount a serious military challenge to the well-armed 1,300-man CTO military organization. Bangkok has yet to make a credible effort to counter the CTO's well-developed political infrastructure among the predominantly Muslim and Chinese border population. Although Malaysian leaders have not forgotten Bangkok's traditional lethargy in dealing with the CTO and are less than fully satisfied with the terms of the new border agreement, they are hopeful that the recent Thai actions are a sign of greater willingness to cooperate. NND 941536 --- 379

China's Absent Leaders

Chinese Communist Party Chairman Mao Tse-tung and his designated heir Lin Piao have once again slipped into the shadows. This time they have been publicly inactive for five months. In fact, aside from three ceremonial appearances in October 1969, they have been out of the public eye since last April and May, when they appeared in connection with the Ninth Party Congress.

Mao, now 76, may well be slowing down, but there have been no reports that his current absence has been caused by ill health. Instead, it appears that infrequent public appearances have become a style of leadership in China. Although Chou En-lai and several other leaders have appeared frequently, about one half of the politburo has failed to make a public appearance yet this year.

Adding to the impression of aloofness from Mao is the fact that he has entirely stopped turning out "latest instructions," pronouncements which played such an important part in Peking's propaganda during the Cultural Revolution. The last such instruction was originally issued in September as a National Day slogan without attribution to Mao, but later propaganda described it as Mao's own composition.

Despite his public inactivity, Mao may be very active behind the scenes. He presumably is following the Sino-Soviet border talks closely and he may also be receiving various provincial leaders in private, as he has over the past several years. (CONFIDENTIAL)

M O N T H L Y R E P O R T
N H A - T R A N G
APRIL 1970

GENERAL

The month of April began with a bang and ended very quietly. Nha-Trang airbase was hit twice during the first week of April. The airport lost part of the fuel depot while one round impacted within two hundred feet of the C. house killing one and wounding two Vietnamese.

Business however, slacked off a bit from last month which was the high month for 1970 so far.

TRAFFIC

Traffic activities remained normal throughout the month with a decrease in aircraft handeling and workload felt. Attached statistics relate the situation.

STATISTICS

PASSENGER	April	March	1969
Departing	3529	3627	3500
Arriving	3261	3372	3522
TOTAL	6690	6999	7100

CARGO

1. GROUND SERVICES (Lbs)

Departing	685,471	503,895	376,229
Arriving	159,376	266,492	234,530
TOTAL	844,847	770,387	610,759

2. COMPANY CARGO (Lbs)

Departing	4,736	19,388	17,337
Arriving	4,511	9,122	24,735
TOTAL	9,247	28,510	42,072

3. GRAND TOTAL (Lbs) (1+2)

Departing	690,207	523,283	393,566
Arriving	163,887	275,614	259,265
TOTAL	853,094	798,897	652,831

CUSTOMER RELATIONS

Relations with all customers remain good to excellent - No problems here.

OPERATIONS

A. Communications

The latter side of the UHF ground station repeater broke down and remained out for the better part of the month. Parts and tubes were obtained and the unit is now operational.

We still receive interference and background noises on the HF and SSB receivers. Our next approach is to relocate the COMM antennae.

B. FLIGHT FREQUENCY (See attached)

C. ARRIVAL AND DEPARTURE COMPARISON

	April	March	1969
Arrival	480	508	573
Departure	479	510	571
ACN	193	207	324

D. DELAYS

Percentage on time	95%	97%	

SECURITY

No major problems. Two Guards are to be transferred to the Ground Services contract this next month.

PERSONNEL

A decrease of two TCN and one [redacted] personnel came about through the transfer of two and the surplusing of one employee. A continued planned decrease can be expected next month - (See attached chart for totals)

Continued effort is being placed on reducing outstanding CTC, but we are reaching the point where it is difficult, and in some cases impossible, to release persons for CTC without incurring more. Nevertheless we plan to further reduce this company obligation.

FISCAL : No problems.

LEGAL : No problems.

SAIGON BASE
MONTHLY REPORT
APRIL 1970

I. GENERAL

1. Total block time for April was 5880 hours as compared with 5910 in March and 5482 in February.

2. The security situation in Saigon remains calm with a few more incidents than occurred last month. On 30 April at 0555L a satchel charge exploded at a military billet within 80 yards of the BM House wounding several military personnel and breaking glass in houses across the street. Except for rattling the occupants, there was no damage to the BM house. There has, however, been an upsurge of demonstrations (three in the last two-one-half weeks) which keeps downtown Saigon at a standstill while they are going on. The last series of demonstrations were by students, veterans and militant monks over the war, land reform, and greater recognition. Like dissident demonstrators all over the world, they had nothing constructive to offer to society — only criticism.

3. VPFCA advises Caribou B851 is still being considered for assignment to Saigon from Udorn. The VN-70 customer is still interested in this aircraft.

4. Our major Accident/Incident rate is fortunately still holding up with only one mishap since 1 January 1970 — a taxi accident on 3 January.

II. CUSTOMER RELATIONS have never been better.

III. Facilities DEVELOPMENT

1. Form F's have been approved by customers on Renovation of Operations Building plus Relocation of various Shops and Offices. Approval has been received from Taipei to proceed on these projects. Form F's have also been submitted to the customer for :

a. Terminal Parking Apron - SGN
b. 204- Helicopter Pads - SGN
c. Improvement of Passenger Lounge - DAD
d. Completion of Ramp and Drainage - DAD

I expect no action on these pending availability of FY 71 funds to the Customers. I am confident all the above will ba approved except "d" and that "g" will be reduced in scope.

IV. GENERAL AFFAIRS
See attachment.

V. MEDICAL

Number of visits:	1191
Accidents:	92
Hospitalization:	2
Unhospitalization:	90
Outcalls:	4
Phys. examinations:	28
Sick leaves:	154

VI. PERSONNEL

1. Personnel department activities were routine in nature, the only exception being PM's Company business trip to TPE at mid-month. APM at month's end, departed for HKG, TPE, LAX and NYC for a period of about two months. He is expected to return in early July.

2. General information - The RVN Ministry of Labor is trying, albeit unconsciously, to aid and abet the Company's cost reduction program they have begun to disapprove Work Permit applications submitted on behalf of some of our TCN employees and have been requiring these employees to leave Vietnam. It is a little too soon to tell just how many Work Permits will be disapproved. However, we do not feel that the situation will become critical since we do have the right of appeal, through and with the support of the U.S. Embassy.

3. Personnel Strength - Saigon Base

VII. TRAFFIC/AAM

1. The general flow of passengers and cargo continued at a normal rate with little difficulty encountered in the day to day operation.

2. This office has accepted the administration of the APDs during the absence of the MAPS and also is assisting the SAT arrivals and departures.

3. This is the occasional complaint of a passenger of items missing from their luggage when checked thru Air America. The majority of those losses reported are jewels, money and other hi-value items left in open or unlocked baggage which no doubt is a strong temptation to personnel with a limited income. We had our Security pull a spot check of the laborers lockers but did not uncover any customer items. The possibility remains that item was either not placed in the baggage or that it was removed by someone other than airline personnel.

	March	April
Passengers departure SGN (all contracts)	6,315	5,606
" arrival SGN "	6,997	6,573
Outbound cargo SGN	77,491	61,215
Inbound cargo SGN	127,260	68,369

TRAFFIC/USAID

Cargo (including AF Caribou A/C)

	March	April
Outbound (lbs) SGN	1,466,790	987,032
Inbound (lbs) SGN	414,349	425,494

VIII. OPERATIONS

1. C-47 revenue flying time was approximately 172 hours less than the previous month. The customer gives no indication that we can expect an increase in C-47 time.

2. There were 21 controllable and 27 non-controllable delays with a total of 891 Saigon departures. This averages out to be 97.0% on time departures.

FIC and the Emergency Section remain in good order.

3. Flight time report (see attachment A)
Ground Fire Incidents report (see attachment B)

4. Accident reports

Date	A/C Type/No.	Location	Remarks
04	C-46/N67984	Danang	Minor scratch across the bottom left aileron (approx 17" x 3/4" very light) noted during walk around at Danang prior to flight. Investigation revealed that the scratch resulted possibly as the result of a refueling truck attempted to drive under the outboard wing area. Continued emphasis on safe driving of vehicles in the vicinity of aircraft is being emphasized.
20	VTB/N91295	V-17, SVN	1/16" bend in one of first stage compressor blades found during pre-flight No. 2 engine. Cause: small piece of engine inlet duct, at leading edge, broke off and contacted speed check blade. After a thorough inspection aircraft was released for flight. SI issued for inspection on Engine Air Inlet Duct for cracks.
24	VTB/N91295	Cantho	During inspection damage was noted to the No.2 eng. seven each first stage compressor blades. Investigation revealed that a small part of the speed probe had separated and caused the damage to the first stage impeller. Two dents and heavy scratches on the remaining portion of the sensor indicated damage first caused by an unknown hard object possibly while operating in up-country fields.

5. Ground transportation

Aggregate microbusses mileage	24642 km or 15401 miles
Microbusses downtime	288 hrs 30'
Microbusses pax carried	3264 pax
Isuzu bus mileage	6291 km or 3931 miles
Isuzu bus down-time	33 hrs 48'
Isuzu bus pax carried	10394 pax
Supply vehicle mileage	2817 km or 1760 miles
Supply vehicle down-time	11 hrs

6. Flying

1. Another month accident free A great precedent and a good one, is being set. All will agree it is most gratifying to enjoy such a position.

2. MFD/SVN spent three days at Vientiane in Air Drop orientation. How qualified he became is a matter of conjecture, he got a "SHACK" one day and a "PANEL" the next. Overall the training received was most beneficial.

3. In general the morale of the pilots is very high. Few complaints are in evidence on the hostel at Danang and the Quarters at Cantho. The hostel at DAD is in the process of planning for renovation. The Customer at Cantho is to be approached regarding the facilities there.

IX. TECHNICAL SERVICES

1. The installation of Transponders in our SVN aircraft was completed this month to give us the satisfaction of beating the schedule by several weeks.

2. The flow time on the Porter aircraft AB Services has leveled off at eight days. The first one turned out in January 1970 was scheduled at ten days. Further improvement will probably come at a slower rate, depending upon the application of experience and the development of methods and procedures.

3. Facilities improvements and development are reduced to a low level. Work is continuing on several projects, such as improvement of the water and power systems, and providing employee recreational facilities, etc; however, most activities are confined to reshuffling and maintaining that which we already have on hand.

4. MTS/SVN Boyd Messecher departs 1st May on Home Leave for four months.

AIRCRAFT MAINTENANCE

Fixed Wing
The work load has slightly decreased during the month of April.

On turbo-prop aircraft several isolated cases of engine and airframe components malfunctioning were encountered. Several engines were changed due to oil leak at the front and rear carbon seals, low oil pressure, internal malfunction of torque system, low power output and one engine was changed due to FOD.

The first phase of training on the Management-Development Course has been completed by the group of twenty persons comprising Leadmen, Crew Chiefs and Supervisors. The second and the last phase will begin during the next month. A very favourable response has been shown by those attending the classes.

Rotary Wing
The month of April was quite busy, flying over 1050 hours and performing eight number 2 services, 1 number 3A service, 2 number 3B service, 2 Annual Inspections and 1 high time engine change.

Preplanning to cover the DAD heavy services with the present limited number of qualified Supervisors becomes quite a problem when flight schedules cannot be spaced to spread out the work load, as consistantly happens. The heavy vacation/home leave requirements contribute to that coverage problem.

Shops
Overall Shop activities remained on an even par. The USFAA Inspection Authorization (IA) activities were at a normal pace. The following aircraft underwent Annual Inspections and were recertificated: 204B N1305X, PC-6 N180K and C-46 N67984.

Planning/Engineering
DPLNG Mr. Burkett visited with us for 4 days in the last part of April. His visit was very beneficial to us.

General Maintenance
The deteriorated water pipe supplying the Personnel/Traffic Area is being replaced.

The installation of larger power cables between GMD and the Main Transformer Building is complete with the exception of Terminal lugs.

The extension of the revetment wall adjacent to the Operations Bldg by 12 feet is complete. This was required after the old "Mice Room" Shack was torn down.

The TSN water well is still marginal due to the dry season and we are forced to supplement the supply from the well in front of operations. The Airport Commandant has been queried as to the plan of action he is taking to supply the amount of water agreed upon.

Electronics

There has been a sigh of relief, that SVN easily met, and beat, the dates of completion for ATC Transponder installation. This was the project of AR 9053.

Two EA-PC6-34-2 and one EA-VTB-34-9 installation were completed for this month. This brought the project of AR 9053 to completion.

Technical Training

The following courses were completed during the month:

- Non-destructive Testing
- Basic Helicopter course
- Management Course (supervisor)

Courses now in progress:

- Management course
- 204B Helicopter flight mechanic
- Supply course

This month our training facilities increased by one small classroom. This room is now in use for small classes, meeting and FOT.

Supply

During this period, RSD/SGN held the first formal Supply Training Course ever conducted at a Regional Station. Due to work requirements the class was limited to six [redacted] Classes were organized and instructed by [redacted] from TNN with the help of STT/SGN. Because of the excellent results of the course a new class will start during May with again six more [redacted] students. Classes with the second course will be conducted by RSD Supervisors and Technical Training Instructors.

This was also a heavy month for Customs clearance, with his usual dispatch, and despite the daily increasingly stricter regulations, the Customs agent was able to clear the commercially shipped cargo again with minimum delays.

During the month, the Property and Inventory Unit completed cycle inventory of class 02H for a total of 505 line items. Also completed was property cycle inventory of A/C 1636 (E-Z) for a total of 542 line items. In addition to cycle inventory, 52 property transactions were made.

X. HOSTEL OCCUPANCY

From 25 March 1970 (Hostel COB) to the end of this month, nine Certificates of "non-availability of company furnished accommodations" were issued.

FLIGHT INFORMATION CENTER

- SAIGON -

- MONTHLY ACTIVITY REPORT -

1 - 30 April 1970

PART I

- Ground Fire Incidents -

Date	A/C No., Type & Contract	Place	Description
3 Apr.	N1305X 204-B 7001	VS 9854	A/c was on approach to helipad when PIC heard moderate small arms fire. No personnel injury or a/c damage involved.
3 Apr.	N1305X 204-B 7001	VS 9746	A/c was on approach to helipad when PIC heard automatic weapons fire - a goaround was made and cargo was dropped at another location. No personnel injury or a/c damage involved.
8 Apr.	N1307X 204-B 7001	AT 9928	A/c was enroute to VH576 when crew observed 6 to 8 tracer rounds pass a/c of the a/c. No personnel injury or a/c damage involved.
15 Apr	N8514F 204-B 7001	XU 7413	A/c was on takeoff when PIC heard one round of sniper fire pass near the a/c. A/c continued climbing and departed the area. No personnel injury or a/c damage involved.
17 Apr	N184L FC-6C 7001	XT 7689	A/c was on let down a quarter of a mile from approach end rwy 05 at HON QUAN (V133) when PIC and pax noted a slight bump. Capt MARKHAM landed safely and later proceeded to VO1 where a post flight inspection revealed that the a/c sustained one small caliber round which had entered the forward edge of the left horizontal stabilizer shattering the main spar exiting through the rear horizontal stabilizer. No personnel injury involved.
28 Apr	N130TK 204-B 7001	BT 310187	PIC heard one round of small arms fire while sling loading cargo to a drop zone. Flying below weather in mountainous terrain, Capt HEINL reports no damage involved, but believes the sling load may have been hit.

PART II

- Country Situation -

The enemy's first phase of the summer campaign got underway here on the first of April with a significant rise in enemy activity being reported throughout the country. Terrorists and rocket attacks were compounded by student and disabled veterans demonstrations in Hue, Saigon and My-Tho causing disruption in the National Assembly, the Palace, and several Embassies. In NW II Civilian Irregular Defense Camps at Dak-Seang and Dak-Pek sustained almost three weeks of concentrated enemy rocket and ground attacks. Nha-Trang reported 500,000 gallons of JP-4 and 3,000 gallons of diesel fuel were destroyed by rocket fire. Da-Nang received a total of twenty-five rockets during the month while Saigon received a total of 8 in two separate attacks on the city the first taking place on the 13th when a Vietnamese school was hit near the U.S. Embassy as was as a movie theater. One rocket landed on the number three tennis court of the Cercle Sportif Saigonnaise leaving a gaping six foot deep hole twelve to fifteen feet in diameter. This attack was followed by another three days later when a U.S. Special Services library sustained rocket damage while two other rockets landed in a residential area. Reports from the Delta of sea infiltration of personnel and supplies into the U-Ming Forest were substantiated by sightings of Sampans off the coast of the U-Ming unloading uniformed personnel and supplies.

Press reports from the Delta of ARVN incursions into Cambodia to assist the Lon Nol Government were followed by reports of Cambodian authorities indiscriminately executing Vietnamese Nationals in an effort to weed out the NVA who have infiltrated the Vietnamese community in Cambodia. This further exacerbated local unrest as Vietnamese students occupied the vacant Cambodian Embassy in Saigon to protest these actions. There is little likelihood of a let up in activity next month in view of reports of a second pahse of the summer campaign planned to coincide with Buddas' and Ho-Chi-Mings'.birthday on 19 May.

OPSP/SGN

"Attachment B"

GENERAL AFFAIRS

1. Following Airport Commandant and staff's visit of AAM, an Air Vietnam made up of:

Vice President [redacted] (the President [redacted]
[redacted] being hospitalised due to an automobile accident)
Technical Director [redacted]
Technical Training [redacted]
Assistant to the President [redacted]

made a similar tour of our installations after an informal lunch with company management at VNAF officers club.

During the tour, they were briefed on various departments' activities with particular emphasis on technical training. They saw the nine Vietnamese female aircraft mechanics at work in our metal shop and were very impressed.

Technical Director [redacted] expressed the desire of sending 2 or 3 technicians to attend our training courses for possible assignment as instructor after graduation.

2. The Directorate general of taxation has agreed in principle to reimburse taxes levied on meal and transportation allowances for Vietnamese employees for the period prior to 13 September 1969, the date on which exemption of these taxes were granted.

MONTHLY REPORT
NHA-TRANG
APRIL 1970

GENERAL

The month of April began with a bang and ended very quietly. Nha-Trang airbase was hit twice during the first week of April. The airport lost part of the fuel depot while one round impacted within two hundred feet of the SZ house killing one and wounding two Vietnamese.

Business however, slacked off a bit from last month which was the high month for 1970 so far.

TRAFFIC

Traffic activities remained normal throughout the month with a decrease in aircraft handeling and workload felt. Attached statistics relate the situation.

STATISTICS

PASSENGER	April	March	1969
Departing	3529	3627	3580
Arriving	3261	3372	3522
TOTAL	6890	6999	7100

CARGO

1. GROUND SERVICES (Lbs)

Departing	685,471	503,895	376,229
Arriving	159,376	266,492	234,530
TOTAL	844,847	770,387	610,759

2. COMPANY CARGO (Lbs)

Departing	4,736	19,388	17,337
Arriving	4,511	9,122	24,735
TOTAL	9,247	28,510	42,072

3. GRAND TOTAL (Lbs) (1+2)

Departing	690,207	523,283	393,566
Arriving	162,887	275,614	259,265
TOTAL	853,094	798,897	652,831

CUSTOMER RELATIONS

Relations with all customere remain good to excellent - No problems here.

OPERATIONS

A. Communications

The transmitter side of the UHF ground station repeater broke down and remaind out for the better part of the month. Parts and tubes were obtained and the unit is now operational.

We still receive interference and background noises on the HF and SSB receivers. Our next approach is to relocate the CORDS antennae.

B. FLIGHT FREQUENCY (See attached)

C. ARRIVAL AND DEPARTURE COMPARISON

	April	March	1969
Arrival	480	508	573
Departure	479	510	571
RON	193	207	324

D. DELAYS

Percentage on time	95%	97%	

SECURITY

No major problems. Two Guards are to be transferred to the Ground Services contract this next month.

PERSONNEL

A decrease of two TCN and one indigineous personnel came about through the transfer of two and the surplusing of one employee. A continued planned decrease can be expected next month - (See attached chart for totals)

Continued effort is being placed on reducing outstanding CTO, but we are reaching the point where it is difficult, and in some cases impossible, to release persons for CTO without incurring more. Nevertheless we plan to further reduce this company obligation.

FISCAL : No problems.

LEGAL : No problems.

MEMORANDUM

TO : BM/SGN

DATE: 04 April 1970

FROM : SZ/DAD

REF. No. SZDAD/70/037

SUBJECT : DANANG Station Monthly Report for March 1970

GENERAL

No significant incidents of hostile activity were reported during the month of March. However, in the early morning of 1 April, two 122mm rockets impacted on the Danang Air Base. No casualities were sustained as a result of these explosions. There has been a generalized increase in overall security measures in the Danang area and increased enemy activity has been forecast by several sources.

One Southern Air Transport flight was handled by the station on 2 March.

The local customs office has agreed to the deletion of the ground transportation and generalized compliance with instructions provisions of their overtime authorization form. This information has been communicated to GAM/SGN and it is anticipated that approval to sign the form will be received shortly.

The sale of commodities in bulk quantities (cases of soft drinks and milk) to [redacted] personnel by the snack-bar was discussed with the USAF Base Commander. It was agreed that this practice would be discontinued and such sales have now ceased. A moderate renovation on the snack bar was accomplished by the NCO club during the last three days of March.

CUSTOMER RELATIONS

The local CORDS Air Operations Officer has voiced some interest in attempting to gain approval to embark and disembark customer passengers at Danang on company international flights. Apparently these flights are utilized to a certain extent by I Corps based personnel on R&R and such an arrangement would eliminate the need for travelling to Saigon to board the aircraft. The matter has been referred to customer channels in Saigon for action.

LEGAL

Tentative plans have been formulated to renovate the present company hostel and to expand same to include the adjacent Station Manager's residence. Should this plan be implemented, SZ/DAD will have to relocate to other quarters. Preliminary investigations indicate that with the recent reduction in the value of the piastre, suitable accommodations would cost approximately 40,000$VN per month in rent.

FACILITIES

It is understood that the pro forma ARs for the Danang concrete Paving/Drainage Ditch Completion and Passenger Terminal Renovation projects have now been approved. Further action on these facilities improvements are presently pending approval of the required Forms F.

If funds are provided, a customer decision will be necessary to determine which of the two passenger terminal improvement projects under consideration will be selected. Renovation of the CSD warehouse is still pending a release of the building from the Embassy.

FISCAL

The Grand Hotel, Danang, has agreed to extend credit to the company when rooms are required for flight crew personnel. Previously, it was necessary to make cash payments in advance when insufficient space was available in the company hostel. Room vouchers will be issued by flight operations when required.

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures totaled: 34,530$VN

OPERATIONS

As anticipated, revenue flight time returned to normal in March as compared to the depression in February. After two passenger flight schedule changes by CORDS, a morning departure, direct Saigon, was re-established utilizing C46 equipment, which requires this aircraft to ROM daily. It is not utilized on Sundays, since an alternate flight schedule with a C47 out of Saigon is substituted that day of the week. Apparently the C46 load factors are being closely monitored by the AID customer to determine if daily C47 service might be sufficient.

The following is a breakdown of flight time generated by this station during March:

VN-70/AID	788+08
VN-70/Embassy	182+07
0069	7+31
0005	Nil
Total	977+46

Revenue losses for the month were as follows:

Weather	23+50
Maintenance	13+30
Customer Cancellation	2+10
Other	Nil
Total	39+30

The hostel occupancy factor was 84%. During the month a total of 7,400 piastres were disbursed to provide hotel accommodations for flight crew personnel. Non-availability certificates for a total of 41 nights were issued to TCS ground personnel.

COMMUNICATIONS

Minor interference problems continue to be experienced on HF, but overall radio communications were satisfactory.

Incoming and outgoing messages totaled 1634 and 1758 respectively.

TRAFFIC

Discussions with SRTM/SVN indicate that reasonable progress is being made towards the eventual procurement of a set of cargo weighing scales. The processing of the Danang AR was delayed somewhat to permit consolidation with the same requirement at Nha-Trang.

Passenger and cargo statistics for the month are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-70/AID	2,613	2,479	222,123	301,013
VN-70/Embassy	534	613	4,060	4,946
0069	-	6	-	-
0030	8	5	-	-
0005	-	-	-	-
AAM	71	110	13,706.4	41,567.1
TOTAL	3,226	3,213	239,889.4	347,526.1

SECURITY

Authorization was obtained from the VNAF security office to permit the scheduling of one GTD driver until 2100 hours daily. Previous to this approval it was necessary to have non-driver personnel operate company vehicles when transportation requirements generated past 1900 hours.

At least until the end of April, no problems with air base passes should be encountered. All ground personnel now have valid passes although some are only for temporary duration. To date, flight personnel have not been required to produce valid passes on entering the base.

PERSONNEL

Both CM/DAD and SOR/DAD returned from home leave in March.

Expected problems with the local immigration authorities did not materialize. No employee has reported being subjected to a residence check or being required to produce his passport for any reason. It is often difficult to determine whether or not various prerogatives of the local authorities will be exercised.

PM/SGN has advised that work permit applications for certain job titles are being closely scrutinized by the Ministry of Labor. Such a permit has already been disapproved for one Danang based TCN employee. It appears as though the Vietnamese Government is now making a concerted effort to require the replacement of non-technical TCN personnel with local nationals.

Since the closing of the "New Hostel" company provided accommodations have not been available to TCS ground personnel. Although not great in number, Scale B and Vietnamese personnel assigned TCS to Danang confirm that the present per diem rates are insufficient to meet living expenses on the economy.

The personnel breakdown for Danang Station at the close of business, 31 March 1970, was as follows:

[redacted]

Permanent	4	18	13	70
Pre-Process	0	0	0	1
Temporary	0	0	0	0
Daily Hire	0	0	0	0
TOTAL (105)	4	18	13	71

TECHNICAL SERVICES

RMD handled a total of 593 arriving and 591 departing flights, as compared to 539 and 542 respectively in February. Delays attributable to maintenance, which resulted in a revenue loss, totaled: 2. Five heavy (four number 1, and one number 2) services were performed on 204B aircraft. Five aircraft were placed on AGP status during the month, and two outstation recoveries were necessary. No engine changes were required but on VTB propeller was changed due to blade damage.

Maintenance services were requested by the pilots of two non-company aircraft. After coordination with SGN it was agreed to provide minor assistance if a CHR was signed. The Captain of a C.A.L. operated Tradewind aircraft refused this proposal, but a set of sparkplugs was changed on a RLAF C47 since the pilot in command had no such objection.

RCMD expended a total of 752 manhours of which 40 were utilized in the maintenance of leased properties. Significant projects included repainting the streetside of the Operations/Administration building and the construction of a "hump", with USAF provided PSP, at the road entrance to the aircraft parking ramp.

It has been reported that the U.S. Army will assume the operation of the present Naval Support Activity sometime in June or July. It is not known at this time if there will be any affect on the company supply account when this changeover is made.

COMMENTARY RAPS ACTIVITIES OF ROSS PEROT

Hanoi in Vietnamese to South Vietnam 0100 GMT 10 Apr 70 S

[Commentary: "Another Ridiculous U.S. Farce About the Aggressor Pilots' Problem"]

[Text] In the past few days, the Nixon administration again set up a new psychological warfare farce to stir public opinion about our army's and people's arrest and detention of U.S. aggressor pilots who committed crimes in North Vietnam. Recently American millionaire Ross Perot chartered three planes to transport nearly 100 newsmen, cameramen, photographers, and U.S. aggressor pilots' dependents to Saigon. First he craftily visited various centers where the U.S.-puppets have detained South Vietnamese patriots, then noisily stated to everyone that his act was fully humane. Next, Perot and his party went to our embassy in Vientiane and demanded that he be authorized to enter the north to visit the captured U.S. aggressor pilots.

Who is Perot? To our people, this news is not new or special. He is a Texas millionaire well-known for his talent in amassing fortunes. He now wants to gain political capital by cajoling Nixon. He is the president of a reactionary organization supporting Nixon's policy of prolonging the aggressive war in Vietnam. This organization is named "United, We Stand." Perot himself in December 1969 chartered two planes to transport foodstuffs, medicines, and letters to Vientiane where he demanded that our government authorize him to personally carry gifts to the U.S. aggressor pilots captured in North Vietnam. His act then was aimed at sabotaging our government regulations concerning the sending of gifts to the U.S. aggressor pilots.

Perot's new farce is only part of a fairly noisy new campaign being stirred by the Nixon administration about the captured U.S. aggressor pilots. At one of the recent sessions of the Paris conference, the U.S. representative repeatedly argued stupidly about the so-called problem of U.S. prisoners in North Vietnam. Rogers, Laird, and Nixon have also repeatedly raised their voices, feigning concern over the fate of the U.S. aggressor pilots detained in North Vietnam. All the arguments and tricks of the Nixon administration about this problem aim at achieving a dark goal to slander and distort the humanitarian policy of our government and people toward the U.S. aggressor pilots, while disorienting U.S. and world public opinion which is resolutely condemning the Nixon administration for seeking to prolong the aggressive war in Vietnam, brazenly escalating the aggressive war in Laos, and openly sabotaging Cambodian independence and neutrality.

Concerning the captured U.S. aggressor pilots, our government and people have many times clearly expressed their stand and attitude. They are air marauders who, on U.S. Government orders, bombed and strafed the DRV--an independent and sovereign country--and who were caught redhanded while perpetrating crimes. They are not entitled to enjoy the provisions on the treatment of POW's as stipulated in the 1949 Geneva convention, as the U.S. authorities have frequently clamored. They are only culprits who are under the jurisdiction of the current DRV law.

Approved for Release
Date MAR 1994

44

But basing itself on our regime's humanitarian policy, our government so far has treated them humanely and generously. They have been allowed to exchange letters with and receive gifts from their families. The wounded and sick have been cared for carefully. They have been allowed to celebrate holidays in accordance with their national customs. A number of them who have been released and returned to their families have thanked our government and people for their humanitarian treatment.

This time, after coming to South Vietnam and staging the trick of visiting the U.S.-puppet prisons, Perot lavishly praised the U.S. lackeys' fascist regime and shamelessly stated: "If I were to become a prisoner of war, I would like to be a prisoner of war in South Vietnam." These brazen words of a trader who is familiar with U.S. advertising methods cannot cover up the towering crimes of the U.S. aggressors and the Saigon puppets against our patriots who are detained in South Vietnamese prisons called hells on earth, such as Chi Hoa, Tan Hiep, Thu Duc, Con Dao, and so forth. Details of these crimes by the U.S.-puppets have been denounced by U.S. Representative Conyers in a report entitled "A Horrible Story Told With Sincere Words". This report, although incomplete, has bared the fascist and extremely cruel attitude of the U.S.-puppet (?clique) toward our incarcerated southern combatants and compatriots. It has so strongly moved U.S. public that the U.S. Congress had to publish it in its congressional records on 8 July 1969.

The fact that Perot and his group came to Vientiane and applied for permission to visit captured U.S. pilots in North Vietnam and give them gifts is only a trouble making plot. Our embassies in foreign countries have many times (?explained) our government's policy toward captured U.S. pilots to U.S. families who came to ask for news from their husbands and sons. Recently, Mrs (?David)--after being received by our embassy in Vientiane--admitted that she had been politely received. Perot himself was received by our embassy in Vientiane and clearly explained our government's policy and stand toward captured U.S. pilots. Yet he came to Vientiane again to create trouble for our embassy. It is crystal clear that Perot's action does not reflect his concern for the interests of the captured U.S. pilots and their families. In fact, it is aimed at materializing a psychological warfare scheme of the Nixon administration to excite public opinion and slander our government's humanitarian policy toward U.S. pilots. But such tricks will surely encounter ignominious defeat. As for Perot, he will draw no profit from this ridiculous trick, except (?the anger) of public opinion.

PAPER POINTS OUT FAILURE OF U.S. PACIFICATION PLAN

Hanoi VNA International Service in English 0557 GMT 10 Apr 70 B

[Text] Hanoi VNA April 10--The Hanoi daily QUAN DOI NHAN DAN (PEOPLE'S army) in a recent article reviewing the U.S. puppet "pacification" effort in the first three months of this year said that in spite of the huge amount of men, money and energy thrown into the project, the enemy has not moved any nearer to his goal while his "pacification" force continues to be depleted by the liberation forces and people.

(a)

"The stirring demonstrations and struggles against the coup d'etat group that have taken place in Cambodia since 18 March are the first manifestations of the mounting wave of anger of the Khmer people. The Khmer people, who possess righteousness and a tradition of solidarity and indomitable struggle and who have valiantly resisted imperialism during the past decades, are resolutely wresting back their fundamental national rights, namely, sovereignty, independence, and neutrality.

"Although confronted with temporary difficulties, the Khmer people will surely surmount all trials and will score ever greater victories."

PEROT'S ACTIONS DESIGNED TO MISLEAD PUBLIC OPINION

Hanoi in English to Southeast Asia 1000 GMT 10 Apr B

[Text] Ross Perot, a wealthy Texas businessman, put on the stage recently by the Nixon administration, [word indistinct] made a new campaign of slanders in Vientiane about the so-called problem of U.S. prisoners of war in North Vietnam. This [word indistinct] trick is but Nixon's effort to convince the public of the humanitarian policy of the United States and to whitewash the monstrous crimes perpetrated by the United States imperialists in their universally condemned war of aggression in Vietnam.

This is also aimed at distorting the humanitarian policy of the Democratic Republic of Vietnam Government and people regarding the American air pirates found guilty of massacring our people with bombs and (?shells) and caught redhanded. Perot's new move is also designed to mislead the world public opinion which is strongly condemning the Nixon administration for prolonging the war in Vietnam, piling up heinous crimes against the South Vietnamese people, escalating the war in Laos, and sabotaging the independence and neutrality of Cambodia.

The commentary says: The Democratic Republic of Vietnam Government and people have more than once clearly expounded their stand and attitude toward U.S. air pirates caught in North Vietnam. American pilots captured in North Vietnam are offenders caught redhanded in the act of (?serious) crimes against the Democratic Republic of Vietnam, an independent and soverign state. They are guilty in the eyes of the laws of the Democratic Republic of Vietnam and cannot claim protection under the Geneva convention of August 12 1949 on the treatment of prisoners of war.

However, captured American pilots are treated in accordance with the humanitarian policy of the Democratic Republic of Vietnam Government. They are allowed to exchange correspondence with their families. The sick and wounded are all given adequate and timely care and medical treatment. Many released U.S. air pirates have expressed their deep gratitude to the Democratic Republic of Vietnam Government for this humanitarian treatment.

Nixon and company want to (?incite) public opinion and put the blame for the distress of the families of the captured air pirates on the Vietnamese people. But progressive public opinion in the United States and the whole world has long seen that it is Johnson and his successor Nixon who have been sending hundreds of thousands of young Americans to kill and be killed in Vietnam, thus bringing sufferings and (?shame) to their families.

Approved for Release
Date MAR 1994

The American people, including many families of captured American pilots, have realized clearly that the fastest way to bring the detained American pilots home is to press the demand to immediately end the U.S. war of aggression in South Vietnam and withdraw all U.S. troops from there. There is no other alternative.

LE DUC THO INTERVIEWED BEFORE LEAVING PARIS FOR DRV

Hanoi VNA International Service in English 0546 GMT 12 Apr 70 B

[Text] Hanoi VNA April 12--Le Duc Tho, special advisor to the D.R.V.N. Government delegation to the Paris conference on Viet Nam, left the French capital for home last Friday, according to VNA's correspondent there.

Addressing pressmen at the airport Le Bourget Le Duc Tho condemned the U.S. for prolonging and expanding the war to the whole of Indochina in an attempt to make use of military pressure, to negotiate on a "position of strength", and cow the Vietnamese people.

After pointing out that the course of events last week was not what the U.S. had expected, Le Duc Tho said with their militant solidarity the peoples of Viet Nam, Laos and Cambodia would certainly obtain final victory and the U.S. defeat in Indochina was a foregone conclusion. He declared: "If the Nixon administration gives up its policy of aggression and its search for a 'position of strength' at the talks, we will be ready to settle peacefully with the U.S. the Viet Nam issue on the basis of the 10-point overall solution proposed by the South Viet Nam National Front for Liberation and the Provisional Revolutionary Government of the Republic of South Viet Nam. But, if the U.S. obdurately persists in expanding and prolonging the war, the Vietnamese people will fight through to the end for genuine independence and freedom."

Interviewed on the French Government's recent proposal on the settlement of the Indochinese problem, Le Duc Tho said that French Foreign Minister Schumann at a recent meeting with him had declared that the French Government was pursuing De Gaulle's policy regarding Indo-China. Le Duc Tho said he hoped M. Schumann's statement would be translated into deeds, and that only in that way could France contribute to the restoration of peace in the Indo-Chinese peninsula and meet the legitimate aspirations and basic interests of the peoples in this region, as well as the interests of France.

He said that the Lon Nol-Matak clique are extremely reactionary, that in service of the U.S., they are destroying Cambodia's independence and neutrality in opposition to the Khmer people and the Vietnamese people.

He said that should the French Government back the Lon Nol-Matak regime it would, far from contributing to the restoration of peace in Indo-China, harm the basic interests of the Indo-Chinese people, as well as both the immediate and long-term interests of France.

Seeing him off at the airport were Raymond Guyot, political bureau member of the Central Committee of the French Communist Party, and V. Zorin, Soviet ambassador, and Huang Chen, Chinese ambassador, to France.

MEMORANDUM

TO : AVP TPE

FROM : BMSGN

SUBJECT : Monthly Report

DATE: 14 April 1970

REF. No. BMSGN/70/129

Saigon Base Monthly Report for March 1970 is forwarded in three copies for your file.

E. J. Theisen

U

FORM 6970400

SAIGON BASE
MONTHLY REPORT
MARCH 1970

I. GENERAL

1. SGN Base was honored by the visit of PRES and AVP on 26 and 27 March, as well as a follow-on visit by VPFO and DFD on 28 and 29 March. All departments gained much from an on-the-spot exchange from these gentlemen.

2. Total block time for March 1970 was 5910 hours as compared with 5482 hours in February 1970. The trend including performance so far in April, appears to be coming up.

3. The security situation in Saigon and RVN continues to improve with sporadic exceptions - - almost as good as Chicago and Washington.

4. Received a letter of termination for C-47 43-48084 (GFA) effective 1 April 1970 with a Call Order for Caribou B-851 effective 1 April 1970.

Due to possible other priority requirements for B-851, the Customer cancelled the termination on C-47 084 pending further developments.

5. Pictures attached were candid shots by BMSGN in our Saigon Shops area. I am very proud of the local Technical Services effort of over nine months to screen and train those pictured from coolies to Aircraft Technicians. In line with U.S. Government policy, we shall continue with follow-on programs. Meanwhile, we have 25 [redacted] Aircraft Technicians undergoing one year of intensive training in Tainan. This is an epoch-making endeavor never done before [redacted] It also resulted in favorable press coverage previously reported.

6. The decision to close the Saigon hostel appears to be a wise one. We have issued only three Non-Availability Certificates from 25 March through 11 April 1970.

7. I cannot predict what will happen to our local economy as the trading rate goes up and buying-power of the piaster continues go down. It is now VN$450 to one U.S. Bollar. Sooner or later an adjustment in piaster pay scales might very well be in order.

8. There were NO MAJOR ACCIDENTS OR INCIDENTS in March to equal our February record. We have had one mishap since 1 January 1970 - a taxi accident. This is a vast improvement over our record last year when we experienced nine (9) accidents during the first three months.

II. CUSTOMER RELATIONS remain outstanding.

III. FACILITIES DEVELOPMENT
1. Forms "Fs" have been submitted for the Terminal Parking Apron, Renovation of MFD/SOM Bldg., Renovation of Various other Shops and Offices, and 204B Concrete Helicopter Pads for SGN. The customer has signed Form Fs for the improvement of the passenger lounge at Danang and also for Completion of Ramp Paving, and drainage ditch at Danang. MED SGN AR 69052 for an audiometric booth has been cancelled as the result of discussions with MFD and SMO. It was found that using existing facilities, failures of the audiometric test are extremely rare. If an individual should fail an audiometric test, he will be sent to the U.S. Air Force Clinic for further testing.

IV. GENERAL AFFAIRS
1. The company provided the Directorate of Civil Aviation with materials to reinforce the fences of its storage building for telecommunications equipment which has been the object of sporadic stealing recently.

2/ To build better relationship with the Government of Vietnam, a visit of AAM installations and Management by the Tan Son Nhut Airport Commandant and Staff was organized. Similar visit by other GVN agencies will be conducted in the near future.

3. Plan to improve company transient quarters up-country has been finalized and submitted to the Head Office for approval.

V. MEDICAL
Number of visits: 1341
Accidents: 51
Hospitalization: 7
Unhospitalization: 50
Outcalls: 1
Physical Examination: 34
Sick leaves: 235½

VI. PERSONNEL
1. After three long years, several meetings, countless revisions, the Gia Dinh Labor Service finally gave its seal of approval to our rules of Employment.

PM travelled to UTH to participate in the meeting called to discuss the terms of the agreement between the Company and the Far East Pilots Association.

2. Personnel Strength - Saigon Base

VII. TRAFFIC/AAM

1. During the month many difficulties with Immigration and Customs were encountered. Local officials desire to setup three control points within the Terminal for personal baggage check both outgoing and incoming, but the customer is strongly opposed.

2. Aircraft 912 arrived from HongKong with properly documented paperwork but with manifests showing only "Personal Effects" for some Customer HongKong purchases. The Customs people wanted to hold the aircraft and contents in bond until the individuals cleared the items.

One of the CORDS sponsored passengers on aircraft 084 failed to clear Immigration and caused some difficulty, which was cleared the next day.

	February	March
Passengers departure SGN (all contracts)	5,212	6,315
Passengers arrival SGN (All contracts)	5,958	6,997
Outbound cargo SGN	40,940	77,491
Inbound cargo SGN	39,849	127,260

TRAFFIC/USAID

Cargo (including AF Caribou A/C)

Outbound (lbs) SGN	1,209,056	1,466,790
Inbound (lbs) SGN	491,550	414,349

VIII. OPERATIONS

1. Pres/TPE and AVP/TPE visited Saigon Base. The President was impressed with the new window in FOD overlooking the ramp and he suggested a study be made on the feasibility of installing a mirror outside which would enable us to view the departures from the Traffic Terminal. In conjunction with this requirement a study of closed circuit TV installation is being made.

2. [redacted] presently engaged in Operations Dispatcher OJT is progressing well. We expect her check out in routine operations by 1 June 1970. She will be the first female Flight Dispatcher in the history of Saigon Base.

The 7001 customer added VTB N7695C to the contract effective 1 April 70.

There were 13 controllable and 53 non-controllable delays with a total of 905 Saigon departures. This averages out to be 98.6% on time departures.

3. Flight time report (see attachment A)
Ground Fire Incidents report (see attachment B)

4. Accident reports

Date	A/C Type/No.	Location	Remarks
02	VTB/N3674G	V-193	R.H. engine flamed out and started smoking while taxiing to ramp after landing - F/O noted flame in tail pipe. R.H. engine fire bottle was discharged. A thorough inspection of the engine was made by maintenance and was found to be satisfactory. The cause of the engine flame out was not determined. The presence of smoke and flame in the engine exhaust tail pipe was possibly due to the residue of fuel in the Plenum Chamber and the failure to motor engine immediately after flame out.
22	VTB/N3674G	SVN operation exact location unknown	During overnight service found L.H. engine impeller blades damaged from foreign object. Foreign object damage was not determined.
25	VTB/N6154U	SVN operation	On walk around after days flight, found R.H. engine first stage compressor blades have several deep nicks. Engine was satisfactory on previous overnight service. Foreign object damage source unknown. Continued emphasis on FOD is in progress.

5. Ground Transportation

Aggregate microbuses mileage	22661 km or 14163 miles
Microbuses down-time	216 hrs 06'
Microbuses pax carried	3188 pax
Isuzu Bus mileage	5792 km or 3620 miles
Isuzu bus down-time	31 hrs. 30'
Isuzu bus pax carried	10408 pax
Supply vehicle mileage	2147 km or 1341 miles
Supply vehicle down-time	45 hrs. 12'

6. Flying - The first half of the month was spent in anticipation of the Company/FEPA agreement and the last half in awe absorbing what was agreed upon. The FEPA agreement has been bolstered by the installation of transponders in the VTB aircraft. The transponders installation has done its share of raising morale. Our installation is running well ahead of schedule. Next item on the agenda to improve our lot - UHF.

MFDSVN with the BMSGN, PMSGN and MFASGN attended a meeting convened by the President at Udorn. This meeting attended by corresponding representatives from other bases, was to apprize all of the contents and interpretation of the FEPA agreement.

Our last operational 10-2 departed the station for Bangkok on 6 March. This leaves two 10-2s in storage for which there are no crews assigned. We have one Helio in storage for which we have no crews assigned or current.

IX. TECHNICAL SERVICES

1. March was very productive and passed without a major problem. Several facility projects were completed and closed out.

2. We are trying to improve ground safety and general housekeeping. Two of these areas are (1) Employees walking across the East ramp at shift change with aircraft taxiing in/out of the same ramp. (2) Vehicle controls for possibly permitting a few managers to park their private vehicles behind the RMD hangar.

3. Regarding CTO accumulation, progress is being made in every department of Technical Services. The same equal attention has been applied to Home Leave and Annual Vacations.

4. The new elevated TSN airport water tower is not living up to our expectations - by any means. It is unable to supply all the water requirements of the few Airline users. Water supply lines are being turned off during the lunch period and also from about 1900L to 0600L every day, and we have to pump from our 50,000 Gal. underground reservoir, which must obtain its resupply from that same TSN tower.

2. Aircraft Maintenance - The aircraft maintenance activity was on the increase during the month with the resultant increase in work load which was generated by the higher number of aircraft departures and arrivals, engine changes and No.4B services on PC-6C N394R.

Ten aircraft departure delays were charged to maintenance during the month which has sharply increased over the month of February. Some of the delays appear to be beyond control of maintenance personnel however the majority were not and could be avoided if everyone concerned did put more thorough effort into aircraft maintenance.

3. Rotary Wing - This month we have been quite busy flying over 1000 hours and performing ten number two services, two No.3A services, one No.3B service, two high time engine changes and two engine changes with hot end inspections to facilitate turn around time.

A new Flight Mechanic Training Course started on the 30th and eleven TCN's were transferred into R/W Section for OJT.

4. Shops - Overall Shop activities remained on an even par. The number 4 service on PC-6 N394R was accomplished without any major problems.

5. Planning/Engineering - The Planning and Production Control Section pre-planned, scheduled and processed, for aircraft of all types; 503 overnight services; 28 number one services; 18 number two services; 7 number three services; 2 number 4 services; 5 annual inspections; 18 engine changes (4 for 204B); 7 propeller changes; 72 EA's; 33 SI's; 5 EI's; 237 time controlled components change on 204B; two T53 engine hot section inspections; 1 main rotor hub change; 3 DRR's and 160 shop work orders.

6. General Maintenance - Several moves have been made this month to better utilize existing space and enable the demolition of two shacks that have been eyesores for years. Offices affected in the moves were SGM, Technical Training offices, SAT, Accounting and Supply Storage. The Time Shack and Supply Storage (Rice Room) near the Operations Bldg were demolished. MSAFE was moved back to the BM Office.

Installation of porcelaine insulators for the 200 ^{2}mm power cable between the Utilities Building and the RGHD Complex is in progress.

7. Electronics - This month 15 ATC Transponder installations: 7EA PC6-34-2, 5 EA-VTB-34-9, 1 EA-C45-34-3 and 2 EA-204-34-2 were completed.

The project of in-country teletype circuits is dormant pending receipt of customers willingness or acknowledgement of intent to furnish the required land liner and circuit pattis at and between SGN-DAD-NHA.

8. Technical Training - March had our Technical Training Department operating on a reduced schedule due to a shortage of two Instructors. However, no courses under instruction were dropped and the following courses were completed: Non-destructive Testing, Heat treating, Welding. Classes now in progress are: Management course, Helicopter Maintenance & Flight Mechanics course.

9. Quality Control - The month of March was about the same as the month of February. The work load has settled down on an even keel.

We had four Inspectors satisfactorily complete the four week Technical Training course on Non-destructive Inspection.

10. Stores Section - The closing of the hostel and tearing down of the C-Ration/rice room has placed a temporary burden on RSD as secured storage space needed for bulky items of this nature is becoming a scarcity.

11. Stock Control Section - During the month of March, Stock Control workload experienced a slight decrease as compared to previous months.

12. Customs - The Customs Agent continues to perform in an outstanding manner despite the never-ending petty and irritating problems which have to be faced daily. Thanks to his ability, fortitude and loyalty, he again managed to clear all commercially shipped Company cargo with celerity, thereby reducing any officially planned delays to a minimum.

13. Cycle Inventory - During the month of March, the Property and Inventory Unit completed cycle inventories of classes 01H and 01Q for a total of 738 line items. Also completed was property cycle inventory of A/C 1636 (A-D) for a total of 1242 line items. In addition to cycle inventories 173 property transactions were made.

E. J. Theisen
Base Manager - SGN

N H A - T R A N G

MAY 1970

GENERAL

Once again the month began with unfriendly activity the first week of the month with the balance of the month going by very quietly. On Sunday 3 May, we were "hit" twice. Once in the morning and once in the early afternoon. This is appearing to become a pattern.

Flying fairly well held it's own this month with a Revenue block time of 941 hours. We seem to be working between 925/975 hours per month.

TRAFFIC

Traffic activities remainded fairly constant with an increase in passengers offset by a decrease in cargo.

STATISTICS

PASSENGER		May	April	1969
Departing		3677	3529	4824
Arriving		3125	3261	4079
	TOTAL	6802	6690	8901

CARGO

1. GROUND SERVICES (Lbs)

Departing		423,882	665,471	298,339
Arriving		199,430	159,376	288,349

2. COMPANY CARGO (Lbs)

Departing		6,121	4,736	39,679
Arriving		8,845	4,511	40,246
	TOTAL	14,966	9,247	79,925

3. GRAND TOTAL (Lbs) (1+2)

Departing		430,003	690,207	328,018
Arriving		208,275	162,887	328,595
	TOTAL	638,278	853,094	656,613

CUSTOMER RELATIONS

This area remains quiet with little or no friction occuring this month. Mr. Don Mc Graw (A former AVN Traffic employee) will arrive in early June to replace Mr. Tom Lilly for a period of four months while Mr. Lilly is on Home Leave. This may or may not prove difficult. Hopefully, there should be no major problems.

OPERATIONS

Our remaining problem area is still radio communications. We improve little by little but it is a constant push against power outage and interference from other stations.

Two new teletype machines were installed in the Operations Office this month. This now gives us a LDC, back up on the weather units.

Flight operations remained smooth.

We moved into the new hostel on 3 May and continue to improve the facilities. There are start up problems, but another month should eliminate most complaints. Electric water heaters were obtained and installed along with lamps. Additional pillows, pillow cases, sheets and towels of high standard were obtained to better the service.

FLIGHT FREQUENCY (See attached)

ARRIVAL AND DEPARTURE COMPARISON

	May	April	1969
Arrival	499	480	570
Departure	497	479	573
ACN	195	193	331

DELAYS

Percentage on time	94.	95.

SECURITY

No problems.

PERSONNEL

Outstanding compensatory time off was reduced another 333 hours this month. An approximate 500 hours reduction is planned for June. This will bring the station level to about 800 hours of outstanding CTL. By August or September we should be in the clear.

The station personnel complement was further reduced by two TCN and two VN employees. In addition, two Security Guards we transferred to the Ground Services payroll.

FISCAL

No problems.

LEGAL

No problems.

SAIGON BASE
MONTHLY REPORT
MAY 1970

I. GENERAL

1. Total block time for May was 5802 hours as compared with 5880 in April and 5910 in March.

2. The security situation in the Saigon and Cholon area again experienced changes this month. The curfew limitations earlier imposed (some areas as early as 2200L in the evening) were relaxed on the 22nd to what may be regarded as the normal 0100L to 0530L, for most areas effecting Company personnel.

One claymore mine was reported to have exploded in a BOQ area near the Seven Day Adventist hospital on 13 May causing extensive damage and injuries to indigenous personnel, but no Company personnel effected.

Danang sub-base also reported three rockets impacted the airbase on 12 May which caused only minor skin damage to one aircraft, VTB N3674G. Demonstrations, reported last month, continued in the downtown area, on an irregular basis, which proved to be more harassment than anything else.

3. DHC-4 B-851 continued to be a subject of interest to VN-70 customer and liaison with DFC was maintained to determine the availability of the aircraft, for assignment to that contract. At month's end a final determination had not been reached but the customer remained patient for a decision, which eventually was to his interest.

4. Major Accident/Incident rate for this month remains nil. ADSAFE continues to participate in pilot meetings and reportedly has covered numerous "safety" subjects, it is quite possible we here have a case of, "an ounce of prevention is worth a pound of cure."

5. Danang hostel contract negotiations proved to be quite time consuming, requiring much coordination and discussions; however, an agreement was effective and plans for facilities improvement are beginning to materialize (More detailed information appears below).

II. CUSTOMER RELATIONS

Relations with Customers remain very good. Almost daily contacts have been made in the course of operations and there were no significant problems reported and no known questions unanswered.

III. FACILITIES DEVELOPMENT

Form F's were approved by the customers for: (1) Improvement of Passenger

Lounge (DAD) and (2) Completion of Concrete Paving and Drainage (DAD) and (3) Hostel and SZ Residence Renovation (DAD). AR Activities are reported as follows:

AR 2236 - Additional 200 KVA Transformer (SGN)

The SDL (City Power Company) installed twin 200 KVA Transformers late in the month. Project is considered complete. An AR Closure Notice has been forwarded.

AR 2163 - Emergency RGMD Water Supply (SGN)

This project is complete. An AR Closure Notice has been forwarded.

AR 2368 - Modification of SRSD and Material Control Offices (SGN)

This project is 60% complete. We are waiting delivery of materials from NSA, DAD.

AR 2377 - West Ramp Power and Air Compressor Lines (SGN)

We are waiting delivery of materials from NSA/DAD.

AR 2438 - Completion of Concrete Pavement and Drainage (DAD)

A contract has been signed with Le Tho, the Contractor. Construction is expected to commence on 15 June.

AR 2437 - Improvement on Passenger Lounge (DAD)

A proposal is being studied by various Contractors in DAD to supply only labor with the possibility of USAID supply most of the material. We expect to sign a contract within a week.

AR 2422 - Renovation of the Operations Bldg (SGN)

The Security Dept. has been moved from this building. The Accounting Dept. will be moved very shortly to as let the Contractor have access to the building. We expect to sign the contract on the 15th of the month.

AR 2421 - Relocation/Renovation of Various AAM Shops & Offices, SGN

This project will be complete this month with the exception of Federal Type steel partitions which may require a delay due to procurement.

AR 8320 - Danang Hostel & SZ Residence Renovation

Material procurement is underway. When material is on hand, a small team from Saigon will be sent to assist DAD in-house capabilities.

Project 6691 - Saigon Terminal Parking Apron

A Form F has been signed by the Customer to replace the asphalt directly in front of Traffic Terminal with concrete. An AR is being made up.

Project 6702 - 204B Touchdown Pads (SGN)

PFAR has been approved. A Form "F" has been submitted for Customer's consideration.

Project 6703 - Modification of Fire Brigade Station for Air Conditioning(SGN)

This project pending TPE approval

IV. GENERAL AFFAIRS (Unreported)

V. MEDICAL
Number of sick call: 1144
Accidents: 20
Hospitalized sick call: None
Unhospitalized accident: 20
Hospitalized accident: None
Outcalls: 5
Physical examination: 30
Sick leaves: 201½

VI. TRAFFIC/AAM
1. Utilization of the substituted S & S missions cleared a goodly portion of our backlog of Company cargo. With only four aircraft scheduled for Tainan this month we envision a building of backlog partidularly since no Taipei SAT ferries are known.

	April	May
Passengers departure SGN (all contracts)	5,606	5,414
Passengers arrival SGN (all contracts)	6,573	6,092
Outbound cargo SGN	61,215	81,608
Inbound cargo SGN	68,369	70,754

TRAFFIC/USAID

Cargo (incluxing Af Caribou A/C)

	April	May
Outbound (lbs) SGN	987,032	1,893,269
Inbound (lbs) SGN	425,494	364,518

VII. OPERATIONS
1. The 7001 customer released VTB N9838Z from contract effective 1 June 1970 and it was placed in temporary storage.

2. There were 17 controllable and 58 non-controllable delays with a total of 992 Saigon Departures.

3. Flight Time Report (See attachment A)
Ground Fire Incidents report (See attachment B)

4. Accident reports

Date	A/C Type/No.	Location	Remarks
04	VTB/N6154U	V-17	During overnight service FOD damage was noted to the No. 2 engine. Two first stage impeller blades sustained nicks. One blade approx. 1/16" deep and 1/8" in length at center of blade. The other blade nicked at lower leading edge - radius approx. 1/16". No excessive rubbing noted during rotation. Oil screen inspection results negative. FOD origin unknown. Continued emphasis on FOD is in progress.
17	204B/N1307X	Parked AAM chopper ramp DAD	During the night an unidentified vehicle struck the T/R blade resulting in one inch depth dent approx six inches in length. Tail rotor hub assembly and the other tail rotor blade was replaced for precautionary measures. Corrective action: SZ is checking the possibility of improved lighting in the helicopter parking area - Company employees were cautioned to exercise proper driving habits. Upon securing the helicopters the T/R blade will be aligned with the vertical (Dorsal) fin, this will eliminate some exposure of the tail rotor blade.
19	PC6C/N748N	SGN	While towing the aircraft the tow bar became disengaged from the tail gear. Tail section rolled into the tow tug resulting in minor damage to the RH elevator. Faulty tow bar and personnel error. Action: Tug driver given 3 days LWOP - Porter tow bars immediately inspected and design changes being made.

5. Ground Transportation

Aggregate microbusses mileage	22980 km or 14362 miles
Microbusses down-time	435 hrs 32'
Microbusses pax carried	3262 pax
Isuzu bus mileage	6183 km or 3864 miles
Isuzu bus down time	76 hrs 30'
Isuzu bus pax carried	10296 pax
Supply vehicle mileage	2795 km or 1746 miles
Supply vehicle downtime	97 hrs 18'

6. Flying

1. We experienced considerable wasted effort and lost time in attempting to get our flight crews deadhead space to Danang. The USAID/CORDS customer was refusing to provide any space on Sunday and forcing us to use the afternoon flights the rest of the week to move our deadheads. On 12 May the Acting Base Manager and MFD discussed the situation with the customer and as of this date it appears we have received satisfactory assistance and cooperation in this area.

Everyone was interested/involved/concerned regarding progress with the Danang hostel. Agreement on rent finally having been reached, we are looking forward to getting the place renovated so the crews can have adequate and comfortable quarters in which to stay during RONs. Along the same line, the renting of the hotel at Nhatrang has all the appearances of a very satisfactory solution to our quarters problems there. The situation at Cantho has also been greatly improved.

2. Approval was finally received to remodele the operations building which with the receipt of crew lockers should provide better security for flight gear and be a boost to morale when the new lounge and the toilet/shower room is completed.

Effort has been expended during the month. If we can ever get clear lines of agreement and understanding regarding all respects of the AAM-PEPA contract, a lot of effort and time will be available for other activities.

IX. HOSTEL OCCUPANCY
Only three Certificates of "non-availability of company furnished accommodations were issued during the month.

X. TECHNICAL SERVICES
1. Overall activities for all SVN Technical Services functions during May was on an approximate level with that of past recent months. The production workload varied little from the routine scheduled requirements.

2. Total flying, up slightly, affected the workload only from the stand point that there was increased utilization of heavier aircraft and decreased utilization of smaller aircraft.

3. The correction of accumulated overtime and vacation balances continued with success in those departments and stations where scheduled were established and followed.

The Labor Cost Accounting system is progressing and is expected to be placed into effect on 1 July 1970 as scheduled.

Aircraft Maintenance, fixed wing
Four power plants were changed during the month, two R-2800-75M3 due to metal contamination in oil system and two R-1830-92 due to high time. Other unscheduled work was five outstation recovery of aircraft due to maintenance problem. Twelve aircraft departure delays were charged to maintenance during the month.

Three Garrett power plants were changed, one on Volpar due to FOD, two on Porters, one due to low torque output and one for interim inspection.

Aircraft Maintenance, rotary wing
This month has been busy, flying approximately 1050 hours, performing 10 Nr. 2 services, two of these at V03, and four engine changes: two were high time and two were remained to facilitate turn around time with hot section inspections

Shops
Overall shop activities increased this month with the beggest work-load in the sheetmetal shop.

Three Porter aircraft sustained substantial metal damage at V17 due to hostile action.

Planning/Engineering
The Planning and Production Control Section pre-planned, scheduled and processed, for aircraft of all types; 534 overnight services; 21 number one services; 20 number two services; 6 number three services; 2 number four services; 7 annual inspections; 12 engine changes (4 for 204B); 2 propeller changes; 66 EA's; 31 SI's; 11 EI's; 215 time controlled components change on 204B; three TS3 engine hot section inspections; two main rotor hub changes; one main transmission change; 3 CRR's, and 12 DRR's; 292 shop work orders.

General Maintenance
The replacement of the deteriorated water pipe supplying the Traffic are is completed.

A prefab, antilever tug shed was errected west of the AAM Traffic Terminal to keep the Tugs and ramp crew out of the elements during the raining season.

Utilities Maintenance - Water is still being pumped from the dug well in front of the Operations building.

Communications Maintenance
Our major problem for the month was the overhauling of the SSB transmitter 90T150 from Danang and the tuning of the 95A receivers of V07 & V03 for 9818 kc reception.

With lesser man-hour involved was the retuning of the ATTITUDE transmitter and other 90T150 transmitters at V01.

Within the month of May, there were two re-installations of TH-20 done.

Within the month of May, no major trouble were encountered in the PABX system. There were so many trouble caused by defective mechanical operation of telephone set dials, and leakage of telephone lines.

Some class A telephones were re-classified down to class B due to difficulties encountered at the Army Airforce exchanged of class A telephone calls.

Technical Training
Training department had the following courses completed:

(1) Supply Course, (2) Supervisor Management Course, (3) Fire Fighting Course.

Courses in Progress: 204B Maintenance

Sixteen employees were tested for exceptance as trainees in the Line Service Mechanics Course. This course will start in June and will train [redacted] in line service work.

Supply
Stores Section - During the month of May the issuing activities was the same as last month. The new storage rack for wheels and casings was built up and put in use the early part of this month.

Stock Control Section - In May, Stock Control workload stayed at par with that of the previous month.

The Director of Planning, during his visit, suggested that the time controlled items reserved for certain aircraft be reported on the daily rotable transaction report (DRTR).

Procurement Section - The Supply Procurement Section experienced nearly the same amount of transactions as that of last month. A total of 219 line items of commodities were purchased from the local market this month. Total value of commodities purchased from Saigon/Cholon market amounted to VN$1.406.197,00. The Naval Support Activity in Danang will cease its operation on 14 June 1970 and only 40% of the present stock will be carried in lesser quantity by its successor, the Army Support Command. This section plans to switch most of the expected non available items from the Danang to the Hongkong market.

- MONTHLY ACTIVITY REPORT -

1 - 31 May 1970

PART I

- Ground Fire Incidents -

Date	A/C No., Type & Contract	Place	Description
05 May	N8514F 204B 7001	V-68	While en the approach crew observed one round impact on rwy. PIC aborted and observed two additional rounds impact on the fld as he was departing the area.
07 May	N1306X 204B 7002	YU 7035	While enroute to an LZ PIC observed a muzzle flash from a weapon aimed in the direction of the a/c. PIC continued on course and departed the area.
12 May	N285L PC-6C 7001	XS 4735 3/4 of a mile from west end rwy V-14	While en the approach to V-14 - Captain TERRY heard and observed automatic weapons fire directed at the aircraft. PIC continued approach and landed safely.
14 May	N1307X 204B 7001	At 9525 1/2 mile SW VH-576	While enroute to VH-576 carrying a sling load, a/c came under heavy automatic weapons attack. One round entered under right pilot's seat passed through cabin floor, grazed flt mech's helmet and exited right cabin door window. Flt mech received minor cuts of face, neck and right leg.
14 May	N1304X 204B 7001	XR 1394	A/c was on approach to LZ when crew heard and observed automatic weapons fire. A/c landed safely and departed to the west without further incident.
14 May	N1304X 204B 7001		A/c was approaching LZ when PIC heard two rounds of small arms fire. A/c landed and departed to the east without further incident.
14 May	B928 C-46 7001	Traffic Pattern V-el	PIC was preparing for when he observed three tracers pass approximately 200 yards off his left wing at a 90 degree angle to the ground. PIC continued on course and landed safely.

- To be con't on page 2 -

16 May	N393R PC-6C 7001	Ramp V-17	A/c sustained shrapnel damage during early morning mortar attack on Can-Tho airfield.
16 May	N9444 PC-6C 7002	Ramp V-17	A/c sustained shrapnel damage during an early morning mortar attack on Can-Tho airfield.
16 May	N153L PC-6C 7001	Ramp V-17	A/c sustained shrapnel damage during an early morning mortar attack on Can-Tho airfield.

PART II

- Situation Summary -

May first marked the beginning of what is proving to be one of the most successful operations of the war. The combined US-ARVN sweep of Cambodia border sancturies has uncovered a formidable and well publicized inventory of arms, munitions, and supplies. Two significant, but less publicized, intangibles have born out of this operation. Theusands of refugees of Vietnamese origin are being shelter and clothed here - a massive effort and one which should net, in time, ralliers to the GVN. Equally important and already very apparent here is the soaring morale of the ARVN. For the first time he is on the offensive outside his own borders and an air of confidence prevails throughout the ranks. GVN officials, both past and present, are being quoted daily in most optimistic terms.

Mortar and rocket attacks were recorded in all Corps areas this month as was a significant ground assult on the resort city of Dalat. Danang received four 140mm rockets on the 20th one of which impacted on the east-west taxiway and another near the terminal. The Air America ramp sustained shrapnel from this attack causing minor skin damage to a Velpar. Chu-Lai received a total of 81 122mm rockets in two successive night attacks wounding 44 US and causing damage to three A-4E aircraft, two CH-47 helicopters, two mess halls, one hanger, and destroying 100 barrels of diesel cleaning fuel. Nha-Trang came under a rocket attack on the 8th with negative casualties and Can-Tho, in the Delta, received eighteen 82mm mortars on the 16th causing 8 US wounded and shrapnel damage to three company Porter aircraft. Saigon received three 122mm rockets in the city on the 21th causing four wounded and undetermined damage to a residence. Terrorists incidents were down in Saigon which can be attributed in part to a two week period of enforced curfew hours due to student and disabled veterans demonstrations. Enemy activity culminated for the month with a ground assult on the city of Dalat involving attacks on the Vietnamese Military Academy (the Cadets accounted for four enemy KIA), two airfields, and a cadet training center. Several key positions were occupied in and around the city. St Mary's Girls Academy and a Catholic church were attacked and occupied by enemy forces. Sporadic contacts were being reported some 72 hours after the initial assult on the city.

MONTHLY REPORT
NHA-TRANG
MAY 1970

GENERAL

Once again the month began with unfriendly activity the first week of the month with the balance of the month going by very quietly. On Sunday 3 May, we were "hit" twice. Once in the morning and once in the early afternoon. This is appearing to become a pattern.

Flying fairly well held it's own this month with a Revenue block time of 941 hours. We seem to be working between 925/975 hours per month.

TRAFFIC

Traffic activities remainded fairly constant with an increase in passengers offset by a decrease in cargo.

STATISTICS

PASSENGER	May	April	1969
Departing	3677	3529	4824
Arriving	3125	3261	4079
TOTAL	6802	6890	8901

Arriving	8,845	4,511	40,246
TOTAL	14,966	9,247	79,925

3. GRAND TOTAL (Lbs) (1+2)

Departing	430,003	690,207	328,018
Arriving	208,275	162,887	328,595
TOTAL	638,278	853,094	656,613

CUSTOMER RELATIONS

This area remains quiet with little or no friction occuring this month. Mr. Don Mc Graw (A former ASM Traffic employee) will arrive in early June to replace Mr. Tom Lilly for a period of four months while Mr. Lilly is on Home Leave. This may or may not prove difficult. Hopefully, there should be no major problems.

. . . 2 . .

OPERATIONS

Our remaining problem area is still radio communications. We improve little by little but it is a constant push against power outage and interference from other stations.

Two new teletype machines were installed in the Operations Office this month. This now gives us a LDO: back up on the weather units.

Flight operations remained smooth.

We moved into the new hostel on 3 May and continue to improve the facilities. There are start up problems, but another month should eliminate most complaints. Electric water heaters were obtained and installed along with lamps. Additional pillows, pillow cases, sheets and towels of high standard were obtained to better the service.

FLIGHT FREQUENCY (See attached)

ARRIVAL AND DEPARTURE COMPARISON

	May	April	1969
Arrival	499	480	570
Departure	497	479	573
ACN	195	193	331

DELAYS

Percentage on time	94%	95%

SECURITY

No problems.

PERSONNEL

Outstanding compensatory time off was reduced another 333 hours this month. An approximate 500 hours reduction is planned for June. This will bring the station level to about 800 hours of outstanding CTO. By August or September we should be in the clear.

The station personnel complement was further reduced by two TCN and [redacted] In addition, two Security Guards we transferred to the Ground Services payroll.

FISCAL

No problems.

LEGAL

No problems.

MEMORANDUM

DATE: 12 May 1970

TO : AVP TPE

REF. No. BMSGN/70/168

FROM : BMSGN

SUBJECT : April Monthly Report

Saigon Base Monthly Report for April 1970 is forwarded in three copies for your file.

Original signed for BMSGN BY
L. G. HARRISON, SCHWISOW
E. J. Theisen

SAIGON BASE
MONTHLY REPORT
APRIL 1970

I. GENERAL

1. Total block time for April was 5880 hours as compared with 5910 in March and 5482 in February.

2. The security situation in Saigon remains calm with a few more incidents than occurred last month. On 30 April at 0555L a satchel charge exploded at a military billet within 80 yards of the BM House wounding several military personnel and breaking glass in houses across the street. Except for rattling the occupants, there was no damage to the BM house. There has, however, been an upsurge of demonstrations (three in the last two-one-half weeks) which keeps downtown Saigon at a standstill while they are going on. The last series of demonstrations were by students, veterans and militant monks over the war, land reform, and greater recognition. Like dissident demonstrators all over the world, they had nothing constructive to offer to society -- only criticism.

3. VPFCA advises Caribou B851 is still being considered for assignment to Saigon from Udorn. The VN-70 customer is still interested in this aircraft.

4. Our major Accident/Incident rate is fortunately still holding up with only one mishap since 1 January 1970 -- a taxi accident on 3 January.

II. CUSTOMER RELATIONS have never been better.

III. Facilities DEVELOPMENT

1. Form F's have been approved by customers on Renovation of Operations Building plus Relocation of various Shops and Offices. Approval has been received from Taipei to proceed on these projects. Form F's have also been submitted to the customer for :

a. Terminal Parking Apron - SGN
b. 204- Helicopter Pads - SGN
c. Improvement of Passenger Lounge - DAD
d. Completion of Ramp and Drainage - DAD

I expect no action on these pending availability of FY 71 funds to the Customers. I am confident all the above will ba approved except "c" and that "d" will be reduced in scope.

IV. GENERAL AFFAIRS
See attachment.

V. MEDICAL

Number of visits:	1191
Accidents:	92
Hospitalization:	2
Unhospitalization:	90
Outcalls:	4
Phys. examinations:	28
Sick leaves:	154

VI. PERSONNEL

1. Personnel department activities were routine in nature, the only exception being PM's Company business trip to TPE at mid-month. APM at month's end, departed for HKG, TPE, LAX and NYC for a period of about two months. He is expected to return in early July.

2. General information - The RVN Ministry of Labor is trying, albeit unconsciously, to aid and abet the Company's cost reduction program they have begun to disapprove Work Permit applications submitted on behalf of some of our TCN employees and have been requiring these employees to leave Vietnam. It is a little too soon to tell just how many Work Permits will be disapproved. However, we do not feel that the situation will become critical since we do have the right of appeal, through and with the support of the U.S. Embassy.

3. Personnel Strength - Saigon Base

VII. TRAFFIC/AAM

1. The general flow of passengers and cargo continued at a normal rate with little difficulty encountered in the day to day operation.

2. This office has accepted the administration of the AFDs during the absence of the MAPS and also is assisting the SAT arrivals and departures.

3. This is the occasional complaint of a passenger of items missing from their luggage when checked thru Air America. The majority of those losses reported are jewels, money and other hi-value items left in open or unlocked baggage which no doubt is a strong temptation to personnel with a limited income. We had our Security pull a spot check of the laborers lockers but did not uncover any customer items. The possibility remains that item was either not placed in the baggage or that it was removed by someone other than airline personnel.

	March	April
Passengers departure SGN (all contracts)	6,315	5,606
" arrival SGN "	6,997	6,573
Outbound cargo SGN	77,491	61,215

TRAFFIC/USAID

Cargo (including AF Caribou A/C)

	March	April
Outbound (lbs) SGN	1,466,790	987,032
Inbound (lbs) SGN	414,349	425,494

VIII. OPERATIONS

1. C-47 revenue flying time was approximately 172 hours less than the previous month. The customer gives no indication that we can expect an increase in C-47 time.

2. There were 21 controllable and 27 non-controllable delays with a total of 891 Saigon departures. This averages out to be 97.0% on time departures.

FIC and the Emergency Section remain in good order.

3. Flight time report (see attachment A)
Ground Fire Incidents report (see attachment B)

4. Accident reports

Date	A/C Type/No.	Location	Remarks
04	C-46/N67984	Danang	Minor scratch across the bottom left aileron (approx 17" x 3/4" very light) noted during walk around at Danang prior to flight. Investigation revealed that the scratch resulted possibly as the result of a refueling truck attempted to drive under the outboard wing area. Continued emphasis on safe driving of vehicles in the vicinity of aircraft is being emphasized.
20	VTB/N91295	V-17, SVN	1/16" bend in one of first stage compressor blades found during preflight No. 2 engine. Cause: small piece of engine inlet duct, at leading edge, broke off and contacted speed check blade. After a thorough inspection aircraft was released for flight. SI issued for inspection on Engine Air Inlet Duct for cracks.
24	VTB/N91295	Cantho	During inspection damage was noted to the No.2 eng. seven each first stage compressor blades. Investigation revealed that a small part of the speed probe had separated and caused the damage to the first stage impeller. Two dents and heavy scratches on the remaining portion of the sensor indicated damage first caused by an unknown hard object possibly while operating in up-country fields.

5. Ground transportation

Aggregate microbusses mileage	24642 km or 15401 miles
Microbusses downtime	288 hrs 30'
Microbusses pax carried	3264 pax
Isuzu bus mileage	6291 km or 3931 miles
Isuzu bus down-time	33 hrs 48'
Isuzu bus pax carried	10394 pax
Supply vehicle mileage	2817 km or 1760 miles
Supply vehicle down-time	11 hrs

6. Flying

1. Another month accident free A great precedent and a good one, is being set. All will agree it is most gratifying to enjoy such a position.

2. MFD/SVN spent three days at Vientiane in Air Drop orientation. How qualified he became is a matter of conjecture, he got a "SHACK" one day and a "PANEL" the next. Overall the training received was most beneficial.

3. In general the morale of the pilots is very high. Few complaints are in evidence on the hostel at Danang and the Quarters at Cantho. The hostel at DAD is in the process of planning for renovation. The Customer at Cantho is to be approached regarding the facilities there.

IX. TECHNICAL SERVICES

1. The installation of Transponders in our SVN aircraft was completed this month to give us the satisfaction of beating the schedule by several weeks.

2. The flow time on the Porter aircraft 4B Services has leveled off at eight days. The first one turned out in January 1970 was scheduled at ten days. Further improvement will probably come at a slower rate, depending upon the application of experience and the development of methods and procedures.

3. Facilities improvements and development are reduced to a low level. Work is continuing on several projects, such as improvement of the water and power systems, and providing employee recreational facilities, etc; however, most activities are confined to reshuffling and maintaining that which we already have on hand.

4. MTS/SVN Boyd Messecher departs 1st May on Home Leave for four months.

AIRCRAFT MAINTENANCE

Fixed Wing
The work load has slightly decreased during the month of April.

On turbo-prop aircraft several isolated cases of engine and airframe components malfunctioning were encountered. Several engines were changed due to oil leak at the front and rear carbon seals, low oil pressure, internal malfunction of torque system, low power output and one engine was changed due to FOD.

The first phase of training on the Management-Development Course has been completed by the group of twenty persons comprising Leadmen, Crew Chiefs and Supervisors. The second and the last phase will begin during the next month. A very favourable response has been shown by those attending the classes.

Rotary Wing
The month of April was quite busy, flying over 1050 hours and performing eight number 2 services, 1 number 3A service, 2 number 3B service, [redacted] Inspections and 1 high time engine change.

Preplanning to cover the DAD heavy services with the present limited number of qualified Supervisors becomes quite a problem when flight schedules cannot be spaced to spread out the work load, as consistantly happens. The heavy vacation/home leave requirements contribute to that coverage problem.

Shops
Overall Shop activities remained on an even par. The USFAA Inspection Authorization (IA) activities were at a normal pace. The following aircraft underwent Annual Inspections and were recertificated: 204B N1305X, PC-6 N180K and C-46 N67984.

Planning/Engineering
DPLNG Mr. Burkett visited with us for 4 days in the last part of April. His visit was very beneficial to us.

General Maintenance
The deteriorated water pipe supplying the Personnel/Traffic Area is being replaced.

The installation of larger power cables between GMD and the Main Transformer Building is complete with the exception of Terminal lugs.

The extension of the revetment wall adjacent to the Operations Bldg by 12 feet is complete. This was required afterthe old "Mice Room" Shack was torn down.

The TSN water well is still marginal due to the dry season and we are forced to supplement the supply from the well in front of operations. The Airport Commandant has been queried as to the plan of action he is taking to supply the amount of water agreed upon.

Electronics
There has been a sigh of relief, that SVN easily met, and beat, the dates of completion for ATC Transponder installation. This was the project of AR 9053.

Two EA-PC6-34-2 and one EA-VTB-34-9 installation were completed for this month. This brought the project of AR 9053 to completion.

Technical Training
The following courses were completed during the month:

- Non-destructive Testing
- Basic Helicopter course
- Management Course (supervisor)

Courses now in progress:

- Management course
- 204B Helicopter flight mechanic
- Supply course

This month our training facilities increased by one small classroom. This room is now in use for small classes, meeting and FOT.

Supply
During this period, RSD/SGN held the first formal Supply Training Course ever conducted at a Regional Station. Due to work requirements the class was limited to six [redacted] employees. Classes were organized and instructed by [redacted] from IMN with the help of STT/SGN. Because of the excellent results of the [redacted] course a new class will start during May with again six more [redacted] employees students. Classes with the second course will be conducted by RSD Supervisors and Technical Training Instructors.

This was also a heavy month for Customs clearance, with his usual dispatch, and despite the daily increasingly stricter regulations, the Customs agent was able to clear the commercially shipped cargo again with minimum delays.

During the month, the Property and Inventory Unit completed cycle inventory of class 02H for a total of 505 line items. Also completed was property cycle inventory of A/C 1636 (P-Z) for a total of 542 line items. In addition to cycle inventory, 52 property transactions were made.

X. HOSTEL OCCUPANCY

From 25 March 1970 (Hostel COB) to the end of this month, nine Certificates of "non-availability of company furnished accommodations" were issued.

GENERAL AFFAIRS

1. Following Airport Commandant and staff's visit of AAM, an Air Vietnam made up of:

[redacted]

made a similar tour of our installations after an informal lunch with company management at VNAF officers club.

During the tour, they were briefed on various departments' activities with particular emphasis on technical training. They saw the nine [redacted] aircraft mechanics at work in our metal shop and were very impressed.

[redacted] expressed the desire of sending 2 or 3 technicians to attend our training courses for possible assignment as instructor after graduation.

2. The Directorate general of taxation has agreed in principle to reimburse taxes levied on meal and transportation allowances for [redacted] employees for the period prior to 13 September 1969, the date on which exemption of these taxes were granted.

THAI COMMUNIST INSURGENTS INCREASE ACTIVITY

Communist guerrilla operations, which have been moderate so far this dry season, are on the increase. The major threat remains in the remote north and north-central provinces, where a force of some 1,600 insurgents continues to erode the government's positions along the Lao border. The security situation is especially bad in portions of Nan and Chiang Rai provinces, where guerrillas have harassed several army outposts, forcing the evacuation of at least one.

Bangkok has sought to ease guerrilla pressure by the heavy use of air and artillery strikes. An army sweep operation last month into an insurgent stronghold near the Lao border in eastern Nan Province met with disastrous results, however. The guerrillas shot down two government helicopters besides managing to overrun several government base camps and inflicting a number of casualties on Thai regulars. The operation was sparked by a growing number of reports that the insurgents were trying to seize and administer whole villages in this region.

The security situation is more favorable in the northeast, where the Communists are still on the defensive. The enemy's much-heralded dry-season offensive has not materialized, a development that may further undermine the wavering morale of many rank-and-file guerrillas, as well as the appeal of the insurgency to villagers. Guerrilla incidents involving the assassination of informants and ambushes of local security teams remain endemic to the northeast region, however.

Communist guerrillas in the mid-South region have sharply increased their activity in recent months, particularly in the province of Phatthalung. The government's counterinsurgency apparatus has not made any meaningful effort to deal with the marked deterioration of security in this area. As a result, police are reluctant to wear uniforms; travel to outlying villages by provincial and district officials is reported to be at a standstill; and local officials appear uncertain about how to cope with increased guerrilla terrorism.

The counterinsurgency picture is considerably brighter in the southern reaches of the peninsula, where activity by the Malayan Communist Terrorist Organization has been at a fairly low level. In recent weeks joint ground and air operations by Bangkok and Kuala Lumpur have uprooted several insurgent base camps along the Malaysian border, one of which was believed to have been the headquarters of the terrorists 12th "regiment." COMMUNIST CHINA TAKES OVER TANZANIAN MILITARY PROGRAM

Peking now is virtually the sole provider of military aid and training to Tanzania, following the departure of Soviet and Canadian advisers early this year. A small group of East German advisers in Zanzibar, however, still shares naval training activities with the Chinese.

With the elimination of Soviet and Canadian advisers, work has begun on several long-term projects. A naval base is being constructed, with Chinese assistance, near Dar es Salaam. The base is part of a $10-million naval development program toward which the Chinese are providing assistance of some $4 million agreed to in late 1968. In early 1970, over 100 Tanzanians went to China for a long-postponed, one- to two-year naval engineering and technology course. Peking has also started work on an air defense "system" that reportedly will include the construction of an air base, the training of pilots, and the provision of an undetermined number of aircraft. An unknown number of Chinese military construction experts arrived in the early part of the year, reportedly to begin work on the military airfield.

Chinese military assistance to Dar es Salaam dates back to September 1964, when a small contingent of advisers was sent to familiarize the army with the new Chinese small arms that had been delivered under the first contract signed in February of that year. Since that time, agreements totaling over $12 million have been signed for military hardware including small arms, antiaircraft guns, medium tanks, patrol boats and landing craft, and an assortment of other military-related equipment. Part of the attraction of Chinese military aid is Peking's willingness to supply equipment free of charge, or, at most, on liberal credit terms. ~~(SECRET NO FOREIGN DISSEM)~~

SAIGON BASE
MONTHLY REPORT
JUNE 1970

I. GENERAL

1. Total block time for June was was 5588 hours as compared with 5825 hours in May and 5811 hours in April 1970.

2. The security condition in Saigon remains "stable". There were several student demonstrations to establish peace in Vietnam plus several other obscure issues of government controls and school administration. They did not reach the violent proportions of those routinely experienced in the USA. The veterans manifested dissent by constructing market stalls on public property along several boulevards in downtown Saigon which degraded the environment and disrupted the orderly conduct of business and traffic in these areas. The veterans were complaining about the lack of veterans benefits. After several days of strong persuasion by the police, the veterans agreed to dismantle their stalls. At the moment, all is calm in Saigon.

3. Labor conditions: Because of the cutback in labor strength at Thu Duc due to the take-over by RVN from USAID of extensive warehousing facilities, there was a threat of a General Sympathy Strike with employees of Esso, Caltex, Shell and several lesser companies participating. The general strike, due to government controls and lower wages never "got off the ground". It is gratifying to note that AAM employees never considered the possibility of participation.

4. BM Saigon returned from 35 days annual leave in the Z.I. to find that SOM Parrish had done an excellent job of filling in as Acting BM during his absence. Meanwhile our management-level manning is sagging due to accrued leave which must be liquidated. Boyd Mesecher (RTS) is on four months leave (1 May through 31 August). SZ DAD Cambre is on four months leave (11 July through 17 October 1970). MF/RW Hitchman will be on leave 20 July through 30 Sept. PM, Frank Nihill is on leave 13 July through 8 August. ADSAFE George Keller will be on leave 20 July through 8 Sept. Al Harris (Assistant to SOM Parrish) is on leave 25 June through 30 July. Other absences on leave of lower levels of supervision result in very thin management manning in SVN, however, the "second team" seems to be carrying the load quite well.

5. Air Cambodia is operating in and out of Saigon carrying well-dressed "refugees" on a non-scheduled basis four to six days a week.

With the exception of a few intransit passengers to Singapore, the outbound passenger manifest is almost negative.

6. We have performed a number 2 service and major clean-up of VTB M3728G in anticipation of transfer to UTH. Meanwhile it is being kept in service under VN-70 Contract. After transfer, 28G will be replaced on VN-70 Contract by VTB M98382 now in temporary storage.

7. It is apparent we are about to "overrun" AR #8320 for the Danang hostel by approximately US$1700.00 due to the discontinuance of NSA supply support and per diem costs for TCS personnel from CMD SGN to perform the work. This was an oversight on our part. In any event an existing AR #2255 to upgrade SZ DAD quarters, which will now become part of the hostel facilities, was with held from further work due change in programming and is more than adequate to provide funding for the total Danang hostel project which includes the existing hostel plus SZ quarters which are being converted to additional hostel facilities under the cited Appropriation Requests.

8. As of 8 July 1970, Continental Air Services has operated the following fleet in SVN :

C-47	8
DO-28	2
Skyvan	1
Beech Baron	6
H-18 Super Beech	1
Total	18

II. CUSTOMER RELATIONS

Have reached an all time high. There are no known areas of misunderstanding or question involving AAM Operations.

III. FACILITIES DEVELOPMENT

In the area of facilities development it appears there is very little left to be accomplished to achieve a completely efficient configuration:

(1) AR 2438 - Concrete Drainage Ditch and Concrete Pavement DAD. This project is 60% complete and progressing on schedule.

(2) AR 2422 - Renovation of Operations Building Saigon. Contract has been signed. Work should commence in late July.

(3) AR 2449 - Saigon Terminal Parking Apron. Out for bid. Expect to get this project moving soon.

(4) Project 6702 - 204B touchdown Pads SGN. Form F has been submitted for Customer consideration. We will continue to exert pressure on this project but at the moment it does not look very hopeful.

IV. GENERAL AFFAIRS (Unreported)

V. FISCAL

Saigon Base Accounting was moved into new offices located on the second floor of the MHD Maintenance building south side of Hangar #1.

The station allowance increase for American [redacted] employees was reflected on the June payslips and was retroactive from April 1, 1970. The adjustment for [redacted] personnel are being made now and will be reflected in next month's report.

The station allowance increase for American and TCN personnel has tended to tone down the hard feelings of ground personnel, but the general opinion is that ground personnel should receive other benefits the pilots received. Such other benefits being increased weight allowance for personnel effects, better insurance coverage and family relocation per diem.

VI. MEDICAL

Number of sick call: 1269
Accidents: 30
Hospitalized sick call : 1 died
Unhospitalized accident: 30
Hospitalized accident: None
Outcalls: 3
Physical examination : 34
Sick leaves: 211

VII. PERSONNEL

Apart from routine activities, [redacted] spent a week in Taiwan escorting three RVN Government Officials (from the Ministries of Labor and Education) on a tour of Company facilities. The Officials came away extremely impressed with the facilities and our training programs, and this public relations effort should aid us considerably in future dealings with the government (especially with respect to securing Work Permits for our TCNs).

Our Vietnamese employees declined to participate in either of the month's general strikes, the second of which ultimately involved over 100,000 workers. This non-participation is a fine tribute indeed to our management - employee relations at all levels.

The piastre is being traded on the open market at approximately VN$ 370 to US$1.

HOSTEL OCCUPANCY

During the month of June, only three Certificates of "non-availability of company furnished accommodations" were issued.

VIII. TECHNICAL SERVICES

1. Overall activities in SVN Stations were lower than that of recent months. The reduced activity was a fairly direct reflection of the 4.7 percent drop in overall flying.

The rainy season has brought its usual problems of productive time losses, interruptions of communications and aircraft ignition systems breakdown. Power interruptions have been less than in previous years.

Preparations for the implementation of the new Skilled Labor Cost Accounting System required a lot of attention and training time by all employees; particularly Supervisory.

Facilities improvements at SGN included the completion of the Accounting offices and movement of the accounting personnel to the RMD Shops Building. The completion of a walkway from the hangar to the terminal has contributed the safety of personnel by reducing pedestrian traffic on the aircraft ramp. Concreting of the Danang terminal/hangar area is well underway. This project, as well as the Danang Hostel renovation has required considerable time and attention from GMD

2. Aircfaft Maintenance - Fixed Wing
As a result of a decrease in total number of aircraft departures and arrivals, the general activity declined. Routine maintenance comprised the major portion of the workload.

3. Rotary Wing - June workload was average until the last week; one number two service was performed at VO3, eight at VO1, one number three A at VO1, two engine hot section inspections, and three engine changes.

Flying time for the month was down somewhat to about 980 as compared with the previous three month of 1050.

4. Shops - The overall workload for the early part of June was routine but turned heavy toward the last part due to a PC-6 and a helicopter No. 4 service.

The Shops Equipment Shop has placed increased effort in reworking and marking VTB seats on a fleet basis.

5. Planning - S/PLNG has made a tour to VCA, DAD and NHA this month giving training classes to the Technical Services personnel. Training classes for RAD and RGMD personnel in SGN Base were held at the same time by S/TT, SGN

6. General Maintenance - AR 2421, relocation of offices is well along. AR 2422, renovation of the Operations building, the contract was signed with A&M Enterprise. AR 2438, Concrete Paving in DaNang was started this month. AR 8320, Renovation of the Hostel in DaNang begun on 24

June, this is being accomplished by in-house labor.

7. Building and Grounds Maintenance: The grass plots in front of the Cafeteria were reworked and seeded with grass seeds obtained from HongKong. However the seeds were received with zero germination.

8. Communications Maintenance - We were more concerned during the month with the cables for teletypes and telephones which gave us more delays on traffic than the equipment to which they are connected.

Teletype circuits and Maintenance: Most of the troubles were due to bad cables. If there is a heavy down pour in one day, the following day TTY circuits are all in bad shape including telephone trunk lines. It takes two, three or four days before the circuits are restored to normal. The Creed TTY circuit on the sending side was out twelve days because of defective lines. Cable trouble is also true with CCR-CAT TTY circuits this time of the year.

Transmitters' Maintenance: We encountered trouble with our daytime 34-A HF transmitter. The 30-volt rectox rectifiers developed leakage which brought down the 30-volt control voltage to only 20 volts.

9. Technical Training - Courses completed: Supervisor management, 204B maintenance. The SGN-line Service Mechanic course has been delayed due to the poor response of the Vietnamese to Air America's "Help wanted ads".

Shipping/Receiving activities experienced a slightly decrease.

Procurement section experienced a little smaller number of transactions than May. A total of 210 line items of commodities were purchased from the local market this month. Total value of commodities purchased from Saigon/Cholon market amounted to VN$658,204.00.

Since the Naval Support Activity (NSA) in DAD has been deactivated on 14 June 70, Procurement switched its sources to HKG and local vendors for certain items. This entailed a somewhat slower procedure and more careful approach to bying. The sometimes wide range of qualities, prices and local problems have significantly added to the workload, when compared to the relatively simpler NSA operation. Negotiations to open an account with the U.S. Army Vietnam are still being carried on.

10. Customs. Surface vessel shipments are becoming more complicated as the customs requirements for documentation has been increased. On re-exportations, the temporary import documents must be furnished. This requirement can be easily filled on large equipment or vehicles.

X. OPERATIONS

1. Flight Time Report (See attachment A)
2. Ground Fire Incidents Report (See attachment B)
3. Accident reports

Date	A/C Type/No.	Location	Remarks
09	VTB/N6154U	V-11, SVN	During operation at V-11 number 3 blade sustained a nick approximately 1 inch deep, believed from a piece of small rock.
13	204B/N1304X	V-69,SVN	During post flight inspection noted a 1/2" hole in the leading edge of the tail rotor blade. The result of hostile action.

4. Flying Safety

No accidents or incidents since 2 January 1970.

5. Ground Transportation

Aggregate microbusses mileage	25071 km
Microbusses down-time	335 hrs 32'
Microbusses passengers carried	3234 pax
Isuzu bus mileage	6009 km
Isuzu bus down time	55 hrs 54'
Isuzu bus pax carried	10290 pax
Supply vehicle mileage	2946 km
Supply vehicle down-time	22 hrs 50'

6. Flying

Our time and most of our efforts were primarily concerned with DHC4/b851 and pilot requirements for same, Captains Broussard, Parker and McCauley and the over-temp of VTB N7770B.

Caribou B-851 arrived and was put to work by the customer shortly after it arrived. Because of the "B" registry there has been some difficulty in setting up proper crew manning in the program. The problem appears to be resolved on a temporary basis by cross training pilots. Presumably the Bid System will provide a final solution. Meanwhile the pilots in this program are "maxing" the time limit.

Investigation, coordination, termination and the hearings concerning Broussard and Parker definitely took a disproportionate amount of the month's time. The biggest single problem in this and similar cases is the involvement of FEPA and the AAM Agreement. Since FEPA benefits from the continuous services of a trained attorney, the odds are somewhat stacked in their favor when MFD is forced to present the prosecution side of a case without professional or trained legal help.

MFD visited Danang facilities. The most notable finding was the water which is taken from the well on the premises is grossly contaminated.

The Nhatrang quarters seem to be in good shape except the lack of air conditioners which are definite necessities for our crews to get adequate

rest while on RON. A steady stream of complaints has been produced by this one shortage.

Crews lockers are now available in Saigon and are being issued.

And another month accident free.

MONTHLY ACTIVITY REPORT

01-30 JUNE 1970

PART I

- Ground Fire Incidents -

Date	A/C No., Type & Contract	Place	Description
02 Jun	B912 C-46 7001	XS 8899	Capt. STALLMAN was on final at Tan-Son-Nhut when he heard one round pass near the starboard side of the a/c. Both pilot and co-pilot believed the a/c had sustained a hit, but no trace of the round or hole could be located. PIC continued his approach and landed safely. No personnel injury or a/c damage involved.
12 Jun	B829 C-47 7001	XS 3727	A/c was at 1000 ft altitude (just below overcast) when pilot heard one round of groundfire. Pilot immediately ascended into overcast and shortly thereafter another shot was heard. No personnel injury or a/c damage involved.
12 Jun	N1303X 204-B 7001	ZC 1551	While a/c was loading paxs at chopper pad, one round of 82mm mortar fire impacted approximately 30 yards from a/c. A/c immediately took off and returned to V206. No personnel injury or a/c damage involved.
13 Jun	N91295 VTB 7002	AQ 868020	Capt. SHINE was on the approach to Ban-Me-Thuot East when one small caliber round of groundfire hit the right tire of the a/c. The tire did not deflate and Capt. SHINE landed safely. A/c returned to Nha-Trang where the tire was replaced.

PART II

- Country Situation -

Air America's activity reports for South Vietnam are indicative of the low level of activity reported throughout the country this month. Danang, Bien Hoa, and Binh Thuy airfields received light indirect fire attacks sustaining minor damage. Saigon's activity was confined to two reported terrorists incidents and a continuation of student demonstrations. Allied operations in Cambodia diverted VC/NVA attention towards reestablishment of a seriously impaired logistic network outside of RVN. ARVN may soon have the opportunity to demonstrate the valuable experience and confidence gained in Cambodia in meeting an enemy "High Point" expected here earlier but delayed by Allied successes in Cambodia.

JUNE 1970

CAPITAL

June remained a quiet month with only routine problems. The first part of the month brought light hostile activity, but the balance of the month was peaceful.

Fueling increased slightly during this reporting period with a total of 968 + 28 Block Time generated at this station.

TRAFFIC

Traffic activities decreased slightly from previous months on both Passenger service and Cound service. No critical problems were encountered during June. This station is still awaiting the arrival of a cargo scale for the Cords Warehouse.

CUSTOMER RELATIONS

During the short period of time the undersigned has been on-station, it appears that the relationship with all customers is excellent. No problems in this area have arisen during this reporting period.

. . . 2

OPERATIONS

Weather was a minor problem during June. Early morning ground fog and low ceilings in the interior caused a number of flights to be aborted.

A/SZ attended a meeting with Military officals on 30 June. The meeting was called to discuss the proposed resurfacing of runway 12-30 at Nha Trang.

If and when this project is undertaken, the primary runway will be closed approximately thirty to forty days. Resurfacing will begin as soon as a decision is made as to which way it is to be done.

At present they are debating the possibility of opening the secondary runway (05-23) to fixed-wing aircraft. This will be decided after a survey team from 7th Air Force files it's report.

If, for safety reasons, they are unable to open runway C5-23, the Nha Trang airbase will be closed to fixed-wing operations while 4200 feet of runway 12-30 is resurfaced.

The entire project is now in a state of suspended animation while these decisions are being made.

Results of the resurfacing and the problems encountered will be reflected in subsequent reports.

A. COMMUNICATIONS

We are still plaqued with problems with the Motorola remote UHF/VHF equipment. It was off the air for three days during June and back-up VHF had to be utilized. It appears to the undersigned that there are still some bugs in the installation that must be ironed out.

HF communication remains normal with occasional interference caused by the Usaid radio.

MEMORANDUM

TO : BM/SGN

DATE: 08 June 1970

FROM : SZ/DAD

REF. No. SZDAD/70/055

SUBJECT : DANANG Station Monthly Report for May 1970

GENERAL

Significant hostile activity was limited to one incident on the evening of 20 May. Four 140mm rockets impacted due west of the company ramp between the taxiway and runway 35R. Although several pounds of shrapnel were found scattered around the ramp, only one aircraft was hit. This damage was minor, consisting of a small skin puncture in the upper fuselage.

Four Southern Air Transport flights were handled during the month. All were apparently substitute service flights for the World Airways Stars and Stripes schedule. The first of these aircraft arrived shortly before midnight due to the necessity of pre-positioning crews, but the remainder created no problems since they arrived between 10:00 and 12:00 hours in the morning.

CUSTOMER RELATIONS

An arrangement has been made thru local CORDS channels to billet flight crews in their transient quarters when the company hostel is full. Since this situation usually arises when an additional aircraft RONs at Danang for CORDS, no reimbursement type difficulties were encountered.

LEGAL

The lease was renewed on the Old Hostel but complex problems developed regarding additional renewal options on the property. The landlord advised that he was no longer interested in granting any further options except at an exorbitant rent. He first demanded 800,000 piastres per year for the options, but finally came down to 600,000 piastres if paid two years in advance. To protect the company's planned renovation expenditures on this building, these terms were found agreeable.

FACILITIES

Hostel renovation plans have been finalized, and actual construction should commence in June. Significant improvements include the construction of interior walls to provide a total of thirteen seperate bed rooms (including four in the adjacent SZ residence), additional airconditioning, and the installation of more shower and lavatory facilities.

Forms F were signed on two long outstanding station facilities improvements. Funding was provided for the completion of the entire area paving and drainage ditch and passenger terminal renovation projects. The next problem will be that of reaching an agreement with the local contractors to perform the work

on the basis of bids submitted one year, and six months ago, respectively. Since no long term agreement could be reached on the utilization of the CSD shipping and receiving warehouse for an improved passenger terminal area, the original concept will now be implemented.

FISCAL

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures totaled: 37,940$VN.

OPERATIONS

Revenue flight time increased 38+37 hours as compared to the previous month. Scheduled Sunday flying has been further reduced by rescheduling a province, all day PC-6 requirement, to Saturday. Unless special requirements generate, the earliest Sunday departure is 10:00 hours and the latest arrival is 14:00 hours. All department personnel schedules have been revised to provide only one shift coverage on Sundays which permits fewer individual days off during the week.

The following is a breakdown of flight time generated by this station during May:

VN-70/AID	740+13
VN-70/Embassy	174+52
0069	6+26
Total	921+31

Revenue losses for the month were as follows:

Weather	1+40
Maintenance	Nil
Customer Cancellations..	10+30
Other	1+30
Total	13+40

The hostel occupancy factor was 90.13%. During the month, 780 piastres were disbursed to provide hotel accommodations for flight crew personnel. Non-availability certificates for a total of 35 nights were issued to TCS ground personnel.

COMMUNICATIONS

Saigon reception of Danang HF signals was only marginal during the month. Additional frequencies were installed, but the problem still remained. The remote VHF/UHF unit [redacted] performed without major difficulty.

Incoming and outgoing messages totaled 1492 and 1665 respectively.

TRAFFIC

Overall Traffic workload remained fairly constant. Close supervision of transiting international flights has precluded any further problems with local customs officials. It was necessary to bump 1200 pounds of cargo from one international flight due to additional fuel requirements and this cargo was reloaded on a subsequent flight without any delay from customs.

Passenger and cargo statistictics for the month of May are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-7001/AID	2,783	2,631	235,986	319,085
VN-7002/EMB	364	695	1,430	5,660
0069	5	4	-	-
0030	19	25	-	-
AAM	97	110	8,087.7	16,224.2
Total	3,268	3,465	245,503.7	340,969.2

SECURITY

Several TCN air base passes expired during the month. It has been necessary to resort to obtaining temporary indorsements on Travel Orders to preclude problems with these personnel entering and departing the base. Renewed extension of stay receipts have been requested from Saigon so that permanent passes can be processed, but these have not been received as yet.

PERSONNEL

An updated listing extending the validity of residence permits for all TCN personnel until July was received from PM/SGN. No significant problems with local immigrations officials are anticipated until this list expires.

The personnel breakdown for Danang Station at the close of business, 31 May 1970, was as follows:

	[redacted]			
Permanent	3	17	13	68
Pre-Process	0	0	0	2
Temporary	0	0	0	0
Daily-Hire	0	0	0	0
TOTAL (103)	3	17	13	70

TECHNICAL SERVICES

RMD handled a total 590 arriving and 590 departing flights, as compared to 550 in each category in April. There were no delays which resulted in a revenue loss chargeable to maintenance. Number 1 services were performed on one PC-6 aircraft and five 204B aircraft, and two number 2 services on 204B aircraft were accomplished. One aircraft was placed on AOP status.

CM/DAD departed for an extended TCS assignment on 07 May. His duties were assumed by Crew Chief J. V. Rejante.

RCMD expended a total of 720 manhours of which 36 were utilized at the Old Hostel. Significant projects included painting the exterior of the Operations/Administration building and airconditioner maintenance.

The company account with the Danang Naval Support Activity will be terminated on 30 June. A similar account with the superceding Army Support Command will require an Inter-Service Support Agreement (ISSA). This agreement is being negotiated directly by Saigon since it is issued by USARV, Long-Binh. If the ISSA is obtained, it should be possible for RSD/SGN to open an account locally with the Army and thus eliminate the need for procuring the items carried thru Danang.

TO : AVP TPE

FROM : A/EMSGN

SUBJECT : May Monthly Report

Saigon Base Monthly Report for May 1970 is forwarded in three copies for your file.

L.G. Parrish

SAIGON BASE
MONTHLY REPORT
MAY 1970

I. GENERAL

1. Total block time for May was 5802 hours as compared with 5880 in April and 5910 in March.

2. The security situation in the Saigon and Cholon area again experienced changes this month. The curfew limitations earlier imposed (some areas as early as 2200L in the evening) were relaxed on the 22nd to what may be regarded as the normal 0100L to 0530L, for most areas effecting Company personnel.

One claymore mine was reported to have exploded in a BOQ area near the Seven Day Adventist hospital on 13 May causing extensive damage and injuries to indigenous personnel, but no Company personnel effected.

Danang sub-base also reported three rockets impacted the airbase on 12 May which caused only minor skin damage to one aircraft, VTB N3674G. Demonstrations, reported last month, continued in the downtown area, on an irregular basis, which proved to be more harassment than anything else.

3. DHC-4 B-851 continued to be a subject of interest to VN-70 customer and liaison with DFC was maintained to determine the availability of the aircraft, for assignment to that contract. At month's end a final determination had not been reached but the customer remained patient for a decision, which eventually was to his interest.

4. Major Accident/Incident rate for this month remains nil. ADSAFE continues to participate in pilot meetings and reportedly has covered numerous "safety" subjects, it is quite possible we here have a case of, "an ounce of prevention is worth a pound of cure."

5. Danang hostel contract negotiations proved to be quite time consuming, requiring much coordination and discussions; however, an agreement was effective and plans for facilities improvement are beginning to materialize (More detailed information appears below).

II. CUSTOMER RELATIONS

Relations with Customers remain very good. Almost daily contacts have been made in the course of operations and there were no significant problems reported and no known questions unanswered.

III. FACILITIES DEVELOPMENT

Form P's were approved by the customers for: (1) Improvement of Passenger

Lounge (DAD) and (2) Completion of Concrete Paving and Drainage (DAD) and (3) Hostel and SZ Residence Renovation (DAD). AR Activities are reported as follows:

AR 2236 - Additional 200 KVA Transformer (SGN)

The SDL (City Power Company) installed twin 200 KVA Transformers late in the month. Project is considered complete. An AR Closure Notice has been forwarded.

AR 2163 - Emergency RGMD Water Supply (SGN)

This project is complete. An AR Closure Notice has been forwarded.

AR 2368 - Modification of SASD and Material Control Offices (SGN)

This project is 60% complete. We are waiting delivery of materials from NSA, DAD.

AR 2377 - West Ramp Power and Air Compressor Lines (SGN)

We are waiting delivery of materials from NSA/DAD.

AR 2438 - Completion of Concrete Pavement and Drainage (DAD)

A contract has been signed with Le Tho, the Contractor. Construction is expected to commence on 15 June.

AR 2437 - Improvement on Passenger Lounge (DAD)

A proposal is being studied by various Contractors in DAD to supply only labor with the possibility of USAID supply most of the material. We expect to sign a contract within a week.

AR 2422 - Renovation of the Operations Bldg (SGN)

The Security Dept. has been moved from this building. The Accounting Dept. will be moved very shortly to as let the Contractor have access to the building. We expect to sign the contract on the 15th of the month.

AR 2421 - Relocation/Renovation of Various AAM Shops & Offices, SGN

This project will be complete this month with the exception of Federal Type steel partitions which may require a delay due to procurement.

AR 8320 - Danang Hostel & SZ Residence Renovation

Material procurement is underway. When material is on hand, a small team from Saigon will be sent to assist DAD in-house capabilities.

Project 6691 - Saigon Terminal Parking Apron

A Form F has been signed by the Customer to replace the asphalt directly in front of Traffic Terminal with concrete. An AR is being made up.

Project 6702 - 204B Touchdown Pads (SGN)

PFAR has been approved. A Form "F" has been submitted for Customer's consideration.

Project 6703 - Modification of Fire Brigade Station for Air Conditioning(SGN)

This project pending TPE approval

IV. GENERAL AFFAIRS (Unreported)

V. MEDICAL
Number of sick call: 1144
Accidents: 20
Hospitalized sick call: None
Unhospitalized accident: 20
Hospitalized accident: None
Outcalls: 5
Physical examination: 30
Sick leaves: 201½

VI. TRAFFIC/AAM
1. Utilization of the substituted S & S missions cleared a goodly portion of our backlog of Company cargo. With only four aircraft scheduled for Tainan this month we envision a building of backlog partidularly since no Taipei SAT ferries are known.

	April	May
Passengers departure SGN (all contracts)	5,606	5,414
Passengers arrival SGN (all contracts)	6,573	6,092
Outbound cargo SGN	61,215	81,608
Inbound cargo SGN	68,369	70,754

TRAFFIC/USAID

Cargo (including Af Caribou A/C)

	April	May
Outbound (lbs) SGN	987,032	1,893,269
Inbound (lbs) SGN	425,494	364,518

VII. OPERATIONS
1. The 7001 customer released VTB N9838Z from contract effective 1 June 1970 and it was placed in temporary storage.

2. There were 17 controllable and 58 non-controllable delays with a total of 992 Saigon Departures.

3. Flight Time Report (See attachment A)
Ground Fire Incidents report (See attachment B)

4. Accident reports

Date	A/C Type/No.	Location	Remarks
04	VTB/N6154U	V-17	During overnight service FOD damage was noted to the No. 2 engine. Two first stage impeller blades sustained nicks. One blade approx. 1/16" deep and 1/8" in length at center of blade. The other blade nicked at lower leading edge - radius approx. 1/16". No excessive rubbing noted during rotation. Oil screen inspection results negative. FOD origin unknown. Continued emphasis on FOD is in progress.
17	204B/N1307X	Parked AAM chopper ramp DAD	During the night an unidentified vehicle struck the T/R blade resulting in one inch depth dent approx six inches in length. Tail rotor hub assembly and the other tail rotor blade was replaced for precautionary measures. Corrective action: SZ is checking the possibility of improved lighting in the helicopter parking area - Company employees were cautioned to exercise proper driving habits. Upon securing the helicopters the T/R blade will be aligned with the vertical (Dorsal) fin, this will eliminate some exposure of the tail rotor blade.
19	PC6C/N748N	SGN	While towing the aircraft the tow bar became disengaged from the tail gear. Tail section rolled into the tow tug resulting in minor damage to the RH elevator. Faulty tow bar and personnel error. Action: Tug driver given 3 days LWOP - Porter tow bars immediately inspected and design changes being made.

5. Ground Transportation

Aggregate microbusses mileage	22980 km or 14362 miles
Microbusses down-time	435 hrs 32'
Microbusses pax carried	3262 pax
Isuzu bus mileage	6183 km or 3864 miles
Isuzu bus down time	76 hrs 30'
Isuzu bus pax carried	10296 pax
Supply vehicle mileage	2795 km or 1746 miles
Supply vehicle downtime	97 hrs 18'

6. Flying

1. We experienced considerable wasted effort and lost time in attempting to get our flight crews deadhead space to Danang. The USAID/CORDS customer was refusing to provide any space on Sunday and forcing us to use the afternoon flights the rest of the week to move our deadheads. On 12 May the Acting Base Manager and MFD discussed the situation with the customer and as of this date it appears we have received satisfactory assistance and cooperation in this area.

Everyone was interested/involved/concerned regarding progress with the Danang hostel. Agreement on rent finally having been reached, we are looking forward to getting the place renovated so the crews can have adequate and comfortable quarters in which to stay during RONs. Along the same line, the renting of the hotel at Nhatrang has all the appearances of a very satisfactory solution to our quarters problems there. The situation at Cantho has also been greatly improved.

2. Approval was finally received to remodele the Operations building which with the receipt of crew lockers should provide better security for flight gear and be a boost to morale when the new lounge and the toilet/shower room is completed.

Effort has been expended during the month. If we can ever get clear lines of agreement and understanding regarding all respects of the AAM-PEPA contract, a lot of effort and time will be available for other activities.

IX. HOSTEL OCCUPANCY

Only three Certificates of "non-availability of company furnished accommodations were issued during the month.

X. TECHNICAL SERVICES

1. Overall activities for all SVN Technical Services functions during May was on an approximate level with that of past recent months. The production workload varied little from the routine scheduled requirements.

2. Total flying, up slightly, affected the workload only from the stand point that there was increased utilization of heavier aircraft and decreased utilization of smaller aircraft.

3. The correction of accumulated overtime and vacation balances continued with success in those departments and stations where scheduled were established and followed.

The Labor Cost Accounting system is progressing and is expected to be placed into effect on 1 July 1970 as scheduled.

Aircraft Maintenance, fixed wing
Four power plants were changed during the month, two R-2800-75M3 due to metal contamination in oil system and two R-1830-92 due to high time. Other unscheduled work was five outstation recovery of aircraft due to maintenance problem. Twelve aircraft departure delays were charged to maintenance during the month.

Three Garrett power plants were changed, one on Volpar due to FOD, two on Porters, one due to low torque output and one for interim inspection.

Aircraft Maintenance, rotary wing
This month has been busy, flying approximately 1050 hours, performing 10 Nr. 2 services, two of these at V03, and four engine changes: two were high time and two were remained to facilitate turn around time with hot section inspections

Shops
Overall shop activities increased this month with the beggest work-load in the sheetmetal shop.

Three Porter aircraft sustained substantial metal damage at V17 due to hostile action.

Planning/Engineering
The Planning and Production Control Section pre-planned, scheduled and processed, for aircraft of all types; 534 overnight services; 21 number one services; 20 number two services; 6 number three services; 2 number four services; 7 annual inspections; 12 engine changes (4 for 204B); 2 propeller changes; 66 EA's; 31 SI's; 11 EI's; 215 time controlled components change on 204B; three TS3 engine hot section inspections; two main rotor hub changes; one main transmission change; 3 CRR's, and 12 BRR's; 292 shop work orders.

General Maintenance
The replacement of the deteriorated water pipe supplying the Traffic are is completed.

A prefab, antilever tug shed was errected west of the AAM Traffic Terminal to keep the Tugs and ramp crew out of the elements during the raining season.

Utilities Maintenance - Water is still being pumped from the dug well in front of the Operations building.

Communications Maintenance
Our major problem for the month was the overhauling of the 55B transmitter 90T150 from Danang and the tuning of the 95A receivers of VO7 & VO3 for 9818 kc reception.

With lesser man-hour involved was the retuning of the ATTITUDE transmitter and other 90T150 transmitters at VO1.

Within the month of May, there were two re-installations of TH-20 done.

Within the month of May, no major trouble were encountered in the PABX system. There were so many trouble caused by defective mechanical operation of telephone set dials, and leakage of telephone lines.

Some class A telephones were re-classified down to class B due to difficulties encountered at the Army Airforce exchanged of class A telephone calls.

Technical Training
Training department had the following courses completed:

(1) Supply Course, (2) Supervisor Management Course, (3) Fire Fighting Course.

Courses in Progress: 204B Maintenance

Sixteen employees were tested for exceptance as trainees in the Line Service Mechanics Course. This course will start in June and will train [redacted] in line service work.

Supply
Stores Section - During the month of May the issuing activities was the same as last month. The new storage rack for wheels and casings was built up and put in use the early part of this month.

Stock Control Section - In May, Stock Control workload stayed at par with that of the previous month.

The Director of Planning, during his visit, suggested that the time controlled items reserved for certain aircraft be reported on the daily rotable transaction report (DRTR).

Procurement Section - The Supply Procurement Section experienced nearly the same amount of transactions as that of last month. A total of 219 line items of commodities were purchased from the local market this month. Total value of commodities purchased from Saigon/Cholon market amounted to VN$1.406.197,00. The Naval Support Activity in Danang will cease its operation on 14 June 1970 and only 40% of the present stock will be carried in lesser quantity by its successor, the Army Support Command. This section plans to switch most of the expected non available items from the Danang to the Hongkong market.

MEMORANDUM

TO : BM/SGN

DATE: 03 July 1970

FROM : SZ/DAD

REF. No. SZDAD/70/064

SUBJECT : DANANG Station Monthly Report for June 1970

GENERAL

An unconfirmed number of rockets impacted in the downtown area of the city of Danang during the early morning of 20 June. Several Vietnamese fatalities were reported but no injuries were sustained by company personnel. Hostile activity directed at the air base was of a minor nature.

Three Southern Air Transport flights transited Danang during the month. All were substitute service Stars & Stripes missions. No problems were encountered in their handling since no night arrivals were involved.

The NCO Club operated terminal snack bar was closed down on the evening of 19 June. The Secretary/Custodian of the club advised that repeated Public Health Sanitation discrepancies were the primary cause for this action, but various complaints by other agencies and patrons were a strong contributory factor. There is a possibility that either CORDS or the Vietnam Regional Exchange may be interested in setting up a beverage/cold sandwich type of service in the area vacated by the NCO Club.

CUSTOMER RELATIONS

The arrangement with CORDS to billet excess flight crew personnel in their transient quarters is working out very well. To date no request for rooms has been refused. In fact, two rooms have been reserved for a one week period so that the hostel renovation can be expeditiously completed with a minimum of inconvenience. As construction proceeds through the hostel, those occupants involved can be temporarily transferred to CORDS billets.

LEGAL

The agent for the landlord of the SZ residence received and acknowledged the renewal notice for an additional one year lease on this property. A substantial increase in rent was requested due to the rising cost of living. However, since under the present terms and conditions of the lease contract, the company is under no obligation to pay additional rent, it is anticipated that payment will be made as presently stipulated.

FACILITIES

The contractor for the Area Paving and Drainage Ditch Completion project commenced work on 16 June. By the end of the month 216 cubic yards of ready mix concrete were poured, which constitutes over half the area to be paved. Ready mix concrete was purchased rather than bagged cement due to non-availability of the latter commodity. The estimated completion date for this project is 15 August.

FACILITIES (Cont'd)

The Hostel Renovation project is underway and should be completed by 10 July. The installation of some air conditioners and commodes may be delayed since the source of these items is Hong-Kong. Fortunately, most of the basic materials required were obtainable from the Naval Support Activity just prior to its closing down operations. A higher capacity watt hour meter will be installed to handle the additional electrical loads.

The Passenger Terminal Renovation project is being frustrated by a lack of materials and insufficient funding. The AR and Form F for this project were predicated on a contractor bid submitted in September 1969. This contractor has advised that as a result of local inflation, the bid is no longer valid and the cost would now be approximately fifty per cent higher. Very few of the materials needed for this project were obtainable from NSA so that expected cost savings from this source of procurement were not realized. Unless CORDS is able to supply materials at no cost, the project will probably be only completed on a scale far reduced from that originally contemplated. Another possibility is that this project will be revised to concentrate on the space vacated by the NCO Club Snack-Bar. A smaller facility would result, but by utilizing existing structures, the cost would be significantly reduced.

FISCAL

With the closing down of the Snack-Bar, the station's primary source of electrical power is in jeopardy. The main justification for the 100 KVA USAF furnished, maintained and operated generator was to supply power for the Snack-Bar. Although USAF Power Production allows that Air America may retain the generator until a critical requirement for it elsewhere developes, it is still subject to being removed at any time. 100% operation on commercial power would result in monthly costs approaching $1500.00. In addition, a source of back up power would also be required.

Per diem expenses for the station increased greatly during June as a result of the Hostel Renovation team being assigned TCS from Saigon and additional TCS replacements required to replace personnel on emergency and annual leave.

[redacted] payroll for the month totaled: [redacted]

Petty cash expenditures totaled: 55,060$VN

OPERATIONS

Revenue flight time increased 70+19 hours as compared to the previous month. Most of this increase is attributable to additional C-46 RONs

required by CORDS to shuttle cargo between Danang and Cantho. Reduced flying on Sundays continues but personnel scheduling is somewhat frustrated by last minute customer requirements for early departures or late arrivals not originally envisaged as a problem.

The following is a breakdown of flight time generated by this station during June:

VN-70/AID - - - - - - - -	789+44
VN-70/Embassy - - - - -	202+06
Total - - - - - - - - - -	991+50

Revenue losses for the month were as follows:

Weather - - - - - - - -	1+00
Maintenance - - - - - -	12+30

Total - - - - - - - - - -	14+00

The hostel occupancy factor was 96.5%. During the month, 13,280 piastres were disbursed to provide hotel accommodations for flight crew personnel. Non-availability certificates for a total of 121 nights were issued to TCS ground personnel.

COMMUNICATIONS

Moderate reception problems were encountered from the UHF relay of the Monkey Mountain remote VHF system. It was necessary on several occasions to transmit position reports over HF. Overall HF operation was somewhat improved over last month.

Incoming and outgoing messages totaled 1466 and 1658 respectively.

TRAFFIC

Passenger and cargo statistics for the month of June are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-7001/AID	2,753	2,641	239,158	251,270
VN-7002/EMB	397	665	800	7,922
0069	0	0	0	0
0030	18	21	0	0
0005	0	0	0	0
AAM	89	103	9,771	28,887.6
TOTAL	3,257	3,430	249,729	288,079.6

SECURITY

The VNAF Security Office continues to validate company travel orders for a limited duration in lieu of requiring the processing of temporary air base passes. What was originally an arrangement to facilitate the entry and departure to and from the base for TCS flight mechanics is now being utilized for all TCS personnel and eight permanently assigned employees. Five of the latter personnel still require an extension of stay receipt before application can be made for a permanent pass.

PERSONNEL

The undersigned will depart on Home Leave on 10 July. SOR/DAD, Mr. D.P. Grace,will be assigned as Acting Station Manager in the interim.

The personnel breakdown for Danang Station at the close of business, 30 June 1970, was as follows:

[redacted]

Permanent	3	13	17	68
Pre-Process	0	0	0	2
Temporary	0	0	0	0
Daily Hire	0	0	0	0
TOTAL (103)	3	13	17	70

TECHNICAL SERVICES

RMD handled at total of 581 arriving and 581 departing flights, as compared to 590 in each category in May. There were a total of 4 delays which resulted in a revenue loss chargeable to maintenance. Number 1 services were performed on 1 PC-6 aircraft and 3 204B aircraft, and 1 number 2 service on 204B aircraft was accomplished. 2 aircraft were placed on AGP status. Extensive maintenance was required on transiting C7A #61-2392, enroute to TNN from VTE. Total ground time was four days; a cylinder change, engine change, and two propeller changes were required.

RGMD expended a total of 824 manhours of which 132 were utilized at the Hostel. Air conditioner failures are on the increase.

The final invoice from NSA is expected during the first part of July. Procurement from the ARMY Support Command is still pending the negotiation of an Inter Service Support Agreement.

MEMORANDUM

DATE: 18 July 1970

REF. No. BMSGN/70/227

TO : AVP TPE

FROM : BMSGN

SUBJECT : June Monthly Report

Saigon Base Monthly Report for June 1970 is forwarded in three copies for your file.

E. J. Theisen

SAIGON BASE
MONTHLY REPORT
JUNE 1970

I. GENERAL

1. Total block time for June was was 5588 hours as compared with 5825 hours in May and 5811 hours in April 1970.

2. The security condition in Saigon remains "stable". There were several student demonstrations to establish peace in Vietnam plus several other obscure issues of government controls and school administration. They did not reach the violent proportions of those routinely experienced in the USA. The veterans manifested dissent by constructing market stalls on public property along several boulevards in downtown Saigon which degraded the environment and disrupted the orderly conduct of business and traffic in these areas. The veterans were complaining about the lack of veterans benefits. After several days of strong persuasion by the police, the veterans agreed to dismantle their stalls. At the moment, all is calm in Saigon.

3. Labor conditions: Because of the cutback in labor strength at Thu Duc due to the take-over by RVN from USAID of extensive warehousing facilities, there was a threat of a General Sympathy Strike with employees of Esso, Caltex, Shell and several lesser companies participating. The general strike, due to government controls and lower wages never "got off the ground". It is gratifying to note that AAM employees never considered the possibility of participation.

4. BM Saigon returned from 35 days annual leave in the Z.I. to find that SOM Parrish had done an excellent job of filling in as Acting BM during his absence. Meanwhile our management-level manning is sagging due to accrued leave which must be liquidated. Boyd Mesecher (MTS) is on four months leave (1 May through 31 August). SZ DAD Cambre is on four months leave (11 July through 17 October 1970). MF/RW Hitchman will be on leave 20 July through 30 Sept. PM, Frank Nihill is on leave 13 July through 8 August. ADSAFE George Keller will be on leave 20 July through 8 Sept. Al Harris (Assistant to SOM Parrish) is on leave 25 June through 30 July. Other absences on leave of lower levels of supervision result in very thin management manning in SVN, however, the "second team" seems to be carrying the load quite well.

5. Air Cambodia is operating in and out of Saigon carrying well-dressed "refugees" on a non-scheduled basis four to six days a week.

With the exception of a few intransit passengers to Singapore, the outbound passenger manifest is almost negative.

6. We have performed a number 2 service and major clean-up of VTB M3728G in anticipation of transfer to UTH. Meanwhile it is being kept in service under VN-70 Contract. After transfer, 28G will be replaced on VN-70 Contract by VTB M9838Z now in temporary storage.

7. It is apparent we are about to "overrun" AR #8320 for the Danang hostel by approximately US$1700.00 due to the discontinuance of NSA supply support and per diem costs for TCS personnel from GKD SGN to perform the work. This was an oversight on our part. In any event an existing AR #2255 to upgrade SZ DAD quarters, which will now become part of the hostel facilities, was with held from further work due change in programming and is more than adequate to provide funding for the total Danang hostel project which includes the existing hostel plus SZ quarters which are being converted to additional hostel facilities under the cited Appropriation Requests.

8. As of 8 July 1970, Continental Air Services has operated the following fleet in SVN :

C-47	8
DO-28	2
Skyvan	1
Beech Baron	6
H-18 Super Beech	1
Total	18

II. CUSTOMER RELATIONS

Have reached an all time high. There are no known areas of misunderstanding or question involving AAH Operations.

III. FACILITIES DEVELOPMENT

In the area of facilities development it appears there is very little left to be accomplished to achieve a completely efficient configuration:

(1) AR 2438 - Concrete Drainage Ditch and Concrete Pavement DAD. This project is 60% complete and progressing on schedule.

(2) AR 2422 - Renovation of Operations Building Saigon. Contract has been signed. Work should commence in late July.

(3) AR 2449 - Saigon Terminal Parking Apron. Out for bid. Expect to get this project moving soon.

(4) Project 6702 - 204B touchdown Pads SCN. Form P has been submitted for Customer consideration. We will continue to exert pressure on this project but at the moment it does not look very hopeful.

IV. GENERAL AFFAIRS (Unreported)

V. FISCAL

Saigon Base Accounting was moved into new offices located on the second floor of the MMD Maintenance building south side of Hangar #1.

The station allowance increase for [redacted] employees was reflected on the June payslips and was retroactive from April 1, 1970. The adjustment [redacted] are being made now and will be reflected in next month's report.

The station allowance increase for American and TCN personnel has tended to tone down the hard feelings of ground personnel, but the general opinion is that ground personnel should receive other benefits the pilots received. Such other benefits being increased weight allowance for personnel effects, better insurance coverage and family relocation per diem.

VI. MEDICAL

Number of sick call: 1269
Accidents: 30
Hospitalized sick call : 1 died
Unhospitalized accident: 30
Hospitalized accident: None
Outcalls: 3
Physical examination : 34
Sick leaves: 211

VII. PERSONNEL

Apart from routine activities [redacted] spent a week in Taiwan escorting three RVN Government Officials (from the Ministries of Labor and Education) on a tour of Company facilities. The Officials came away extremely impressed with the facilities and our training programs, and this public relations effort should aid us considerably in future dealings with the government (especially with respect to securing Work Permits for our TCNs).

Our [redacted] employees declined to participate in either of the month's general strikes, the second of which ultimately involved over 100,000 workers. This non-participation is a fine tribute indeed to our management - employee relations at all levels.

The piastre is being traded on the open market at approximately VN$ 370 to US$1.

HOSTEL OCCUPANCY

During the month of June, only three Certificates of "non-availability of company furnished accommodations" were issued.

VIII. TECHNICAL SERVICES

1. Overall activities in SVN Stations were lower than that of recent months. The reduced activity was a fairly direct reflection of the 4.7 percent drop in overall flying.

The rainy season has brought its usual problems of productive time losses, interruptions of communications and aircraft ignition systems breakdown. Power interruptions have been less than in previous years.

Preparations for the implementation of the new Skilled Labor Cost Accounting System required a lot of attention and training time by all employees; particularly Supervisory.

Facilities improvements at SGN included the completion of the Accounting offices and movement of the accounting personnel to the RMD Shops Building. The completion of a walkway from the hangar to the terminal has contributed the safety of personnel by reducing pedestrian traffic on the aircraft ramp. Concreting of the Danang terminal/hangar area is well underway. This project, as well as the Danang Hostel renovation has required considerable time and attention from GMD

2. Aircfaft Maintenance - Fixed Wing
As a result of a decrease in total number of aircraft departures and arrivals, the general activity declined. Routine maintenance comprised the major portion of the workload.

3. Rotary Wing - June workload was average until the last week; one number two service was performed at VO3, eight at VO1, one number three A at VO1, two engine hot section inspections, and three engine changes.

Flying time for the month was down somewhat to about 980 as compared with the previous three month of 1050.

4. Shops - The overall workload for the early part of June was routine but turned heavy toward the last part due to a PC-6 and a helicopter No. 4 service.

The Shops Equipment Shop has placed increased effort in reworking and marking VTB seats on a fleet basis.

5. Planning - S/PLNG has made a tour to VCA, DAD and NHA this month giving training classes to the Technical Services personnel. Training classes for RAD and RGMD personnel in SGN Base were held at the same time by S/TT, SGN

6. General Maintenance - AR 2421, relocation of offices is well along. AR 2422, renovation of the Operations building, the contract was signed with A&M Enterprise. AR 2438, Concrete Paving in DaNang was started this month. AR 8320, Renovation of the Hostel in DaNang begun on 24

June, this is being accomplished by in-house labor.

7. Building and Grounds Maintenance: The grass plots in front of the Cafeteria were reworked and seeded with grass seeds obtained from HongKong. However the seeds were received with zero germination.

8. Communications Maintenance - We were more concerned during the month with the cables for teletypes and telephones which gave us more delays on traffic than the equipment to which they are connected.

Teletype circuits and Maintenance: Most of the troubles were due to bad cables. If there is a heavy down pour in one day, the following day TTY circuits are all in bad shape including telephone trunk lines. It takes two, three or four days before the circuits are restored to normal. The Creed TTY circuit on the sending side was out twelve days because of defective lines. Cable trouble is also true with CCR-CAT TTY circuits this time of the year.

Transmitters' Maintenance: We encountered trouble with our daytime 34-A HF transmitter. The 30-volt rectox rectifiers developed leakage which brought down the 30-volt control voltage to only 20 volts.

9. Technical Training - Courses completed: Supervisor management, 204B maintenance. The SGN-line Service Mechanic course has been delayed due to the poor response [redacted] to Air America's "Help wanted ads".

Shipping/Receiving activities experienced a slightly decrease.

Procurement section experienced a little smaller number of transactions than May. A total of 210 line items of commodities were purchased from the local market this month. Total value of commodities purchased from Saigon/Cholon market amounted to VN$658,204.00.

Since the Naval Support Activity (NSA) in DAD has been deactivated on 14 June 70, Procurement switched its sources to HKG and local vendors for certain items. This entailed a somewhat slower procedure and more careful approach to bying. The sometimes wide range of qualities, prices and local problems have significantly added to the workload, when compared to the relatively simpler NSA operation. Negotiations to open an account with the U.S. Army Vietnam are still being carried on.

10. Customs. Surface vessel shipments are becoming more complicated as the customs requirements for documentation has been increased. On re-exportations, the temporary import documents must be furnished. This requirement can be easily filled on large equipment or vehicles.

X. OPERATIONS

1. Flight Time Report (See attachment A)
2. Ground Fire Incidents Report (See attachment B)
3. Accident reports

Date	A/C Type/No.	Location	Remarks
09	VTB/N6154U	V-11, SVN	During operation at V-11 number 3 blade sustained a nick approximately 1 inch deep, believed from a piece of small rock.
13	204B/N1304X	V-69,SVN	During post flight inspection noted a 1/2" hole in the leading edge of the tail rotor blade. The result of hostile action.

4. Flying Safety

No accidents or incidents since 2 January 1970.

5. Ground Transportation

Aggregate microbusses mileage	25071 km
Microbusses down-time	335 hrs 32'
Microbusses passengers carried	3234 pax
Isuzu bus mileage	6009 km
Isuzu bus down time	55 hrs 54'
Isuzu bus pax carried	10290 pax
Supply vehicle mileage	2946 km
Supply vehicle down-time	22 hrs 50'

6. Flying

Our time and most of our efforts were primarily concerned with DHC4/B851 and pilot requirements for same, Captains Broussard, Parker and McCauley and the over-temp of VTB N7770B.

Caribou B-851 arrived and was put to work by the customer shortly after it arrived. Because of the "B" registry there has been some difficulty in setting up proper crew manning in the program. The problem appears to be resolved on a temporary basis by cross training pilots. Presumably the Bid System will provide a final solution. Meanwhile the pilots in this program are "maxing" the time limit.

Investigation, coordination, termination and the hearings concerning Broussard and Parker definitely took a disproportionate amount of the month's time. The biggest single problem in this and similar cases is the involvement of FEPA and the AAM Agreement. Since FEPA benefits from the continuous services of a trained attorney, the odds are somewhat stacked in their favor when MFD is forced to present the prosecution side of a case without professional or trained legal help.

MFD visited Danang facilities. The most notable finding was the water which is taken from the well on the premises is grossly contaminated.

The Nhatrang quarters seem to be in good shape except the lack of air conditioners which are definite necessities for our crews to get adequate

rest while on RON. A steady stream of complaints has been produced by this one shortage.

Crews lockers are now available in Saigon and are being issued.

And another month accident free.

1.3(a)(4)

the Viet Cong (VC) in Military Region 5 (MR-5) was located in the Tra Khe area, Tra Bong District, Quang Ngai Province, and was run by the Quang Da Special Zone (QDSZ) Military Proselyting Section. There were also two province-level prisoner of war (POW) camps under the QDSZ. The Hon Tau camp held prisoners only temporarily, while the camp in Quang Da Province kept prisoners permanently. Dang Van Hien claims that no U.S. POWs were sent to North Vietnam (NVN), primarily because of the transportation difficulties. End Summary.

1. Each of the VC regions in South Vietnam (SVN) had one region-level POW camp where U.S. POWs of all ranks and captured Army of the Republic of Vietnam (ARVN) officers were held for debriefing and indoctrination. The VC camp for U.S. POWs in MR-5 was located in the Tra Khe area, Tra Bong District, Quang Ngai Province. It was located in a heavily forested area northwest of the Na Nieu River, about six hours' walking distance from the point where the Vien(g) River flows south into the Na Nieu River, approximately 15 kilometers southwest of Tra Bong City. The Tra Khe camp was run by the Military Proselyting Section of the QDSZ Party Committee, the chief of which was Colonel Than Tan T r i n h, aka T r i. The chief of the Tra Khe camp in late 1969 was Senior Captain (fnu) P h u o n g.

2. Two English-speaking interpreters, Lieutenants (fnu) H u n g and (fnu) N h o, who were both graduates of the Foreign Language College of Hanoi University, were assigned to the Tra Khe camp. Two other English-speaking officers, both propaganda leaflet writers, were available at the camp to interrogate and indoctrinate U.S. POWs. Both were officers of the Military Proselyting Section of the QDSZ. They were Lieutenant Colonel Nguyen T h a i, deputy chief of the Military Proselyting Section, and Senior Lieutenant (fnu) T i n h. As of late 1967, eight U.S. and 12 ARVN POWs were being held at the Tra Khe camp. (Field Comment: Dang Van H i e n visited the camp in 1967 but did not see the U.S. POWs as he stayed just one night.)

3. The administration staff of the Military Proselyting Section of QDSZ authorized the acquisition of rice for the camp through the use of a ticket system. Each month the Tra Khe camp received a ticket which was then turned in for a specific amount of rice. The administration staff provided instructions with the ticket which indicated where the rice could be picked up. A sum of money also always accompanied the rice tickets for use in the purchase of vegetables, salt, fish, meat and other food items.

4. There were also two province-level POW camps under the QDSZ. One was located in the Hon Tau Mountains, VC Que Son District, Quang Nam Province, where prisoners were kept only temporarily; and the other, to which U.S. POWs were sent permanently, was in a forested area on the SVN/Laos border in VC Quang Da Province. (Field Comment: VC Quang Nam Province contains Government of Vietnam /GVN/ Quang Tin Province and Que Son District and portions of Duc Duc and Duy Xuyen of Quang Nam Province. VC Quang Da Province contains portions of GVN Quang Nam Province.) All captured members of U.S. and Free World Forces and ARVN officers were escorted by the capturing unit to the Hon Tau camp. When VC Main Force units captured POWs, the latter were turned over to local guerrilla units to be escorted to the Hon Tau camp. From Hon Tau the U.S. POWs immediately were escorted by the Hon Tau guards to the Tra Khe camp for debriefing and indoctrination by English-speaking interrogators. Hien claimed that primarily because of transportation difficulties, no U.S. POWs captured in SVN were sent to NVN. Hien emphasized the transportation difficulties by stating that even seriously wounded [illegible] were not sent north. Because all of the travel from [illegible] be through heavily

5 4 3 2 1

mountainous areas, it would take at least two months to travel from the region to NVN and most U.S. POWs would, in Hien's opinion, die within one week if they were forced to travel north. According to Hien, it was VC procedure to relocate a POW camp after the release of any POWs. 1.3(a)(4)

5. Most U.S. troops captured in SVN were low-level soldiers or noncommissioned officers and for this reason there was no point in sending them to NVN for exploitation. In contrast, pilots captured in NVN were officers and, thus, were exploited for their information. All U.S. airmen captured in NVN were considered criminals and would be released only when the war ends. While in NVN, Hien heard NVN cadres say that even though the airmen would not be tried for committing criminal acts against the people, the NVN Government would not advise the U.S. Government concerning airmen who were captured, wounded or killed.

6. [redacted] information on the Tra Khe POW camp was kept current through conversations [redacted] with VC cadres in the Military Proselyting Section, QDSZ, MR-5, concerning the treatment and handling of U.S. POWs at the camp and through Central Office for South Vietnam communiques which outlined VC procedures for handling U.S. and Free World Forces POWs. [redacted] any changes in VC POW policies would have been reflected in the communiques which were disseminated throughout MR-5 in the fall of 1969. Beginning in 1967, the communiques were usually disseminated twice a year in MR-5.) 1.3(a)(4)

MEMORANDUM

TO : BM/SGN

DATE: 04 August 1970

FROM : A/SZDAD

REF. No. SZDAD/70/072

SUBJECT : DANANG Station Monthly Report - July 1970

GENERAL

No significant incidents of hostile activity were reported during the month of July. However, there has been a generalized increase in overall security measures in the DaNang area and increased enemy activity for the early part of August has been forecasted by several sources.

The early part of the month brought an increase in the number of Southern Air Transport flights transiting this station. All were substitute service Stars & Stripes missions scheduled as a result of the World Airways flight crew walk-out.

Traffic and Operations had been geared to handle seventeen SAT flights during July. However, an agreement was reached after only six flights were operated and the remaining unflown missions were cancelled.

An agreement has been reached with the Headquarters and Maintenance Squadron - 16, of Marine Air Group 16, to remove from their supply area Helicopter and aircraft parts that they are unable to use.

To date we have received approximately 3,000 pounds of aircraft parts and miscellaneous supplies. The most noteworthy being a bell 204 tail boom assembly and four main rotor mast assemblies.

As Hand MS-16 continues to weed through the supplies they have on-hand, they will call us whenever they run across something they feel we may be able to utilize.

There is no way of projecting the monetary valve possible from this project.

LEGAL

Payment of the rent for the former SZ residence was paid on 11 July. The Agent for the landlord expressed great disappointment due to the fact his request for a rent increase was not approved.

FACILITIES

The Area Paving and Drainage Ditch Completion project was at a stand-still for better than a week due to the non-availability of a cement mixer.

On the 15 July a mixer was obtained and the project has moved along swiftly. There should now be no problem meeting the 15 August completion date.

FACILITIES (CONT'D)

The major portions of the Hostel Renovation project were completed during the last week in July. All that remains is minor clean-up and small touch-up jobs that will be handled in-house.

Plans for the Passenger Terminal Renovation project have been received from Saigon and they have been reviewed with the local customer and his approval was received.

The project is still frustrated by a lack of materials and the apparent reluctance on the part of the contractor to submit a bid.

FISCAL

Per diem expenses for the station showed a decrease the second half of July with the return of the Hostel Renovation team to Saigon.

[redacted]ayroll for the month totaled: 1,012,010$VN

Petty cash expenditures totaled: 103,255$VN

OPERATIONS:

Total flight time for this reporting period reflects a decrease of 35+58 over the month of June. This decrease is attributable to the reduction of the additional C-46 RONs.

The reduced Sunday flight schedule continues and only minor personnel scheduling problems were encountered when the customers programmed last minute early departures or late arrivals.

Following is a breakdown of flight time generated by this station during July:

VN-70/AID	755+53
VN-70/Embassy	194+34
VN-70/RDC	5+00
C/0069	0+25
TOTAL	955+52

There were no controllable revenue losses during July.

The hostel occupancy factor for the period 01 July through 09 July was 90%. For the remainder of the month it dropped to 64.5%. This decrease is the result of our utilizing the additional rooms and beds as they became available.

OPERATIONS (CONT'D)

Non-availability certificates for a total of 124 nights were issued to TCS ground personnel. During the month 2,400 piastres were disbursed to provide hotel accommodations for flight crew personnel. This amount is a drastic reduction over the amount disbursed in June (13,280$VN) as a result of the completion of the Hostel Renovation project.

COMMUNICATIONS

It appears that we still are experiencing problems with the Motorola Remote UHF/VHF system. Numerous trips had to be made to the remote site [redacted] The system was off-the-air two days during the month and was not repaired until the Motorola maintenance manuals were received from CMD/SCN. Overall HF operation was normal with only minor interference encountered.

Incoming and outgoing messages totaled 1331 and 1563 respectively.

TRAFFIC

Passenger and cargo statistics for the month of July are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-70/AID	2,662	2,328	138,255	118,112
VN-70/Embassy	379	602	1,900	5,801
C/0069	12	12	0	0
AF/0030	5	5	0	0
AAH	88	109	7,495.7	4,149.4
TOTAL	3,146	3,056	147,650.7	128,062.4

SECURITY

There were no major problems encountered in this area during this reporting period. The VNAF Security Office continues to validate Company Travel Orders for a limited time in lieu of requiring the processing of temporary air base passes.

PERSONNEL

Station Manager, Winston C. Cambre, departed on Home Leave on 10 July. The undersigned assumed the duties of Acting Station Manager on that date.

The personnel breakdown for this station at the close of business, 31 July 1970, was as follows:

MEMORANDUM

TO : AVP TPE

DATE: 18 August 1970

FROM : BMSGN

REF. No. BMSGN/70/252

SUBJECT : July Monthly Report -

Saigon Base Monthly Report for July 1970 is forwarded in three copies for your file.

E.J. Theisen

FORM 837000

SAIGON BASE
MONTHLY REPORT
JULY 1970

I. GENERAL

1. Total block time for July was 5295 hours as compared to 6398 for July 1969, and 5518 hours for June 1970.

2. VTB N3728G was positioned to Udorn on 1 August 1970, and on 28 July 1970 VTB N9638Z was removed from temporary storage and placed on the 7001 contract.

3. Vietnamese students supported by other Allied Representatives have held a demonstration on 11 July 1970 declaring that they want to obtain Peace, Independence and Unification for Vietnam without American and Allied troops' help and support. Nixon is only a war monger, all American must withdraw from Vietnam.

On July 20th, at 1530, VC launched two rockets: one hit the yard of the Independence Palace, another landed in downtown Saigon area. Also on 25 July, a plastic bomb was detonated behind the 3rd Field Hospital, a few miles from the airport, causing minor damage.

On July 22nd, an Air Vietnam domestic flight (Pleiku-Saigon) was hijacked by an American GI [redacted] Capt F.L. Derieux (former AAM pilot) and two other Koreans crew members were involved. Unofficial sources reported that [redacted] attempted to escape to HongKong due to the previous crime he has had committed during his tour in Vietnam. The aircraft landed safely in Saigon and the hijacker was apprehended.

On July 27th, the Vietnamese students and disabled veterans attacked the Indian Consulate at Saigon protesting against the official welcoming of Madame Nguyen Thi BINH who is the Minister of Foreign Affairs of the Liberation Front (VC).

4. Local management has been approached both at DAD and SGN by US Air Force Representatives concerning master planning which, if effective, would relocate the AAM DAD Operations across the runways to the military side of the field. This matter has been turned over to the customers to take up with proper authorities.

AR 2438 - Completion of Concrete Pavement and Drainage Ditch, DAD
Complete.

AR 2437 - Improvement on Passenger Lounge, DAD
This project is out for bid. Expect it will take 30 days to complete after starting construction.

AR 2422 - Renovation of the Operations Building, SGN
This project moving along quite rapidly, should be complete by 30 September 1970.

AR 8320 - Danang Hostel & SZ Residence Renovation
This project is complete. Pictures will be forwarded in the near future. To give you a feeling for the vast improvement which has been effective.

AR 2449 - Saigon Terminal Parking Apron
Only one bid from A&M Enterprises was received on this project which fell within the limit of the approved AR & Form F. Customer John Williams has approved. Letter being forwarded to PRES and SLC for approval to sub-contract. Construction time required is about 45 days.

5. The Ministry of Foreign Affairs of the Republic of Vietnam has sent instructions to all Vietnamese Embassies/Consulates abroad that starting 14 August 1970 the new regulations will apply ---all nationals including American must obtain entry visa before entering the Republic of Vietnam. The seven-day stay without visa in SVN is no longer granted to Americans or any other foreign nationals.

II. CUSTOMER RELATIONS remain excellent as ever.

III. FLYING
1. Facilities inspections were made at Can Tho and Da Nang primarily for the purpose of getting a check made of the water used for showers, but at present we have not received any specific results. MFD's visit to Da Nang was cut short with the arrival of VPFO - continuation of MFD's visit will be made in August.

2. The grievance hearing for P.A. Broussard and G.V. Parker was held, and due to the lack of complete evidence, including "failure-to-appear" on the part of the customer who initiated the original complaint, it was recommended that both pilots be reinstated. This was upheld by Taipei and they were returned to duty, retroactive to the date they were withhold from service.

Renovation and construction was started on the FD/OPs building in Saigon.

VPFO and NVPFO made separate visits to Saigon.

Our safety record went "down the drain" with the gear-up landing of VTB N7770B at Bac Lieu (V58).

IV. MEDICAL
Number of sick call: 120
Accidents: 50
Hospitalized sick call: None
Unhospitalized accident: 50
Outcall: 1
Physical examination: 22
Sick leaves: 339½

V. PERSONNEL

1. Personnel Department activities were routine. PM was on Annual Leave from 11 July-8 August 1970.

2. Our appeal through the US Embassy for the reconsideration of the work permits were successful. We have just obtained the reconsideration for the work permits of 10 TCN from the RVN Ministry of Labor.

The piaster is being traded in the open market at approximately VN$380 to US$1.

3. Personnel Strength

VI. FISCAL

1. A group of officials from the Philipines visited to discuss banking in the Philipines. They were treated with every courtesy [redacted]

2. We were queried by Taipei regarding non-logging of project time. Seems that the customer, after signing the log sheets for 10 months discovered that we were no longer logging project time. Our pilots will start logging project time in August.

HOTEL/HOSTEL OCCUPANCY

		Beds Available	Beds Utilized

	June	July
Outbound (lbs) SGN	800,054	706,114
Inbound (lbs) SGN	392,621	231,436

IX. TECHNICAL SERVICES

1. There is little to report in Technical Services - SVN, activities for July versus that of June. In the aircraft activities, flying hours utilized were approximately the same. The workload due to delays, recoveries and premature engine removals was down slightly.

Initiation of the new Skilled Labor Cost Accounting System was off on Schedule, 1 July. Preparatory training was carried out, but such a program requires strong and constant supervisory follow-up.

General Maintenance activities at SGN includes the start of renovation of the Flight and Operations department building; installation of the 160 KW standby generator, water faucets for aircraft washing to reduce towing and accident potential, area beautification and general housekeeping. At Danang, the terminal/hangar area concreting is approximately 90% complete and the hostel is complete except for touch-up.

2. Aircraft Maintenance - Fixed Wing . There were several incidents during the month involving aircraft accidents. Two aircraft received minor damage due to hostile fire action, one aircraft had propeller damage due to FOD, another aircraft lost a cargo door in flight and one aircraft was involved in a major accident by landing on the runway with gear-up position.

3. Rotary Wing - This month has been a little slow; two number two service at DAD, five number two, one number 3A and one number 3B, and one number 4A service at Saigon.

4. Shops - The overall shops workload remained steady with a certain amount of overtime required for M198X number 4 service.

5. General Maintenance - Building and Grounds Maintenance - Water pipe has been run through existing culverts under the taxiway from the RMD building to the South Ramp. Water pipe has also been installed along the north side of the Northeast Ramp.

6. Electronics - PABX and Intercom Systems- We have one PTT trunk line that can be used and another line (on emergency basis only) that can be used to call Saigon telephones thru the PABX operator.

CMD has recently finished the installation of the Paging System, initiated a year ago. Ten speakers are distributed to cover all existing AAM Ramps, inside hangar, sheet-metal shop and Cafeteria. One dynamic microphone and two 100-watt Philips amplifiers are used to operate these speakers.

7. Technical Training -
Courses completed : Quality control Inspector Training; Garrett TPE-331; Supply Course; Flight Mechanic's Course.

Courses in progress: Line Service Mechanics Course; Welding Course.

8. Supply - Supply activities remained the same as last month . The 2nd Supply Training Course for newly employed storekeepers was conducted this month. The students gained considerable basic knowledge of the functions of the supply business.

The Procurement Section of MSD SGN experienced a slightly smaller amount of transactions than last month. A total of 171 line items of commodities were purchased from local market this month.

Total value of commodities purchased from Saigon/Cholon market amounted to VN$ 765,857.00.

Since Naval Support Activity (NSA) in Danang has been deactivated, 60% of the general supplies have been purchased from HKG.

September 1970

INTELLIGENCE REPORT

Thailand's Khmer Minority

Introduction

Royal Thai Army training of Thai-Khmer recruits for possible service in support of the Lon Nol regime in Cambodia has focused attention on a relatively large but little known minority that occupies much of Thailand's frontier with Cambodia.* There are indications, moreover, that the Thai Government is growing increasingly concerned about the ability of this traditionally peaceful and apolitical minority to withstand propaganda emanating from Communist elements in Northeast Thailand or from across the border in Cambodia. This report presents a brief description of the Thai-Khmer community.

Note: This report was produced solely by CIA. It was prepared by the Office of Basic and Geographic Intelligence and coordinated with the Office of Current Intelligence.

* Foreign Minister Thanat Khoman, in an interview with the Bangkok World on 9 September 1970, revealed that the Thai Government had, for the time being, decided against sending any Thai troops -- including Thai-Khmers -- into Cambodia.

SECRET

NND 941536 --- 3999

NND 941536 --- 4000

Numbers and Location

1. Although estimates of the Thai-Khmer population appearing in various US intelligence reports during the past 10 years range widely, from a low of 160,000 to a high of 600,000 persons, a realistic approximation would appear to lie between 600,000 and 800,000. According to an American missionary who surveyed the population in Buriram, Surin, and Sisaket in 1963-64, there were then more than 600,000 Khmers in these provinces alone. Most of the Khmers live in Ubon Ratchathani, Sisaket, Surin, Buriram, Prachinburi, Chanthaburi, and Trat Provinces, which collectively form a territorial arc along the full length of the Thailand-Cambodia border. Khmers reportedly comprise a majority of the population of Buriram and Surin Provinces,* and between one-fourth and one-third of the population of Sisaket. No information is available to indicate the percentage of Khmers in the other provinces involved, where their numbers are considerably fewer. Total provincial population, according to the 1960 Thailand census, is as follows (the census does not provide a breakdown by ethnic group):

Border Province Population

Province	Population
Ubon Ratchathani	1,130,712
Sisaket	601,356
Surin	581,732
Buriram	583,585
Prachinburi	334,895
Chanthaburi	157,803
Trat	66,328
Total	3,456,411

2. Most Khmer villages lie well away from the generally rugged terrain of the border and are concentrated along the railroad in Buriram, Surin, and

* The provincial capital of Surin is essentially a Khmer city.

NND 941536 --- 4001

Sisaket. The border belt of territory lying south of the railroad in these provinces and extending some 20 miles to the west of the border in Prachinburi, Chanthaburi, and Trat Provinces is more "purely" Khmer -- even though it is more sparsely populated and contains numerically fewer Khmers -- than the areas farther toward the interior (see Map 78820).

3. Small Khmer communities are also scattered outside the border provinces -- in Northeast Thailand as far north as Loei and in the central lowland within and around the cities of Bangkok, Rat Buri, Kanchanaburi, Chachoengsao, and Chon Buri. The lowland communities are reported to be comprised of the descendents of resettled Khmer prisoners-of-war. They were moved to specified settlements during World War II by the Royal Thai Government (RTG), which gave them land in return for their pledge to perform certain services, including military duty.

4. Buriram, Surin, Sisaket, and Ubon Ratchathani Provinces are situated on the Khorat Plateau of Northeast Thailand, their southern boundaries alined along the Dangrek Ridge (Thiu Khao Phanom Dongrak). This ridge rises relatively gently from Thai territory on the north but drops precipitously some 600 to 1,800 feet to Cambodian territory on the south. It is a barrier to the development of surface transportation between the two countries; no all-weather road crosses it.* Prachinburi occupies a natural lowland corridor between Thailand and Cambodia. It is crossed by a railroad and an all-weather road, both of which link the two countries.** Chanthaburi and Trat occupy Thailand's isolated southeastern salient, which is cut off from Cambodia by the rugged, heavily forested, and lightly peopled Cardamomes Mountains.

---

* The Khmers of the Khorat Plateau call their ethnic cousins across the border "Khmer tam" (lower Cambodians) while the latter refer to the Thai-Khmers on the Khorat Plateau as either "Khmer dong" or "Khmer doi", meaning wild or mountain Cambodian.

** The rail link has been restored in 1970, after having been closed during the 9 years that Thailand-Cambodian diplomatic relations were severed.

NND 941536 --- 9002

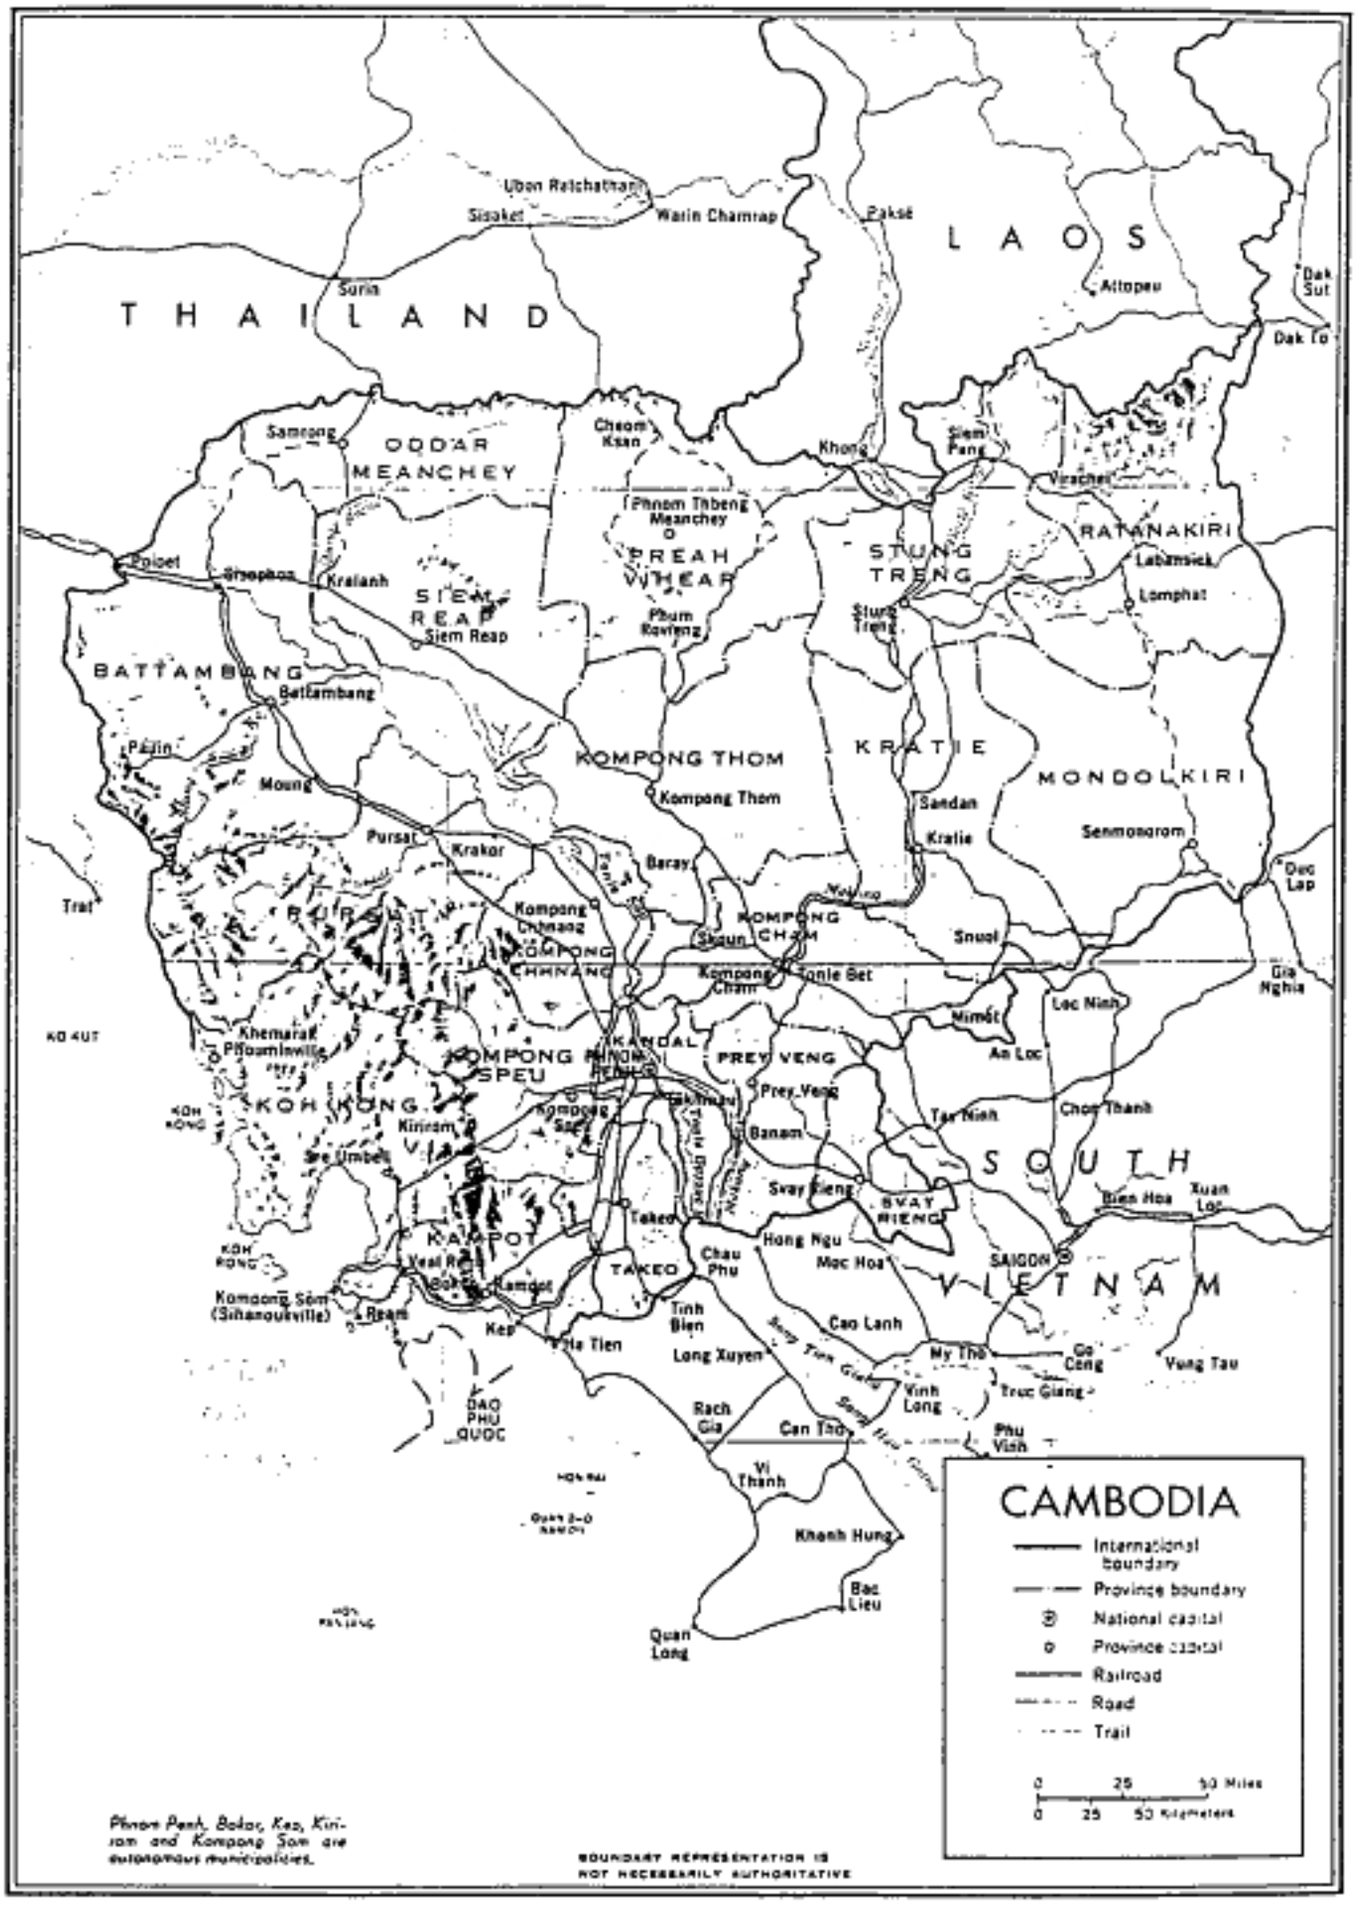
5. The Thai-Khmers occupy territory that was controlled centuries ago by their Khmer ancestors, whose empire was for several hundred years the dominant power in much of Southeast Asia. The Khmer Empire, which flourished from the ninth until the 13th centuries A.D., encompassed territory in much of present-day Thailand and as far westward as Burma's Tenasserim Coast. From the 13th century onward, however, Khmer power waned, and the borders of the Khmer lands succumbed to the onslaught of the increasingly powerful Siamese. By the early 19th century, Siam (now Thailand) had pushed the Khmers southward beyond the edge of the Dangrek Ridge and well to the east of the present boundary. Siam retained much of present-day Battambang and Siem Reap Provinces in western Cambodia (see Map 77970) until the early 20th century when they became a part of French Indo China. (She regained them temporarily, with Japanese assistance, during World War II.) Although their Thai territory has been lost for some time, the Khmers have remained in Thailand where they have been for many generations an impoverished but peaceful minority.

6. Few Thai-Khmers were born in Cambodia; according to the 1960 Thailand census, they totaled 4,494 persons, many of whom may have emigrated from Cambodia to escape the unsettled conditions after World War II. Others have fled recently to escape the current imbroglio in Cambodia. According to RTG border officials, more than 1,200 persons (excluding Government officials and troops, tourists, and villagers living in the border area) moved from Cambodia into the Thai border provinces -- principally Surin, Sisaket, and Trat -- during the first 6 months of 1970; about two-thirds of them were Cambodian citizens and one-third Thai citizens, the latter apparently returning to Thailand after unsuccessful attempts to resettle in Cambodia prior to the Sihanouk coup. The RTG reportedly expects to quickly repatriate the Cambodian refugees.

Cultural Factors

7. There is little to distinguish the Khmers physically from their Thai neighbors. They are

NND 941536 --- 4003



NND 941536 --- 4005

about the same height and have generally similar facial traits; only the slightly darker complexion of the Khmers is distinctive. Nor is there much to set them apart culturally. Both espouse Theravada Buddhism and their passive life styles reflect that faith.*

8. The extent of assimilation into Thai culture varies geographically; it is least in the relatively "pure" Khmer areas near the border, where the Khmer cling to close-knit communities, and is greatest in the enclaves of the Northeast and the central lowland, well away from the Khmer strongholds. Many of the Khmers living in such small, scattered enclave communities surrounded by Thais probably retain only a trace of their Khmer identity.

9. Language is the major distinguishing cultural feature. The Khmer language is spoken almost exclusively within the family and in the local community, although most Thai-Khmers -- particularly the men and residents of the provincial capitals -- have learned Thai and use it as a second language. Young Thai-Khmers, who are generally getting a better education than did their elders, are likely to be more fluent in the Thai tongue.

10. The RTG has used education as a vehicle to enhance the assimilation of the country's minorities, including the Khmer, and literacy in the Thai language has been emphasized. Educational facilities in the Khmer strongholds are still not good, however, and few Thai-Khmers receive more than a 4-year education. A recent literacy study

* An estimated 100,000 to 150,000 Kui people (called Soai by the Thai) are scattered among the Khmers and Thais in Buriram, Surin, and Sisaket Provinces (see Map 78820) as well as across the borders in northern Cambodia and southwestern Laos. Additional numbers retain only a trace of their Kui identity, having been assimilated into either Khmer or Thai society (one or the other, depending on proximity). Although the Kui language remains distinct, the people are otherwise closely related to the Khmers and, like them, inhabited this territory long before the arrival of the Siamese.

NND 941536 --- 0005

in rural areas of the Northeast revealed that in those villages where Khmer was the spoken language, 78 percent of the people were either totally illiterate or could not comprehend the lowest-level Thai language materials.

11. The Thai-Khmers remain largely isolated and ignored by both the Thai and the Cambodian Governments. Like their Thai neighbors, the Thai-Khmer peasants are engrossed in eking out a living from farming the generally infertile soils of their homesteads. They have little interest in politics outside the village, and there are no well-developed political ties with either country. Terrain barriers, such as the Dangrek Ridge and the Cardamomes Mountains, and the cross-border language differences discourage the development of political attachments with Phnom Penh.* After World War II, some Thai-Khmers sought the re-creation of a natural Khmer state through the annexation of the Thai border provinces to Cambodia. Otherwise, there has been little manifestation of Thai-Khmer desire to belong to a greater Khmer community.

12. An ambivalent attitude toward the RTG prevails among the Thai-Khmers. Most avow at least a nominal loyalty to the King and Queen, whose pictures may be found on the walls of many homes; nevertheless, the Thai-Khmers may talk about Bangkok as if it were in a foreign country. The communications gap between Bangkok and the Thai-Khmer country has been widened by a paucity of newspapers and radios. Broadcasts from Bangkok, moreover, are in a Thai dialect alien to Khmer ears.

13. RTG policy toward the Khmer minority may best be described as indifferent, particularly when compared to its efforts to accommodate the hill tribe minorities of northern Thailand. But, unlike the northern uplanders -- or the Vietnamese of the Northeast -- the Khmers are an unusually stable

* Phnom Penh radio broadcasts reach into Thai territory. The Khmer dialect spoken in Thailand, however, is distinct from that of Phnom Penh, and Thai-Khmers reportedly have difficulty comprehending Cambodian-Khmer broadcasters.

NND 941536 --- 9006

minority. Although some Communist propaganda has been disseminated among them and there are a few Communist-activated students, little else indicates that the Thai-Khmers are a disruptive element. An undercurrent of antipathy is directed toward most Thais, however, and RTG officials, in rare visits to Khmer villages, are likely to be coolly received. Few such officials speak Khmer, a disability that causes confidence in the RTG to be weakened. Even Thai schoolteachers serving the Khmers are reported to suffer from a language handicap. Much of the RTG presence in the Khmer-settled lands, moreover, is related to military operations of the Royal Thai Army or the Border Patrol Police, and the Khmers undoubtedly are doubly suspicious of uniformed personnel. Educated Khmers must surely relate the poverty of their people to discriminatory policies of the RTG.

14. Although most Thai-Khmers are sedentary and content to remain in their villages year round, many of the men seek employment outside the village during the dry season. Most of them join their Thai neighbors from the Northeast in mass migrations to provincial capitals, to Bangkok, or to other large cities, where they seek employment as day laborers or pedicab drivers.* The communities of Khmer itinerants in these cities tend to be close-knit. Some Thai-Khmers living close to the border reportedly migrate to Cambodia, returning to their families with the onset of the monsoon rains in late May or early June to work in the ricefields. There is, moreover, a "floating" Khmer element in the border area, comprised of oxcart drivers who transport dried fish from the Tonle Sap into Thailand in exchange for such commodities as home-woven textiles and salt. Villagers in the border area apparently cross the border freely.

Military Experience

15. The Thai-Khmers, as a group, have no strong military proclivities. Their history is

* An increasing number of better educated Thai-Khmer youths have been leaving their impoverished villages to establish permanent residence in the Thai cities.

NND 941536 --- 4007

noteworthy for its peaceful -- although not necessarily friendly -- relations with their neighbors. Some, however, have served in the Royal Thai Army and others with the Khmer Serei (Free Cambodia) movement -- a Thai- and South Vietnam-based insurgent force whose objective was the overthrow of the Sihanouk Government.*

16. Thailand assisted the Khmer Serei during the late 1950's and throughout the 1960's by recruiting, training, and offering sanctuary to personnel. During the peak of its insurgent activities in the mid-1960's, the Khmer Serei maintained several bases in Prachinburi, Buriram, and Surin Provinces in Thailand, from which it conducted hit-and-run raids against Cambodian Army outposts in northwestern Cambodia. Although comprised mostly of Cambodian Khmers and Khmer Kroms (ethnic Khmers living in South Vietnam), the Khmer Serei reportedly recruited as many as several hundred Thai-Khmers. RTG military representatives, recruiting for the Khmer Serei in 1969, reportedly sought out Thai-Khmers who had lived in Cambodia. Recruiters often capitalized on grievances that were directed against officials in the Sihanouk Government. Perhaps a greater incentive to recruitment, however, was the fact that the Khmer Serei movement offered the Thai-Khmers cover for such illicit activities as cattle rustling or timber smuggling. This attraction may still motivate Thai-Khmer personnel to volunteer to fight against Communist forces in Cambodia.

17. Reports in late 1969 and early 1970 (before the Sihanouk coup) indicated that a number of Thai-Khmers, dissatisfied with conditions in Thailand (and often enticed by Cambodian Government recruiters), were fleeing to Cambodia to be resettled in Government-run camps in the provinces of

* Khmer Serei units in Thailand apparently have been disbanded; the founder and leader, Son Ngoc Thanh, a prominent figure in the struggle for Cambodian independence, has accepted a position as Counselor in the Lon Nol Government.

NND 941536 --- 4008

Oddar Meanchey and Preah Vihear (see Map 77970). Reportedly, many refugees were recruited for Cambodian paramilitary training, apparently to form a counterforce to the Thailand-based Khmer Serei insurgents. Allegedly, trainees were told that the southern parts of the Thai provinces of Buriram, Surin, Sisaket, and Ubon Ratchathani rightfully belonged to Cambodia; they were further informed that they would become part of a force fighting for the return of these lands. Many, however, disillusioned with conditions in the camps and the prospects of military life, returned to Thailand.

18. Cross-border ethnic ties would motivate few Thai-Khmers to fight in Cambodia. Recent immigrants into Thai territory, however, especially those with relatives still in Cambodia, would certainly be more inclined to aid fellow Khmers than would Thai-Khmers who are long established and without such ties. Fewer still would be motivated by political ideology. The promise of improved economic status would seem to be the inducement most likely to motivate impoverished Thai-Khmer peasants to volunteer for military service.

SUBJECT Tran Van Luc, aka Nam Luc, Chief, Policy Section, Enemy Proselyting Staff, Political Staff Department of COSVN

ACQ Vietnam, Saigon (17 June 1970)

FIELD NO. [redacted]

SOURCE [redacted]

1. Tran Van L u c, aka Nam L u c, born in 1927 in Bien Hoa City, Bien Hoa Province, South Vietnam (SVN), is the chief of the Policy Section, Enemy Proselyting Staff, Political Staff Department of the Central Office for South Vietnam (COSVN). Luc has been very active in the handling of all American prisoners of war (POW's) since April 1966. He was the official COSVN delegate on POW Exchange Affairs in October 1968 at the occasion of the anniversary of the establishment of the National Front for the Liberation of South Vietnam (NFLSV) when three American prisoners were returned.

2. Tran Van Luc is an active participant drafting COSVN policy statements and is one of the most astute men in the Political Staff Department. He is a man with a

promising political future in view of his close association with the chief of the Enemy Proselyting Staff, close friend and confidant Le C h a n, aka Tam T r a n, chief of the Political Staff Department of COSVN, and Pham H u n g, aka Bay H o n g, the Party secretary of COSVN.

3. Luc was born into a rich South Vietnamese family with French citizenship and graduated from the Petrus Ky School in Saigon with a French baccalaureate. He began his revolutionary cadre background in September 1945 when he entered the Binh Xuyen Party and actively fought against the French. He was appointed to serve in the Binh Xuyen Party Staff Section with such leaders as Hai D u o n g, Ba C h i, and Bay V i e n until he attempted to eliminate graft and corruption in the Binh Xuyen Party. He was sentenced to death and imprisoned in the Sat Forest by Bay Vien. However, he was rescued by the Dong Nai Regiment of the Ve Quoc Doan Viet Minh. Other idealistic members of the Binh Xuyen joined Luc to form a guerrilla company. Luc was the company political officer, and 3 months later Luc and his company became Party members.

4. In 1950 Luc was transferred to Battalion 302 where he became a lifelong friend of the other political officer, Nam P h o n g, who, as of April 1970, was a colonel and political officer of the North Vietnamese Army (NVA) 9th Division. Luc concentrated on the Dau Tieng area of Eastern Nam Bo and formed Party cells among the rubber workers. He organized agents targeted against the Officers' Training School run by the French military and initiated an attack which ended in the death of all the French officers and many students. In 1954, Battalion 302 regrouped to Thanh Hoa Province, North Vietnam (NVN), and Luc was transferred to the Political Office, Eastern Nam Bo headquarters, where he worked as a political cadre until 1957. He attended a three-year course at the Intermediate and Advanced Political School, Hanoi. Upon graduation in 1960, Luc was promoted to senior captain and was assigned as the political officer of the Engineering Battalion, Division 330, NVA. In 1962, the division was split and some units were sent to Houa Phan Province, Laos, to fight with Kong L e. Luc remained in NVN as battalion political officer for the remaining units until July 1965 when he was transferred to the Cuc Nghien Cuu, General Political Department, General Headquarters of the People's Army of Vietnam. He attended the Enemy Proselyting Course, Hanoi, from August until November 1965.

5. In November 1965, Luc infiltrated SVN with Group 714 and upon reaching Bau Co (XT 245670), Tay Ninh Province, in April 1966 was assigned to B.620, COSVN Political Staff Department. In April 1966 Luc became chief of the Policy Section, Enemy Proselyting Staff.

6. In April 1968, Luc was assigned to the COSVN Forward Headquarters (Tien Phuong) in Subregion 1 (SR-1) and was in charge of 40 enemy proselyters of both company and battalion levels. In late April he himself launched and commanded a successful campaign against the Cau Vang Outpost (XT 490190) located near Trang Bang, Hau Nghia Province. Luc was recalled to COSVN in July 1968 and made the COSVN chief delegate for Prisoner Exchange Affairs. In October 1968 he directed the first return of American POW's in Tay Ninh Province. Although suffering from a severely abscessed tooth, Luc personally directed the POW return. Under his contingency plans for Viet Cong (VC)/NVN units, a dummy camp was constructed in the vicinity of the prisoner exchange and as a

result, no VC/NVA casualties were suffered in the subsequent Allied air strikes. After May 1969, Luc spent all his time at COSVN Headquarters directing the Policy Section of the Enemy Proselyting Staff.

7. Luc is a rather distinguished-looking man, has graying hair, and is tall, erect and slender. He has a nervous tic in the right corner of his mouth and always wears glasses. He is not married. Although somewhat introverted, he is quite open with his few close friends and is well liked by his comrades.

The Thai Insurgency: *A Mixed Bag*

Bangkok has struck hard at the insurgency in the north. In one of the most successful counter-insurgency operations ever waged by government forces, a 450-man Thai Army task force conducted a series of raids in late August against the principal insurgent stronghold area in northern Nan Province along the Thai-Lao border. The well-coordinated and executed operation, which involved night movement with helicopter support, as well as assistance from intelligence teams on the Lao side of the border, took the insurgents completely by surprise. Fourteen enemy cadre were captured and several others killed without significant loss to government forces.

The operation should help boost Thai morale in an area where the insurgents had enjoyed consistent tactical success—which they had begun to exploit politically—and where the government has been at a loss to develop a coherent strategy. The insurgency in the north continues to spread, however. Small enemy units have recently been spotted farther from the Lao border than heretofore, and it will take a good deal more than one success to rectify the situation.

In the northeast, on the other hand, the insurgent movement is continuing to rebound from the setbacks it suffered during 1967-68. The Communists there have maintained a level of activity markedly higher this rainy season than last. Most of this increased activity has been organizational rather than military, with the Communists seeking to strengthen their support base and extend their writ into new areas of the interior. In contrast to their focus this spring on Nakhon Phanom and Sakhon Nakhon provinces, insurgent activity now affects portions of at least eight northeastern provinces.

Bangkok's growing preoccupation with developments in Cambodia may be contributing to rising insurgent fortunes in the northeast. In an effort to counter the potential threat to its border posed by recent Communist advances in northern and western Cambodia, the government has reassigned seven of the 15 Thai Army companies normally committed to counterinsurgency tasks in the northeast to security missions along the Cambodian frontier. This evidently has contributed to a winding down of government pressure against the insurgents in the northeast.

The fundamental problem, however, is the top Thai leaders' continued discounting of the insurgent threat in the northeast. Based on the experience of 1967-68—when the overextended insurgents were forced to retrench in the face of government pressure—and the continuing weakness of insurgent leadership and appeal, the Thai are convinced that they can keep the insurgency in the northeast within manageable proportions. For their part, the insurgents can profitably use an extended period free from serious harassment, which is likely if they choose to avoid the kind of flamboyant actions that force the government to take countermeasures. *(SECRET)*

Northern Thailand: Areas of Insurgency

NND 941536 ---3f7f

Cambodia: *Phnom Penh Launches an Offensive*

The government's most ambitious military operation of the war attained initial success when a government amphibious relief convoy reached Kompong Thom this week. Advance elements of a second Cambodian Army task force headed north from Skoun on Route 6 in a parallel effort to reinforce and resupply the embattled defenders of Kompong Thom city. This task force is spearheaded by six infantry battalions recently returned from retraining in South Vietnam. Five other battalions are moving westward from Kompong Cham to provide route security behind the advance elements. The government's advance has been slowed by destroyed bridges along Route 6 and the numerous obstacles placed across it by the enemy. The Communists have so far offered only token resistance.

The major area of Communist military activity shifted during the last week from east of Phnom Penh to areas south of the capital. Government forces recaptured Srang, 25 miles southwest of Phnom Penh, when the enemy withdrew after holding the town for five days. The Cambodian Army, however, continues to report sizable enemy troop concentrations nearby and in areas around the nearby towns of Tram Khnar and Saang to the east, both of which came under repeated enemy harassing attacks.

Elsewhere, the Communists launched light harassing attacks near several provincial capitals in the south and southeast. In the northwest, the enemy increased its harassment of government defensive positions at isolated Siem Reap city. Cambodian troops clashed with Communist units north and west of the city, and in one encounter 13 Cambodian soldiers were killed by Communists wearing uniforms similar to those of Cambodian paratroop units.

Status of Communist Supply Routes

Recent aerial photography and reports from controlled sources provide no evidence of major logistic activity in enemy-controlled provinces in northern and northeastern Cambodia. Several of the major routes are impassable for trucks because of destroyed bridges and deteriorated roads, with few signs of repair activity in evidence. Route 19, the main road from northeastern Cambodia into South Vietnam, is in good condition but little traffic or other logistics activity was observed by sources operating there in mid-August. Little or no significant enemy activity was observed on the major rivers in the area during late August.

Vacancy at Lusaka

The Nonaligned Conference formally opened on 8 September, and as anticipated neither the Lon Nol nor the Sihanouk delegation was seated. According to a reliable clandestine source, more delegations supported Sihanouk than Lon Nol at the preparatory foreign ministers' conference on 6 and 7 September. The majority, however, favored seating neither, and believed that Cambodia should remain a member of the conference without official representation in attendance. This ministerial compromise was apparently accepted by the full conference. ~~(SECRET NO FOREIGN DISSEM)~~

Pom SGN/70/376

SAIGON BASE
MONTHLY REPORT
AUGUST 1970

I. GENERAL

1. Total block time for August was 5386 hours as compared to 6128 for August 1969 and 5295 hours for July 1970.

2. Several 120mm rockets impacted within the perimeter of the Danang Air Base Facilities. Several persons were killed and several additional persons were seriously injured, there was no damage to AAM Facilities or personnel.

3. Locally, in Saigon the situation remains quite stable with negative rockets attacks and diminishing terrorist activities. However there is an increasing number of demonstrations by Vietnamese war veterans augmented by questionable organizations. There were also several students demonstrations against the Vietnamese Government and American participation in the war effort here which makes this American unproud of some of the bad lessons being learned from our activities in the United States

4. We have given up numerous contacts with the U.S. Air Force to solve vehicular traffic situation along our taxi way (which includes VIP vehicles! from MACV and 7th Air Force plus a variation of military vehicles which use our area as a shortcut. Also there has been increased irregulated traffic on 6th Street which crosses our main taxi way from the AAM Ramp to the runway. Since this is a VNAF Base, I have addressed official correspondence to the VNAF authorities and I am pleased with their enthusiastic appreciation of our problem. I expect that an acceptable vehicle control will be established within the AAM area within the next 30 days. This has been the subject of separated correspondence -- see BMSGN/70/262 and BMSGN/70/263. (Attachment C)

5. PANAM continues to press forward with plans to bring their 747 Jumbos into Saigon on a daily basis beginning 1 October. Special ground handling equipment has already been received. My contacts with the Vietnamese Aviation authorities indicate however that there are still questions whether TSN airfield facilities are adequate to handle this operation. Meanwhile Air Cambodge (Cambodia) Caravelle operations into Saigon have diminished from 6 daily flights per week to one, and sometimes, two flights per week.

6. We have heard nothing further concerning USAF-VNAF plans to relocate AAM facilities in Danang.

AR 2438 - Completion of Concrete Pavement and Drainage Ditch, DAD

The target date for completion is 10 September 1970.

AR 2437 - Improvement on Passenger Lounge, DAD

The scope of work and total cost of the project by about 50%. The bid proposal of the contractor was also cut by 50%. A meeting is scheduled with the contractor for the first week in September to negotiate and sign a contract. Construction is expected to begin on or about 15 Sept. 1970.

AR 2422 - Renovation of the Operations Building, SGN

Approximately 15% of the work has been completed. This project has a scheduled completion date of 30 Sept 1970

AR 2421 - Relocation/Renovation of Various AAM Shops and Offices, SGN

All scheduled moves have been made.

AR 8320/8348 - Da Nang Hostel & SZ Residence Renovation

This project is complete. The AR Closure Notice was submitted on 27 August 1970.

AR 2449 - Saigon Terminal Parking Apron

The contract is scheduled for signing during the first week of September. Approximately 30 - 45 days will be required for actual construction.

AR 8343 - Air Conditioning NHA Crew Quarters

To date eleven units have been installed. The remaining two units were received 31 August 1970 from HKG.

Proforma AR - Phase One have been submitted for the following projects:

Convert the Cafeteria Annex for the Security Dept. - Local management is projecting the closure of the Phu Kiet Office located in down town Saigon during the month of December. If this materialises, the Security Dept will have to be provided adequate space. It is felt that a portion of the Cafeteria Annex could be developed into adequate offices.

7. Training: I am very proud of the consistently high grades being maintained by our 25 [redacted] students in Tainan. I am informed they are the highest ever achieved by "outside" students.

II. GENERAL AFFAIRS

1. Consequences of the unrealistic exchange rate of the piaster at VN$118 to US$1 - It must be recognized that this exchange rate is unrealistic because in the "open" market a dollar is worth 400 piasters. This situation has created many difficulties for the nation:

a. It paralyzes export: In the face of increasing local costs of production the exporter cannot sell at competitive prices when he can only recover 118 piasters per dollar and government subsidies remain too low.

b. It creates an irrational foreign exchange transfer system: Foreign firms operating in Vietnam for instance may transfer abroad a portion of their profits. With the existing rate of 118 piasters per US$ these firms appear to be over privileged.

c. The existing unrealistic exchange rate is unfair to the US and allied troops and foreign residents, who consequently tend to minimize their expenses in local currency or to exchange their dollars on the black market which involves some 100 million dollars per year.

III. CUSTOMER RELATIONS - Our relations with all customers have never been better. They ar so congenial, it is unbelievable.

IV. HOSTEL OCCUPANCY

1. Danang - All rooms at the hostel were occupied every night during the month. Of the 682 beds available, 454 beds were used during August for an occupancy rate of 67%.

2. Nha Trang - During the month, 6 rooms were unoccuped a total of 57 days. In addition, the hotel had been vacated 29-30 August due civil disturbance. All crew members were moved to the Nautique Hotel. Of the 499 beds available, 358 were occupied for an occupancy rate of 72%.

V. MEDICAL

Number of sick call: 1358
Accidents: 28
Hospitalized sick call: 1
Unhospitalized accident: 28
Outcall: 2
Physical examination: 24
Sick leaves: 239

VI. PERSONNEL

1. Apart from routine activities, we have expended considerable effort trying to iron out the problems with respect to the new Entry Visa requirement for U.S. citizens. Since we are not in a "command" position, we ourselves have not been able to make much progress.

However, the U.S. Embassy is going full steam ahead in its efforts, and they advise that procedures should become consistent and simplified "before too long".

VII. OPERATIONS

1. Flight Time Report (See Attachment A)

2. Ground Fire Incidents Report (See Attachment B)

3. On 2 January 1970, taxi accident in a Porter aircraft (PC-6C, N9444) at Bien Hoa (V-02) South Vietnam.

1. From 2 January 1970, taxi accident in a Porter aircraft (PC-6C, N9444) at Bienhoa (V-02) South Vietnam until 27 July 1970 a gear up landing N7770B at Bac Lieu, SVN. Substantial damage was incurred to the aircraft. The pilot and four passengers received no injuries. We had no accidents or incidents however we destroyed our good record in a catastrophic demonstration.

2. On 8 September 1970, shortly after climb out from Hoi An Airstrip, the external sling load on 204B, N1303X was inadvertantly dropped in the outskirts of the village. The load consisted of two 55 gallon drums of gasoline, one 55 gallon drum of diesel fuel. As the cargo impacted the ground a fire resulted, three small houses were totally destroyed and two houses were fifty per cent destroyed. There were 9 fatalities and three seriously injured on the ground. There was no damage to the aircraft or injuries to the three crew members. This is still being investigated and right now it appears AAH was not completely at fault. Local emphasis is being taken to get this trend "back on track".

4. Ground Transportation
Aggregate microbuses mileage : 24916 km approx. 15572 miles
Total microbuses downtime : 191 hrs 8'
Total microbuses pax carried : 3244 pax
Isuzu bus mileage: 6353 km approx. 3970 miles

Outbound (lbs) SGN	706,114	595,821
Inbound (lbs) SGN	231,436	55,296

IX. FLYING

The month was relatively quiet and no earth-shaking incidents marked our operation as other than routine. Assorted problems arose with

trying to schedule crews returning from TDs or leave due to the VN visa restrictions. Theft from crewmembers cars in the AAM parking has taken a sharp increase. There have been a number of instances of the fuel tanks being drained.

The hostel at Danang is almost completely reconditioned. The Nhatrang hostel is finished with the installation of air conditioners.

Fixed-wing bidding was closed and the bids were submitted to Taipei.

X. TECHNICAL SERVICES

1. Technical Services - SVN productive activities continued along the level set in June, with flying hanging between the 5500 and 5600 hour level. Damage repair work was up due to a YTB gear-up landing, motor damage to a 204B and wind damage to a PC6C. Recoveries, incidents AGP's and flight delays were down. The flying hour level was supported by a heavy and very successful refugee movement in the early part of the month.

2. Fixed Wing Unscheduled work consisted of eight engine changes, handling of five aircraft departure delays and two aircraft recovery missions.

3. Rotary Wing August was a very quiet month with no outstanding problems or difficulties encountered.

4. Shops Volpar N777CB suffered considerable damage from a gear up landing. Helicopter N1306X suffered over sixty holes from unfriendly mortars. USFAA inspection activities were quite active during the month.

5. Planning The Planning and Production Control Section pre-planned scheduled and processed for all types of aircrafts.

6. General Maintenance Grass plots on the south side of the R&D building and at the Traffic have been reworked to upgrade their appearance. Water pipe has been installed along the front of the CITCA Hangar and along the south side of the Northeast Ramp.

7. Airborne Electronics August was a good month for AED/SGN. With 458 O/N SVC and 49 Heavy Services, there were no delays due to AED.

8. Quality Control Five inspectors attended courses in aircraft inspection techniques and practices, fluorescent and dye penetrant inspection, magnetic particle inspection and aircraft radio graphic inspection.

The work load was somewhat light this month.

9. Supply activities remained routine. The procurement Section experienced a slightly larger amount of transactions as compared to last month. Total value of commodities purchase from local market amounted to VN 971,639.00.

Local customs authorities enforced strict regulations to inspect incoming and outgoing shipments, requiring more time to clear.

E.J. Theisen

MEMORANDUM

DATE: 15 October 1970

REF. No. BMSGN/70/291

TO : VPA-TPE

FROM : A/BMSGN

SUBJECT : September Monthly Report

Saigon Base Monthly Report for September 1970 is forwarded in three copies for your file.

B.D. Mesecher

SAIGON BASE
MONTHLY REPORT
SEPTEMBER 1970

I. GENERAL

1. Total revenue block time for September was 4705 hours as compared to 6134 for September 1969 and 5386 for August 1970.

2. Locally in Saigon the situation remains quite stable with diminishing terrorist activities. TSN Airport was quiet throughout the month.

3. The cost reduction program is being enforced by everybody at Saigon Base, recently, Acting BMSGN had called a meeting in which he reminded the Department Heads to re-emphasize the cost reduction program. In order to save the company a large amount of money by avoiding costly TCS personnel, many managers in Saigon Base are wearing two hats: MTS as A/BMSGN; OM as A/SOMSGN; AA/MTS as A/SGM; SIP/RW as A/MF/RW; APM as A/PM and A/GAM.

4. Saigon Base was happy to welcome several company visitors from the Head Office TPE/TNN during the month: DGTD, DCD, MPEMD, MCS. Accompanying BMSGN on his trip to TPE for contract negotiations, [redacted] Mr. McFarlane FIC and both of our customers.

5. One tragic incident happened at Nha Trang. One of our captains was assaulted and robbed at the entrance to a hotel in Nha Trang. While endeavoring to stop the thief's accomplice on a honda, he fell against the moving honda and caught his left hand in the revolving wheel spokes. Extent of injuries included an amputated first finger and evulsed middle finger of his left hand. We have recently sent one microbus from Saigon to provide shuttle transportation to the flight crews to and from the Nha Trang airfield, hostel and eating facilities. This "enclosed transportation" is a big improvement over the open jeeps we utilized previously. It reduces the risk of anti-foreigner harassment which prevails in Nha Trang.

6. There was one major incident which involved a 204B Helicopter N1303X. Shortly after climb out from Hoi An airstrip on 8 September, the sling load on the aircraft consisting of two barrels of fuel and one barrel of oil was inadvertently dropped on the outskirts of a village. There were 10 fatalities and 2 serious injuries to the villagers, there was no damage to aircraft nor crew member injuries.

7. A letter was sent to the Commander of 33rd Defence Group and Airport Commandant requesting their approval to close the ramp gate on the West side of the Air America Traffic Terminal (for formality only). The gate had been closed prior to their approval, because of the construction work going on to repave the terminal apron. We plan to greatly restrict use of this gate when the construction is completed on 1 November.

8. The SVN Government announced a new"parallel rate" of 275 piasters to US$ 1 effective 5 October. The parallel market is for personal accommodation sale only. The currency conversion trading on the open market is approximately VN$500 to US$1 and VN$290 to MPC$1. As a consequence, it is rumored that aircraft parts will be highly taxed, with import duties. Therefore we are only sending the most critical aircrafts parts by commercial air and plan to utilize company cargo flights more. We have not as yet received any official notification from the government here.

9. Our Technical Training Department here is conducting a [redacted] Mechanic Trainee Course for a group of eleven (11) employees. This is similar to the more sophisticated International Line Service Course being conducted at Tainan but our facilities are more limited. We do expect to develop some good mechanics from our in-country trainee course and the savings will be quite impressive.

10. Our total flying hours decreased considerably from the previous month, but based on discussions between VN70 and comments from negotiators now in Taipei, this months total revenue block time of 4705 hours is about what we are to expect for the rest of the contract year 71.

II. FACILITIES DEVELOPMENT

AR 2438 - Completion of Concrete Pavement and Drainage Ditch, DAD
This project is completed yet. Final acceptance by our company remains to be made.

AR 2437 - Improvement of Passenger Lounge, DAD
The contract prepared according to the revised plans and reduced costs, was signed and work started on 20 Sept. The scheduled completion date is 20 Oct. 70.

AR 2422 - Renovation of the Operations Building, SGN
The project has moved very slowly, with the result that the contractor has requested a three week extension beyond the scheduled completion date of 30 September because of unforeseen difficulties with the electrical conduit installation. The project is approximately 30% completed. The revised completion schedule is 21 Oct. 70.

AR 2421 - Relocation/Renovation of Various AAM Shops and Offices, SGN
The installation of work counters in the Accounting Department offices in lieu of partial metal partitions will be undertaken with construction of the counter to be done by GMD.

AR 2449 - Saigon Terminal Parking Apron, SGN
The contract for this project was signed with A & M Enterprises for work to start on 1 October 1970, with a scheduled completion date of 15 Nov. 70.

AR 8343 - Air conditioning NHA Crew Quarters, NHA
All units are installed and AR is completed. Closure notice will be processed in late October.

AR 2368 - Modification of SRSD and Material Control Offices, SGN
The partial metal partitions needed to complete this project are not yet available. A review is being made towards the possibility of using Okamura partitions in lieu of Fedral GSA type of partition.

AR 2377 - West Ramp Power and Compressor Lines, SGN
The project is being held in abeyance for further review of the future use of this ramp. (Materials have been purchased).

AR 8349 - Modification of Fire Brigade Station for Air Conditioning - SGN
The project is being held for further consideration.

III. CUSTOMER RELATIONS - Our relations have been always excellent.

IV. MEDICAL
Number of sick call: 1483
Accidents: 40
Hospitalized sick call: 1
Unhospitalized accident: 40
Hospitalized accident: None
Outcall: 6
Physical Examination: 19
Sick leaves: 265

V. PERSONNEL
1. Personnel Department Activities - Apart from routine activities, we have devoted a good amount of time this month to keeping our TCNs out of jail. The Vietnamese National Police have begun a campaign to rid the country of undesirable and illegal foreign residents, directed primarily against TCNs. Their tactics consist of personal or house search, and incarceration of those not in possession of valid residence permits. While all of our foreign personnel are legally in country, many do not presently have residence permits as their renewal applications are under process. (And this process is slow moving.) Our TCNs thus become victimized by the procedures to which we must subscribe.

2. We have been extremely fortunate in that very few of our personnel have been apprehended. Furthermore, the U.S. Embassy has advised us that they will immediately come to the aid of any of our personnel who are arrested for lack of possession of currently valid documentation, as the Embassy is aware that all of our employees are abiding by Vietnamese Government regulations. We are doing all possible to expedite approval of the Work and Residence permits so as to preclude further apprehensions.

VI. OPERATIONS

1. This 681 hours decrease in revenue flying from the previous month is contributed mainly to a lack of customer cargo to be moved. There are no indication that cargo flights will increase in the foreseeable future.

2. SGM departed on 50 days annual leave and Mr. A. Harris assumed the duties of A/SGM.

3. Flight time report (See attachment A)
Ground Fire Incidents Report (See attachment B)
Accident Reports

Date	A/C Type/No.	Location	Remarks
18	204B/N1307X	Can Tho V-17	Aircraft was damaged while static, during the late evening, from shrapnel during a mortar attack. Approx. 32-40 rounds landed on the airstrip. The A/C received approx. 10 small hits resulting in skin damage.

4. Ground Transportation
Aggregate microbuses mileage: 23593 Km approx. 14745 miles
Total microbuses downtime: 193 hrs 48'
Total microbuses pax carried: 3265 pax
Isuzu bus mileage: 5926 Km approx. 3703 miles
Total Isuzu bus downtime: 112 hrs 42'
Isuzu bus pax carried: 10272 pax
Supply vehicle mileage: 2696 Km approx. 1685 miles
Supply vehicles downtime: 38 hrs 54'

VII. TRAFFIC/AAM
1. The good services of the USAF were utilized to ship a 9,500 pound generator to Danang for station use.

2. Adequate manning for Customer slots as noted in August report has been accomplished to the Customers satisfaction.

	August	September
Passengers departure SGN (all contracts)	5,314	5,313
Passengers arrival SGN (all contracts)	6,086	5,938
Outbound cargo SGN	49,778	46,099
Inbound cargo SGN	80,236	54,996

3. Training classes for all Traffic Agents in the review of proper procedures were conducted. Such refresher training will be provided on a continuing basis.

Three new Traffic personnel for Danang and Nhatrang stations spent 1 week each on OJT at this station prior to being sent to their new duty stations. Training included base, ground service and air freight dispatcher familiarization.

TRAFFIC/USAID
1. Six utilitymen and four security guards were surplussed per customer's request effective 1 Oct. 70

Cargo (including AF Caribou A/C)

	August	September
Outbound (lbs) SGN	595,821	416,031
Inbound (lbs) SGN	55,296	66,607

VIII. FLYING
1. Coordination between FEPA and MFD [redacted] appears to be excellent. This is not to say there are no areas of disagreement, but most actions by either side are discussed in advance and reasonable positions can be taken as a result of both sides knowing the problems and reasoning of the other. It is a situation that hopefully will continue after [redacted] the next FEPA election.

2. The logging of Project time continues to be a problem. Among other things, no one could give us the references that stated other than it should be logged. AVPFO finally gave us the reference in the Accounting Manual. Hopefully it can be cleared up completely in the near future. The announcement last fall that it was no longer necessary to log was received with open arms by everyone in the field. The change in policy has generated more than a little confusion. At any rate it has been directed that pilots log it, and so it is.

3. Lights have been installed in the company vehicle parking lot and whether that is the reason or not, there have not been any reported thefts from employees' vehicles since the installation.

4. The directed transfer of Capt. Sullivan which came up unannounced and completely out of seniority sequence, created a number of problems, not the least of which was a repeat of the "move-the-man-now" concept we have had in the past. This completely disregards any consideration for the individual. FEPA was also upset at the disregard for all policies and agreements. As it turned out, it was all a mistake. Our attempts to question the matter went unanswered.

5. The separation of the MFD-SVN Office into two separate sections, Fixed Wing and Rotary Wing was, directed and accomplished. There still remains an awful lot of details to be clarified before it will be a practical situation. No provisions seem to have been made for the organizational structure regarding the Crew Scheduling Section and the administrative part of the old MFD Office. Meanwhile MF/FW is attempting to continue operating with a minimum of confusion. Coordination with other departments and outside agencies is just one of the areas in which DFD or someone will have to make a decision regarding what is desired. Stating a necessity for cooperation and coordination does not provide a realistic answer. This was the basis for past FW/RW problems in Saigon. Clearly defined areas of responsibility are a definite necessity.

6. On 28 September N1303X went down with a suspected engine fire approximately ten miles northwest of Danang. The crew of N1303X had to spend the night in a small outpost. Information regarding the location was relayed from the outpost to Danang Operations through military channels. Three SAR attempts were made during the night of September 28, but were unsuccessful due to erroneous coordinates of the location. The crew was picked up on the morning of September 29. The aircraft was released for one time ferry to Danang by SAM/RW and was flown to Danang on the afternoon of September 29th. The 7002 customer arranged popular forces security for the aircraft during the night. This incident could have been handled much more efficiently if our high frequency radios were reliable.

IX. TECHNICAL SERVICES

1. Regional Maintenance Department - The month saw several priority projects and all seemed to be urgent. Our Teletype circuit land line between the airport and the downtown telegraph company was disrupted on several occasions during this month. We executed a priority project to set up a radio link to back up the land line. As soon as CCMENG/SGN obtains the approval to operate the new radio link, then we can close out this project.

2. Aircraft Maintenance - Fixed Wing - We recommended that Saigon Base perform every other number 3 service on C47 aircraft. Thereby reducing maintenance costs of TNN ferry flights and reducing down time from the previous 4 days to Saigon service time of 2 days. It required the number 3 services to be reidentified as 3A and 3B services, with Saigon doing the 3A and TNN doing the 3B. The heavy Xray requirements are on the 3B service. Our proposal was approved and our first 3A service is scheduled for early October. We anticipate no problems to perform these services incountry. Our next proposal will be to do the same on the C46 number three services. In addition we recently started performing No. 2 services on DHC-4 aircraft incountry without serious problems. Now if we are allowed to retain the spare Porter fuselage in Saigon, then our PC6C No. 4 service downtime goes from our standard of 7 days to 3 days as we did our last two No. 4 services in.

3. Rotary Wing - Due to an incident involving one of our aircraft dropping a sling load, all cargo hooks were given a one time inspection, EA 204-25-15 compliance, and a rigging check which resulted in 3 hooks assy's removed for worn parts. An SI was also issued (SI-SGN-204B-002) for a complete check on the next heavy service.

4. General Maintenance - Our emergency power generator (175 KW) developed a burnt field after only 20 hours of operation. Luckily we recently received a 60 KW generator for our Nha Trang Station and short-stopped it for temporary use here. About all we can operate from the 60 KW unit is the RMD Shops Bldg. essential equipment, the Supply Bldg. lighting and the RMD Hangar lights. This results in no power to the Personnel Bldg., the Passenger Terminal, the Cafeteria, the GMD Complex and the Usaid Warehouse. The Operations Bldg. uses a 10 KW unit for radios and Bldg. lighting. Our Transmitter Bldg. utilises two 10 KW generators for its. back up.

Proforma Base one AR's for SGN were submitted for improvement of the water system and to increase the electrical power supply for the South-east Quadrant.

5. Planning/Engineering - On 1 October we input C47 aircraft B829 for a number 3A service. This was the first time any base outside Tainan had attempted a No. 3 service on C47 type aircraft. This particular service also involved several X-ray shots to be taken. On 2 October we received an urgent message from VPTS B829 was sold to a new owner and we were to accomplish several modifications prior to the aircraft departure for VTE on early morning of 7 October. These modifications

included considerable electronics rework, exterior painting, right engine change, replacing of plywood flooring and general weight reduction efforts. The project was completed on schedule though the special attention and hard work of Technical Services Dept..

6. Airborne Electronic - The fusion of communication maintenance and airborne electronics as Electronics Maintenance was a very commendable move. This is a program of adaptability for the personnel. The versability and aptitude of our mechanics in the Electronics Department can be seen in this merger. The new UHF transceiver for teletype link between PTT/SGN and AAM/TSN were all in operating condition. All the units have undergone the simulated test and found satisfactory. Automatic transfer of the PTT telephone pair cables to the UHF transceiver were in fabrication. Final installation will commence as soon as the transfer system and one-fourth timing pulse spped is completed.

7. Training - TCN Flight Mechanic training is progressing on schedule with target date of mid-December. The only problem of any magnitude involving existing TCN Flight Mechanics and potential Flight Mechanics is one of speaking and understanding English. Various situations have been encountered where it become very necessary for the entire flight crew to understand each other on a limited time basis. In these not so rare occasions, it has become apparent that this problem must be remedied for satisfactory operation.

Course in Progress - The Line Service Mechanic Course to qualify [redacted] as Mechanic III is in progress. Basic essentials are given morning and afternoon in the classroom to prepare them for OJT as soon as the requisitioned mechanic tools are received. OJT will be given in the afternoon only.

8. Quality Control - The X-ray workload was up somewhat this month with us X-raying two VTB aircraft to comply with SI 562 and SI 583, both aircraft showed satisfactory results. We also did the X-ray on one C-47 aircraft to comply with TC to IC-47-544 radiographic inspection of flight controls with this aircraft also showing satisfactory results. This X-ray was somewhat of bigger job than we had undertaken before as it required some 63 different shots.

9. Supply - The first DHC-4 No. 2 service performed at Saigon started on 5 Sept. 70 and was completed on 7 Sept 70 as scheduled, without encountering any parts shortage. To increase the stock level authorized for No. 2 services, a completed review was conducted and subsequent stock requisitions forwarded to MMB for replacement action.

The project of assembling 15 Mechanic II tool kits for the newly employed and trained Mechanics was completed this month. Several items are still required, both for these kits and stock. Requisitioning is presently underway, and both kits and stock will be completed upon receipt. In that unit also, the locator cards systems is being brought up to date and expected to be in order during October 1970.

B.D. Mesecher

MONTHLY REPORT
NHA-TRANG
NOVEMBER 1970

GENERAL

Station customer activities decreased slightly from the previous month. This was the result of flight cancellations and delays due to weather.

Heavy monsoon rains continued throughout the month with general flooding in rural and town areas. Absenteeism [redacted] was high and there is evidence of real suffering and loss [redacted]

The Station Manager departed for Home Leave 8 December. The undersigned will undertake this duty until his expected return in mid March.

HOSTEL

The Hostel continued to function with modicum amount of complaints from Crew members. Every effort is being expended to minimize complaints and raise the general standard of service and fomfort.

General repainting of rooms and hallways will begin this month. Paint will be supplied via the Company with Hotel Management supplying labor.

TRAFFIC

Station traffic activites for November decreased slightly in both passenger and cargo movement from the previous month.

TA-L (Pax Service) [redacted] departed station 30 November for thirty day Home/Leave. [redacted] (TA-I) of Saigon Station will fulfill senior duties of the passenger section [redacted]

CUSTOMER RELATIONS

Relations with the customers remain good.

OPERATIONS

Further investigation of possible facilities for relocation of VHF/VHF Motorola unit on Hon-Tre island have resulted in the offer of two(2) inside, temperature controlled locations for Air America use. Once of these will be selected during December and the unit transferred. This will also abviate need for communications van originally intended for this purpose.

Complete 618T transceiver set (Collins) was installed during the month. Voice quality and range improvement is expected after general tests are completed.

Frequency 6.682 MHZ continues poor for station use due to constant outside voice saturation.

Mr. Robert McFarlane (OA/SCR) arrived on station to assume and assist in OM/TM duties during the absence of SC/NMA.

1.3(e)(4)

1. At the end of hostilities in South Vietnam (SVN), whether or not a coalition government is formed there, or if a prisoner of war exchange should occur before the end of hostilities, North Vietnam (NVN) will make impossible demands in order not to comply fully with any agreement that might be made with the Government of Vietnam (GVN) and Allied governments. At the time when a prisoner exchange is to take place, NVN will also demand that all ralliers to the GVN as well as prisoners be returned to NVN. Since the GVN and Allied forces have offered sanctuary to all ralliers, this demand will be impossible to fulfill. However, it will give the NVN Government a reason for not complying fully with the terms of a prisoner exchange agreement and conceivably could be a reason for not returning all American prisoners.

2. As of September 1967, a great deal of proselyting of American pilots was being carried out in an effort to try to convince them to go to other Communist countries as advisers. This was discussed during an official Party briefing Attempts were made to proselyte only those pilots who were considered the most cooperative during their interrogations. No effort was made to convert them to Communism but only to show them that the U.S. was doing great harm both to NVN and throughout the world through its military imperialism. The North Vietnamese claimed the Communist countries needed the advice of American pilots to counter any attack which the U.S. might make against the Communist countries. The NVN Government was successful in convincing some American pilots to accept this offer, and these pilots will be the prisoners which NVN will refuse to return.

MEMORANDUM

DATE: 17 November 1970

REF. No. BMSGN/70/325

TO : VPA IPE

FROM : BMSGN

SUBJECT : October Monthly Report

Saigon Base Monthly Report for October 1970 is forwarded in three copies for your file.

E.J. Theisen

SAIGON BASE
MONTHLY REPORT
OCTOBER 1970

I. GENERAL

1. Total block time for October was 4884 as compared to 6345 for October 1969 and 4705 for September 1970.

2. Locally in Saigon the situation remains quite stable. However on 2 November we have experienced four 122mm rocket impacts across the river from the Majestic Hotel. According to public rumor, the VC are going to reduce their military activities due to insufficient strenght but will increase shelling and terrorism.

3. Facilities Development

AR 2438 - Completion of Concrete Pavement and Drainage Ditch - DAD Completed.

AR 2437 - Improvement of Passenger Lounge -DAD - 70% completed

AR 2422 - Renovation of Operations Bldg - SGN - 50% completed

AR 2449 - Terminal Parking Apron - SGN - 15% completed. Delay is due to daily rainfall.

4. Recent aircraft movement and disposition

204B N8535F depositioned to Udorn on 2 November 1970
C47 5994 placed in storage SGN on 9 November 1970
C-46 N67984 added to 9101 contract
C-46 B910 dropped from contract and will remain as active spare.
PC6 N152L will be dispositioned to VTE on 15 November 1970.
The CORDS VTE at V17 will be replaced with a PC6 on Sunday as they are behind on PC6 minimum.

II. CUSTOMER RELATIONS - Our relations remain excellent.

III. MEDICAL

Number of sick call: 1274
Number of accidents: 38
Hospitalized sick calls : 2
Unhospitalized accidents: 39
Outcalls: 3
Physical Examination: 28
Sick leaves: 143

IV. PERSONNEL

1. The Vietnamese National Police seem to have slacked off in their "apprehend the TCNs" campaign (September Monthly Report refers). Only one of our TCNs was detained during the month. With U.S. Embassy assistance we have been able to obtain substitute documentation from the Ministry of Interior showing that our employees are legally in country. This substitute documentation has proved acceptable to the National Police and appears to be keeping our employees out of the pokey.

2. To date there has been surprisingly little reaction to the partial devaluation from employers (both commercial and contractor) and Vietnamese workers. Company postures are still pretty much "Let's wait and see"; and Vietnamese workers, while asking for increased wages and salaries, are doing so in very moderate tones. The workers' temperance seems almost unnatural, especially in view of the fact that prices of essentials (especially foodstuffs and rents) have increased appreciably since devaluation. We are spending a good bit of time keeping abreast of this situation.

3. After an upsurge just following the devaluation, the open market rate for piastres seems to have settled down. The open market rate is now approximately VN$415-525 to US$1.

4. Personnel strength - Saigon Base

V. OPERATIONS

1. Flight time report (See attachment A)
   Ground Fire Incidents Report (See attachment B)
   Accident Reports

Date	A/C Type/No.	Location	Remarks
29 Sept (not reported in Sep)	204B/N1303X	Approx 21 miles N.E. of Danang	While inflight noted a strong smell - while smoke also coming from the engine area. A precaution landing was made. Later flown to DAD & engine changed. Possible No. 1 bearing carbon seal malfunction.
05 Oct	PC/6C/N153L	V-163	During landing roll-out prop contacted single strand of concertina wire on runway. Minor damage to two prop. tips. Prior to landing pilot over-headed the strip, however, he did not note the wire obscured by grass.

2. Ground Transportation

Aggregate microbuses mileage: 24868 km approx 15542 miles
Total microbuses down-time: 97 hrs 12'
Total microbuses pax carried : 3468 pax
Isuzu bus mileage: 5149 km approx 3218 miles
Total isuzu bus down-time: 118 hrs 30'
Isuzu bus pax carried: 11840 pax
Supply vehicle mileage: 2224 km approx 1390 miles
Supply vehicles down-time: 165 hrs 42'

VI. TRAFFIC/AAM

1. GMD is working on the parking apron in front of the terminal via Commercial contract. Heavy rains have interfered with scheduled completion date but will be a great improvement upon completion.

2. Training Terminal and Ramp Agent recurrent training was conducted during the month to review and realign daily procedures.

	September	October
Passengers departures SGN (all contracts)	5,313	5,670
Passengers arrivals SGN (all contracts)	5,938	6,007
Outbound cargo SGN	46,099	64,044
Inbound cargo SGN	54,996	63,010

TRAFFIC/USAID

1. One Senior Clerk position and one Clerk One Position were cancelled effective 31 October 1970.

Cargo (including AF Caribou A/C)

	September	October
Outbound (lbs) SGN	416,031	657,622
Inbound (lbs) SGN	66,607	194,919

VII. FLYING

1. The taxiway vehicle traffic was cut considerably by virtue of the ramp being torn up and the parking-lot/ramp gate being closed to all traffic. However as might have been expected the vehicles were not to be denied. They now are delivering many of their passengers to the ramp side of the passenger terminal.

2. On 7 October we had an MPC conversion which didn't catch too many by any great surprise, except possibly Air America.

3. The annual cost reduction program came up once more and we were asked to cut personnel from our rosters. That same old "Bug-a-boo" concept of transferring crews permanently to the outstations naturally came up again. The same old arguments were presented again with an additional factor considering FEPA/Company agreement. Hopefully this consideration for transferring crews to outstations will again be shelved.

4. The 70-10 Bid awards were received with mixed emotions. Most of the bidding went pretty much as was expected, but there were naturally a few disappointments. With that out of the way, we initiated action to firm-up the 1970 leave schedule.

5. During the month we had several cases of theft, one known case of being shot at and another that was observed. While leaving a party for Mr. Hana at a downtown restaurant, MPD and A/MF/.h both had their watches stolen. While returning from Long Binh on the Bienhoa Highway, MPD had a number of shots fired at his car.

VIII. TECHNICAL SERVICES

1. The unreliable C46 situation has improved. We are now back to about routine maintenance.

2. The ramp access gate which we closed and locked on 2 October has not been opened once during the month and it goes without saying that we have proven we can survive with it closed. The biggest complainers about our efforts of restricting access of private vehicles to the ramp were always the pilots. It sure made that area of the taxiway a lot safer for our employees using the crosswalk and the pilots no longer had to fear cars darting onto the ramp and driving down the south taxiway.

3. The renovation of the Operations Building is progressing at snails pace. The contractor started the work on 20 July with a 2 month projection to complete. Based on recent talks with him he now hopes to complete the project by about 20 November.

The same contractor (A&M) is working on the project of repaving the passenger terminal parking apron, which is scheduled for 6 weeks to complete. He started on 2 October but has lost about 10 days because of almost daily raining from the typhoon weather recently.

4. Our second training course, to produce more TCN flight mechanics for the 204B Helicopters is scheduled to begin on 2 November. The group has already completed the basic Helicopter maintenance training and the 204B maintenance training portions. In mid-November they will start some six weeks of actual OJT flying. This final phase includes one week assignments at each sub-base in country and sling load flight training. The group is developing very well and we are quite proud of the quality of these men.

E.J. Theisen
Base Manager - SGN

SECRET

Talks Falter

Economic negotiations between the Cambodians and the South Vietnamese were suspended without agreement on several major issues when the Saigon cabinet withheld approval of agreements covering trade relations. The Cambodians, for their part, balked over Saigon's request for a $38 million "contribution" from Phnom Penh to help defray costs of South Vietnamese military operations in Cambodia. Although South Vietnamese intransigence may be largely a bargaining ploy for the next unscheduled series of talks in Phnom Penh, such apparent bad faith likely did not sit well with some Cambodian leaders who are already hypercritical of their Saigon allies. *(SECRET NO FOREIGN DISSEM)*

• • •

Thailand: *Insurgent Prospects Improve*

The insurgent movement in northeast Thailand is continuing to rebound from the setbacks suffered during the 1967-68 period. During the past rainy season, the insurgents concentrated on improving their organization and village support network in traditional operating areas rather than significantly expanding their armed strength—which remains around 1,500—or attempting to move into new operational sectors. There is evidence, however, that for the first time in the northeast the insurgents have established a secure base, in the Duong Luang area of Nakhon Phanom Province. This region has been the most active insurgent area since the movement in the northeast began in 1965.

In addition to supporting the training and indoctrination of insurgents and the filling out of quasimilitary village units, the base has facilitated an increase in external support for the insurgency. Chinese AK-47 rifles reportedly have been infiltrated into the region from Laos in increasing numbers, and there are indications that more Thai cadre who have been training in China and North Vietnam are returning to the area. There is also limited evidence suggesting an increase in the links between insurgents and their sympathizers in urban areas.

Despite their improved capabilities, the insurgents have avoided large-scale or highly visible actions. Increased terrorism and harassment of the government's fledgling village defense forces are designed to gain the initiative without prompting a major government counteroffensive. Such tactics are effectively playing on both Bangkok's belief that the insurgency in the northeast is well in hand and the Thai Army's desire to turn over its counterinsurgency role to police and civilian agencies.

With the deteriorating situations in Cambodia and Laos providing the pretext, the 2nd Army has since midsummer reduced its counterinsurgency force commitment in the northeast by two thirds, or to less than 1,000 troops. Moreover, the army now is under orders to engage in suppression operations only in response to emergency situations. *(SECRET NO FOREIGN DISSEM)*

• • •

Laos: *The Southern Campaign Begins*

Communist forces overran several key government positions on the Bolovens Plateau in a series of closely coordinated attacks on 22 November. The enemy captured two main irregular bases, Sites 26 and 38, northwest of Attopeu as well as four other outposts in the same general area. Two other sites, about 15 and 30 miles north of Attopeu, were also captured.

1.3(a)(4)

Summary: The Lao Dong Party Central Committee, based on experience gained during the French resistance, established policies regarding U.S. prisoners of war which included exploiting each prisoner to the fullest extent possible. Exploitation of the prisoners was carried out by either or both the Ministry of National Defense (MND) and the Ministry of Public Security (MPS), depending on such criteria as time and circumstances of capture, current tactical and strategic objectives, and long-range potential of individual prisoners. Information on or from the U.S. prisoners was shared with other Communist countries, principally the USSR and Cuba. End Summary.

1.3(a)(4)

1. (Field Comment: In the following report [redacted] was vague and inconsistent on the exact roles played by the MPS and the MND in prisoner of war exploitation, possibly indicating that his interpretations of the delineation of responsibility between the MND and the MPS may be based on only general information. He gave a much larger role to the MPS than did several other sources whose access to this information was much more direct, although less broad, [redacted] One source claimed that the MPS conducted no interrogations at the Hoa Lo Prison, whereas other sources reported a limited role for the MPS in this field.)

1.3(a)(4)

2. North Vietnamese policy, as set forth by the Central Committee of the Lao Dong Party, concerning the handling and exploitation of U.S. prisoners of war was based on Viet Minh policy towards prisoners who had been captured during the French resistance and knowledge of prisoner exploitation which North Vietnam (NVN) had acquired from both the USSR and Communist China. The policy also drew upon the personal experiences of senior members of the NVN Government who at various times had served in French prisons or prisoner of war camps.

3. The capture of U.S. and other prisoners of war was considered the responsibility of every agency, facility and citizen in NVN. The initial screening and subsequent exploitation of each U.S. prisoner depended on the place, date and circumstances of capture and the criteria for classifying prisoners into categories. /During the period of heavy U.S. bombing of NVN and the resulting destruction of transportation facilities, the established procedures for handling prisoners of war and for evacuating them to central NVN establishments were modified somewhat. The proximity to Hanoi of a province where a prisoner was captured and the availability of transportation were primary considerations affecting the immediate exploitation of a prisoner and his prompt transfer to Hanoi. Consequently, while Hanoi was subjected to heavy aerial bombings, representatives of the MPS and/or MND, depending on which was in possession of the prisoner, traveled to the province to exploit the prisoner locally until arrangements could be made for his transfer to Hanoi.

4. Information obtained from a prisoner at each level was recorded in detail and incorporated into a "Preliminary Personal Record." The information was correlated with that already acquired on the prisoner from other sources, including, if the prisoner were a pilot, information on his aircraft, its flight plan, tactics, apparent targets and accompanying aircraft. The apparent targets were deduced from information received from the antiaircraft unit which shot down the plane and from units responsible for the physical security of the targets. This information was used to help establish the veracity of the information provided by the prisoner and to aid NVN's defense of the targets.

5 4 3 2 1

1.3(a)(4)

5 4 3 2 1

NND 927660-151

1.3(a)(4)

5. Exploitation of the prisoner depended upon the category in which he was placed. The categorization of prisoners depended upon the affiliation of the initial capturing/screening unit; the extent to which the prisoner had been exploited prior to his transfer to Hanoi; the prisoner's apparent areas of knowledgeability as established during preliminary screening; the prisoner's age, grade, intelligence, position and degree of cooperation; evidence of possible compromise of security within a element of the NVN Government; possibility of escape by the prisoner, and the national origin of the prisoner.

6. Prisoners handled by public security service elements when captured were transferred to MPS facilities, and prisoners handled initially by military elements in the provinces were transferred to MND detention facilities in Hanoi. The MND interrogated prisoners for tactical and strategic military information, and the MPS interrogated for political, scientific, economic and, to some degree, military information. The MND was not interested in long-range exploitation of prisoners, and it confined its activities primarily to the collection of tactical and strategic military information, with little time given to longer range objectives. The responsibility of the MND was considerably broader than that of the MPS in collecting tactical and strategic military information. Information collected by the MND was passed to the MPS Combined Research Agency for review to determine if requirements from other government agencies had been satisfied. Information collected by the MPS was similarly passed to the MND. (Field Comment: [redacted] did not know what requirements from other NVN agencies were serviced. He was not acquainted with the specific MND elements involved in this, other than the information was passed to the MND's Intelligence Department /Cuc Tinh Bao/.)

1.3(a)(4)

7. The assignment of a prisoner to either the MPS or the MND depended not only on factors enumerated in paragraph 5 but also on the prisoner's "Preliminary Personal Record" and on the MND or MPS screening which occurred at the central level upon the prisoner's arrival in Hanoi to determine more precisely the prisoner's areas of knowledgeability. The ensuing interrrogations, whether conducted by the MND or the MPS, included the following:

a. Enemy combat tactics, techniques and order of battle.

b. Enemy personnel, morale, fighting spirit and motivation factors.

c. Enemy weaponry, technical equipment and war materiel, with especial attention to enemy use of armor and armored vehicles.

d. Enemy knowledge of the Viet Cong (VC) and North Vietnamese Army (NVA) forces in South Vietnam (SVN) generally, and specifically in the prisoner's activity and field of interest.

e. History of enemy presence in SVN, units and activities.

f. War-making potential of the enemy and his units both in SVN and other areas where enemy support and reinforcements could be obtained.

g. Nature of coordination and cooperation between U.S. and other Allied units, including relationship between Allied units and the Army of the Republic of Vietnam (ARVN) forces.

h. Economic war-making potential of the U.S., concentrating on information regarding production capabilities of U.S. war-related industries.

5 4 3 2 1

5 4 3 2 1

1.3(a)(4)

i. Social class origin of members of U.S. military services. [redacted] the MND reportedly had established that most members of the U.S. Air Force were from the wealthier social class, whereas infantry and artillery troops were from the poorer, less-educated social class.) 1.3(a)(4)

j. Professional background, psychological makeup and aspirations of the prisoner.

k. General knowledge and comprehension of Americans in SVN of the military, political and economic situations in SVN and other countries.

l. Behavior, mental attitude and viewpoints of Americans while under combat stress in SVN.

m. Professional backgrounds and previous assignments of other U.S. prisoners in NVN.

n. Effect of NVN's ideological indoctrination programs on U.S. prisoners in NVN and results of NVN military proselyting efforts in SVN.

8. Interrogations were aimed at gaining the complete cooperation of a prisoner so his services could be employed in anti-war activities such as letter writing to Americans in the U.S., including not only relatives and friends but also individuals whose names had been obtained from other prisoners; making pro-NVN and anti-U.S. radio broadcasts; and other forms of propaganda. After a prisoner had cooperated, he might be employed in technical fields where his specialized knowledge could be used. U.S. prisoners were indoctrinated to adopt a friendly attitude toward NVN and upon their return to the U.S. to convey a pro-NVN, anti-war feeling to their families, friends and relatives. [redacted] this followed the example of Viet Minh proselyting activities against French prisoners. The Viet Minh objective was to recruit as many French prisoners as possible to foment revolutions against the French Government and the governments of French-dominated countries. [redacted] the MPS and MND did not believe that U.S. prisoners could be successfully proselyted into attempting a revolution in the U.S.) 1.3(a)(4)

Vietnam: *Fallout from Son Tay*

Hanoi appears to have taken a down-to-earth "war is hell" attitude toward the Son Tay raid and US air strikes a fortnight ago. A high-level and knowledgeable North Vietnamese official reportedly said last week that Hanoi did not consider Son Tay an escalation and will not make US air attacks a major issue. He explained that the Communists realistically expect the US to continue aerial reconnaissance over the North and to retaliate when these flights are challenged. The threat of reprisals, however, would not deter the North Vietnamese from trying to shoot down the planes, but, the official went on, Hanoi was not of a mind to allow such matters to seriously jeopardize the Paris talks.

This attitude has been reflected in the way the Communists have played the affair: their propaganda has been noisy, but it has not gone beyond the position Hanoi has taken on reconnaissance since the bombing halt two years ago—that reconnaissance is a violation of North Vietnamese sovereignty and that the Communists will make every effort to stop it. Air strikes, however, are termed in propaganda as a violation of the US agreement to stop the bombing. In more than two years Hanoi never has raised these as excuses to either stall or break off the talks.

Despite its apparent relaxed attitude about some aspects of the air and commando raids, Hanoi is plainly embarrassed and wary that they were brought off with such ease and it is trying hard to plug the holes in North Vietnam's internal defenses. A flood of domestic broadcasts has reflected new measures, under close party control and high level military supervision, designed to ensure faster and more effective reactions from both militia and regular army units in the countryside. There has been mention of 24-hour watches, better coordination, harder training, and many more outposts, sentinels, and bunkers. Aside from shoring up the North's defenses Hanoi probably is seeking to fire the collective energies of the North Vietnamese populace to the level prevalent earlier in the war, but which has flagged since the US bombing halt in 1968. Hanoi may also harbor some hope that by painting an impressive picture of fortress North Vietnam, the allies may be dissuaded from mounting new commando assaults.

With so much attention riveted on POWs, Hanoi also has taken some steps to dress up its image on the prisoner question. The Foreign Ministry last week broke with past practice and provided to a Western diplomat information that first had been requested more than 18 months ago on the whereabouts of missing American pilots. Radio Hanoi also has started to broadcast brief taped holiday messages from US captives as in past years. A fairly prominent Western journalist, moreover, has been invited into North Vietnam and he almost certainly will be permitted to film American POWs. The overriding considerations for Hanoi are its image and its belief that eventually it will be able to squeeze some concessions from Washington in return for a general prisoner release. Although neither a tougher policy toward captives nor any wholesale releases are likely, some additional gestures such as providing more information on missing American airmen may be made to lend weight to Hanoi's professions of leniency.

Troops, Supplies Move in High Gear

Hanoi is continuing to send substantial numbers of troops, both replacements and complete units, down the infiltration trail this dry season. Some 17,100 North Vietnamese soldiers set off in November, the highest monthly total since February 1969. Over half are earmarked for COSVN, probably for duty in Cambodia; about 4,400 are

headed for northern South Vietnam; and about 2,500, including a regiment of North Vietnamese regulars, are most likely bound for southern Laos. A minimum of four other regular regiments have also started south since September. One clearly is going to COSVN, two are now in southern Laos and a fourth is just above the DMZ. Moreover, two division headquarters are moving south through North Vietnam and one is nearing the Lao and South Vietnamese borders.

Although threats now have developed against the northern provinces and lower Military Region I of South Vietnam, and the central and southern sector of the Lao panhandle, the pattern of over-all Communist dry season deployments in Indochina still is unfolding. It seems clear that many of these units are still on the move while others have been assigned to protect the vital Communist supply arteries running the length of Laos.

Communist truck movements in the Laotian corridors have again increased after several weeks of reduced activity caused by unexpected heavy rains and intensified bombing. [redacted] logistic organizations as far south as the confluence of the Cambodia, South Vietnam, and Lao borders are handling truck and waterborne cargo. Various sources confirm a recent sharp increase in truck traffic on two main North Vietnamese passes into Laos and around the western end of the Demilitarized Zone. It will be several weeks, however, before the substantial quantity of supplies now moving will reach the tri-country border area.

The level of resupply during the latter part of November was apparently higher than that of a year ago. This trend is likely to continue. During this dry season the Communists will have to send more supplies just to maintain the force structure and level of fighting of recent months in Laos and South Vietnam. Increased materiel will be needed to offset losses caused by allied incursions last spring, the rainy season depletion of stocks, the loss of the Sihanoukville supply route, and the new need to supply increased tactical and rear service forces in Laos and Cambodia.

Action Picks Up in the South

In South Vietnam, Communist military activity picked up this week, but still featured the small actions that the enemy has been emphasizing for over a year and a half. The enemy shelled several province capitals and numerous smaller towns and military bases throughout the country. Casualties and damages were generally light.

The sporadic timing of the attacks reflects the current Communist practice of letting local field commanders set their own timetable for action. This permits the enemy to take advantage of local conditions and strike when ready—in contrast to previous so-called "highpoints," that were generally well coordinated and often captured headlines abroad.

Individually these attacks seldom inflict heavy casualties or damage, but they are cumulatively substantial. For example, the Communists have succeeded in overrunning some 65 government outposts in the Mekong Delta so far this year. Although scattered successes on this scale have not rolled back pacification gains, they do help create a significant amount of insecurity in rural areas where the government is trying to consolidate its control.

Despite Communist emphasis on guerrilla tactics and other economy-of-force methods to keep their losses down, South Vietnamese forces have triggered clashes that were costly to the enemy, especially in the Mekong Delta. Late last week, for example, heavy ground battles developed in three delta provinces as the result of aggressive ARVN operations. Stepped-up US and

South Vietnamese operations in the coastal lowlands of the northernmost provinces comprising MR 1 have also flushed out concentrations of enemy forces and accounted for over 400 Communists killed there each week.

Some South Vietnamese commanders are reorganizing their forces to improve their performance in the many localized actions. For example, Major General Dzu, who assumed command of MR 2 last August, has directed his two divisions to operate in small units rather than in the often cumbersome multibattalion operations of the past. He has given his territorial security forces—Regional Forces and Popular Forces—a new system of goals and quotas to encourage more aggressiveness against the enemy. Already, Dzu claims that the ratio of enemy-to-friendly casualties has risen markedly since last summer. [redacted]

1.3(a)(4)

SUMMARY--PRISONERS APPREHENDED BY THE VIET CONG /VC/ IN TUYEN DUC PROVINCE WERE DIVIDED INTO THREE CATEGORIES--THIRD COUNTRY CIVILIANS, ALLIED AND ARMY OF THE REPUBLIC OF VIETNAM /ARVN/ SOLDIERS, AND GOVERNMENT OF VIETNAM /GVN/ OFFICIALS. THIRD COUNTRY CIVILIANS, WHOSE BACKGROUNDS AND REASONS FOR BEING IN VIETNAM WERE INVESTIGATED BY THE VARIOUS VC INFRASTRUCTURE /VCI/ MEMBERS IN WHOSE JURISDICTION THEY LIVED, USUALLY WERE RELEASED UNHARMED. ALLIED PERSONNEL AND ARVN SOLDIERS USUALLY WERE RETAINED IN PRISONER OF WAR /POW/ STATUS. GVN OFFICIALS WERE GIVEN WARNINGS BY VCI MEMBERS AND ASKED TO ACCOMMODATE THE VC--IF THESE WARNINGS WERE IGNORED, THEY WERE EXECUTED. THIRD COUNTRY CIVILIANS, ALLIED PERSONNEL AND ARVN SOLDIERS WERE NOT EXECUTED UNLESS SPECIFIC ORDERS WERE RECEIVED FROM VC MILITARY REGION 6 /MR-6/ HEADQUARTERS. THE NORTH VIETNAMESE ARMY /NVA/ 810TH MAIN FORCE /MF/ BATTALION PROVIDED THE DETENTION AND COURT FACILITIES FOR ALL INDIVIDUALS CAPTURED BY THE VC IN TUYEN DUC PROVINCE. END SUMMARY.

1. ALL PERSONS DETAINED BY THE VC IN TUYEN DUC PROVINCE, EITHER BY INTENTION OR CHANCE ENCOUNTER, WERE DIVIDED INTO THREE CATEGORIES--THIRD COUNTRY CIVILIANS, ALLIED AND ARVN SOLDIERS, AND GVN OFFICIALS. PROCEDURES FOR HANDLING THE DETAINEES WERE BASED UPON THESE CATEGORIES.

2. CHANCE ENCOUNTERS WHICH RESULTED IN THE CAPTURE OF THIRD COUNTRY CIVILIANS REQUIRED THAT THE INDIVIDUAL BE DETAINED WITH MINIMUM DURESS, DEPENDING ON THE CIRCUMSTANCES OF CAPTURE, SUCH AS RESISTANCE BY THE INDIVIDUAL, OR THE NATURE OF THE INCIDENT WHICH BROUGHT ABOUT THE CAPTURE. THE POSSESSION OF ARMS, CONCEALED OR NOT, HAD NO EFFECT UPON THE TREATMENT OF THE CAPTIVE, AS MOST CIVILIANS CARRIED WEAPONS. UNLESS THE INDIVIDUAL REQUIRED MEDICAL

1.3(a)(4)

TREATMENT, HE WAS IMMEDIATELY TAKEN TO THE 810TH NVA MF BATTALION SECURITY SECTION FOR INTERROGATION. THE PERSON WAS QUESTIONED AND HIS POSSESSIONS AND DOCUMENTS WERE EXAMINED. HE WAS REQUIRED TO EXPLAIN HIS PRESENCE IN THE IMMEDIATE AREA AS WELL AS HIS REASON FOR BEING IN VIETNAM. IF HE WAS FROM THE LOCAL AREA, THE 810TH NVA BATTALION SECURITY SECTION FORWARDED THE RESULTS OF THE INTERROGATION TO THE PROVINCIAL COMMITTEE OR THE DALAT CITY COMMITTEE, DEPENDING ON WHERE HE LIVED. THE RESPECTIVE COMMITTEE ASSISTED THE INVESTIGATION BY CONTACTING VCI MEMBERS, WHO DETERMINED THE VALIDITY OF THE PRISONER'S EXPLANATION, RESIDENCE, OFFICE ADDRESS AND BIOGRAPHICAL DATA. IF THE PERSON WAS FROM A DISTANT CITY, THE PROVINCIAL COMMITTEE CONTACTED VC MR-6 HEADQUARTERS, WHICH IN TURN CONTACTED THAT CITY COMMITTEE FOR IT TO CONTACT ITS CITY UNITS OF VCI. THE 810TH BATTALION USED A CHINESE COMMUNIST-MANUFACTURED RADIO SET, MODEL 102E, TO CONTACT THE PROVINCE COMMITTEE, VC MR-6 HEADQUARTERS, AND THE DALAT CITY COMMITTEE. /FIELD COMMENT-- [redacted] WAS NOT FAMILIAR WITH HIGHER LEVEL NOR LATERAL LEVEL COMMUNICATIONS DEVICES OR PROCEDURES. VC MR-6 INCLUDES GVN BINH TUY, LAM DONG, BINH THUAN, NINH THUAN AND TUYEN DUC PROVINCES./ THE RESULTS OF THE INVESTIGATION DETERMINED THE DISPOSITION OF THE PRISONER. ALL THIRD COUNTRY CIVILIANS WHEN ARRESTED WERE CONSIDERED PRISONERS OF WAR /POW/, BUT PROOF OF CIVILIAN STATUS AND CORRECTNESS OF EXPLANATIONS COULD REVERT THEM TO A STATUS UNDER INTERNATIONAL LAW AND THEY COULD BE RELEASED. THE PERIOD OF TIME FOR THEIR DETENTION WAS BASED PRIMARILY UPON THE TIME THE VCI NEEDED TO INVESTIGATE THEIR CLAIMS. IF THE EXPLANATION WAS DISPROVED AND IT WAS DETERMINED THAT THE PERSON WAS ENGAGED IN MILITARY OR POLITICAL DUTIES, HE WAS RETAINED IN THE STATUS OF A POW AND PROCESSED ACCORDINGLY. A PROVISION EXISTED FOR THE EXECUTION OF THIRD COUNTRY CIVILIANS, BASED UPON AN ORDER FROM VC MR-6 OR A HIGHER COMMAND. SPECIFIC ORDERS EXISTED, HOWEVER, THAT THIRD COUNTRY CIVILIANS WERE NOT TO BE EXECUTED UNLESS THE ORDER FOR EXECUTION WAS RECEIVED. /FIELD COMMENT-- [redacted] KNEW OF NO SUCH EXECUTIONS./

1.3(a)(4)

1.3(a)(4)

1.3(a)(4)

3. ALLIED MILITARY PERSONNEL AND ARVN SOLDIERS WERE DIVIDED INTO TWO CATEGORIES, BASED UPON WHETHER OR NOT THEY WERE CAPTURED OR HAD SURRENDERED. ALL WERE CONSIDERED POW'S, BUT THOSE WHO HAD SURRENDERED RECEIVED PREFERENTIAL TREATMENT BY THE 810TH BATTALION. /FIELD COMMENT--HONG DID NOT KNOW IF THIS DISTINCTION WAS MADE BEYOND THE JURISDICTION OF THE 810TH. SEE CS-311/00093-71 WHICH DESCRIBED THE TREATMENT AND QUESTIONING OF AN AMERICAN POW WHO WAS CAPTURED IN TUYEN DUC PROVINCE./ THE PRISONERS WERE NOT TO BE EXECUTED UNLESS VC MR-6 SO ORDERED. 1.3(a)(4)

4. GVN OFFICIALS WERE SPOTTED FOR WARNINGS, KIDNAPPING OR EXECUTION BY THE VCI IN THEIR AREA. THE LOCAL VCI COULD RECOMMEND THE NAME OF A GVN OFFICIAL TO A LOCAL ACTION ARROW TEAM /AAT/ WHICH THEN PLACED THE NAME ON A BLACK LIST. THE AAT CONTACTED THE DALAT CITY COMMITTEE FOR ITS RECOMMENDATION AS TO PUNISHMENT FOR THE GVN OFFICIAL. A NEWLY-EMPLOYED GVN OFFICIAL WAS GIVEN A WRITTEN OR ORAL WARNING TO TERMINATE HIS EMPLOYMENT OR TO ACCOMMODATE THE VC. GVN OFFICIALS WITH TWO OR THREE YEARS OF EMPLOYMENT AND THOSE WHO DISREGARDED THE WARNINGS, WERE KIDNAPPED FOR INDOCTRINATION. GVN OFFICIALS WHO CONTINUED TO DISREGARD THE INDOCTRINATION OR THE VCI INSTRUCTIONS WOULD BE ORDERED EXECUTED. ORDERS WERE SENT FROM THE DALAT CITY COMMITTEE TO THE PROPER AAT FOR EXECUTION. IF THE GVN OFFICIAL DID NOT RESIDE WITHIN THE DALAT CITY COMMITTEE AREA, THE PROVINCIAL COMMITTEE SERVED THE NOTICE. ALL AAT AND VCI MEMBERS WERE ORDERED NOT TO ENGAGE IN EXECUTION OR KIDNAPPING WITHOUT SPECIFIC INSTRUCTIONS.

5. EXECUTIONS WERE USED AS A PUNISHMENT FOR CRIMES COMMITTED BY VC AND MEMBERS OF THE NVA. THE 810TH BATTALION SERVED AS A COURT, BUT THE FINAL DECISION IN CAPITAL CASES RESTED WITH VC MR-6 HEADQUARTERS. /FIELD COMMENT--[redacted] SAID HE HAD NEVER KNOWN OF AN EXECUTION NOR OF OFFENSES COMMITTED THAT HAD BEEN PUNISHABLE BY EXECUTION./ 1.3(a)(4)

6. FIELD DISSEM--STATE, USMACV, USAID, CORDS, DIR/JUSPAO /MR. NICKEL ONLY/, 7TH AIR FORCE, USARV, NAVFORV, 525TH MI GP, 6499 SAG, OSI, CINCPAC, PACFLT, PACAF, ARPAC [redacted] 1.3(a)(4)

CIA HISTORICAL REVIEW PROGRAM
RELEASE IN FULL 1998

6 January 1971

MEMORANDUM

SUBJECT: Khrushchev on Vietnam

In Chapter 19 of his reminiscences, Khrushchev argues that the Chinese have been and are likely to continue exercising a good deal more influence in Hanoi than do the Soviets and that this not only is inimical to Soviet interests, but is unhealthy for the Vietnamese Communist effort in Indochina. He accuses Peking of waffling in its support to the Viet Minh in the crucial days of 1954 and of failing to cooperate with Moscow in trying to hammer out a common approach to Indochina during the 1960 World Communist Conference. At the latter meeting, Khrushchev says that Ho Chi Minh urged the Soviets to yield on some points to the Chinese lest a rupture develop that would benefit no one, and least of all, Hanoi. Following the Moscow-Peking break, Khrushchev asserts, China began to lead the Vietnamese Communists "around by a halter" and used its considerable influence among the many "pro-Chinese" in the North Vietnamese Party to sour Hanoi's relations with Moscow. This hostility persisted, he laments, despite continued Soviet aid to the Vietnamese. Khrushchev advances the proposition, albeit cautiously, that Hanoi in the wake of Ho's death is likely to be under Peking's sway even more and that Moscow's relations with the Vietnamese are likely to worsen further.

Whatever the merits and authenticity of the rest of Khrushchev's memoirs, we think that his argument in this chapter is particularly self-serving and, in the main, rests on an over simplified view of the facts of life in Hanoi and on dubious inter-

pretations of some not-so-solid evidence. Moreover, his line has a suspiciously familiar ring to it; it is very much like the line that the Soviets long have pushed with US interlocutors about how they and the Chinese get on with Hanoi. Presumably in these cases the Soviets are trying to persuade the US to "do something" to strengthen the Soviet hand in Hanoi, but Khrushchev's statements suggest that Moscow's sensitivity to real or imagined slights from Hanoi is genuine and deep-seated.

We doubt that pro-Chinese or pro-anything tendencies weigh overwhelmingly in Hanoi. What does count is the war and, in a foreign policy context, Hanoi's perception of how Soviet or Chinese policies mesh with its own. It is true, for instance, that Hanoi edged closer to Peking and away from Moscow in the early 1960's, but mainly because Khrushchev himself turned his back on the North Vietnamese effort in the South, which was then greatly expanding and required outside assistance. The most telling example of this, of course, was his reaction to US retaliatory raids after the Gulf of Tonkin incident in August 1964. All that Khrushchev provided was propaganda support, and it was rather mild at that. Mao, on the other hand, immediately sent the North Vietnamese a squadron of MIGs. It was only after Khrushchev was ousted that Moscow became involved in a big way. Even when the Soviets were on the sidelines, however, North Vietnam was never a Chinese Communist lackey.

To support his contention that Moscow's relations with Hanoi are likely to sour even more, Khrushchev cites, among other things, Ho Chi Minh's will and "the famous speech by Le Duan" (the latter could be either Duan's funeral oration or the long treatise published last February). He makes much of the omission from Ho's will of any expression of gratitude for Soviet wartime aid to Hanoi -- assistance which he asserts has been indispensable to the Vietnamese war effort and irreplaceable from any quarter including China. In fact, these documents provide no basis for

conclusions on how Hanoi might lean; indeed, neither even directly addresses the issue. Ho's testament comes closest when it makes a rather explicit plea for an end to the Sino-Soviet rift; but it does so in a neutral way. It thanks no one by name for aid, only "the fraternal countries of the socialist camp, and friendly countries in the whole world."

Khrushchev obviously was impressed by Ho--as indeed most Westerners were. Even Ho, however, was allegedly viewed with suspicion when he tried to follow what we would consider a nonpartisan policy vis-a-vis the Soviets and the Chinese. Nonpartisanship in Hanoi without Ho would naturally be the object of even greater suspicion. We think, in other words, that Khrushchev's perception of North Vietnam's attitude toward Moscow was warped by a number of subjective factors: the natural "they're-either-for-us-or-against-us" outlook of a man deeply embroiled in the Sino-Soviet dispute; and perhaps also the distrust one might expect a Ukrainian peasant to have for inscrutible Orientals, whether in Hanoi or in Peking. Even more to the point, however, is the indication in his memoirs that Khrushchev could not, or would not, admit that Hanoi's antipathy toward his stewardship, was occasioned largely by his own reluctance to give the North Vietnamese strong support.

NEW MOBILIZATION GROUP MEETS PRESS IN HANOI

[Article: "You Have Helped Us Achieve A Better Understanding of Many Profound Issues"; Hanoi, Thong Nhat, Vietnamese, 20 November 1970, p 8]

Recently, a delegation of the New Mobilization Committee in the United States for ending the war in Vietnam visited our country. Before departing for home, the American friends happily expressed the following sentiments to a reporter from the newspaper Thong Nhat ("Reunification"):

Mr. Anthony Ac-gi-von (phonetic): "Before visiting Vietnam, I had participated in a number of pro-Vietnam activities. I learned about Vietnam through books and through articles written by people who had been to Vietnam. I knew from films that Vietnam is very beautiful. These facts impelled me to want to visit Vietnam in order to obtain a better understanding and, at the same time, to try to find out the truth about the war which the U.S. government is waging here so that, when we return home, we can intensify our struggles in the United States to end the aggressive war in Vietnam.

EX-104 REC-26 62-111181-4918

The realities of your country have helped me to achieve a better understanding of many profound issues. This is especially true in regard to the matter of the struggle against the Americans during the war of destruction in North Vietnam. You demonstrated very strong determination, reflected in combat and production. This proves that the Vietnamese people are fully capable of overcoming all difficulties in order to fight and produce. Even the Vietnamese teenagers and children have made a beautiful impression on me. The teenagers and children of Vietnam are very courageous, joyful, and so forth.

9 FEB 23 1971

The U.S. government's war in Vietnam has given rise to a resistance war right in the United States. Numerous organizations have been established for various age groups, and each has its own methods of operation appropriate to the character of its struggle. Recently, these organizations have attracted greater participation, particularly among the poor. Some organizations have reorientated their struggle, from the point of initially struggling only

for their own happiness to the point of gradually recognizing that the immense expenditures for the war in Vietnam are swallowing up all of the funds for their welfare. Consequently, they have begun to struggle against the war. This is likewise true of new activists organizations among American soldiers. The reason that these organizations are struggling with their increasing strength is that they have clearly recognized the relationship between their interests and the war. They are conducting more and more struggles in order to keep from going to Vietnam. In the past, anyone who was drafted but failed to report or tore up his draft card, was thrown in jail by the government. At present, with more than 50 percent of the draftees failing to report and a constantly increasing number of people tearing up their draft cards, the American government has been revealed as ineffective in face of this movement.

The constant intensification of the movement of U.S. youth against military service has created a major obstacle for the American government. The earlier burning of the military recruitment camp in Philadelphia was a major victory for us. The burnt military recruitment lists have prolonged the military recruitment time for supplying the war in Vietnam, and so forth. Our struggles definitely will achieve many more successes in the future and so forth.

My first visit to Vietnam was also my first visit to a socialist country. I have clearly recognized the beautiful system through your equality in your way of life and in your work and social activities. I think that this is the essence of the socialist society.

(Phil Lawson)

Mr. Phin Lao-son: I bring with me two major ideas on my visit to Vietnam: first of all, I think that we are friends. I am visiting Vietnam as a fellow combattant. I also think that the people of North Vietnam have defeated the United States. Therefore, I want to visit Vietnam in order to study your experiences and struggle methods in order to go home to apply them to the struggle in our country, particularly for the struggle of our black people.

I have found considerable food for thought from the realities in Vietnam during the past several days. It is difficult to describe these thoughts but the thing which dominates and captivates my heart and mind more than anything else is your optimism and your confidence in the inevitability of victory. With these ideas, one struggles very aggressively.

In my Kansas City, the anti-war movement is primarily a movement of the black people. Some of the young people are opposed to the military service. The movement exists, but generally speaking, it is only in its initial stage. It is still necessary to further educate the people in order to bring the movement forward and have more successful activities. As far as our black people are concerned, the U.S. imperialists have exported the war from the United States to Vietnam, killing the Vietnamese people. The reason for this is that there is a war right in the United States which is intended to wipe out the black people in the United States. This fact

forces us to struggle and we think that this struggle must be able to change the system and to change the present life.

In visiting the Vietnamese Revolutionary Museum, we realize that it is necessary to struggle, as the Vietnamese people have done, to protect the national culture. As black people brought over from Africa, we too have our own culture. For this reason, after returning home from our visit to Vietnam, we will work together with the American people to further intensify the struggle to end the war in Vietnam, and, at the same time, to struggle to protect the culture of our people. There is one point which has given me considerable food for thought: Your victory has obviously not been determined by weapons but by the spirit of determination and the strength of solidarity of all the people. In my opinion, the reason that our movement has so long been weak is because it has lacked this spirit. In our struggle, we have also given more thought to weapons than to educating, mobilizing, and uniting the people carrying the weapons. This lesson of yours is particularly useful for us.

Martha Westover: We have achieved a better understanding of the problem by coming to Vietnam. People say that Vietnam is very poor. However, the facts indicate to me that this poverty is only external... Under that exterior, you have lived a very rich life, and have enthusiastically produced in order to supply the essential needs of the country. Despite such a fierce war environment, you have your vital necessities and your people are supplied all types of goods. In our country, on the outside it looks like there is very great prosperity, but actually only some people live like that. Most of our people live a life of poverty and misery and a large number of people go hungry.

You are really happy. In the areas that I have passed through, I have seen you preparing materials such as bricks, tiles, cement, and so forth for rebuilding the country. This has given me much food for thought. Another image which I find it difficult to become accustomed to during my visit to your country is the image of Vietnamese women. The Vietnamese women are very simple, very normal, but very beautiful. Women participate in every combat and construction sector and in all social activities. This proves that the capability of Vietnamese women is very enormous and indispensable...

At present, our American women are organizing the struggle against the U.S. government's war, using every different form. I am participating in an organization which is studying the American war industry. Through the publications of the Defense Department and the White House, this organization is studying how the U.S. government plans to unleash wars and what funds it will use to do this. The results of our research help local organizations to clearly perceive the government's objective in producing weapons of war, which is to serve the interests of military industrial groups, so that the local organizations can establish specific struggle plans in the centers of production of war weapons. Our work has begun to achieve success in a number of areas, particularly among American students.

MEMORANDUM

TO : DFD/THE via BM/SGN

DATE : 5 Feb. 1971

FROM : CP/FW-SGN

REF. No.CP-V-71-068

SUBJECT : Monthly Report, Saigon, January 1971.

MFD/FW spent the month on leave and Capt. Clarke substituted as head of the Fixed-Wing branch of the Flying Department, Saigon.

For a number of years the idea of a CB radio net for Saigon has been rejected by the company as impossible due to GVN regulations. Through the efforts of Mr. Brassil, COMENG-SGN, it develops that this was not true and that if approached properly the necessary authorizations can in all probability be obtained. While not yet approved, things look very optimistic for approval in the near future. This will provide considerable assistance in maintaining contact with our crews under all sorts of typical Saigon situations which now require dispatching a vehicle and driver with a note, let him fight the local traffic and hope the individual is home. This net will be at no cost to the company except for one or two "base station" set, one in Operations and one in Crew Scheduling. It is unfortunate this concept was not supported and pursued years ago.

The 7C-10/11/12/13 bids generated a lot of problems in getting personnel moved out. Lack of authorization for pick up and shipment of household goods has resulted in a great number of completely wasted work days by crewmembers transferred PCS. Ten days to two weeks was not an uncommon delay for the authorization alone actual schedule of pick-up further delayed departures. Admittedly part of the problem was a result of TET, but lack of authorization was the primary reason and cause of these delays.

Capt. Bays became Acting SIP/PC6 aftera a request was received from Capt. Grover that he be relieved from the position.

It should go without saying that the biggest single "excitement" item for the month was the edict that there would be no exceptions to the flight duty limits imposed by the SEA Operations manual and flights should be cancelled rather than deviate from these criteria. Considering the number of messages, phone calls and time spent in meetings, it would seem the problem would be solved or at least stabilized. Actually there are still many problems to be resolved. Perhaps we are too far down the line to recognize what is really going on, but everyone is making a maximum effort to coordinate and cooperate to make the schedule work as requested by the customer and still live within the limits imposed.

MEMORANDUM

TO : BM/SGN

DATE: 05 February 1971

FROM : SZ/DAD

REF. No. SZDAD/71/018

SUBJECT : DANANG Station Monthly Report for January 1971

GENERAL

Only minor incidents of hostile activity were reported in the Danang area during January. Increased security measures were undertaken by U.S. and Vietnamese military forces over the TET holidays. Scheduled flights to Quang-Ngai on 3 January, and all CORDS passenger flights within Military Region I on 4 January, were cancelled due to anticipated civil disturbances.

CUSTOMER RELATIONS

The strict enforcement of company flight time limitations for flight crews has disrupted customer requirements somewhat. Not exceeding 8 hours flight time per day and complying with the crew rest provisions of these limitations have created the greatest problems. Both customer air operations officers have manifested discontent over the situation.

LEGAL

No payment has yet been made regarding the lease of a residence for SZ DAD due to delays in accomplishing required improvements. However, the new residence has been occupied.

FACILITIES

Nightly operation of the hostel generator has commenced. The noise level is considered high but not intolerable. The significant cost savings of this unit will probably not be realized until warmer weather results in increased air-conditioner operation.

A work request was submitted to the Base Civil Engineering Squadron (USAF) in an attempt to have the 204B touchdown pads, on the company ramp, resurfaced with concrete. The asphalt surface has deteriorated to the extent that they are only marginally usable and a potential FOD hazard is evident.

USAF plans to install a gate across the flight line access road, adjacent to the station facility, have been delayed due lack of required materials.

FISCAL

Conversion of the station timeclock to 50 herts operations is being undertaken at this time; attendance rosters are being submitted by each department in the interim.

FISCAL (Cont'd)

[redacted] payroll for the month totaled: 954,102$VN

Petty cash expenditures totaled: 31,965$VN

OPERATIONS

Revenue flight time decreased 114+18 hours as compared to December. Adverse weather, reduced flying over the TET holidays, and fewer PC-6 requirements contributed greatly to this reduction. No revenue losses were incurred as a result of the enforcement of company flight time limitations in January, but such is not expected to continue in February.

The following is a breakdown of revenue flight time generated by this station in January:

VN-91/AID	607+29
VN-91/Embassy	215+42
0069	4+07
TOTAL	827+18

Revenue losses for the month were as follows:

Customer cancellations ...	19+00
Weather	18+40
Maintenance	2+00
TOTAL	39+40

The station complement of GTD vehicles was reduced from 6 to 5 with the transfer of one Mitsubishi Jeep to SZ DAD to replace the previously utilized M-38 Jeep shipped to Saigon. No status has been received concerning a request to survey the two station micro-busses.

HOSTEL

Of 548 beds available at the hostel, 451 were utilized which yields a monthly occupancy rate of 85%. The total number of beds at the hostel was reduced from 22 to 21 as one room was considered too small to accommodate two beds. There are now 8 double rooms and 5 single rooms at the hostel.

Certificates of non-availability for a total of 16 nights were issued to TCS ground personnel.

COMMUNICATIONS

Difficulties continue to be experienced with the Motorola remote VHF/UHF system. Flight crews frequently report that Danang transmissions are unreadable. Although all receivers and transmitters

COMMUNICATIONS (Cont'd)

involved in this system were thoroughly checked and overhauled as necessary in December, its performance is far below previous levels.

Incoming and outgoing messages totaled 1217 and 805 respectively.

TRAFFIC

The customer funded cargo weighing scale for the Traffic/USAID warehouse was received and should be installed in the second week of February.

Passenger and cargo statistics for the month of January are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-9101/AID	2,356	2,216	190,906	56,854
VN/9102/EMBASSY	317	503	28	3,593
0030	02	04	-	-
0069	07	05	-	-
AAM	82	86	10,287	10,994.5
TOTAL	2,764	2,814	201,221	70,941.5

SECURITY

Approved, 1971, airbase passes have not as yet been received from VNAF security for any station personnel. Only minor problems have been encountered to date by those employees without a valid pass.

PERSONNEL

Leave plans for several TCN personnel are being modified due to difficulties in obtaining exit/re-entry visas. Much of the problem seems to result from the processing involved in new extensions of stay and work permits which requires the employee's passport as part of the supporting documentation.

The personnel breakdown for Danang Station at the close of business, 31 January 1971, was as follows:

[redacted]

Permanent	3	11	15	64
Pre-Process	0	0	0	1
Temporary	0	0	0	0
Daily-Hire	0	0	0	0
TOTAL (94)	3	11	15	65

TECHNICAL SERVICES

RMD handled a total of 437 arriving and departing flights as compared to 488 in December. 1 PC-6 and 4 204B number one services were performed during the month. Number 2 services were limited to 204B aircraft and totaled: 2. One engine change was required (VTB) and two aircraft were grounded for parts (VTB and 204B).

RCMD expended a total of 608 manhours, of which 49 were utilised in maintaining the company hostel.

Some hostel expendable supplies are now being stocked by RSD/SGN which will reduce considerably the payment of inflated prices for these items on the local economy (a box of soap powder costs 200 piastres and a can of insect spray from 260 to 400 piastres).

[redacted]

SUMMARY. A PRISONER OF WAR CAMP OPERATED BY VIET CONG /VC/ MILITARY REGION 5 /MR-5/, WHICH HELD EIGHT AMERICAN AND THREE ARMY OF THE REPUBLIC OF VIETNAM /ARVN/ PRISONERS AS OF 1 DECEMBER 1970 WAS LOCATED IN THE MOUNTAINS ON THE BORDER OF QUANG TIN AND QUANG NGAI PROVINCES. THE AMERICAN PRISONERS WERE EMACIATED AND TWO SUFFERED FROM MALARIA. THE CAMP CONSISTED OF TWO BUILDINGS FOR THE PRISONERS INSIDE A STOCKADE AND THREE FOR THE STAFF AND GUARDS ON THE OUTSIDE. THE CAMP STAFF DID NOT APPEAR TO FEAR AN ESCAPE BY THE AMERICANS, WHO WERE NOT WORKED AS HARD AS THE ARVN PRISONERS. BECAUSE OF VC REGULATIONS, THE AMERICANS RECEIVED A LARGER FOOD RATION THAN THE ARVN PRISONERS. END SUMMARY.

1. VC MR-5 OPERATED A PRISONER OF WAR /POW/ CAMP, KNOWN UNOFFICIALLY AS THE "U.S. POW CAMP" IN THE MOUNTAINS ON THE BORDER OF QUANG TIN AND QUANG NGAI PROVINCES, FOUR OR FIVE KILOMETERS NORTH OF THE VC MR-5 T-15 THOUGHT REFORM CAMP, WHICH IS LOCATED AT APPROXIMATELY BS8587 OR BS8687. [redacted] COMMENT--VC MR-5 INCLUDES GOVERNMENT OF VIETNAM /GVN/ QUANG NAM, QUANG TIN, QUANG NGAI, BINH DINH, PHU YEN AND KHANH HOA PROVINCES./ [redacted] VISITED THE POW CAMP THREE TIMES IN THE PERIOD BETWEEN NOVEMBER 1969 AND 1 DECEMBER 1970, WHILE CARRYING MEDICAL SUPPLIES TO A FOOD

[redacted]

[redacted]

PRODUCTION UNIT LOCATED ABOUT A THREE AND A HALF HOURS' WALK FROM THE T-15 CAMP. ON HIS FIRST VISIT IN NOVEMBER 1969 [redacted] SAW THREE ARVN OFFICERS AND FIVE AMERICANS WHO WERE PRISONERS AT THE POW CAMP. ON 3 DECEMBER 1970 THESE SAME PRISONERS WERE STILL THERE, TOGETHER WITH THREE NEW AMERICAN PRISONERS. [redacted] DID NOT LEARN THE NAMES OF THE PRISONERS, ALTHOUGH HE WAS ABLE TO CONFRONT THEM. THE THREE ARVN OFFICERS INCLUDED TWO SECOND LIEUTENANTS AND ONE FIRST LIEUTENANT. [redacted] SAID HE WAS UNABLE TO CONVERSE WITH THE AMERICAN PRISONERS, ALL OF WHOM WERE CAUCASIANS, BECAUSE OF THE LANGUAGE BARRIER. [redacted] DID NOT KNOW THEIR RANKS NOR THE TIME AND PLACE OF THEIR CAPTURE, BUT HE WAS TOLD THAT ONE WAS A DOCTOR. ALL OF THE AMERICAN PRISONERS APPEARED TO BE LESS THAN 30 YEARS OLD. FIVE OF THE AMERICAN PRISONERS WERE ABOUT FIVE FEET EIGHT INCHES TALL WITH BLACK HAIR, TWO WERE ABOUT FIVE FEET FIVE INCHES TALL WITH BROWN HAIR, AND ONE WAS ABOUT FIVE FEET FIVE INCHES TALL WITH BLACK HAIR. SOME HAD BEARDS AND MOUSTACHES, AND ALL WERE EMACIATED. ALL WORE TWO-PIECE BLACK PAJAMAS, SHOES MADE OF OLD TIRES, AND HATS MADE OF LEAVES COVERED WITH GREEN NYLON CLOTH. [redacted] COMMENT--FROM A PHOTOGRAPH, [redacted] IDENTIFIED PVT. FREDERICK L. ELBERT, UNITED STATES MARINE CORPS, AS BEING ONE OF THE AMERICANS AT THE POW CAMP. PVT. ELBERT WAS MISSING ON 16 AUGUST 1968 AND WAS DECLARED CAPTURED BASED ON THE DEBRIEFINGS OF THE THREE AMERICANS WHO WERE RELEASED BY THE VC IN NOVEMBER 1969./

2. IN TALKING WITH CAMP CADRES AND MEMBERS OF THE SECURITY FORCE, [redacted] LEARNED THAT THE POW CAMP HAD BEEN ESTABLISHED IN 1966 OR 1967 BUT HAD NO FIXED LOCATION UNTIL 1969. THE POW CAMP STAFF, ALL VC, INCLUDED THE CAMP COMMANDER FIRST LIEUTENANT /PHU/ P H U O N G. THE GUARD FORCE CONSISTED OF THREE VC AND FOUR NVA SOLDIERS, OF WHOM [redacted] COULD REMEMBER ONLY THE NAME OF /PHU/ T H I N. THE CAMP, WHICH COVERED ABOUT ONE ACRE OF LAND, HAD FIVE BUILDINGS MADE OF BAMBOO WITH THATCHED ROOFS UNDER A JUNGLE COVER. THE FIVE BUILDINGS INCLUDED A SIX BY THREE METERS STRUCTURE TO HOUSE THE

[redacted]

16

PRISONERS, A FOUR BY THREE METERS KITCHEN AND MESS HALL FOR THE PRISONERS, A FOUR BY FOUR METERS STORAGE BUILDING, SIX BY THREE METERS BUILDING TO HOUSE THE STAFF AND GUARD FORCE, AND A FOUR BY SIX METERS KITCHEN AND MESS HALL FOR THE STAFF AND GUARDS. THE PRISONERS' MESS AND QUARTERS WERE INSIDE A BAMBOO FENCE ABOUT 2.5 METERS HIGH FORMING A STOCKADE ABOUT 50 METERS SQUARE. THE OTHER THREE BUILDINGS WERE ABOUT 60 METERS OUTSIDE THE STOCKADE. A PLACE TO URINATE WAS LOCATED INSIDE THE STOCKADE, AND SLIT TRENCHES WERE ABOUT 100 METERS OUTSIDE. A SINGLE GUARD TOWER ABOUT TWO METERS HIGH WAS LOCATED ON THE EAST SIDE AT THE ONE GATE OF THE STOCKADE. THE TOWER WAS LOCATED ON THE OUTSIDE AND ON THE RIGHT-HAND SIDE FACING THE STOCKADE. THIS GUARD TOWER WAS MANNED BY ONE MEMBER OF THE GUARD FORCE AT ALL TIMES WITH CHANGES IN GUARD OCCURRING AT 0600 AND 1800 HOURS. THE GUARDS WERE ARMED WITH AK-47'S AND COMMUNIST CHINESE-MADE SKS RIFLES WITH 50 ROUNDS PER MAN. THE CAMP COMMANDER AND HIS ASSISTANT WERE ARMED WITH COMMUNIST CHINESE-MADE K-54 PISTOLS WITH AN UNKNOWN NUMBER OF ROUNDS. THERE WERE NO KNOWN COMBAT OR OTHER GUARD UNITS WITHIN A FIVE-KILOMETER RADIUS OF THE CAMP, NOR WERE THERE ANY BUNKERS, MINE FIELDS, BOOBY TRAPS, OR PUNJI STICKS. THE CAMP WAS IN A VALLEY SURROUNDED BY A HILL 1,000 METERS HIGH ON THE WEST, A 600-METER HIGH HILL ON THE NORTH AND NORTHWEST, AN 800-METER HIGH HILL ON THE SOUTH AND SOUTHEAST, AND A 50-METER HIGH HILL ON THE EAST. A SMALL, JUNGLE-COVERED STREAM RAN NEAR THE CAMP. A CORN AND MANIOC FIELD, ABOUT 1,000 METERS BY 300 METERS, LYING ABOUT 200 METERS EAST OF THE CAMP, WAS THE ONLY LANDMARK. THERE WERE NO ACCESS ROADS AND ONLY TWO MONTAGNARD VILLAGES IN THE AREA--MANG KIEN VILLAGE /UNLOCATED/ WAS EIGHT TO 10 KILOMETERS SOUTHEAST OF THE CAMP AND ONG AJ VILLAGE /UNLOCATED/ WAS ABOUT THE SAME DISTANCE NORTHEAST OF THE CAMP.

3. THE CAMP STAFF DID NOT FEAR THE AMERICAN PRISONERS WOULD ESCAPE SINCE THEY WERE UNACQUAINTED WITH THE AREA AND WERE IN NO CONDITION TO TRAVEL. [redacted] DID NOT KNOW OF ANY CAMP EVACUATION PLAN IN THE EVENT OF AIR ATTACKS. THE PRISONERS WERE NOT SHACKLED OR BOUND AT ANY TIME. THEY AROSE AT 0600 HOURS DAILY AND, IF THE WEATHER PERMITTED, THEY EXERCISED FOR 15 MINUTES. THE AMERICAN

PRISONERS WERE ALLOWED TO LEAVE THE STOCKADE FOR UP TO AN HOUR WITHOUT A SECURITY GUARD, BUT THE ARVN PRISONERS COULD NOT. ALTHOUGH THE ARVN OFFICERS WORKED ALONG WITH THE GUARDS IN THE FOOD PRODUCTION SITE, A 90-MINUTE WALK FROM THE CAMP, THE AMERICAN PRISONERS ONLY CARRIED THE FOOD BETWEEN THE SITE AND THE CAMP. TWO AMERICAN PRISONERS PERFORMED THIS DUTY DAILY, WHILE THE OTHER AMERICANS AND PRISONERS HAVING A MALARIA ATTACK WERE ALLOWED TO REST. KEROSENE LAMPS COULD BE USED UP TO 2100 HOURS. [redacted] DOES NOT BELIEVE THAT THE PRISONERS WERE INTERROGATED OR GIVEN ANY INDOCTRINATION AT THIS POW CAMP. THE MEDICAL SUPPLIES USED TO TREAT THE PRISONERS CAME FROM MR-5. ALTHOUGH NO NEWSPAPERS OR PERIODICALS WERE AVAILABLE, THE PRISONERS COULD LISTEN TO CERTAIN BROADCASTS OF RADIO HANOI.

4. AMERICAN PRISONERS RECEIVED A DAILY FOOD RATION OF 588 GRAMS OF RICE AND VN$20-30 /US$0.17-0.25 AT THE OFFICIAL RATE VN$118 EQUALS US$1.00/. ARVN PRISONERS RECEIVED A DAILY RATION OF 388 GRAMS OF RICE AND VN$8 /US$0.07/. THE CAMP STAFF AND THE SECURITY FORCE RECEIVED DAILY 250 GRAMS OF RICE AND VN$10 /US$0.08/. FOOD AND FUNDS TO SUPPLEMENT THE DIET WERE PROVIDED BY THE POLITICAL SECTION OF MR-5. THE PRISONERS NEVER ACTUALLY RECEIVED ANY MONEY. FOR MEMBERS OF THE SECURITY FORCE USED THE FUNDS TO MAKE ONE TRIP EACH WEEK TO THE LOWLANDS TO PURCHASE FISH SAUCE, CANNED FISH, AND OTHER FOOD WHICH THEY BROUGHT BACK TO THE CAMP FOR DISTRIBUTION TO THE PRISONERS AND THE CAMP PERSONNEL IN ACCORDANCE WITH THE ALLOWANCES. THE ROUND TRIP TO THE LOWLANDS TOOK SIX DAYS. THE AMERICAN PRISONERS GOT PREFERENTIAL TREATMENT BECAUSE OF VC REGULATIONS. ALTHOUGH THE STAFF AND SECURITY FORCE RESENTED THE AMERICAN PRISONERS RECEIVING DOUBLE THEIR RATION, THEY DID NOT OBJECT OPENLY. [redacted] BELIEVES THE PRISONERS RECEIVED ALL THE FOOD PURCHASED WITH THEIR ALLOWANCES. THERE WAS NO APPARENT FRICTION BETWEEN THE PRISONERS AND THE CAMP STAFF OR SECURITY FORCE.

5. FIELD DISSEM--STATE, USMACV, USAID, CORDS, DIR/JUSPAO /MR. NICKEL ONLY/, 7TH AIR FORCE, USARV, NAVFORV, 525TH MI GP, 6499 SAG, DSI, CINCPAC, PACFLT, PACAF, ARPAC

MEMORANDUM

765

mp/lw

TO : VPA/TPE

DATE : 20 Feb. 1971

REF. No. CP-V-71-099

FROM : CP/RW-SGN

SUBJECT : Evaluation of Project Operations 204-B Program.

REFERENCE: VPA TPS B71 010115

A. The 204B program in Saigon has six assigned aircraft. Two operate out of Da-Nang, two out of Can-Tho, and two out of Saigon. This is the normal operating set up and varies somewhat according to circumstances.

DANANG UTILIZATION:

One aircraft stationed in Da-Nang works for Customer 9101 or CORDS. The second aircraft is assigned to Customer 9102 or Embassy. The 9101 aircraft is scheduled to fly 8 hrs each day at some location in I CORDS and usually flies more than the 8+00 scheduled hours. All normal daily schedules for CORDS are at the direction of FU/PSD Advisor at the various locations. The main work locations are Tam-Ky [redacted], Hoi-An [redacted] Quang-Ngai [redacted], Hue [redacted], and Quang-Tri [redacted]. Working for the PSD Advisor at these locations involves both passenger and cargo operations. The passengers are normally VN Troops of some description, National Police, ARVN, PF etc.

The Embassy aircraft does not work a set schedule. Missions are scheduled as needed. It is interesting to note that there is a large increase in flight time for the Embassy aircraft during the rainy season. This is due to the fact that many Embassy fixed-wing flights are aborted during the rainy season for weather reasons. When this happens the mission is re-scheduled for the 204B aircraft. Other Embassy missions are both cargo and passenger with a large percentage of VIPs. The total 204B time out of Da-Nang averages approximately 300 hrs. Of this approximately 90% is CORDS or 9101. The overall cargo operation averages 28% hazardous cargo.

CAN-THO UTILIZATION:

Can-Tho 204B aircraft are also assigned one to each customer. The CORDS aircraft is utilized in the same manner as the Da-Nang, CORDS aircraft with the exception that several missions are flown for Phoenix each month. The Phoenix missions are usually flying inspection teams to various locations. The normal CORDS missions are out of Ca-Mau [redacted] Rach-Gia [redacted], Ben-Tre [redacted], Tra-Vinh [redacted], Ha-Tien [redacted], Chau-Doc [redacted] and Phuoc-Hoa Island [redacted]. Can-Tho CORDS aircraft are scheduled daily rather than a set schedule. The Embassy aircraft in Can-Tho does very little work. It is normally used for missions with the VN National Police. The total flight time out of Can-Tho is approximately 175 hours per month. Again approximately 90% of this time is for CORDS.

SAIGON UTILIZATION:

The CORDS aircraft in Saigon has a pre-set schedule 8+00 hrs each day seven days a week. This aircraft usually flies more than the scheduled 8+00 hrs. It is utilized in both cargo and passenger operations. Two days each week missions originate at Saigon. Other missions originate at An-Loc [redacted], Song-Be [redacted], Ham-Tan [redacted], Tan-An [redacted], Xuan-Loc [redacted], Phu-Loi [redacted], and Bien-Hoa [redacted].

.../....

FORM AF0330

Missions also include low level recons. and command and control operations for Province Chiefs in ARVN Military Operations. The second aircraft at Saigon flies some (very few) Embassy missions, extra CORDS missions, training missions, and is used as a maintenance "swap" aircraft. Total time out of Saigon averages 360 hrs of which 95% is CORDS.

Regarding aircraft utilization the following chart is interesting as it demonstrates the exposure time as compared to other programs. The statistics for this chart are taken from actual FSO's and are accurate. This chart covers a sixty day period, October and November of 1970.

Program	Landings	Total Time	Average leg in min.
204B	4967	1830	22 min.
PC6C	7349	3388	26 min.
VTB	3140	2086	39 min.
DHC4	1009	808	48 min.
C-47	687	623	63 min.
C-46	822	1250	96 min.

Also interesting is the following chart which shows the percentage of project pay that is paid on actual flight time comparing the C-47 program to the 204B program. This is over a 30 day period.

Program	Block Hours	Flight Hours	Project Hours	Project @ of Flight Hours
204B	943	906	@ 77% 726	80%
C-47	380	307	@ 60% 258	84%

B. Hazardous cargo for the 204B program includes fuel drums, Butane bottles, insecticides, hard rice, tear gas, and troops carrying loaded weapons and grenades. Grenades are usually carried hung from the uniform by the detonation lever.

DANANG:

Most of our sling cargo work is done out of Danang. Approximately 30% of cargo out of Danang is by cargo sling. Hazardous cargo averages 85% overall in Danang Operations.

CAN-THO:

Can-Tho Embassy missions are usually either inspection teams or VN National Police missions. All cargo on National Police missions is hazardous. CORDS missions are both cargo and passenger and of the cargo 25% is hazardous.

SAIGON:

The Saigon 204B operation is primarily a passenger, recon. operation and secondarily a cargo operation. However, most of the passengers are some type of VN Military and carry ammunition with them. The hazardous cargo operation out of Saigon averages 20%. The overall cargo operation averages 24% hazardous cargo.

C. During the sixty day period the 204B made 4967 landings and take-offs. Of these 1065 were made to unimproved, unlisted landing areas. This means that over 20% of 204B program landings were made without benefit of any FIC briefing or any written information regarding security, obstacles, condition of surface etc. Of the 262 Heliports listed in the Tactical Aerodrome Directory, 55 show some form

.../...

of hazard. This gives us 22% marginal landing areas of those listed. However, the information given in the Tactical Aerodrome Dierctory regarding heliports is very sketchy and incomplete to say the least. For instance looking at a random FSO flown on 14 Feb. out of Tan-An (VH-665) we find the following differences between the Tactical Aerodrome Directory and actual conditions. There were 20 landings and take-offs. Of the 20 landing areas, 12 were listed in the TAD. Of these 12, all had obstacles, uneven touchdown areas, debris in landing area or some other hazard making the area marginal for landing. However, only 2 of these had any hazards listed in the TAD. My conservative estimate is that 90% of our landing zones are marginal.

D. The 204B program I CORDS operations averages 50% remote area operation. This is based on criteria set up in message VPA TPE B71 010115. Saigon and Can-Tho operations average 70% remote area operation. The overall remote area operation averages 60%. This is based on a 15 minute reaction time and a 30 minute flight from SAR centers.

MEMORANDUM

TO : DFD/TPE via BM/SGN

DATE : 9 Mar. 1971

FROM : MF/RW-SGN

REF. No. CP-V-71-127

SUBJECT : Monthly Report (February 1971).

The 20AB program for the month of February was routine for RW/SVN. Flying time for the month remained relatively the same. It is believed the monthly flying time will remain at the present level until the VN Customer and Taipei work out hazardous pay.

There were 2 Route Checks, 5 Proficiency Checks, 8 F/O Evaluation Rides. This brings the program up-to-date.

A Pilots Meeting was held on the 28 Feb. in which 14 Pilots attended. The rest of the Pilots who did not attend will be briefed on the meeting throughout the month of March.

All the First Officers are progressing in a normal manner. Their attitude and initiative is well above average.

The morale of the pilot seems to be as in previous month a problem. There seems to be some stronge rumblings among the Captains and First Officers and a curious silence about, what the company is going to do about extra - hazardous flight pay; also rumors have it that the twin pack will not come up for Bid. The lull before the Storm???

SUBJECT South Vietnamese Liberation Army Enemy Proselyting Office Handling of Prisoners of War

J.M. RAY (DIC)

ACQ Vietnam, Saigon (12-28 October 1970) ( ) b3

SOURCE [redacted]

b1+b3

Summary: The Enemy Proselyting Office of the South Vietnamese Liberation Army (SVNLA) Political Staff has the primary responsibility for the administration, indoctrination and interrogation of foreign military and civilian prisoners as well as for Army of the Republic of Vietnam (ARVN) captured personnel. It had no jurisdiction over captured VC deserters, captured Vietnamese civilians or U.S./Allied/ ARVN deserters who voluntarily rally directly to VC organizations.

Approved for Release
Date 30 09 93

The Enemy Proselyting Office between April 1968 and April 1970 had three administrative Prisoner of War (POW) units which supervised about seven POW camps for U.S./foreign military and civilian POWs, and at least three POW camps for ARVN personnel. In April 1970, the POW administrative units and their subordinate POW camps were reorganized and combined into at least three POW camps for U.S./foreign personnel and at least one for ARVN personnel. Heavy emphasis was placed on the persuasive indoctrination of all POWs under its jurisdiction. Indoctrination and interrogation results were sent to Hanoi, to the Central Office for South Vietnam (COSVN) Military Proselyting Section, and to SVNLA campaign planners in support of projected combat operations. The Enemy Proselyting Office Policy Section supervised all detention facilities, maintained a central registry of all POWs under its jurisdiction, recommended and arranged POW release ceremonies, approved the recruitment of ARVN POWs into the SVNLA, as well as implementing policies on the handling and treatment of POWs and issuing guidance instructions to VC Military Region and subregion-level enemy proselyting organizations. As of 2 April 1970, at least sixteen U.S. POWs and one captured U.S. deserter were being detained in subordinate Enemy Proselyting Office detention facilities. End Summary.

1. The Enemy Proselyting Office (Phong Dich Van (PDV)) of the South Vietnamese Liberation Army (SVNLA) Headquarters, Political Staff, was charged with the primary responsibility for the administration, indoctrination and interrogation of foreign military and civilian prisoners as well as for Army of the Republic of Vietnam (ARVN) captured personnel. The PDV was also responsible for compiling information for draft propaganda leaflets, arranging prisoner of war (POW) release ceremonies, maintaining central POW record logs, conducting research on the psychological, moral and ideological beliefs of captured enemy personnel (excluding captured Vietnamese civilians) and drafting enemy proselyting programs which were to be used during combat situations against enemy military personnel. All captured foreign civilian personnel were categorized as enemy espionage agents and were detained and treated as captured foreign military personnel. The PDV between April 1968 and April 1970 administered at least seven detention camps for captured U.S. and other foreign military and civilian POWs and at least three other detention camps for ARVN POWs. The PDV did not have any responsibility for detained VC personnel. Such detainees were under the jurisdiction of the Central Office for South Vietnam (COSVN) Security Section, which was also responsible for detaining captured civilian Vietnamese and Government of Vietnam (GVN) civil servants, who were classified as GVN espionage agents and traitors to the Vietnamese people. PDV POWs were made available for interrogations and debriefings conducted by the COSVN Military/Troop Proselyting Section and the Security Protection Office (Phong Ban Ve) of the SVNLA Headquarters Political Staff. Both sources stated specifically that neither the COSVN Security Section nor the Military Intelligence Office (MIO) of the SVNLA Military Staff was involved in the interrogation of POWs at PDV detention facilities. However, the MIO was normally informed of the capture of all U.S./foreign military and civilian personnel, according to Source Nguyen Thanh L i n h, and could, upon request, dispatch its own qualified personnel to interrogate such prisoners who were being detained by the capturing unit. In the case of VC Subregion 1 (SR-1), the SR-1 Political Office Enemy Proselyting Section was charged with the primary responsibility of immediately interrogating POWs in the field for perishable tactical military information. Such information was given directly to the local VC military unit commander for immediate use against the enemy.

2. Prior to the Allied military incursion into Cambodia in May 1970, the Headquarters of the PDV was located in the Bridge 48 area within the COSVN/SVNLA Headquarters complex in the Fishhook area of Cambodia. The PDV Headquarters was composed of six major subordinate

elements: Command Group, Policy Section (Ban Chinh Sach), Propaganda Section (Ban Tuyen Truyen), Cadre Section (Ban Can Bo), Enemy Situation Section (Ban Dich Tinh), and the In-Combat Proselyting Section (Ban Dich Van Trong Chien Dau). A PDV Reception Station was located in an unknown area approximately a one-hour walk southeast of Phu Khuong District, Tay Ninh Province.

3. The PDV Headquarters Command Group was headed by Lieutenant Colonel Ngo Dac Trieu, aka Le Tan Vi, aka Muoi Vi, aka Muoi Tam, and his two deputies, Major Pham Ngoc Thao and Bui Thanh Nghiem, aka Ba Nghiem. One English-speaking interpreter named (fnu) Hoa was permanently assigned to the Command Group. The PDV Headquarters was still designated 72, with letter box number 86,300/YK as of April 1970. About 50 personnel were assigned to the PDV Headquarters with about 300 personnel for subordinate PDV detention facilities.

4. The PDV Policy Section was the most important subordinate PDV element. The Policy Section was responsible for supervising the administration of subordinate PDV detention facilities, interrogating and indoctrinating POWs and deserters, recommending POWs for release and arranging POW release ceremonies, maintaining central registry of POWs and deserters processed through and/or detained by the PDV as well as implementing policies on the treatment and handling of POWs and deserters and issuing guidance, instructions to Military Region- and subregion-level Policy Sections. Prosclyting Sections within the COSVN geographical area of jurisdiction. The responsibilities and functions of this section were almost identical with those of the Ministry of Defense Enemy Prosely[illegible] Department Policy Office in NVN. [illegible] dated 10 August 1970 (for further details on the Enemy Prosely[illegible] Department Policy Office in NVN.) The Chief of the PDV Policy Section was Major Tran Van Luc, aka Nam Luc. At least five other personnel were in this section.

5. The Policy Section directly supervised [illegible] tive units between April 1968 and 2 April 1970, when these units underwent a major reorganization. The three units were designated Inter-Unit A, B and C.

A. Inter-Unit A: established about May 1968 in the Cut Spring area about 12 kilometers southeast of Katum, Phu Khuong District, Tay Ninh Province. In October 1969, the Cut Spring area was bombed by B-52's; however, Inter-Unit A suffered no casualties and relocated in the Phum Trapcang, Phlos/Phum Dar area (vicinity XT203977) of Cambodia, about four kilometers south of National Route 7. The Inter-Unit A Headquarters was composed of 25 personnel headed by Senior Captain Le Hong Bien, aka Hai Bien. Inter-Unit A supervised four POW detention camps and one POW escort unit.

(1) Unit 23A (designated Unit 23 prior to April 1968): established pre-Tet 1968 as an ARVN enlisted and NCO POW detention camp. In April 1969, Unit 23A was relieved of its POW detention function and became purely a POW escort unit for ARVN prisoners, picking up ARVN POWs from Rear Services Group 82 and Comco/Liaison Station V15. Between April 1969 and April 1970, Unit 23A picked up and escorted only ten ARVN POWs who were detained for interrogation by the PDV Headquarters elements before being delivered to Inter-Unit B for permanent detention and/or later release. In May 1968, Unit 23A picked up and detained 25 ARVN enlisted POWs who were all released in August/September 1968; 28 ARVN enlisted POWs in December 1968, who were all released in February 1969; 12 in February 1969, eight of whom were

released in March 1969 and four of whom were transferred to Inter-Unit B. One U.S. POW, who was picked up in June 1963, was turned over to Unit 2A for detention, and one ARVN lieutenant, (fnu) X u a n, was turned over to Unit 3A for detention. Unit strength: 25 personnel.

(2) Unit 1A (designated Unit A20 prior to April 1968): Unit 1A was the only PDV detention facility in existence prior to January 1968 for both ARVN/Allied military and civilian POWs. After April 1969, Unit 1A was no longer responsible for ARVN POWs. Unit 1A was located in the Bo Tuc area in Binh Long Province. Unit strength: 25 personnel.

(3) Unit 2A (known as Unit 21 prior to April 1968): established pre-Tet 1968 as a detention facility for foreign military and civilian POWs. As of 2 April 1970, about seven or eight U.S. POWs were detained in this camp. Unit strength: 25 personnel. In January 1969, three U.S. POWs were released in Tay Ninh Province.

(4) Unit 3A (designated Unit 26 prior to April 1968): established pre-Tet 1968 as a detention facility for foreign military and civilian POWs. As of 2 April 1970, this unit detained seven U.S. POWs. One unidentified Caucasion U.S. POW died from malignant malaria in October 1969. Unit Strength: 25 personnel.

(5) Unit 4A: established pre-Tet 1968 to detain foreign military deserters. Unit 4A was located with the Inter-Unit A Headquarters. As of 2 April 1970, only one U.S. deserter was detained at this facility. The deserter was positively identified by [redacted] photograph as McKinley [redacted] Noland, a negro, was at the camp with his half Vietnamese/half Cambodian wife and her two children by previous marriages, one a 13-year-old boy sired by a Cambodian father and the other a 3-year-old girl sired by a Korean. According to Source, Noland had been involved in black market activities in Saigon and had been caught by either U.S. military police or GVN National Police, resisted arrest, allegedly killed the policeman, escaped, hid and continued his black market activities in the Saigon area. Later he met his wife who reportedly convinced him to flee into Cambodia to live. Noland and his family were picked up by the VC and turned over to Unit 4A where he was detained with relative freedom of movement between at least April 1968 and April 1970. On several occasions, PDV indoctrinators met with Noland at the Inter-Unit A Headquarters for unknown reasons. His degree of cooperation with the VC was never revealed, although he did volunteer his stepson as an office boy for Inter-Unit A and was allowed occasionally to cut wood for the Inter-Unit A Headquarters nearby under guard. In 1969 Noland allegedly requested to be set free with his family in Cambodia, but no action was taken. Unit Strength: 10 personnel.

B. Inter-Unit B: established in May 1968 in the Xom Giua area, Cambodia, opposite Tay Ninh Province. The Inter-Unit B Headquarters was composed of 25 personnel headed by Senior Captain (fnu) D a u. Inter-Unit B supervised three POW detention camps for ARVN POWs from enlisted to officer ranks. Only one ARVN second lieutenant, (fnu) X u a n, was identified by name. The three subordinate POW camps were designated Unit 1B, 2B and 3B, which were each staffed by about 25 personnel. An unknown number of ARVN POWs were

C O N F I D E N T I A L

detainee at these camps.

C. Inter-Unit C was established in May 1968 in an unused mined area for the detention of foreign military and civilian POWs in a [illegible] subordinate camps. It was staffed by about 25 personnel and there were about 15 to 20 personnel at the Inter-Unit C headquarters.

Between March and early April 1970, the above-mentioned POW detention facility system was reorganized because the anticipated receipt of large numbers of ARVN Allied POWs had never materialized after Tet 1968, VC military activities had been toned down and the VC were in need of qualified cadres and enlisted personnel to fill vacancies in combat units. Upon instructions from the SVNLA Political Staff, the PDV streamlined its organization in the following manner:

A. Inter-Unit A was reorganized into two U.S./foreign POW detention facilities. Unit 1A was kept intact, while the Inter-Unit A headquarters and its four other subordinate elements were disbanded and formed into one detention unit (designation unknown) headed by Junior Captain [illegible], aka Ut, H u e, formerly the Deputy Chief of Inter-Unit A. Following the reorganization, the two units were directly subordinate to the PDV Policy Office with about 25 to 30 personnel. The remaining personnel were sent to replace personnel in combat units in other parts of the country. Unit C620 [illegible]

B. Inter-Unit B was disbanded and formed into one ARVN POW detention facility directly subordinate to the PDV Policy Office with about 25 to 35 personnel. Unit designation and location unknown.

C. Inter-Unit C was disbanded and formed into at least one foreign POW detention facilities directly subordinate to [illegible] with about 25 to 35 personnel. Unit designation and location unknown.

7. Between April 1968 and April 1970, PDV Propaganda Section personnel were observed on several occasions frequenting the above mentioned Inter-Unit A POW detention facilities. Section personnel, such as Junior Captain Duy, H o a, aka Ba, H o a, had direct access to POWs. Hoa conducted indoctrination sessions designed to convince the POWs of the heroism and determination of the Vietnamese people in their struggle for independence from foreign domination. POWs were required to read books, documents and pamphlets on Vietnamese history and on the reconstruction of North Vietnam (NVN). According to Hoa, such reading materials were not as effective as oral group discussions. Hoa prescribed topics for discussions in which the POWs were required to participate actively. Such discussions were presented in question-and-answer form with Hoa guiding the POWs to the type of answers he wanted. For example, discussion topics dealt with the comparison of VC and ARVN treatment of POWs; North Vietnamese assistance to the VC in SVN; and the U.S. presence in SVN as aggressors. POWs were guided to conclude that the VC used no form of torture against POWs while the ARVN did; that the NVN presence in SVN was as Vietnamese helping Vietnamese in a brotherly fashion since there was only one Vietnam and not two Vietnams; and that the U.S. was the aggressor military power in SVN interferring with the internal politics of the Vietnamese people and hence was the aggressor, not NVN. After group discussions the POWs were required to write a statement, based on the questions and answers, admitting that the U.S. was the aggressor in the war. According to Hoa, the statements were later studied at the PDV and were used to develop indoctrination materials, including leaflets. Statements were sent to Hanoi and were used to assist in the indoctrination of U.S. POWs in NVN. Consequently, the PDV knew

to detain a number of U.S. POWs in SVN in order to gain more experience in proselyting efforts and believed that U.S. POWs were valuable in its enemy proselyting operations and later in bargaining for the exchange of high-ranking VC cadres held by the GVN. A secondary function of the PDV Propaganda Section was to conduct political reorientation courses for its own subordinate cadres and personnel.

6. PDV indoctrinators in the Enemy Situation Section were responsible for interrogating U.S./ARVN POWs for information on the history, morale, and biographic background of division-level units and their commanders, as well as the identification and number of unit personnel who opposed the war, refused to take part in military operations or deserted their units. Attention was also given to the degree of racism/segregation in U.S. units and the relationship between enlisted personnel and officers. Special emphasis was placed on identifying the psychological, morale and ideological status of key enemy unit commanders as well as the effectiveness of their units during combat against VC/NVA forces. Such information was provided to SVNLA campaign planners. The Enemy Situation Section was composed of about 10 personnel headed by Senior Captain (fnu) Hai Ca.

9. Based on the results of indoctrination and interrogation sessions by the Propaganda and Enemy Situation Sections, further research was conducted by the In-Combat Proselyting Section headed by Senior Captain (fnu) Tu Sen. This Section took the debriefing results and drew up enemy proselyting programs which were to be used during VC/NVA combat operations. Proselyting programs were keyed to specific VC/NVA combat tactics, and were designed to support tactical operations be it a major campaign, small-scale hit-and-run attack or an ambush. These proselyting programs were also sent to the SVNLA campaign planners for their review and use in planning combat actions against enemy military forces.

10. Although the PDV did not have, per se, an Administrative Staff Section, all PDV administrative personnel affairs were handled by the PDV Cadre Section, which kept all personnel records. The Cadre Section was responsible for personnel assignments and processed recommendations for promotions, awards and disciplinary action.

11. The PDV was also responsible for drawing up and disseminating instructions and regulations concerning the treatment, evacuation and release of POWs who were brought to, and detained by, the PDV. Upon capture each POW was given a bilingual letter of instruction on how the POW was to act during the period he was being escorted to the next higher echelon. POWs were instructed to march fast, camouflage themselves with tree branches when enemy aircraft appeared and do nothing to signal circling aircraft, willingly submit to being blindfolded when instructed, and ask the permission of the armed escorts to toilet. Upon arrival at the PDV detention camp location, POWs were given the following instructions: do not attempt to reveal the camp location; do not make smoke from cooking fires during daylight hours or allow any light to show at night; do not dry clothes in the sun; ask permission to toilet; do not reveal to fellow POWs the subject of interrogations at the facility; report any attempts of others to resist captivity; eat all food immediately and do not build up food reserves; do not attempt to escape. Any POW caught trying to escape was tied to a tree overnight and given only rice to eat for three days in view of other POWs. If a POW overpowered and killed an armed guard the maximum penalty was death.

12. At Unit 23A of Inter-Unit A, all personal belongings, such as military clothing and equipment, money and jewelry were taken from the POWs and not given back until their release. Civilian foreigners were allowed to wear their civilian clothes. Upon arrival at the

b3

detention camp each POW was issued a hammock, a mosquito net, a blanket, a pair of sandals, a tooth brush and other items. Each POW was kept separately in an underground trench except during meals, indoctrination, interrogation and toilet time. He was with two armed guards at all times, and a cord which doubled as a fetter was placed around his neck. Each POW was also chained to the trench. Except for escapees, those who had proven sympathetic to the VC. The daily work schedule was as follows: 0545 hours wake up, wash and physical exercise; 0600 breakfast; 0630-0700 required listening to VC/NVN propaganda radio broadcasts in English; 0700-1130 indoctrination/interrogation sessions; 1130 lunch; 1200-1400 siesta; 1400-1700 indoctrination/interrogation sessions; 1700 supper. If the POW was not needed for indoctrination/interrogation sessions he was allowed out of the trench three times a day for one hour maximum each time. Deserters were given permission to remain outside their trench during daylight hours within the prescribed camp limits. Food rations for foreign POWs were 4.50 Cambodian riels per day, 35 liters of rice per month and an undetermined cash allowance for soap, cigarettes and other items. ARVN POWs were allowed 2.70 Cambodian riels per day, 24 liters of rice per month and 15 riels a month allowance for soap, cigarettes and other items. Increased food allowances were given for 22 December (NVA day), 2 September (NVN Independence Day) and during the Tet holidays. After August 1969, the PDV experienced difficulties in obtaining sufficient quantities of rice. The ARVN POW monthly rice allowance was cut from 26 liters to 24 liters, while foreign POW monthly rice allowance remained unchanged. This was done deliberately to keep the fact of rice shortages secret from foreign POWs. On the other hand, PDV rice rations were cut in half--half of the monthly rice allowance was issued in manioc. PDV detention facility personnel were under strict orders not to torture or abuse any POWs; otherwise, disciplinary action would be taken against them. All deaths of foreign POWs were investigated in detail by PDV headquarters personnel. In the case of one death of an unidentified Caucasian POW due to malaria in October 1969, the camp medical technician was severely criticized by the PDV which sent investigators to confirm the cause of death.

13. Although the criteria for releasing POWs were not known to sources, especially in regard to U.S. POWs, most ARVN enlisted and NCO POWs were usually eligible for release, but not ARVN officers. The PDV Policy Section determined who would be released. The VC psychology behind the release of ARVN POWs was based on the assumption that the released ARVN POW would return to his family and/or unit and spread propaganda favorable to the VC, even if he had not been recruited or dispatched by the VC. Prior to the release of 35 ARVN enlisted and NCO POWs in July/August 1968, Senior Lieutenant (fnu) V i of the SVNLA Political Staff Security Protection Office (Phong Bao Ve (J5)) visited the Unit 23A detention facility for three days and interrogated each of the 35 personnel being considered for release. The interrogations were conducted separately; Sources knew no other details, nor were they able to comment on the involvement of J5 personnel with the January 1969 release of three U.S. POWs in Tay Ninh Province. (Field Comment: The J5 Security Protection Office is responsible for counterespionage and internal security activities within the SVNLA. Its functions are similar to the COSVN Security Section, which is subordinate to the COSVN Current Affairs Committee.)

14. The only other COSVN-level organization which was in contact with POWs at PDV detention facilities was the COSVN Military Proselyting Section (Ban Binh Van). Prior to the July/August 1968 release ceremony for ARVN POWs, two Military Proselyting Section cadres, Chin T h o and (fnu) C h i e n, went to Unit 23A. Chin Tho interviewed each ARVN POW with a tape recorder and instructed

each POW to write a letter to his family which he reviewed and corrected before the POW read the letter into the tape recorder. The tape-recorded letters were later broadcast over the National Liberation Front Radio. Colen took a group picture of the POWs with a still camera for unknown reasons. No Military Proselyting Section cadres were identified by Source in either the motion picture film or still pictures of the January 1969 release of three U.S. POWs in Tay Ninh Province. Neither Source was able to comment on whether personnel of this section were involved in the recruitment and dispatch of released ARVN POWs. The Military Proselyting Section had the responsibility of detaining, indoctrinating and interrogating U.S./Allied/ARVN deserters who rallied to the VC. The PDV sent information copies of all its indoctrination and interrogation reports to the Military Proselyting Section via the SVNLA Political Staff.

15. As each ARVN POW was considered for release, the PDV attempted to recruit the POW into the SVNLA. For a POW to be accepted into the SVNLA he had to be a member of the basic social class (landless/poor farmer), have no relatives working as GVN civil servants or in the ARVN and have been politically indoctrinated by accepting the VC revolutionary cause, and had to submit a handwritten request volunteering to join the SVNLA. The ARVN POW detention unit then made up a list of all POWs who met these criteria and submitted a report to the Inter-Unit Headquarters for final approval by an unidentified PDV approving authority. At least ten members of Inter-Unit A were former ARVN POWs recruited in this fashion.

1.3(a)(4)

1. The following cadres and personnel of the South Vietnamese Liberation Army (SVNLA), Political Staff, Enemy Proselyting Office (Phong Dich Van (PDV)), were involved in the administration, indoctrination and interrogation of U. S./Allied/ARVN POWs at PDV prisoner-of-war Administrative Inter-Units A, B and C:

A. Command Group:

1. Chief: Lieutenant Colonel Ngo Dao T r a i, aka Le T r a i, aka Muoi T r a i, aka Muoi T a i, born circa 1924, NVN. Prior to infiltrating SVN in 1963/1964, Trai was assigned to an unidentified position in the Enemy Proselyting Department (Cuc Dich Van (CDV)) of the Ministry of Defense, General Political Department. Upon arrival in SVN, Trai was first assigned to an unidentified position in the Central Office for South Vietnam (COSVN), Military/Troop Proselyting Section, for a period of time before becoming Chief of PDV. Source Huynh Ngoc N h u a n heard in early 1970 that Trai was suffering from an unidentified mental disorder. Trai spoke Chinese fluently and had a long facial scar.

2. Deputy: Major Pham Tran B a n, aka Ba B a n, born circa 1925, NVN. He was assigned to the CDV before infiltrating [illegible] with Major Bui Thanh N g o n. Upon arrival in SVN, Ban was assigned as Deputy Chief, PDV. Ban spoke fluent Chinese and appeared in a VC propaganda film which reported the January 1969 release of three U. S. POWs in Tay Ninh Province.

3. Deputy: Major Bui Thanh Ngon, aka Ba N g o n, born circa 1928 in Phong Dinh Province, a regroupee. In NVN Ngon was assigned to an unidentified position in the CDV. He infiltrated SVN with Pham Tran Ban in early 1965 and was immediately assigned as Deputy PDV Chief. Ngon spoke fluent French.

4. Interpreter: (fnu) H o a; born circa 1942 in SVN; spoke with a Saigonese accent; and spoke fluent English.

B. Policy Section:

1. Chief: Major Tran Van L u c aka Nam L u c. (Field Comment: See [redacted] for extensive biographic data provided by Source [redacted]

1.3(a)(4)

2. Deputy: Unknown.

3. Staff Assistant: Junior Captain T r a n C h a u; born circa 1932, Phuoc Tuy Province.

4. Staff Assistant: Senior Lieutenant Thai Thanh P h o n g, aka Q u y e n; born circa 1934, Gia Dinh Province; served in a Viet Minh combat unit in the Eastern Nam Bo area; regrouped to NVN; attended the Hanoi University of Pedagogy while demobilized; worked as a NVN 3rd form teacher at the Nguyen Khuyen High School in Haiphong; recalled to the NVA in 1963; and [redacted] assigned to the PDV Policy Section in late 1967 upon arrival in SVN. Phong often interrogated U. S. POWs at subordinate Policy Section detention camps which were administered by Inter-Unit A (Lien Doi A). Phong spoke fluent French, English and Russian.

5 4 3 2 1

1.3(a)(4)

5 4 3 2 1

1.3(a)(4)

5. Staff Assistant for Research: Senior Captain (fnu) N g u; born circa 1926, Haiphong; was assigned upon arrival in SVN to the PDV Policy Section in 1968; and spoke fluent Chinese and fair Russian.

6. Staff Assistant: Senior Captain Vo D a u, aka Bay D a u; born circa 1930, Gia Dinh Province; regrouped to NVN; infiltrated SVN at an unknown date; and assigned to the PDV Policy Section in early 1968 from VC Division 9. His wife is a civilian nurse at an unidentified COSVN-level hospital. Dau was probably assigned as Chief of the Policy Section Inter-Unit C in 1969.

7. Staff Assistant: Senior Phi L o n g, aka Sau Phi L o n g; born circa 1930, Kien Hoa Province; regrouped to NVN; and assigned to the PDV Policy Section at an unknown date. He often had contact with the Policy Section Inter-Unit A Headquarters.

C. Propaganda Section:

1. Chief: Unknown.

2. Staff Assistant for Training and Operations: Junior Captain Duy H o a, aka Ba H o a, born in NVN. During the Viet Minh Resistance he was a squad leader at Dien Bien Phu. Hoa infiltrated SVN in 1965 and was assigned to the PDV Propaganda Section. Hoa was seen several times by Source Huynh Ngoc Nhuan at the Inter-Unit A Headquarters. Hoa conducted 3-day political indoctrination courses for POWs who were to be released.

3. Staff Assistant: Senior Captain (fnu) Bay T u i; born circa 1935 in either Tay Ninh or Long An Province. During the Viet Minh Resistance he was assigned to a combat unit in the Eastern Nam Bo area; regrouped to NVN; and attended a 3-year journalism course. Upon graduation he was promoted to senior Lieutenant and assigned to the CDV Propaganda Office, where he wrote articles for radio broadcast against ARVN troops in SVN. In early 1965 he was assigned to the PDV in SVN. Source Huynh Ngoc Nhuan observed Tui on several occasions interviewing/interrogating U. S. POWs in Inter-Unit A detention facilities. His wife, Hue M u i (a native of Hanoi), was a member of an SVNLA, Political Staff, Psywar Entertainment Group.

4. Staff Assistant: Junior Captain Dao Si T o, aka Tam T o, born circa 1925 in NVN. In December 1968 To conducted a political orientation course for Unit 23 personnel of the Policy Section Inter-Unit A. To occasionally contacted the Inter-Unit A Headquarters and had access to POWs detained there.

D. Enemy Situation Section:

1. Chief: Senior Captain (fnu) Hai C a, born circa 1930 in Dinh Tuong Province, where his wife and children resided. Ca was a member of the My Tho Company during the Viet Minh Resistance; regrouped to NVN; worked in the CDV; infiltrated SVN in early 1965; and was immediately assigned as Chief of the PDV Enemy Situation Section.

5 4 3 2 1

1.3(a)(4)

2. Staff Assistant: Second Lieutenant (fnu) T r i; born circa 1946 in Hanoi; and attended the Hanoi University of Pedagogy where he majored in foreign languages. In late 1964 he was drafted and assigned to the CDV. In early 1965 he infiltrated SVN and was assigned to the PDV Enemy Situation Section. Tri spoke fluent English and Russian and was in frequent contact with PDV Policy Section as an interpreter/interrogator. 1.3(a)(4)

E. In-Combat Proselyting Section:

1. Chief: Senior Captain (fnu) Tu S e n; born circa 1930 in Trang Bang District, Tay Ninh Province. He was a member of Battalion 302 in the Eastern Nam Bo area during the Viet Minh Resistance. Sen regrouped to NVN and infiltrated SVN at an unknown date. He was first assigned to VC Division 9 before being transferred to the PDV as Chief of the In-Combat Proselyting Section in late 1965.

F. Cadre Section:

1. Chief: Unknown.

2. Staff Assistant: Senior Lieutenant (fnu) A n; born circa 1934 in Long An Province; a regroupee.

G. POW Administrative Inter-Unit A, Policy Section for U. S./Foreign POWs:

1. Chief: Senior Captain Le Hong B i e n, aka Hai B i e n; born circa 1925, Binh Dinh Province; a regroupee; former Battalion Commander and later Deputy Chief of Staff of VC Regiment Q16. After being seriously wounded in the left arm, he was transferred to Inter-Unit A as Chief in June 1968, replacing Le H u e, who became his deputy.

2. Deputy: Junior Captain Le Hue, aka Ut H u e; born circa 1930 in Long Xuyen Province; a regroupee. His wife and children resided in Hanoi. Hue was Chief of Inter-Unit A between May and early June 1968. After the deactivation of Inter-Unit A in late March/early April 1970, he became Chief of an unidentified POW detention facility for U. S./ foreign military and civilian POWs..

3. Political Officer: Senior Captain Truong Huynh M a o, aka Tu T r u o n g; born circa 1930 in Kien Hoa Province; a regroupee. Prior to May 1968, Mao was Chief of the COSVN Military Proselyting Section, Administrative Staff. His wife, (fnu) Nam D i e u, was a member of the COSVN Military Proselyting Section.

4. Staff Assistant for Politics: Second Lieutenant (fnu) Ba Hai T h a n h; born circa 1935 in VC MR-5; a regroupee. His wife, a Northerner, lived in NVN.

5. Staff Assistant for Security Protection (Tro Ly Bao Ve): Senior Lieutenant Tran Dinh D i e p, born circa 1930, Ha Bac Province, where his wife and children lived.

1.3(a)(4)

1.3(a)(4)

6. Chief Medical Element: Senior Lieutenant/ Doctor (fnu) Muoi H i e n; born circa 1922, SVN; a regroupee.

7. Medical Technician, Medical Element: Aspirant (fnu) Minh C h a u; born circa 1935, SVN; a regroupee.

8. Female Nurse, Medical Element: Deputy Squad Leader (fnu) Thanh T a m, born circa 1948, Kien Hoa Province.

9. Female Nurse, Medical Element: Deputy Squad Leader (fnu) Hong T i e n, born circa 1946, Kien Hoa Province.

10. Female Nurse, Medical Element: Squad Leader (fnu) Nam C h a n g, born circa 1938, SVN.

11. Pharmaceutical Technician, Medical Element: Squad Leader Tran Hong L u a n, born circa 1946, SVN.

12. Adjutant, Rear Service Element: Squad Leader (fnu) V a n g, born circa 1935, NVN.

13. Clerk, Rear Service Element: Squad Leader (fnu) D o a n.

14. Supply Specialist: Squad Leader (fnu) Bay L a p, born circa 1935, Cu Chi District, Hau Nghia Province.

15. Finance Specialist: Squad Leader Vu S i e u, born circa 1946, Kien Hoa Province.

16. Cook: (fnu) Thi T a m; born circa 1951, Cu Chi District, Hau Nghia Province; wife of T r i e u, who was a Unit 3A food purchaser.

17. Cook: (fnu) Thi Tu T r u y e n, born circa 1940, Long An Province.

18. Chief, Security Guard/Transport Element: Platoon Leader (fnu) T r o n g.

19. Member, Security Guard/Transport Element: (fnu) Ho C o n g, born circa 1940, SVN.

20. Member, Security Guard/Transport Element: (fnu) Thanh C o n g, born circa 1938, SVN.

21. Member, Security Guard/Transport Element: (fnu) T h i e u, born circa 1945, SVN.

22. Member, Security Guard/Transport Element: (fnu) T y; born circa 1945, Cambodia; reassigned to VC Division 9 in March/April 1970.

23. Member, Security Guard/Transport Element: Tran Van L o i, aka C a n g; born circa 1923, Ca Mua Province; reassigned to VC Division 9 in March/ April 1970.

24. Chief, Food Production Element: Squad Leader (fnu) L u a n, born circa 1945, Nghe An Province.

25. Member, Food Production Element: Dinh Van C a o; born circa 1935, SVN; a reclassified ARVN POW.

H. POW Detention/Escort Unit 23A, Inter-Unit A, for ARVN POWs:

1. Chief: Senior Lieutenant Vo Van T h a n g, aka Nam T h a n g; born circa 1932, Kien Hoa Province; a regroupee. Thang was with an Eastern Nam Bo unit during the Viet Minh. Prior to 20 May 1968, Thang was the Political Officer of POW detention Unit 21, aka Unit 2A. Afterwards, he became Chief of Unit 23A, replacing Deputy Company Commander Nguyen Cong T r u o n g, aka Sam T r u o n g, who became Deputy Chief of Inter-Unit B, Unit 1B.

2. Deputy: Aspirant Nguyen Van T y, aka Tu T y; born circa 1935, Can Tho; a regroupee. During the Viet Minh he served with the Cai Rang (now called Chau Thanh) District Local Force Unit, Phong Dinh Province. Prior to July 1968, he was Deputy Chief of Unit 3A, Inter-Unit A. His wife and one child lived in Ha Dong Province. Ty replaced Company Commander Tran Toc C h i e n, who was killed in a B-52 air strike on 27 June 1968.

3. Political Officer: Senior Lieutenant Nguyen Xuan S u, aka Hai S'u; born circa 1928, Ha Dong Province, where his wife and children resided. During the Viet Minh he served with a Main Force unit in NVN. After 1954 he became an instructor at the Son Tay Artillery School No. 400. He infiltrated SVN in January 1968 and became Unit 23A Political Officer in April 1968, being reassigned from the SVNLA Replacement Company C620.

4. Deputy Political Officer: Deputy Company Commander Ly Q u a n g; born circa 1933, Vinh Long Province, where his wife resided. He joined the VC in 1960.

5. Staff Assistant for Security Protection (Tro Ly Bao Ve): Platoon Leader Le M a i, aka M a o.

6. Chief, POW Guard Squad (Doi Ve Binh): Platoon Leader Pham Van M a y; born circa 1940, Cu Chi District, Hau Nghia Province; formerly assigned to Unit 21, aka 2A, Inter-Unit A. In March/April 1970 he was reassigned to Unit 2A.

7. Deputy Chief, POW Guard Squad: Deputy Platoon Leader Vu S a o, aka Nam T r u c, born circa 1937, Kien Giang Province. In April 1970 he was reassigned to Unit 4A, Inter-Unit A.

8. Member, POW Guard Squad: Squad Leader Huynh Van N o; born circa 1946, Long An Province; reassigned to Unit 3A, Inter-Unit A in April 1970.

9. Member, POW Guard Squad: Deputy Squad Leader Tran Van A n; born circa 1946, NVN; reassigned to Unit 3A in April 1970.

10. Member, POW Guard Squad: Deputy Squad Leader Nguyen V u o n g; born circa 1948, NVN; medically evacuated to NVN post-March 1970.

MONTHLY REPORT
NHA TRANG
APRIL 1971

****

GENERAL

1.1 CM/TM Desmond continued his home leave throughout the month. SZ-NHA covered his duties.

1.2 Enemy harassment in the immediate area consisted of one rocket impacting on Camp McDermott (adjacent to the air base) the last day of the month. There were no instances of friendly harassment affecting operations.

1.3 There was on instance of revenur lors (four hours fifty minutes) due to crew duty limitations. The aircraft involved was a C46 on the 23rd of the month.

2. HOSTEL

2.1 No major developments.

3. TRAFFIC

3.1 Station Traffic activities were down significantly this month as indicated in the below statistics.

4. STATISTICS

		APRIL	MARCH	1970
4.1	PASSENGER			
	Departing	2970	3614	3529
	Arriving	2603	3241	3261
	TOTAL	5573	6855	6790

MEMORANDUM

TO : BM SGN

DATE: 03 April 1971

FROM : SZ DAD

REF. No. SZDAD/71/037

SUBJECT : DANANG Station Monthly Report for March 1971

GENERAL

Two major incidents of hostile activity affecting the Danang Air Base occurred during the month of March. On the morning of 4 March ten 122mm rockets impacted in widely dispersed areas causing some damage to five structures but no serious casualties.

There were three separate rocket attacks directed at the air base and surrounding area during the morning of 29 March. The first of these attacks commenced at 01:57 local time and resulted in one 122mm rocket impacting within the station complex. The USAID warehouse absorbed most of the concussion from this explosion but shrapnel damage was widely dispersed. Two VTBs were hit, one of which, after temporary repairs, was ferried to SGN due to extensive skin damage. The RMD offices, transmitter room and the nose hangar also sustained moderate shrapnel damage.

All indicators of station workload reflect a significant increase in operations as compared to the previous few months.

CUSTOMER RELATIONS

Relations with Embassy and CORDS Air Operations were unusually good throughout March. Aircraft availability was very high since few problems were encountered as a result of inclement weather or crew scheduling. A number of maintenance difficulties were experienced but the customers were very impressed by the speed in which they were corrected.

FACILITIES

USAF Base Civil Engineering has not to date commenced work on resurfacing the 20/8 touchdown pads or the construction of a gate across the flight line access road. A lack of certain materials has been given as the reason for the delay.

FISCAL

It is expected that payment for the new SZ residence will be made sometime in April.

[redacted] payroll for the month totaled: 1,078,643$VN

Petty cash expenditures totaled: 68,970$VN

SUBJECT: DANANG Station Monthly Report for March 1971 (Cont'd)

OPERATIONS

Revenue flight time increased 143+05 hours as compared to February. Special flights on the part of AID and increased PC-6 and 204B utilization by the Embassy combined with very few cancellations were the main contributing factors for this increase. June 1970 was the last month in which greater flight time has been reported.

The following is a breakdown of flight time generated by this station in March:

VN-91/AID	734+22
VN-91/Embassy	230+17
VN-91/RDC	1+41
Non-Revenue	1+11
Total	967+31

Revenue losses for the month were as follows:

Maintenance	1+00
Weather	6+50
Other	12+00 *
Total	19+50

* Damage repair VNB 9577Z and 204B 1303X.

Two of the seven GTD drivers were on Sick Leave the entire month. The shortage of drivers caused some delays in normal transportation which primarily effected flight crews desiring expedited transport from the air base to the hostel upon the completion of flying. Problems are also being experienced in keeping both micro-busses in reasonable operating condition since no major repairs are being accomplished pending approval of a request to survey these vehicles.

HOSTEL

The hostel occupancy rate again declined slightly. Of 563 beds available, 415 were utilized (70.37%).

Certificates of non-availability for a total of 37 nights were issued to TCS ground personnel.

COMMUNICATIONS

The performance of the Motorola UHF/VHF system was noticeably better than the previous month, but for no apparent reason. The primary back-up VHF was in Saigon undergoing repairs most of March so it was indeed fortunate no serious problems were experienced.

Incoming and outgoing messages totaled 1213 and 809 respectively.

SUBJECT: DANANG Station Monthly Report for March (Cont'd)

TRAFFIC

Passenger and cargo statistics for the month of March are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-91/AID	2,872	2,908	310,324	36,232
VN-91/Embassy	433	717	1,700	8,723
AAM	111	117	9,605.8	16,674.9
Total	3,416	3,742	321,629.8	61,629.9

SECURITY

No significant problems in this area were encountered.

PERSONNEL

One automotive mechanic was daily-hired for a period 17 days to provide adequate coverage in PRMD.

The personnel breakdown for Danang Station at the close of business, 31 March 1971, was as follows:

[redacted]				
Permanent	3	15	12	63
Pre-Process	0	0	0	1
Temporary	0	0	0	0
Daily-hire	0	0	0	0
TOTAL (94)	3	15	12	64

TECHNICAL SERVICES

RMD handled a total of 549 arriving and departing flights as compared to 450 in February. A total of four number 1 services (one PC-6 and three 204B) and three number 2 services (204B) were performed. One engine change was required (PC-6) and five aircraft were grounded for parts (2-VIB, 1-PC6, 1-DHC4, and 1-204B).

RGMD expended a total of 552 manhours of which 220 were attributable to hostel maintenance. Large scale projects included repainting the interior of the main hostel building, and the installation of incandescent iodine lamps and removal of the existing flourescent lamps in the nose hangar.

USAF Base Supply has been contacted regarding the establishment of a local procedure for the issuance of parts for transiting bailed C123K and C7A aircraft. Progress in this endeavor is pending receipt of complete copies of the concerned contract modifications.

MEMORANDUM

TO : BM SGN

DATE: 03 May 1971

FROM : SZ DAD

REF. No. SZDAD/71/048

SUBJECT : DANANG Station Monthly Report for April 1971

GENERAL

Significant incidents of hostile activity in the Danang area included rocket attacks during the nights of 8 and 26 April. In the former five 122mm rockets impacted in the city resulting in some civilian fatalities. One rocket in the attack of 26 April impacted in a Navy POL area, setting off one JP-4 storage tank. It took more than 12 hours to control the resulting fire.

Effective 25 April the city of Danang was placed on-limits for U.S. military personnel. The city had been off-limits since around 1964.

CUSTOMER RELATIONS

The Embassy Air Operations Officer, Mr. O.B. Harnage, was transferred to Saigon as the Deputy Chief of Air. Continuing excellent relations with this customer can be expected from his replacement.

FACILITIES

No significant changes occurred in this area during the month. No action has been forthcoming from USAF Civil Engineering regarding the installation of a gate across the flight line access road or resurfacing of the 20/8 touchdown pads.

FISCAL

The French operated electric company, S.I.P.E.A., increased the rate for electricity from 14 to 15 piastres per kilowatt hour effective 1 March 1971.

[redacted] payroll for the month totaled: 983,983$VN

Petty cash expenditures totaled: 28,222$VN

OPERATIONS

Revenue flight time declined 41+08 hours as compared to the previous month. On three occasions deviations to established flight time standards were made to meet Embassy emergency requirements.

SUBJECT: DANANG Station Monthly Report for April 1971 (Cont'd)

The following is a breakdown of flight time generated by this station in April:

VN-91/AID	728+47
VN-91/Embassy	196+25
Non-Revenue	6+27
Total	931+39

Revenue losses for the month were as follows:

Maintenance	3+30
Weather	2+30
Customer Cancellations	4+10
Crew Rest	0+50
Total	11+00

HOSTEL

The hostel occupancy rate increased as compared to March. Of 525 beds available, 438 were utilised (83.43%).

Certificates of non-availability for a total of 7 nights were issued to TCS ground personnel.

COMMUNICATIONS

An automatic on-off switch was installed for the Motorola UHF/VHF system. This action was apparently taken to preclude possible interference problems when the set was left on all the time.

Incoming and outgoing messages totaled 1243 and 712 respectively.

TRAFFIC

No action has been taken by USAID to repair the damage to the Ground Services warehouse resulting from a rocket attack on 29 March.

Passenger and cargo statistics for the month of April are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-9101/AID	2,473	2,749	192,781	48,719
VN-9102/Embassy	534	643	550	11,073
0069	-	-	-	-
AAM	94	88	16,183.9	21,202.5
Total	3,101	3,480	209,514.9	80,994.5

SUBJECT: DANANG Station Monthly Report for April 1971 (Cont'd)

SECURITY

Two ground personnel were the victims of armed robbery while enroute to the air base. The incidents were reported to local police officials who advised an increase in the number of patrols in the general area would be instituted.

PERSONNEL

The personnel breakdown for Danang Station at the close of business, 30 April 1971, was as follows:

	[redacted]			
Permanent	3	15	12	64
Pre-Process	0	0	0	0
Temporary	0	0	0	0
Daily-hire	0	0	0	0
TOTAL (94)	3	15	12	64

TECHNICAL SERVICES

RMD handled a total of 495 arriving and departing flights as compared to 549 in March. A total of four number 1 services (one FC-6 and three 204B) and one number 2 service (204B) were performed. No engine changes were required and two aircraft were grounded for parts (1-VIB and 1-204B).

EGMD expended a total of 584 manhours of which 276 were consumed in hostel upkeep. A new leaching well was constructed at the hostel to remedy an overflowing septic vault problem. PEMD modified an unusable potable water trailer into a fuel tank for the hostel generator. It is no longer necessary to order drum fuel for this unit.

Routine access to the MSD warehouse was eliminated in order to reduce a moderate pilferage problem. It was therefore necessary to relocate EGMD storage and the RMD lockers to other areas.

MEMORANDUM

TO : DFD/TPE via BM/SGN

DATE : 12 May 1971

FROM : CP/SVN

REF. No. CP-V-71-229

SUBJECT : Monthly Report - April.

The policy of two separate and equal flying divisions at Saigon came to an end with the decision that Capt Heinl would be a line pilot rather than Acting CP/RW. Since the CP/RW and SIP/RW are TCS for an indefinite period, this leaves a gap in the continuity and control of the RW program. The change of scheduling from Capt Heinl to the Scheduling Section has thus far not created any great problems as the program was in excellent condition at the time Capt Heinl dropped the handling of it. Time will tell if the situation will change as things progress. With the absence or imminent departure of all the RW supervisory personnel, one annot help but wonder who is to take over the operational supervision of the program. Capt Johnson has indicated that as Acting SIP/RW his duties are limited by the AAM/FEPA contract to action directly related to flight instruction.

The manning situation continued to cause morale and other problems, particularly in the non-existent C47 program. Things have started to settle down to a degree, but have a long way to go to achieve stability. Scheduling continued to present its share of difficultities related to compliance with the various time limitations. The present "no waiver" policy is generally permitting us to begin getting well from our prior situation where we were slipping backward with each day of borderline activity. The exception is in the C46. The extra flying requested by the customer and use of the fifth "uncontracted" aircraft has greatly cut into our available time used to try and get the crews time-off and meet all the limitation ceilings which exist. An example of the schedule juggling which goes on, it is often necessary for Capt A to fly to NHA or DAD with Capt B deadheading. Capt B then flys back to SGN with Capt A as a deadhead. This meets the flight time limits (usually compliance with the "30 in 7" or "100 in 30") but realistically does nothing but cost the company for a round-trip deadhead. There is certainly no added safety factor established, as few would argue that this type of deadheading was more restful than flying. (Perhaps even the contract). The limitations have, on a number of occassions, caused considerable alienation of the customer. This is particularly true of those in the field who are not informed that it is their own management who has requested or supported the restrictions. They still feel we should provide the quality of service that was standard several years ago and not plague them with administrative limitations.

Capt Herrington was reinstated as a life VTB Capt after six weeks LWOP for his accident and for permitting his medical certification to lapse. His reinstatement was of considerable help in maintaining the VTB schedule within the required limits and permitting crews reasonable time off to get away from Saigon.

It is unfortunate that all the programs cannot afford a similar situation since as local conditions continue to worsen, with increasing harassment and petty stubling blocks constantly generated. Even the military has experienced an increase

..../....

Cont'd.....

of armed robbery and gunshot wounds in Saigon. Mr Grundy was delayed in his departure as a result of an Immigration error which is rather a typical problem for our employees. The burden of corrective action was thrown on him and the company as the local authorities refused to acknowledge there could have been any fault on their part. Only with the assistance of the airlines, customers and senior company representatives did he manage to depart 8 hours later. (Needless to say all this assistange is not available to run-of-the mill employees who would have been delayed from Saturday until at least Monday). Such harrassments make it so necessary for personnel to get away from Vietnam as often as possible for real relaxation. (Even that time-off spent in country does little toward decreasing the local "ulcer juice" situation.)

Captains Collard and Johnson were awarded positions in Udorn but at present have not had word as to when they might expect to be transferred. The bids for vacancies published in the 71-20 through 71-32 notices were announced at the end of the month, almost two weeks after the 71-20 Bid closed. There were not too many radical surprises although a couple of awards went to people who were not really sure then wanted to make the change.

The latest form of local harassment is from the customs people in refusing to let anything into the country which they consider not acceptable. This is not based on what, how much or who, but only on the whim of the individual inspector at the moment. (It effects VN, TCN, US etc. - Only VIPs and Diplomatic Passport holders are exempt.) One person going through can bring in unlimited amounts of something and the next one with small amounts of the same item have it confiscated. To quote some sage thinker, "There is no reason for it, it is just their policy". Unfortunately there are no guide lines and no assistance or support available to our personnel when this sort of thing comes about. The individual can try to argue but usually ends up paying a bribe or losing the articles. Everyone intending to visit Vietnam would be well advised to bring only what is actually required and thus preclude confrontations with the customs authorities.

MEMORANDUM

TO : BM SGN

DATE: 03 June 1971

FROM : SZ DAD

REF. No. SZDAD/71/057

SUBJECT : DANANG Station Monthly Report for May 1971

GENERAL

Several rocket attacks were directed against the Danang City and air base during May, but no impacts within company facilities resulted. The largest of these attacks occurred in the early morning of 30 May. 14 rockets were involved and 12 fatalities in the downtown area were reported.

Discussions with the 366th Tactical Fighter Wing Plans office indicate that nearly all U.S. Military facilities on the east side of the air base north of the F-4 areas will be turned over to the Vietnamese Air Force. It was allowed that the VNAF may make renewed attempts by September to obtain the company facility for their use. Many USAF units have already been relocated to the west side of the air base, utilizing facilities vacated by the 1st Marine Air Wing.

CUSTOMER RELATIONS

On two occasions both customers had 204B schedules for the same day which resulted in the cancellation of the AID requirement since only one crew was available due to crew rest. Embassy took the position that the problem was created by AID flying on the previous day. In one instance 6 hours of revenue loss was sustained but a revenue loss was avoided on the other by AID rescheduling the requirement to the following day.

LEGAL

A renewal notice on lease contract 66-45 was sent by registered mail to the landlord's agent on 18 May. It was returned unsigned with a letter indicating that continued use of the property would be contingent on receiving a substantial rent increase not provided for in the existing contract. Legal counsel in Saigon will be contacted to confirm our legal position on this matter.

FACILITIES

The USAF Civil Engineering Squadron was relocated to the west side of the air base so no firm status on the access road gate or the 204B touch-down pad resurfacing projects could be obtained.

Preliminary investigations are being made to determine the possibility and feasibility of obtaining the vacated Special Forces quarters building adjacent to the company compound for use as a crew hostel.

SUBJECT: DANANG Station Monthly Report for May (Cont'd)

FISCAL

It is anticipated that the lease payment for contracts 67-59A/B will be made by 10 June. 600,000$VN is involved and NFA/SGN is in the process of ascertaining whether or not this payment can be made at the parallel exchange rate.

[redacted] payroll for the month totaled: 950,871$VN

Petty cash expenditures totaled: 48,460$VN

OPERATIONS

Revenue flight time declined 103+03 hours as compared to the previous month. Revenue losses increased substantially as a result of poor weather and compliance with flight time and crew rest standards. Efforts at the Danang level to minimize the impact of these standards are complicated by a lack of information concerning individual crew flight time over the previous 7 and 30 days and conflicting interpretations of recently announced revised standards regarding daily flight and crew rest requirements.

The following is a breakdown of flight time generated by this station in May:

VN-91/AID	672+15
VN-91/Embassy	149+54
Non-revenue	3+21
TOTAL	825+30

Revenue losses for the month were as follows:

Weather	16+50
Maintenance	2+30
Crew Rest	13+20
TOTAL	32+40

A requirement was levied to provide company transportation between the hostel and the MACV Club (dining facility and movie) to alleviate increasing concern on the part of flight crews for their personal safety. Two hours of driver overtime is necessary on a daily basis to support this requirement.

HOSTEL

The hostel occupancy rate decreased significantly in May due to a change in the method of computing the rate. Previously, if a Captain occupied a double room, and the vacant bed was not utilized, that bed was not considered available. From instructions received from SMHC, all vacant

SUBJECT: DANANG Station Monthly Report for May (Cont'd)

beds are considered available, so the rate is necessarily lower. There were 651 beds available during the month of which 418 were utilized (64.2%).

Certificates of non-availability for a total of 9 nights were issued to TCS ground personnel.

COMMUNICATIONS

Incoming and outgoing messages totaled 750 and 483 respectively.

TRAFFIC

Repairs to the USAID warehouse, damaged by a rocket attack on 29 March, have not as yet commenced.

Passenger and cargo statistics for the month of May are as follows:

	PAX IN	PAX OUT	CARGO IN	CARGO OUT
VN-91/AID	2,371	2,736	295,087	54,413
VN-91/Embassy	506	589	600	6,321
AAM	108	97	8,830.8	13,602.9
TOTAL	2,985	3,422	304,517.8	74,336.9

SECURITY

The U.S. Consulate has written a letter to the Mayor of Danang requesting assistance in controlling the increasing criminal activity in the city. Apparently this letter was the result of several instances of assault and robbery reported to the consulate by U.S. and Third Country nationals and various contractors (including Air America).

PERSONNEL

Four station TCN personnel had to cancel their scheduled leaves since they were unable to obtain an exit/re-entry visa for Vietnam. It is understood that a re-entry visa will not be issued unless the individual has a work permit, which in turn will not be approved without a valid extension of stay. This situation is a recurring problem.

The personnel breakdown for Danang Station at the close of business 31 May 1971, was as follows:

[redacted]				
Permanent	3	11	15	63
Pre-Process	0	0	0	1
Temporary	0	0	0	0
Daily-Hire	0	0	0	0
TOTAL (93)	3	11	15	64

SUBJECT: DANANG Station Monthly Report for May (Cont'd)

TECHNICAL SERVICES

RMD handled a total of 469 arriving and departing flights as compared to 495 in April. A total of 4 number 1 services were performed on 204B aircraft. One engine change (C46) and one propeller change (PC6) were required and five aircraft were grounded for parts (2-C46, 2-VTB and 1-204B). One outstation recovery was necessary to temporarily repair a cracked engine fuel line on a VTB.

RGMD expended a total of 576 manhours, of which 43 were consumed in hostel upkeep.

Repairs on both the airbase and the hostel generators were required and the availability of spare parts for these units was found to be very discouraging. Each day these generators are out of service results in electricity costs of approximately $50.00 and $20.00 respectively.

Both micro-busses required substantial repairs during the month. An engine and transmission overhaul was necessary on one and the engine mounts on the other had to be welded back into place. A survey report was submitted on these vehicles on 5 December 1970 but the present status of it is unknown.

Increasing requests from other locations are being received for various equipment and supplies, supposedly to be obtained from "local sources". Personnel at this station are not in a very good position to reciprocate tangibly when it is possible to obtain some of these items. In addition, a large volume of requests will probably result in compromising the possibility of obtaining critical items, such as to support a local AGP.

Another undesirable side of effect of these efforts is that it has been necessary to accept a large volume of parts and supplies of little use value in order to obtain a few necessary items. The RSD warehouse is now nearly full of various materials and the sorting and crating for shipment of them requires a not insignificant amount of time and expense.

BM/SGN

MEMORANDUM

TO : SCP-TPE via BM-SGN

DATE : 12 June 1971

FROM : CP-SVN

REF. No. CP-V-71-286

SUBJECT : Monthly Report (May 1971)

1. Crew Scheduling problems continued to plague the department throughout the month. There would be no purpose served to elaborate on the situation as it has been discussed and cussed at great length verbally and in writing. It just boils down to not being able to get six gallons out of a five gallon can. You either have to change the requirement or get another can. No amount of scheduling changes can correct the problem. When all the pilots have run out of time, the schedule can either be cancelled or someone grant a waiver.

2. FEPA continues to operate with a free hand and apparently full support and backing from the company. That they are immune from serious criticism becomes ever more evident with every situation. That they are completely supported by the general membership is seriously doubted as there is much evidence to the contrary. However, a few leaders have joined together and are completely dominating the actions and decisions of the whole pilot group in Saigon. They appear to be immune from any serious criticism by management without their own concurrence.

3. We now have five pilots on extended sick leave and their return is indefinite. The instances of becoming sick and grounded has increased with the necessity of cutting down on scheduled time off. Several have become ill in time to make the week-end and are well again by the first of the week. With the limitations placed on how much they are permitted to fly, this is a convenient way to have the week-ends off. When there were no such severe restrictions, it was very seldom that pilots were sick except when it was readily apparent that they should be in bed. The present system creates a situation where loyality and a desire to do the right thing result in the individual being penalized rather than rewarded.

4. On two different occasions R/W First Officers were going to be sent directly to SGN without ground school. If the school is to be held here, this is of no consequence whether they have G/S or not. If the requirement is to be met elsewhere it is almost a necessity that the school be held prior to coming to SGN. The present visa situation makes any other action impractical. After arrival we must plan on one or two months in country until a final multiple entry/exit visa is received.

5. The revision of the crew rest policy to permit 12 hours rest for a nine hour day provided some relief for the 204-B program working out of Danang. Other than that it was a step in the right direction but not nearly enough relief from the other restrictions of the Flight Time Standards policy.

.../...

FORM 5270300

6. The Chief Pilot/FW made two trips out of country during the month. One to VTE to attend the C46 Manual conference and another to TPE regarding the new contract and some of the scheduling problems with which we are confronted.

7. In summary, the month was frustrating but relatively uneventful as far as anything of a spectacular nature. No one was particularly sorry to see it past. On the other hand it could certainly have been worse. (Presumably).

COUNTRY South Vietnam

DOI 1 March-2 December 1970

SUBJECT Organization and Activities of the Viet Cong Military and Prisoner of War Detention Camp T.15, Quang Ngai Province

ACQ Vietnam, Saigon [redacted]

SOURCE [redacted] 1.3(e)(4)

1.3(e)(4)

Summary. The VC T.15 Military and Prisoner of War Camp was established in spring 1965 in Quang Ngai Province. It moved several times and in autumn of 1968 was located at Sa Ngang, about 25km. west of Tra Bong District Town. Parts of the camp may have been moved since early December 1970. The camp was primarily a temporary detention facility for detainees or prisoners, prior to sending them on to

1.3(a)(4)

North Vietnam; however, trials of some detainees were held in the camp by its military court, and detainees sentenced to short-term imprisonment remained at the camp and those sentenced to death were executed at the camp. There were two distinct detention areas, one for Viet Cong(VC) and North Vietnamese Army (NVA) prisoners, and a small one for Army of Republic of Vietnam (ARVN) and American prisoners. The security unit for the camp consisted of 60 armed men, who provided physical security for the camp and who controlled the detainees and prisoners who worked at the camp's food production sites from 5 to 12 km. distant from the camp area. The average number of detainees was about 200. The cases of detainees were processed while they were at the camp and trials were held by the camp's military court. The number of detainees at the camp increased during 1969 and 1970. The detainees were charged with such offenses as desertion, murder, anti-communist actions and other offenses. Camp detainees had to work in the camp food production details both prior to their trials and after sentencing (if they remained at the camp). Rice, manioc, corn, sweet potatoes and tea were grown at the food production sites. The camp supplemented its food production with purchased salt, seasonings and salted fish. At the end of November 1970, there were 3 ARVN prisoners and 8 American personnel detained at the camp. They probably were moved from the camp some time after early December 1970. End Summary.

1. The Viet Cong (VC) Military and Prisoner of War (POW) Detention Camp coded T.15 was established in the spring of 1965 in Quang Ngai Province, South Vietnam (SVN). Camp T.15 has been moved three times within the province since 1965, including the move to its present location Sa Ngang, in the autumn of 1968, a site close to Nui Ong Mountain and Nui Ong Stream, about 25 kilometers west of Tra Bong District Town, Quang Ngai Province (vicinity AS920850). The Sa Ngang area has heavy jungle-type foliage and provides natural cover for the camp. There are no other important VC installations in the immediate area, although there are isolated and scattered groups of Montagnards in the area. Physical separation and language differences are such that there are no security problems with these minorities.

2. Camp T.15 was under the direction and management of VC Colonel Nguyen Long B a, a lawyer and accredited military court presiding judge of VC Military Region 5, and Hoang Minh T a n, a political officer representing both Hanoi and the National Front for the Liberation of South Vietnam (NFLSVN) military/political superior echelons. Camp T.15 was originally established as a temporary detention area only, for VC and North Vietnamese Army (NVA) military personnel and for South Vietnamese and Allied POW's, prior to the removal of both categories of personnel to North Vietnam for proper detention, sentencing and carrying out of sentences. Over the years, however, this practice changed, and Camp T.15 took on many permanent type activities itself, including indefinite detention, trials for accused persons and the carrying out of sentences at the camp. Under the new system, Ba and Tan reported to the Hanoi

1.3(a)(4)

NLJ 02-766 - 33

Judiciary Department, the Military/Political Staffs of VC Military Region 5, and higher Central Office for South Vietnam (COSVN) echelons. 1.3(a)(4)

3. Camp T.15 was composed of two distinct detention areas separated by a distance of about 3 kilometers. One camp area was under the control of Nguyen Duy H o n g, a 55 year old political officer and native of Quang Binh Province, North Vietnam (NVN), and was known as Hong's camp or Hong's element. This camp housed and managed VC/NVA military prisoners. The second camp was under the control of (fnu) P h u o n g, a 45 year old political officer and native of SVN, and was known as Phuong's camp or Phuong's element. This camp housed and handled POW's. At the end of November 1970, there were about 120 detainees and 50 sentenced prisoners in Hong's camp and 3 ARVN and 8 American personnel under detention in Phuong's camp. these POWs were said to have been captured in VC Military Region 5 during operations prior to October 1970 and were to be moved to NVN in early spring of 1971. However, there was talk in Camp T.15 about Phuong's camp having been spotted by enemy aircraft and, although it had not been moved by 2 December 1970, it may have been moved since then. There was no talk concerning the probable exposure of Hong's camp and this camp is probably still located at Sa Ngang. Hong's camp consisted of six long wood-frame structures, surrounded by a double bamboo fence and an outer defense system of pointed punji sticks to prevent enemy penetration of the camp and the escape of prisoners. The security unit for this camp consisted of 60 armed men, who had the responsibility for physical protection of the camp and control of prisoners working at production sites from 5 to 12 kilometers away from the main compound. 1.3(a)(4) 1.3(a)(4)

4. The average number of detainees at Hong's camp was about 200. The VC/NVA unit responsible for bringing charges against an accused was also responsible for delivering the accused, with full documentation concerning each case, to Camp T.15 for judicial processing. The "temporary" detention period pending formal trial of an accused was set at six months for normal cases, but was not to exceed 15 months for even unusual cases requiring extensive investigation and administrative processing. When processing was completed, the accused was brought before the Camp T.15 military court which met only twice yearly. Colonel B a acted as the court presiding judge and Tan as court prosecutor; the accused did not have a defense representative working on his behalf. The sentence was entirely dependent on the prosecutor and judge. If the accused received an imprisonment sentence of up to five years, he might remain at Camp T.15 to complete his term of imprisonment; in cases where sentences to imprisonment were in excess of five years, the prisoner was held at Camp T.15 only until he could be transferred to NVN. Death sentences were carried out immediately within the confines of Camp T.15.

5. In 1970, the Camp T.15 military court held its first session from 5 to 25 May. A total of 44 cases were tried during this session: one defendant was sentenced to death

5 4 3 2 1 1.3(a)(4) 5 4 3 2 1

and was executed on 7 May 1970; 12 defendants received sentences of from 10 to 20 years imprisonment; and 22 defendants received prison sentences of from five to nine years. These 34 detainees were moved out of Camp T.15 in early June 1970, destined for NVN. Five defendants received prison sentences of two years and were to be held at Camp T.15 for production work; four detainees were found not guilty and released. The second 1970 session of the court was scheduled from 1 to 20 December. Another cadre who escaped from Camp T.15 after 20 December 1970 and arrived at Son Tinh ARVN Base prior to the end of February 1971, revealed that this session considered a total of about 50 cases, including several involving multiple defendants. This escapee, said two defendants were given death sentences; 40 received sentences of over 10 years imprisonment; 30 defendants were sentenced to 10 years; 15 received sentences of over two years; and five were declared innocent of charges brought against them

1.3(a)(4)

1.3(a)(4)

6. The number of detainees handled by Camp T.15 increased during the years 1969 and 1970, as the camp officials began taking on broader responsibilities. It is estimated that the military court has considered the cases of at least 500 defendants since 1965 and transferred about 200 of these to NVN. The proportions of NVA defendants have been: officers - 20 percent; non-commissioned officers - 40 percent; enlisted ranks - 40 percent. Of all defendants processed, about 85 percent were males and 15 percent females; 75 percent were northerners and 25 percent were southerners. Defendants have included about 52 percent charged with desertion; 15 percent charged with murder; 20 percent charged with anti-communism; 8 percent charged for allowing themselves to be taken prisoner; and 5 percent charged with minor offenses. The majority of defendants charged with desertion were northerners who escaped from their units, remained in remote areas and awaited an opportunity to rally to the Government of South Vietnam (GVN), but were captured by the VC/NVA. Camp T.15 authorities considered that an NVA deserter was very dangerous since the deserter knew he would receive the death penalty if recaptured. He would be willing to take enormous risks to escape, including killing security guards and guerrilla look-outs and, if he should reach ARVN units, the NVA deserter would be able to provide information to the enemy which could lead to the destruction of both VC and NVA units.) The majority of defendants charged with murder were officers and commanding VC cadres who committed illegal killings of innocent civilians and leaders of organizational elements without orders from superiors. Anti-communist defendants, both military and civilian cadres, were usually charged with speaking against communism, both verbally and in written letters, with listening to Free World radio news, with possession of anti-communist documents and with having in other ways indicated their interests to surrender at first opportunity. The other main category of defendants included those persons who had misused or embezzled military funds.

1.3(a)(4)

7. A Camp T.15 detainee, whether during his processing time or after sentencing, had to work on the food production details. On a daily schedule, detainees were awakened at 0530 hours, had breakfast at 0600, began work at the production sites at 0630, had lunch at 1130, returned to work

1.3(a)(4)

NND 927660-135

1.3(a)(4)

at 1300, had dinner at 1800, attended compulsory meetings at 1900 and were in bed by 2000 hours. Detainees were granted two one-day holidays during each year: Independence Day on 2 September and Army Day on 22 December. On these holidays, meat was provided, but otherwise the diet consisted of salted fish and food obtained from the production sites; an exception was the occasional wild boar meat which had been hunted and brought back to camp by the camp's armed security personnel. The detainees were assigned to working groups consisting of from 20 to 60 men and women, who worked under an assigned group chief and about 10 security guards. Normally, about 60 percent of the detainees reported in sick in an effort to evade the work detail, but whether this percentage was actually sick or not, only 30 percent of the detainees at the camp were allowed to be within the camp at any given time during working hours. Standard rations allowances per year for each detainee were 100 kilograms of rice and the equivalent of 3,000 piasters (about US$25.40) for additional food, exclusive of extra rations from the production sites, if available. Rice, corn, manioc, sweet potatoes and tea plants were grown at the production sites. The produce was assigned not only to Camp T.15, but also had to augment the supplies of the Rear Services of VC Military Region 5. Since 1965, Camp T.15 production sites have produced 140 tons of rice, 300 tons of manioc and 3.5 tons of corn. There were about 500 square meters devoted to growing tea plants. Of the 140 tons of rice produced, Camp T.15 consumed about 40 tons, and the remaining 100 tons was moved to other areas within the military region. Every three months Camp T.15 sent a five-man team to go shopping at Son Tinh market, which is about 50 kilometers from the camp. On each occasion this shopping detail spent about 100,000 piasters (about US$847.40) for salt, seasoning powders and salted fish. The trip took about 10 to 25 days, depending on ARVN operations in the area. Early in 1969, the shopping detail was attacked by aircraft and three of the five-man detail were killed.

BM/SGN

MEMORANDUM

TO : SCP/TPE via BM/SGN

DATE : 30 June 1971

FROM : CP/SVN

REF. No. CP-V-71-311

SUBJECT : Monthly Report (June 1971).

After collecting notes and making up several pages of draft report, it all seemed to be a collection of deficiencies and problems which from past experience has indicated gets little attention and no action. Therefore it was decided to summarize and forget the details.

Thieft, armed robbery and robbery by the National Police were all items of note during the month. The armed robbery was in an employee's driveway at noontime. The police were making a two o'clock in the morning house search and after they departed a number of items were found missing. Needless to say, nothing has been done on there or any other illegal acts, nor is anyone so optomistic as to believe anything ever will be done or even attempted to provide assistance.

Many man-hours have and are being expended getting ration and identification cards and re-registration of vehicles. Many copies of numerous forms and trips to downtown Saigon are time consuming, hazardous and completely frustrating. Leave, STO and official travel is potentially going to be a problem until the new visas are granted. It turned out that the problem was not the VN, but rather USAID who was holding up the process. Some of the applications dated back to March and were sitting in USAID without action. It is reported that the situation has improved, but there has been no indication of the "improvement" as yet.

Scheduling was put on the carpet to comply with the restrictions of the Flight Time Standards and get the training accomplished to have the C47s operational by the first of July. Mr. Reed Chase, who arrived from Vientiane to replace Frank Smith, who is leaving the company, has done a fine job thus far. With the resignation of one the expericnced schedulers, as well as Gordon Smith, the number two scheduler, the section is operating short handed. In spite of this, there have been a minimum of serious problems and the schedule has required less (emergency) waivers that were needed in the past. Hopefully this will be a turning point in the overall shortcommings of the Scheduling Section, although as long as we are forced to comply with the limitations of the Flight Time Standards we will have problems in meeting the heavy loads the customer often has to impose to meet his requirements for student moves and other such surges in flying. It is the same old story of "feast and famine". If the time is spread out over the whole month it is easy to meet, but it just never comes out that way.

ASCP-A's visit to Saigon came at an appropriate time when the C47 "reactivation" was announced. His presence helped considerably in smoothing over some of the problems and "special considerations" required from FEPA to keep operating and still get the necessary C47 training out of the way. It is believed that he also gained a much better insight on some of the local problems and contentions

.../...

FORM 5270300

CONT'D...

which have to be constantly dealt with. It would be nice to think that more of the "headquarters" types might make similar visits. After all, there are so many more enjoyable places to make "official visits".

CPSVN paid a visit to Taipei to sit in on the VN100 contract negotiations in regards to crew manning. Many problems were resolved otherwise in conference with SCP and ASCP-A.

FEPA continues to be the main source of information regarding what is going on and planned for the company (e.g. message "Walton F71/290001 from FEPA President to FEPA SVN/UTH/VTE). While the example is not a critical item, it is demoralizing that FEPA can advise their members of what is happening and the company does not so advise its managers and supervisors. This puts the managers and supervisors in the field, continiously on the defensive. We have no official sanction with which to debate or accept their published word.

BM/SGN

MEMORANDUM

TO : SCP/TPE via BM/SGN

DATE : 30 July 1971

FROM : CP/SVN

REF. No. CP-V-71-366

SUBJECT : Monthly Report (July 1971).

All of the problems previously reported seem to continue with the exception of visas for the cockpit-crews. These have mostly been issued or at least the work-permits have been approved. Harassment by police, customs and immigration officials continue, with middle of the night house searches by police, reminiscent of Germany in the 30's, becomming more prevalent daily. Bribery and/or theft are to be expected as the least of the losses to be expected if personnel receive one of these visits. No help, support or symathy is expected or received from the US Embassy on these matters.

The National Police did come up with one new form of harassment this month. When B910 returned from TNN, it was late in the evening and the passengers, crew and cargo cleared immigration and customs without any difficulty. When everyone arrived at AAM Traffic the National Police delayed them over an hour and a half for no apparent reason. No further searches or checks were made. The only two assumptions which could be drawn, they were looking for a pay-off or it was just open harassment. The fact that two of the passengers were the wife and son of the Chief of USAID Air Operations made no apparent difference. Perhaps this may generate some relief from such foolishness in the future. At least we can be optimitic.

The C47's (3) were returned to service 1 July 71. So far we have met all schedules ~~by hook and crook~~. We have 3 of the assigned crews in service. The balance of manning is made up of pilots "borrowed" from other programs. Since the scheduling of the C47's have been very heavy during the month we have been denied training aircraft by the customer. CP/VTE and CP/BKK have been assisting us in our training. We have yet to begin initial training on two assigned PIC and one SIC. We have 2 SIC's requiring proficiency checks and we have one SIC yet to report in from BKK.

AVPFO made an overnight visit and conducted a short pilots meeting regarding the forthcomming furloughs. Due to his very brief stay he was unable to have a "question and answer" session, consequently all of those who could be affected by the cut-back are in rather low spirits pending the outcome of their immediate future and the overall impact on their position with the company.

FEPA's intelligence system continues to be the first to know of what is going on and they have seen fit to advise us as to what is programed for the company and the station. Their information has proven to be accurate more often than not, even though some of their information is in the form of rumor or "word-of-mouth".

Generally the month could best be summed up as one of apathy. The reduction in force, lack of information as to what was either going on or programed supressed any feelings of interest or loyality that might otherwise have been in evidence.

REPORT NO. CS-311/05834-71

COUNTRY: CAMBODIA

DATE DISTR. 6 AUGUST 1971

DOI: MARCH 1970 - 17 JUNE 1971

SUBJECT: VIET CONG/NORTH VIETNAMESE ARMY (VC/NVA) AND KHMER COMMUNIST (KC) GENERAL SITUATION IN TUK PHOS DISTRICT OF KOMPONG CHHNANG PROVINCE AREA, INCLUDING INFORMATION ON CAPTURED AMERICAN JOURNALIST

Photographs

ACQ: [redacted]

SOURCE: [redacted]

[redacted]

APPROVED FOR RELEASE
Date JUN 1978

ENCLOSURE 42-43-44 106-4H.

SUMMARY: THERE ARE THREE VC/NVA AND FIVE KC INSTALLATIONS IN THE VICINITY OF THE PHNOM DISTRICT OF KOMPONG CHHNANG PROVINCE. THE VC/NVA INSTALLATIONS ARE A MILITARY ENCAMPMENT, A HOSPITAL-AMMUNITION DEPOT AND A REST-AND-RECREATION CAMP. THE KC INSTALLATIONS ARE THE PROVINCE HEADQUARTERS, SECTOR HEADQUARTERS, DISTRICT HEADQUARTERS, A PRINTING PLANT AND A POW CAMP AT WHICH AN AMERICAN JOURNALIST IS IMPRISONED. THE VC/NVA, ALTHOUGH NUMERICALLY INFERIOR, APPEAR TO DOMINATE THE KC. THE VC/NVA AND KC STRICTLY CONTROL THE AREA ECONOMY AND ENJOY UNTROUBLED, ALBEIT SOMETIMES STRAINED, RELATIONS WITH THE LOCAL INHABITANTS. END SUMMARY.

1. VC/NVA COMPANY D44, 150 MEN UNDER AN UNKNOWN COMMANDER, IS CAMPED AROUND THE THREE HILLS COMPRISING PHNOM KRANG (VU 295562). ITS MISSION IS TO INTERDICT COMMUNICATION ROUTES AND HARASS FANK TROOPS. VC/NVA ARMS INCLUDE ONE 82MM MORTAR, TWO 60 MM MORTARS, SOME B40 ROCKET LAUNCHERS, TWO CHINESE 30 CALIBER MACHINE GUNS, AND AK47 ASSAULT RIFLES. THE TROOPS SLEEP IN HAMMOCKS IN THE FORESTED AREA AROUND THE PHNOM AND HAVE FOXHOLES FOR PROTECTION AGAINST ATTACK. THERE ARE THREE OR FOUR CLOSELY GUARDED CAVES IN THE PHNOM. [redacted] COMMENT: [redacted] ON ONE OCCASION HE SAW ABOUT 20 JERRYCANS BEING CARRIED FROM ONE OF THE CAVES. HE DOES NOT KNOW WHAT THEY CONTAINED.)

2. A VC/NVA AMMUNITION STORAGE AND HOSPITAL AREA COMMANDED BY AN UNKNOWN COMMANDER IS LOCATED AT PHUM CHREAV (VU 2315). INCLUDING PERMANENT PARTY PERSONNEL AND HOSPITAL PATIENTS, THE NUMBER OF VC/NVA IS APPROXIMATELY 1000. ARMS AT THE BASE INCLUDE 60 AND 82 MM MORTARS, A BAZOOKA, B40 ROCKET LAUNCHERS [illegible]

THE SITE OF A POW CAMP, WHERE SPECIALLY BROUGHT-IN KC GUARDS WATCHED APPROXIMATELY 400 MINOR PRISONERS. PROBABLY IN MARCH 1971, IN AN EVENT MARKED BY GREAT FESTIVITY AND ATTENDED BY LOCAL

[redacted]

VILLAGERS, THE PONS WERE RELEASED AND DRIVEN TO THE VICINITY OF A FANK OUTPOST. [redacted] COMMENT: [redacted] WAS NOT VERY FAMILIAR WITH THIS INSTALLATION BECAUSE OF LIMITED ACCESS. FANK G-2 HAS NOT ATTEMPTED TO VERIFY THE PRISONER RELEASE IN ORDER TO CHECK [redacted] RELIABILITY.)

3. A FORESTED AREA IMMEDIATELY SOUTH OF PHUM AM LEANG (VU 2894), LOCATED IN KOMPONG SPEU PROVINCE WITHIN A KILOMETER OF THE KOMPONG CHHNANG PROVINCE LINE, IS THE SITE OF A VC/KVA REST-AND-RECREATION AREA WHICH ACCOMMODATES APPROXIMATELY 300 SOLDIERS AT A TIME. IT IS INFORMALLY SET UP BECAUSE OF ITS NON-STRATEGIC VALUE.

4. THE KC KOMPONG CHHNANG PROVINCE HEADQUARTERS IS LOCATED IN A COTTAGE COMPLEX SITUATED ABOUT 500-600 METERS NORTH OF A LINE DRAWN BETWEEN THE TWO SECTIONS OF TANG TALAT (VU 312257), WHICH IS LAID OUT ON AN EAST-WEST AXIS. EACH SECTION OF THE VILLAGE, SEPARATED FROM THE OTHER BY 60-70 METERS, CONSISTS OF TEN HOUSES. A PATH AND A STREAM (STUNG SRE BAK) PASS BETWEEN THE TWO SECTIONS. THE COTTAGE COMPLEX IS LAID OUT IN A ROUGHLY NORTH-SOUTH RECTANGLE, WITH FOUR COTTAGES LAID OUT IN A DIAMOND PATTERN IN THE CENTER.

5. THE SOUTHERNMOST COTTAGE IS THE HOME AND OFFICE OF N O N SUON, THE KC CHIEF OF KOMPONG CHHNANG PROVINCE. NON SUON IS AGED AROUND 50, IS TALL BY CAMBODIAN STANDARDS AND SLENDER, HAS GRAYING HAIR AND A VERY DARK COMPLEXION, AND IS SOFT SPOKEN. [redacted] COMMENT: [redacted] NON SUON WAS A MEMBER OF THE KHMER VIET MINH, AN ORGANIZATION OF CAMBODIANS WORKING WITH THE NORTH VIETNAMESE

[redacted]

CAMBODIA VIA POCHENTONG AIRPORT, IMMEDIATELY BEGINNING TO FOMENT REVOLUTION AGAINST THE NEW GOVERNMENT. IN 1956-57 HE DROPPED HIS MILITARY STANCE TO BECOME EDITOR OF THE ANTI-S I H A N O U K, COMMUNIST-FINANCED PHNOM PENH NEWSPAPER

[redacted]

RELEASED AT L O K MAL'S REQUEST IN 1970. HE LEFT PHNOM PENH TO BECOME ONE OF THE CHIEFS OF THE KHMER COMMUNIST PARTY. AS SUCH, HE ALSO WEARS THE HATS OF UNDERSECRETARY OF THE CENTRAL COMMITTEE OF THE PARTY AND CHIEF OF ADMINISTRATION FOR THE KC SOUTHWEST MILITARY REGION, WHICH CORRESPONDS GEOGRAPHICALLY TO THE FANK 2ND MILITARY REGION (TAKEO, KOMPOT, KOMPONG SPEU AND KOH KONG PROVINCES). THE PARTY CENTRAL COMMITTEE, WHICH ACTS AS THE LINK BETWEEN THE KC AND VC/NVA, MOVES ITS PERIODIC MEETING SITES FOR SECURITY REASONS. [redacted] COMMENT: SEE CS-311/05608-7 FOR ADDITIONAL INFORMATION ON KC PARTY PERSONALITIES. [redacted] NON SUON IS AGED AROUND 60, IS A NATIVE OF KOMPOT AND HAS HIS HEADQUARTERS NEAR PHNOM TAUCH (VT 5955) [redacted] A NO-MAN'S LAND IN THE THMAT POUNG REGION OF KOMPONG SPEU PROVINCE. ACCORDING TO THIS SOURCE, HE LIMPS FROM A THIGH WOUND INCURRED IN A 1970 ATTACK ON A FANK POST AT PURSAT. [redacted] NON SUON DOES NOT LIMP. [redacted] NON SUON IS A "SICK LION" WITH 600 HALF-ARMED, UNRELIABLE KC TROOPS UNDER HIS COMMAND. [redacted]

6. THE OTHER THREE COTTAGES ARE ADMINISTRATIVE OFFICES. TWO RICE STORAGE GRANARIES ARE SITUATED WITHIN THE COMPLEX TO THE NORTHWEST AND SOUTHEAST OF THE COTTAGES. TRENCHES ARE SCATTERED THROUGHOUT THE COMPLEX FOR PROTECTION AGAINST ATTACK. APPROXIMATELY 230 TROOPS ARE STATIONED WITHIN THE COMPLEX. OF THESE, 150 ARE VC/NVA / 80 VIETNAMESE CAMBODIANS BELONGING TO THE ADMINISTRATIVE OFFICES, SERVING AS SOLDIERS IN TIME OF NEED. MOST SLEEP IN HAMMOCKS SLUNG THE LENGTH THAT COVER THE COMPLEX. ARMS INCLUDE ONE 82 MM MORTAR, TWO 60 MM MORTARS, ONE [redacted]

30 CALIBER MACHINE GUN, AK-47 ASSAULT RIFLES AND OTHER RIFLES.

7. FIVE VEHICLES WERE ALLOTTED TO THE COMPLEX: THREE LAND ROVERS AND TWO HONDA MOTOR BIKES. TWO OF THE LAND ROVERS WERE ON A TRAIL SOUTHEAST OF TANG TALAT TRANSPORTING RICE TO THE COTTAGE COMPLEX IN JUNE 1970 WHEN A C-119 TRANSPORT PLANE STRAFED THEM, KILLING THREE MEN AND DESTROYING TWO OF THE LAND ROVERS. THE THIRD LAND ROVER IS NOW KEPT BENEATH A STILTED BUILDING IN WAT TANG PHLOCH (VU 320237).

8. THE HEADQUARTERS FOR SECTOR 18, ONE OF THE NUMEROUS SECTIONS INTO WHICH THE KC HAVE ADMINISTRATIVELY DIVIDED CAMBODIA, IS LOCATED AT PHUM MOUNG (VU 253241). THE CHIEF OF SECTOR 18, WHICH COMPRISES TUK PHOS, ROLEA . PEIR, KOMPONG LENG AND BABAUR DISTRICTS, IS 32 YEAR OLD U T H, WHO LEFT THE CAMBODIAN ARMED FORCES WHEN SHIHANOUK WAS OVERTHROWN. THE SECTOR HEADQUARTERS IS HOUSED IN THE ABANDONED BARRACKS OF A ONE-TIME MILITARY POST IN THE 100-HOUSE VILLAGE. THE 150 MEN AND WOMEN ASSIGNED TO PHUM MOUNG ARE DIVIDED INTO FOUR SECTIONS: PROPAGANDA, ECONOMIC, AND SUPPLY AND TRANSPORTATION, EACH WITH ABOUT 50 PEOPLE, AND COMMUNICATION AND LIAISON, 4 PEOPLE. THE INSTALLATION HAS NO VEHICLES, BUT IS ARMED WITH U.S. M1A1 CARBINES, U.S. M1 GARAND RIFLES, ENGLISH ENFIELD RIFLES, FRENCH MAS 36 RIFLES AND THOMPSON SUBMACHINE GUNS.

9. THE CHIEF OF TUK PHOS DISTRICT, A KC NAMED P A T H, HAS HIS HEADQUARTERS AT WAT VIVHEA BETNEAS (VU 270225). THE HEADQUARTERS IS LOCATED IN TWO BUILDINGS SITUATED TO THE WEST OF AND ACROSS A STREAM FROM THE PAGODA ITSELF. THE LARGER

[redacted]

WOMEN ASSIGNED TO THE INSTALLATION. THE OTHERS LIVE AND WORK IN A SMALLER, CORRUGATED IRON-TOPPED HOUSE. THE WOMEN OUTNUMBER THE MEN, THE TASKS OF ALL BEING MOSTLY ADMINISTRATIVE. THE HEADQUARTERS HAS NO VEHICLES AND IS ALLOTTED ABOUT 10 MAS 36

[redacted]

AND ENFIELD RIFLES.

10. (FIELD COMMENT: THERE FOLLOWS ADDITIONAL INFORMATION, [redacted] ON THE PRINTING PLANT DESCRIBED IN CS-311/05614-71.) THE FULL VILLAGE NAME IS PHUM TANG SYA, AND MORE ACCURATE COORDINATES ARE VU 268224. THE TRUCKS AT THE SITE ARE GMC AND NUMBER TWO, NOT THREE; THERE IS ONE BULLDOZER, NOT TWO. THE TRUCKS ARE USED TO TRANSPORT RICE TO AREA INSTALLATIONS AND AMMUNITION TO AREA VC/NVA CAMPS TWO OR THREE TIMES MONTHLY. WHILE RICE IS PURCHASED OR REQUISITIONED LOCALLY, AMMUNITION IS BROUGHT IN FROM NORTHEASTERN CAMBODIA ACROSS ROUTE 6 (AROUND VU 1351) AND ROUTE 5 (AROUND VU 6748). THE BULLDOZER IS USED TO CLEAR PERIODICALLY THE PATH LEADING FROM TANG SYA. ABOUT 1000 ISSUES OF THE NEWSPAPER "KONG TAP RUMDOS PRACHEACHON PADIVATH" ("ARMY OF LIBERATION OF THE PEOPLE'S REVOLUTION"), PRINTED HALF IN KHMER AND HALF IN VIETNAMESE, ARE PRINTED THREE TIMES MONTHLY AND CARRIED BY VEHICLE TO KRASANG DOH LAEUNG (VU 250289) AND PHUM MOUNG FOR FURTHER DISTRIBUTION THROUGHOUT THE AREA.

11. A VC POW CAMP IS LOCATED AT WAT KRASANG DOH LAEUNG, WHICH IS LOCATED IN THE 50-HOUSE VILLAGE OF THE SAME NAME. BEFORE JUNE 1971 SOME 500 PRISONERS GUARDED BY ABOUT 50 GUARDS WERE QUARTERED IN A WIRE-SURROUNDED PORTION OF THE VILLAGE AND IN THE PAGODA ITSELF. TURNING THE EVENT INTO A GALA AFFAIR, PROBABLY FOR PROPAGANDA PURPOSES, THE VC IN JUNE RELEASED THE PRISONERS HELD IN THE VILLAGE, DRIVING THEM TO THE VICINITY OF A FANK OUTPOST NEAR PHUM SDOK ACH ROMEAS (VU 4932). THE APPROXIMATELY 100 PRISONERS STILL HELD IN THE PAGODA ARE, WITH THE EXCEPTION OF [redacted] KHMER SOLDIERS. THE POWS, WHILE CLOSELY WATCHED BY [redacted], APPEAR WELL TREATED, ARE NOT LOCKED

OF THE GUARDS, THE [redacted] RICE AND OCCASIONAL VEGETABLES FOR THE PRISONERS BESIDE [redacted] ADDITIONAL FOOD DONATIONS MADE BY THE VILLAGERS TO THE BONZES (BUDDHIST MONKS) IN THE

[redacted]

[redacted]

PAGODA. THEY SLEEP IN THE BONZE DORMITORY. THE KC GUARD FORCE, WHICH WORKS IN SHIFTS AROUND THE CLOCK, IS REINFORCED AT KC REQUEST BY VILLAGERS, WHO ALSO PATROL THE AREA DAY AND NIGHT. WHILE THE KC HAVE THOMPSON AND CHINESE SUBMACHINE GUNS AND U.S. CARBINES, THE VILLAGERS HAVE ONLY FIVE RIFLES. THE KC COMMANDER AT KRASANG DOH LACUNG IS T A HOS (ALIAS).

12. AN AMERICAN JOURNALIST IS THE ONLY NON-KHMER PRISONER AT THE KRASANG PAGODA. HE IS IN HIS TWENTIES, TALL, WITH HAIR SHADED BETWEEN BLOND AND BROWN, HAS A SMALL MUSTACHE AND WEARS GLASSES. HE WAS CAPTURED ON ROUTE 4 PROBABLY IN FEBRUARY OR MARCH 1971, AND WAS SLIGHTLY WOUNDED IN THE LEFT FOREARM. AT TIME OF CAPTURE HE WAS WEARING A LONG-SLEEVED, STRIPED RED AND DARK BLUE OR BLACK SHIRT, BLACK TIE AND LIGHTWEIGHT GREEN-STREAKED-WITH-BLACK TROUSERS SOMEWHAT RESEMBLING CAMOUFLAGE PATTERN. HE ..SO HAS WHITE AND YELLOW SHIRTS AND DARK GRAY TROUSERS. SELECTED FOR PREFERENTIAL TREATMENT, HE ALSO DAILY RECEIVES A CHICKEN WHICH HE SHARES WITH A KHMER COLONEL. [redacted]

COMMENT: THE ABOVE INFORMATION PARALLELS THAT CONTAINED IN [redacted] SEEMING DISCREPANCIES ARE PROBABLY DUE TO DIFFERENT FOCUS OF QUESTIONING, TRANSLATOR ERROR OR [redacted] INCONSISTENCIES.)

13. ALTHOUGH INFERIOR IN NUMBER, THE VC/NVA APPEAR TO RULE THE ROOST. ORDERS CUSTOMARILY ORIGINATE WITH THE VC/NVA IN ACTIVITIES IN WHICH BOTH VC/NVA AND KC PARTICIPATE. AT COMMAND LEVEL, FOR EXAMPLE, NON SUON, WHO SPEAKS VIETNAMESE, DOES NOT RECEIVE MOST INCOMING MESSAGES; THE UNNAMED NON-KHMER SPEAKING VC/NVA RANKING OFFICER AT TANG TALAT DOES. ALSO, THE

BY THE VC/NVA. AT A LOWER LEVEL, A VC/NVA SOLDIER ONCE TOOK A CHINESE SUBMACHINE GUN FROM A KC SOLDIER BECAUSE IT WAS BETTER THAN HIS OWN WEAPON. ALSO, IN THE TRANSPORTATION OF AMMUNITION THE MANUAL LABOR WAS LEFT TO THE KC.

14. ALTHOUGH SECTORS OF THE LOCAL POPULATION ACTIVELY SUPPORT THE VC/NVA AND KC, THE VILLAGERS ARE GENERALLY PASSIVELY ANTI-COMMUNIST. FOR EXAMPLE, WHEN ASKED TO PROVIDE CERTAIN FOOD ITEMS BY VC/NVA OR KC SOLDIERS, MOST VILLAGERS IN KRASANG DOH LAEUNG ADOPT A "THERE IT IS, GET IT YOURSELF" ATTITUDE. A MORE EXTREME EXAMPLE IS ALIENATION CAUSED BY OVERLY HARSH AND UNFAIR COMMUNIST PUNISHMENT. THE WIFE OF A FANK SOLDIER LIVING IN KOMPONG CHHNANG RECENTLY VISITED RELATIVES IN THE AREA. WHEN THE COMMUNISTS LEARNED OF THIS, THEY ARRESTED AND SHOT THE HEAD OF THE FAMILY FOR COLLABORATION WITH THE ENEMY.

15. IN THE ECONOMIC REALM, THE VC/NVA AND KC PROHIBIT THE TRANSPORTATION OR SALE OF LOCAL GOODS OUTSIDE THE AREA UNDER THEIR CONTROL. PERMANENT CONTROL POINTS ARE SET UP AT SUCH STRATEGIC LOCATIONS AS CROSSROADS TO ENFORCE THE RULING, BUT VILLAGERS OFTEN BYPASS THESE TO SELL GOODS OUTSIDE. ON THE OTHER HAND, THE IMPORTATION OF GOODS IS ENCOURAGED. ALTHOUGH THE POLICY IS PROBABLY ESTABLISHED AT A HIGHER ECHELON, ORDERS FOR THESE GOODS CONTROLS IN THE AREA ORIGINATE AT THE PROVINCE CHIEF LEVEL AND ARE TRANSMITTED TO THE DISTRICT LEADERS.

16. STRICT PRICE CONTROLS ARE IN EFFECT IN THE AREA, WITH FOLLOWING PRICES IN EFFECT:

A. 60 RIELS PER 20 LITERS OF RICE
B. 20 RIELS PER KILO OF PORK
C. 23 RIELS PER KOLO OF BEEF
D. 12 RIELS PER KILO OF FISH
E. 12 RIELS PER KILO OF CHICKEN
F. 5 RIELS PER KILO OF SALT.

VILLAGERS ARE REQUIRED TO GIVE 12 LITERS OF RICE PER MONTH AND 10,800 RIELS YEARLY, WITH THE MONEY BEING COLLECTED

[redacted]

[redacted]

ERRATICALLY ACCORDING TO NEED. THE POOREST INHABITANTS ARE
TAXED 28 LITERS OF RICE MONTHLY AND 1,800 RIELS A YEAR.

BM/SGN

MEMORANDUM

TO : SCP/TPE via BM/SGN

DATE : 1 Sep. 1971

REF. No. CP-V-71-430

FROM : CP/SVN

SUBJECT : Monthly Report (August 1971).

This should prove to be my last Monthly Activity Report as Chief Pilot/Saigon. I say this as I do have a request in the System Chief Pilot's office to allow me to return to the line as a line Captain. To date I have not received any official notice that my request has been received nor of any comtemplated action upon it, if it has been received. I have been advised by a number of pilots that I am to be replaced by Captain Harry Hudson sometime during the month of September. One pilot relayed to me a message from Captain Hudson to the effect that Captain Hudson would be here after returning from his leave. Also from the pilot body, I was informed that there would be another American Crew Scheduler assigned to CSS/SGN. Whether true or not, it is interesting to see how often these sources are our first indication of what is to take place. Their batting average in the past has been exceptional. It is most embarrassing to be constantly pre-empted by the pilot body on information which is thought would be officially announced to them rather than have this information always received from them. Rumors are the life blood in any working group. The pilot body here is no exception. It is perhaps sound philosophy to permit leakage of priviledged information to allow the employees to become adjusted to any given change well before the change is made.

The highlight of the month was the assignment of a new Base Manager. As with all new brooms, the seepings follows a different tack. The big change is the establishment of new duty hours, to be effective 1 September. The new duty day, 0900 to 1730 with a 30 minute lunch break, is the result of the shifting of emphasis to nigh-time aircraft maintenance. This, as indicated by BM/SGN and MTS/SGN, will produce approximately 54 more "Aircraft-Days" per month. What impact this will have upon crew scheduling is speculative. At present our manning is at the saturation point considering the Flight Time Restrictions. Then again with a more definite aircraft maintenance schedule, rather with a less vacillating maintenance schedule, may prove a boon to scheduling in reducing last minute changes, so prevelant in the past. Another big policy change directed by BM/SGN is a 30 day moratorimm on the adherence to the 30 hours in seven day Flight Time Restriction to equalize flight time and trip time within various programs. He has directed that pilots be flown outside the restrictions, through use of customer emergency waiver, even if there are pilots who are within the legal limits. Hopefully this will permit us to gain some ground and get back on reasonable footing. Under the present manning it has been somewhat hopeless, heretofore, and stay within the purview of the restrictions. The Base Manager also announced the abolishment of the CP/RW position. The CP/FW goes back to CP/SGN encompassing the Rotary-Wing Division/SGN. Another edict of the Base Manager having a great impact upon this department is the withdrawal of ground transportation priviledges for quarters to work to quarters of American personnel. Those affected are MCSS and SITI/SGN.

The Saigon Chapter/FEPA conducted elections for Chapter officers. The election was contested as not being legal according to their by-laws. This contest was upheld and a re-run is in the offing. As it was, the first "Election" generated

..../....

Cont'd.....

considerable amount of internal animosity between the two factions as well as animated interest both in management as well as the pilot body. It was enjoyable to be able to observe without having to really worry about one problem at least. It will be interesting to see how the re-run goes and if anything is really solved.

The final announcement of 71-73 Displacement was made. Suprisingly enough we here in Saigon were not overly effected. With minimum amount of training we should be off and running, provided of course we get the pilots as assigned. [redacted] We are still trying to get Rex Young from Bangkok. He was assigned here under the provisions of 70-10 announcement made last October. Now we are waiting for another [redacted] pilot from Bangkok as well, [redacted] To date nothing has been generated to start his transfer to Saigon. PM/SGN has not been informed that [redacted] is to be transferred consequently no efforts have been made towards applying for work permits and visas. This brings to light the same problems we encountered during the 70-10 shuffle. From our view down here it is apparent that Personnel Departments/ Division is not being coordinated with to effect a smooth transfer of pilots in conjunction with various bid awards. At least here at Saigon this is the case. It is suggested that the Personnel Managers at each station be copied on the bid award announcements. This with pre-issued policies regarding the mechanics of transfering the affected personnel should minimumize delays experienced last year.

In closing, I wish to express my sincere appreciation for having been allowed the priviledge of serving as Chief Pilot. The trust and faith the company placed in me by elevating me to the position three years ago, filled me with great pride and humility. I pray, that in the discharge of my duties, I in no way violated the trust and faith bestowed upon me. I hope that as Chief Pilot I have contributed to the success of the station and to the company.

MEMORANDUM

SUBJECT: American Journalists Held Captive by the VC/NVA in Kompong Cham Province

* * * * * * * * * * * * *

[redacted]

28 1 1257-04

[redacted]

1. As of 27 August 1971, two American journalists were being held prisoner by the Viet Cong/North Vietnamese Army (VC/NVA) in the Tapao plantation at WU 785380. Both had been held in the area since their capture, within two days of each other, in October or November of 1970. Both were captured near the Svay Antor airstrip at WT 4678 after having become separated from government units to which they had been attached. As of 27 August, both were in good health and were allowed considerable freedom of movement within the VC/NVA camp.

2. The older of the two newsmen appears to be between 40-45 years of age and is extremely tall. * He has receding blond hair and blue eyes, and always wears untinted glasses. He has a soft-spoken manner, and speaks French and Vietnamese.

3. The second journalist appears to be between 20-25 years of age, is about 6'2" tall, and heavily muscled. He has a full head of short black hair, and has blue eyes. He also speaks French and Vietnamese.**

4. Ever since their capture in late 1970, the two prisoners have been held at the headquarters of Khmer Communist (KC) Region 304. This headquarters is mobile, moving ev ery several dyas to various points in the Chup, Tapao, and Peam Cheang plantations.***

[redacted] Comparison made by t[redacted] with a European male of above average height indicates that the newsman is 6'5" or 6'6" tall.

** [redacted] said [redacted] that they had identified themselves [redacted] as U.S. nationals.

*** [redacted] said that until the capture of the two Americans, Region 304 headquarters had been in a fixed location. It is not clear whether the capture of the Americans was a factor in the new policy of continual relocation of this element.

MEMORANDUM

SUBJECT: Soviet Military Aid to North Vietnam

1. During 1965-70 the USSR provided an estimated $1.5 billion in military aid to North Vietnam, about three-quarters of total deliveries from Communist countries. Soviet deliveries rose rapidly during the first three years of the war to a peak of about in 1967 Thereafter, deliveries from the USSR declined

Estimated Communist Military Deliveries
to North Vietnam

	Million US $						
	1965	1966	1967	1968	1969	1970	Total
USSR							1,555
Communist China							590
Eastern Europe							5 a/
Total							2,150 b/

a. The cumulative value of deliveries from Eastern Europe during 1965-70 is estimated at $5 million.
b. Negligible amounts of military aid have also bee received from North Korea, Cuba, and Mongolia since 1966.

~~SECRET~~

2. The rise and fall in the military aid provided by the USSR is explained by North Vietnam's changing requirements for military equipment. During 1965-68, North Vietnam constructed an extensive air defense system composed of 25 to 30 surface-to-air missile battalions, hundreds of surface-to-air sites and thousands of antiaircraft guns. This system and its operation were made possible largely by deliveries of air defense equipment, missiles and AAA ammunition from the USSR. Deliveries for the build-up of North Vietnam's air defense system account for more than 85% of Soviet military aid during the past five years.

The overall military aid delivery picture is presented in the attached table. Following the bombing halt over North Vietnam, Soviet deliveries of air defense equipment and related munitions dropped sharply.

Estimated Soviet Air Defense Aid
to North Vietnam

	Million US $						
	1965	1966	1967	1968	1969	1970	Total
Total							1,364
AAA ammunition							666
SAM missiles							202
Air defense equipment							496

3. There is no evidence that political considerations, as opposed to Hanoi's reduced needs, explain the decline in military aid deliveries by the USSR in the last two years. Moscow's continuing willingness to supply North Vietnam with military aid was reaffirmed by Soviet President Podgorny during the course of his recent visit to Hanoi. However,

even if the USSR were to restrict deliveries in an effort to influence Hanoi's conduct of the war, its leverage would be severely limited. North Vietnam's essential requirement for continuing the war in the south consists largely of ground forces equipment, ammunition and trucks. If the Communist Chinese were to take on the entire task of providing this aid, the burden would not be unmanageable.

There are a few items which Communist China would have difficulty providing, such as MIG-21 aircraft and SA-2 missiles, but these are not presently essential to the conduct of the war.

4. The most probable outlook for the next several years is that Communist military aid deliveries to North Vietnam will remain at or near the 1970 level, assuming no major change in the scale of fighting on the ground and that the bombing of North Vietnam will not be resumed. Deliveries in 1971 may be slightly higher than in 1970 to offset losses incurred during Lam Son 719. The USSR evidently has been delivering tanks to replace some or all of the large number of tanks lost by North Vietnam during the campaign.

INFO Card:

P.W. CAMP (AP LONG BIEN PRISON)

[redacted] AND THE AMERICAN WERE ABLE TO COMMUNICATE WITH EACH OTHER [redacted] IN GOING OVER A LIST OF STATES [redacted] RECOGNIZED THE STATE OF VIRGINIA AND, WHEN SHOWN A ROAD MAP OF VIRGINIA, [redacted] PICKED OUT THE CITY OF VIRGINIA BEACH AS BEING PART OF THE PILOT'S ADDRESS. ACCORDING TO [redacted] THE PILOT WAS A LIEUTENANT, 1.8 METERS (5 FEET, 11 INCHES) TALL AND WEIGHED ABOUT 100 KILOGRAMS (220 LBS.). HE HAD BLOND, MEDIUM LENGTH HAIR, SQUARE FACE, THICK EYEBROWS, PLUMP CHEEKS, HIGH NOSE, WELL-TRIMMED MUSTACHE, SMALL EVEN TEETH, SQUARE CHIN, STOCKY BUILD AND DARK HAIR ON HIS ARMS AND CHEST.

2. IN EARLY 1967 AN AMERICAN F-105 FIGHTER PLANE WAS HIT BY A NORTH VIETNAMESE MISSILE OVER THANH BA DISTRICT, VINH PHUC PROVINCE. THE PILOT PARACHUTED INTO BINH QUYEN VILLAGE, PHU NINH DISTRICT, VINH PHUC PROVINCE, AND WAS CAPTURED BY A LOCAL MILITIA UNIT. [redacted] THE PILOT WAS TAKEN TO BINH QUYEN VILLAGE, WHERE HE WAS INTERROGATED FOR TWO HOURS BY DISTRICT AND PROVINCE PUBLIC SECURITY OFFICERS. THE INTERROGATION WAS IN VIETNAMESE AND THE PILOT DID NOT ANSWER THE QUESTIONS. A PUBLIC SECURITY CAPTAIN ARRIVED ON THE SCENE AND SPOKE TO THE PILOT IN ENGLISH. THE PILOT ANSWERED BUT [redacted] DID NOT UNDERSTAND WHAT HE SAID. THE PILOT WAS TAKEN TO HANOI BY AUTOMOBILE. THE PILOT WAS A CAPTAIN, 1.9 METERS TALL, WHO HAD LONG, RED, CURLY HAIR, LARGE EYES, LARGE RED NOSE, FAT CHEEKS, SMALL CHIN, THIN LIPS, SMALL UNEVEN TEETH AND YELLOW HAIR ON HIS ARMS. WHEN CAPTURED, HE WAS DRESSED IN A DARK BROWN FLIGHT SUIT AND WAS ARMED WITH TWO PISTOLS AND A KNIFE. [redacted] SAID THE PILOT WAS WOUNDED IN THE LEFT LEG.

3. IN SEPTEMBER 1969 [redacted] WHILE CROSSING THE LONG BIEN BRIDGE, HE OBSERVED ABOUT TEN AMERICAN PRISONERS, DRESSED IN BLACK SHIRTS AND SHORTS, [redacted]

SWEEPING THE BRIDGE. [redacted] WAS NOT CERTAIN WHERE THE PRISONERS CAME FROM BUT SAID THAT THERE WAS A PRISON CAMP NEAR THE LONG BIEN BRIDGE CALLED THE BEN PHA DEN (BLACK FERRY) CAMP. HE SAW ABOUT 40 PRISONERS IN THE CAMP. THE CAMP WAS ABOUT 500 METERS FROM THE LONG BIEN BRIDGE AND ABOUT 150 METERS FROM THE FERRY LANDING. IT WAS 25 METERS OFF THE DAI LO TRAN QUANG KAI HIGHWAY WHICH RAN FROM THE BRIDGE TO THE CAN DUC STREET INTERSECTION. BETWEEN THE BRIDGE AND THE CAMP WERE A MAINTENANCE SHOP ABOUT 50 METERS FROM THE BRIDGE, A GASOLINE STATION, BLACK FERRY LANDING ABOUT 300 METERS FROM THE BRIDGE, AND A CARPENTRY SHOP.

4. [redacted] SAID THE PRISON CAMP WAS BUILT OF STONE, 30 METERS LONG AND 2.5 METERS HIGH. A STONE FENCE THREE METERS HIGH WITH BARBED WIRE SURROUNDED THE CAMP, WITH A GUARD POST AT ITS ENTRANCE. [redacted] SAID THAT PRIOR TO 1969 THE CAMP HAD BEEN USED EXCLUSIVELY FOR THE DETENTION OF NORTH VIETNAMESE PRISONERS BUT SINCE 1969 HAD BEEN USED TO DETAIN AMERICAN PRISONERS WHO HAD BEEN TRANSFERRED FROM SON TAY PRISON. THERE WERE ONE CHINESE COMMUNIST ANTIAIRCRAFT BATTALION AND TWO NORTH VIETNAMESE ARMY BATTALIONS IN THE AREA. ACCORDING TO LIEUTENANT DOAN THAN D U C, AGED 39, AN INTERROGATION OFFICER IN CAMP, THE AMERICAN PRISONERS WERE TREATED WELL. THEY WERE GIVEN BREAD, MILK, CIGARETTES AND A SUBSISTENCE ALLOWANCE OF .80 DONG PER DAY (3.5 DONG ARE EQUIVALENT TO US$1.00 AT THE OFFICIAL RATE OF EXCHANGE). THEY HAD A CLUB AND WERE ALLOWED TO PLAY SOCCER, PING PONG AND OTHER SPORTS.

REFTEL A) CONTINUED THROUGH NIGHT 3-4 AND INTO DAY 4 FEB WHEN POSITION WAS REPORTED SURROUNDED. RELIEF COLUMN ARRIVED LATE AFTERNOON 4 FEB BUT DEFENDERS HAD ALREADY WITHDRAWN SOUTH AND WEST TO UNKNOWN LOCATION WITH UNKNOWN CASUALTIES. POSITION 4 KM WEST OF BAN GNIK WAS ALSO EVACUATED AFTER BEING SHELLED AND REPORTEDLY SURROUNDED AT SAME TIME. RLAF STRIKES YIELDED BDA OF 9 ENEMY PROBABLE KBA, 2 MORTARS DESTROYED AND ANOTHER DAMAGED.

2. ELSEWHERE IN MR IV, SHARP CLASH WITH ESTIMATED ENEMY BATTALION APPROX 20 KM EAST OF KHONG SEDONE ON 4 FEB RESULTED IN ONE FRIENDLY KIA, 6 WIA, 5 ENEMY KIA AND ESTIMATED 10 WIA. THERE WERE 2 ATTACKS BY FIRE AGAINST ROUTE 23/231 JUNCTION POSITIONS (5 FRIENDLY WIA) AND ONE CLASH APPROX 3 KM WEST SOUTHWEST OF BAN KENG GNAO (NO CASUALTIES).

3. IN MR II, THERE WERE 3 ATTACKS BY FIRE WITHOUT CASUALTIES AGAINST SAM THONG POSITIONS ON 3-4 FEB. THERE WERE SMALL CLASHES APPROX 6 KM WEST NORTHWEST AND APPROX 3 KM SOUTHEAST OF LONG TIENG (ONE FRIENDLY WIA). SKYLINE RIDGE PATROL FOUND BODIES OF 5 NVA AND ONE FRIENDLY. POSITION NORTHWEST OF PA DONG WAS AGAIN HEAVILY SHELLED WITHOUT CASUALTIES. NORTH OF PDJ, THERE WERE 2 CLASHES, ONE SHELLING AND ONE MINE INCIDENT SOUTH AND SOUTHWEST OF BOUAM LONG ON 2-4 FEB (ONE FRIENDLY KIA, 2 WIA). ENEMY SHELLED REFUGEE VILLAGE NORTH OF PHU CUM WITH UNKNOWN CASUALTIES ON 4 FEB. USAF REPORTED 9 TRUCKS DESTROYED AND 14 DAMAGED ON PDJ AND ALONG ROUTE 7 BOTH NORTHEAST AND WEST OF PDJ AS WELL AS ONE 37 MM GUN DESTROYED AND ONE 12.7 MM GUN DAMAGED.

4. AIR AMERICA CARIBOU CRASHED VICINITY PHA KHAO (SITE 14) APPROX 13 KM SOUTHEAST OF LONG TIENG ON 4 FEB WHILE MOVING MR III TROOPS. PRELIMINARY

Repayment Terms of Communist Aid to the Less Developed Countries

Economic Aid

1. During 1954-71, the Communist countries extended some $13 billion of economic aid to less developed countries (LDCs). Almost all of this aid has been provided as credits with fixed terms of repayment. 1/ Less than 5%, or about $600 million, was in grant aid. The People's Republic of China (PRC) provided about $355 million, more than three-fourths of which was allocated to Cambodia, Nepal, and Pakistan. 2/ The USSR provided $245 million of grant aid, largely to Afghanistan in 1959 for road construction. East European countries have provided only negligible amounts of grant aid to the LDCs.

2. The terms of repayment of Communist economic credits to the LDCs have changed little during the 18 years of the program. Chinese repayment terms always have been more liberal than those of other Communist donors. Its aid is interest-free and usually requires repayment over 10 years, after 5-10 year grace periods. In a few cases, however, China has permitted longer repayment periods. On the $400 million credit extended in 1970 for the Tan-Zam Railroad, China allowed 30 years for repayment after a 10 year grace period; a $110 million credit extended to Somalia in 1971 may carry 20 year terms as does the Chinese credit of $28 million provided to Afghanistan in 1965.

3. Soviet aid is provided under less favorable terms. Most Soviet credits call for repayment over 12 years at 2.5% beginning one year after project completion. These terms usually are applied to project-type aid administered by the Soviet State Committee on Foreign Economic Relations. More than 68% of the $7.6 billion of Soviet aid extended since 1954 has carried these terms.

4. Moscow has allowed longer repayment periods on about $1.2 billion of its aid. Nearly $400 million of aid to Afghanistan involve repayment periods ranging between 19 and 25 years with grace periods of 8-25 years. Algeria, Turkey, and Yemen (San'a) received more than $685 million of credits calling for repayment over 15 years.

---

1. Includes credits with amortization periods of five years or more.
2. Includes $107 million extended to Pakistan during 1964-68 as credits but converted to grants in 1972.

5. About 15% of total Soviet economic aid consists of supplier-type credits provided by the Soviet Ministry of Foreign Trade. These credits, which Moscow calls "commercial credits," often are allocated by recipient governments to private companies. They allow 5-10 years for repayment, carry interest of 3-3.5%, and require downpayments of up to 25%. Almost all Soviet aid to Latin America has consisted of such credits. The first major Soviet credit of this type was a $100 million credit to Argentina in 1958. 3/ During 1964-67, the USSR extended some $775 million of these credits, more than two-thirds of which went to Egypt, India, and Pakistan. During the past four years, Latin American countries have received about $115 million of these 5-10 year credits; Iraq, approximately $140 million; and Egypt, about $95 million. Nevertheless, this type of aid has not directly reduced Soviet project assistance, as is sometimes assumed, nor has it continued to grow as a percent of total aid extended. These credits, which accounted for almost 30% of total Soviet aid extended during 1964-67, were less than 15% of the aid provided in 1968-69 and 10% of 1970-71 extensions.

6. Aid extended by East European countries almost always carries harder terms than that provided by the USSR or China. Downpayments often are required, repayments usually are made over 5-8 years and interest normally is set at 3-3.5% although it has ranged up to 7%. Occasionally, they have allowed 12 years, 2.5-3% terms. In 1971, about 45% of their aid to Latin American countries carried 12 year repayment periods.

7. Most Communist credits allow repayment in the local currency or goods of the aid recipient. The exceptions to this rule generally apply to countries, such as Indonesia, that do not have clearing agreements with Communist countries. The goods used for repayment often are the output of Communist-assisted plants. Some repayment arrangements are highly advantageous to the donor country, such as Iran's and Afghanistan's repayments in natural gas and Iraq's repayments in crude oil. They contrast with previous agreements with these LDCs that called for repayments in other commodities.

Military Aid

8. Communist military aid to the LDCs totaled about $9 billion at the end of 1971. Soviet assistance accounts for more than 85% of the total

3. This credit was reduced to the amount drawn ($29 million) when it expired in 1961.

#182

1. [redacted] REPORTED THAT VIET CONG (VC) MO CAY DISTRICT, VC BEN TRE PROVINCE, OPERATED TWO PRISON CAMPS DURING THE PERIOD 1960 TO 1969. [redacted] COMMENT: VC BEN TRE PROVINCE INCLUDES GOVERNMENT OF VIETNAM (GVN) KIEN HOA AND PART OF VINH LONG PROVINCES.) ONE CAMP WAS FOR MILITARY PRISONERS, SUCH AS ARMY OF THE REPUBLIC OF VIETNAM (ARVN) AND REGIONAL FORCES (RF) TROOPS, AND THE SECOND PRISON WAS FOR PERSONS ACCUSED OF WORKING FOR GVN INTELLIGENCE SERVICES. [redacted] KNEW OF NO U.S. PRISONERS IN THESE TWO CAMPS DURING THIS PERIOD. THE CAMP FOR MILITARY PRISONERS USUALLY HELD ABOUT 20 PERSONS AND THAT FOR CIVILIANS FROM 30 TO 40. AS A GENERAL PRACTICE, PRISONERS WERE KEPT IN THE MILITARY PRISON CAMP FOR A PERIOD OF SIX MONTHS TO A YEAR, WERE INDOCTRINATED AND RELEASED. IN THE CIVILIAN PRISON CAMP, THOSE FOUND TO HAVE COMMITTED SERIOUS CRIMES AGAINST THE VC WERE INTERROGATED AND THEN SENTENCED BY A MILITARY COURT. SOME PRISONERS WERE SECRETLY EXECUTED, INCLUDING CHIN C U C, HAI M I E N, HAI C A T, CHIN C U O I, YEN S U O N G, NGUYEN VAN T I E P, HOANG V U, HO VAN C A M, NGUYEN VAN H Y AND NGUYEN CAN R E.

2. IN MID-1969, THE CENTRAL OFFICE FOR SOUTH VIETNAM (COSVN) ISSUED A DIRECTIVE TO THE VC MO CAY DISTRICT PARTY COMMITTEE INSTRUCTING IT TO REVIEW THE RECORDS OF ALL PRISONERS AND, BASED ON THE CRIMES WHICH HAD BEEN COMMITTED, TO DETERMINE WHETHER THEY SHOULD BE RELEASED OR EXECUTED. [redacted] SAID THAT PRISONERS HELD IN BOTH THE MILITARY AND CIVILIAN CAMPS AT THIS TIME WERE RELEASED AND NONE WERE EXECUTED. COSVN ALSO DIRECTED THAT THE DISTRICT PARTY COMMITTEE ESTABLISH TEMPORARY DETENTION FACILITIES AT THE DISTRICT AND VILLAGE LEVELS TO HOLD PRISONERS. THE DIRECTIVE STATED THAT THE CHANGE WAS NECESSARY TO ECONOMIZE ON FOOD AND TO RELEASE GUARDS FOR OTHER DUTIES. THE DIRECTIVE NOTED THAT A LACK OF SECURE AREAS IN THE PROVINCE WAS EXPOSING THE PRISON CAMPS TO GVN OPERATIONS AND THAT PRISONERS WOULD PROBABLY BE LESS EMBITTERED AGAINST THE VC IF RELEASED THEN, RATHER THAN LATER BY THE GVN FORCES.

3. [redacted] SAID THAT THE PRISON CAMPS IN VC NO CAY DISTRICT WERE NOT AT FIXED LOCATIONS. PRISONERS WERE INITIALLY INTERROGATED IN THE VILLAGE BY A TEAM FROM THE DISTRICT SECURITY SECTION OR SENT TO THE DISTRICT FACILITY FOR QUESTIONING. CHIN G A N G, CHIEF OF THE DISTRICT SECURITY SECTION, DECIDED WHETHER A PRISONER SHOULD BE EXECUTED OR INDOCTRINATED AND RELEASED. AT THE DISTRICT AND VILLAGE TEMPORARY CAMPS, IT WAS THE PRACTICE TO DIVIDE THE PRISONERS INTO GROUPS OF THREE, EACH MAN ROPED TO TWO OTHERS, AND PLACE THEM IN A CAMOUFLAGED TRENCH. TWO GUARDS WATCHED OVER EACH THREE-MAN GROUP AND THE TRENCH WAS SURROUNDED BY BOOBY TRAPS MADE WITH GRENADES. THE GUARDS WERE ORDERED TO MOVE THE PRISONERS IN CASE OF GVN OPERATIONS IN THE AREA, BUT AT TIMES THEY LEFT THE PRISONERS IN THE TRENCH UNTIL THE OPERATION WAS OVER. THEY ALSO HAD INSTRUCTIONS TO SHOOT A PRISONER IF HE ATTEMPTED TO ESCAPE AND, WHEN BEING PURSUED BY GVN TROOPS, A GUARD COULD SHOOT PRISONERS IF NECESSARY IN ORDER TO ESCAPE.

4. [redacted] SAID THAT WHEN A VILLAGE COMMITTEE WANTED TO CAPTURE A PERSON FOR A SPECIFIC REASON, THE COMMITTEE FIRST GOT THE APPROVAL OF THE DISTRICT SECURITY SECTION CHIEF. HOWEVER, IF A PERSON WAS ARMED AND OPERATING IN A VC AREA, HE COULD BE APPREHENDED WITHOUT PRIOR APPROVAL.

5. PRISONERS WHO WERE TO BE RELEASED WERE INDOCTRINATED BY VILLAGE SECURITY SECTION CADRES, BUT IF THE PRISONER WERE AN ARVN OFFICER, A CADRE FROM THE DISTRICT SECURITY SECTION WAS SENT TO CONDUCT THE INDOCTRINATION.

6. INSTRUCTIONS FROM COSVN SPECIFIED THAT U.S. PRISONERS WERE NOT TO BE RELEASED OR EXECUTED, BUT RATHER TO BE SENT BY THE MOST EXPEDITIOUS MEANS TO THE MILITARY REGION HEADQUARTERS. U.S. PRISONERS WERE CONSIDERED VERY IMPORTANT FOR PROPAGANDA EXPLOITATION AND WERE NOT TO BE MISTREATED.

7. BETWEEN MID-1969 AND 6 OCTOBER 1971, VC NO CAY DISTRICT HANDLED A TOTAL OF NINE PRISONERS, OF WHOM SIX WERE RELEASED AND THREE EXECUTED.

8. [redacted] COMMENT: THE JOINT PERSONNEL RECOVERY CENTER HAS COMMENTED THAT OTHER INFORMATION AVAILABLE SUBSTANTIATES THE REPORTED COSVN POLICY TOWARD ARVN, U.S., AND VIETNAMESE POLITICAL PRISONERS AS REPORTED ABOVE.)

9. [redacted] DISSEM: EMBASS; USAID CORDS 7TH AIR FORCE USARV NAVFORV 1021ST FAS 525TH MI GP OSI AT SAIGON: SENT TO CINCPAC PACFLT PACAF ARPAC [redacted]

Program Objectives
Special Operations Group, Counter Intelligence Staff

The Special Operations Group is responsible for managing and implementing the Agency program for collection and dissemination of information on the countersubversive aspect of counterintelligence. This responsibility includes:

A. Collection: Clandestine collection abroad of information on foreign (Soviet, Chinese Communist, Cuban, North Korean, North Vietnamese, the Communist Front of South Vietnam, [redacted] efforts to support/encourage/exploit domestic extremism and dissidence in the United States. These efforts include funding, training, propaganda, provision of safe haven, provision of alias documentation, etc. The collection emphasis is on foreign involvement, whether directly or by indirect third national leftist groups or individuals. Principal concern is for coverage of foreign involvement in the extremist antiwar movement, extremist student/youth/faculty groups, black extremism, Chicano extremism, Puerto Rican extremism, deserter/evader support and inducement, and international aspects of domestic underground media. Examples of organizations of interest with respect to possible foreign involvement therein include [redacted]

1.5(c)
1.6(d)(1)

1.5(c)
1.6(d)(1)

B. Dissemination: Information on the above subject, collected by all elements of this Agency, including the Clandestine Service, the Office of Communications, the Foreign Broadcast Information Service, and the Domestic Contact Service, is disseminated as obtained

APPROVED FOR RELEASE
15 OCT 1996

GERALD R. FORD LIBRARY

~~SECRET~~
EYES ONLY

via special reports series. The bulk of the disseminations are to the Federal Bureau of Investigation but disseminations are also made to other agencies, including the White House as appropriate.

C. Data Base Maintenance: Since all cable and dispatch correspondence in relation to the program is compartmented for reasons of operational security and sensitivity, and is not processed by either the Cable Secretariat or the Information Services Division (ISD) of the Clandestine Service, a complex, highly sophisticated system is utilized for the control and retrieval of this information. (An additional reason for the need for such a system is the receipt of a large volume of reporting from the Federal Bureau of Investigation which requires detailed retrieval capability for pertinent names cited, and which would not otherwise be retrievable under existing ISD procedures.) The control and retrieval system has an on-line remote query and remote input capability and is linked to an IBM 360/67 computer of the Office of Computer Services. Hardware involved includes nine IBM 2260 Cathode Ray Tube Terminals, five IBM 2741 Typewriter Terminals, one Data 100 Offline Printer, and one Data 100 Card Reader.

D. Production: In addition to disseminating pertinent information as collected, the Agency is responsible for preparation and provision of special reports, studies, and estimates on the sub-paragraph A above subject, in response to requirements levied upon it by other elements of the Government. To maximize compartmentation, such special studies, reports, or estimates are prepared by the Special Operations Group, rather than the DDI, utilizing either all information available to the Agency or all information available to the Government, depending upon the nature and scope of the particular requirement.

1999

7 July 1972

MEMORANDUM

Response to Questions on Soviet/PRC Airlift Capabilities to North Vietnam, Introduction of New Weapons, and Use of PRC Airfields

Question A. USSR/PRC Airlift Capabilities

1. What is the capacity of the PRC and the USSR to airlift to NVN? How many aircraft suitable for airlift operation does each nation have? (What portion of total Soviet airlift capability would be utilized to deliver the estimated maximum 1,540 metric tons per day?)

The USSR, and to a lesser extent the PRC, each have an independent capability -- aircraft, staging airports, and trained manpower -- to institute an airlift to NVN. The extent of this capability as measured against the limitations on available aircraft, airports, routes, and serviceability is discussed below. Rather than taking the 1540 tons as a given, we have worked through the methodology not only to answer the specific questions asked but to check on the validity of the 1540 ton estimate itself.

a. USSR

The USSR has some 2,900 high-performance transport aircraft in their combined military and civil inventories (see Table 1). Because of operational range and cargo carrying capacity however, it is probable that only the medium transport AN-12s and heavy transport AN-22s would be used in such an airlift and that only aircraft in the military inventory would be involved.

GROUP 1
Excluded from automatic downgrading and declassification

Moreover, for this analysis we assume only 385 AN-12s (of a total inventory of 963 aircraft of this type) and 10 AN-22s (of a total of 22) would be made available because of other military requirements. The following tabulation shows the cargo carrying capacity of this fleet of 395 aircraft, assuming one round trip per aircraft per day, and an 85% utilization factor for the first week, 75% the next week, and 50% thereafter.*

Time Period	Total Per Day			
	AN-12**	AN-22**	Daily Total	Weekly Total
1st seven days	2,350	700	3,050	21,350
2nd seven days	2,100	600	2,700	18,900
After 14 days	1,200	400	1,600	11,200

Under these conditions, the cargo carrying capacity of this fleet would permit over 40,000 tons of cargo to be airlifted during the first two weeks and more than 11,000 tons per week thereafter. We estimate that on a 50% utilization rate the USSR could probably maintain its airlift effectively for about 4 to 6 months during which period carriage would approximate 1,600 tons per day.***

---

* These utilization factors reflect historical experience of other Soviet airlift operations including those noted in field exercises within the Soviet Union. (See paragraph 2.)

** For the purposes of this estimate we have assumed that the AN-22 will carry its maximum payload of 88 tons and the AN-12s will carry a little over 7 tons. These loadings would permit either aircraft to fly non-stop to NVN. (See paragraph 4.)

***

Moreover, for this analysis we assume only 385 AN-12s (of a total inventory of 963 aircraft of this type) and 10 AN-22s (of a total of 22) would be made available because of other military requirements. The following tabulation shows the cargo carrying capacity of this fleet of 395 aircraft, assuming one round trip per aircraft per day, and an 85% utilization factor for the first week, 75% the next week, and 50% thereafter.*

Time Period	Total Per Day			
	AN-12**	AN-22**	Daily Total	Weekly Total
1st seven days	2,350	700	3,050	21,350
2nd seven days	2,100	600	2,700	18,900
After 14 days	1,200	400	1,600	11,200

Under these conditions, the cargo carrying capacity of this fleet would permit over 40,000 tons of cargo to be airlifted during the first two weeks and more than 11,000 tons per week thereafter. We estimate that on a 50% utilization rate the USSR could probably maintain its airlift effectively for about 4 to 6 months during which period carriage would approximate 1,600 tons per day.

* These utilization factors reflect historical experience of other Soviet airlift operations including those noted in field exercises within the Soviet Union. (See paragraph 2.)

** For the purposes of this estimate we have assumed that the AN-22 will carry its maximum payload of 88 tons and the AN-12s will carry a little over 7 tons. These loadings would permit either aircraft to fly non-stop to NVN. (See paragraph 4.)

b. PRC

Any airlift mounted by the PRC would essentially be a short haul operation. Nonetheless, such an operation would be hampered by the overall mix of available aircraft which is relatively obsolete and has limited cargo carrying capacities. For example, the PRC's combined military and civil air transport inventory numbers some 750 aircraft. Of this number, more than 60% (480) consist of the single engine AN-2 with a range of about 900 miles and a cargo capacity of 1.5 tons. An additional 63 are made up mainly of the twin engined LI-2 which can carry only about 3 tons and has a range of about 1200 miles. Ten other relatively modern aircraft, three Tridents and seven Vicounts, are excluded from consideration in this analysis because of their key role in Chinese civil and military air operations. We are, therefore, left with only about 207 aircraft for any airlift operation (see table 2). For this estimate we assume no more than one half of these aircraft (by type and subordination) would be made available for such an airlift. A larger allocation probably would cause massive dislocations of regular civil and military air traffic within the PRC. With these some 100 aircraft the PRC would be able to mount a relatively efficient airlift using close in staging bases in South China -- Kunming, Nanning, Ning Ming, and Fort Bayard. The following tabulation postulates the cargo carrying capacity for these aircraft subject to the same serviceability constraints applied to the Soviet fleet.*

Time Periods	Tons per Day	Tons per Week
1st week	600	4,200
2nd week	525	3,675
After 14 days	350	2,450

* Although the PRC would be operating older aircraft, their airlift would entail considerably shorter flight time. On this basis no changes were made in serviceability rates. In all cases the maximum cargo payload was used as the basis for calculations.

We estimate that during the first two weeks the PRC could move in about 8,000 tons of cargo and nearly 2,500 tons per week thereafter. At a 50% utilization, the PRC could probably maintain its airlift for about 3 to 5 months. At its peak the airlift could deliver about 600 tons per day which would be nearly halved after only two weeks.

2. What limiting factors exist in using PRC and USSR aircraft for airlift purposes?

Factors limiting the use of Soviet and PRC aircraft have been mentioned and taken into account in the estimates presented above. The constraints on aircraft serviceability may, indeed, be the single most important factor, particularly as they may affect the Soviet program because of its long haul nature. To the extent that aircraft suffer increasing levels of down time as the airlift proceeds, additional aircraft would either have to be added to the program or would have to be rotated in and out of the effort. Taking into account respective inventories, the USSR has greater flexibility than does the PRC.

3. What air routes and air terminal points might be utilized (including through India for USSR flights)?

The Soviet airlift could operate over two possible routes -- one via Tashkent-India-Burma-Laos and a second via Irkutsk transiting PRC airspace. Of the two, only the PRC route would be realistic; the distances (7,400 miles roundtrip) involved in the India route would reduce cargo carrying capacity by more than one half. The China route entails a roundtrip of about 5,000 miles. The effort could be launched from staging airports such as Tashkent, Omsk, Semipalatinsk, Novosibirsk, Usol'ye-Sibirskoye, and Irkutsk. The AN-22 aircraft would likely be operated from a single airport, probably Irkutsk. The AN-12s could operate from any or all of these six airports, but likely would be concentrated at one or two, including Irkutsk. Both aircraft would require a refueling stop either in North Vietnam or more likely at airports in southern China -- Kunming, Nanning, Ning Ming, and Fort Bayard. The terminal points in North Vietnam would be a few airports such as Yen Bai and Phuc Yen, but possibly including Cat Bai, Hanoi/Gia Lam, Kep, and Kien An. Because

of required runway length, the AN-22s would probably be limited to operating into Phuc Yen airport; the AN-12s could use all of the airports listed above. During the first week the Soviet estimate assumes a total of 335 flights per day handled by six airfields; 300 daily flights the second week; and 200 flights thereafter. The PRC estimate assumes a total 85 flights per day during the first week; 75 daily flights the second week; and 50 flights thereafter. North Vietnamese facilities could readily handle the PRC airlift, but they may be stretched to the maximum in handling the Soviet program which would require at its peak an average of more than 55 landings per day at each of the six airports, and at its lowest about 35 landings per day.

4. Assuming no authority to interdict USSR and/or PRC aircraft in-flight, what is our estimate of our capability to destroy items at the off-loading point?

The North Vietnamese would have difficulty in moving even the minimum daily tonnages contained in the Soviet estimate. Efficient movement would require expeditious handling and transporting of the cargo out of the environs of the airports. Some cargo almost certainly would be backed up and susceptible to destruction by air attack. If we assume that the airfields would not be attacked while the Soviet aircraft are on the ground, this means that the trucks might seek protection by being parked close to the Soviet or Chinese aircraft until nightfall at which time supplies would be moved out of the area. To the extent that night air attacks could be conducted on a sustained basis, the supply flows from the airfield would offer lucrative targets. However, at the present time most air attack are being flown during the day and it is questionable how effective night operations could be made under the high threat situation at most airfields -- the airfields in question are well defended by AAA, SAMs, and MIGs and the interdiction effort would be difficult and costly. Attacks against runways, however, would disrupt operations if carried out in a sustained and concentrated manner. Because of the much smaller tonnages involved, we anticipate that the North Vietnamese could handle the PRC airlift with much less difficulty, and could quickly disperse the arriving cargoes.

Question B. New Weapons

The introduction of a large, Soviet-manned SAM force into North Vietnam would seriously degrade US bombing capabilities in the area. Assuming such a force were to include improved SA-2 equipment and SA-3, SA-4, and SA-6 equipment, the effectiveness of US attacks against targets in North Vietnam would be reduced for several reasons:

a. The increased number of SAM launchers and the higher proficiency of Soviet crews would result in increased US aircraft losses.

b. The deployment of the SA-3 and SA-6 to North Vietnam would increase the low-altitude coverage of the air-defense system, thereby reducing US attack options.

c. The mobility of the SA-4 and SA-6 would make counterstrikes against these systems more difficult.

d. The greater number and variety of SAM systems would complicate the US electronic countermeasures problem.

Question C. Use of PRC Airfields

Several factors would limit the military advantage that might result from changing the rules of engagement to permit hot pursuit of North Vietnamese aircraft using China as a sanctuary. Combat in the Sino-North Vietnamese border regions would be conducted at minimum range for North Vietnamese aircraft but at long range for US land-based aircraft. Fuel constraints would impose at least some limits on tactics and maneuver for US aircraft, whereas the North Vietnamese would gain from the proximity of GCI radars immune from attack.

By far the greatest military disadvantage that must be considered in any decision to remove the buffer zone, however, could arise from the virtual certainty that accidential over-flights of Chinese territory would result, coupled with China's demonstrated willingness and capability to defend its airspace. The Chinese can conduct intensive air patrols of the entire North Vietnamese border, and even a brief intrusion into Chinese territory could draw an immediate response. A total of at least 150 Chinese jet fighters are currently based at Ning Ming, T'ien-yang, Nanning, Meng-tzu, and Ssu-mao airfields, and more could be deployed quickly to Ping-yuan-chieh (and to the other airfields as well) if the Chinese chose. All six airfields are within 100 nautical miles of the North Vietnamese border and capable of supporting defensive fighter patrols. Only MIG-19s and MIG-17s are now based in the border region, but small numbers of MIG-21s were active there during the previous US bombing campaign, and they could return on short notice.

a/ Excludes 480 AN-2 aircraft, 63 other aircraft types deemed unsuitable for a large cargo airlift and 3 Tridents and 7 Viscounts. Most of the piston type transports are capable of side-loading only and would therefore be restricted to handling relatively small size cargoes.

c. How many Latin American Governments follow this procedure? How many don't follow it?

There are 23 countries in OAS. Only a few trade with Cuba. There is small but growing exchange with Chile (sugar for beans and wine); with Peru (sugar for fish meal); and with Mexico. Mexican trade consists primarily of Cuban imports of Mexican corn, almost all of which are on Soviet account. Latin American islands trading with Cuba are Guadelupe, Martinique, and Jamaica. This trade, however, is insignificant. Available statistics on the trade of these countries with Cuba in 1971 is given in the tabulation below. (in US$ 1,000)

	Cuban Exports	Cuban Imports
Chile	15,000	15,000
Peru	Negl.	4,000
Mexico	6	70
Jamaica	Insig.	Insig.
Guadelupe	Insig.	Insig.
Martinique	Insig.	Insig.

Question 8. As far as Latin American policy goes, what difference does it make it they did ship government or government-financed cargo to Cuba?

In economic terms probably none. Of the trade mentioned above, we are not aware that any Latin American exports have involved government or government financed cargo. We doubt that there would be any significant amount of government or government financed trade with Cuba, with the possible exception of Chile.

TALK TO POWS ATTRIBUTED TO JANE FONDA

B121534 HANOI IN ENGLISH TO SOUTHEAST ASI 1830 GMT 10 JUL 72 B

((TEXT)) IN A COMMENTARY ON NIXON'S DECLALATION THAT HE HAS MADE

PROGRESS IN ENDING THE WAR AND PARTICULARLY IN ENDING AMERICAN

[redacted]

OLVEMENT IN THE WAR, VISITING AMERICAN ACTRESS JANE FONDA SAID
[redacted]
AY MORNING:

((RECORDED VOICE OF A WOMAN WITH AN AFRICAN ACCENT--FADES))

THE ELECTIONS IN THE UNITED STATES ARE DRAWING NEAR,

CHARD NIXON IS USING THE MOST CYNICAL AND CRIMINAL KINDS OF

IES AND TRICKERY TO FOOL THE AMERICAN OPINION AND WORLD OPINION

NTO BELIEVING THAT HE IS TRYING TO END THE WAR IN INDOCHINA, HOW

AN HE BE ENDING THE WAR WHEN HE IS KILLING MORE PEOPLE IN

NDOCHINA THAN EVER BEFORE, DROPPING MORE TONS OF BOMBS THAN

VER BEFORE CREATING MORE DAMAGE THAN EVER BEFORE, AND NOW BOMBING

HE DIKES IN THE RED RIVER DELTA, ENDANGERING THE LIVES OF 15

ILLION PEOPLE, AD THEIR CROPS AND ANIMALS,

HE IS COUNTING UPON WHAT HE BELIEVES THAT THE AMERICAN

AVE NO CONSCIENCE, HE BELIEVES THAT THE AMERICAN PEOPLE DON'T

ARE, SINCE THERE ARE FEWER AMERICAN LIVES BEING LOST, BUT HE IS

RONG, WE WILL LEARN THE TRUTH, INDIVIDUALS WHO HAVE COME HERE

AVE HAD THE HONOR TO HAVE COME HERE AND--AND MET--MEET THE VIETNAMESE

PEOPLE AND SEEN THE DAMAGE BEING DONE, WE WILL SPEAK OUT LOUDER

THAN EVER BEFORE, WE WILL EXPOSE HIS LIES, PARTICULARLY NOW IN

THIS MOST IMPORTANT TIME JUST PRIOR TO ELECTIONS,

WE KNOW THAT THERE IS ONLY ONE WAY TO END THE WAR, AND THAT

IS IN THE PARIS PEACE TALKS, THE ONLY WAY TO END THE WAR IS BY

[redacted] TO OURSELVES IN HONOR AND [redacted] AS TRUE PLACE-LO...G

CPLE TO THE SEVEN-POINT PROPOSAL PUT FORWARD LAST JULY 31ST

THE PROVISIONAL REVOLUTIONARY GOVERNMENT, THE UNITED STATES

ST SET A DATE UNCONDITIONALLY FOR ALL TROOPS--AIR TROOPS,

OUND TROOPS, AND CIA ADVISORS TO WITHDRAW FROM INDOCHINA, WE MUST

STOP THE SUPPORT OF THE THIEU CLIQUE AND LET THE PEOPLE OF SOUTH

VIETNAM TO DECIDE FOR THEMSELVES WHAT KIND OF GOVERNMENT THEY WANT

TO LIVE UNDER, AND WE WILL SPEAK OUT ABOUT THE SEVEN POINTS ALL

OVER THE WORLD.

((ANNOUNCER'S VOICE--FBIS)) COMMENTING ON U.S. ATTACKS ON NORTH

VIETNAM'S DIKES AND IRRIGATION WORKS, JANE FONDA SAID:

((RECORDED VOICE OF A WOMAN WITH AN AMERICAN ACCENT--FBIS))

A RELATIVELY SHOT TIME AGO ((WORDS INDISTINCT)) 3 YEARS AGO,

PEOPLE TOLD ME THAT THE UNITED STATES GOVERNMENT WAS COMMITTING

CRIMES IN--IN VIETNAM, CRIMES ON THE GROUND AGAINST THE PEOPLE AND

CRIMES FROM THE AIR WITH BOMBS, AND I REFUSED TO BELIEVE IT,

I THOUGHT VERY HARD BECAUSE I HAD BEEN BROUGHT UP TO

BELIVE THAT THE UNITED STATES GOVERNMENT STOOD FOR FREEDOM

AND DEMOCRACY, THEN I BEGAN TO STUDY--I BEGAN TO READ, I BEGAN

TO LISTEN TO REPORTS COMING FROM THE BATTLEFIELD, AND I BEGAN TO

TALK TO SOLDIERS, BRAVE HEROES OF THE WAR WOULD COME BACK FROM

INDOCHINA AND I WAS TOLD THAT IT IS WE WHO COMMITTED CRIMES,

S[redacted] WHO BURNED VILLAGES AND MASSACRED CIVILIAN PEOPLE AND

D THE VIETNAMESE WOMEN. IT IS WE WHO DID IT AND WE ARE

Y, AND WE WANT THE AMERICAN PEOPLE TO KNOW WHAT IS BEING DONE

THEIR NAMES.

AND AT THAT POINT I HAVE--HAD TO, LIKE TENS OF THOUSANDS OF OTHER

ERICAN PEOPLE, I HAD TO LET GO OF THE LIE. I HAD TO ADMIT TO

YSELF--AND WE ALL MUST--THAT SOMEWHERE ALONG THE WAY THE UNITED

TATES STOPPED BEING WHAT IT HOPED TO BE IN THE BEGINNING WHEN WE

IRST FOUGHT A REVOLUTIONARY WAR TO FREE OURSELVES FROM THE BRITISH,

ROM THE BRITISH CONTROL.

THIS IS WHAT IS A HAPPENING IN VIETNAM TODAY, IT IS A PEOPLE

IGHTING TO BE FREE. THEY ARE FIGHTING A RIGHTEOUS, REVOLUTIONARY

AR TO BE FREE AND INDEPENDENT THE WAY WE, THE AMERICAN PEOPLE,

DID IN THE BEGINNING OF OUR OWN COUNTRY. AND WE MUST ALLOW THEM

TO DO THIS, AND IF WE ARE ARE TRUE AMERICANS, AND IF WE TRULY

BELIEVE WHAT IT IS OUR COUNTRY STANDS FOR OR STARTED OUT TO STAND

FOR, WE MUST NOT ONLY STOP THESE BARBARIOUS ACTS BEING COMMITTED

AGAINST THE VIETNAMESE PEOPLE, BUT WE MUST HELP THEM ACHIEVE THEIR--

THEIR REVOLUTION.

WE MUST DO EVERYTHING WE CAN IN THE NAME OF DEMOCRACY AND FREDOM

TO ALLOW THEM TO LIVE IN PEACE AND INDEPENDENCE AND FREEDOM. WE

MUST TAKE THE OPPORTUNITY SINCE WE ARE HERE ON [redacted] THEIR SOIL--UNDER

T[illegible] CONDITIONS WE ARE HERE--TO STUDY THEIR CULTURE AND STUDY THEIR

I [redacted]

TORY AND TALK TO THE VIETNAMESE PEOPLE, TRY TO SENSITIZE OURSELVES

ANOTHER KIND OF CULTURE. ONE OF THE WORST THINGS THAT HAS

EN PLACE IN THE UNITED STATES, I BELIEVE, IS THAT WE ARE CUT

FROM OTHER PEOPLES AROUND THE WORLD. WE ARE--WE ARE MADE TO--TO

CK RESPECT FOR OTHER PEOPLES, PARTICULARLY PEOPLE WHO ARE NOT

HITE, AND I THINK THAT THIS IS WRONG, I FEEL THAT PEOPLE WHO ARE

ULY AMERICAN AND TRULY PATRIOTIC MUST SAY WE LOVE ALL PEOPLE,

ND WE HAVE TO UNDERSTAND HOW ALL PEOPLE LIVE, AND WE HAVE TO

ESPECT EVERYONE'S RIGHT FOR INDEPENDENCE.

AND, I'M SURE THAT YOU--THAT YOU KNOW THAT WE WISH THAT YOU

ONE HOME AS FAST AS POSSIBLE. I BELIVE THAT THE PEOPLE WHO

RE SPEAKING OUT AGAINST THE WAR, WHO ARE TRYING TO STOP

HE WAR--BY VOTING AGAINST MR. NIXON FOR ONE THING, BY ECONOMIC

OYCOTT FOR ANOTHER THING, AND BY EDUCATION AND PERSUASION AMONG

HE GENERAL AMERICAN PUBLIC--THAT IT IS WE WHO ARE DOING WHAT

S BEST TO GET YOU HOME AS FAST AS POSSIBLE. THE KEY TO THE

PRISONS IN THE NORTHERN PART OF VIETNAM IS IN NIXON'S HANDS,

T IS NIXON WHO--WHO WILL BE ABLE TO FREE ALL OF THE PRISONERS,

E CAN DO THIS BY [AUTHORING THE SEVEN-POINT PEACE PROPOSAL THAT

AS PUT FORWARD A YEAR AGO, LAST JULY,

IT IS VERY IMPORTANT FOR [redacted] TO UNDERSTAND THAT THE SOLUTION

YOUR PROBLEMS HAS EXISTED FOR 1 YEAR, FOR 1 YEAR, IF RICHARD

[redacted]

N AT THE PARIS PEACE TALKS LAST JULY HAD ADDRESSED HIMSELF

THE SEVEN-POINT PEACE PROPOSAL, WHICH IS RECOGNIZED BY

PLE ALL OVER THE WORLD AS BEING THE MOST JUST AND RIGHTEOUS

POSAL EVER PUT FORWARD BY ONE SIDE DURING A PERIOD OF WAR, ALL

YOU WOULD HAVE BEEN HOME WITHIN 3 MONTHS. AND WE THINK

HIS IS A CRIME,

WE THINK THIS IT IS A CRIME THAT THE PRESIDENT OF THE UNITED

TATES HAS CYNICALLY PREVENTED YOUR FREEDOM, HAS CYNICALLY LIED

O THE AMERICAN PEOPLE, MAKING THEM BELIVE THAT IT IS HE WHO IS

EKING PEACE, WHEN WE KNOW IT IS THE COUNTRARY,

WE HOPE THAT YOU ARE TAKING THIS TIME TO STUDY, TO LEARN, SO

HAT WHEN YOU COME HOME YOU CAN SPEAK TO THE REST OF THE AMERICAN

EOPLE, AND WE HOPE THAT WILL BE SOON, ((RECORDING ENDS--FBIS))

AMERICAN ACTRESS JANE FONDA ARRIVES FOR HANOI VISIT

RO61555 HANOI VNA INTERNATIONAL SERVICE IN ENGLISH 1542 GMT

5 JUL 72 B

[redacted]

((TEXT)) HANOI VNA JULY 5 "I COME TO VIETNAM AS A COMRADE," 100-459279-381 Enc.

LARED JANE FONDA ON HER ARRIVAL HERE TODAY FOR A VISIT TO NORTH

TNAM AT THE INVITATION OF THE VIETNAM COMMITTEE FOR SOLIDARITY

H THE AMERICAN PEOPLE.

THE AMERICAN ACTRESS SAID: "MY LIFE HAS CHANGED OVER THE PAST

EV YEARS BECAUSE OF MY RECOGNIZING THE HYPOCRISY AND CRIMINALITY

F A SUCCESSION OF U.S. GOVERNMENTS PARTICULARLY WITH REGARD TO VIETNAM,

LONG WITH TENS OF THOUSANDS FOF OTHER AMERICANS OF ALL AGES

ND CLASSES. THIS NEW CONSCIOUSNESS WAS AWAKENED BY THE VIETNAMESE

EOPLE. YOUR STRUGGLE, COURAGE, CULTURE HAS FORCED US TO RECOGNIZE

ERTAIN TRUTHS ABOUT OUR COUNTRY AND WHAT WILL BE NECESSARY TO CHANGE

T... I COME TO VIETNAM AS A COMRADE."

THE AMERICAN ACTRESS WHO HAS BEEN PLAYING AN ACTIVE ROLE IN

THE ANTI-WAR MOVEMENT IN THE UNITED STATES WAS WELCOMED BY

NGUYEN DINH THI, VICE-PRESIDENT OF THE HOST COMMITTEE, NGUYEN

HONG NGHI, SECRETARY GENERAL OF THE VIETNAM CINEMA WORKERS ASSOCIATION;

FILM ACTRESS TRA GIANG, AND OTHERS. 081542 [redacted] SH 88/2220Z JUL

JANE FONDA DESCRIBES IMPRESSIONS OF NORTH VIETNAM

SK127547 HANOI DOMESTIC SERVICE IN VIETNAMESE 1115 GMT

11 JUL 72 S

((TEXT)) FAMOUS U.S. MOVIE ACTRESS JANE FONDA ARRIVED

IN HANOI LAST SATURDAY BEGINNING HER VISIT TO THE DRV AT

[redacted]

INVITATION OF THE VIETNAM COMMITTEE FOR SOLIDARITY WITH THE AMERICAN PEOPLE

T AS U.S. AIRCRAFT,

NIXON'S ORDERS, HAVE VIOLENTLY AND BARBAROUSLY BOMBING

ULOUS AREAS OF HANOI CAPITAL. MEANWHILE NIXON BRAZENLY

ATED THAT "WE HAVE MADE PROGRESS IN ENDING THE WAR

D PARTICULARLY IN ENDING U.S. INVOLVEMENT IN THE WAR."

EXPRESSING HER VIEWS ON THIS STATEMENT, JANE FONDA

OLD OUR STATION CORRESPONDENT:

((STATEMENT IN ENGLISH, FADING INTO VIETNAMESE

RANSLATION--RECORDING)) AS THE U.S. PRESIDENTIAL ELECTIONS

RE DRAWING NEAR RICHARD NIXON IS USING CYNICAL WORDS

ND UGLY, CRIMINAL TRICKERY TO FOOL AMERICAN OPINION AND

ORLD OPINION INTO BELIEVING THAT HE IS TRYING TO END THE

AR IN INDOCHINA. HOW CAN HE END THE WAR WHEN HE KILLS MORE

EOPLE IN INDOCHINA THAN EVER BEFORE, DROPS MORE TONS OF

OMBS THAN EVER BEFORE AND CREATES MORE DAMAGE THAN EVER BEFORE?

E IS NOW DROPPING BOMBS ON DIKES AND DAMS IN THE RED RIVER

ELTA, THUS THREATENING THE LIVES OF 16 MILLION PEOPLE

AND THEIR CROPS AND LIVESTOCK. HE IS THINKING OF WHAT HE

BELIEVES THE AMERICAN PEOPLE NO LONGER PAY ATTENTION TO.

E THINKS THAT THE AMERICAN PEOPLE ARE NO LONGER INTERESTED

[redacted]

...S. CASUALTIES IN THAT WAR. BUT HE IS MISTAKEN.

...E WILL KNOW THE TRUTH. MANY PEOPLE HAVE COME TO

THAM AND MANY OTHERS HAVE HAD THE HONOR TO COME HERE

MEET THEIR FRIENDS--THE VIETNAMESE PEOPLE--AND SEE

...TH THEIR OWN EYES THE LOSSES CAUSED BY THE AMERICANS HERE.

OUGHT TO SPEAK OUT THAT TRUTH MORE EXTENSIVELY AND

...EARLY THAN EVER. WE WILL EXPOSE THAT DECEIT, ESPECIALLY

THE PRESENT, MOST IMPORTANT MOMENT PRIOR TO THE

...ECTIONS IN THE UNITED STATES.

WE KNOW THAT THE ONLY WAY TO END THE WAR THROUGH THE

...RIS PEACE TALKS IS TO RESPOND, IN HONOR AND IN THE CAPACITY

...F TRUE PEACE-LOVING PEOPLE, TO THE SEVEN-POINT PROPOSAL

...T FORTH BY THE PRGRSV ON 1 JULY 1971. THE UNITED STATES

/

...UST UNCONDITIONALLY SET A DEADLINE FOR THE WITHDRAWAL

...F ALL THE U.S. ARMED FORCES AND CIA ADVISERS FROM INDOCHINA.

...HE UNITED STATES MUST STOP SUPPORTING THE THIEU CLIQUE

...ND LET THE SOUTH VIETNAMESE PEOPLE DECIDE THE TYPE

...F GOVERNMENT AS THEY PLEASE; AND WE WILL CLEARLY PRESENT

...HESE SEVEN POINTS ALL OVER THE WORLD. ((END RECORDING))

FOLLOWING THIS, EXPRESSING HER FIRST IMPRESSIONS UPON

...RRIVING[redacted]

CIAL - PRESENTATION OF THE MAY 16 PEACE PROPOSALS

A NUMBER OF FIGHTERS, ARTISTS AND VICTIMIZED PEOPLE COMING

SOUTH VIETNAM. SHE WAS CORDIALLY RECEIVED BY NGUYEN PHU

, ACTING HEAD OF THE SPECIAL REPRESENTATION.

STATEMENT BY JANE FONDA, AFTER VISITING DIKES AND DAMS AT NAM

ICH HIT BY U.S. AIRCRAFT ((R--SUBHEAD TRANSMITTED IN VIETNAMESE

VNA--FBIS))

YESTERDAY MORNING ON JULY 12, I WENT TO THE DISTRICT OF NAM

ACH TO SEE THE DAMAGE THAT HAS BEEN DONE TO THE DYKES IN THAT

ISTRICT. AND I WONDERED WHAT HAS BEEN GOING ON WITH THE HANDS

F THOSE WHO WERE PULLING THE LEVER AND DROPPING THE BOMBS ON

HE FIELDS AND ON THE DYKES OF THE RED RIVER DELTA. DO YOU KNOW

OR EXAMPLE THAT FOR CENTURIES SINCE THE MIDDLE AGES, THE VIETNAMESE

EASANTS HAVE BUILT, BUILT UP, AND REINFORCED A GREAT COMPLEX

ETWORK OF DYKES WHICH HOLD BACK THE TORRENTIAL WATER OF THE RIVERS

LOWING DOWN FROM THE MOUNTAINS IN SUMMER DURING THE MONSOON SEASON.

ITHOUT THESE DYKES 15 MILLION PEOPLE'S LIVES WOULD BE ENDANGERED,

ND WOULD DIE BY DROWNING AND BY STRVATION. ANTHONY LEWIS

ROM THE NEW YORK TIMES WROTE AND ARTICLE JUST BEFORE I LEFT THE

.S. IN WHICH HE SAID THAT SUCCESSIVE U.S. ADMINISTRATIONS

AD REJECTED THE IDEAS OF BOMBING THE DYKES IN THE RED RIVER DELTA,

ECAUSE THEY ALL FELT THE DYKES AREN'T ENTIRELY MILITARY TARGETS.

[redacted] WAS ITS TYPE OF TERRORIST TACTIC THAT IS UNWORTHY OF AMERICAN

[redacted]PLE AND OF AMERICAN FLAGS. BUT TODAY, AMERICAN PHANTOM

S ARE BOMBING THE STRATEGIC POINTS IN THE DYKE NETWORKS

THIS AREA.

IN THE AREA WHERE I WENT YESTERDAY IT WAS EASY TO SEE THAT

HERE ARE NO MILITARY TARGETS. THERE IS NO IMPORTANT HIGHWAY,

HERE IS NO COMMUNICATION NETWORK, THERE IS NO HEAVY INDUSTRY,

HESE ARE PEASANTS. THEY GROW RICE AND THEY REAR PIGS. THEY

RE SIMILAR TO THE FARMERS IN THE MIDWEST MANY YEARS AGO IN THE

.S. THEY ARE HAPPY PEOPLE, THE PEACE-LOVING PEOPLE. WHEN I WENT

Y WALKING ON THE WAY TO THE DYKES TO SEE THE DAMAGE, WOULD IT

E MADE ENOUGH I WAS AN AMERICAN AND I WAS AFRAID OF THE REACTION

OULD BE TAKEN BY THE LOCAL PEOPLE. ((SENTENCE AS RECEIVED))

UT THEY LOOKED AT ME CURIOUSLY AND I SAW NO HOSTILITY IN THEIR

YES. I LOOKED VERY CAREFULLY. I THOUGHT CURIOUSLY. I AM

HE WOMEN. THEY SEEMED TO BE ASKING THEMSELVES: WHAT KIND OF

EOPLE CAN AMERICANS BE, THOSE WHO WOULD DROP ALL KINDS OF BOMBS,

O CARELESSLY ON THEIR INNOCENT HEADS, DESTROYING THEIR VILLAGES

ND ENDANGERING THE LIVES OF THESE MILLIONS OF PEOPLE. 140709

[redacted] 14/1233Z JUL

3T

:11c8 [redacted]

[redacted]

AT WAR. VIETNAM SEEMS TO LIVE IN PEACE AND IS NORTH

IND. THE COMBATANTS WHOM I HAVE MET ON THE STREETS DO NOT

A LIKE SOLDIERS, BUT LOOK AS PEACEFUL AND KIND AS

ILIANS AT WORK. I LOOKED AT THE EYES OF THE VIETNAMESE

OPLE WHOM I MET WHEN I CROSSED A BRIDGE ON MY WAY

) HANOI AND I WAS EXTREMELY SURPRISED BY THE FACT THAT I

AW NO MANIFESTATION OF HATRED FOR US, THE AMERICANS.

THOUGHT THE PEOPLE HERE WOULD MANIFEST THEIR HATRED FOR US,

HE AMERICANS, V BUT THE TRUTH IS COMPLETELY DIFFERENT.

HAVE BEEN EXTREMELY MOVED BY THIS, AND IT MADE ME

LEARLY REALIZE THAT I MUST ACT MORE AND MORE TO OPPOSE

HIS WAR AVIEND IT AND MAKE THE AMERICAN PEOPLE

LIZE THAT THE VIETNAMESE PEOPLE ARE FRIENDS OF OUR

MERICAN PEOPLE, NOT OUR ENEMY. ((END RECORDING)) iiiii5

JANE FONDA IN HANOI SAYS SHE WILL REPORT TO U.S. PUBLIC

R121518 PARIS AFP IN FRENCH 0817 GMT 12 JUL 72 C

(TEXT)) HANOI, 12 JUL--BY AFP CORRESPONDENT JEAN THOROVAL--AMERICAN ACTRESS JANE FONDA, WHO HAS BEEN VISITING HANOI SINCE LAST SATURDAY, HAS BEEN HONORED BY THE NORTH VIETNAMESE PRESS, THE PARTY PAPER NHAN DAN DEVOTED A LONG ARTICLE TO HER THE DAY AFTER HER ARRIVAL WITH A PHOTOGRAPH TAKEN AT THE GIA LAM AIRPORT WHICH SHOWS HER EMBRACING NORTH VIETNAMESE ACTRESS TRA GIANG. THIS FACT IS EXTREMELY RARE, SINCE IT INVOLVES A NONCOMMUNIST U.S. CITIZEN.

[redacted]

[redacted] PRESIDENT OF THE NORTH VIETNAMESE COMMITTEE OF SOLIDARITY WITH AMERICAN PEOPLE, GREETEDHERE WHEN SHE LEFT THE PLANE;

THE ARTS AND LETTERS NEWSPAPER, VAN-NGHE, DEVOTED A PAGE AND HALF THE ACTRESS, RECALLING HER MILITANT ACTIVITIES AND HER DIFFERENCES WITH THE U.S. GOVERNMENT, VAN-NGHE WROTE: JANE FONDA IS THE TYPE OF PERSON WHO IS AWARE THAT AS LONG AS THERE ARE MASSACRES IN THE WORLD, A PERSON CANNOT REMAIN A MERE SPECTATOR.

JANE FONDA TOLD THE AFP CORRESPONDENT THAT SHE HAD COME TO NORTH VIETNAM TO MAKE RADIO REPORTS AND WRITE ARTICLES FOR THE AMERICAN PUBLIC. THE ACTRESS SAID DURING THIS CONVERSATION THAT AMERICAN PUBLIC OPINION HAS PRESENTLY BEEN POISONED BY THE FALSE U.S. PROPAGANDA ON THE VIETNAM WAR AND THE BOMBING OF NORTH VIETNAM

JANE FONDA SAID THAT THE U.S. PILOTS WHO TAKE PART IN THE BOMBING ARE CONDITIONED ASSASSINS, HANDSOMELY PAID. THEY HAVE BEEN TOLD THAT BY BOMBING THE VIETNAMESE THEY ARE IN FACT ONLY BOMBING APES.

THE ACTRESS, ON HER VISIT TO NORTH VIETNAM, HAS ALREADY HAD THE OPPORTUNITY TO MEET SOME U.S. PILOTS WHO ARE PRISONERS OF WAR BEING HELD IN HANOI. SHE WILL VISIT THE INTERIOR AREAS AFTER MEETING WITH SEVERAL NORTH VIETNAMESE PERSONALITIES IN HANOI.

R140315 HANOI VNA INTERNATIONAL SERVICE IN ENGLISH 0246 GMT

14 JUL 72 B

((TEXT)) HANOI VNA JULY 14--CONTRARY TO THE STATEMENT OF U.S.

[redacted]

ARTICLE JUST BEFORE I LEF, THE UNITED STATES IN WHIC. HE SAID
T A SUCCESS--THE SUCCESSIVE AMERICAN ADMINISTRATIONS HAD REJECTED
IDEA OF BOMBING THE DIKES IN THE RED RIVER DELTA BECAUSE THEY
FELT THAT IT WAS A TYPE OF TERRORIST TACTIC THAT WE UNWORTHY
THE AMERICAN PEOPLE AND THE AMERICAN FLAG. BUT TODAY, AS YOU
NOW BETTER THAN I, PHANTOM JETS, AMERICAN PHANTOM JETS, ARE
OMBING AT STRATEGIC POINTS THE DIKE NETWORKS IN THIS AREA.
I IMPLORE YOU, I BEG YOU TO CONSIDER WHAT YOU ARE DOING.
N THE AREA WHERE I WENT YESTERDAY IT WAS VERY EASY TO SEE THAT
HERE ARE NO MILITARY TARGETS, THERE IS NO IMPORTANT HIGHWAY,
HERE IS NO COMMUNICATIONS NETWORK, THERE IS NO HEAVY INDUSTRY.
HESE ARE PEASANTS; THEY GROW RICE, AND THEY BREED PIGS, VERY
IMILAR TO THE FARMERS IN THE MIDWEST MANY YEARS AGO IN THE UNITED
STATES. PERHAPS YOUR GRANDMOTHERS AND GRANDFATHERS WERE NOT TO
IFFERENT FROM THESE PEASANTS. THEY ARE HAPPY PEOPL. THEY ARE A
EACELOVING PEOPLE.

WHEN I WENT BY, WALKING ON THE WAY TO THE DIKES TO SEE THE DAMAGE,
ORD HAD GOTTEN OUT THAT I WAS AN AMERICAN, AND I WAS AFRAID OF
WHAT THEIR REACTION WOULD BE. BUT THEY LOOKED AT ME CURIOUSLY,
AND I SAW NO HOSTILITY IN THEIR EYES, AND I LOOKED VERY CAREFULLY,
I SAW CURIOSITY. I SAY BEWILDERMENT. THEY SEEMED TO BE ASKING

SELVES WHAT KIND OF PEOPLE CAN AMERICANS BE AND WOULD DROP

SE KINDS OF BOMBS SO CALLOUSLY ON THEIR INNOCENT HEADS,

TROYING THEIR VILLAGES AND ENDANGERING THE LIVES OF THESE

LIONS OF PEOPLE.

ALL OF YOU, IN THE COCKPITS OF YOUR PLANES, IN ((WORDS INDISTINCT))

U ARE CALLING IN THE BOMBING RAIDS, ON THE AIRCRAFT CARRIERS,

OSE OF YOU WHO ARE LOADING THE BOMBS, THOSE OF YOU WHO ARE

EPAIRING THE PLANES, THOSE OF YOU WHO ARE WORKING ON THE 7TH

LEET, PLEASE, THINK WHAT YOU ARE DOING.

ARE THESE PEOPLE YOUR ENEMY? WHAT WILL YOU SAY TO YOUR CHILDREN

EARS FROM NOW WHEN THEY ASK YOU WHY YOU FOUGHT THIS WAR? WHAT

ILL YOU BE ABLE TO SAY TO THEM? ((RECORDING ENDS--FBIS))

YOU HAVE JUST LISTENED TO AMERICAN ACTRESS JANE FONDA'S

DDRESS TO U.S. PILOTS FLYING CRIMINAL RAIDS AGAINST NORTH VIETNAM

ON NIXON'S ORDERS, AFTER VISITING U.S. CRIMES IN DESTROYING

NORTH VIETNAM DIKES AND IRRIGATION WORKS. 13153[redacted]

VISITING BOMBED DIKES SEE B140315 HANOI VNA INTERNATIONAL ENGLISH

[redacted]

[redacted]

...VNA IN ENGLISH TO NAV[illegible] 0749 GMT 14 JULY 72 B

((FOR NGUYEN DUY PHUC, CORRESPONDENT OF VOICE OF VIETNAM))

((TEXT)) HANOI--VISITING AMERICAN ACTRESS JANE FONDA JULY 12 ...NT TO SEE THE DYKES BOMBED BY AMERICAN PLANES THE DAY BEFORE IN NAM SACH DISTRICT, HAI HUNG PROVINCE. SHE NOTED THAT IN THE AREA SHE VISITED, IT WAS EASY TO SEE THAT THERE ARE NO MILITARY TARGET, THERE IS NO IMPORTANT HIGHWAY, THERE IS NO COMMUNICATION NETWORK AND THERE IS NO HEAVY INDUSTRY. IN HER ASSESSMENT, THE U.S. HAS MADE DELIBERATE ATTACKS ON DYKES TO JEOPARDISE LIFE AND TERRORISE THE PEOPLE.

LATER SHE VISITED HONG PHONG VILLAGE, A REMOTE LOCALITY FAR FROM MAJOR COMMUNICATION LINES AND INDUSTRIAL CENTRES.

ON JULY 11, AT DAYBREAK WHEN THE VILLAGERS WERE ABOUT TO BEGIN ...ARM WORK, U.S. WAR PLANES RACED IN AND WANTONLY BOMBED A HAMLET IN THE VILLAGE. MANY HOUSES WERE BLASTED; FRUIT TREES MANGLED AND HOUSEHOLD FURNITURE WAS SERIOUSLY DAMAGED. TWO OLD PERSONS WERE KILLED AND MANY OTHERS WOUNDED.

JANE FONDA FELT GREAT INDIGNATION AT THIS U.S. ATTACK ON CIVILIAN POPULATIONS.

IN THE PAST FEW DAYS, SHE HAD CONTACTS WITH MANY WORKERS, PEASANTS AND INTELLECTUALS TO GATHER INFORMATION. SHE CALLED ON THE

[redacted]

[redacted] OF U.S. PLANES ON JULY [redacted] ONLY HIT MILITARY TARGETS [illegible] NAM

[illegible] DISTRICT, ABOUT 60 KILOMETRES EAST OF HANOI, ACTRESS

JANE FONDA NOW ON A VISIT TO NORTH VIETNAM ASSERTED THAT

"THERE WAS NO MILITARY TARGET" IN THE BOMBED AREA.

SHE WENT TO THE PLACE SHORTLY AFTER THE RAID TOOK PLACE

AND MADE THIS COMMENT OVER VOICE OF VIETNAM RADIO, ADDRESSING

TO ALL THE U.S. SERVICEMEN INVOLVED IN THE BOMBING OF NORTH

VIETNAM:

"YESTERDAY MORNING JULY 12 I WENT TO THE DISTRICT OF NAM

SACH TO SEE THE DAMAGE THAT HAS BEEN DONE TO THE DYKES IN THAT

DISTRICT, AND I WONDERED WHAT HAS BEEN GOING ON WITH THE HANDS OF

THOSE WHO WERE PULLING THE LEVER AND DROPPING THE BOMBS ON THE

FIELDS AND ON THE DYKES OF THE RED RIVER DELTA, DO YOU KNOW FOR

EXAMPLE THAT FOR CENTURIES SINCE THE MIDDLE AGES, THE VIETNAMESE

PEASANTS HAVE BUILT UP AND REINFORCED A GREAT COMPLEX

NETWORK OF DYKES WHICH HOLD BACK THE TORRENTIAL WATER OF THE

RIVERS FLOWING DOWN FROM THE MOUNTAINS IN SUMMER DURING THE MONSOON

SEASONS, WITHOUT THESE DYKES 15 MILLION PEOPLE'S LIVES WOULD BE

ENDANGERED, AND WOULD DIE BY DROWNING AND BY STARVATION.

ANTHONY LEWIS FROM THE NEW YORK TIMES WROTE AN ARTICLE JUST

BEFORE I LEFT THE U.S. IN WHICH HE SAID THAT SUCCESSIVE U.S.

[redacted]

[redacted] RED RIVER DELTA, BECAUSE THEY ALL FELT THE DYKES ARE NOT ENTIRELY
MILITARY TARGETS AND THAT THIS WAS THE TYPE OF TERRORIST TACTIC
THAT IS UNWORTHY OF AMERICAN PEOPLE AND AMERICAN FLAGS. BUT TODAY,
AS YOU KNOW BETTER THAN I, AMERICAN PHANTOM JETS ARE BOMBING
STRATEGIC POINTS IN THE DYKE NETWORKS IN THIS AREA.

I (IMPLORE) YOU, I BEG YOU TO CONSIDER WHAT YOU ARE DOING.
IN THE AREA WHERE I WENT YESTERDAY IT WAS EASY TO SEE THAT THERE
ARE NO MILITARY TARGETS, THERE IS NO IMPORTANT HIGHWAY, THERE IS NO
COMMUNICATION NETWORK, THERE IS NO HEAVY INDUSTRY. THESE
ARE PEASANTS. THEY GROW RICE AND THEY REAR PIGS. THEY ARE SIMILAR
TO THE FARMERS IN THE MIDWEST MANY YEARS AGO IN THE U.S. PERHAPS YOUR
GRANDMOTHERS AND GRANDFATHERS WOULD NOT BE SO DIFFERENT FROM THESE
PEASANTS. THEY ARE HAPPY PEOPLE, PEACE-LOVING PEOPLE. WHEN I WENT
BY WALKING ON THE WAY TO THE DYKES TO SEE THE DAMAGE, WOULD IT
BE MADE ENOUGH I WAS AN AMERICAN AND I WAS AFRAID OF THE REACTION WOULD
BE TAKEN BY THE LOCAL PEOPLE. ((SENTENCE AS RECEIVED)) BUT THEY
LOOKED AT ME CURIOUSLY AND I SAW NO HOSTIE IN THEIR EYES.

I LOOKED VERY CAREFULLY. I THOUGHT CURIOUSLY. I SAW THE WOMEN.
THEY SEEMED TO BE ASKING THEMSELVES: WHAT KIND OF PEOPLE CAN
AMERICANS BE, THOSE WHO WOULD DROP ALL KINDS OF BOMBS, SO CARELESSLY
ON THEIR INNOCENT HEADS, DESTROYING THEIR VILLAGES AND ENDANGERING
[redacted]

ALL OF YOU IN THE COCKPI[redacted] OF YOUR PLANES, ON THE A[illegible]RAFT

ARRIERS, THOSE WHOAARE LOADING THE BOMBS, THOSE WHO ARE

CPAIRING THE PLANES, THOSE WHO ARE WORKING ON THE 7TH FLEET,

LEASE THINK WHAT YOUR ARE DOING.

ARE THESE PEOPLE YOUR ENEMY? WHAT WILL YOU SAY TO YOUR

CHILDREN YEARS FROM NOW WHO MAY ASK YOU WHY YOU FOUGHT THE WAR?

WHAT WORDS WILL YOU BE ABLE TO AY TO THEM? 143246[redacted]

TALK TO POWS ATTRIBUTED TO JANE FONDA

R121534 HANOI IN ENGLISH TO SOUTHEAST ASI 1200 GMT 12 JUL 72 B

((TEXT)) IN A COMMENTARY ON NIXON'S DECLALATION THAT HE HAS MADE PROGRESS IN ENDING THE WAR AND PARTICULARLY IN ENDING AMERICAN

100-459279-395 En

[redacted] VISITING AMERICAN ACTIVISTS JANE FONDA SAID

MONDAY MORNING:

((RECORDED VOICE OF A WOMAN WITH AN AMERICAN ACCENT--FADE))

AS THE ELECTIONS IN THE UNITED STATES ARE DRAWING NEAR, RICHARD NIXON IS USING THE MOST CYNICAL AND CRIMINAL KINDS OF LIES AND TRICKERY TO FOOL THE AMERICAN OPINION AND WORLD OPINION INTO BELIEVING THAT HE IS TRYING TO END THE WAR IN INDOCHINA. HOW CAN HE BE ENDING THE WAR WHEN HE IS KILLING MORE PEOPLE IN INDOCHINA THAN EVER BEFORE, DROPPING MORE TONS OF BOMBS THAN EVER BEFORE CREATING MORE DAMAGE THAN EVER BEFORE, AND NOW BOMBING THE DIKES IN THE RED RIVER DELTA, ENDANGERING THE LIVES OF 15 MILLION PEOPLE, AD THEIR CROPS AND ANIMALS.

HE IS COUNTING UPON WHAT HE BELIEVES THAT THE AMERICAN HAVE NO CONSCIENCE. HE BELIEVES THAT THE AMERICAN PEOPLE DON'T CARE, SINCE THERE ARE FEWER AMERICAN LIVES BEING LOST. BUT HE IS WRONG. WE WILL LEARN THE TRUTH. INDIVIDUALS WHO HAVE COME HERE HAVE HAD THE HONOR TO HAVE COME HERE AND--AND MET--MEET THE VIETNAMESE PEOPLE AND SEEN THE DAMAGE BEING DONE, WE WILL SPEAK OUT LOUDER THAN EVER BEFORE. WE WILL EXPOSE HIS LIES, PARTICULARLY NOW IN THIS MOST IMPORTANT TIME JUST PRIOR TO ELECTIONS.

WE KNOW THAT THERE IS ONLY ONE WAY TO END THE WAR, AND THAT [redacted]

PEOPLE TO THE SEVEN-POINT PROPOSAL PUT FORWARD LAST JULY 31ST BY THE PROVISIONAL REVOLUTIONARY GOVERNMENT, THE UNITED STATES MUST SET A DATE UNCONDITIONALLY FOR ALL TROOPS--AIR TROOPS, GROUND TROOPS, AND CIA ADVISORS TO WITHDRAW FROM INDOCHINA, WE MUST STOP THE SUPPORT OF THE THIEU CLIQUE AND LET THE PEOPLE OF SOUTH VIETNAM TO DECIDE FOR THEMSELVES WHAT KIND OF GOVERNMENT THEY WANT TO LIVE UNDER, AND WE WILL SPEAK OUT ABOUT THE SEVEN POINTS ALL OVER THE WORLD.

((ANNOUNCER'S VOICE--FADE)) COMMENTING ON U.S. ATTACKS ON NORTH VIETNAM'S DIKES AND IRRIGATION WORKS, JANE FONDA SAID:

((RECORDED VOICE OF A WOMAN WITH AN AMERICAN ACCENT--FADE))

A RELATIVELY SHORT TIME AGO ((WORDS INDISTINCT)) 3 YEARS AGO, PEOPLE TOLD ME THAT THE UNITED STATES GOVERNMENT WAS COMMITTING CRIMES IN--IN VIETNAM, CRIMES ON THE GROUND AGAINST THE PEOPLE AND CRIMES FROM THE AIR WITH BOMBS. AND I REFUSED TO BELIEVE IT. I THOUGHT VERY HARD BECAUSE I HAD BEEN BROUGHT UP TO BELIEVE THAT THE UNITED STATES GOVERNMENT STOOD FOR FREEDOM AND DEMOCRACY. THEN I BEGAN TO STUDY--I BEGAN TO READ, I BEGAN TO LISTEN TO REPORTS COMING FROM THE BATTLEFIELD, AND I BEGAN TO TALK TO SOLDIERS. BRAVE HEROES OF THE WAR WOULD COME BACK FROM INDOCHINA AND I WAS TOLD THAT IT IS WE WHO COMMITTED CRIMES.

RAPED THE VIETNAMESE WOMEN. [redacted] IT IS HE WHO DID IT AND WE ARE SORRY, AND WE WANT THE AMERICAN PEOPLE TO KNOW WHAT IS BEING DONE IN THEIR NAMES.

AND AT THAT POINT I HAVE--HAD TO, LIKE TENS OF THOUSANDS OF OTHER AMERICAN PEOPLE, I HAD TO LET GO OF THE LIE. I HAD TO ADMIT TO MYSELF--AND WE ALL MUST--THAT SOMEWHERE ALONG THE WAY THE UNITED STATES STOPPED BEING WHAT IT HOPED TO BE IN THE BEGINNING WHEN WE FIRST FOUGHT A REVOLUTIONARY WAR TO FREE OURSELVES FROM THE BRITISH, FROM THE BRITISH CONTROL.

THIS IS WHAT IS A HAPPENING IN VIETNAM TODAY, IT IS A PEOPLE FIGHTING TO BE FREE. THEY ARE FIGHTING A RIGHTEOUS, REVOLUTIONARY WAR TO BE FREE AND INDEPENDENT THE WAY WE, THE AMERICAN PEOPLE, DID IN THE BEGINNING OF OUR OWN COUNTRY. AND WE MUST ALLOW THEM TO DO THIS. AND IF WE ARE ARE TRUE AMERICANS, AND IF WE TRULY BELIEVE WHAT IT IS OUR COUNTRY STANDS FOR OR STARTED OUT TO STAND FOR, WE MUST NOT ONLY STOP THESE BARBARIOUS ACTS BEING COMMITTED AGAINST THE VIETNAMESE PEOPLE, BUT WE MUST HELP THEM ACHIEVE THEIR-- THEIR REVOLUTION.

WE MUST DO EVERYTHING WE CAN IN THE NAME OF DEMOCRACY AND FREDOM TO ALLOW THEM TO LIVE IN PEACE AND INDEPENDENCE AND FREEDOM. WE MUST TAKE THE OPPORTUNITY SINCE WE ARE HERE ON [redacted] THEIR SOIL--UNDER

[redacted] ARE [illegible] [redacted] AND STUDY THE HISTORY AND TALK TO THE VIETNAMESE PEOPLE, TRY TO SENSITIZE OURSELVES TO ANOTHER KIND OF CULTURE. ONE OF THE WORST THINGS THAT HAS TAKEN PLACE IN THE UNITED STATES, I BELIEVE, IS THAT WE ARE CUT OFF FROM OTHER PEOPLES AROUND THE WORLD. WE ARE--WE ARE MADE TO--TO LACK RESPECT FOR OTHER PEOPLES, PARTICULARLY PEOPLE WHO ARE NOT WHITE. AND I THING THAT THIS IS WRONG, I FEEL THAT PEOPLE WHO ARE TRULY AMERICAN AND TRULY PATRIOTIC MUST SAY WE LOVE ALL PEOPLE, AND WE HAVE TO UNDERSTAND HOW ALL PEOPLE LIVE, AND WE HAVE TO RESPECT EVERYONE'S RIGHT FOR INDEPENDENCE.

AND, I'M SURE THAT YOU--THAT YOU KNOW THAT WE WISH THAT YOU COME HOME AS FAST AS POSSIBLE. I BELIVE THAT THE PEOPLE WHO ARE SPEAKING OUT AGAINST THE WAR, WHO ARE TRYING TO STOP THE WAR--BY VOTING AGAINST MR. NIXON FOR ONE THING, BY ECONOMIC BOYCOTT FOR ANOTHER THING, AND BY EDUCATION AND PERSUASION AMONG THE GENERAL AMERICAN PUBLIC--THAT IT IS WE WHO ARE DOING WHAT IS BEST TO GET YOU HOME AS FAST AS POSSIBLE. THE KEY TO THE PRISONS IN THE NORTHERN PART OF VIETNAM IS IN NIXON'S HANDS. IT IS NIXON WHO--WHO WILL BE ABLE TO FREE ALL OF THE PRISONERS. HE CAN DO THIS BY AUTHORING THE SEVEN-POINT PEACE PROPOSAL THAT WAS PUT FORWARD A YEAR AGO, LAST JULY.

[redacted]

[redacted] ISTS FOR 1 YEAR, FOR 1 [redacted]. IF RICHARD NIXON AT THE PARIS PEACE TALKS LAST JULY HAD ADDRESSED HIMSELF TO THE SEVEN-POINT PEACE PROPOSAL, WHICH IS RECOGNIZED BY PEOPLE ALL OVER THE WORLD AS BEING THE MOST JUST AND RIGHTEOUS PROPOSAL EVER PUT FORWARD BY ONE SIDE DURING A PERIOD OF WAR, ALL OF YOU WOULD HAVE BEEN HOME WITHIN 3 MONTHS. AND WE THINK THIS IS A CRIME.

WE THINK THIS IT IS A CRIME THAT THE PRESIDENT OF THE UNITED STATES HAS CYNICALLY PREVENTED YOUR FREEDOM, HAS CYNICALLY LIED TO THE AMERICAN PEOPLE, MAKING THEM BELIVE THAT IT IS HE WHO IS SEEKING PEACE, WHEN WE KNOW IT IS THE COUNTRARY.

WE HOPE THAT YOU ARE TAKING THIS TIME TO STUDY, TO LEARN, SO THAT WHEN YOU COME HOME YOU CAN SPEAK TO THE REST OF THE AMERICAN PEOPLE. AND WE HOPE THAT WILL BE SOON, ((RECORDING ENDS--FBIS))

.GED JANE FONDA IMPRESSIONS OF TALK WITH U.S. POW'S

71232 HANOI IN ENGLISH TO AMERICAN SERVICEMEN INVOLVED IN THE

NDOCHINA WAR 1303 GMT 15 AUG 72 C

((TEXT)) HERE IS JANE FONDA TELLING HER IMPRESSIONS AFTER

EETING CAPTURED U.S. PILOTS IN THE DEMOCRATIC REPUBLIC OF VIETNAM:

((FOLLOWS RECORDED FEMALE VOICE WITH AMERICAN ACCENT--FBIS))

THIS IS JANE FONDA SPEAKING FROM HANOI. YESTERDAY EVENING,

JULY 19, I HAD THE OPPORTUNITY OF MEETING SEVEN U.S. PILOTS. SOME

OF THEM WERE SHOT DOWN AS LONG AGO AS 1966 AND SOME OF THEM HAD

BEEN SHOT DOWN VERY RECENTLY. THEY ARE ALL IN GOOD HEALTH.

WE HAD A VERY LONG TALK, A VERY OPEN AND CASUAL TALK. WE

EXCHANGED IDEAS FREELY. THEY ASKED ME TO BRING BACK TO THE AMERICAN

PEOPLE THEIR SENSE OF DISGUST OF THE WAR AND THEIR SHAME

FOR WHAT THEY HAVE BEEN ASKED TO DO.

THEY TOLD ME THAT THE PILOTS BELIEVE THEY ARE BOMBING MILITARY

TARGETS. THEY TOLD ME THAT THE PILOTS ARE TOLD THAT THEY ARE

BOMBING TO FREE THEIR BUDDIES DOWN BELOW; BUT, OF COURSE,

WE ALL KNOW THAT EVERY BOMB THAT FALLS ON NORTH VIETNAM ENDANGERS

THE LIVES OF THE AMERICAN PRISONERS.

[redacted]

100-459279-431 End.

[redacted]

CK HOME TO THEIR LOVED ONES AND FRIENDS, TELLING TH TO PLEASE

AT ACTIVELY INVOLVED IN THE PEACE MOVEMENT AS POSSIBLE,

REVIEW THEIR EFFORTS TO END THE WAR.

ONE OF THE MEN WHO HAS BEEN IN THE SERVICE FOR MANY, MANY YEARS

HAS WRITTEN A BOOK ABOUT VIETNAMESE HISTORY, AND I THOUGHT

THIS WAS VERY MOVING, THAT DURING THE TIME HE'S BEEN HERE, AND

THE TIME THAT HE HAS HAD TO REFLECT ON WHAT HE HAS BEEN

THROUGH AND WHAT HE HAS DONE TO THIS COUNTRY, HE HAS--HIS THOUGHT

HAS TURNED TO THIS COUNTRY, ITS HISTORY OF STRUGGLE AND THE

PEOPLE THAT LIVE HERE.

THEY--THEY LISTEN TO THE RADIO, THEY RECEIVE LETTERS, THEY

ARE IN GOOD HEALTH, THEY ASKED ABOUT NEWS FROM HOME.

I THINK WE ALL SHARED DURING THE TIME THAT I SPENT WITH THEM

A SENSE OF--OF DEEP SADNESS THAT A SITUATION LIKE THIS HAS TO

EXIST, AND I CERTAINLY FELT FROM THEM A VERY SINCERE DESIRE TO

EXPLAIN TO THE AMERICAN PEOPLE THAT THIS WAR IS A TERRIBLE CRIME

AND THAT IT MUST BE STOPPED, AND THAT RICHARD NIXON IS DOING

NOTHING EXCEPT ESCALATING IT WHILE PREACHING PEACE, ENDANGERING

THEIR LIVES WHILE SAYING HE CARES ABOUT THE PRISONERS.

AND I THINK ONE OF THE THINGS THAT TOUCHED ME THE MOST WAS

[redacted]

[redacted] PILOTS SAID TO ME THAT HE WAS READING A BOOK

[redacted] "THE DRAFT", A PUBLICATION BY THE AMERICAN FRIENDS

SERVICE COMMITTEE, AND THAT IN READING THIS BOOK, HE HAD UNDERSTOOD

LOT ABOUT WHAT HAD HAPPENED TO HIM AS A HUMAN BEING IN HIS

[redacted] YEARS OF MILITARY SERVICE. HE SAID THAT DURING THOSE 16 YEARS,

HE HAD STOPPED RELATING TO CIVILIAN LIFE. HE HAD FORGOTTEN THAT

THERE WAS ANYTHING ELSE BESIDES THE MILITARY AND HE SAID IN REALIZING

WHAT HAD HAPPENED TO HIM, HE WAS VERY AFRAID THAT THIS WAS

HAPPENING TO MANY OTHER PEOPLE.

I WAS VERY ENCOURAGED BY MY MEETING WITH THE PILOTS

(BECAUSE) I FEEL THAT THE STUDYING AND THE READING THAT THEY HAVE

BEEN DOING DURING THEIR TIME HERE HAS TAUGHT THEM A GREAT DEAL

IN PUTTING THE PIECES OF THEIR LIVES BACK TOGETHER AGAIN IN A

BETTER WAY, HOPEFULLY. AND I AM SURE THAT WHEN--WHEN THEY GO

HOME, THEY WILL GO HOME BETTER CITIZENS THAN WHEN THEY LEFT.

MOCRACY IN AMERICA! ((FOLLOWS RECORDED FEMALE VOICE WITH AMERICAN

CLICHE-FILLED))

THIS IS JANE FONDA SPEAKING FROM HANOI. LIKE TENS OF THOUSANDS OF

HER AMERICANS, I'M EXTREMELY CONCERNED THESE DAYS ABOUT THE BETRAYAL

EVERYTHING THAT MY COUNTRY STANDS FOR--ABOUT THE BETRAYAL

F OUR FLAG, ABOUT THE BETRAYAL OF THE VERY PRECEPTS UPON

HICH OUR COUNTRY WAS FOUNDED: EQUALITY FOR ALL PEOPLE, LIBERTY,

ND FREEDOM.

IN 1954, THE GENEVA ACCORDS WERE SIGNED, WHICH CALLED FOR THE

EMPORARY DIVIDING OF VIETNAM INTO TWO MILITARY REGROUPMENT

ONES. THE GENEVA ACCORDS ALSO STATED THAT IN 1956, GENERAL

LECTIONS WERE TO BE HELD WHICH--WHICH WOULD REUNITE THIS COUNTRY.

AT THAT TIME, PRESIDENT EISENHOWER NOTED THAT IF ELECTIONS WERE

HELD, PRESIDENT HO CHI MINH WOULD HAVE BEEN ELECTED PRESIDENT OF

A REUNITED VIETNAM BY 80 PERCENT OF THE VOTES. AND SO, AS HAS BEEN

THOROUGHLY DOCUMENTED IN THE PENTAGON PAPERS, THE UNITED STATES,

VIA THE CIA, SABOTAGED THE ELECTIONS AND INSTALLED NGO DINH DIEM

AS A PUPPET DICTATOR IN SOUTH VIETNAM. JUST AS WE ARE SUPPORTING

A PUPPET DICTATOR, THIEU, IN SAIGON TODAY. THAT WAS ONE BETRAYAL

OF WHAT OUR COUNTRY STANDS FOR.

IN 1968, AFTER HAVING SUFFERED A SERIES OF DEFEATS IN SOUTH

4

[redacted] TO RECOGNIZE THE FACT [redacted] THE

BOMBING OF VIETNAM, AND THE BOMBING OF THE DEMOCRATIC PUBLIC

F VIETNAM IN PARTICULAR, WAS NOT GOING TO FORCE THE VIETNAMESE

EOPLE TO GIVE UP THEIR RESISTANCE TO FIGHT FOR FREEDOM, INDEPENDENCE,

ND DEMOCRACY. PRESIDENT JOHNSON WAS FORCED TO THE PARIS PEACE

ALKS AND WAS FORCED TO (SIGN) AN UNCONDITIONAL BOMBING HALT AND

TOP ALL BOMBINGS OF THE DEMOCRATIC REPUBLIC OF VIETNAM.

RICHARD NIXON HAS VIOLATED THE 1968 BOMBING HALT, AND IN

DOING SO HAS BEEN A TRAITOR TO EVERYTHING THAT THE UNITED STATES

STANDS FOR. I WOULD LIKE TO STATE HERE PUBLICLY THAT THE

AMERICAN PEOPLE WILL ONE DAY KNOW--THE BOOKS WILL ONE DAY BE

OPEN TO ALL OF THE CRIMES WHICH (IRI--WHICH--WHICH) RICHARD NIXON

HAS COMMITTED.

RICHARD NIXON, HISTORY WILL ONE DAY REPORT YOU AS THE NEW

HITLER, AND PATRIOTIC AMERICANS WILL ONE DAY HAVE TO WORK LONG

AND HARD TO ERASE--ERASE THE BLIGHT OF YOUR YEARS IN OFFICE.

IT IS NO WONDER THAT YOU (TOO) TO SUCH LENGTHS TO LIE TO THE

WORLD ABOUT WHAT YOU ARE DOING. IT IS NO WONDER THAT YOU ARE

SO CYNICALLY MANIPULATING THE AMERICAN PUBLIC INTO BELIEVING

THAT YOU ARE STRIVING FOR PEACE, WHEN YOU ARE IN FACT COMMITTING

THE MOST HEINOUS CRIMES AGAINST THE INNOCENT CIVILIANS OF VIETNAM.

SO, WHEN WE HEAR THE WORD TREASON, WE SHOULD THINK VERY

[redacted]

[redacted]

ND IS KILLING, ABOUT WHO IS BREAKING THE LAW, AND WHO IS BETRAYING

HE BEST QUALITIES OF MANKIND?

I THINK THAT ALL AMERICANS TODAY WOULD LIKE THE U.S. SOLDIERS,

E U.S. ADVISORS, THE U.S. PLANES TO COME HOME TO AMERICA,

WE CAN WE PRETEND TO BE EXPORTING DEMOCRACY TO OTHER COUNTRIES

HEN WE CAN'T PRETEND TO PRACTICE DEMOCRACY AT HOME, WHEN WE

CAN'T PRETEND TO PRACTICE EQUALITY AT HOME? THERE IS NO EQUALITY

FOR THE BLACK PEOPLE, THE BROWN PEOPLE, THE ASIAN PEOPLE, THE RED

PEOPLE, THE PUERTO RICANS, THE WORKING PEOPLE OF THE UNITED STATES.

THE VERY FACT THAT THE MAJORITY OF PEOPLE WANT THE TROOPS TO COME

HOME AND WANT THE BOMBING TO STOP, AND YET THIS CONTINUES, IS A

BLATANT PROOF OF THE FACT THAT NIXON HAS BETRAYED DEMOCRACY

IN AMERICA. 091300 [redacted] 09/21/62 AUG

Moscow and possibly on to Stockholm, Sweden, if no convenient commercial flight is available. The possibility exists of a stop en route in Vientiane, Laos, although the planners prefer to by-pass Vientiane. The stop in Moscow is intended by the planners to be held to a minimum length with press coverage to be avoided if possible. From Moscow, the preferred route will be directly to Stockholm where the planners expect to arrive on 24 September at the latest, but possibly as early as late on 23 September.

3. The Swedish planners hope to keep the three Americans in Stockholm for at least 24 hours in order to carry out extensive media coverage of their presence and their statements. The former prisoners are being encouraged by members of the WCC to speak out extensively while in Stockholm. The WCC members are telling the American prisoners that they might achieve a form of insurance against their being taken to the United States and secreted away from their families for long periods of debriefing. The prisoners are being told that the rationale behind such "insurance" is that if everything has been said in Stockholm, then the Pentagon cannot justify secreting the men away and classifying all that they have to report. The men are further being advised by the WCC that if they go to the United States and make remarks critical of U.S. Vietnam policy there, they will be accused by the United States military of being mentally unbalanced, thus prompting ridicule and possibly an additional long and uncomfortable confinement. Stockholm, on the other hand, is considered to be an appropriate "neutral ground" where the Americans will be encouraged and may be willing to speak out, thus leaving the world media with little basis for accusing any participants in the publicity effort of having gotten biased statements from the men in a climate of duress.

4. The arrival in Stockholm is planned to be a quiet and very short affair with little or no press conference activity. It is hoped that the Americans can later be made available to press and media people in a private home or possibly in a hotel.

0019
NND 942005-689

5. In conjunction with the presence in Stockholm of the three former prisoners, Hans Goran Franck, Chairman of the WCC, and Jean-Christophe Oberg, Swedish Ambassador to North Vietnam, are attempting to arrange a visit by Senator Edward F. Kennedy to Stockholm. The two hope to have Senator Kennedy in the city at the same time as the three prisoners in order to attempt to arrange a press conference or similar public activity including the Senator and the three former prisoners. Ambassador Oberg and Franck have been in touch with Senator Kennedy and have said they believe that they have a fairly good chance of having him present. The WCC expects that Ramsey Clark will be in Stockholm at the time of the arrival and media coverage of the former prisoners. It is through him that the WCC hopes to draw Senator Kennedy into public involvement in the prisoner exploitation.

6. The above-described flight travel routing remains flexible, since the WCC organizers of the Western media coverage seek the best available surroundings for the event. Thus Paris is considered as an alternate locale for the media exposure of the three Americans. In this connection, Ambassador Oberg is now in Paris laying plans for possible activity there. Oberg, who has recently been in Stockholm for several weeks, has been a key figure in the planning due to his good North Vietnamese contacts in Paris and Hanoi. Swedish radio and television personnel are also being sent to Paris as well as to Hanoi for assurance of the best possible coverage of the events. Should the media exposure take place in Paris, Oberg and Franck will attempt to get Senator Kennedy to visit Paris instead of Stockholm.

7. Ramsey Clark first proposed to the North Vietnamese, while on his recent trip to Hanoi, a system of choosing the three prisoners to be released. Clark's proposal was to have a drawing of lots (among how many prisoners is not known) in front of cameras. Thus it was hoped to prove that the choice was not one dictated by the North Vietnamese. When the plan was rejected, Clark proposed a second which specified that one prisoner from each of three phases of the war be chosen. The latter plan was accepted by the North Vietnamese and hence one prisoner is of the period of the earliest United States bombing of North Vietnam; one from the period of former

President Johnson's buildup of United States participation in Vietnam; and the third from the latest renewal of the bombing of North Vietnam. Clark proposed this system of choice in order to have former prisoners who could report on conditions faced by all the prisoners in North Vietnam and to prove that treatment had not become worse in the face of continued American bombings.

8. Members of the WCC hope to achieve an impact on American public opinion through publicity of the release of the prisoners and by tying the release to North Vietnamese willingness to deal with the Democratic Party. The WCC members hope in this way to convince the American public that, if the Democratic Party wins the coming Presidential election, all the prisoners can be brought home safely.

INTERNATIONAL DEVELOPMENTS

Peking has handled Hanoi's release of three American airmen in a gingerly way. The airmen and their escort party flew to Peking on 26 September aboard a regularly scheduled Chinese flight. There was no official Chinese reception on their arrival in Peking; they were met by a North Vietnamese embassy official and, according to western journalists, hustled past newsmen into waiting buses by Chinese officials. The Chinese press has not mentioned the stopover in Peking and, in fact, has been silent on the entire prisoner-release matter since the initial announcement early this month that Peking repeated without comment.

By maintaining a low profile, Peking has tried to make the best of a bad situation. The Chinese almost certainly would have preferred to stay clear of the prisoner release operation entirely so as to avoid complicating their relationships with both Hanoi and Washington. [redacted]
